Sir Anthony Eden said: "This unilateral decision of the Egyptian Government to expropriate the Suez Canal Company without notice, and in breach of the concession agreements, affects the rights and interests of many nations. We are consulting other Governments immediately concerned with regard to the serious situation thus created. The consultations will cover both the effect of this arbitrary action on the operation of the Suez Canal and also the wider questions which arise"

Mr. Hugh Gaitskell (Leader of the Opposition) said that the Labour Party "deeply deplore this high-handed and totally unjustifiable step by the Egyptian Government." He asked the Prime Minister whether he would bear in mind the desirability of blocking the sterling balances of the Egyptian Government, in view of the seizure of the Suez Canal Company and the "vague statements" about future compensation. **Sir Anthony Eden** replied that this matter "has already been in our minds"

Mr. Clement Davies associated the Liberal Party with Mr Gaitskell's comment on "this deplorable action" He asked whether the Prime Minister had in mind "consultations with more than the other eight Governments which were parties to the 1888 Convention" [i e the Suez Canal Convention concluded in that year.]

Sir Anthony Eden replied "We have got in touch with the U S Government and the French Government, and are in touch with a number of Governments of the Commonwealth I would ask the House not to press me to say more than this at the moment. The situation must be handled with firmness and care I undertake to give the fullest information to the House at every stage."

Mr. Paget (Lab) compared Colonel Nasser's "technique" with that of Hitler, and asked the Prime Minister whether he was "aware of the consequences of not answering force with force until it is too late" **Mr. Alfred Robens** (Lab.), the Opposition's principal spokesman on foreign affairs, asked the Prime Minister to consider a ban on exports of British arms to Egypt. **Sir Anthony Eden** replied "That matter has also been in our minds"

British Financial Measures against Egypt.

In view of the action taken by the Egyptian Government, the British Treasury issued on July 28 two statutory instruments, both of which were signed by the Chancellor of the Exchequer (Mr. Macmillan).

(1) The first directive forbade the transfer of any cash, securities, or gold belonging to the Suez Canal Company in the United Kingdom without the Treasury's consent—an action which supported the Company's own appeal to banks not to transfer any of its funds to Egypt (see below).

About two-thirds of the tolls paid by shipping using the Suez Canal are paid to the Suez Canal Company through banks in London and Paris, and about one-third through banks in Egypt A large proportion of the canal dues are paid in sterling through British banks, in which connexion *The Times* pointed out that the total funds held in London at any particular time "must clearly run into several million pounds."

(2) The second, and more far-reaching, directive forbade transfers into or out of Egyptian sterling accounts in the United Kingdom without Treasury permission, this measure applying to private accounts as well as to Egyptian Government accounts held in London.

The Times commented as follows on the effects of the second directive . "Egypt, like many other countries, found it convenient to maintain funds in London in the form of sterling to finance a large proportion of her trade with third countries Since she was in what is known as the sterling transferable accounts area, she could use sterling for payment to almost any country outside the dollar area without restriction From now on this will not be possible . ."

Under Treasury instructions issued on July 31, authorized banks in the U.K. (i.e. banks authorized to deal in foreign exchange, merchant banks, and branches of foreign banks) were allowed to pay up to £100 in cash from Egyptian accounts to the holders of those accounts, without getting the permission of the Bank of England. This concession benefited Egyptian businessmen, tourists, diplomats, and students in the U.K., who—under the exchange control measures imposed on July 28—could only draw out small sums not exceeding £5. The effect of the new instructions was therefore to allow U.K. banks to deal with the large numbers of small transactions, mainly in the accounts of Egyptian subjects in Britain, while leaving larger transactions under the Bank of England's control.

Egypt's sterling fund consists of two main accounts : (1) the remains of the wartime sterling balances, now amounting to £110,000,000, which are subject to annual releases under the agreement of August 1955 (see 14420 B) ; and (2) sterling funds earned currently by Egypt, which could be drawn upon freely until July 28 but are now subject to Treasury control. The size of these current accounts is never disclosed by the Treasury

The sterling balances represent the amount credited in Britain to the Egyptian Government in payment for services rendered during the war, when British troops were in Egypt. They originally amounted to over £400,000,000, but releases under various post-war agreements have reduced them to £110,000,000. Under the agreement of August 1955, the U.K. agreed to release these balances in a number of annual instalments until all Egypt's blocked sterling was released by 1963. On Jan. 2, 1956, the U.K. released £20,000,000 (see 14614 A), no further releases being due until early in 1957.

British Ban on Export of War Material to Egypt.

In a further statement to the House of Commons on July 30, Sir Anthony Eden said : "No arrangement for the future of this great international waterway [the Suez Canal] could be acceptable to the British Government that would leave it in the unfettered control of a single Power which could, as recent events have shown, exploit it purely for purposes of national policy." After describing the financial measures taken against Egypt, he announced that all British exports of war material to Egypt had been stopped. Asked whether this included the two destroyers recently sold by Britain to Egypt (see 14342 A), the Prime Minister said that "we can leave it to the Royal Navy to take care of them wherever they are"

The two warships concerned—the *Al Quaher* (ex-H M S *Myngs*) and *Al Fatteh* (ex-H M S *Zenith*) were both reported to be in British ports at the time of the Suez Canal crisis The *Al Quaher* was stated to be at Portsmouth, almost ready to sail, whilst the *Al Fatteh* was said to be still undergoing trials from Messrs Thorneycroft's yards Both warships are of 1,700 tons displacement

The Prime Minister's statement had been preceded by a 2½-hour Cabinet meeting attended (in addition to Sir Anthony Eden) by Mr. Selwyn Lloyd, Mr. Butler, Mr. Macmillan, Lord Salisbury, Lord Home, Mr. Watkinson (Minister of Transport and Civil Aviation) and the Chiefs of Staff. Sir Walter Monckton was unable to attend owing to indisposition.

British and French Naval and Military Precautions.

The Admiralty announced on July 31 that certain naval movements had been ordered, but gave no details of what ships or areas were involved. On the same day instructions were given to British troopships returning from the Far East to avoid the Suez Canal and make the journey round the Cape. The troopship *Dunera*, outward bound for Hong Kong, was recalled to home waters from Malta on Aug. 1. The War Office announced on the same day that "precautionary military measures" had been taken, no details being issued.

Further precautionary measures were announced on Aug. 2, as follows . (i) three aircraft carriers at present at Portsmouth or Plymouth—H.M.S. *Bulwark* (22,000 tons), H.M.S. *Theseus* (13,190 tons), and H.M.S. *Ocean* (13,190 tons)—would sail for the Mediterranean within a few days ; (ii) a number of *Canberra* jet bomber squadrons would fly out to Malta from U.K. bases ; (iii) all R.A.F. Transport Command scheduled services had been cancelled so that the aircraft could be available for the flying out of ground personnel and spare parts and for other emergency use ; (iv) the Life Guards and the 1st Bn. Grenadier Guards, both stationed at Windsor, received orders to be ready to move (the destination was not disclosed) ; (v) the 1st Bn. Somerset Light Infantry (which had recently returned from Malaya) and No. 42 Commando, Royal Marines, both in the Plymouth area, were also reported to be under orders to move to an undisclosed destination.

In addition, the Queen approved a Royal Proclamation on Aug. 2 recalling a limited number of Army reservists. The Prime Minister, in a statement to the House of Commons, explained that only a very small number of specialists and technicians would be required in Class A and B of the Army Reserve and Category 1 and 2 of the Army Emergency Reserve.

It was understood that the greater number would be required from Section A of the Regular Reserve and from Category 1 of the Army Emergency Reserve. The total numbers of men who would be liable for recall in the event of a complete mobilization of these categories of the Army Reserve are · Section A, Regular Reserve, 24,000 , Section B, Regular Reserve, 100,000 , Category 1, Army Emergency Reserve, 3,000 , Category 2, Army Emergency Reserve, 150,000 The strength of the Army Reserve of officers is about 12,000.

It was announced in Paris on the same day (Aug. 2) that the French Mediterranean Fleet was assembling at Toulon and had received orders to prepare to sail.

The French Mediterranean Fleet comprises the 35,000-ton battleship *Jean Bart*, the aircraft carriers *Arromanches* (14,000 tons) and *Bois-Belleau* (11,000 tons), the 7,600-ton cruiser *Georges Leygues*, the light cruisers *Guichen* and *Chateaurenault* (each of 3,700 tons), four heavy destroyers of 2,700 tons, 15 light destroyers, seven frigates, six submarines, and a number of smaller craft. A third aircraft carrier, the *Dixmude*, was reported to be in dry-dock It was stated that close co-operation would be maintained with the British Royal Navy.

The British Embassy in Cairo advised all British nationals living in Egypt to consider leaving the country in their own interests unless there were "compelling reasons" for staying. Similar advice was given to British nationals due to return to Egypt from abroad. About 20,000 British subjects are registered as living in Egypt, of whom the great majority are Maltese and Cypriots and about 5,000 are from the United Kingdom.

The French Embassy gave similar advice to French nationals living in Egypt, particularly women and children. No statement was issued by the U.S. Embassy with regard to American nationals in Egypt.

French Denunciation of Egyptian Action. - Financial Measures against Egypt.

The Egyptian Government's seizure of the Suez Canal Company was strongly denounced by M. Mollet (the French Prime Minister) and M. Pineau (Foreign Minister), and by French newspapers of all shades of opinion with the exception of the Communist organs After a ministerial meeting on July 27, M. Pineau declared that France would " not accept the unilateral action of Colonel Nasser " in nationalizing the Suez Canal Company, and would act in full agreement with Great Britain and the United States. An official communiqué described the Egyptian nationalization law as a violation of the Suez Canal Company's concession, and declared that the French Government would take " all measures to ensure the protection of French subjects and interests " in Egypt.

M. Pineau's statement was issued after a stormy meeting with the Egyptian Ambassador, who refused to receive an *aide-memoire* setting out the French case against the Egyptian Government's action. M Pineau said after the meeting that he had informed the Ambassador verbally about France's attitude on the Suez Canal question; that he had taken the opportunity to let the Ambassador know that Colonel Nasser had broken his word on the Algerian question [Colonel Nasser had recently promised M. Pineau that Egypt would not interfere in Algerian matters and that Algerian rebels would not receive training in Egypt], and that he had also told the Ambassador that the " act of plunder " which Colonel Nasser had now committed was still more serious.

The Egyptian Ambassador (M Kamal Abdel Nabi) issued a statement saying that M. Pineau's protest was " inadmissible and unacceptable " He (the Ambassador) had " protested with vehemence " against M Pineau's attitude, and had expressed the opinion that the Egyptian Government would " reconsider its position with regard to the relations between the two Governments "

In a press statement on July 30, M. Mollet described Colonel Nasser as an " apprentice dictator " whose methods were similar to those used by Hitler—" the policy of blackmail alternating with flagrant violations of international agreements." Quoting from Colonel Nasser's pamphlet *The Philosophy of Revolution*—which, M. Mollet said, should have been entitled *Mein Kampf*—the French Prime Minister said that it was apparent that Nasser saw himself in the role of a " hero " and creator of an Arab empire stretching from the Persian Gulf to the Atlantic. M. Mollet declared that France had decided upon " an energetic and severe counter-stroke " to the Egyptian dictator, which would take the form of " concerted action by the Western allies who are pledged to uphold law and justice." He stressed that the Western Powers were not protesting against an ordinary act of nationalization but against the Egyptian Government's unilateral action in breaking an international agreement.

Financial measures against Egypt, identical to those imposed by Britain, were announced by the French Government on June 29.

American Reactions to Suez Crisis. - " Freezing " of Assets of Egyptian Government and Suez Canal Company.

The following statement on the Suez crisis was issued by the U.S. State Department on July 27: " The announcement by the Egyptian Government with respect to the seizure of the installations of the Suez Canal Company carries far-reaching implications. It affects the nations whose economies depend upon the products which move through this international waterway, as well as the owners of the company itself. The United States is consulting urgently with other Governments concerned."

The Suez Canal question was discussed by President Eisenhower and his Cabinet on the same day, whilst the President also had a meeting with Mr. Hoover, acting Secretary of State in the absence of Mr. Dulles, who was visiting Peru at the time. The State Department spokesman, Mr. Lincoln White, said that consultations were in progress with London and Paris, and would be broadened later to include other countries affected by the passage of goods through the canal.

At a press conference on Aug. 1, President Eisenhower said that " we are manifestly faced with a grave issue, important to every country that has a sea coast." He emphasized that freedom of navigation on the Suez Canal was not only important to the European countries but was also " vital " to America's own economy and her future welfare. Mr. Dulles said on his return to Washington (July 29) that the Egyptian Government's action had " struck a grievous blow at international confidence."

The U.S. Treasury issued an Order on July 31 temporarily " freezing " all assets of the Egyptian Government and the Suez Canal Company in the United States " pending determination of their ownership and the existing situation." The decision did not affect private Egyptian funds in the United States. The Order was issued under the Foreign Assets Control Statute, and was effected through the Federal Reserve Banks.

Three-Power Discussions in London. - Convening of International Conference in London. - Proposal for International Control of Suez Canal.

Three-Power discussions on the Suez crisis were opened in London on July 29 between Mr. Selwyn Lloyd, M. Pineau, and Mr. Robert Murphy, the U.S. Deputy Under-Secretary of State. Senior officials of the British and French Foreign Offices and the U.S. State Department were also present. The discussions were continued on July 30, when Sir Anthony Eden had separate meetings with M. Pineau and Mr. Murphy. On the personal instructions of President Eisenhower, Mr. Dulles flew to London on July 31 to take part in the tripartite discussions on the Suez Canal question.

The tripartite talks ended on Aug. 2, when it was announced that an international conference of 24 countries, to open in London on Aug. 16, would be convened by the British Government to consider the establishment of an international body or agency for the Suez Canal to ensure that freedom and security of transit were preserved to the shipping of all countries, with due regard to the interests of Egypt. The three-Power communiqué was worded as follows .

" The Governments of France, the United Kingdom, and the United States join in the following statement

(1) They have taken note of the recent action of the Government of Egypt whereby it attempts to nationalize and take over the assets and the responsibilities of the Universal Suez Canal Company. This company was organized in Egypt in 1856 under a franchise to build the Suez Canal and operate it until 1968. The Universal Suez Canal Company has always had an international character in terms of its shareholders, directors and operating personnel, and in terms of its responsibility to assure the efficient functioning as an international waterway of the Suez Canal.

In 1888 all the great Powers then principally concerned with the international character of the canal and its free, open, and secure use without discrimination joined in the Treaty and Convention of Constantinople This provided for the benefit of all the world that the international character of the canal would be perpetuated for all time, irrespective of the expiration of the concession of the Universal Suez Canal Company.

Egypt as recently as October, 1954, recognized that the Suez Canal is a waterway economically, commercially, and strategically of international importance, and renewed its determination to uphold the Convention of 1888.

(2) They do not question the right of Egypt to enjoy and exercise all the powers of a fully sovereign and independent nation, including the generally recognized right, under appropriate conditions, to nationalize assets, not impressed with an international interest, which are subject to its political authority.

But the present action involves far more than a simple act of nationalization. It involves the arbitrary and unilateral seizure by one nation of an international agency which has the responsibility to maintain and to operate the Suez Canal so that all the signatories to, and beneficiaries of, the Treaty of 1888 can effectively enjoy the use of an international waterway upon which the economy, commerce, and security of much of the world depends.

This situation is the more serious in its implications because it avowedly was made for the purpose of enabling the Government of Egypt to make the canal serve the purely national purposes of the Egyptian Government rather than the international purpose established by the Convention of 1888

Furthermore, they deplore the fact that, as an incident to its seizure, the Egyptian Government has had recourse to what amounts to a denial of fundamental human rights by compelling employees of the Suez Canal Company to continue to work under threat of imprisonment.

(3) They consider that the action taken by the Government of Egypt, having regard to all the attendant circumstances, threatens the freedom and security of the canal as guaranteed by the Convention of 1888 This makes it necessary that steps be taken to assure that the parties to that Convention and all other nations entitled to enjoy its benefits shall in fact be assured of such benefits.

(4) They consider that steps should be taken to establish operating arrangements under an international system designed to assure the continuity of operation of the canal, as guaranteed by the Convention of Oct. 29, 1888, consistently with legitimate Egyptian interests.

(5) To this end they propose that a conference should promptly be held of parties to the Convention and other nations largely concerned with the use of the canal. The invitations to such a conference, to be held in London on Aug. 16, 1956, will be extended by the Government of the United Kingdom to the Governments named in the annex to this statement. The Governments of France and the United States are ready to take part in the conference

Parties to the Convention of 1888.—Egypt, France, Italy, Netherlands, Spain, Turkey, the United Kingdom, the U.S.S.R. [The signatories of the 1888 Convention were Great Britain, France, Germany, Austria-Hungary, Spain, Italy, the Netherlands, Russia, and Turkey]

Other nations largely concerned in the use of the canal, either through ownership of tonnage or pattern of trade.—Australia, Ceylon, Denmark, Ethiopia, the German Federal Republic, Greece, India, Indonesia, Japan, New Zealand, Norway, Pakistan, Persia, Portugal, Sweden, the United States."

Reactions in Other Countries.

While the Egyptian Government's action was warmly supported in all the Arab countries, and also in the Soviet Union and Spain, deep concern was expressed by countries of the British Commonwealth, as well as by Italy.

Australia. The Minister of External Affairs (Mr Casey) said on July 30 that the Egyptian Government's "abrupt and high-handed" action raised "most serious apprehensions about its attitude to the economic, commercial, and strategic interests of other countries". By taking over the Suez Canal Company, Egypt had arbitrarily and unilaterally assumed the power to allow or deny the use of the Canal to other countries, and to impose whatever charges she thought fit upon a large proportion of the world's commerce. This step, which amounted to a punitive action against other nations possessing legitimate rights, was "of profound concern to all countries whose policies are based on respect for essential principles in international relations." A free and unfettered flow of cargoes and ships through the Canal was vital to the Australian economy, and the Australian Government was in urgent communication with other nations affected.

Canada. Mr Lester Pearson (Secretary for External Affairs) made a statement on July 28 condemning the Egyptian Government's action in violating an international convention governing the use of such an important waterway as the Suez Canal. This convention, he pointed out, safeguarded the use of the Canal in peace and war, and in that sense Egypt had already violated it by banning Israeli shipping from using the Canal. Canada, as an important trading nation, had a real interest in the efficient and non-discriminatory operation of the waterway, and was conferring with the U.S. and other Western Governments to determine what collective action, if any, should be taken.

New Zealand. Mr. Holyoake, the Acting Prime Minister, said on July 31 that the New Zealand Government viewed the implications of Egypt's action with "grave concern" and was keeping in close touch with London on the matter.

India. No official statement was issued in New Delhi, but Mr Nehru told the Indian Parliament on July 31 that his recent discussions with Colonel Nasser at Brioni and Cairo (see 15008 A) "did not relate to the Suez Canal or any aspect of Anglo-Egyptian relations." Mr. Nehru said that he had learned of the Egyptian decision to nationalize the Canal only through press reports after he had returned to Delhi.

Italy. The Italian Cabinet issued a statement on July 31 saying that it was "following with great attention" the situation created by the Egyptian Government's action. After pointing out that "the juridical aspects of the situation involve also the freedom—guaranteed by international agreement—of a transit route between the Mediterranean and the Red Sea, which is vital for Italy," the statement said that the Italian Government "cannot avoid expressing its preoccupation about the eventual damage which could be caused to the Italian economy, to Italian shipping companies, and to Italian private citizens should there be any alterations in the conditions under which traffic through the Canal has been maintained hitherto."

The importance to Italy of freedom of navigation on the Canal was stressed by many Italian newspapers, particularly as a major part of Italy's seaborne trade, including 90 per cent of her oil imports, passes through the Canal.

Soviet Union. In a speech in Moscow on July 31, M. Khrushchev said that he saw "no cause for alarm" in the Egyptian Government's action, which had been received with "too much excitement" in Britain and France. "The nationalization of the Suez Canal," he declared, "is an action which the Egyptian Government, as a sovereign government, is entitled to take. We consider that the policy of exerting pressure on Egypt is mistaken. Rashness and haste in this matter can bring only undesirable consequences to the cause of peace, and can only damage the interests of the Western Powers themselves in that area.

"The nationalization of the Suez Canal does not affect the interests of the peoples of Britain, France, the U.S.A., and other countries. It is only the former Suez Canal Company, which received high profits from the exploitation of the canal, that is now being deprived of the possibility of enriching itself at Egypt's expense.

"The Soviet Union, being directly interested in the maintenance of freedom of shipping through the Suez Canal, and taking note of the statement of the Egyptian Government to the effect that the Suez Canal will remain free for all, considers that there are no grounds for alarm and concern over this matter. We are confident that the situation in the Suez Canal area will not become aggravated if it is not artificially aggravated from outside."

"After declaring that the U.S.S.R. supported all countries who were "freeing themselves from colonial enslavement," M. Khrushchev condemned demands by "unreasonable voices" in the West for the use of force against Egypt, and expressed his confidence that the "commonsense, experience, and political sobriety" of British and French statesmen would help them to understand "this historic act."

The Egyptian Government's action in nationalizing the Suez Canal was praised by *Izvestia*, *Pravda*, and other Soviet newspapers. *Pravda* expressed "warm sympathy" for Egypt's "struggle for independence," and said that the U.S.S.R. was ready to give "favourable consideration to any practical request made by Egypt for aid in carrying out industrialization and in developing the country's agriculture." *Izvestia* attacked what it described as the "threats of war" made by certain Israeli leaders, "aided and abetted by external imperialist quarters," against Israel's "peace-loving neighbours".

[In connexion with Soviet offers of economic aid to Egypt, as stressed in the Soviet newspapers, it was commented in the West that no mention was made of the Aswan Dam scheme. It was also commented that the *Izvestia* attack on Israel was apparently designed to placate Arab opinion, which had been strongly critical of the recent sale of Soviet oil to Israel—see 15010 A.]

Spain. The newspaper *Arriba*, official organ of the Falangist Party, expressed strong support for Egypt in the Suez crisis, and at the same time attacked Britain. Other leading Spanish newspapers welcomed Egypt's action in nationalizing the Suez Canal.

Arab States. Enthusiastic support for Egypt and for President Nasser was expressed in all the Arab countries. The Prime Minister of the Sudan, Mr Khalil, described the nationalization of the Suez Canal Company as a "daring and important step of great benefit to Egypt", the Prime Minister of the Lebanon said that his country was "heart and soul with Egypt"; the Syrian Prime Minister said that the Syrian Army had taken "all preparatory measures" to stand by Egypt's side if any trouble should arise, and the Jordanian Foreign Minister declared that Egypt was fully entitled to nationalize commercial firms operating in her territory. The Egyptian action was also warmly welcomed in the Iraqi Press.

Israel. The Israeli newspapers (except the Communist organs) draw a parallel between Nasser and Hitler, and expressed the opinion that President Nasser would not have seized the Suez Canal had the Western Powers shown a stronger attitude in face of Egypt's actions in recent years, in particular, if they had allowed Israel to obtain arms to counterbalance the Egyptian arms supplies from the Communists, and if they had resisted Egypt's illegal blockade of Israeli ships and cargoes.

Egyptian Reactions to British Financial Measures.

The first Egyptian reaction to the British exchange control measures was an Order (July 29) banning Egyptian exports to the sterling area unless they were paid for in "acceptable foreign currency" of countries trading with Egypt. This measure, however, was cancelled within a few hours, and on July 30 the Minister of Finance (Dr. Kaissouni) said that Egyptian exports to Britain would continue unchanged and that Egypt did not intend to "take vengeance" for the financial restrictions imposed by the British Government. Dr. Kaissouni—whose statement was issued after a long discussion with President Nasser—described the British financial measures as a "violation of international law," but expressed confidence that the independent monetary policy followed by Egypt in recent years would enable her economy to withstand the "arbitrary measures" taken by the British Government. He said that Egypt wished to put no obstacles in the way of free navigation of the Suez Canal, and would accept "everything as before," including cheques in sterling and francs in payment of canal charges.

Colonel Mahmoud Younis, the managing director of the Egyptian Suez Canal Authority (the new body created under the nationalization law), stated on July 29 that shipping companies using the Canal had been informed that the canal dues could be paid in Cairo, London, or Paris, but that cheques should be made out in favour of the Suez Canal Authority. Any ships whose dues had been paid in advance in London or Paris in favour of the "former company" before nationalization would be allowed to proceed through the canal. Similarly, all ships who after the nationalization date could show that they had paid dues in London or Paris in favour of the Suez Canal Authority would be allowed to proceed, in spite of the British Government's action in blocking sterling.

Statements by Suez Canal Company.

The Suez Canal Company issued a statement on July 27 which, after speaking of the "high-handed action" of the Egyptian Government, reminded British and foreign banks that "its cash balances and other assets, in whatever form and wherever they are, are its sole property that is to say, the property of the shareholders." It therefore called upon British and foreign banks to "disregard instructions which might be given them by the Egyptian Government or by the body created under the decree of nationalization," and to "act only on instructions emanating from the Company." After a four-hour emergency meeting of the Company's board of directors in Paris, a further statement was issued on July 28 rejecting the validity of the Egyptian Government's action, and announcing that any shipping lines which paid their transit dues into banks in Egypt would not be regarded as having discharged their debts to the Company.

A third statement was issued by the Suez Canal Company on July 30 with regard to the position of its employees in Egypt, and repudiating the Egyptian allegation that the Company had neglected the maintenance of the Suez Canal.

(1) The statement said that the Company's employees in Egypt were working under conditions of martial law, were cut off from the Company's authority, and were subjected to compulsory work under penalties of imprisonment, a situation which constituted "a violation of the rights of the individual." It was pointed out that the Company's employees in this position included 350 French subjects, 135 British subjects, some 900 Europeans of other nationalities, and two American citizens.

(2) "It is not true," the statement declared, 'that the Company has ever neglected the maintenance and improvement of the Suez Canal It has just completed the first instalment of an eighth programme of major improvement works costing £18,000,000 [see 13889 D]. On the contrary, it is the arbitrary action perpetrated against the Company which places in jeopardy the continuation of this programme now in course of being carried out"

Statements by International Chamber of Shipping and General Council of British Shipping.

Shipowners' representatives from nine nations in membership of the International Council of Shipping met in London on Aug. 1 under the chairmanship fo Sir Colin Anderson, chairman of the Council and a director of Anderson, Green & Co. (managers of the Orient Line, a regular user of the Suez Canal). A resolution was adopted declaring that the Canal must be an independent waterway operating under a constitution which would prevent it becoming "the tool of national policies." It was stressed that the expropriation of a vital international waterway could not be regarded as the domestic affair of any one country, the Egyptian seizure of the Suez Canal being described as "a severe blow to world confidence in its international character and operations."

The meeting was attended by representatives of Australia, Belgium, Canada, France, Great Britain, the Netherlands, New Zealand, Norway, and the United States The other countries in membership of the International Council of Shipping are Denmark, Finland, the German Federal Republic, Greece, India, Italy, and Sweden, some of them had observers at the meeting, but they did not vote.

The General Council of British Shipping issued on July 31 the following advice for the guidance of its members whose vessels were likely to transit the Suez Canal.

'(1) Payment of transit dues should continue to be made by owners to the Suez Canal Company according to their established practice Owners who may experience difficulty in securing the passage of their vessels through the Canal because of non-payment of dues to the new Egyptian Authority are advised to communicate with the secretariat of the General Council in order that such further advice as is possible may be given to them.

(2) In view of the uncertainty of the position in the Suez Canal area, owners should ensure that their ships are adequately provided with bunkers, stores, fresh water, etc, to enable them to reach a convenient bunkering or storage port in the event of these facilities not being available in the Suez Canal area, or the ship not being able to transit the canal

(3) While available information shows that, up to date, vessels have been transiting the Canal in the normal way, it must be left to individual owners . to decide whether or not in the present uncertain circumstances to route their vessels *via* the Cape"

The Suez Canal Company and Suez Canal Traffic.

The Suez Canal Company has its head offices in Paris, but is registered in Egypt as an Egyptian joint-stock company. It was formed in 1869 and was granted a 99-year concession (expiring on Nov. 17, 1968), after which control would have reverted to the Egyptian Government. The Company has a majority of foreign shareholders—of which the largest is the British Government, with 353,504 shares out of 800,000 (43 per cent)—and an international board of directors, of whom 16 are French, nine British (including three representatives of the British Government), five Egyptian, one American, and one Dutch. Traffic revenues of the Company in 1955 amounted to £E32,176,600, compared with £E30,338,000 in the previous year.

Oil Shipments through the Canal. Well over half the crude oil and petroleum products consumed by Western Europe is imported *via* the Suez Canal, the United Kingdom proportion being as high as 75 per cent About 15 per cent of U.S. oil supplies also come through the Canal Of the total of 116,000,000 tons of shipping passing through the Canal in 1955 (an increase of 12 9 per cent over 1954), oil tankers accounted for nearly 76,000,000 tons, whilst the volume of crude oil and petroleum products passing through the Canal in that year accounted for about two-thirds of all merchandise carried Canal dues are payable on the size and type of vessel and its cargo—e g a medium-sized oil tanker might pay £5,000 to £8,000 for one trip.

British Oil Imports. The value (c.i.f) of Britain's imports of petroleum and petroleum products (crude and refined) in 1955 was nearly £336,000,000 Imports worth £149,000,000 (44 per cent of the total) came from Kuwait, Bahrain, Qatar, and the Trucial States of the Persian Gulf, some three-quarters of the total from the Gulf being carried through the Suez Canal Oil from Kuwait alone accounted for £125,000,000. About 2 per cent of total British imports of petroleum came from Sarawak, Indonesia, and India in 1955—most of it probably through the Canal. A further 10 per cent—worth nearly £34,000,000—of British imports of petroleum was supplied by Iraq and Saudi Arabia, but the major part of this was carried by pipeline to Mediterranean ports and shipped from there.

Comparative Sea Routes via Suez and the Cape. The sea route from the Persian Gulf to the United Kingdom *via* Suez is about 6,500 miles, against 11,300 miles round the Cape of Good Hope—i e, the distance from the Middle East oilfields to the U K. is greater by two-thirds *via* the Cape than *via* the Canal. The round trip for a laden tanker from the Persian Gulf and for the same tanker returning in ballast takes on the average six to seven weeks by the Canal route, against nine to ten weeks if using the Cape route

It was pointed out in the British press, however, that the greatly increased size of oil tankers in recent years had already raised doubts about the future use of the Suez Canal for oil shipments. *The Times* commented in this connexion:

"Some of the largest tankers now in use, of 45,000 tons deadweight, while able to use the Canal, cannot pass through it fully loaded. Tankers now under construction or projected, of 60,000 and even 80,000 tons, would be under the same disadvantage. In spite of the greater distance of the ocean route, the saving of canal dues and other benefits already make it cheaper to send some of the largest tankers from the Persian Gulf to the east coast of America *via* the Cape of Good Hope than by Suez"

The Suez Canal, built under the direction of the French engineer, Ferdinand de Lesseps, was opened on Nov. 17, 1869, its construction having taken ten years. It is 103 miles in length, running across the desert from Port Said to Suez. In 1873 the then British Prime Minister, Mr. Disraeli, bought 176,602 of the Canal shares for Britain from the Khedive Ismail, at a cost of £3,976,582. Under the Convention of 1888 all nations were guaranteed freedom of navigation on the Suez Canal without discrimination. This right was specifically recognized by the Egyptian Government in the Anglo-Egyptian agreement of 1954, under which Britain agreed to relinquish the Suez base. The only violation of the convention to date has been the Egyptian ban on vessels carrying cargoes to Israel—a measure in which Egypt has claimed belligerent rights in view of the fact that no formal peace treaty between Egypt and Israel has yet been concluded.—(Times - Daily Telegraph - Manchester Guardian - Financial Times - Treasury Press Office - Le Monde, Paris - Le Figaro, Paris - New York Times - Australian News and Information Bureau - Directorate of Information Services, Wellington) **(Prev. rep. Aswan Dam, 14991 A; Suez Canal Company, 13889 D.)**

A. UNITED KINGDOM - GERMANY. — Final Distribution of German Enemy Property. - Debt Settlement Offers by West Berlin City Government and Prussian Electric Company.

The President of the Board of Trade (Mr. Thorneycroft) announced on June 27 that the Administrator of German Enemy Property would begin immediate payment of a third and final dividend of 10½d. in the £, making a total dividend of 2s. 10½d. Altogether some £16,000,000 would have been distributed among 28,000 British claimants.

Mr. Thorneycroft pointed out that further assets accruing over the next few years would be insufficient to allow any further distribution to creditors. It was therefore proposed to allocate up to £250,000 of such accruals to an appropriate charity for the purpose of relieving suffering caused by Nazi persecution, whilst any surplus would go to the Exchequer

The West Berlin City Government announced on June 29 the terms of a debt settlement offer to holders of Berlin 6 per cent. Sterling Bonds, 1927.

The offer provided that future interest would be paid at 4½ per cent; that amortization would start in 1958 at 1 per cent and be increased to 2 per cent from 1963; and that the final maturity date would be July 1, 1977. Two-thirds of the arrears of interest in the period 1945-56, and one-third of the other arrears, would be cancelled and the remainder funded into 4½ per cent Sterling Bonds. The nominal amount of the loan outstanding was £2,257,300

Similar settlements were offered for the Berlin dollar loans of 1925 and 1928.

On July 16 the Prussian Electric Company, of Hanover, offered to pay holders of its 6 per cent 25-year Sterling Bonds of 1928 £179 12s. 2d. per £100 bond and £898 0s. 10d. per £500 bond. Interest would cease to accrue on July 31, 1956. (Board of Trade Journal - Financial Times)

B. ITALY. — New C.-in-C. of Italian Navy.

It was announced in Rome on July 12 that Admiral Giuseppe Marini-Assuma had been appointed Commander-in-Chief of the Italian Navy in succession to Admiral de Pace.
(Giornale d'Italia, Rome) **(Prev. rep. 14350 D.)**

A. PAKISTAN. — Political Developments in West and East Pakistan. - Food Crisis in East Pakistan.

Serious political crises developed in both West and East Pakistan during the first half of 1956. In West Pakistan, following the election of the Interim Legislative Assembly in January, the Moslem League Assembly Party decided on April 3 to withdraw its support from Dr. Khan Sahib, the Chief Minister. Dr. Khan Sahib, however, succeeded in forming a new Cabinet to replace the Moslem League Ministers who had resigned, and formed his own party, the Republican Party, which received the support of a large number of former Moslem League members, thus ensuring it a majority in the Assembly.

In East Pakistan, where Mr. Sarkar's Government had been widely criticized for its handling of the food situation, a constitutional deadlock arose out of the Speaker's refusal to allow the presentation of the Budget estimates. President Mirza accordingly suspended the Constitution on May 26, and authorized Government expenditure for three months before revoking his proclamation on June 1.

Developments in West Pakistan.

In accordance with the Establishment of West Pakistan Act (see 14521 A), and the subsequent amending legislation (see 14584 D), the Interim West Pakistan Legislative Assembly was chosen on Jan. 19 by a system of indirect election. Under this system the former members of the Legislative Assemblies of the Punjab, Sind, the N.W. Frontier Province, and Bahawalpur and Khairpur States, the *jirgas* (councils of elders) in Baluchistan, the Baluchistan States Union, the Tribal Areas, and the Frontier States, and municipal bodies in Karachi and Quetta functioned as electoral colleges. On the proposal of Dr Khan Sahib, the elections were held on a non-party basis, the candidates being chosen on the basis of their personal qualifications. Dr. Khan Sahib was returned unopposed in Peshawar, and five members of his Cabinet were also elected—Sardar Abdul Hamid Dasti, Mr. M. A. Khuhro, Sardar Bahadur Khan, Mian Mumtaz Daultana, and Khan Qurban Ali Khan. The remaining member of the Cabinet, Syed Abid Hussain, was defeated.

The Moslem League Assembly Party (which claimed to include 245 of the Assembly's 306 members) decided on April 3 to withdraw its support from Dr. Khan Sahib, on the ground that the Chief Minister should be a member of the League, and elected Sardar Bahadur Khan as the party's leader. Two members of the Cabinet, Khan Qurban Ali Khan and Syed Abid Hussain, had already resigned on March 13, and following the Moslem League's decision Mian Mumtaz Daultana, Mr Khuhro, and Sardar Bahadur also resigned at Dr. Khan Sahib's request.

Formation of New Khan Sahib Ministry. Dr. Khan Sahib formed a new Cabinet on April 6, in which he held the posts of Chief Minister and Minister for the Public Services, General Administration, and Tribal Affairs. The other members were the Khan of Mamdot (Khan Iftikhar Ahmed) (Revenue), Kazi Fazlullah (Development, Industries, Commerce, and Labour), Sardar Abdul Hamid Dasti (Finance and Education), Arbab Nur Mohammed Khan (Health), Syed Hassan Mahmud (Social Welfare, Local Government, and Information), and Syed Jamil Hussain Rizvi (Refugee Rehabilitation and Law). Another Minister, the Khan of Kalabagh, was subsequently appointed. The Khan of Mamdot was a former Chief Minister of the Punjab, and Kazi Fazlullah was Chief Minister of Sind and a prominent opponent of the faction led by Mr. Khuhro inside the Sind Moslem League.

The Working Committee of the Moslem League expelled the seven League members of Dr. Khan Sahib's Cabinet on April 23 for breach of party discipline, but offered to readmit any of them who resigned from the Cabinet within a week. Only one member, however—Arbab Nur Mohammed Khan, who resigned on April 27—obeyed the Committee's instructions

Formation of Republican Party. Dr. Khan Sahib announced on April 23 that he had formed a new party, under the name of the Republican Party, which would operate as a separate group inside the National Assembly, though continuing to support Mr. Mohammad Ali's Government. During the next few days the new party was joined by all the members of Dr. Khan Sahib's Cabinet except Arbab Nur Mohammed Khan; by Malik Firoz Khan Noon (a former Chief Minister of Punjab) and Sardar Abdur Rashid (a former Chief Minister of the Frontier Province), and by a majority of the Moslem League members of the National Assembly and many members of the West Pakistan Assembly

A Republican Party spokesman stated on July 15 that membership would be open to all communities, and that its programme would include maintenance of the constitutional rights of minorities, restriction of the maximum area of land owned by one person to between 250 and 300 acres, self-determination for the people of Kashmir, and support for the Central Government's foreign policy. Dr. Khan Sahib had previously stated that, in view of the party's declared support for the Central Government, the formation of an alliance with the Awami League (the principal Opposition party) was out of the question.

Expansion of Khan Sahib Ministry. The following new appointments to Dr. Khan Sahib's Cabinet were announced during May and June: Sardar Abdur Rashid (May 5), Chaudri Abdul Ghani Ghuman and Mr. Mohammed Sadiq (May 12); Pirzada Abdus Sattar, the former Chief Minister of Sind, who was dismissed in 1954 for opposing the unification of West Pakistan (May 21); and Mr. Khizalbash, a former Chief Minister of Khairpur, and Mr. Khudadad Khan (June 8).

Developments in Legislative Assembly. When the Legislative Assembly elected its Speaker on May 20, the Republican candidate, Mr. Fazal Ilahi, and the Moslem League candidate, Mir Ghulam Ali Talpur, each received 148 votes, whereupon the temporary chairman (Mr M. H. Khizalbash) gave his casting vote in favour of Mr. Ilahi. This victory for the Republicans was followed by further defections from the Moslem League, and on May 31 the Budget submitted by Dr. Khan Sahib's Ministry was approved by a clear majority. The position of the Moslem League in the Legislative Assembly was further weakened by an electoral tribunal's decision on July 17 invalidating the election of Sardar Bahadur Khan, as well as five other members from the tribal constituencies, on the ground of procedural irregularities.

Arrest of Khan Abdul Ghaffar Khan. Khan Abdul Ghaffar Khan—leader of the Redshirt movement in the former Frontier Province, and a brother of Dr Khan Sahib—was arrested near Peshawar on June 16 by order of the Provincial Government. He was charged with advocating a curtailment of the sovereignty of Pakistan in respect of territories lying within its borders, with intending to influence the public in a manner prejudicial to Pakistan's safety and territorial integrity, and to bring the Government into hatred and contempt, and with inciting disaffection and feelings of enmity between various classes of people. The charges referred to the fact that Khan Abdul Ghaffar Khan, who had been released in 1954 after five years' imprisonment (see 13354 B), had opposed the unification of West Pakistan and advocated the formation of a Pathan province (see 14521 A).

The Redshirt movement was declared illegal on July 10 Another of its leaders, Shad Mohammad Khan, was arrested on July 16 and detained under the Public Safety Act

Developments in East Pakistan.

Temporary Suspension of Constitution. During the autumn of 1955 dissatisfaction with the policy of Mr Sarkar's United Front Government, and in particular with its handling of the food situation, gave rise to widespread unrest in East Pakistan, which spread to the public services. The Chief Secretary, Mr. N. M Khan, resigned on Oct. 26 as a protest against "political interference" by the Government, and a section of the Dacca police went on strike from Nov. 21-25 During the strike 119 people, in addition to members of the police, were arrested as a precautionary measure, among them Mr. Mahmud Ali, general secretary of the left-wing *Ganatantri Dal* (Democratic Party) and a member of the Constitutent Assembly, Sardar Fazlul Karim, an Independent member of the Constituent Assembly; and two members of the Provincial Legislature belonging to the United Progressive Party.

The first meeting of the Legislative Assembly since the formation of Mr. Sarkar's Ministry in June 1955 was convened for May 22, 1956, to approve the Budget by the statutory date of May 31.

Immediately before the meeting the Government announced on May 21 that all political prisoners, including five members of the Provincial Assembly and one of the National Assembly, would be released; that compensation would be paid to the families of those shot by the police during the linguistic riots of 1952; and that processions and demonstrations in the neighbourhood of the Assembly building would be forbidden. In preparation for the Assembly's meeting, discussions took place on May 20 between Mr. Suhrawardy (leader of the Awami League, the largest Opposition party) and leaders of the Congress Party and the *Ganatantri Dal*, with a view to forming a united Opposition. Two Congress members of Mr. Sarkar's Ministry, Mr B. K. Das and Mr S. C Nazumdar, had previously resigned on March 12 in protest against the Islamic provisions in the new Constitution of Pakistan.

When the Assembly met on May 22, the Speaker, Mr. Abdul Hakim, refused to allow Mr. Sarkar (who had taken over the Finance portfolio from Mr. Das) to present the Budget estimates, after a heated debate lasting seven hours. In support of his ruling, Mr. Hakim said that although the Government could have summoned the Assembly much earlier, it had allotted only five days for general discussion of the Budget and for voting on the demands for grants, which in his considered opinion amounted to an infringement of rules by the Government. He therefore adjourned the Assembly *sine die*

President Mirza issued a proclamation on May 26 announcing (*a*) that he had received a report from the Governor of East Pakistan (Mr. Fazlul Huq) stating that a situation had arisen in which the government of the Province could not be carried on in accordance with the provisions of the Constitution; (*b*) that he (the President) had accordingly suspended the Constitution in East Pakistan [under Article 193 of the new Pakistan Constitution—see page 14771] and had assumed all the functions and powers of the Provincial Government. After authorizing expenditure from the revenues of East Pakistan for a period of three months on May 29, however, he revoked his proclamation on June 1 and reinstated Mr. Sarkar's Government in office.

Co-operation of Opposition Parties. - United Front Defections. Following the adjournment of the Assembly, the Awami League, the Congress Party, the United Progressive Party, and the *Ganatantri Dal* agreed on May 25 to co-operate on the basis of a common programme; nine United Front members of the Assembly who had gone into opposition also promised their support. Two members of the Government, Mr. Abdus Salam Khan and Mr. Hashim-uddin Ahmed, resigned on July 13, while 29 members of the United Front (including four former Ministers, three Political Secretaries, three members of the National Assembly, and the Chief Whip) announced on the same day their decision to withdraw their support from the Government and to give up their offices.

In a statement giving the reasons for their decision, the dissident members criticized Mr. Sarkar for his failure to reduce the size of his Ministry, to take the party into his confidence on major decisions, to summon the Assembly regularly, and to hold by-elections; they also alleged that "bickerings" between Mr. Fazlul Huq, Mr. Sarkar, and some of his colleagues had gravely impaired the administration of the Province. In reply to the charge of not convening the Assembly, Mr Sarkar stated on July 14 that he had not done so because a number of its members were also members of the National Assembly, which was preoccupied with the framing of the Constitution, and therefore could not attend the Provincial Assembly

Further Changes in Sarkar Ministry. Mr Ahmed Hussain, a member of the Awami Moslem League, and two Hindus, Mr Lahiri and Mr Manoranjan Sikdar, were sworn-in as Ministers on July 10. Mr Lahiri is the leader of a group of seven members of the Assembly who broke away from the United Progressive Party on June 25.

The Food Situation As a result of severe floods in August 1955, which caused great damage to standing crops and hindered transport, a serious shortage of rice developed in November as stocks of the last crop ran out, the situation being aggravated by widespread hoarding by dealers The Provincial Government accordingly introduced a system of "modified family rationing" in Dacca on Nov. 17, and opened Government shops to sell rice at fair prices. On Feb 5, 1956, the Government decided to introduce full-scale rationing in Dacca and 15 other towns, and to import rice from West Pakistan, Burma, Ceylon, and Indonesia

Gifts of rice from the U S. Government were announced on March 31, and from the Soviet Government (16,500 tons) and U N I.C E F (3,567 tons for distribution to women and children) on June 15. In addition, the U S Government sent 105,000 tons of rice to Pakistan against payment in rupees, under an agreement which provided that the rupee proceeds would be lent back to the Government of Pakistan on a long-term basis for investment in flood control, housing, and hospital projects, or for any other purposes agreed between the two Governments. It was also announced on July 9 that the Indian Government would lend 5,000 tons of rice to Pakistan

In view of the growing seriousness of the situation, the Central Government decided on June 27 to appoint a special ministerial mission to investigate the position and take any steps which were within the competence of the Government of Pakistan President Mirza himself and the mission—which consisted of Syed Amjad Ali (Finance Minister), Mr. K. K. Dutta (Minister of Health), Mr Biswas (Food Minister), and Mr. Kayani (Communications Minister)—arrived in Dacca on June 28.

Mr. Fazlul Huq, in a broadcast on June 30, said that the food crisis had assumed "alarming proportions, unparalleled in the history of East Pakistan for many years," and announced that the Army would take over responsibility for the planning and control of food distribution from July 11. The G.O.C., East Pakistan Region (Major-General Gilani) was accordingly appointed Chief Food Administrator. An ordinance was promulgated on July 9 providing for the setting-up of special courts to try offences against the food regulations, with power to pass sentences of imprisonment up to two years, fines, or public flogging, and for the appointment of Army officers with magisterial powers to preside over such courts.—(Pakistan High Commissioner's Office, London - Dawn, Karachi - Times) **(Prev. rep. West Pakistan, 14521 A; East Pakistan, 14621 A; 14738 C.)**

A. BRAZIL. — Revised Export Bonuses. - Italian and Austrian Adherence to Multilateral System.

The Brazilian Government issued on May 17 a revised classification for the payment of export bonuses, resulting in a devaluation of the effective exchange rate of the cruzeiro by 10 to 33⅓ per cent for most products.

Coffee, cocoa, cotton, and hides were not affected by the changes, the bonuses remaining at Cr. 18.17 per U.S $ for coffee, and at Cr. 24 70 for raw cotton, cocoa beans, and hides. The new bonus rates were Cr. 36.64 for about 30 products, including timber, maize, tea, iron, and manganese ore, and Cr. 48.64 for all unspecified goods The effective exchange rates per U.S.$ were thus Cr. 37.06, Cr. 43.06, Cr. 55.00 and Cr. 67 00 for the four categories.

A trade pact signed between Brazil and Italy at Rio de Janeiro on May 1 brought Italy into the Brazilian multilateral payments system (the "Hague Club"—see 14421 C), with effect from June 1.

Austria became the seventh European country to join the multilateral payments system under an agreement concluded at Rio de Janeiro on July 4, which came into force immediately. It was stated that payments between Brazil and Austria would be effected in sterling.

Total sterling remittances authorized by the Bank of Brazil under the Anglo-Brazilian Payments Agreement of October 1953 (see 14421 C) in settlement of Brazil's accumulated trade debt amounted to about £26,500,000 up to June 30.
(Bank of London and South America, Fortnightly Review - New York Times - Financial Times - Board of Trade Journal) **(Prev. rep. Multilateral System, 14838 A.)**

B. UNITED KINGDOM. — Prominent Liberals join Labour Party. - Joint Statement.

It was announced on July 9 that three well-known Liberals—Mr. Dingle Foot, Q.C., Mr. Wilfrid Roberts, and Mr. Philip Hopkins—had decided to join the Labour Party. Mr. Dingle Foot (a brother of Mr. Michael Foot, the former Labour M.P., and of Sir Hugh Foot, Governor of Jamaica) was Liberal M.P. for Dundee from 1931-45, and Parliamentary Secretary to the Ministry of Economic Warfare from 1940-45; Mr. Roberts was Liberal M.P. for North Cumberland from 1935-49; and Mr. Hopkins unsuccessfullly contested Bath in 1945 and 1950.

The following joint letter was addressed to Mr. Hugh Gaitskell (Leader of the Opposition) by Mr. Foot, Mr. Roberts, and Mr. Hopkins explaining the reasons which had led them to join the Labour Party:

". . During the years immediately before the war the Liberal Party in Parliament played . . an essential part both in relation to national defence and in the championship of individual freedom against every form of bureaucratic encroachment In recent years, however, Liberal leaders and M.P.s have appeared incapable of pursuing any consistent theme save that they have shown a fairly constant preference for voting with the Conservative Party Indeed, since 1951 they have presented what seems to us the extraordinary spectacle of a Liberal Parliamentary Party giving general support to a Tory Government It is merely an indication of the general drift to the right which has led each of us to sever his connexion with official Liberalism.

"During recent years the Liberal Party has tended more and more to revert to a form of 19th-century individualism which, as we believe, is wholly irrelevant to the problems of the present day. Before the war, and indeed up to 1945, Liberals accepted the necessity for a considerable degree of economic planning This point of view has been completely abandoned by nearly all their official spokesmen

"The main reason why we have hesitated for a considerable time to take this step is because it has seemed that many members of the Labour Party were indifferent to the need to preserve and strengthen the safeguards of individual liberty We therefore greatly welcomed the statement on personal freedom which has recently been endorsed by your executive . . . [The statement referred to was published on June 18 under the title *Personal Freedom Labour's Policy for the Individual and Society*, and will be summarized in a subsequent issue It is one of the ten policy statements to be issued by the Labour Party during the years 1956-58—see 14680 A—as the basis for its electoral programme.—*Ed. K.C.A.*]

"There is another compelling reason why in our view the time has come for Radicals to throw in their lot with the Labour Party Undoubtedly some of the most important issues to be faced by British Governments in the next few years will relate to colonial and dependent territories. Our task is threefold—to build up self-governing institutions, to foster economic development, and to administer equal justice as between peoples of different race and colour. On such questions as these there has always, we believe, been substantial identity of outlook between left-wing Liberals and the Labour Party.

"We have arrived at our decision . . . because we feel that there is a great deal of common ground between Radicals and the Labour Party and that the differences between them now largely belong to the past. Thirty years ago Mr. Maynard Keynes (as he then was) wrote: 'The political problem of mankind is to combine three things: economic efficiency, social justice, and individual liberty.' The problem has become far more urgent than it was in 1926, but the objective remains the same. To-day it seems to us that the only effective instrument for achieving it is the Labour Party."

Mr. Gaitskell, in reply, "cordially welcomed" the decision taken by Mr. Foot, Mr. Roberts, and Mr. Hopkins, and expressed the belief that the Labour Party was "today the only effective political instrument by and through which the great traditions of British Radicalism can be maintained." (Times - Daily Herald - Manchester Guardian) **(14192 B.)**

C. WESTERN GERMANY. — Scholarship Awards for American Students.

Dr. Blücher, the Federal German Vice-Chancellor, informed the U.S. Ambassador in Bonn (Mr. Conant) on July 11 that Western Germany would grant scholarships to 225 American students in recognition of U.S. aid to Germany since the war. The 225 scholarships, worth 1,150,000 Deutschemarks ($274,000), would be tenable for the years 1956-59; 75 would be awarded in the 1956-57 academic year and 50 in each of the three following years. Each student granted a scholarship would receive 2,700 DM. (about $640) as subsistence allowance, plus 500 DM. (about $120) for learning German. He would pay no fees at the university or technical college of his choice, and the Federal Government would pay the costs of his journey to and from Bonn. (Frankfurter Allgemeine Zeitung)

D. UNITED KINGDOM. — Capital Issues. - Corrigendum.

Owing to a misprint in 14968 C, it was erroneously stated that new capital issues for British overseas countries for the first half of 1956 totalled £20,587. The figure should read £20,587,000.—(Ed. K.C.A.)

A. YUGOSLAVIA-EGYPT-INDIA.—Brioni Meetings between President Tito, President Nasser, and Mr. Nehru.

President Nasser of Egypt arrived at Belgrade on July 12 on an official visit, first for bilateral discussions with President Tito, and subsequently for a tripartite meeting with Marshal Tito and Mr. Nehru, Prime Minister of India. President Nasser was accompanied by Dr. Fawzi, the Egyptian Foreign Minister, M. Boghdadi, Minister for Communal Affairs, and Wing-Commander Sabry, Minister of State.

The discussions between President Tito and Nasser took place in Belgrade on July 13-14, after which President Nasser visited Serajevo, Zagreb, Ljubljana, and Bled before rejoining President Tito on the island of Brioni on July 17.

Mr. Nehru—who was on his return journey from the Commonwealth Prime Ministers' Conference in London, and who had made a brief stay in Paris—arrived at Brioni on July 18, accompanied by Mr. Krishna Menon, Minister without portfolio. The tripartite talks started later the same day and ended in the evening of July 19, when Mr. Nehru and President Nasser left together by air for Cairo. In addition to Mr. Menon and Dr. Fawzi, the discussions were also attended by MM. Kardelj and Rankovich, Vice-Presidents of the Yugoslav Federal Executive Council, and M. Koca Popovich, the Yugoslav Foreign Secretary.

Yugoslav - Egyptian Communiqué.

A communiqué dealing with the talks between Presidents Tito and Nasser was issued at Brioni on July 18.

The communiqué said that the talks had covered all questions affecting relations between the two countries and concerning the further promotion of their co-operation, as well as an exchange of views on major international issues. It referred to the "atmosphere of full mutual confidence and cordial friendship" which characterized the relations between the two countries, and said that Presidents Nasser and Tito had "noted a great similarity of views on the main problems of the contemporary world, which the two countries approach guided by the principles of peace-loving and active co-existence and of non-alignment with blocs . . "

Referring to the situation in the Middle and Near East, the communiqué said that the two Presidents had "again confirmed their support of the resolutions of the Bandung conference relating to these areas."

As regards Yugoslav-Egyptian relations, the two Presidents had noted "with satisfaction" that these were "developing successfully in accordance with the principles set out in the joint declaration of Jan 5, 1956" (see 14659 A), and that "the implementation of these principles, both in the relations between the two countries and in international politics, has already proved to be a palpable contribution to the cause of consolidating peace and of international co-operation in the world" Specifically, the two Presidents had decided

(1) To continue the "useful practice" of direct exchanges of views and personal contacts at the highest level, which had proved to be of "mutual benefit," and to hold regular consultations;

(2) To start detailed negotiations "between experts and appropriate institutions" on an extension of economic co-operation and exchanges between the two countries,

(3) To continue the "comprehensive informative talks" conducted during the present visit, particularly in the form of exchanges of experience and information in the spheres of economic policy, planning, etc.;

(4) To extend the existing cultural co-operation between Egypt and Yugoslavia and to conclude a cultural convention.

(5) To co-operate and exchange information in technical matters and in the application of atomic energy for peaceful purposes

Yugoslav - Indian - Egyptian Communiqué.

A joint statement was initialled by President Tito, President Nasser, and Mr. Nehru on July 19 stating that the tripartite talks had been conducted in "an atmosphere of cordiality and friendship" and had covered a "detailed exchange of views on matters of common interest." It went on:

"The three Heads of Government reviewed developments in the international sphere since they met each other separately 12 months ago. They noted with satisfaction that the policies pursued by their countries have contributed to some extent to the lessening of international tension and to the development of relations between nations based on equality.

"The latest developments and contacts between the leaders of various countries following different policies have contributed to a better understanding of each other's viewpoints and to a growing recognition of the principles of peaceful and active co-existence. The three Heads of Government consider that these contacts and exchanges of opinions should continue and be encouraged.

"The Bandung Conference . . . laid down certain principles which should govern international relations. The three Heads of Government reaffirm these ten principles, which they have always supported They realize that conflicts and tension in the world to-day have led to fears and apprehensions in the present and for the future. As long as these fears and apprehensions dominate the world, no firm base for peace can be established. At the same time it is difficult to remove such fears and apprehensions rapidly, and progressive steps will have to be taken towards their removal. . .

"The division of the world to-day into powerful blocs of nations tends to perpetuate these fears Peace has to be sought not through division but by aiming at collective security on a world basis, and by enlarging the sphere of freedom and ending the domination of one country over another.

"Progress towards disarmament is essential in order to lessen the fear of conflict This progress should be made primarily within the framework of the U.N and should include both nuclear and thermo-nuclear weapons and conventional armaments, as well as adequate supervision of the implementation of the agreements made Explosions of weapons of mass destruction, even for experimental purposes, should be suspended as they involve a possible danger to humanity by pollution of the atmosphere, affecting other countries regardless of frontiers, and as they are a violation of international morality. Fissionable material should be used only for peaceful purposes, and its use for warlike purposes should be prohibited The three Heads of Government are deeply interested in full and equal co-operation among nations in the field of the peaceful uses of atomic energy Such co-operation should be organized within the framework of the U.N, and the proposed International Agency should be representative of all countries

"The intensification of efforts to quicken the development of under-developed areas of the world constitutes one of the principal tasks in the creation of permanent and stable peace among nations In this connexion the three Heads of Government recognize the importance of international economic and financial co-operation, and believe that it is necessary and desirable that the proposed Special U N. Fund for Economic Development be constituted . .

"In the course of their talks the three Heads of Government emphasized the great importance of removing embargoes and obstacles to the normal flow and expansion of international trade.

"The three principal areas of tension and possible conflict are Central Europe, the Far East, and the Middle East region. The problems of the Far East cannot adequately be solved without the full co-operation of the People's Republic of China. The three Heads of Government express their belief that the People's Republic of China should be represented in the United Nations They also consider that those countries which have applied for membership in accordance with the Charter should be admitted to the U N

"The problems of Central Europe are intimately connected with that of Germany. This important question should be solved in conformity with the wishes of the German people by peaceful negotiated settlement

"In the Middle East the conflicting interests of the Great Powers have added to the difficulties of the situation These problems should be considered on their merits, safeguarding legitimate economic interests but basing the solution on the freedom of the peoples concerned. The freedom and goodwill of the peoples of those areas are essential not only for peace but also to safeguard legitimate economic interests. The situation in Palestine particularly is one of danger to world peace. The Heads of Government support the resolution of the Bandung Conference in this respect.

"The three Heads of Government considered the situation in Algeria, which, in their opinion, is not only of great importance but requires urgent attention, both from the point of view of the basic rights of the people of Algeria and of the consolidation of peace in that part of the world. Believing as they do that colonial domination is wholly undesirable, and injurious to both rulers and ruled, they must express their sympathy for the desire of the people of Algeria for freedom. They recognize that there are in Algeria considerable numbers of people of European descent whose interests should be protected, but this should not obstruct the recognition of the legitimate rights of the Algerians They warmly support all efforts directed towards a just and peaceful solution, and in particular for the cessation of violent conflict in that area and for negotiation A cease-fire and negotiations between the parties concerned should lead to a peaceful settlement of the problem.

"The three Heads of Government recognize that the problems of the world cannot be settled all at once. It is necessary to persevere with patience and goodwill in attempts to find solutions. It is essential, however, that every effort should be made to create a climate of peace and to act in accordance with the basic principles laid down in the U.N Charter."

A four-man delegation of the Algerian National Liberation Movement, led by M. Ferhat Abbas, arrived at Pula (near Brioni Island) on July 17 during the tripartite meeting. It was received by an official of the Yugoslav Foreign Ministry, to whom it submitted a memorandum on the Algerian question for transmission to President Tito, President Nasser, and Mr. Nehru.

On July 16 it had been announced in Jerusalem that the Israeli Government had conveyed a memorandum to President Tito recapitulating its views on the Palestine question. The memorandum emphasized Israel's desire to work out a peace settlement with Egypt and the other Arab countries, but, it was reported, made no reference to mediation.

After their arrival in Cairo, Mr. Nehru and President Nasser had several meetings on July 20, which were also attended by Dr. Fawzi and Mr. Krishna Menon. The Indian Ministers left the Egyptian capital on July 21, no communiqué being issued. (Tanjug Agency, Belgrade - Indian High Commissioner's Office, London - The Hindu, Madras - Times - Manchester Guardian - Le Monde, Paris) **(Prev. rep. 14659 A; 14372 A.)**

A. SCIENTIFIC RESEARCH. — British and U.S. Reports on Effects of Radioactivity on Man. - British Committee of Investigation into Medical Radiology.

The reports of committees of the British Medical Research Council and of the U.S. National Academy of Sciences, dealing with the effects of radioactivity on man, were published simultaneously on July 12 in London and Washington.

Report of British Medical Research Council.

The British report, entitled *The Hazards to Man of Nuclear and Allied Radiations*, and summarized below, was the work of a committee presided over by Sir Harold Himsworth, secretary of the Medical Research Council.

Findings. In an analysis of the sources of radiation to which man is normally exposed, the committee stated that the major part of this was composed of ordinary 'background radiation" (i.e. that deriving from cosmic rays, naturally occurring radioactive substances such as radium, etc.). Under average conditions, the background radiation to which the individual was exposed annually was of the order of 0.1 rontgens ("r"—an internationally accepted unit for the measurement of radiation intensity)

It was estimated, however, that diagnostic radiology exposed human beings in Britain to radiation amounting to an average of 22 per cent over and above the normal background radiation. Moreover, an average of another three per cent on the background total was received from occupational exposure in hospitals, laboratories, and atomic energy establishments, and from such sources as X-ray machines for shoe-fitting, luminous clock-faces, and television sets. In contrast to this, the fall-out from nuclear explosions produced an additional radiation amounting to less than one per cent on the background total.

Radiation, the committee stated, produced qualitatively the same danger to health from whatever source it came. This danger might be immediate and pathological, or remote and genetic, but the long-term genetic effects were held to be more serious.

[Radiation reaching the reproductive organs of the human body gives rise to gene mutations which are inevitably harmful to the offspring of contaminated parents, and the mutations will persist in their descendants until the line of inheritance dies out. In the case of a mutation giving rise to very serious handicaps the line may die out with the first generation, but where a weaker mutation takes place, it may persist through many generations before the line perishes.]

With reference to diagnostic X-rays, the report stressed that radiation danger existed only in examinations of relatively few parts of the body—principally the hip, lumbar spine, lower abdomen, and pelvis. X-rays of the chest, for example, were unlikely to affect the reproductive organs.

Dealing with the question of nuclear explosions, the committee declared that special account should be taken of the radioactive isotope strontium-90, which was one of the most important constituents of radioactive fall-out. Strontium-90 might contaminate water or crops, and thus pass into the human system either directly or indirectly through animal food products derived from cattle or sheep which had grazed on contaminated pasture. Deposits of the isotope accumulated in human bone, where they might give rise to bone tumours or, through irradiation of the surrounding tissue, to aplastic anaemia or leukaemia. With radioactive fall-out from nuclear explosions at its present level, no detectable increase in ill effects was to be expected; but if the rate or intensity of explosions were to increase, a stage might be reached within the lifetime of some people now living at which "ill effects might be produced in a small proportion of the population."

[In reply to a parliamentary question on July 18, Major Lloyd-George, the Home Secretary, stated that before the first major thermo-nuclear tests the deposit of strontium-90 was two millicuries a square mile, the deposit at the present time was 14 millicuries a square mile, and the nuclear tests carried out up to June 1956 would increase the total deposit to 45 milli-curies a square mile by 1965.]

In connexion with other immediate pathological effects of radioactivity, the committee investigated the effects of varying amounts of radiotherapeutic treatment during the past 20 years on 13,000 sufferers from ankylosing spondylitis, a severe rheumatic condition. Observations suggested that there was an increase in the small chance of developing leukaemia after exposure to an exceptionally large dose of radiation.

Recommendations. The report made the following recommendations on the control and reduction of the radiation to which man is exposed:

(1) "Adequate justification should be required for the employment of any source of ionizing radiation on however small a scale"

(2) With reference to dosage, "in conditions involving persistent exposure to ionizing radiations, the present standard (recommended by the International Commission on Radiological Protection) that the dose received should not exceed 0.3 r weekly, averaged over any period of 13 consecutive weeks, should for the present continue to be accepted."

"During his whole lifetime, an individual should not be allowed to accumulate more than 200 r of 'whole-body' radiation, in addition to that received from the natural background, and this allowance should be spread over tens of years; but every effort should be made to keep the level of exposure as low as possible. An individual should not be allowed to accumulate more than 50 r to the gonads, in addition to that received from the natural background, from conception to the age of 30 years, and this allowance should not apply to more than one-fiftieth of the total population of the country."

The International Commission on Radiological Protection was considering the upper limit which should be set upon the non-background radiation which the population in general should be allowed to receive. The limit was not likely to be in excess of twice the amount of ordinary background radiation, and might be much less. It was important that this should be communicated to everyone concerned with the development of sources of radiation.

(3) All sources of radiation should be kept under close inspection. Present practice in diagnostic radiology should be reviewed, and a critical examination made of the use of radiotherapy in non-malignant conditions. Irradiation from miscellaneous sources such as X-ray machines for shoe-fitting (pedascopes), luminous clocks and watches, and television sets should be reduced as far as possible.

(4) "As an essential basis for further studies . . there is urgent need for the collection of more detailed information when births, marriages and deaths are registered."

Creation of Radiological Protection Service.

The Minister of Health, Mr. Turton, made a statement on the Medical Research Council's report in the House of Commons on July 16.

Mr. Turton described the report as "reassuring" in that it did not reveal any present danger from radiation. Reviewing the occupational dangers in certain branches of industry using radioactive substances, he said that new protective regulations were under discussion and would be published early in 1957. As regards occupational hazards to hospital workers engaged on X-ray work and the use of radioactive substances, a committee under the chairmanship of Sir Charles Darwin had prepared a comprehensive code of practice for Health Service hospitals which would be issued shortly, meanwhile the code had been referred to the Radioactive Substances Advisory Committee for consideration whether it should be modified or supplemented in the light of the Medical Research Council's report. To assist in carrying out the code and in applying protective measures in hospitals and industry, a Radiological Protection Service had been set up by the Ministry of Health and the Medical Research Council.

In view of the report's recommendations with regard to radiological diagnosis and treatment, the Government had decided to set up a scientific committee, under the chairmanship of Lord Adrian (Master of Trinity College, Cambridge), to examine the question. Mr. Turton added that pedascopes were already under review by the Radioactive Substances Advisory Committee, and that he would ask the committee to advise him about luminous clocks and watches and television apparatus as soon as possible.

A resolution "noting" the report was moved by Mr. Turton and agreed to after debate.

B.M.A. Session on Radiation.

The British Medical Association discussed radiation at a scientific session at Brighton on July 13.

Mr. E. E. Smith, deputy director of the Radiological Protection Service, suggested that it might be necessary to make a complete medical register of all persons exposed to radiation, in order to provide information for future research workers. The Radiological Protection Service was exploring the possibilities of constructing an underground laboratory at Sutton (Surrey) for the purpose of studying the radiation ingested by the human body.

Sir Ernest Rock Carling, a consultant adviser to the Home Office, and the Ministries of Health and Supply, called for the education of everyone in whom the radiation hazard had existed. "The thought that one's prospective child may be born dead or deformed or lacking in intelligence," he said, "must make every person take care and approach the subject with an informed mind. The radiation sins of the fathers are visited on the children for many generations to come."

Report of U.S. National Academy of Sciences.

The U.S. report, entitled *The Biological Effects of Atomic Radiation*, was the work of six committees, each dealing with a different aspect of radiation.

The Committee on Genetic Effects found that "any radiation is genetically undesirable, since any radiation induces harmful mutations. Further, all presently available scientific information leads to the conclusion that the genetic harm is proportional to the total dose (that is, the total accumulated dose to the reproductive organs from the conception of the parents to the conception of the child)."

The committee quoted the following figures to show the amount of radiation received from various sources over a 30-year period by the reproductive organs of persons in the U.S.A.: background radiation —4.3 r (the dose rising to as much as 5.5 r in high-altitude areas because of the increase of cosmic rays); medical X-rays—an average of 3 r (in some cases the figure might be very much bigger, and in others none at all); fall-out from nuclear explosions—between 0.05 r and 1.25 r at the present rates of explosions. No figures were given for occupational contamination or for contamination from minor sources.

The recommendations of the Genetics Committee corresponded in substance with those given in the British report. The specific recommendations regarding dosage were as follows:

"The average exposure of the population's reproductive cells to radiation above the natural background should be limited to 10 r from conception to the age of 30. The 10-r limit should be reconsidered periodically with a view to keeping the reproductive cell exposure at the lowest practicable level. Individual persons should not receive a total accumulated dose to the reproductive cells of more than 50 r up to 30 years, and not more than 50 r in addition up to 40 years of age."

The Committee on Pathological Effects drew attention to the fact that there was some evidence to show that radiation, however small the dose, tended to reduce the expectation of life. The following statistics were given, showing the average age at death of various groups of the U.S. population: (*a*) all persons over the age of 25—65.6 years; (*g*) physicians having no known contact with radiation—65.7 years; (*c*) specialists having some exposure to radiation—63 3 years; (*d*) radiologists—60.5 years. It was pointed out that radiologists might receive dosages during the course of their occupation "ranging from very slight to about 1,000 r."

The Committee on Meteorological Aspects of Radiation stated that evidence collected over a decade indicated that nuclear explosions had no effect upon the weather, although the evidence could not be regarded as conclusive. Further research was recommended in the technique of monitoring radioactive fall-out, and in measuring the storage of radiation in the stratosphere.

The Committee on Oceanography and Fisheries found that nuclear tests might be carried out in and over the sea without serious damage to fisheries. The committee drew attention to the insufficiency of the information available for predicting the effect of the disposal of radioactive waste in the sea, and recommended that this problem should be studied by international agencies

The Committee on Agriculture and Food Supplies concluded that radiation was unlikely to be useful in developing animal breeds, but might prove helpful for improving the quality of crops by artificially increasing mutation rates. On the other hand there was an increase in the radioactive content of foods (largely through the presence of strontium-90) as a result of fall-out from explosions It was not known at what stage food became unwholesome on account of radioactivity, and the committee recommended long-term investigation of this question

The Committee on the Disposal and Dispersal of Radioactive Waste indicated that more research was needed before controlled disposal systems could be put into economic operation. The committee also stressed the need to anticipate the kind of accidents likely to occur in nuclear installations, and to set up in advance safety standards which would minimize their effect It would be necessary to house reactors in sealed buildings until technological advances had reduced risks of the accidental contamination of populated areas.

The chairmen of the six committees concerned in the National Academy of Sciences report were: Genetic Effects—Dr. Warren Weaver, Director for Natural Sciences to the Rockefeller Foundation; Pathological Effects—Dr. Shields Warren, Professor of Pathology at Harvard Medical School; Meteorological Aspects—Dr. Harry Wexler, Director of Meteorological Research to the U.S. Weather Bureau; Oceanography and Fisheries—Dr. Roger Revelle, Director of the Scripps Institution of Oceanography, La Jolla (California); Agriculture and Food Supplies—Dr. A. Geoffrey Norman, Professor of Botany and Director of the Botanic Garden, University of Michigan; Disposal and Dispersal of Radioactive Waste—Dr. Abel Wolman, Professor of Sanitary Engineering, Johns Hopkins University, Baltimore.—(Times - Daily Telegraph - New York Times)

(Prev. rep. Atomic Radiation, U.N. Study, 14667 A.)

A. ISRAEL - SOVIET UNION.—Soviet Oil Shipments to Israel. - Israeli Citrus Exports to U.S.S.R.

It was announced in Moscow and Jerusalem on July 17 that the Soviet petroleum export trust (*Soyuznefteexport*) had signed a two-year contract with the Israel Fuel Corporation (*Delek*) and the Palestine Electric Corporation for the supply of $18,000,000 to $20,000,000 worth of Russian crude oil to Israel during the next two years. It was stated that the contract would operate on a clearing basis, with Israel selling mainly citrus fruit to the U.S.S.R. Negotiations were also reported to be in progress on the purchase of Soviet oil-drilling equipment by Israel, and on the despatch of Soviet technicians to train Israelis in its use.—(Times - New York Times)

B. PAKISTAN.—Trade Agreement with Soviet Union.

The first bilateral trade agreement between Pakistan and the Soviet Union was signed in Karachi on June 27.

Each country agreed to extend most-favoured nation treatment to the other, whilst under a special arrangement all payments for goods and other commercial payments were to be made in Pakistan rupees

Among the goods likely to be exchanged were jute and jute products, cotton, wool, hides and leather from Pakistan, and various kinds of industrial equipment, chemicals, petroleum and petroleum products from the U.S S R.

It was also announced that the U.S.S.R. would establish a trade representation in Karachi to facilitate trade between the two countries. (Pakistan High Commissioner's Office, London)

C. INDONESIA. — Constituent Assembly Elections. - Final Results.

The results of the elections for the Indonesian Constituent Assembly, which started on Dec. 15, 1955, were officially announced in Jakarta on July 16 as follows, the distribution of seats in the new House of Representatives being also shown for comparison:

	Constituent Assembly	House of Representatives
National Party (PNI)	119	57
Council of Indonesian Moslem Organizations (Masjumi)	112	57
Religious Teachers' Party (Nahdlatul 'Ulama)	91	45
Communist Party (PKI)	80	39
United Moslem Party (PSII)	16	8
Protestant Christian Party (Parkindo)	16	8
Catholic Party	10	6
Socialist Party (PSI)	10	5
Movement for Defence of Indonesian Independence (IPKI)	8	4
Islamic Party (Perti)	7	4
Labour Party (Partai Buruh)	5	2
Party of the Masses (Partai Murba)	4	2
National People's Party (Partai Rakjat Nasional)	3	2
Association of Police Personnel (PPPRI)	3	2
Dayak Association (Persatuan Dayak)	3	1
Movement for Defence of Pantja Sila (GPP)	2	2
Indonesian People's Party (PRI)	2	2
Party of the Independent Republic of Indonesia (PRIM)	2	1
Greater Indonesian Union (PIR)—Wongsonegoro group	2	1
PIR—Hazairin group	2	1
Association of Indonesian Proletarians (Permai)	2	1
Consultative Assembly of Indonesian Citizens (Baperki)	2	1
Gerinda	2	1
Others	11*	5

*Including one each for the Village People's Party (Persatuan Rakjat Desa); Aku (minor Islamic group); Communist Youth Movement (Acoma), PPTI (Islamic group); Indonesian Peasants' Party (PTI), G P Sunda, "Buffalo" Association (Gerakan Banteng); PIR-Western Lesser Sunda group, R Sudjono; Radja Keprabonan; and Idrus Effendi.

In addition to the 514 seats distributed among the various parties, the remaining six seats are reserved for members representing West Irian (Dutch New Guinea). The total number of valid votes was 37,410,249, out of an electorate numbering 43,104,464.

The Indonesian Constituent Assembly is entrusted with the task of drafting a new Constitution to replace that of 1950. It will sit at Bandung.—(Indonesian Embassy, London)

(Prev. rep. 14736 A.)

D. UNITED KINGDOM. — Financial and Monetary Policy. - Issue of Treasury Stock. - Conversion Offers.

The Treasury announced on April 20 the issue for cash of £250,000,000 of 3½ per cent Treasury Stock, 1979-1981, at a price of £81 per £100 nominal.

The Bank of England stated on April 25 that applications up to £1,000,000 would be allotted in full, and above £1,000,000 on a basis of 88 per cent.

On July 9 this stock, which was in effect issued in furtherance of the policy of financing the nationalized industries directly through the Exchequer (see 14821 A), was amalgamated with the £223,000,000 of similar stock already existing the so-called 'Iron and Steel' stock

A conversion offer was made on June 22 to holders of 2½ per cent Defence Bonds purchased between Oct. 1, 1946 and March 31, 1947, and maturing between Oct. 1, 1956, and March 31, 1957.

Holders of these bonds, of which some £31,000,000 were outstanding, were offered 4½ per cent Defence Bonds similar to the new issue of 4½ per cent Defence Bonds announced in the Chancellor's Budget speech (see 14821 A).

The largest conversion offer since the War Loan conversion of 1932 was announced by the Treasury on July 6. Holders of £824,000,000 worth of 2½ per cent National War Bonds, 1954-1956, due for repayment on Aug. 15, 1956, were offered 4½ per cent Conversion Stock, maturing in 1962, plus £1. 10s. cash for each £100 nominal of bonds tendered.

It was announced on July 20, when the offer closed, that holders of some £657,000,000 (approximately 80 per cent) of the Bonds had accepted conversion. (Treasury Press Office)

(Prev. rep. 14821 A.)

A. UNITED KINGDOM. — Appointment of Joint Permanent Secretaries to Treasury. - Sir Norman Brook to head Civil Service. - Sir H. Caccia appointed Ambassador in Washington. - Other Diplomatic Appointments.

The following changes in higher Civil Service appointments at the Treasury were announced by the Prime Minister on July 20 in a statement from 10, Downing Street.

(1) Sir Edward Bridges, Permanent Secretary to the Treasury and official Head of the Civil Service, and Sir Bernard Gilbert, Deputy to the Permanent Secretary, would retire from the public service in the autumn. The latter post would then lapse and, with the approval of the Queen, two Joint Permanent Secretaries to the Treasury would be appointed—Sir Norman Brook, now Secretary to the Cabinet, and Sir Roger Makins, now Ambassador in Washington.

(2) Sir Roger Makins would have charge of the financial and economic work of the Treasury and would be wholly responsible to the Chancellor of the Exchequer.

(3) Sir Norman Brook, in addition to his duties as Secretary to the Cabinet, would "take charge of all other Treasury work, including that which falls within the responsibility of the Prime Minister in his capacity as First Lord of the Treasury." He would become official Head of the Home Civil Service, and would be assisted in the work of the Cabinet Secretariat by Mr. B. F. St. J. Trend, who would be appointed Deputy Secretary to the Cabinet. (Mr. Trend was in the Office of the Lord Privy Seal at the time of his new appointment.)

The new arrangements ended the 35-year-old system under which the functions of Permanent Secretary to the Treasury and official Head of the Home Civil Service had been the responsibility of one official. Of the two new Permanent Secretaries of the Treasury, Sir Norman Brook had been Secretary to the Cabinet since 1947 (a post he retains, as stated above) while Sir Roger Makins, prior to his appointment to the Washington Embassy in 1952, had been head of the Foreign Office department dealing with the economic and financial aspects of foreign affairs—a post involving close co-operation with the Treasury. They will each have a salary of £6,500 a year.

The Political Correspondent of *The Times* commented as follows on the new arrangements:

"These new arrangements result from the growth, in recent years, of Treasury responsibility for co-ordinating economic as well as financial policy. The time has come, it is felt, when the Chancellor of the Exchequer should have to help him in the discharge of these functions an official of the highest rank who has no other preoccupations.

Sir Roger Makins will have charge of the Treasury divisions concerned with home and oversea finance and supply expenditure, of the home and oversea planning staff, and of the economic section under the Economic Adviser to the Government. He will also be chairman of the Economic Planning Board.

Sir Norman Brook, in his new post, will be able to advise the Prime Minister on the problems of the machinery of Government and Civil Service organization which fall within the functions of the Permanent Secretary to the Treasury. The Chancellor of the Exchequer will continue to be responsible for matters relating to the pay, conditions, pensions, and numbers of the Civil Service.

In addition to supervising the Cabinet Secretariat, Sir Norman Brook will have charge of the general organization and management of the Civil Service and of the Treasury divisions dealing with establishments, machinery of government, and appointments.

One interesting feature of the appointments is that Sir Norman Brook is to be 'official Head of the Home Civil Service,' whereas Sir Edward Bridges has been 'official Head of the Civil Service.' This does no more than give official recognition to a change which has existed in practice since the separate Foreign Service was established since 1943. It was then laid down that the Foreign Service did not come under the official Head of the Civil Service, and the same has applied to the Oversea Civil Service, formerly the Colonial Service. The Permanent Secretary to the Treasury, therefore, has come to be responsible—as its official Head—solely for the Home Civil Service."

It was announced on the same date (July 20) that Sir Harold Caccia (52), a Deputy Under-Secretary of State in the Foreign Office, had been appointed Ambassador to the United States in succession to Sir Roger Makins.

Sir Harold Caccia, a career diplomat, served before the war in the Peking and Athens Embassies. He returned to the Foreign Office in 1941, and in 1943 was seconded to the staff of the British Minister Resident in North Africa (Mr. Harold Macmillan, the present Chancellor of the Exchequer) and concurrently to General Eisenhower's staff at Allied Forces H.Q., North Africa. He later became joint head of the Anglo-U.S. Political Section of the Allied Control Commission for Italy, and at the end of 1944 was transferred to Greece as Political Adviser to the G.O.C., British Forces. After serving in Greece throughout the Communist uprising of December, 1944, and subsequently as Minister at the Athens Embassy, Sir Harold returned in 1946 to the Foreign Office, where he was engaged in the administrative reorganization caused by the amalgamation of the Diplomatic and Consular Services as the Foreign Service. He became Minister (later Ambassador) to Austria in 1949, and returned to the Foreign Office in 1954 as Deputy Under-Secretary of State.

A number of other appointments in the Foreign Service had been announced in recent months, as summarized below:

Mr. Leslie Fry, head of the Eastern Department of the Foreign Office, as Minister to Hungary *vice* Mr. (now Sir) George Labouchere (September 1955). Sir George Labouchere had previously been appointed Ambassador to Belgium—see 14386 A.

Sir Keith Jopson, Ambassador in Bogotá, as Ambassador to Uruguay *vice* Mr. E. R. Lingeman, retiring (September 1955).

Mr. E. J. Joint, Commercial Minister at H.M. Embassy in Rome, as Ambassador to Colombia *vice* Sir Keith Jopson (September 1955).

Mr. Roderick Parkes, Counsellor at H.M. Embassy in Jakarta, as Ambassador to Saudi Arabia *vice* Mr. Harold Beeley, who had held the post for only six months owing to ill-health (September 1955).

Mr. G. H. S. Jackson, First Secretary at H.M. Embassy in Berne, as Minister to Honduras (December 1955).

Sir Edwin Chapman-Andrews, Ambassador in Beirut, as the first British Ambassador to the Sudan (January 1956).

Mr. George Middleton, U.K. Deputy High Commissioner in New Delhi, as Ambassador to the Lebanon *vice* Sir Edwin Chapman-Andrews (February 1956).

Mr. F. C. Everson, Counsellor at H.M. Embassy in Bonn, as Minister to El Salvador *vice* Captain (now Sir) Vyvyan Holt, retiring (March 1956).

Mr. R. L. Speight, an Assistant Under-Secretary of State at the Foreign Office, as Minister to Bulgaria *vice* Mr. G. W. Furlonge (March 1956).

Mr. L. G. Holliday, lately Counsellor at H.M. Embassy in Stockholm, as Ambassador to Laos *vice* Lord Talbot de Malahide (May 1956).

Mr. G. W. Furlonge, Minister in Sofia, as Ambassador to Ethiopia *vice* Mr. D. L. Busk (May 1956).

Mr. D. F. MacDermot, Minister in Bucharest, as Ambassador to Indonesia *vice* Mr. Oscar Morland (May 1956).

Sir Geoffrey Harrison, an Under-Secretary of State at the Foreign Office, as Ambassador to Brazil *vice* Sir Geoffrey Thompson, retiring (June 1956).

Sir Eric Berthoud, Ambassador in Copenhagen, as Ambassador to Poland *vice* Sir Andrew Noble (June 1956).

Sir Andrew Noble as Ambassador to Mexico *vice* Sir William Sullivan, retiring (June 1956).

Sir Roderick Barclay, Deputy Under-Secretary for Administration at the Foreign Office, as Ambassador to Denmark *vice* Sir Eric Berthoud (June 1956).

Mr. A. C. E. Malcolm as the first British Ambassador to Tunisia (June 1956).

Mr. A. A. Dudley, lately U.K. Deputy Commissioner-General in South-East Asia, as Minister to Rumania *vice* Mr. D. F. MacDermot (July 1956).

Mr. A. G. Gilchrist, Counsellor in the Office of the U.K. Commissioner-General for South-East Asia (Singapore), as Minister to Iceland *vice* Mr. J. T. Henderson (July 1956).

It was announced in September last that the U.K. and Luxemburg Governments had agreed to raise their respective diplomatic missions in Luxemburg and London to the status of Embassies. The British Minister in Luxemburg, Sir Geoffrey Allchin, was consequently appointed Ambassador.
(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Civil Service, 12757 D; Foreign Service, 14386 A.)**

B. COLOMBIA. — Sale of British-owned Dorada Railway to Colombian Government.

It was reported on July 17 that the board of the British-owned Dorada Railway had agreed to sell the company's undertakings and its ropeway subsidiary to the Colombian Government for $1,000,000; in addition, the company would be relieved of various liabilities under Colombian social laws and other departmental claims. The company incurred an operating loss of £70,000 in 1955.

The Dorada Railway Company operates 70 miles of 3-ft. gauge line connecting La Dorada and Ambalena, and owns 98 per cent of the shares of Dorada Railway (Ropeway Extension) Ltd., which operates a 44½-mile aerial ropeway connected with the parent company's railway. (Financial Times)

C. SOVIET UNION - UNITED STATES. — Publication of Soviet Magazine in U.S.A.

The first issue of a Soviet illustrated monthly magazine for American readers, *U.S.S.R.*, appeared in the United States during the last week of July. Printed in English, and published and distributed in the U.S.A., it is non-political in character and aims at acquainting the American people with the life and culture of the Soviet people. Its publication synchronized with the appearance in the Soviet Union of the U.S. magazine *Amerika* (see 14622 D). The Soviet-American agreement for the publication of these magazines provided for the distribution of 50,000 copies of each.—(New York Times) **(14622 D.)**

A. CEYLON. — The Official Language Act. - Sinhalese proclaimed Official Language. - Communal Riots in Colombo and Eastern Province.

The Official Language Bill, which declared Sinhalese to be the sole official language of Ceylon, was introduced in the House of Representatives on June 5 by the Prime Minister, Mr. Bandaranaike. The Bill also laid down that where the immediate use of Sinhalese for official purposes was impracticable in the Government's view, other languages might continue to be used until a date not later than Dec. 31, 1960. The Minister for Home Affairs was empowered to make regulations (which would require the approval of both Houses of Parliament) to effect the change in the official language, and generally to implement the principles and provisions of the Act.

Mr. Ponnambalam (Tamil Congress) contended during the first reading debate (*a*) that the Bill violated the Constitution Order-in-Council of 1946, which prohibited the making of laws which caused disabilities to members of different religions and communities, and (*b*) that, as an amendment to the Constitution, the Bill required a two-thirds majority. These objections were overruled by the Speaker, **Mr. Ismail,** who held that the Bill did not require such a majority and that its validity was a question for the courts.

Mr. Bandaranaike, moving the second reading on June 6, said that the language issue was one of the main planks in the programme on which the Government had been returned, and that it was therefore their duty to introduce legislation on the subject. If the change could not be completed before Dec. 31, 1960, however, the Government would not hesitate to make the position known to Parliament and the country, and they would take every step to avoid hardship Consideration would be given to the position of public servants who lacked the necessary knowledge of Sinhalese, and fair measures would be taken with regard to Public Service examinations. There would also be no interference with the Standing Orders with regard to the " medium of business " in Parliament. An inquiry would be held into the " medium of education," but there was no intention to interfere with instruction in the mother tongue, provided that those who sought official employment acquired a sufficient knowledge of Sinhalese. Mr. Bandaranaike explained that detailed provisions were not incorporated in the Bill because it was felt that the wiser course would be to deal with problems as they arose.

Mr. Ponnambalam denounced the Bill as a " retrograde measure " which would " divide the country and reduce Tamils to a position of subservience " A similar warning was given by **Mr. Goonewardene** (*Lanka Sama Samaja*), who said that his party stood for making Sinhala [i.e. Sinhalese] a State language, but was opposed to injustice being done to the Tamil-speaking people. **Mr. Dahanayake** (Minister of Education) gave an assurance that the Government would not place any barriers on those seeking admission to the Public Services, and that he would officially advise the Prime Minister that children should be educated in their mother tongue.

Dr. Wickremasinghe (leader of the Communist Party) pointed out that parity of status was accorded to all languages in China, and also in the Soviet Union, where there were 16 official languages. He appealed to the Government to encourage the minorities by giving them the right to use their own language. In reply to this argument, **Mr. Gunawardena** (Minister of Agriculture and Food) observed that in Wisconsin 80 per cent of the inhabitants were of German origin and spoke German in their homes, while in New York there were more Jews than in Israel, yet there was no demand in the U S A. for official status for the German or Hebrew languages.

Mr. R. G. Senanayake (Minister of Commerce and Trade) recalled that the Independence Bill and the Citizenship Bill had been opposed by the Tamils at the time because they believed that their race would be " exterminated "; he asked the Tamils, however, whether this earlier legislation had in practice caused any injustice to them or affected their language and culture The implementation of the policy of language parity, he contended, would cause confusion in the administrative sphere and would be impracticable.

Dr. Perera (*Lanka Sama Samaja*), the leader of the Opposition, asked why, if the Bill was not to be implemented till 1960, the Government had not first worked out its implications before introducing it. He asserted that the Government proposed to " teach Sinhalese to the Tamils at the point of the bayonet."

Mr. Chelvanayakam (leader of the Federal Party) maintained that the only way to safeguard the interests of the Tamils was by the establishment of a Federal State, and said that it would be impossible to implement the Bill without causing injustice to the Tamil-speaking population.

Mr. Bandaranaike, replying to the debate, emphasized that there was no intention of reducing the Tamils to a position of inferiority. While retaining the main principle of the Bill, the Government were prepared to discuss around a table the practical difficulties that might arise over such questions as communications with the Government in certain areas, the public services, education, and local authorities. The vast majority of Sinhalese felt, rightly or wrongly, that parity of language would be detrimental to them, and to grant parity would not satisfy the Federalists but only strengthen their demand for federalism. The Government of Ceylon therefore held the view that the only statesmanlike solution of the problem was " to introduce this Bill, to introduce it quickly, and to introduce it in this way."

The Bill was adopted on June 15 by 66 votes (People's United Front, United National Party, and Independents) to 29 (*Lanka Sama Samaja*, Federalists, Communists, Tamil Congress, and Tamil Resistance Front). The Senate passed the Bill on July 6 by 19 votes to six, and it received the Governor-General's assent on the following day. An official announcement was issued by the Prime Minister on July 7 that " where any language or languages has or have been used for any official purpose, such language or languages may continue to be so used until the necessary change is affected."

While the Bill was being debated in the House of Representatives serious communal rioting took place in Colombo and the Eastern Province, where Sinhalese and Tamil communities live side by side On June 5 about 200 Tamils (led by 12 members of Parliament) staging a silent *satyagraha* demonstration of protest outside the Parliament buildings were stoned and assaulted by Sinhalese mobs, the rioting then spread through the city, Tamils being assaulted and Tamil and Indian shops attacked and looted. Order was eventually restored after the police had opened fire on crowds of hooligans, eight persons being injured. More serious disturbances occurred on June 8-10 at Batticaloa (on the east coast) where a hotel was burned down and two Tamils shot dead, and at Trincomalee, where houses were set on fire by rioting mobs. In the Gal Oya Valley (Eastern Province), where a large irrigation and colonization project is in progress, two people were killed on June 11 when the police fired on an unruly crowd. By June 15, however, conditions were reported to have returned to normal in all rural areas.

The Federal Party announced on June 15 that they regarded the Bill as unconstitutional and would test its validity in the courts.—(Ceylon Government Information Department) **(Prev. rep. 14756 A; 14849 A.)**

B. ICELAND. — New Coalition Cabinet.

The Icelandic Government headed by Hr. Olafur Thors formally resigned on July 24 following its defeat in the recent elections, and on the same day a new Government was installed under the Premiership of Hr. Hermann Jonasson (leader of the Progressive Party), whom President Asgeirsson had entrusted with the task of forming a Cabinet. The new Government was based on a coalition between the Progressives, the Social Democrats, and the People's Front (comprising the left-wing United Workers' Party and the Communists), its membership being as follows ·

Hr. Hermann Jonasson (Progressive)	Prime Minister and Minister of Justice.
Hr. Gudmundur Gudmundsson (Social Democrat)	Foreign Affairs.
Hr. Eysteinn Jonsson (Progressive)	Finance and Agriculture
Professor Gylfi Gislason (Social Democrat)	Education and Industries.
Hr. Ludvik Josefsson (People's Front)	Trade Fisheries
Hr. Hannibal Valdimarsson (People's Front)	Social Welfare and Health.

Hr. Jonasson had been Prime Minister from 1934 to 1942 but was not a member of Hr. Thors' Coalition Government, although the Progressive Party participated in that Government. **Hr. Gudmundsson,** a district judge, belongs to the right-wing of the Social Democratic Party, while **Professor Gislason** is Professor of Economics in the University of Iceland. Of the two " People's Front " Ministers, **Hr. Valdimarsson** (chairman of the Icelandic T U.C.) is a member of the United Workers Party, and **Hr. Josefsson** (a schoolteacher) is a Communist. **Hr. Jonsson,** the Finance Minister, hold the same portfolio in Hr Thors' Cabinet.

Hr. Gudmundur Gudmundsson took over the Foreign Affairs portfolio from Dr. Kristinn Gudmundsson. As stated above, the new Foreign Minister is a Social Democrat, while his predecessor was a member of the Progressive Party. (Berlingske Tidende, Copenhagen) **(14960 A; 14804 A.)**

C. LUXEMBURG. — Constitutional Reform.

The Luxemburg Chamber of Deputies adopted a Constitutional Amendment Bill on July 13 providing for (*a*) a reduction of the term of office of deputies from six to five years; (*b*) the holding of general elections for the whole Chamber every five years, instead of the previous system under which one-half of its membership had been renewed every three years. The Chamber also decided (*c*) to extend its lifetime (which was to expire in June 1957) by another two years, thus postponing the next general election from May 1957 to May 1959.

The provisions under (*a*) and (*b*) were adopted by 42 votes (Social Christians, Socialists, and Communists) to five (Liberals), while the decision under (*c*) was adopted by 41 votes (Christian Socials and Socialists) to seven (Liberals and Communists). (Le Monde, Paris)

AUGUST 4—11, 1956

A. THE SUEZ CRISIS. — Statements by Sir Anthony Eden, Mr. Dulles, M. Pineau, and Mr. Nehru. - British Parliamentary Debate. - Opposition Support for Government's Attitude. - Further British Naval and Military Precautions. - Partial Mobilization in Egypt. - International Reactions to Suez Crisis.

Developments in the Suez Canal crisis during the week Aug. 4-11 are described below under cross-headings.

British Parliamentary Debates. - Statements by Sir Anthony Eden and Mr. Gaitskell.

The Suez Canal crisis was debated by the House of Commons on Aug. 2, when the attitude of H.M. Government was defined by the Prime Minister, Sir Anthony Eden. The Leader of the Opposition, Mr. Hugh Gaitskell, expressed the Opposition's support for the Government's policy and the precautionary measures taken. The Prime Minister spoke as follows:

". The cause for the anger and alarm felt at the action of the Egyptian Government—not only here, but among the Governments and peoples of the democratic world—is due to the special character of the Canal As the world is to-day, and as it is likely to be for some time to come, the industrial life of Western Europe literally depends on the continuing free navigation of the Canal as one of the great international waterways of the world Last year, nearly 70,000,000 tons of oil passed through the canal, representing about one-half of the oil supplies of Western Europe Traffic through the Canal moved at the rate of 40 ships a day and amounted to 154,000,000 tons of shipping That traffic did not affect the West alone Australia, India, Ceylon, and a large part of South-East Asia transported a large proportion, perhaps the major proportion, of its trade through the Canal.

' It is with those facts in mind that I feel it necessary to repeat the carefully considered sentence I used to the House on July 30 : ' No arrangements for the future of this great international waterway could be acceptable to the British Government which would leave it in the unfettered control of a single Power which could, as recent events have shown, exploit it purely for the purpose of national policy '.

The Prime Minister continued " That is still our position and must remain so, but it is not all the argument The Egyptian Government has certain obligations in respect of the Canal. They are laid down in two principal instruments First, the concession, which consists of a series of agreements over the years between the Egyptian Government and the Suez Canal Company. It defines the rights and status of the Company and the obligations of the Egyptian Government towards it. These were endorsed by the Egyptian Government as recently as June 10, 1956, when a formal financial agreement was concluded between the Egyptian Government and the Company. This agreement was to continue in force until the end of the Company's concession

" That was in accord with a broadcast made on Nov 17, 1954, by Colonel Nasser. He then said ' There only remain 14 years until the end of the Canal Company's concession,' and added that good relations existed between the Egyptian Government and the Company. The Egyptian Government, he told us, had full confidence in the attitude of the Company and was sure the latter would do everything to help the Egyptian Government in its task. These undertakings are now torn up, and one can have no confidence in the word of a man who does that.

" The second instrument is the Suez Canal Convention of 1888, which lays down the vital principle that the Canal should always be open in time of war, as in time of peace, to every vessel without distinction of flag This was signed by nine Powers, including a signature on behalf of the Khedive of Egypt. There is a link between this Convention and the concession to the Canal Company which is specifically mentioned in two Articles of the Convention—Nos 2 and 14 Article 2 deals with the engagement of Egypt towards the Company as regards the Freshwater canal Article 3 goes on to state that the contracting parties undertake to respect the plant, establishments, buildings and works of the Canal, and the Freshwater canal. Moreover, our own Anglo-Egyptian treaty of 1954 states that the two Governments recognize that the Canal is a waterway economically, commercially, and strategically of international importance, and expresses the determination of both parties to uphold the Convention of 1888

" How can this be reconciled with the Egyptian Government's action against the Suez Canal Company ? The free navigation of the Canal is the solemn principle contained in the 1888 Convention That is not all, because free navigation does not depend only on the absence of discrimination or the absence of physical interference with traffic on the Canal. Its efficient functioning and liability to deal with existing and future traffic is also of decisive importance to us all The Canal is at present in need of large new capital expenditure to enable it to cope with the increasing demands made upon it. The traffic through the Canal at present is increasing at the rate of about seven per cent a year Last year more than 10,000,000 tons more oil went through than in 1954, and the size of ships using the Canal is constantly growing The Company has, over the years, been accumulating capital to enable it to carry out the work of increasing the capacity of the Canal In the Company's latest programme of improvements, which has already begun, two new by-passes are to be built and the depth of the Canal is to be increased to enable it to handle larger ships This action would cost something in the neighbourhood of £20,000,000 It would greatly increase the capacity of the Canal.

" In the next 10 or 15 years further huge expansion will be necessary because traffic is expected to increase several times. The reserves of the Company and revenue from shipping would have been earmarked to finance these needs, but Colonel Nasser has now announced his intention to divert these revenues from this vital international waterway to build a dam in Egypt He has declared the Company is to be nationalized and its revenues seized because the United States and ourselves would not lend him enough money with which to build this dam.

" I know it is true that he has expressed his intention to compensate the shareholders on the basis of the latest valuation of the shares, but the House may well ask, in view of Colonel Nasser's record about other promises, how this is to be done ? It would cost some £70,000,000 to carry through this compensation, but the net annual revenue of the Canal, after providing for taxation and reserves as is at present done, is only some £10,000,000 Clearly it would be impossible with this sum to compensate shareholders, build the dam, and develop the Canal Here is a situation which neither the Government, nor I believe other maritime Powers, can accept if they are to continue to live by means of the sources of supply which come through the Canal

"There are other considerations which we cannot ignore. Is it possible for us to believe the word of the present Egyptian Government to the extent of leaving it in its power alone to decide whether these supplies shall reach the Western world through the Canal ? I truly think we have done everything in our power over the years—by our actions, by our treaty—to show goodwill. Our reward has been broken faith and broken promises We have been subjected to a ceaseless barrage of propaganda accompanied by intrigue, and attempts at subversion in British territories Colonel Nasser's arbitrary action in breach of Egypt's solemn undertakings, many of them recently given, and without previous consultation or notice, reveals the nature of the régime with which we have to deal Their action in compelling Canal Company employees to remain at their posts under threat of imprisonment is, to say the least, a violation of human rights

" In these circumstances, and in view of the uncertain situation created by the actions of the Egyptian Government, H M. Government have thought it necessary to take certain precautionary measures of a military nature Their object is to strengthen our position in the Eastern Mediterranean and our policy to deal with any situation which may arise." After announcing the measures taken by the Government, including " the movement from this country of certain naval, army and air force units " and the recall of a limited number of reservists, the Prime Minister concluded

" Now let me state the solutions we seek for the future of the Canal Our policy . . towards the Canal has always been based on two fundamental principles First, freedom and security of transit through the Canal. Second, the efficiency and economy of its operation . The principle of free navigation in peace and war was laid down under solemn international instruments to which Egypt was a party How can we look to the Egyptian Government alone to maintain these principles scrupulously ? And if they are not maintained, the life and commerce of the whole free world are constantly at risk For all these reasons, I suggest that the freedom and security of transit through the Canal without discrimination, and the efficiency of its operation, can be effectively ensured only by an international authority. It is upon this we must insist. It is for this that we are working, in negotiation with other Powers deeply concerned, and nothing less can be acceptable to us "

Mr. Hugh Gaitskell (Leader of the Opposition) spoke as follows " While I have not hesitated to express my disagreement with the British Government on their policies in the past, nothing they have done or not done in any way excuses Colonel Nasser's action in seizing the Canal The Suez Canal Company was no ordinary company conducting ordinary activities. It controlled an international waterway of immense importance to the rest of the world. It is therefore bound to be a matter of international concern when it changes hands

" Hitherto it has been under the control and ownership largely of the States using it The ownership is to be transferred to a single Power—to the hands of one State controlling it and, therefore, in a position to decide how it shall be run. It may be said there is no need for anxiety because of the assurances about the 1888 Convention. There seems to be the strongest reason for having doubts in our mind as to whether we can accept these assurances, for what has been the behaviour of the Egyptian Government in stopping Israeli shipping going through, and, even more important, the clear defiance of the U N. resolution condemning this action, passed in September 1951 ?

" The second reason why we must take strong exception to this, is that any confidence we might have had in an action of this kind was shaken by the manner in which it was carried out—suddenly, without negotiations, without discussions, by force, and with the excuse that this was the way to finance the Aswan Dam. Colonel Nasser claimed that $100,000,000 a year would be made available for this project from the Canal, which meant that he was proposing to take the whole gross revenue Yet he has promised compensation. How can he, at one and the same time, keep the Canal going, expend the necessary money on the repairs, extensions, and reconstruction, pay compensation to the shareholders, and find money for the Aswan Dam ?

"Looking at the figures, the most Colonel Nasser could do, and even then at the expense of diverting reserves which ought to be used for the Canal, might be somewhere about £5,000,000 a year—certainly inadequate and absurd in relation to the cost of the Dam There is one way out for Colonel Nasser. He can put the charges up, increase the transit dues. The whole implication of his speech is precisely that he intends to make the users pay more than they were paying before.

"Firstly, then, one cannot deny that this action is to some extent a threat to the access to the Canal in the light of what the Egyptians have done about Israeli shipping; secondly, a warning that he may not maintain the Canal adequately, and thirdly, an implication that higher charges will be levied—and this is serious for every maritime nation in the world.

"We cannot forget that Colonel Nasser has repeatedly boasted of his intention to create an Arab empire from the Atlantic to the Persian Gulf. He has made a number of inflammatory speeches against us, has continually attempted subversion in Jordan and other Arab States, and has persistently been threatening Israel and made it plain that it is his purpose and intention to destroy Israel if he possibly can Here, if ever there was, is clear enough notice of aggression

"This upset must be recognized as part of the struggle for the mastery of the Middle East. That is something which I do not feel we can ignore . . . because of the prestige issues which are involved. If Colonel Nasser's prestige is put up sufficiently and ours put down sufficiently, the effect in that part of the world will be that our friends will desert us because they think we are lost, and go over to Egypt. I have no doubt that the reason why Colonel Nasser did this in the way he did—aggressively, brusquely, suddenly—was precisely because he wanted to raise his prestige in the rest of the Middle East. He wanted the rest of the Arab world to see what he can do He wanted to challenge the West, and to win. He wanted to show his strength, and to make a big impression.

"That is all terribly familiar It is exactly the same as we encountered with Mussolini and Hitler in the years before the war And we must not under-estimate the danger of the effects this may have on the other Arab States Indeed, this is probably the most important immediate effect it may have. I am thinking particularly of Iraq, which is an ally of this country . . . The danger . . is that Governments friendly to Britain, like Iraq, which could be relied upon to exercise restraint in the Middle East, might be replaced by Governments of a very different complexion . . .

"Summing up the position, this is where we stand. Colonel Nasser wanted to get a loan for the Aswan Dam Many of us had sympathy. I would go much further—all of us would wish to see economic development in Egypt and energetic steps taken to raise the appallingly low standard of living in that part of the world We are told that Colonel Nasser has pledged the cotton exports of his country to pay for arms, and that because he has done that, he is in great financial difficulties. I do not think I can have much sympathy with a man who spends far more than he can afford on arms which are admittedly for an aggressive war, and then, when he is told that because of the economic situation he cannot get a loan, says to the rest of the world, 'I am seizing the Canal and will make you pay for the loan that way.' . .

"What action should be taken? The first point I want to emphasize is that this is not our affair alone; it is essentially a matter for all the maritime Powers of the world, and we must act in concert with other nations. America, Europe, India, and South-East Asia are all involved. . . The first step is to call a conference of the nations principally concerned. The signatories of the 1888 Convention are one possible group of nations concerned. It would be foolish not to invite Russia to take part in the discussions I would be surprised if, after the Prime Minister's talks with the Russian leaders and his obvious attempts to improve relations with them, he were to be a party to a decision to exclude them from such an important conference

"I would like to see any control commission which may be set up as a result of this conference as a U.N agency. From the point of view of world peace and development, it is far better that it should be done under the U N. than in some independent way I would say, too, that it would obviously be common sense to invite Egypt to this conference as a signatory to the 1888 Convention.

"There remains the question of what other steps can be taken. In the circumstances, and until we have a settlement, the economic measures taken by the Government are fully justified The Prime Minister told us that all shipments of arms or war material from this country to Egypt have been suspended, but there is the possibility that arms may be going from this country to other States unfriendly to us in that part of the world. I am told that a ship is being loaded at Liverpool with arms for the Lebanon [see below] I would ask the Prime Minister to consider whether Syria and the Lebanon had better not be covered by the same arms embargo.

"An investigation of routes alternative to the Canal can be made and should certainly be seriously considered. There has been talk of building a canal from the Gulf of Akaba to Haifa. The objection has been that this would take a long time and involve heavy capital expenditure, but there is something else that could be done along that line It would be possible to lay a pipeline from Akaba to Haifa, which is about 250 miles; and it would take a matter of months, not years, to complete. The Government should consider seriously giving assistance to shipowners to encourage them to build larger tankers which can go round the Cape. The Government must once again give serious consideration to the question of arms for Israel.

"There has been much talk in the Press about the use of force in these circumstances I would say, firstly, that we need to be very careful what we say on this subject. It is unwise to discuss hypothetical situations in present conditions Obviously, there are circumstances in which we might be compelled to use force, in self-defence or as part of some collective defence measures. I do not object to the precautionary steps which the Prime Minister has announced Any Government would have to do that, as we had to do it during the Persian crisis.

"But we are, after all, members of the United Nations and signatories to its Charter For many years we have steadfastly avoided any international action which would be in breach of international law and world public opinion We must not, therefore, allow ourselves to get in a position where we might be denounced as aggressors in the Security Council, or where a majority of the Assembly would be against us. If Colonel Nasser has done things that are wrong in the legal sense, the right step is to take him to the International Court Force is justified in certain events, but if there is anything he has done which would justify force at the moment, it is the one thing on which we have never used force—the stopping of Israel's ships It would be difficult to find, in what he has so far done, any legal justification for the use of force What he may do in the future is another matter

"I think we were right to react sharply to this move If nothing were done it would have serious consequences for all of us, and especially for the Western Powers. It is important that what we do should be done with the fullest possible co-operation with the other nations affected. We should try to settle this matter peacefully on the lines of the international commission which has been hinted at. While force cannot be excluded, we must be sure that the circumstances justify it—that it is, if it is used, consistent with our pledges to the U N Charter and not in conflict with them"

The Government's attitude was supported by many Conservative and Labour M.P.s, and also by Mr. Clement Davies on behalf of the Parliamentary Liberal Party. An important speech was made by Mr. Herbert Morrison, the former Deputy Leader of the Labour Party, who supported the Government in their action against "this pocket dictator in Cairo."

Mr. Herbert Morrison (Lab) said that the Suez crisis was reminiscent of the Abadan crisis—an experience "which he did not look back upon with any great pleasure" [Mr Morrison was Foreign Secretary at the time of the Abadan crisis] In both cases one man had decided that an agreement freely entered into should be repudiated, and in neither case had there been any previous consultations He could not follow the arguments "advanced in some minority quarters and in fairly respectable newspapers" that there was some moral justification for what the Egyptians had done There was no analogy whatsoever with the internal nationalization measures carried out by the British Labour Government, which had been placed before the electorate and which that Government had had a mandate to carry out. "This pocket dictator in Cairo," he declared, "does not consult his Parliament I am not sure that he is permitting his Parliament to function in any effective way, if at all There is no discussion with us or the other countries who are parties to the Conventions One night he decides to go out and make a speech on the hustings, and towards the end whacks out his decree. It is not a civilized international way of conducting public business. Colonel Nasser is to be condemned because he has acted contrary to the law of nations and to international good faith. This action is morally wrong. It is utterly unjustifiable, and I refuse to say a single syllable in justification of what Colonel Nasser has done." Mr. Morrison said that he was in favour of taking the matter to the United Nations so long as the U N was going to be expeditious and effective. If, however, Britain, France, and America should come to the conclusion that, in the circumstances, the use of force would be justified, it might be the duty of Members, including himself, to say they would give them support. "Now and again," said Mr Morrison, "our American friends do rather try our patience About this Middle Eastern business the Americans have been pretty unsatisfactory, and it is time they took a clear line. I hope that the world may know that Britain, France, and the U.S A stand together If the U.S.A. will not stand with us, we may have to stand without them." . . .

The Suez crisis was debated by the House of Lords on the same day, when full support for the Government's attitude was expressed by peers of all parties.

Lord Reading (Minister of State, Foreign Office) spoke as follows: "The best-known and most used waterway in the world has been snatched into the hands of one Government, and that a Government headed by a man who has now proved himself beyond doubt hostile, rancorous, and irresponsible Colonel Nasser's ambitions, and the seething torrent of Egyptian nationalism which he and his associates have done so much to excite and exploit and so little to moderate and control, have swept aside all our endeavours and protestations.

"The Egyptian Government claim that they have taken this step by way of retaliation. Retaliation for what? Not for withholding from them something to which they were entitled as of right, but for the withdrawal in changing circumstances of an offer, which they themselves had not accepted and had complicated by a whole series of provisos, qualifications, and reservations, to furnish them with generous financial aid.

"It may well be that the refusal to produce funds for the building of the [Aswan] Dam was not the cause but the excuse for the purported nationalization of the Canal Company. Indeed, the speed with which the intricate legal instruments to carry out that purpose were sprung

on the world is some indication that they were already in cold storage, awaiting the appropriate moment. If this is so, it may well be that this is a further but more flagrant step in a deliberate policy to undermine and destroy by stages our whole position in the Middle East. In either event, the world cannot sit idly by while the Canal lies at the mercy of bountiful gusts of wrath or studied political plots.

"The Egyptian Government has made a feeble effort to say that the reason lay in the fact that the Company was neglecting the Canal. Everyone, not excluding the Egyptian Government, knows that that allegation is utterly untrue It was done at this moment as a vindictive challenge to the West. It is a challenge to far more countries than Britain, the United States, and France. It is a challenge that can neither be palliated nor ignored. We cannot accept the proposition that the Canal Company shall be recklessly milked of its resources for the construction of a dam for the benefit of Egypt alone. What a future for the Canal !

"Colonel Nasser's intentions were announced in a speech whose distortion and political venom reminded one of others we heard between the wars. If we were tamely to submit to the *coup d'état* with the Arab nations as audience, Colonel Nasser would not be satisfied but stimulated. No dictator can ever afford to be satisfied. What would follow ? At his will, a stranglehold on our essential oil supplies. At his caprice, a stoppage of troop movements, supplies and commerce. At his word, exorbitant increases in Canal dues.

"Such examples are infectious, and there are others in his neighbourhood who are not immune from a similar virus. It may be that it was for Colonel Nasser a question of increasing his prestige. We have prestige, too, and we are determined to maintain it. In the Government's solemn and considered view there is only one solution : the Canal must be placed under effective and trustworthy control. That is the basic decision on principle. It was not lightly taken. It will be steadfastly pursued."

Strong and immediate British action against President Nasser was demanded by **Lord de L'Isle,** V.C., who described the debate as the gravest since 1939 ; **Lord Killearn,** who described President Nasser as a "pirate" and called upon the Government not to let itself be held up by "nice legal points—technicalities and so forth" ; **Lord Jeffreys,** who urged military action against Colonel Nasser with or without the United States ; and **Lord Birdwood,** who called upon the Government to jam the anti-British "Voice of the Arabs" broadcasts from Cairo. **Lord Strabolgi** called upon the Government to supply arms to Israel, while **Earl de la Warr** stressed that if Colonel Nasser succeeded in his aim of establishing himself as Arab dictator from the Persian Gulf to the Atlantic, Britain would "mean nothing in the Middle East from then onwards."

Lord Coleraine said : "This is the Rhineland over again. Had we acted with firmness in January 1936 the Second World War would have been avoided, but we failed to take the chance. This may be the last chance of avoiding a third World War . . It is a question of checking international anarchy before it is too late. If we do not check it, we acquiesce in the destruction of Western civilization."

Lord Hore-Belisha pointed out that Egypt would have become the undisputed owner of the Canal in 1968, under the international convention He therefore urged the Government to give serious consideration to his proposals for an alternative canal across Israel [i.e. from the Gulf of Akaba to the Mediterranean] which he had put forward earlier.

Lord Stansgate said that he did not think the situation was necessarily bad, or that Colonel Nasser wanted to make trouble. He (Colonel Nasser) wanted "to justify his revolution" and to build the Aswan Dam, and, although he had been "politically most insulting," he had not committed any breach of law in a legal sense. When a breach of law had occurred—that is, when Egypt banned Israeli shipping from the Suez Canal—Britain had done nothing at all, either for reasons of caution or because she did not want to offend the Arabs. "That itself has blotted our copybook," Lord Stansgate declared. "The whole world knows we would not stop the Egyptian blockade of Israel. If you take action against Egypt, it is almost certain that the Arab League and all their friends will join in on the other side"

Lord Attlee spoke as follows : "I think we have to take a wide view of this problem. It is only part of a very much wider problem, and I entirely agree with the view expressed by the Government as to what our objective should be. It should be that this great waterway should be open and free for all nations, and should not be used, as it might be used, as a method of blackmail for levying money out of other nations.

"It is not just a matter of Britain, or even of Europe. If we are dependent on oil coming from the Arab States, those States are dependent on selling that oil, and blackmail might be levied on them just as much as on us If our objective is an international waterway, our means of attaining our end must also be international. If we allow a purely British move, or a Franco-Anglo-American move, we lay ourselves open to a charge of what is regarded as the old imperialist tradition. It is essential to carry the greater part of world opinion with us and to see that what actions we take are consonant with world opinion. The mere act of nationalization is not a breach of international law, and we should be very chary of putting ourselves in a position in which we can be charged with aggression I am sure nothing can be worse than for us to plunge into this business on our own. Much as we may object to Colonel Nasser—and he is a thoroughly objectionable type of dictator—we must act within the sphere of international law."

Calling for a greater supply of arms to Israel, Lord Attlee declared : "There is a strong case now for a complete change of policy . . . If we had taken a stand earlier on the question of the passage of ships through the Canal, and the firing on our ships in the Gulf of Akaba, we might have been spared this trouble. We support the Government in whatever action is necessary, provided that we act within the sphere of international law, because this issue is something that transcends British interests—it is in the interests of the whole of the civilized world."

Lord Salisbury (Lord President of the Council) replied to the debate as follows : ". . . Colonel Nasser has struck a savage blow at good faith in public engagements, which, if allowed to go unchallenged, will certainly be the precursor of others probably even more serious—either by himself or by others seeking to profit by his example . . . The Canal question is not merely a legal question ; it is a political question and might almost be called a moral question. It raises the whole issue of international good faith. Is it to be accepted as an ordinary principle of public life that Governments can tear up agreements into which they have solemnly entered whenever it suits them for reasons of national policy ? This is not the only occasion when that particular issue has been raised in the lifetime of some of us. In the case of the remilitarization of the Rhineland, a Government did what it had undertaken not to do. The present situation is in many ways similar to that. If the present action is allowed to pass unchallenged we should debase the whole currency of international relations. If Colonel Nasser's seizure of the Canal and his breach of agreements were acquiesced in, the whole stability of the Middle East would be immediately placed in mortal peril. We would see similar steps taken by one Government after another. When we did make a stand—and ultimately we would have to—we should bitterly regret that we had not stood firm now . . . . "

Sir Anthony Eden's Broadcast on Suez Crisis.

The following sound and television broadcast was made by the Prime Minister on Aug. 8 :

". . . For Britain, the Canal has always been the main artery to and from the Commonwealth, bringing us the supplies we and they need. To many other nations throughout the world it has become the bearer of a traffic of ever-growing volume. The world's commerce depends on it. It carries goods of all kinds for Europe and America, Australia and New Zealand, and for eastern countries like Pakistan, India, and Ceylon. It is in fact the greatest international waterway in the world.

"What Colonel Nasser has done is to seize it for his own ends. Nobody should be surprised that this is creating a very grave situation. The whole trend of the world to-day is against taking selfish action for purely national ends. Hitherto the Canal has been international It is guaranteed by an international agreement signed by many countries in 1888. All the time it has operated with great efficiency in the interests of world shipping. It has been at the service of all nations. True, it runs through Egypt, but it is not vital to Egypt, as it is to many other countries in all parts of the world. Through it travels to-day about half the oil without which the industry of this country, of Western Europe, of Scandinavia, and of many other countries could not be kept going.

"This is a matter of life and death to us all. Let me expain why A great part of our industry and that in other Western lands is to-day run on oil, without which machinery and much of our transport would grind to a halt. We have come to rely more and more upon oil for power. Our industry and exports depend upon it. Here, therefore, is something which concerns every home in this land, and not in this land alone.

"You may ask, is there no alternative to the Canal ? Yes, there is an alternative route round the Cape. But this would add enormously to the length of the voyage and the cost of transport. Nor have we the shipping resources to maintain supplies at the level we need if we have to go all that way. That is why the Canal was built 90 years ago

"It may be said, 'Why is it so terrible to nationalize a company as Egypt has done ? It was done here' That is perfectly true. But it was done, as Mr Morrison rightly pointed out in the House of Commons, to our own British industry. Colonel Nasser's action is entirely different. He has taken over an international company without consultation and without consent. The rights of the company were secured by repeated and solemn agreements entered into by the Egyptian Government. There are a whole series of them, enough to fill a book. The last was only concluded some two months ago

"Some people say · 'Colonel Nasser promised not to interfere with shipping passing through the Canal. Why therefore don't we trust him ? ' The answer is simple. Look at his record. Our quarrel is not with Egypt, still less with the Arab world. It is with Colonel Nasser. When he gained power in Egypt we felt no hostility towards him. On the contrary, we made agreements with him. We hoped he wanted to improve the conditions of life of his people and to be friends with this country. He told us he wanted a new spirit in Anglo-Egyptian relations. We welcomed that. But instead of meeting us with friendship, Colonel Nasser conducted a vicious propaganda campaign against our country. He has shown that he is not a man who can be trusted to keep an agreement. And now he has torn up all his country's promises towards the Suez Canal Company. He has even gone back on his own statement. Not so long ago he was speaking in praise of the Company. He told them how satisfied he was with them. Now, in a night, they have been taken over by force and their assets seized. By Egyptian law the Company's employees,

French and British, are ordered to stay at work under threat of imprisonment. The pattern is familiar to many of us. We all know it is how Fascist governments behave, and we remember only too well what the cost can be in giving in to Fascism.

"But that is not all. If the Canal is to do its job, its capacity to carry the traffic must be increased and much money spent upon it. The Company have been building up reserves for this purpose and they will all be needed. And what does Colonel Nasser say? He tells us he must take over the Company because he wants to use its money to build the Aswan Dam. This means simply that he is seizing the resources of an international company to further his own national scheme—this at a time when he is already spending all the resources he can get hold of to buy arms.

"See how the bills mount up. Just look. The compensation to the Company which he has promised to pay would cost £70,000,000, the Aswan Dam, which he has promised to build, would cost £400,000,000. His arms shipments, the only things that are being paid for at present, will cost scores of millions. The urgently needed extensions to the Canal would cost tens of millions of pounds alone, and the long-term development much more. The grand total is preposterous. In view of what has happened, can anyone feel that the United States was wrong to tell the Egyptian Government that they could not finance the Dam until Egypt was prepared to cut her coat to fit her cloth?

"But there is something much more important than all this at stake. If Colonel Nasser's action were to succeed, each one of us would be at the mercy of one man for the supplies upon which we live. We could never accept that. With dictators you always have to pay a higher price later on—their appetite grows with feeding. Just now Colonel Nasser is soft-pedalling. His threats are being modified. But how can we be sure that next time he has a quarrel with any country, he won't interfere with that nation's shipping; or that the next time he is short of money, he won't raise the dues on the ships that pass through the Canal If he is given a chance, of course he will.

"I have shown you how deeply the Canal concerns us. But other countries have a close interest too. That is why we immediately asked the French and American Governments to consult with us. These meetings produced the immediate result we hoped for—an international conference is to be held in London next week to which we have invited all the countries most closely interested in the use of the canal.

"Let me tell you what the purpose of the conference is. It is just this—that the canal must be run efficiently and kept open, as it always has been in the past, as a free and secure international waterway for the ships of all nations. It must be run in the interests not of one country but of all. In our view this can only be secured by an international body. That is our purpose.

"We have had a good response to our invitations for the meeting on Aug. 16. Already 19 countries have accepted, none has refused. I am confident that the conference can produce a workable scheme for the future of the canal within the limits I have explained.

"So the alternatives are now clear to see. If we all join together to create an international system for the Canal and spend its revenues as they should be spent to develop it rapidly, that can bring growing prosperity to East and West alike—countries that produce oil and countries which buy it. There will be wealth for all to share, including Egypt. There is no question of denying her a fair deal or a just return. But if anyone is going to snatch and grab and try to pocket what really belongs to the world, the result will be impoverishment for all, and refusal by some countries at least to lead their lives at such a hazard. Meanwhile, we have too much at risk not to take precautions. We have done so. That is the meaning of the movements by land, sea and air of which you have heard in the last few days.

"We do not seek a solution by force, but the broadest possible international agreement. That is why we have called the conference. We shall do all we can to help this work. But this I must make plain. We cannot agree that an act of plunder which threatens the livelihood of many nations should be allowed to succeed. And we must make sure that the lives of the great trading nations of the world cannot, in the future, be strangled at any moment by some interruption of the free passage of the Canal. These are our intentions. I am sure they will command your support."

Mr. Dulles's Broadcast on Suez Crisis.

The U.S. Secretary of State, after returning to Washington from the London tripartite talks, gave the following radio and television broadcast on Aug. 3:

"This trouble about the Suez Canal started when President Nasser announced that he was going to take over the operation of the Canal. He tried to seize the monies, property, and personnel of the Universal Suez Canal Company, which is the operating Company of that Canal. This act by President Nasser goes far beyond a mere attempt by a Government to nationalize companies and properties within its territory which are not international in character, because the Suez Canal and the operating Company are international in character.

"The Suez Canal is an international waterway which was built by the Universal Suez Canal Company with international funds about a century ago. In 1888 all the Great Powers principally concerned with the Canal made a treaty providing that the Suez Canal shall be open at all times, in war as well as in peace, to the shipping of all nations on free and equal terms. Egypt is a party to that treaty and has repeatedly recognized it. Indeed, only a couple of years ago President Nasser himself reaffirmed the allegiance of Egypt to that treaty. In all the world there is no international waterway as fully internationalized as is the Suez Canal.

"The Universal Suez Canal Company ... has been the means of assuring that the Canal would in fact be operated as a free and open international waterway as pledged by the 1888 treaty. That Company itself is of an international character. Registered in Egypt, it operates under a franchise given it by the Government of Egypt Shareholders are of many nationalities, the board of directors is international, and the canal work—the building of the Canal and the keeping of it in good repair—is supervised by an international body of engineers ...

"In 1955, 14,666 ships passed through the Canal. They had a tonnage of over 115,000,000, flew the flags of more than 40 nations, and carried the products of all the world. There are 187 pilots from 13 nations—56 French, 52 British, 32 Egyptian, 14 Dutch, 11 Norwegian, and so on Two of the pilots are Americans. It is by far the world's greatest highway. It has nearly three times the traffic that goes through the Panama Canal

"Now, why did President Nasser suddenly decide to take over the operation of the Suez Canal? He has told us about that in a long speech he made. In that speech he did not for a moment suggest that Egypt would be able to operate the Canal better than it was being operated . . The basic reason he gave was that if he took over this Canal, it would enhance the prestige of Egypt He said that Egypt was determined to score one triumph after another, in order to enhance what he called the 'grandeur of Egypt' And he coupled his action with statements about his ambition to extend his influence from the Atlantic to the Persian Gulf. He also said that by seizing the Suez Canal he would strike a blow at what he called 'Western imperialism.' And he thought also that he could exploit the Canal so as to produce bigger revenues for Egypt, and so retaliate for the failure of the U.S.A. and Britain to give Egypt the money to enable it to get started on the $1,000,000,000-plus Aswan High Dam

"President Nasser's speech made it absolutely clear that his seizure of the Canal Company was an angry act of retaliation against fancied grievances. No one reading that speech can doubt for a moment that the Canal, under Egyptian operation, would be used, not to carry out the 1888 treaty better, but to promote the political and economic ambitions of Egypt, and what President Nasser calls the 'grandeur of Egypt.'

"Of course, the Government of a free and independent country, which Egypt is—and we want it to be always that—should seek to promote by all proper means the welfare of its people. And President Nasser has done quite a lot of good in that respect. But it is inadmissible that a waterway internationalized by treaty, which is required for the livelihood of a score or more of nations, should be exploited by one country for purely selfish purposes, and that the operating agency which has done so well in handling the Suez Canal in accordance with the 1888 treaty should be struck down by a national act of vengefulness. To permit this to go unchallenged would be to encourage a breakdown of the international fabric upon which the security and the well-being of all peoples depend.

The question is not whether something should be done about this Egyptian act, but what should be done about it. There were some people who counselled immediate forcible action by the Governments which felt themselves most directly affected. This, however, would have been contrary to the principles of the U.N. Charter and would undoubtedly have led to widespread violence endangering the peace of the world At London we decided upon a different approach. We decided to call together in conference the nations most directly involved, with a view to seeing whether agreement could not be reached upon an adequate and dependable international administration of the Canal on terms which would respect, and generously respect, all the legitimate rights of Egypt. . . .

"We believe that out of this conference will come a plan for the international operation of the Canal which will give assurance that the objectives of the 1888 treaty will in fact be realized, and that the Canal will continue to be operated by those who feel that it is their duty to serve the international community, and not the special interests of any one nation. This plan should give both security to the nations principally concerned with the Canal, and also fully protect the legitimate interests of Egypt. Egypt, we believe, should be adequately represented on this operating authority, and be assured, also, of a fair and reasonable income for the use of the property, because the Canal, although it is internationalized, is on Egyptian territory.

"There is every desire that Egypt shall be treated with the utmost fairness. And also, the owners and the employees of the now dispossessed Universal Canal Company should also be fairly treated. If these principles are accepted by the conference, then we believe that they will also be accepted by Egypt. . . .

"I have been asked: 'What will we do if the conference fails?' My answer to that is that we are not thinking in terms of the conference's failing. But I can say this: We have given no commitments at any time as to what the United States would do in that unhappy contingency. We assume that the conference will not fail but will succeed. And I believe that by the conference we will invoke moral forces which are bound to prevail. . . . I am confident that out of this conference there will come a judgment of such moral force that we can be confident that the Suez Canal will go on as it has for the last 100 years, to serve in peace the interests of mankind."

French National Assembly Resolution. - Statements by M. Mollet and M. Pineau.

Before rising for the summer recess, the French National Assembly passed a resolution on Aug. 2 which (*a*) accused Colonel Nasser of breaking international agreements and violating international law by banning Israeli shipping from

the Suez Canal; (*b*) noted that he had proclaimed his determination to establish his hegemony over the Arab world; (*c*) described his conduct as "a permanent threat to peace"; and (*d*) called upon the French Government not to accept the *fait accompli* of Colonel Nasser's seizure of the Canal. The resolution was adopted by 422 votes to 150, only the Communists opposing. Statements were made to the Assembly by M. Mollet, the Prime Minister, and M. Pineau, the Foreign Minister.

M. Pineau emphasized that the London conference convened for Aug. 16 would take place whatever the number of Powers represented. The French Government hoped for and desired a peaceful solution of the problem, but, like the British Government, was obliged to take precautions to prepare for any eventuality French ships had been advised not to pay tariff dues to the new Egyptian Authority, and to change their route if the Egyptians tried to force them to pay canal dues on the spot

M. Pineau explained that, in the French view, international control of the Suez Canal should extend to its day-to-day operation, and not merely consist of a vague supervision. There was no question of the Canal remaining in the hands of a private company, and, under the Western plan, shareholders of the present Suez Canal Company would be indemnified and Egypt would receive fair compensation. The new international authority envisaged in the Western plan, moreover, would not pay any dividends, and the Canal would thus function for the sole benefit of its users This position would be defended by the French Government at the London conference. On the outcome of the conference, M. Pineau said. "Either Colonel Nasser will agree and rescind the measures he has taken, or he will refuse to submit. In that case all possible measures, in our opinion, must be taken to oblige him to submit."

When he saw Colonel Nasser in Cairo earlier in the year (M. Pineau continued) the Egyptian leader had declared that although Egypt necessarily sympathized with Arabic-speaking Moslems in revolt, she desired good relations with France. Colonel Nasser had also given his "word as a soldier" that no Algerian rebels were being trained in Egypt, and his "word of honour" that he had no aggressive intentions towards Israel, and had made "energetic declarations" about his dislike and distrust of Soviet policy. Although France had done all in her power to maintain friendly relations with Egypt, it was no longer possible to have any confidence in a man who had broken his pledged word of honour.

After referring to Colonel Nasser's "hysterical behaviour and irresponsible manner," M Pineau emphasized that it was impossible to base an international system such as the running of the Suez Canal on a man who was not in control of his own acts and his own nerves, and who was leading the Egyptian people along the path of fanaticism and xenophobia. "We will not accept the law of a dictator who cares less about the interests of his people than about his prestige and personal ambitions," he declared "In deflating the prestige of a false hero who is trying to lead the Moslem world into dire adventures, we will be doing all Moslems a service that one day they will appreciate."

It was impossible to trust Colonel Nasser's word, M. Pineau declared, because Egypt had already violated the international character of the Suez Canal by imposing a ban on Israel's shipping. Nor could France admit such gross violations of international morality as the threat to imprison non-Egyptian employees of the Suez Canal Company who did not accept the new Authority. "We do not trust a dictator who has proved his contempt for international commitments," he added "We do not accept that the economic relations of Europe and Asia should depend on his nationalist ambitions."

M. Pineau stressed that it was largely owing to the divergencies between the Western Powers that Colonel Nasser had enjoyed his recent successes In June, already, he (M. Pineau) had tried to draw the attention of the United States to the disquieting behaviour of Colonel Nasser; at the time the attitude of the U S Government had been "resistant," but it had "evolved since" The decision not to finance the Aswan Dam had been taken by the United States alone, without consultation with her allies, and France now found herself "a victim of spoliation and violent injury." In the London tripartite talks, however, "great strides" had been made in securing agreement on essentials, and he had emphasized to Mr. Dulles the consequences of lack of solidarity between the Western allies on a question of such grave importance.

M. Mollet said: "The London conference of Aug. 16 . . . will affirm the common determination of the great majority of nations concerned. The rules that will be confirmed on Aug. 16 will be applied. We will impose them on Nasser if, in a last act of defiance, he claims to ignore them. I can assure the Assembly that the necessary measures have already been taken in France, as they have been by our British friends . . . The Government is aware of the great responsibilities resting on the allies at this moment. It has not hesitated an instant in facing them. It will shoulder them to the end."

During the debate Communist deputies violently attacked the French shareholders of the Suez Canal Company, which led M. Mollet to retort: "It is only necessary for a cause to be anti-French for you [the Communists] to support it." He also asked whether "the pact between Nasser and Shepilov will have the same results as the pact between Hitler and Molotov."

Cairo Statement on London Communiqué. - Partial Mobilization in Egypt. - Recall of Reservists. - Formation of National Liberation Army.

Cairo Radio broadcast on Aug. 3 a reply to the three-Power statement issued in London after the talks between Mr. Selwyn Lloyd, Mr. Dulles, and M. Pineau. It was issued by the Director of President Nasser's Political Office (Wing-Commander Aly Sabry), and purported to be a point-by-point reply to the London communiqué.

After emphasizing that Egypt continued to respect the 1888 Convention, and that traffic through the Canal had been proceeding normally during the eight days since nationalization, the Egyptian statement complained that the London communiqué had been issued in an "atmosphere characterized by pressure on Egypt and the threat of military force" and by "economic pressure in Paris, London, and Washington with the object of compelling the Egyptian people to submit." The Western Powers' statement had given a "distorted picture of the situation" and had omitted all reference to the fact that the Canal would have passed under Egyptian sovereignty in 1968, under the terms of the 1888 Convention. The "commotion aroused in London" (the statement alleged) had proved that the Western Governments had no intention of letting Egypt own the Suez Canal, even after the expiration of the international Convention. Moreover, the tripartite statement had omitted to mention that the Suez Canal Company was a joint-stock company registered in Egypt, and had also made no reference to that paragraph of the Anglo-Egyptian agreement of 1954 which stated: "The two contracting Governments agree that the Suez Canal is an integral part of Egypt."

In nationalizing the Suez Canal Company (the statement continued) the Egyptian Government was exercising the powers of a sovereign State. The London description of the nationalization of the Company as an arbitrary action was "nothing but a fallacy," as the Canal Company was an Egyptian company operating under Egyptian law As regards the allegation that the seizure was a serious act because it appeared to have been taken to serve the national interests of Egypt, as opposed to international interests, the statement declared. "The two interests are inter-related, and reconciliation can be reached between Egypt's interests as provided for in the agreement concerning the construction of the Canal, and the importance of the Canal as an international waterway."

The Egyptian statement also asserted that any employee of the Suez Canal Company in Egypt was free to leave his employment after giving one month's notice. [Although the nationalization law had laid down that employees leaving their jobs without permission would be liable to imprisonment, it was subsequently announced in Cairo that they could resign if they gave one month's notice.]

The Egyptian Government announced on Aug. 5 that it had called up a limited number of reservists "for incorporation in the regular army," but it was officially denied that any general mobilization had started. A number of reserve officers had been recalled after the outbreak of the Suez crisis.

Colonel Nasser signed a decree on Aug. 9 for the formation of an "army of national liberation" under the command of Major Kamaleddine Hussein, the Minister of Education. It will comprise the National Guard (a territorial force), youth battalions, and volunteers between the ages of 18 and 50.

British Military and Naval Precautions. - Evacuation of British Families from Canal Zone. - Revocation of Arms Licences for Egypt.

Precautionary measures taken by the British Government during the week Aug. 4-11 are summarized below:

Retention of Regular Troops. The War Office announced on Aug. 4 that all regular soldiers due for discharge from the Army would be retained for the time being because of the Suez crisis. It was also announced that, owing to the extensive troop movements demanded by the precautionary measures being taken in the Eastern Mediterranean, the return home of National Servicemen overseas who were due for release was liable to be delayed. The arrangements for retaining officers were:

(1) Certain officers on extended-service and short-service commissions would be retained, and voluntary retirements for both would cease.

(2) Officers on short-service commissions due to complete their engagements on the reserve would be invited to continue on the active list.

(3) National Service officers completing their whole-time service could not be retained compulsorily but would be invited, if required, to continue on the active list voluntarily for as long as was necessary, with a minimum of three and a maximum of 12 months.

Troop Movements to Mediterranean. It was stated in the Press on Aug 8-9 that large troop movements from Britain to the Mediterranean, involving five infantry battalions, four anti-aircraft regiments, and an armoured-car regiment, were contemplated within the coming week, both by troopship from Southampton and by airlift from Hurn and Blackbushe airfields. The units involved were stated to include the 1st Bn. Suffolk Regiment (due for posting to the Mediterranean before the outbreak of the Suez crisis), the 1st Bn. Oxfordshire and Buckinghamshire Light Infantry, units of the Somerset Light Infantry the Royal Berkshire Regt., and the Duke of Wellington's Regt., the Life Guards, the 37th and 57th Heavy A.A. Regiments, and the 16th and 43rd Light A.A. Regiments.

The aircraft carriers *Theseus*, *Bulwark*, and *Ocean* left Portsmouth and Plymouth for the Mediterranean between Aug. 5-7. H.M.S. *Theseus* had on board men and equipment of the 16th Independent Parachute Brigade Group, while H.M.S. *Bulwark* carried two Royal Artillery regiments and supporting Signals and REME units. The troopship *Dilwara* sailed from Southampton on Aug. 9 with 1st Battalions of the Suffolk Regt., and the Oxford and Bucks Light Infantry.

Requisitioning of Merchant Shipping and Aircraft. A number of merchant ships were requisitioned by the Ministry of Transport to deal with the emergency troop, stores, and transport movements caused by the Suez crisis. They included the 20,000-ton liner *New Australia*, which was to have sailed for Australia on Aug 29 with 1,200 emigrants from Britain but which was ordered to stand by for taking troops to the Mediterranean.

It was announced on Aug. 7 that the Government had asked independent air operators to prepare to move troops to the Mediterranean. In a joint statement issued on that date by the chairmen of British Aviation Services and Airwork Ltd. (respectively Mr. Mekie and Mr. Wyatt), it was stated that "for the first time in the history of this country, independent airlines are required officially as having a real place in the defence of this country's interests." Mr. Mekie said that charter operators had a fleet of about 200 aircraft, of which about half were four-engined, which would be available to the Government in the event of an emergency.

[British Aviation Services and Airwork represent about half the aircraft strength of the big charter firms. They have between them about 90 planes, of which 16 are four-engined. Silver City Airways have 22 Bristol freighters engaged on cross-Channel motor ferrying.]

A spokesman of British Overseas Airways said on the same date that three of its fleet of six *Britannias* had been made available at the Government's request for the possible airlift of troops.

British Women and Children evacuated from Canal Zone. An airlift of some 900 British wives and children from the Canal Zone ("Operation Nursery") began on Aug. 9 and was scheduled for completion in 7-10 days. It was carried out by BOAC and independent air companies. Sir John Duncanson, chairman of Suez Contractors (Services) Ltd., explained that the measure was of a precautionary character, and that the wives and children evacuated were families of British technicians who were servicing the Suez base. There was no question of the contractors themselves "clearing out" from the base, nor had the 600 technicians there been ordered to leave, but in view of the general situation they had been advised to send their wives and families home.

Revocation of Arms Licences for Egypt. The President of the Board of Trade (Mr. Thorneycroft) announced on Aug. 2 that all licences for the export to Egypt of arms and munitions, including armoured vehicles and parts, aircraft, and aero-engines, had been revoked, and that "no further licences are being issued for the supply of these goods to Egypt."

The Foreign Office announced on Aug. 5 that export licences for the export of arms to the Lebanon in the Egyptian ship *Star of Luxor* —then at Liverpool—had been revoked, and that the arms consignment would be sent to the Lebanon as soon as possible in a non-Egyptian ship. No official explanation was issued, but it was understood that the British authorities feared that the *Star of Luxor* might be diverted to an Egyptian port, where the arms intended for Lebanese use could be requisitioned by the Egyptian authorities. On the previous day the Liverpool dockers had refused to load any of the war materials—which included 12 field guns, 12 Bofors guns, searchlights, radar equipment, and spare parts—on the *Star of Luxor*, since the armament might be used by the Egyptians to kill British troops. They were strongly supported in this attitude by Mrs. E. M. Braddock (Labour M.P. for the Exchange division of Liverpool), who went in person to the quayside and urged the dockers not to handle the war materials.

Anglo-French Staff Talks. British and French Staff officers of the three Services met in London on Aug. 8 to discuss joint plans for dealing with the Suez crisis. The C.-in-C. of the French Mediterranean Fleet, Admiral Barjot, attended the discussions.

Other Developments in the Suez Crisis.

Other developments caused by the Suez crisis in the week Aug. 4-11 are summarized below under cross-headings:

Suez Canal Company's Notification to Employees. The following instructions to its non-Egyptian employees were issued by the Suez Canal Company on Aug. 6:

"On the decision of the board of the Suez Canal Company, the non-Egyptian staff of the company has been invited to choose, before Aug. 15, 1956, between loyalty to the contract which binds them to the company, and acceptance of voluntary co-operation with the *de facto* authority which has seized the running of the canal.

"Those who choose in favour of the company must make it known to their diplomatic or consular representatives in Egypt, who alone will be able to ensure their later repatriation.

"In view of the action undertaken by the French, British and American Governments in calling a conference which is due to open in London on Aug. 16, the company agrees that its agents who will have made an act of loyalty towards it postpone their effective departure from Egypt and continue their work—at the same time abstaining from any act which would constitute freely agreed recognition of any bond whatever with the *de facto* authority—until a date which will be communicated to them later."

Suez Canal Traffic. The first incident on the canal since its nationalization occurred on Aug. 2, when the Norwegian freighter *Vito*, bound for London with a cargo of wool from Australia, was stopped and questioned by the Egyptian authorities about payment of canal dues. Although the Egyptian authorities had telephoned the agents and told them that the *Vito* could not be allowed to proceed because her canal dues had been paid on a blocked sterling account in London, the vessel was nevertheless allowed to pass into the Mediterranean after interrogation, without any further action being taken against her.

It was announced in Jerusalem on Aug. 7 that two freighters chartered by the Israel Navigation Company—one Greek and one Dutch—had been permitted to pass through the Suez Canal with cargoes of cement for East African ports. Their papers showed the port of loading and departure as Haifa, and the vessels were allowed to pass without hindrance after paying canal dues in cash.

Mr. Nehru's Statement on Suez Crisis. In a statement on Aug. 8 to the House of the People in Delhi, Mr. Nehru announced that the Government of India had decided to take part in the London Conference "with a sense of grave responsibility," after receiving assurances from the British Government that India's participation would not imply her commitment to the principles set out in the Anglo-French-American statement. The Indian Government were also satisfied that their participation would not "injure the interests of the sovereign rights and dignity of Egypt." Mr. Nehru added, however, that the conference could not reach any final decision, since that would require the agreement of Egypt He therefore recognized that Egypt "could not and would not take part in a conference on the Suez Canal to which she was merely an invitee and in respect of which there have been no consultations with her."

In the course of his statement Mr. Nehru defended Egypt's action in nationalizing the Suez Canal, and sharply criticized the Western Powers for the military and naval measures taken. The nationalization of the Suez Canal, he said, had been precipitated by the decision not to assist in the construction of the Aswan Dam, and there had arisen "a grave crisis which, if not resolved peacefully, can lead to a conflict the extent and effects of which it is not easy to assess." While the suddenness of Egypt's nationalization decision, and the manner in which it had been implemented, might have contributed to the "violent reactions" in Britain and France, Egypt was within her rights in nationalizing the Canal. Her decision "appeared to antedate" the taking-over of the Suez Canal Company's concession, which was due to expire in 1968, but there was no question of expropriation, as the shareholders would be compensated at market values

Mr. Nehru went on to say that British and French military and naval movements had aggravated the situation, caused deep resentment in the Arab countries and throughout Asia generally, and aroused "colonial memories." He had no desire to add to the passions aroused, but he would be failing in his duty if he did not say that the display of force was "the wrong way." India felt deep concern at the measures taken by Britain and France and the counter-measures reported from Egypt, and hoped that "the parties will enter into negotiations and seek a peaceful settlement." In taking part in the London conference, India would not be bound "by the approach and the principles set out in the joint communiqué of the U.K., French, and U.S. Governments," nor could she participate in any "war preparations, sanctions, or steps which challenged the sovereign rights of Egypt." He criticized the "regrettable omission" of Burma from the countries invited, and thought that Yugoslavia should also have been asked to attend the London conference.

Statement by Government of Pakistan. A Government spokesman in Karachi issued the following statement on Aug. 1: "Pakistan is interested in the maintenance of the Suez Canal as a highway open to the ships of all countries. Any delay, because of its diversion or otherwise, in the traffic to or from Pakistan which normally passes through the Suez Canal would have adverse effects on Pakistan's overseas trade and economy generally. We should therefore welcome the early settlementof this matter"

New Zealand Support for Britain. In a statement to the N.Z. House of Representatives on Aug. 7, Mr. Holland (the Prime Minister) said: "We have told Britain that she can count on New Zealand standing by her through thick and thin—this means exactly what it says" The Canal, as a vital international waterway, was of the utmost importance to both Britain and New Zealand, and the proposition that it should remain under the control of one country could not be accepted. The Leader of the Opposition, Mr. Nash, expressed full agreement, declaring that Colonel Nasser's action in breaking an international agreement was an immoral act which could not be accepted.

Iraqi Support for Egypt. The Iraqi Government issued a statement on Aug. 5 declaring that "nationalization has become the established right of sovereign countries," and expressing the hope that "wisdom may prevail to solve this dispute." The statement added: "While hoping that this will materialize, the Iraqi Government announces that it stands by Egypt in achieving its dignity, sovereignty, and independence." The Iraqi Government also said that it was essential that Arab opinion should not be "distracted from the Israel danger," and that Israel should be given no opportunity "to exploit the current critical situation . . . to achieve its ambitions and interests."

The statement was issued after the Prime Minister, General Nuri es-Said, had returned to Baghdad from a visit to London.

Panamanian Statement on London Conference. The Government of Panama issued the following statement on Aug. 5 in connexion with the London Conference . " The result of the conference to be held in London is especially important for the Republic of Panama. The Panama Canal, which is bounded by our territory, is of vital interest to our country and is similar in some respects to the Suez Canal. Panama is especially interested in this problem because of the big merchant fleet which flies the Panamanian flag. Despite this dual interest which the Republic of Panama has, she has not been invited to the conference. The Government of Panama will therefore not consider herself obliged to respect any of the decsions or recommendations adopted by the conference."

Relaxation of U.S. Financial Restrictions against Egypt. The U.S. Treasury announced on Aug. 5 that it had relaxed the restrictions imposed on Egyptian assets a week earlier, so that trade and business transactions with Egypt could be resumed. It was explained that this did not affect the freezing of the money and property of the Egyptian Government and the Suez Canal Company in the U.S.A. (estimated at $60,000,000 to $80,000,000) but only lifted the former restrictions so as to permit trading. The assets already frozen, however, could not be used for this purpose, and any new transactions must involve " new money " (i.e. " new " Egyptian money sent to the U.S.A. could be used without restriction, and shipments could be made to the Egyptian Government provided they did not involve the frozen assets).

It was also announced in Washington that authority had been given to U.S. ships using the Suez Canal to pay the canal dues to the new Egyptian Authority. Masters were required, however, to stipulate that the payment was made " under protest and without prejudice to all rights of recovery or otherwise."

Mr. Dulles discussed the Suez crisis on Aug. 7 with the heads of all Latin American diplomatic missions in Washington. No statement was issued.

Israeli Ambassador's Visit to British Foreign Office. The Israeli Ambassador in London, Mr. Elath, called at the Foreign Office on Aug. 3 to discuss the Suez situation. No statement was issued, but it was pointed out in the British Press that Mr. Elath had in all probability drawn Mr. Selwyn Lloyd's attention to the fact that Israel, though not invited to take part in the London Conference, was concerned in the use of the Canal, from which her shipping was banned by the Egyptian Government. It was also believed that Mr. Elath had reiterated Israel's plea for arms shipments to counterbalance Egypt's arms supplies from Communist sources.

The *Manchester Guardian* commented as follows " The immediate Israeli reaction to Colonel Nasser's nationalization of the Canal is that it increases the danger of an Egyptian attack on Israel , not, perhaps, in the immediate future but in the long run. Colonel Nasser, the argument goes, is a dictator, and dictators cannot stand still. First it was Suez ; then it was the Canal . . . If he wins this round with the Western Powers, only Israel will remain between him and the undisputed leadership of the Middle East. Sooner or later he will be bound to attack . . It is likely, therefore, that Mr. Elath will have reminded the Foreign Secretary of Israel's outstanding request for arms, and to have urged upon him the fact that, in view of the Israeli Government, the latest developments have made the need for arms even more urgent . . . "

Intense diplomatic activity prevailed in Cairo during the week, Colonel Nasser having a number of meetings with the Soviet and Indian Ambassadors, and also with the ambassadors of the Arab States. He also had several meetings with the U.S. Ambassador, Mr. Byroade. No official statement was issued on these discussions, but it was announced that President Nasser would issue a statement at a press conference on Aug. 12. (Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Indian High Commissioner's Office, London - Pakistan High Commissioner's Office, London - Department of External Affairs, Wellington) **(Prev. rep. A. UNITED KINGDOM. — Regional Stamp Issues.

The Postmaster-General (Dr. Charles Hill) announced on July 18 that the Queen had approved in principle the issue of distinctive stamps for Scotland, Wales, and Northern Ireland in the 2½d., 4d., and 1s. 3d. denominations, and for Jersey, Guernsey, and the Isle of Man in the 2½d. denomination.

Dr. Hill stated that he proposed to invite committees of cultural and artistic interests in the areas concerned to advise on detailed designs, which would be submitted to the Queen for approval; that the border of the new stamps would bear symbols or designs appropriate to the areas concerned ; but that the traditional features of British stamps—the dominance of the Sovereign's head, and the absence of the name of the country of origin—would continue to be observed.

The new stamps will be on sale only in the areas which they represent, but will be valid for postage and revenue purposes throughout the British Isles. They are expected to be in circulation early in 1957.—(Times - Daily Telegraph)

B. INTERNATIONAL BANK. — Tenth Anniversary. - Loan Issues, 1946-56. - Recent Loans. - Revised Interest Rates. - New Vice-Presidents.

The International Bank for Reconstruction and Development completed its tenth year of existence on June 25. Since its inception it has made a total of 149 loans to a value of $2,645,000,000 for post-war reconstruction or economic development, without a default in the payment of capital or interest. Regionally the loans were divided as follows :

Europe	43 loans;	value $979,300,000
Western Hemisphere	60 loans;	value $673,900,000
Asia	27 loans;	value $386,200,000
Africa	15 loans;	value $347,200,000
Australia	4 loans;	value $258,500,000

Recent loans by the Bank are summarized below :

Colombia. $16,500,000 on June 6 to the Colombian Government to complete a highway rehabilitation programme. This loan, the third of its kind, brought the total lent to Colombia for highway improvements to $47,300,000 (118,500,000 pesos) towards an estimated total cost for the entire programme of 515,000,000 pesos Terms : 3¾ per cent p.a interest, plus 1 per cent p a. commission, repayable in 15 years starting on May 15, 1959.

Federation of Rhodesia and Nyasaland. $80,000,000 on June 22 to the Federal Power Board for the first stage of the Kariba hydro-electric power scheme (see 14751 A). Terms : 4 per cent p.a. interest, plus 1 per cent p a. commission, repayable in 25 years beginning on June 1, 1963. The loan was guaranteed by the Governments of the Federation and of the U.K.

Finland. $15,000,000 on May 22 to the Mortgage Bank of Finland (a new institution owned almost entirely by the Bank of Finland) for the expansion and distribution of electric power. The estimated total cost of the scheme was $103,000,000 and the Bank's loan was to be used to meet foreign exchange requirements for equipment and materials. The New York Trust Co. participated in the loan without the International Bank's guarantee to the extent of $280,000. Terms : 3¾ per cent p a. interest, plus 1 per cent p a. commission, repayable in 20 years beginning on June 1, 1959

India. $75,000,000 on June 26 to the Tata Iron and Steel Co. of Jamshedpur (the largest integrated steel plant in Asia) to assist in financing the purchase of equipment abroad for an expansion programme to raise the Company's annual output to 2,000,000 tons of ingot steel (see 14792 A). The First National City Bank of New York, the Irving Trust Co. and the Manufacturers Trust Co participated in the loan to the extent of $2,355,000. Terms : 3¾ per cent p.a interest plus 1 per cent p a commission, repayable in 15 years beginning on Dec 1, 1959. The loan, the largest made by the International Bank in Asia, was guaranteed by the Government of India.

Nicaragua. $3,200,000 on May 22 to the Corinto Port Authority, an autonomous agency established by the Nicaraguan Government to own and operate the principal seaport in the country, for port improvements costing an estimated $4,500,000. The Bank of America participated in the loan, without the International Bank's guarantee, to the extent of $121,000. Terms . 3¾ per cent p.a. interest plus 1 per cent p a. commission, repayable in 15 years starting on Oct 1, 1959.

These loans were the third to the Federation of Rhodesia and Nyasaland, the sixth to Finland, the eighth to India, the ninth to Nicaragua, and the eleventh to Colombia.

A revision of the International Bank's interest rates was announced on June 14. New rates (excluding the 1 per cent commission charged by the Bank) were 3¾ per cent on loans up to 15 years and 4 per cent on those of 16 years or longer. (Previous rates were 3½ per cent up to 5 years, 3¾ per cent for 6 to 10 years, and 3¾ per cent for 11 years or over).

Following the resignation of Mr. Robert L. Garner as Vice-President of the International Bank (consequent upon his appointment as President of the newly-formed International Finance Corporation), it was announced on July 27 that three new Vice-Presidents had been appointed : Mr. W. A. B. Iliff (hitherto Assistant to the President), Mr. J. Burke Knapp (hitherto Director of Operations with the Western Hemisphere), and Mr. Davidson Sommers (hitherto General Counsel, a post which he will continue to hold). Mr. Iliff is a British national and Mr. Knapp and Mr. Sommers are American citizens. (International Bank, Washington) **(Prev. rep. 14868 A.)**

C. JORDAN - SYRIA. — Customs Union.

An agreement was signed in Damascus on Aug. 6 for the formation of a Customs and economic union between Syria and Jordan. It provided that nationals of each country would have freedom of residence, movement, and employment in the other ; that there would be similar freedom of movement in respect of capital and personal possessions ; and that policies and regulations relating to agriculture, industry, commerce, and taxation would be co-ordinated and unified by special committees. (Times - Le Monde, Paris) **(Prev. rep. 14985 A.)**

A. ITALY. — Communist and Left-wing Socialist Reactions to M. Khrushchev's Denunciation of Stalin. - Criticisms of Soviet Communist System.

The problems raised by the publication in the U.S.A. of M. Khrushchev's secret report to the 20th Congress of the Soviet Communist Party and the full details of his denunciation of Stalinist policy (see 14992 A) were discussed in important statements published during June by Signor Togliatti and Signor Nenni, general secretaries of the Italian Communist and left-wing Socialist parties respectively. These statements are summarized below.

Statements by Signor Togliatti.

In an interview with the journal *Nuovi Argomenti*, published in the Communist Party paper *L'Unità* on June 17, Signor Togliatti strongly criticized M. Khrushchev's failure to analyse the causes of the growth of the " cult of the individual " in the Soviet Union, and emphasized that for Communist parties outside the Soviet Union " the Soviet model cannot and should not any longer be obligatory."

Dealing with the significance of the condemnation of the " cult of the individual," Signor Togliatti rejected the view that " the Soviet Communists have thrown overboard all their principles and practice and their entire past," or that the criticism of Stalin reflected a personal struggle among the Soviet leaders, or between different groups. " The criticisms of Stalin and the cult of the individual mean for the Soviet comrades exactly what they have said," he continued " Stalin's errors . . . were very serious and widespread, and I do not think that it will be at all easy to overcome them, nor possible to do it in a very short time. One can say that a large part of the leading cadres of Soviet society (party, State, economy, culture, etc), were paralysed by the cult of Stalin, losing their critical and creative capacity in thought and action. For this reason it was absolutely necessary to make the denunciation of Stalin's errors, and to do it in such a way as to shake up and reactivate the whole life of the organisms of which the system of Socialist society consists."

Signor Togliatti said that he did not believe that the " new process of democratic development in the Soviet Union " would involve the introduction of political institutions on the Western model or the development of a multi-party system. Modifications, however, would be introduced into the Soviet political system ; the most significant measures which had been taken hitherto were those in the direction of greater decentralization of economic organization.

Turning to the question of " the collective responsibility for these mistakes of the whole leadership, including the comrades who have taken the initiative either in the denunciation or correction of the evils which had come about earlier," Signor Togliatti referred to the explanation put forward by M. Khrushchev that " Stalin's removal from power when the gravity of his mistakes was realized was ' legally possible ' but impossible in practice, because if the question had been raised there would have been a conflict, and this might have jeopardized the fate of the revolution and the State." Whilst accepting this explanation as true, Signor Togliatti observed that " it adds a complication to the situation and in fact makes it worse. We are forced to admit that either the vast majority of the leading cadres in the country, and therefore the people as well, were unaware of the errors committed by Stalin, which does not seem likely, or that they did not regard them as errors. As you see, I rule out the explanation that change was impossible only because of the existence of a military and police system which controlled the situation by terrorist methods. . . . It seems far more accurate to recognize that, despite the errors he committed, Stalin had the support of the greater part of the country, and particularly of the leading cadres and of the mass of the people. Did this result from the fact that Stalin not only made mistakes, but also did many good things ? . . But this does not explain all, and in particular it fails to explain the seriousness of the mistakes which are being denounced today."

" Whilst the 20th Congress has made an enormous contribution to the exposure and solution of many serious and new problems of the democratic and Socialist movement," Signor Togliatti went on, " whilst it marks a turning-point in the development of Socialist society, we cannot consider as satisfactory the position adopted by the Congress, which is now being amply developed by the Soviet Press, with regard to Stalin's mistakes and the causes and conditions which made them possible. The cause of everything is said to lie in the ' cult of the individual '—in the cult of one person who had serious defects . . . The present leaders of the Soviet Union have known Stalin a great deal better than we have, and therefore we ought to believe them now, when they describe him in this way. We can only think that, seeing how things stood, they might at least have been more prudent in that public exaltation of the qualities of this man to which they have accustomed us. It is true that today they are criticizing him, and that is to their credit ; but as a result of this criticism there is no doubt that they have lost some of their prestige.

" But apart from this, so long as they limit themselves to denouncing Stalin's personal defects as the ultimate cause, the problem remains within the limits of the ' cult of the individual.' At one time all that was good was attributed to the superhuman positive qualities of one man ; now all that is bad is attributed to his equally exceptional and even staggering faults. In either case, we are outside the criterion of judgment which is proper to Marxism. The real problems are unanswered, which are how and why Soviet society could and did stray so far from the path of democracy . . . . "

Analysing the reasons for this development, Signor Togliatti suggested that it was during the controversies which followed Lenin's death, when " all the healthy elements in the party " accepted Stalin's leadership, that they " accepted such modifications in the functioning of the party and in its leading organs, such a system of direction from above, that they could either not oppose it when evils began to come to light, or they did not even understand well enough, at the beginning, that it was a question of things being bad." As a result of the success of the first Five-Year Plan and the collectivization of agriculture, he continued, there was a prevailing tendency to " exaggerate and to consider all problems solved." In consequence, as difficulties developed they tended to be attributed to " sabotage, the work of the class enemy, counter-revolutionary groups operating secretly, and so on," whilst Stalin's theory of " the aggravation of the class struggle with the progress of Socialist construction " led to " unprecedented violations of Socialist legality." Signor Togliatti attributed Stalin's popularity to the economic and military successes achieved under his leadership, observing that " no one can deny that the Soviet Union in 1953 was incomparably stronger, more developed in every way, more consolidated internally, and enjoyed more authority compared with other countries than, for instance, in the period of the first Five-Year Plan."

Saying that the Soviet leaders had so far only developed the criticism of the " cult of the individual," and " debunked myths and legends aimed at the exaltation of one man," Signor Togliatti added . " So far so good, but it is not all that one should expect of them What is more important is to give the right answer . . . to the question how the mistakes which are being denounced today came to invade the development of Socialist society."

As to the question why " the Communists of the whole world believed in the official Stalinist version of the trials and plots," Signor Togliatti maintained that during the 1936-38 period " there was nothing to cause the Communist leaders to doubt the sentences, particularly because they knew that, once discredited politically and in the eyes of the mass of the people, the leaders of the old opposition groups were not above continuing the struggle by terrorist methods. . . The fact that all the accused confessed doubtless caused some surprise, even among us, but no more than that. In any case, it is not yet clear whether the denunciations now made of the violation of legality and the application of unlawful and morally repugnant methods of procedure cover the whole period of the trials or only a particular, more recent period . In the case of the earlier trials, those about which we were able to form some opinion, because the later ones for the most part were not made public, my opinion today is that both factors were present—the attempts of opponents to plot against the régime and carry out acts of terrorism, and the use of illegal methods of procedure which are morally to be condemned The first factor does not, naturally, make the second less serious."

Dealing with the question of future relations between the Soviet and other Communist parties, Signor Togliatti said that the criticisms of Stalin made at the 20th Congress had caused " surprise, sorrow, and bewilderment " in other Communist parties, but would not diminish " the mutual trust and solidarity between the different parties of the Communist movement," and would give rise to " the desire for ever greater independence of judgment, which can only benefit our movement." " Today," he continued, " the front of Socialist construction in the countries where the Communists are the party in power is so vast, comprising a third of humanity, that even for this part the Soviet model cannot and should not any longer be obligatory. In the rest of the world there are countries where it is hoped to achieve Socialism without the Communists necessarily being the ruling party. In others the advance towards Socialism is an objective which draws together various movements which have not yet reached any mutual agreement or even understanding. The whole system is becoming polycentric, and even in the Communist movement itself we cannot speak of a single guide, but rather of progress which is achieved by following paths which are often different.

" One general problem, common to the whole movement," he concluded, " has arisen from the criticism of Stalin— the problem of the dangers of bureaucratic degeneration, of the stifling of democratic life . . . We welcome the fact that among the Communist parties which are in power there is a contest to find the best way of removing this danger once and for all. It is our task to work out our own method . . . "

Signor Togliatti enlarged on a number of points raised in his article in a statement submitted to the Communist Party's central committee on June 24, after being approved by the executive, in which he examined its significance for the Italian party and suggested that relations between Communist parties should become " bilateral."

He said that although the Soviet Union remained " the first great historical model of the conquest of power by the working class," its experience " cannot contain directives for the solution of all the problems that may face us and the Communists of other countries, be they in power or not. The solution that today probably corresponds most closely to this new situation is perhaps that of full autonomy for individual Communist movements and parties, and of bilateral relations between them . . . Such a system probably would also permit a better extension of relations between the Communist movements and Socialists, Social Democrats, and national liberation movements." As examples of " bilateral relations " he cited the recent renewal of relations between the Italian and Yugoslav Communist parties, and the agreement between the latter and the Soviet party (see 14937 A). Differences between the Italian and Soviet

parties, he recalled, had arisen in the past without disturbing their "reciprocal solidarity and understanding"; thus in 1951 he had himself rejected a proposal by Stalin that he should resign his post in order to assume that of general secretary of the Cominform.

Turning to M. Khrushchev's secret report, Signor Togliatti sharply criticized the manner in which it had been "brought to the knowledge of the Communist movement in capitalist countries," and said that it had not answered the questions which it had raised, and especially that of "guarantees against the repetition of similar errors." It was possible, he suggested, that "in the Soviet Union, while political direction remains in the hands of the working class and its allies, democracy may and should be developed in a new way, but keeping its original characteristics."

Referring to the theory of Marx, Engels, and Lenin that "the apparatus of the bourgeois State" must be "destroyed by the working class and replaced by the apparatus of the proletarian State," Signor Togliatti questioned whether this view was still valid. "When we in fact affirm that progress towards Socialism is possible not only by democratic means but also by using parliamentary forms, it is evident that we correct something in this position, taking into account the changes that have come about and that are in progress in the world. And here arises the question of the existence of different parties in a Socialist society . . What has been done in the Soviet Union is not the model of what may and can be done in other countries. We admit without difficulty that in a society where Socialism is being built there may be several parties, of which some collaborate in this construction"

Emphasizing that "we must continue to seek and pursue our own way, an Italian way, towards Socialism," Signor Togliatti suggested that the Communist Party should seek the support, not only of the peasantry, but also of "the working and productive middle class in the cities," and should try to persuade them that they "will in no way be the victims of the building of Socialist society, but that they will collaborate in its management" In conclusion he referred to the alliance with the Nenni Socialists, to which, he said, the Communist Party attached "the value of a principle."

A delegation of three members of the Central Committee, headed by Signor Pajetta, subsequently visited the Soviet Union for talks with the Soviet party leaders. After hearing their report the Committee issued a statement on July 18 that the talks had taken place in "a spirit of sincere friendship" and had confirmed the "fraternal solidarity" between the Italian and Soviet Communist parties.

Statement by Signor Nenni.

Signor Nenni, in an article published in the left-wing Socialist paper *Avanti* on June 23, not only criticized many features of the Khrushchev report, but also stressed the co-responsibility of the present Soviet leadership for the policy and excesses of the Stalin regime. He also questioned the effectiveness of the new collective direction of the Soviet Communist Party in preventing a return to another dictatorship.

After saying that it was "neither the last nor the least of the surprises of the 20th Congress" that Communist parties outside the Soviet Union had come to know "one of the most serious and dramatic documents in the Communist literature of the world" through the medium of the U S. Information Services, Signor Nenni recalled M. Khrushchev's statement that Stalin's dictatorial tendencies had first become fully evident after the 1934 Party Congress. At that Congress, however (Signor Nenni pointed out), the final resolution unreservedly approving the Central Committee's policy and Stalin's report had been moved by M. Khrushchev himself "When we remember that Stalin's power was not then what it became during the war," he continued, "it is clear that the massacres revealed by Khrushchev involve the responsibility not only of Stalin but of the entire party directorate Terrorism at a time when it was not justified by necessity was the price paid for the suppression of all democratic life within the party and the nation . . . There is no doubt that the facts cited by Khrushchev, and on which world opinion now awaits proper documentation, must have placed the members of the Politburo in a very difficult situation But they had been placed in posts of responsibility precisely for this purpose—precisely to face difficult situations."

"From the revelations of Khrushchev," Signor Nenni went on, "we learn that the master of the Kremlin appears to have been practically a maniac who, like the figure of the dictator in which Charlie Chaplin portrayed Hitler, 'drew plans on a map of the world' Khrushchev cannot contain his derision at and contempt for Stalin's military genius. Of the historical and military films of Stalin he says that 'they make me sick.' The snag is that upon those films, books, and poems there was organized the greatest propaganda hoax the world has ever known." Commenting on the omission in the Khrushchev report of any explanation as to how it was possible that Stalin could have become all-powerful, Signor Nenni added "There is a list of facts, of shameful facts, as Khrushchev calls them. But there is not even an attempt to answer the question, 'How and why did all this happen?' We do not even know how the Soviet ruling group has arrived at its conclusions, whether it is unanimous or divided; and, if the latter, on what and why."

Referring to the remedies proposed by M. Khrushchev in his report, Signor Nenni observed that they showed "a similar uncertainty" and were the same remedies as had been previously proposed "a hundred times" by Stalin himself and other Soviet leaders. He continued: "If in the collective direction by the Politburo or the Central Committee there is progress compared with personal direction, whether enlightened or tyrannical, there is nevertheless no guarantee of democratic life. Now the entire problem of Soviet society, and the entire problem of the people's democracies which have modelled themselves on Soviet institutions and methods, is reduced to the necessity for internal democratization, for the circulation of ideas—in a word, for political freedom, a need which has lain below the surface of Soviet society for many years It is substantially a question of eliminating in the State, in the laws, and above all in habits and customs, every surviving incrustation of wartime Communism; of creating new means and instruments for the formation of free political initiative by the citizen, freed from the danger of being accused of being an 'enemy of the people', a 'deviationist,' a 'saboteur,' every time he puts forward his opinion against that of the authorities In this sense the Soviet crisis covers not only the so-called errors of Stalin, but also the Soviet system as it has taken shape..."

"A century after its formulation by Marx and Engels," Signor Nenni continued, "the concept of the dictatorship of the proletariat must be thought out again and reconsidered in relation to a society where the influence and weight of the proletariat and of the workers in general have become a determining factor in public life, and where the State, in the more democratic and socially advanced nations, reflects the continuous evolution of class relationships . . . It would be absurd to close one's eyes to the fact that [in the Soviet Union] the dictatorship of the proletariat developed into the dictatorship of the Communist Party, and this, in turn, into the personal dictatorship of Stalin, thus putting itself beyond the bounds of the prophecies and concepts of the masters of Socialism"

Turning to matters of "immediate and practical interest to Socialists" in this "cataclysm of de-Stalinization," Signor Nenni expressed the view that the dissolution of the Cominform seemed to have resulted "from the tendency in Moscow to assume towards the other Communist parties in the world a position of detachment that would have been inconceivable at the time when the Third International was in fact one world party." Similarly, the Khrushchev-Tito agreement sanctioned "the principle of the multiplicity of the Socialist experiment," whilst Signor Togliatti's claim to "an ever greater independence of judgment" was "a new fact indicative of the necessity for Communists to seek means of a different development, a development of their own, a development that may be of great importance if not dictated by contingent tactical considerations..."

The directorate of the Italian Socialist Party, in a statement published on July 5, declared that "the new course of Soviet policy constitutes an increasingly useful contribution to the policy of peaceful co-existence between peoples and States" and "opens the way to a reconciliation between the various movements and parties which in various ways are directed towards Socialism." (L'Unità, Rome - Avanti, Rome)

A. ARGENTINA. — Multilateral Trade and Payments Agreement in Force. - Danish Adherence. - Extension of Anglo-Argentine Trade Agreement.

The Argentine Ministry of Finance announced at the end of June that the multilateral trade and payments arrangement negotiated with a number of Western European countries (see 14907 B) would come into operation from July 2.

It was explained that the currencies of the European participants (Austria, Belgium-Luxemburg, Denmark, France, the Netherlands, Norway, Sweden, Switzerland, and the U K.) would be freely interchangeable, except that Austria would continue to pay for purchases from Argentina in "agreement dollars," while Argentine imports from Austria would be paid for in sterling. Argentine exchange permits for purchases in Denmark, Norway and Switzerland would be granted initially only in the currencies indicated in the relevant bilateral agreements.

Western Germany and Italy were expected to adhere to the agreement when certain formalities had been completed

By an exchange of Notes dated June 25, Argentina and the U.K. agreed to prolong those parts of the 1955 Anglo-Argentine agreement (see 14180 A) not covered by the multilateral arrangements until such time as a new agreement could be drawn up. The 1955 agreement was due to have expired on June 30.

The Argentine Minister of the Treasury, Dr. Eugenio Blanco, said on June 22 that Argentina's dollar earnings were inadequate, and that gold reserves must therefore be used for ordinary purchases in the dollar area until exports could be increased. The *Banco Central* had consequently made two sales of its gold holdings in the U.S.A., on June 1 and June 18, each for the equivalent of 82,900,000 pesos. (Bank of London and South America, Fortnightly Review) **(Prev. rep. Multilateral Agreement, 14907 B; Economic Position, 14553 A.)**

A. LITERATURE. — Book Selections for July.

Selected books published in Great Britain, the United States, and France are given below:

Great Britain. Barkeley, Richard—"The Empress Frederick. Daughter of Queen Victoria." (Macmillan, 30s.)

Beatty, Charles—"Ferdinand de Lesseps." A Biography of the Builder of the Suez Canal. (Eyre & Spottiswoode, 30s.).

B. RELIGIOUS LIFE. — Church of England. - New Episcopal Appointments.

The following episcopal appointments were approved by H.M. the Queen during the past eight months: the Rt. Rev. C. K. N. Bardsley (48), Bishop Suffragan of Croydon, as Bishop of Coventry in place of the late Dr. Gorton (Feb. 8); Dr. Maurice Henry Harland (59), Bishop of Lincoln, as Bishop of Durham in place of Dr. Ramsey, consequent upon the latter's appointment as Archbishop of York in succession to the late Dr. Garbett (March 28); the Rt. Rev. Ivor Stanley Watkins (59), Bishop Suffragan of Malmesbury, as Bishop of Guildford in succession to Dr. Montgomery Campbell, consequent upon the latter's translation to the See of London in succession to Dr. Wand (May 15); Dr. Robert Stopford (55), Bishop Suffragan of Fulham, as Bishop of Peterborough in place of the late Dr. Spencer Leeson (June 11); Dr. Kenneth Riches (47), Bishop Suffragan of Dorchester, as Bishop of Lincoln in place of Dr. Harland, translated to the See of Durham (Aug. 8). (Church Times) **(Prev. rep. 14636 D.)**

C. PERSIA. — Release of Dr. Mossadeq.

Dr. Mossadeq, Prime Minister of Persia at the time of the Abadan crisis, was released from prison on Aug. 4 after having served the sentence of three years' imprisonment for treason and plotting to overthrow the Shah which had been imposed on him in 1953. (Times) **(Prev. rep. 14782 B; 13395 A.)**

D. ECUADOR. — Presidential Election.

Presidential, Vice-Presidential, and Congressional elections were held in Ecuador on June 3, the presidential elections being contested by four candidates: Señor Camilo Ponce Enriquez (45), a former Minister, representing the conservative and right-wing Popular Alliance; Señor Raúl Clemente Huerta (42), candidate of the National Democratic Front, comprising liberals, socialists, and independents; Señor Carlos Guevara Moreno (45), candidate of a left-wing group known as the "Concentration of Popular Forces"; and Dr. José Chiriboga Villagomez (45), a former Ambassador in Washington, who stood as an independent liberal and who unsuccessfully contested the 1952 presidential election.

The final results of the presidential election were not issued until July 27, when the Supreme Electoral Tribunal announced that Señor Ponce Enriquez had been elected to the presidency by 178,421 votes against 175,378 for Señor Huerta, the runner-up—a majority of only 3,043. Official but incomplete returns issued in Quito shortly after the election had given 183,000 votes for Señor Ponce Enriquez, 172,000 for Señor Huerta, 148,000 for Señor Guevara Moreno, and 114,000 for Dr. Chiriboga Villagomez.

The elections took place in an orderly atmosphere and with few incidents. Señor Huerta's supporters, however, subsequently claimed that their candidate had polled a majority of the votes and questioned the accuracy of the figures issued by the Government Press Office. It was reported from Quito on June 6 that the Deputy Minister of Defence (Lieut.-Colonel Almeida Urrutia), a former Defence Minister (Señor Menendez Gilbert), and a Liberal deputy had been arrested on charges of conspiracy to upset the results of the voting.

The Ecuadorean Government announced on Aug. 8 that it had quelled a small-scale military revolt in the province of Manabi, and that loyal troops had recaptured Porto Viejo (the provincial capital) after it had been seized by insurgent forces under a local military commander. No reason was given for the revolt, but it was believed to have been caused by the delay in announcing the results of the presidential election.

Señor Ponce Enriquez will be the first conservative President of Ecuador since 1895, all his predecessors since that year having been liberals. He will be installed for a four-year term on Sept. 1 in succession to the outgoing President, Dr. José Maria Velasco Ibarra, who was returned as an independent liberal in 1952.

Nearly 750,000 people registered on the electoral rolls out of a total population of 3,500,000, the number of votes cast being about 620,000. Women voted for the first time, though they had received the franchise in 1947. (New York Times) **(Prev. rep. Presidential Election, 12395 D.)**

E. NEPAL. — Failure of Anti-Government Plot. - Diplomatic Relations with Soviet Union and Japan.

It was announced in Khatmandu on July 5 that a plot to overthrow King Mahendra's Government had been foiled and that 11 persons implicated in the conspiracy, including a number of former Army officers, had been arrested. It was stated that seized documents showed that the plot had been aimed at the simultaneous capture of the Royal Palace, the Secretariat buildings, and Ministers' residences; that the Army was not affected; and that the arrested persons would be brought to trial. On the following day it was announced that an official tribunal was being set up to investigate the plot.

In accordance with the Nepalese Government's decision to extend contacts with other countries, the Ministry of External Affairs announced on July 20 that Nepal and the Soviet Union had decided to establish diplomatic relations at embassy level. It was subsequently announced on July 29 that diplomatic relations would be established with Japan.—(The Hindu, Madras - The Statesman, Calcutta) **(Prev. rep. 14716 A.)**

F. UNITED STATES. — National Debt. - Legislation for Temporary Debt "Ceiling" in 1956-57.

The U.S. Treasury's statement of July 9, covering the end of the fiscal year to June 30, 1956, showed that the U.S. National Debt at that date totalled $272,750,813,650—a reduction of $1,628,409,152 from the figure of $274,374,222,802 on July 1, 1955. The total as at June 30, 1956, was over $2,000,000,000 below the permanent debt "ceiling" limit of $275,000,000,000 set by law.

A temporary "ceiling" of $278,000,000,000 during the fiscal year July 1956-June 1957 was fixed in a Bill passed by the Senate on July 3 after previous approval by the House of Representatives. The new temporary ceiling was $3,000,000,000 less than that of $281,000,000,000 which had been in effect during the fiscal years 1954-55 and 1955-56. At one time during the 1955-56 fiscal year the actual debt nearly touched the temporary limit, reaching its highest point in U.S. history ($280,310,000,000) on January 4, 1956. (New York Times) **(Prev. rep. 14302 C.)**

A. UNITED KINGDOM. — Trade Figures.

Trade figures for the second quarter of 1956 were as follows:

	Imports	Exports	Re-Exports	Adverse Visible Balance
		(£ million)		
June	339 9	276.1	12.2	51 7
May	329 1	283.8	13.5	31.8
April	327.4	256.4	13.7	57 3

Overseas Trade in First Half of 1956.

Imports in the first six months of 1956 totalled £1,977,000,000, nearly 4 per cent more than in the first half of 1955. Exports in the first six months of 1956 amounted to £1,591,000,000—14 per cent higher than in the corresponding period of 1955 (when shipments were affected by strikes). Re-exports, totalling over £80,000,000, were more than 40 per cent above the figure for the first half of 1955. The total visible deficit for the half-year, £305,000,000, was £150,000,000 less than in the first half of 1955.

Exports of aircraft during the 6-months period totalled nearly £56,000,000, 82 per cent more than in the first half of 1955, and exports of radio, television and electronic equipment, totalling £19,170,000, were more than £3,500,000 higher than in the first six months of 1955.

Overseas Trade in 1955.

Further details of overseas trade in 1955 (see 14700 E) are given below, the figures for each quarter and for the whole year being as follows:

	Imports	Exports (inc. Re-Exports (£ million)	Adverse Balance
1st Quarter	1,005	774	231
2nd Quarter	900	675	225
3rd Quarter	981	756	222
4th Quarter	1,002	816	186
Year 1955*	3,886	3,024	862

* Figures for the year include corrections not made in individual quarters

Divided into the four main categories, value figures of imports and exports were as follows:

	Imports		Exports	
	1955	1954	1955	1954
	(£ million)			
Food, beverages and tobacco	1,444	1,329	172	158
Basic materials	1,124	1,023	111	101
Mineral fuels and lubricants	410	329	141	152
Manufactured goods	894	680	2,388	2,172
Total*	3,886	3,374	2,905	2,674

* Including postal packages and live animals of a kind not normally used for food

Volume of Trade.

Quarterly and annual volume figures are shown below (1954 = 100):

	Total Imports	Retained Imports	Total Exports (inc. Re-Exports)
1st Quarter	114 2	114.2	111.4
2nd Quarter	103.8	104 0	96.7
3rd Quarter	113.5	113 6	107.5
4th Quarter	114 3	113.9	114.6
Year 1955	111 5	111.4	107 6

Terms of Trade.

The terms of trade for 1955 as a whole were slightly more adverse than in 1954, averaging 101 for the year (1954 = 100).

The terms improved from 104 in January and February to 99 in July, but deteriorated again to 101 in November and December. The import price index moved between 105 (in February and again in December) and 102 (July and August). The export price index rose from 100 in January to 104 in December.

Developments in 1955.

Imports. The steep rise in imports in 1955 by £512,000,000 was attributable mainly to industrial materials and fuels. Four times as much coal was imported as in 1954, amounting to some 11,000,000 tons Imports of rubber, totalling £96,000,000, rose in value to almost double the 1954 figure, representing a 28 per cent increase in quantity and a 49 per cent increase in average price. Copper imports rose by 33 per cent in average price but only 3 per cent in quantity Other large increases were shown in imports of mineral fuels and lubricants by £81,000,000 (24½ per cent), cereals and feeding-stuffs by £58,000,000 (27 per cent), timber (24 per cent), newsprint (24 per cent), and iron-ore and iron and steel scrap (29 per cent). Imports of electrical machinery and apparatus, valued at £23,509,000, were 47 per cent above the 1954 level, and other machinery, valued at £92,150,000, 23 per cent higher. Sixteen per cent more grey cotton cloth was imported, but imports of raw cotton declined by 21½ per cent to less than £99,000,000. Raw cocoa imports fell by 15 per cent (£8,000,000), and tea imports by 1 per cent.

Exports. The value of metal manufactures exported rose by 17 per cent in 1955 to £396,000,000, but the increase partly reflected the higher price of copper. At £1,119,000,000, exports of engineering products were worth £105,000,000 more than in 1954. Big increases were shown by electrical machinery (13 per cent), electric wires and cables (43 per cent), commercial vehicles and chassis (26 per cent), aircraft (26 per cent) and chemicals (14 per cent). Exports of cotton fabrics declined by £11,000,000 (14 per cent), of synthetic fabrics by over 24 per cent, of coal by 6 per cent, and of petroleum and petroleum products by 8 per cent.

Area Pattern of Trade.

There was a marked growth of trade, both in imports and exports, with non-sterling countries during 1955. Imports from these countries rose by 23 per cent, compared with 5 per cent for sterling imports. Exports to non-sterling countries increased by 10 per cent, compared with 7½ per cent for sterling countries. Details are shown in the tables below:

	1955	1954
	(£ million)	
Imports (c.i.f.):		
Non-sterling:		
Dollar Area	843	619
O.E.E.C. Countries and Dependencies	953	817
Other	518	440
Total Non-Sterling Area	2,313	1,876
Sterling Area	1,573	1,497
Total	3,886	3,374
Total Exports (f.o.b.):		
Non-Sterling		
Dollar Area	418	375
O.E.E.C. Countries and Dependencies	817	776
Other	339	277
Total Non-Sterling Area	1,573	1,428
Sterling Area	1,451	1,347
Total	3 024	2,775
Excess of Imports over Total Exports		
Non-Sterling		
Dollar Area	425	244
O.E.E.C. Countries and Dependencies	136	42
Other	179	163
Total Non-Sterling Area	740	448
Sterling Area	122	151
Total	862	599

Balance-of-payments difficulties led a number of sterling area countries to adopt policies designed to reduce imports in 1955. In consequence, total U.K. exports to Australia were only 2½ per cent higher than in 1954. Exports to South Africa rose by 7 per cent, to New Zealand by 11 per cent, and to India by 13½ per cent, but shipments to Pakistan were 20 per cent below the 1954 level. Exports to the Colonies were more buoyant than to the independent members; there were increases of 17½ per cent to West Africa and 20 per cent to East Africa. Imports from the sterling area rose only moderately in 1955 (by 5 per cent).—(Board of Trade Journal) **(Prev. rep. First Quarter, 1956, 14879 C; Year 1955, 14700 E.)**

B. SOVIET UNION. — Expulsion of Military and Naval Attachés in Washington and Buenos Aires.

The U.S. State Department announced on July 3 that Colonel Ivan Bubchikov, an assistant military attaché at the Soviet Embassy in Washington, had been expelled from the United States for engaging in "activities incompatible with his continuing presence." The announcement gave no further details except that Colonel Bubchikov had been declared *persona non grata* on June 14 and had left the U.S.A. ten days later.

On July 1 it had been announced in Buenos Aires that Captain Morosov, assistant naval attaché at the Soviet Embassy, had been declared *persona non grata* by the Argentine Government and ordered to leave the country within 24 hours. No official reason was given for this action. (New York Times)

C. SOUTH AFRICA. — Cabinet Reorganization.

A reorganization of the Union Cabinet was carried out by Mr. Strydom on July 31 and Aug. 2 whereby (*a*) Mr. J. F. Naude, the Minister of Health, took over the portfolio of Finance from Mr. Eric Louw, who had held it concurrently with the Foreign Affairs portfolio; (*b*) Mr. J. H. Viljoen took over the Health portfolio relinquished by Mr. Naude, while remaining Minister for Education, Arts, and Science; and (*c*) Mr. F. E. Erasmus, the Defence Minister, concurrently took over the Forestry portfolio formerly held by Mr. Viljoen. (Cape Times)

(Prev. rep. Cabinet, 13973 E; 13941 A.)

A. AUSTRALIA. — Labour Party Split in New South Wales. - Removal of State Executive.

The Federal Executive of the Australian Labour Party decided on June 12 to dismiss the New South Wales State Executive of the party, on the ground that it had acted "contrary to the party's constitution, platform, and policy," and to appoint a caretaker committee. This decision was approved by a special Federal conference of the party, meeting in Melbourne on June 13. Immediately afterwards two N.S.W. members of the Federal Executive—Mr. Campbell, president of the N.S.W. branch, and Mr. Colbourne, the branch secretary—left Melbourne for Sydney to take over control of the affairs and assets of the N.S.W. branch. [These assets were estimated to be worth more than £A200,000, and included a broadcasting station at Newcastle.]

The removal of the New South Wales State Executive was a continuation of the purge of right-wing elements in the party which began in Victoria in 1955. The split was basically caused by disagreement over the continued activities of the so-called "industrial groups," which had been formed to combat Communism in trade union leadership and were strongly supported by the Roman Catholic Church. The demand of the party's Federal Executive for the dissolution of these groups had previously led to the dismissal of the Victoria State Executive and to the formation of the Anti-Communist Labour Party by dissident members.

The charges against the deposed N S W Executive were (*a*) that it was still under the influence of an "outside organization" which had been indicted by Dr. Evatt in October 1954; (*b*) that it had been improperly elected; and (*c*) that it had disobeyed decisions of the Federal Executive and interfered in trade union ballots in the interest of "industrial groups." The Victorian branch of the party alleged that there had been a close association between the N.S.W Executive and the Anti-Communist Labour Party Supporters of the N.S.W. Executive, in turn, accused the other side of disruptive activities and of collaboration with the Communists

Following their arrival in Sydney, Mr. Campbell and Mr. Colbourne installed themselves in the party offices in that city despite threats by the leaders of the deposed Executive to take legal action to recover control of the property of the N.S.W. branch. The deposed Executive met on June 15 to decide whether or not to accept the Federal Executive's decision, but the meeting broke down, half the members being willing to submit and the other half walking out.

One of the first actions of the new "caretaker" Executive was the dismissal of Mr. J. T Kane, assistant-secretary of the N.S W party and leader of the Industrial Group section in the State The decision to dismiss Mr. Kane was taken by 19 votes to 15, after the defeat of an amendment by Industrial Group supporters that he should continue in office until the next State conference of the party

Mr. Clive Evatt, a Labour member of the N.S.W. Legislative Assembly and a brother of Dr. Evatt (leader of the Federal Labour Party), was expelled from the party by the new State Executive on July 13. He subsequently announced that he would sit as an Independent.

The grounds for Mr. Evatt's expulsion were that he had voted against the party, notably on the State Government's decision to increase tram, bus, and train fares Mr. Evatt had also disagreed with the State Government on the issue of licences for a film theatre, and on the Government's proposal to license poker-machines in clubs.

The annual conference of the Victorian branch of the Labour Party had confirmed on June 2 the decision (taken by its Executive in 1955) to expel for life 95 former party members now supporting the Anti-Communist Labour Party.

A meeting of inter-State delegates of the Anti-Communist Labour Party, held in Melbourne on June 4, decided to recommend to the party's State Executives the formation of a Federal organization at an early date, and to appoint a committee to draw up a constitution for such an organization.
(Australian News and Information Bureau - Times)
(Prev. rep. 14273 A; 14178 A.)

B. UNITED KINGDOM. — Equal Pay in Gas Industry.

The *Ministry of Labour Gazette* for June 1956 stated that the National Joint Council for Gas Staffs had reached agreement on the principle of equal pay for equal work for men and women employed in clerical, administrative, professional, and technical posts in the nationalized gas industry. Under this agreement equal pay would be attained in six stages, the first transitional stage taking effect on April 1, 1956, and succeeding adjustments being made as from Jan. 1 each year until full equality was reached on Jan. 1, 1961. A parallel scheme for certain employees (secretaries, shorthand-typists, telephone operators, copy typists, etc.) came into operation on April 1, 1956.—(Ministry of Labour Gazette) **(14548 B.)**

C. BRITISH WEST INDIES.—The Caribbean Federation Act. - Dissolution of Leeward Islands Federation.

The British Caribbean Federation Bill, providing for the eventual establishment of the British Caribbean Federation by Order-in-Council, and for the establishment of a Federal Government, a Federal Legislature, and a Federal Supreme Court, was enacted on Aug. 2 after an unopposed passage through both Houses of the British Parliament. Its enactment was celebrated throughout the British Caribbean territories as a public holiday, although the Federation will only come into existence after the Federal Constitution has been adopted and a Governor-General appointed.

On June 29, when the Bill was given its second reading in the House of Commons, Mr John Hare (Minister of State, Colonial Office) explained that the projected West Indian Federation would be on the Australian pattern, with residual powers reserved to the Governors of the member-colonies. As the mere act of Federation would not provide an immediate answer to the financial problems of the Caribbean Colonies, the Bill provided that the British Government would make grants-in-aid for the next ten years to assist those Colonies, and also towards establishing the seat of the Federal Government The Commission which had been set up to examine the problem of the Federal capital was already at work and would submit a report to the Federation Committee, while the Commission on Trade and Tariffs would start work in the autumn and would issue its report within two years of the establishment of the Federal Government

During the Bill's second reading in the House of Lords (July 23) it was announced by Lord Lloyd, Under-Secretary for the Colonies, that proposals to raise troops in the West Indies had been agreed in principle by the West Indian Governments concerned, and were being considered by the British Government.

The Secretary of State for the Colonies (Mr. Lennox-Boyd) announced on June 2 that the members of the British Caribbean Federal Capital Commission would consist of Sir Francis Mudie (chairman), Professor H. Myles Wright, and Mr. Alexander Edward Cook; and that Sir William Dawson Croft had been appointed chairman of the British Caribbean Federation Trade and Tariffs Commission.

The Federal Capital Commission will visit those territories the Governments of which wish to be considered for the location of the Federal capital, and will submit its recommendations within four months on the three most suitable sites It will take into consideration such factors as political and social sentiment in the area, the convenience of the site in relation to the various federating territories, and the availability of land for future expansion of the capital.

The Trade and Tariffs Commission will examine the economic, fiscal, and other problems involved in the establishment of a Customs union for the federal area.

The Leewards Islands Federation was dissolved by proclamation on June 30, from which date the presidencies of Antigua, St. Kitts-Nevis, Anguilla, Montserrat, and the British Virgin Islands became colonies. This measure will allow all the islands concerned (except the Virgin Islands, which are not joining the Federation) to enter the Federation as independent units. Under the new administrative arrangements, the Leeward Islands will have a Governor, Chief Secretary, and Attorney-General (all resident in Antigua) and each colony will have an Administrator. (Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Caribbean Federation, 14733 A.)**

D. UNITED STATES. — New Ambassadors in Cairo and Athens. - First U.S. Ambassador to Morocco.

Several important appointments in the U.S. Foreign Service, mainly affecting American diplomatic representation in the Mediterranean area, were made by President Eisenhower on July 15, as follows: Mr. Raymond A. Hare, Director-General of the Foreign Service, as Ambassador to Egypt in succession to Mr. Henry A. Byroade, who was appointed Ambassador to South Africa; Mr. George V. Allen, Assistant Secretary for Near Eastern, South Asian, and African Affairs, as Ambassador to Greece *vice* Mr. Cavendish Cannon, who was appointed the first U.S. Ambassador to Morocco.

Mr. Hare, the new Ambassador in Cairo, served for many years in the Middle East holding the posts of Ambassador to Saudi Arabia (1950) and the Lebanon (1953)—before returning to the State Department. His predecessor at the Cairo Embassy, Mr. Byroade, had held the post for only 18 months. Mr. Allen, the new Ambassador in Athens, had also served as Ambassador in Cairo before returning to Washington. (New York Times - New York Herald Tribune) **(14850 A.)**

E. ISRAEL. — Foreign Minister changes Name.

It was announced in Jerusalem on July 25 that the Foreign Minister of Israel, Mrs. Golda Myerson, had changed her surname to Mayer. (Times) **(Prev. rep. 14929 C.)**

AUGUST 11—18, 1956

A. EUROPEAN COAL AND STEEL COMMUNITY.— Fourth General Report of the High Authority. - Development of the Common Market in Coal, Iron Ore, Scrap, and Steel. - External Relations. - M. René Mayer succeeds M. Monnet as President of High Authority. - Messina Conference on Further European Economic Integration.

The Fourth General Report of the High Authority of the European Coal and Steel Community, covering the year April 1, 1955-March 31, 1956, was published on April 8. It dealt mainly with the consolidation, operation, and development of the Common Market between the six member-countries (France, the German Federal Republic, Italy, Belgium, the Netherlands, and Luxemburg), which had been opened on Feb. 10, 1953, for coal, iron ore, and scrap, on May 1, 1953, for steel, and on Aug. 1, 1954, for special steels.

The Report recalled that, in accordance with the treaty setting up the Community (see 12481 A ; 11905 A), the introduction of the Common Market had involved (*a*) the abolition of all trade barriers such as Customs duties, quantitative restrictions, currency restrictions, administrative impediments, breaks in transport rates at frontiers, and restrictions on labour mobility ; (*b*) the gradual adoption of a policy of genuine price competition, and the development of a common economic order by means of (i) the publication of price-schedules and conditions of sale, (ii) the prohibition of discriminatory and other practices likely to distort competition, and (iii) the long-term and short-term planning of production ; and (*c*) the implementation of the economic and social objectives for a real improvement in the position of the workers in the industries concerned, through their protection against certain effects of competition or the introduction of new methods (" readaptation "), and the improvement of their living and working conditions.

The developments which had occurred since the opening of the Common Market, and the solutions applied to the problems involved, are summarized below under cross-headings :

The Coal Market.

The increase in iron and steel production in the six member-countries, and the growing demand from third countries following the general expansion of the world economy, resulted in a steady increase in the demand for solid fuels which led to a marked tightness in the Common Market for coal from the last quarter of 1955 onwards. Hard-coal extraction proved to be comparatively inelastic and the balance between supply and demand was mainly achieved by increasing hard-coal imports from third countries and drawing heavily on stocks. These imports rose from 1,200,000 metric tons per month in the fourth quarter of 1954 to 2,500,000 tons in the fourth quarter of 1955, whilst pithead stocks fell from 15,000,000 metric tons at the end of August 1954 to 12,400,000 tons at the beginning of 1955 and only 7,800,000 tons at the end of February 1956.

Production.

The Community produced 246,400,000 metric tons of coal in 1955, against 241,700,000 tons in 1954 (an increase of nearly 2 per cent) and 237,000,000 tons in 1953 The trend in hard-coal production in the Community compared as follows with that in the other major producing areas of the world ·

	1953	1954	1955*	Difference in 1955 against 1954 (per cent)	Difference in 1955 against prev. maximum (per cent)
	(000,000 metric tons)				
Community ..	237.0	241.7	246.4	+ 1.9	+ 1.7 (1938)
United Kingdom	227.8	227.9	225 2	− 1.2	−22 9 (1913)
United States .	443.0	380.2	448 5	+18.0	−27.8 (1947)
Soviet Union ..	240.0	259.0	295 0	+13.9	+13.9 (1954)
Eastern Europe	114.7	118.7	122.7	+ 3.4	+ 3.4 (1954)
Other countries	238.9	252.5	265.2	+ 3.8	+ 3.8 (1954)
World	1,501.4	1,480.0	1,600.0	+ 8.1	+ 6.6 (1953)

*Provisional figures.

In absolute values the increase in production was comparatively slight, but underground output per manshift showed a greater rise and was 4.1 per cent higher in 1955 than in 1954. This discrepancy between the increases in productivity and production was primarily due to the falling-off in the number of underground workers, particularly in the Ruhr ; if production had risen at the same rate as productivity, an additional 5,000,000 tons of coal would have been produced.

Trade.

Between 1952 and 1955, the volume of trade in coal and coke between the Community countries rose by 34.8 per cent. Trade between member-countries in 1955 totalled 23,200,000 metric tons of hard coal and 9,000,000 metric tons of coke, against 23,600,000 and 7,000,000 tons respectively in 1954, and 19,900,000 and 7,000,000 tons respectively in 1953. Between 1954 and 1955 trade in hard coal thus fell by about 1.5 per cent, but was still 42 4 per cent above the 1952 level (16,300,000 tons). Trade in coke, however, increased by 30.4 per cent and stood 11 per cent above the 1952 level of 8,100,000 tons. As regards coal, the breakdown by countries showed substantial increases in French and Saar deliveries to Belgium, the Netherlands, and Germany, and in Belgian deliveries to Germany ; and, on the other hand, a substantial fall in German deliveries to all other Community countries. As regards coke, German deliveries in 1955 (7,100,000 tons) represented 80 per cent of the total trade in coke within the Common Market, and were 32 per cent higher than in 1954 (5,400,000 tons).

Hard-coal imports by the Community from third countries in 1955 rose to 23,000,000 metric tons, against 13,900,000 tons in 1954 and 1953—an increase of nearly 65 per cent. Approximately 70 per cent came from the U S.A.—15,900,000 tons in 1955 against 6,200,000 tons in 1954, an increase of 159 per cent.

Coal exports from the Community to other European countries also increased · viz., to 10,097,000 tons in 1955 against 7,861,000 in 1954 and 5,872,000 in 1953. Exports to the United Kingdom alone increased by 87.7 per cent in 1955 (from 2,400,000 metric tons to 4,500,000 tons) and were nearly 800 per cent above the 1953 level (561,000 tons). French, Saar, and Belgian exports showed substantial increases, but German exports declined and the Ruhr coalfield met the increased demand by delivering U.S. coal to some of its own customers.

M. René Mayer, the President of the High Authority (see below), stated on Feb. 22 that in 1956 the Community would have to cover its coal deficit by importing 25,000,000 tons of U.S. coal ; he added that the coal shortage had been aggravated by the curtailment of British exports as from Jan 1, 1956 (see 14428 A). In his report to the Common Assembly on May 8, 1956, M. Mayer pointed out that coal deliveries for internal consumption had risen by 19,000,000 tons from 246,500,000 tons in 1954 to 265,500,000 in 1955, of which 79,800,000 and 91,300,000 tons respectively had been used by coking plants. Coal production during the same period, however, had only increased by 5,000,000 tons (from 241,600,000 to 246,400,000 tons), in addition to which another 5,000,000 tons had been drawn from stocks. In the circumstances, 16,000,000 tons had had to be imported by the High Authority from the United States.

Prices.

Prices remained comparatively stable throughout the year 1955-56, and there was a perceptible reduction of the difference between the prices of the Ruhr and those of the other Community coalfields. The High Authority had originally published (on March 13 and 15, 1953) details of the maximum pithead prices which would apply in each member-country. On March 20, 1954, however, it was announced that from April 1 of that year maximum prices would be fixed for only two coalfields—the Ruhr (where the maximum price would be slightly reduced) and the Nord–Pas-de-Calais (where the price would remain the same as before). In the Nord–Pas-de-Calais coalfield maximum prices were abolished on March 26, 1955, but it was decided to retain maximum prices in the Ruhr, in view of the existence of a monopolistic selling organization in that area (see below). However, following the replacement of the Ruhr coal-selling cartel by three independent selling agencies in April 1956, the High Authority decided to free also the prices of Ruhr coal as from April 1.

High speculative pricing previously apparent in boom conditions was discouraged by the requirement, imposed by the High Authority upon the opening of the Common Market, that producers in the Community should publish their prices and should not discriminate between their customers in the various member-countries. The prices of imported coal, on the other hand, showed substantial increases, especially since the rising demand for shipping space, caused by the simultaneous increase in the demand for U.S coal by the Community and by Britain, resulted in a sharp upward movement in transatlantic freight charges from the spring of 1955 onwards. Thus, between March 1955 and March 1956 the f.o.b. and c.i.f. prices of U.S coking coal rose respectively from $9 to $11 50 per ton, and from $15 to $22 per ton.

The Iron and Steel Market.

Between 1952 and 1955 the Community's iron and steel industries increased their production of iron ore by nearly 15 per cent, of pig-iron by about 18 per cent, of crude steel by about 26 per cent, and of finished rolled products by about 22 per cent. In view of iron-ore production and, in turn, pig-iron production falling behind the industry's capacity for crude steel and finished products, the resulting gap had to be made up by higher imports of iron ore and scrap from third countries and by drawing on stocks.

Production.

The trend in iron and steel production in the Community since 1952 was as follows :

	Pig-iron	Crude Steel	Finished rolled products
	(000 metric tons)		
1952	34,732	41,816	29,880
1953	31,482	39,676	26,965
1954	33,111	43,825	29,671
1955	41,015	52,648	36,195

Pig-iron production in 1955 was about 24 per cent above the 1954 level and 18 per cent above 1952, with considerable increases in all the Community countries, particularly Western Germany (31.7 per cent), Italy (29 per cent), and France (23.9 per cent). Crude steel production in 1955 showed an increase of more than 20 per cent over 1954 and about 26 per cent over 1952; expansion in 1955 was most marked in Italy (28.1 per cent) and Western Germany (22.4 per cent).

The trend in crude steel production in the Community compared as follows with that in the other major producing areas of the world.

	1952	1953	1954	1955	Increase 1954-5
	(000,000 metric tons)				(per cent)
Community ..	41.8	39.7	43.8	52.7	+20.1
United Kingdom	16.7	17.9	18.8	20.1	+ 6.9
United States .	84.5	101.3	80.1	105.7	+32.0
Soviet Union ..	34.4	37.9	41.0	45.0	+ 9.8
Eastern Europe ..	10.8	12.5	12.9	14.2	+10.1
Japan . ..	7.0	7.7	7.7	8.2	+ 6 5
Other countries .	16.8	17.6	18.7	21.3	+13.9
World ..	212.0	234.6	223.0	267.1	+19.7

The Community, which was the biggest producer of crude steel after the United States, slightly increased its share in world production from 19.6 per cent in 1954 to 19.7 per cent in 1955 (against 16.9 per cent in 1953). The Community's production of finished rolled products rose in 1955 by 22 per cent over 1954 and 1952.

Trade.

The volume of trade between Community countries in iron and steel products totalled 5,700,000 metric tons in 1955, against 4,200,000 in 1954 (an increase of 36.4 per cent) and 2,900,000 tons in 1953. Since the introduction of the Common Market, trade had increased by 170 per cent (2,100,000 tons in 1952). The outstanding point in this trend in trade as a whole was the increase in deliveries by the steel works in Belgium, Luxemburg, France, and the Saar to Western Germany.

In 1955, Germany delivered a total of 832,600 metric tons to the other Community countries, against 771,600 in 1954, while its purchases went up from 1,677,900 metric tons to 2,563,700 tons Deliveries by French and Saar producers to Germany, which totalled 863,400 metric tons in 1954, rose to 1,297,300 tons in 1955. Deliveries by Belgium and Luxemburg to Germany amounted to 1,041,100 metric tons (652,500 in 1954), and the Netherlands' sales to German customers went up from 160,200 metric tons in 1954 to 217,100 tons in 1955. Trade also increased between France and the Saar on the one hand and Belgium and Luxemburg on the other, deliveries by France and the Saar to the Belgo-Luxemburg Union rose from 138,000 metric tons to 311,700 tons, and purchases by them from Belgium and Luxemburg from 303,300 to 524,900 tons.

Imports by the Community from third countries in 1955 reached 1,500,000 metric tons, against less than 1,000,000 tons in 1954 and 1953 (an increase of 55 per cent). The rise was very marked in all the Community countries except France and the Saar. Austria, the main supplier, considerably increased her sales of pig-iron and of finished products, and the East European countries showed a sharp rise in their pig-iron sales. The United States remained the second biggest supplier of the Community, delivering almost exclusively finished products.

Exports of iron and steel products by the Community to third countries in 1955 totalled 7,800,000 metric tons, against 6,600,000 in 1954 and 1953 (an increase of nearly 19 per cent). The increase was particularly noticeable in French and Saar exports, but German exports remained unchanged. Sales to the Western hemisphere as a whole declined. The Scandinavian countries remained the principal European customers of the Community, whilst the biggest increase was in deliveries to the United Kingdom, which trebled its purchases of finished products and pig-iron from the Community.

Prices.

Following the introduction of the Common Market, the prices of iron and steel products were allowed to develop freely and the High Authority did not fix any maximum prices, although it ordered all firms to publish by May 20, 1953, price-schedules which would be binding as maxima and minima. This system, however, did not work effectively, as price fluctuations caused by changes in demand were not accurately reflected in the new schedules. In January 1955 a new system was therefore introduced which required producers to notify the High Authority and "all interested parties" only of any rise or fall in their published prices above a certain percentage, whereas slight price alterations would not necessitate the publication of new schedules.

Prices remained fairly stable throughout 1953 and 1954, despite the growing disparity between supply and demand. From the beginning of 1955 onwards, however, an upward movement in prices brought about certain changes in the price-schedules, and by the end of that year the Community's prices for merchant steels showed an average increase of five per cent since the spring of 1954; this compared with an increase of 5.6 per cent in British prices and 12 per cent in U.S. prices.

The trend in export prices in the Community, the United Kingdom, and the United States was as follows:

	Percentage Increase (March 31, 1955 - March 31, 1956)		
	Merchant bars	Heavy plate	Sheet
Community	+ 8.0	+15.4	± 0.0
United Kingdom ..	+15.1	+18.4	± 0.0
United States	+ 7.4	+ 6.0	+11.1

Iron Ore.

The Community countries produced 70,600,000 metric tons of iron ore in 1955, an increase of 16 5 per cent over the 1954 total of 60,600,000 tons and the highest since the opening of the Common Market (61,100,000 tons in 1953 and 61,800,000 in 1952). The rise in production was accounted for mainly by the French mines, whose saleable output went up from 43,800,000 to 50,300,000 tons. Pig-iron production, however, increased at a still higher rate than iron-ore production, and the resulting discrepancy had to be covered by withdrawals from stocks and increased imports from third countries.

The volume of trade in iron ore between member-countries reached 13,500,000 metric tons in 1955, an increase of 25 per cent over 1954 (10,800,000 tons), of 29 per cent over 1953 (10,500,000 tons) and 44 per cent over 1952 (9,400,000 tons). From January 1955 onwards iron-ore prices showed a tendency to rise but were nevertheless relatively stable having regard to the increase in demand and the stabilization of production at a high level.

Scrap Iron.

The scrap market showed a certain tightness during 1955 which resulted from: (*a*) a fall in the level of stocks, (*b*) a discrepancy between the rise in steel production and the rise in home scrap recovery; and (*c*) an increase in the price of U.S. scrap from $34 33 per ton in May 1955 to $53 at the end of December.

In view of the Community's inadequate scrap resources, the High Authority decided in May 1953 that the deficit should be covered by importing jointly from third countries, the additional expense to be divided proportionally among all consumers by a levy payable on all scrap, whether bought within the Community or imported from outside. In March 1955 the High Authority tightened its control over the work of the Compensation Office for Imported Scrap and the Joint Office of Scrap Consumers (the organization set up to carry out the aforementioned scheme) and established priorities for the allocation of imports. In a subsequent statement the High Authority explained that the scrap shortage was structural in character and could be solved only on a long-term basis, within the framework of a series of measures aimed at increasing the production capacity for those qualities of pig-iron which could profitably be substituted for scrap in the production of steel; in the meantime, however, the compensation arrangement was essential.

Transitional Provisions.

A number of measures and practices, though basically incompatible with the Common Market, were temporarily authorized by the High Authority in order to alleviate the transitional effects of sudden and harmful shifts in production in certain member-countries.

Italian Protective Duties.

The High Authority initially authorized the Italian Government to retain during a transitional period Customs duties on coke and iron and steel imports from other Community countries After the introduction of the Common Market these duties were progressively reduced, and in December 1955 duties on pig-iron imports from Community countries were suspended altogether for an indefinite period. The relatively high production costs and weak competitive position of Italian coking-plants and steelworks indicated, however, that tariff protection for their products would still be required to ensure their progressive integration into the Common Market, and the High Authority therefore permitted the retention of protective duties for Italian coke and steel imports from other member-countries of the Community.

"Zone-delivered" Coal Prices.

In order to avoid sudden and harmful shifts in production, and to prevent undesirably sharp and abrupt price increases, the High Authority initially permitted the charging of reduced "zone-delivered" prices in certain areas of the Community where it was necessary for collieries to align their quotations with those of their competitors for marketing purposes. These arrangements were reviewed annually and for the coal-year 1956-57 the High Authority discontinued the system of "zone-delivered" prices (*a*) for the Helmstedt coalfield in Germany in respect of sales to certain areas of the Common Market and (*b*) for sales by the Lorraine and Saar coalfields to France. Price-alignments were, however, allowed for a further year in respect of: (*a*) sales by Belgian coking-plants to Belgium, Luxemburg, and the French departments of Moselle and Meurthe-et-Moselle; (*b*) sales by the Aachen coalfield within the German Federal Republic; and (*c*) sales by the Lower Saxony coalfield to Northern Germany and the Netherlands. A series of "zone-delivered" prices for sales by the Centre-Midi collieries to certain parts of France up to March 31, 1957, was formally authorized in March 1956.

French Coal Subsidies.

The continuation of French Government subsidies to briquetting-works and on coking-coal imported from other Community countries was authorized by the High Authority for the year 1956-57. A subsidy on smelting coke imported from other Community countries for the iron and steel industry had been abolished during 1955, and a subsidy on sales of Saar and Lorraine coal to Southern Germany discontinued at the beginning of the year 1956-57. The total amount to be paid in French Government subsidies during 1956 was estimated at 5,000,000,000 francs, against 13,300,000,000 fr. in 1953, 10,000,000,000 fr. in 1954, and 7,300,000,000 fr. in 1955.

Integration of Belgian and Italian Coal into Common Market.

A system laid down in special provisions of the Community's Convention for the progressive integration of Belgian and Italian coal into the Common Market provided for: (*a*) the imposition of a compensation levy on the coal production of member-countries where production costs were below the weighted average of the Community, (*b*) the granting of compensation payments to the Belgian and Italian collieries, and (*c*) the contribution of financial aid by the Belgian and Italian Governments to an extent at least equal to the assistance received from the Community under the compensation scheme, and the use of such aid in connexion with reorganization programmes

A compensation levy was accordingly imposed, as from February 1953, on the gross revenue of coal producers in the Netherlands and Western Germany, for the benefit of Belgian and Italian producers. On Feb. 2, 1956, however, the High Authority informed the Belgian Government that it had decided to lower the compensation rate by one-third, viz., from 0 9 per cent to 0 6 per cent of the receipts per ton of saleable products of the German and Netherlands collieries, and that all compensation payments to the Belgian collieries would be correspondingly reduced by one-third from Feb. 10, 1956. A reorganization programme, drawn up by the Belgian Government in 1949 and revised in 1952, provided for the overhaul of those pits which were suitable for integration into the Common Market and the gradual closing down of those whose operating results could not be improved

Compensation payments were similarly made to the Italian Government to enable the Sulcis collieries in Sardinia (the only coal-producing area in Italy) to face competition within the Common Market, "pending completion of the investment operations under way" The broad outlines of a reorganization programme for these collieries were laid down by the High Authority at the same time.

Development of Competition within Common Market for Coal and Steel.

The Community's aim of developing full competition within the entire area under its control was gradually implemented by (*a*) the abolition of various internal discriminatory practices carried on in a number of member-countries; (*b*) the introduction of international railway "through-rates"; and (*c*) the suppression of a number of monopolistic coal sales organizations, notably in Western Germany, Belgium, and France.

Abolition of Discriminatory Practices.

Decisions taken in this sphere by the High Authority or at its request included the following

(*a*) From February 1953, coalmining enterprises, selling organizations, and agents were ordered by the High Authority to publish their price-schedules and conditions of sale

(*b*) The High Authority informed the Italian Government in November 1955 that the monthly fixing of maximum prices for coal for domestic consumption by an Inter-Ministerial Price Committee was incompatible with the provisions of the Treaty.

(*c*) Certain tax exemptions in Belgium on sales of Belgian coal and iron and steel products to public bodies were extended to imports of Community products early in 1956, but the Belgian Government continued restrictive formalities involved in coal shipments from the Ruhr to Belgium in spite of protests from the High Authority

(*d*) French rebates on home sales of iron and steel products were abolished in November 1955 at the High Authority's request.

(*e*) In November 1955, the Italian Government announced its intention to terminate a scheme for the encouragement of shipbuilding by the granting of preferential treatment to Italian iron and steel products against those from other areas of the Common Market.

(*f*) The High Authority cautioned or fined several enterprises which had been found guilty of infringements of the Treaty rules on publicity and non-discrimination, e.g. a Belgian steel firm was fined 600,000 Belgian francs and an Italian steel firm 400,000 lire in February 1955 for deviations of more than 2½ per cent from their published prices; at the same time three other firms received "recommendations" from the High Authority requiring them to amend their price publication methods. On March 2, 1956, it was announced that three Belgian firms had been fined a total of 280,000 Belgian francs for selling steel to German consumers at rates below their published prices.

Abolition of Discriminatory Railway Charges.

The abolition of discrimination in rail transport was completed in 1955, when an agreement was signed between the member Governments on March 21 providing for the introduction of international railway through-rates in three stages at one-year intervals. Accordingly on May 1, 1955, through-rates were introduced for coal and iron ore, and two-thirds of the terminal charges levied on these goods on either side of Community frontiers were abolished. On May 1, 1956, similar through-rates were introduced for steel and scrap, and the remaining terminal fees in respect of coal and iron-ore suppressed. On May 1, 1957, this final suppression of terminal fees will be applied to steel and scrap.

No solution was found for the disparity between the controlled rates for inland water transport within the boundaries of certain member-countries on the one hand, and the uncontrolled rates for inland water transport across the frontiers of member-countries on the other. In April 1955 the High Authority proposed a system for the mitigation of the effects of the disparity between internal and international freight charges, and permitted the retention of a French compensation fund within fixed limits as a provisional measure until the whole problem of inland water rates had been solved.

Suppression of Cartels and Restrictive Practices.

Soon after the inauguration of the Common Market, the High Authority decreed that all joint selling, joint buying, and similar organizations within the Community should apply for authorization by the High Authority, in order to avoid being declared illegal. In May 1954 the High Authority notified three of the principal European selling and importing agencies which had submitted applications—the *Comptoir Belge des Charbons* (Cobechar), the *Association Technique de l'Importation Charbonnière* (ATIC), which was under the controlling authority of the French Government, and the *Gemeinschaftsorganisation* (GEORG) in Western Germany—that certain of their activities were incompatible with the Treaty. They were informed that they could not be authorized in their present form, but instead of simply dissolving them, the High Authority sought to arrange for a radical change in their organization so that their activities might not appreciably impede competition in future. Accordingly, discussions between the three organizations and the High Authority continued in 1954-55 with the aim of bringing the activities of the cartels into line with the requirements of the Treaty.

Herr Franz Etzel, Vice-President of the High Authority, in a statement on Nov. 23, 1955, to the Common Assembly of the European Coal and Steel Community meeting in Strasbourg, gave details about the High Authority's rulings on the dissolution of a number of coal-marketing and importing cartels in Belgium, France, and Western Germany. His statement, and subsequent developments with regard to the organizations concerned, are summarized below:

Cobechar. Herr Etzel said that Cobechar, the Belgian coal-selling organization, had agreed to comply with the High Authority's anti-cartel directives; it would no longer be allowed to regulate production in Belgian mines and would have to abide by uniform rules in its sales in all parts of the Common Market area.

ATIC. The French Government, Herr Etzel stated, had agreed (*a*) to suspend a decree providing for the compulsory purchase through a cartel organization of all coal required by the French steel industry; (*b*) to remove from French wholesale traders the obligation to buy a given quota of French coal before they could import from other member-countries; and (*c*) to prevent importers' groups from forming an exclusive body. The French Government's refusal, however, to allow French wholesalers to buy coal freely from other Community wholesalers resulted in a demand by the High Authority on June 27, 1956, for the final liquidation of the ATIC.

It was subsequently reported in the French Press that the French Government would contest the validity of this demand in the Community's Court of Justice.

GEORG. This organization had been set up by the Allied High Commission and the Federal Government in 1952 as a co-ordinating body for only nominally independent sales agencies It controlled all sales of Ruhr coal, and all the agencies had identical price-lists, the same price policy, and the same selling agents, with central recruitment of staff. The High Authority had stated several times that it could not sanction the existence of a single monolithic central organization in the Ruhr, but that it would be prepared to authorize three, or alternatively six, selling agencies with a joint office to co-ordinate their activities by means of a central reserve stock, in order to ensure balanced employment and a balanced flow of supplies under all market conditions. Eventually, a scheme prepared by the German coalmining industry and sanctioned by the High Authority came into force on April 1, 1956, whereby GEORG was replaced by three independent selling agencies (Geitling, Mausegatt, and Präsident), each representing from 14 to 19 coalmining enterprises, with approximately equal total production capacity. Each agency had its own price-lists, agents, price policy, and separate staff, but there was a centralized sales bureau responsible for sales and production estimates and the handling of the central stock of the Ruhr mines.

Other decisions by the High Authority regarding cartels and monopolistic organizations were as follows:

O K.U. The High Authority refused in June 1955 to sanction the activities of the South German coal-selling agency, the O.K.U (*Oberrheinische Kohleunion*), on account of its exclusive buying rights in the Aachen, Ruhr, Saar, and Lorraine regions.

UCOSIDER. A number of Belgian iron and steel firms received authorization on March 7, 1956, to sell jointly a large proportion of their production through the UCOSIDER selling agency.

German Joint Scrap-buying Organization. The High Authority refused in July, 1955, to grant authorization to a German joint scrap-buying organization (*Westdeutsche Schrottenkaufs-Vereinigung*).

Measures to Increase Productivity.

Decisions under this heading referred chiefly to the rationalization of production through the concentration of smaller undertakings, the co-ordination of new investments, and the provision of certain finance for such investments.

Industrial Concentrations.

The High Authority's policy was to allow regroupings aimed at rationalizing production, provided there were no effects contrary to the provisions of the Treaty. Thus permission was granted for reorganization schemes involving specialization by the co-ordination of production programmes, and rationalization by the installation of joint finishing plants (e.g. in connexion with rolling-mills), enabling smaller enterprises to reduce production costs and to become more competitive with the bigger units of other Community countries. Altogether, since the beginning of the Common Market, the High Authority authorized 11 concentrations in various member-countries.

Investment Policy.

The High Authority confined its activities in this sphere chiefly to studies of the extent and conditions of existing investment programmes, the circulation of general information, the establishment of certain general objectives, the co-ordination of investments, and the granting of loans and guarantees In July 1955 it was made compulsory for firms to notify the High Authority in advance of those investment programmes for which total estimated expenditure would exceed $500,000 for entirely new plant, or $1,000,000 for replacements and conversions. Responsibility for decisions, however, remained entirely with the enterprises concerned, and the High Authority had no power to insist on the necessity for certain investments

Actual investment expenditure in 1955 totalled $1,232,000,000, against $978,000,000 in 1954 and $975,000,000 in 1953

Finance.

To stimulate investment the High Authority raised six long-term loans in 1954 and 1955 totalling the equivalent of $117,500,000; the proceeds were re-lent at reduced rates of interest to various Community enterprises.

The largest loan was one for $100,000,000 from the U.S Export-Import Bank under an agreement signed in Washington on April 23, 1954 The loan was for 25 years, bore interest at the rate of 3¼ per cent, and was granted "for the purpose of assisting in modernizing and developing the natural resources of the Community" The proceeds were accordingly advanced for the equipment of collieries, power stations, and coking plants, and for the production and treatment of iron ore in France, Belgium, Luxemburg, and Italy. The other loans, totalling $17,500,000, and to be used mostly for the construction of miners' houses, were raised from banks in Belgium, Western Germany, Luxemburg, and the Saar.

A 4¼ per cent loan of 50,000,000 Swiss francs, repayable within 18 years, was issued on the Swiss market from July 5-10, 1956, the proceeds being re-lent by the High Authority to three Italian, two German, and one Saar steelworks

In addition to the raising of loans, the activities of the Community were financed by a levy on coal and steel production in the member-countries.

From this levy, which at present amounts to 0 45 per cent on the monthly average production of each enterprise, a total amount equivalent to $140,300,000 had been received up to Dec 31, 1955, of which Germany contributed 47 per cent, France 28 per cent, Belgium 11 per cent, the Saar and Italy 6 per cent each, the Netherlands 4 per cent, and Luxemburg 3 per cent

Of the Community's total revenue equivalent to $156,700,000 up to April 30, 1956, the larger part—$100,000,000—had been set aside as a guarantee fund, whilst expenditure amounted to the equivalent of $28,300,000 up to that date.

Labour Policy.

The main developments in connexion with the Community's aim "to equalize the living standards in an expanding European economy" were re-adaptation schemes designed to protect workers from the risk of unemployment, steps towards the creation of a common labour market, the construction of workers' houses, the development of vocational training, and research in industrial health and medicine.

Employment.

The total labour force employed in the industries of the Community increased from 1,550,000 in 1953 to 1,600,000 in 1954 and 1,615,000 in 1955. The 1955 total was distributed as follows:

	Hard Coal	Iron and Steel	Iron Ore
Germany (West) ..	522,300	178,600	21,800
Belgium ..	157,600	56,200	—
France ..	243,800	147,300	28,700
Saar ..	63,500	30,700	—
Italy	7,300	60,300	4,300
Luxemburg	—	19,700	2,700
Netherlands	60,700	9,900	—
Total ..	1,055,200	502,700	57,500

The general high level of industrial employment in member-countries accentuated the drift of workers from heavy industry to other activities, and the coalmining and iron and steel industries were forced to resort increasingly to foreign labour (e g Italian labour in Belgium and Germany) and to workers from the overseas territories of the member-States (e.g. Algerians in France)

Redundancy and Re-adaptation.

The High Authority established re-adaptation and re-employment schemes (*a*) for the re-settlement of unemployed miners in the French Centre-Midi collieries; (*b*) for the re-adaptation of steel workers who had become redundant through the formation in 1953 of *Ateliers et Forges de la Loire*, a concentration of four enterprises in the St. Etienne area; (*c*) for 8,000 workers in the Italian iron and steel industry affected by reorganization schemes; (*d*) for assistance to 2,000 miners laid off at the Sulcis collieries in Sardinia in connexion with the reorganization of these mines (see above); and (*e*) in the Borinage collieries in Belgium, where a large-scale reorganization was in progress.

Freedom of Movement for Workers.

An agreement was concluded in December 1954 for the abolition of all restrictions on the movement between member-countries of workers with recognized qualifications in the coal-mining and iron and steel industries, thus providing for the creation of a common labour market. Administrative arrangements for the implementation of the agreement were approved by member-Governments in July 1955, and the agreement will come into force after ratification in the six countries

Wages and Working Conditions.

The results of a study initiated by the High Authority, and published in September 1955, showed that the differences in real income between one country and another were not as large as had previously been supposed, and did not exceed the disparities sometimes found within a single country between different sectors of industry or between different industrial regions It also appeared from certain data that discrepancies between the real incomes of miners and steelworkers in the different Community countries had decreased between 1953 and 1955 On the other hand, details regarding the population as a whole indicated that there were much greater differences from one country to another in private consumption per head of population

Housing.

The first 563 housing units built under the High Authority's experimental scheme for 1,022 houses, launched in 1954, were completed and handed over for occupation by the end of 1955; another 459 housing units were expected to be completed by the end of 1956 During 1955 the High Authority contracted loans from banking institutions in Belgium, Western Germany, and Luxemburg totalling $16,400,000 for the construction of workers' houses (see above) Negotiations were also opened with institutions in France, Italy, and the Saar with a view to raising similar loans totalling $1,800,000

Vocational Training.

The High Authority encouraged systematic exchanges of information and experience between Community countries in regard to the training of skilled workers, supervisory staff, and instructors

Association with the United Kingdom.

The United Kingdom became the first country to establish diplomatic relations with the Community when, in 1952, H.M. Government sent a delegation headed by Sir Cecil Weir to be accredited to the High Authority, and expressed its desire to establish "an intimate and enduring association with the Community" (see 12481 A). As a result of negotiations held in London in 1954 between Mr. Duncan Sandys (then Minister of Fuel and Power) and the President (M. Monnet) and other members of the High Authority, a formal Agreement of Association was signed on Dec. 21, 1954. The agreement came into force on Sept. 23, 1955, after ratification by the British Parliament and the Parliaments of the six member-countries of the Community. Its principal provisions were:

(1) A Standing Council of Association would be set up, composed of four High Authority and four U.K. Government representatives. It would have a joint secretariat, would meet alternately in Luxemburg and London; and would be empowered to appoint committees for its work.

(2) The Council would be required to examine possible ways of reducing or eliminating any obstacles to trade in coal and steel between the two areas, such obstacles would include "quantitative restrictions on imports and exports, tariffs and other charges on imports and exports, exchange control restrictions, dumping and anti-dumping measures, and export subsidies."

In addition, if the High Authority, or any of the Governments of the six member-States of the Community, or the British Government, should at any time contemplate additional trade restrictions in coal and steel between the Community and the U.K., they would be required to bring the matter before the Council of Association—whenever possible before introducing such restrictions. If, however, prior consultation should be impracticable, then the matter must be brought before the Council immediately afterwards for consideration of joint action to meet the situation

In its work the Council would take into account the interests of consumers, of third countries, and of Britain's special position within the Commonwealth

The Council would also provide "a means for continuous exchange of information and consultation on matters of common interest concerning coal and steel, and where appropriate, in regard to the co-ordination of action on these matters." "Matters of common interest" would include supplies of and trade in coal and steel, and raw materials for the coal and steel industries; price arrangements and market and price trends; general development objectives and investment policy; consumption, production, export, and import trends; effects of the development of other sources of energy, technical development and research; and the safety, health, and welfare of coal and steel workers.

(3) Whenever matters of common interest to the Community and the U.K. were to be discussed by the Community's Council of Ministers, special meetings would be held at which the U.K. would be represented by a member of the Government and other persons "discharging public responsibilities in regard to coal and steel in the United Kingdom."

(4) The Council of Association would present a joint annual report to the British Government and the High Authority.

In a statement on the occasion of the signing of the Agreement, M. Monnet explained that the Association would provide a means for continuous consultation at the highest level before decisions were taken on policies affecting common problems, while both parties would retain their complete independence and freedom of decision.

The House of Commons approved ratification of the Agreement of Association without a division on Feb. 21, 1955.

Mr. Sandys, moving the Bill approving the Agreement, stated that the Government did not regard the Agreement " as an end in itself " or as " a static contractual arrangement, but rather as a growing relationship which will develop progressively through the practical experience of meeting and working together."

Mr. Alfred Robens (Labour), the principal Opposition spokesman, said that the integration of Europe would go on and that it was better for it to continue in close association with the United Kingdom. The agreement, he thought, was " the model of association which we would be ready to accept in any organizations or communities that may be set up in Europe to deal with things other than coal and steel."

Mr. Clement Davies (Liberal) also welcomed the agreement, saying that though it was only a modest step, it was " a good thing to know that these great industries in this country will be in close consultation with the High Authority "

The Council of Association held its first meeting in Luxemburg on Nov. 17, 1955, when it was decided to establish three standing committees for trade relations, steel, and coal.

At a second meeting, held in London on March 23, 1956, the situation in the coal and steel markets of the U K and the Community was reviewed, the work of the three committees approved, and further programmes of work laid down. The third meeting of the Council, held in Luxemburg on July 10, 1956, discussed specifically the question of U.K. coal exports to the Community, which had been drastically curtailed on Jan. 1, 1956, to meet reductions in British imports of U S coal (see 14428 A). In view of the stringent coal situation which had developed within the Community, Britain agreed partly to suspend the cut for the benefit of the Community's member-countries and to increase her exports to the Community during the second half of 1956 from the 265,000 tons originally envisaged to nearly 1,000,000 tons, this compared with U K. exports to Community countries of 805,000 tons during the first quarter and 523,000 tons during the second quarter of the year.

On May 10, 1955, Sir William Mekleredd had been appointed head of the U.K. delegation to the High Authority, with the rank of Ambassador, in succession to Sir Cecil Weir. The High Authority announced on Dec. 16, 1955, that it had appointed Jonkheer Hendrik L. F. K. Vredenburch (Netherlands), Deputy Secretary-General of NATO, as head of its permanent delegation in Britain.

External Relations with Other Countries.

The principal developments since the beginning of 1955 were an official visit by the President of the High Authority to the U.S.A., two agreements with Switzerland, and the establishment of relations with Japan.

United States. M. René Mayer, the new President of the High Authority (see below), paid an official visit to Washington in February 1956 at the invitation of the State Department During his visit to the U S A, M. Mayer (who was accompanied by M Coppé and M Finet, Members of the High Authority) discussed the work of the Community with President Eisenhower, Administration leaders, and American industrialists and financial experts

Mr. Walton Butterworth (Minister at the U.S. Embassy in London) was appointed in November 1955 as head of the U S. diplomatic mission to the High Authority, with the rank of Ambassador, he presented his letters of credence on March 13, 1956.

Switzerland. A Consultation Agreement between the High Authority and the Swiss Government was signed on May 7, 1956.

Under the agreement, the High Authority undertook to consult Switzerland before introducing any allocation system for the Community's coal, steel, iron-ore, or scrap production in the event of a serious shortage of any of these products. Similar consultations would take place if the High Authority should order import restrictions or should fix minimum or maximum prices for the export of those kinds of coal or steel from Community countries of which Switzerland was a customary buyer. Conversely, Switzerland undertook to consult with the High Authority before taking any measures affecting trade between Switzerland and the Community

It was also provided that a permanent joint committee would be set up consisting of an equal number of representatives of Switzerland and the High Authority, and would meet regularly in Luxemburg and Berne alternately

The agreement, which would be valid in the first instance until Feb. 10, 1958 (i.e., the end of the five-year transitional period of the Community), would be automatically renewable for five-year periods unless either party had given notice of cancellation. It would also apply to Liechtenstein (which has a Customs Union with Switzerland), and would come into force on ratification by the Swiss Parliament.

As a result of negotiations which had started in 1955, an agreement on transport charges was signed in Luxemburg on July 28, 1956, between the Swiss Government, the member-countries of the Community, and the High Authority. This agreement provided for (*a*) the introduction of international railway through-rates for coal and steel traffic between Community countries across Swiss territory; (*b*) the abolition of Swiss terminal charges and other handling fees for such traffic, (*c*) the formation of a Joint Transport Committee. The agreement will lead to a reduction in transport costs for the Community's member-countries, whilst not involving Switzerland in any losses because she had already granted special cheap tariff rates for such through traffic

Japan. It was announced on Sept. 22, 1954, that the Japanese Government had decided to appoint a permanent delegation to the High Authority On Oct. 20, 1954, Mr Shoji Arakawa, Japanese Ambassador to Belgium, formally presented his credentials as head of the delegation

[Other countries which are so far represented by permanent delegations are the U K. and the U.S.A (see above), Austria (12926 D), Denmark (12896 B), Norway (12926 D). Sweden (12672 B), and Switzerland (12896 B.]

Relations with International Organizations.

The Community established and maintained relations with the following international organizations:

Council of Europe. Joint meetings between members of the Consultative Assembly of the Council of Europe and of the Common Assembly of the Coal and Steel Community were held in Strasbourg on June 22, 1953 (see 13404 A), May 20, 1954, and Oct 27, 1955, when the President of the High Authority reported on the Community's progress Apart from these meetings, there were exchanges of technical information between High Authority representatives and the Secretariat-General of the Council of Europe. It was also announced that, as part of the cultural programme of the Council of Europe, the High Authority would award in 1956 five research fellowships for work dealing with the Community.

O.E.E.C. The High Authority maintained regular contact with the O E E C. through a liaison body known as the Group of Eight, and its observers attended meetings of the Council, the Executive Committee, and several technical committees, it presented before the latter the Community's point of view on questions concerning coal and steel.

G.A T.T. In November 1952 the Contracting Parties to G A T.T. granted a waiver to the member-countries of the Community which enabled them to remove tariffs on coal and steel within the Community without doing the same on imports from non-member countries (see 13388 A). A number of complaints, however, was made during 1954 by non-member countries, notably the Scandinavian countries, about certain allegedly unfair practices of the Community towards third countries

The ninth session of GATT, which opened on Nov 8, 1954, adopted a report of a working party appointed to investigate these allegations. It stated that manufacturing industries outside the Community were being forced to pay higher prices for steel than their competitors inside the Community; that export controls were being applied to scrap iron which were inconsistent with the waiver and should be relaxed as soon as possible, that there was a marked slowness in integrating the Italian iron and steel industry within the Community's common tariff system, and that the formation in August 1954 of a common market for special steels was harmful to non-member countries. Subsequently, the Danish delegation asked for a further investigation of the operation of the alleged steel export cartel, on the ground that Danish users of steel were paying 20 per cent more for their supplies than their competitors in the Community During 1955, however, discussions between the High Authority and the Danish delegation in Luxemburg resulted in a settlement of a number of controversial points, and the Danish Government agreed that the question should no longer be handled within the framework of GATT.

In January 1956 the High Authority participated on behalf of the member-countries in a new series of tariff negotiations held in Geneva under the auspices of GATT.

I.L.O. The High Authority concluded an agreement with the International Labour Office on Aug 12, 1953, providing for collaboration with a view to attaining the objectives of the Treaty of the Community, i e, economic expansion, increased employment, and a higher standard of living

Institutions of the Community.

Developments affecting the organs of the Community were as follows:

President of the High Authority.

At an extraordinary meeting of the High Authority on Nov. 9, 1954, M. Monnet announced that he would not seek re-election as President of the High Authority at the expiry of his term of office on Feb. 10, 1955.

M Monnet later explained that he was leaving his post in order to gain " complete freedom of action and of speech " to press for the creation of a " United States of Europe," which was " not only the great hope but the urgent necessity of our time." He added that the institutions of the Community " had only the powers that had been delegated to them ", that it was not for these institutions to extend them; and that the decision to transfer new powers to European institutions had to come fron Parliaments and Governments, for which the impulse had to come from the outside,

In view of the delay in agreeing on a successor, M. Monnet announced on Feb. 8, 1955, that he would continue in office on a temporary basis until such agreement could be reached by the member-States, and in letters sent to the six Governments on May 24 he expressed willingness to continue as President if they would adopt a policy of bringing other economic activities under supra-national control. The French Cabinet, however, decided on May 26 that its candidate would be M René Mayer, and that M. Monnet should not be proposed for re-election.

During a conference of their Foreign Ministers held at Messina on June 2-4, 1955, the Governments of the six member-countries, by common agreement, appointed M. René Mayer, a former French Prime Minister, as Member and President of the High Authority in succession to M. Monnet. Herr Franz Etzel (Western Germany) and M. Albert Coppé (Belgium) were reappointed Vice-Presidents.

In appointing M. Mayer, the Foreign Ministers agreed on the following principles: (1) no member-country could claim any post in the Community's administration for one of its nationals; (2) a rigid system of posts rotating between one country and another was equally impracticable, (3) the best qualified person should always be appointed irrespective of nationality

[A biography of M. René Mayer is given in Volume IX, page 12675.]

Court of Justice.

The seven members of the Court of Justice of the Community were sworn-in at Luxemburg on Dec. 10, 1952. They were Signor Massimo Pilotti (Italy), who had been appointed President of the Court; M. Louis Delvaux (Belgium); M. Charles-Léon Hammes (Luxemburg); Herr Otto Riese (Western Germany); M. Jacques Rueff (France); and Hr. Servatius Serrarens and Hr. Adrianus van Kleffens (Netherlands). On the expiry of his first term of office, Signor Pilotti was unanimously re-elected President of the Court of the Community on Dec. 1, 1955.

Signor Pilotti, a former Procurator-General of the Italian Supreme Court, is a member of the Permanent Court of Arbitration at The Hague He was Secretary-General of the League of Nations from 1933 to 1937

In its first judgment, given on Dec. 21, 1954 in response to appeals by the French and Italian Governments, the Court ordered the suppression of certain High Authority pricing regulations issued in January of that year.

Common Assembly.

At an extraordinary session of the Assembly on Nov. 29, 1954, Signor Giuseppe Pella, the former Italian Prime Minister, was elected President of the Assembly in succession to the late Signor De Gasperi (Italy), who had himself succeeded the Assembly's first President, M. Spaak (Belgium), in May 1954. Signor Pella was re-elected at an extraordinary session of the Assembly held from Nov. 22-25, 1955.

The Messina and Noordwijk Conferences.

As stated above, the Foreign Ministers of the six member-countries of the Community met at Messina on June 2-4, 1955. They were M. Paul-Henri Spaak (Belgium), M. Antoine Pinay (France), Professor Hallstein (State Secretary in the German Federal Government), Signor Martino (Italy), M. Bech (Luxemburg), and Dr. J. W. Beyen (Netherlands). In addition to the nomination of M. René Mayer as the new President of the High Authority, the Foreign Ministers discussed proposals for further European economic integration which had been made by the three Benelux countries (Belgium, Netherlands, and Luxemburg) on May 20, 1955, to the Governments of the member-countries.

The Benelux proposals called for (*a*) the establishment of a "common organization" to study development plans for a European network of roads, canals, and railways, and for the co-ordination of civil aviation policies; (*b*) the study of methods of co-ordinating power policy in Europe; (*c*) the creation of a "common authority" for the development of atomic energy for peaceful purposes, with the pooling of investment funds, technical knowledge, and research facilities; and (*d*) the progressive integration of the national economies of the six member-countries and the harmonization of economic, financial, and social policies. To implement this programme the Benelux Governments proposed that a conference should be called to work out (*a*) a treaty on the pooling of transport, power, and atomic energy; (*b*) a treaty on general economic integration; and (*c*) a treaty defining the European institutions necessary to carry out the programme.

After discussing these proposals, as well as memoranda submitted by Signor Martino and Professor Hallstein, the Ministers finally agreed on a resolution which adopted the objectives of the Benelux programme but set out different procedures for, and a more gradual approach to, their implementation.

The "Messina Resolution" declared.

(1) "The Governments of the German Federal Republic, Belgium, France, Italy, Luxemburg, and the Netherlands consider that the moment has arrived to initiate a new phase on the path of constructing Europe. They believe that this has to be done principally in the economic sphere, and regard it as necessary to continue the creation of a United Europe through an expansion of joint institutions, the gradual fusion of national economies, the creation of a common market, and the gradual co-ordination of social policies. Such a policy seems to them indispensable to preserve for Europe its place in the world, to restore its influence, and to improve steadily the living standards of its population"

(2) The six Ministers had agreed on the following aims:

(i) The joint development of large-scale communications facilities, including the construction of a European network of canals, *auto-bahnen*, and electrified railway-lines, as well as the standardization of equipment and the improved co-ordination of aerial traffic,

(ii) the development of exchanges of gas and electric power, and a reduction of their cost, through co-ordination of the production and consumption of power and the formulation of a joint policy;

(iii) the creation of a joint organization having "the responsibility and the facilities" for ensuring the development of atomic energy for peaceful purposes, "taking into account any special agreements of individual Governments with third countries"

These facilities would be (*a*) the creation of a common fund, financed by member-countries, for the construction of atomic energy plants and atomic research, (*b*) free and sufficient access to raw materials, and free exchange of information, technicians, by-products, and special equipment; (*c*) the sharing of the results of such research without discrimination, and the provision of financial aid for their practical implementation, and (*d*) co-operation with non-member countries

(3) "The six Governments agreed that the aim of this course in the field of economic policy is the creation of a common European market free from all Customs barriers and quantitative restrictions They believe that this market has to be realized by stages." This would require an examination of the following questions

(*a*) The "procedure and rhythm" of the gradual abolition of trade barriers between the participating countries and of suitable measures for the gradual unification of their Customs system *vis-à-vis* third countries; (*b*) measures for the co-ordination of their general policy in the financial, economic, and social spheres; (*c*) measures for the co-ordination of their monetary policy with a view to the creation of a common market, (*d*) a system of protective clauses, (*e*) the creation and functioning of a "re-adaptation fund"; (*f*) the gradual realization of a common labour market; (*g*) the drafting of rules that would guarantee free competition within the common market in such a way as to exclude any national discrimination; (*h*) the "appropriate institutional means" for the realization and operation of a common market.

(4) The question of the creation of a European investment fund was under examination; the purpose of such a fund would be "the joint development of Europe's economic potential, and especially of the under-developed areas of member-countries."

(5) The six Governments also regarded it as "indispensable to examine the progressive harmonization of national social policies," especially those relating to working hours, payment for overtime, and paid holidays.

(6) Instead of calling an immediate treaty-drafting conference, as had been proposed by the Benelux countries, the Foreign Ministers decided to appoint in the first instance a committee of Government representatives and experts, working under the direction of an "eminent political personality," to study the problems raised, prepare drafts of treaties or agreements, and report back on Oct. 1, 1955, at the latest. Meanwhile the Foreign Ministers would meet again before that date to study any interim reports of the committee and issue further directives. The U.K. Government was invited to attend the committee's meetings because of Britain's membership in the West European Union and her associate membership of the Coal and Steel Community. The Foreign Ministers would decide at a later date whether other countries should also be invited to participate in the treaty-drafting conferences.

The inter-governmental committee met for the first time in July 1955 in Brussels under the chairmanship of M. Spaak. As provided for in the "Messina Resolution," the six Foreign Ministers met once again at Noordwijk (Holland) on Sept. 6, 1955, to hear an interim report from M. Spaak on the progress of the committee's work. The Foreign Ministers confirmed the full agreement of their Governments with the aims laid down in the "Messina Resolution," and asked the inter-governmental committee to announce its findings by Oct. 30 and publish its complete report "as soon as possible thereafter." The report of the committee (published in March 1956) and the later reactions of the six Governments will be summarized in a subsequent article.—(European Coal and Steel Community, Luxemburg - Council of Europe, Strasbourg - Times - Daily Telegraph - Manchester Guardian - Financial Times - Le Monde, Paris - Giornale d'Italia, Rome - Frankfurter Allgemeine Zeitung - Neue Zürcher Zeitung)

A. GULBENKIAN FOUNDATION. — Establishment in Lisbon. - Aims and Objectives.

A decree was issued by the Portuguese Government on July 18, 1956, approving statutes governing the setting-up in Lisbon of a foundation, created under the will of the late Calouste Sarkis Gulbenkian, for artistic, scientific, educational, and charitable purposes on an international basis.

Mr. Calouste Sarkis Gulbenkian (86), the oil magnate and art patron, and reputedly one of the richest men in the world, had died in London on July 20, 1955. Born in the Ottoman Empire, he had been a British subject since 1902 and had lived in Portugal since 1942. Under the terms of his will, the bulk of his fortune was to be devoted to establishing a Gulbenkian Foundation for the above-mentioned purposes, with the stipulations that it should have its headquarters in Lisbon, and branches in other parts of the world as necessary; that it should be administered under Portuguese law; and that it should be used for the benefit of people of all nationalities.

Calouste Sarkis Gulbenkian was born in Scutari (a suburb of Constantinople), the son of an Armenian oil merchant. After studying in Paris and at King's College, London, he settled in Britain in the 'nineties and established close contacts with Mr. (later Sir) Henri Deterding and other leading oil magnates, in collaboration with whom he amalgamated the Royal Dutch and Shell companies as the Royal Dutch-Shell group. In 1912 he became a director of the Turkish Petroleum Company (T.P.C.), in which he held 15 per cent of the shares, but in 1914 this was reduced to five per cent after an agreement whereby the shareholding was re-divided between the Anglo-Persian Oil Company, Royal Dutch-Shell, and German interests.

During the 1914-18 war Mr. Gulbenkian acted in an advisory capacity to the French High Commissariat for Liquid Fuels, and played an active part in the reorganization of the French oil-refining industry. He obtained the Allied Governments' approval for the arrangement whereby, under the Treaty of San Remo, the German holdings in the T.P.C. were transferred to French interests. He also advised the British Foreign Office in favour of a new arrangement whereby U.S. oil interests were admitted to a share in the company's holdings. In consequence, an agreement was reached in 1928 under which he retained his five per cent holding in the T.P.C. (later renamed the Iraq Petroleum Company) and the remaining 95 per cent was divided equally between the Anglo-Persian Oil Company, Royal Dutch-Shell, the *Compagnie Française des Pétroles*, and the Near Eastern Development Corporation, a consortium of six U.S. oil companies.

Mr. Gulbenkian owned one of the finest private collections of paintings in the world, many of his pictures having been exhibited at the National Gallery in London and the National Gallery of Art in Washington. He was also the owner of valuable collections of sculpture, ceramics, jewellery, illuminated manuscripts, early printed books, glass, furniture, carpets, and tapestry. A devout member of the Armenian Church, he contributed generously to its funds, and himself built and endowed the Church of St. Sarkis in South Kensington to serve the Armenian community in London.

Mr. Gulbenkian's fortune was estimated in the Press as in the region of £300,000,000, derived mainly from oil royalties.

Mr. Gulbenkian nominated three persons in his will—Lord Radcliffe (the eminent British judge, and a personal friend of his), Dr. Perdigão (Mr. Gulbenkian's lawyer in Portugal), and Mr. K. L. Essayan (his son-in-law)—to act as trustees for the Gulbenkian Foundation, and also to maintain all subsidies, pensions, etc., which Mr. Gulbenkian was paying at his death to individuals and to charitable, artistic, religious, and scientific institutions—e.g. the Gulbenkian Library in Jerusalem and the Yedi-Kule Hospital in Istanbul.

Owing, however, to differences of opinion with the Portuguese Government over the constitution of the board of management of the Gulbenkian Foundation, Lord Radcliffe (who had been appointed senior trustee under Mr. Gulbenkian's will) announced on June 15, 1956, that he was unable to act as a trustee for the foundation. Consequent upon Lord Radcliffe's decision, the other two trustees (Dr. Perdigão and Mr. Essayan) nominated three additional trustees of the Foundation on July 22—Mr. Charles Whishaw, a British lawyer who had looked after the late Mr. Gulbenkian's interests for many years, and a member of the Iron and Steel Holding and Realization Agency; the Duke of Palmella, a former Portuguese Ambassador in London; and Senhor Pedro Pereira, the present Portuguese Ambassador in London.

Lord Radcliffe's resignation arose out of the fact that the Portuguese Government considered it necessary that the board of management of the Gulbenkian Foundation should have a majority of persons of Portuguese nationality, as it was to be established in Lisbon and administered according to Portuguese law. The Portuguese Government therefore declined to approve statutes for the Foundation that did not provide for a board constituted on this basis. Lord Radcliffe, however, had taken the view that it was inappropriate for the board to have a national majority in view of the fact that the Foundation was to be devoted to world-wide purposes.

The Gulbenkian Foundation announced on Aug. 14 that it had made a gift of £10,000 to St. John's School, Leatherhead, through Field-Marshal Viscount Montgomery (chairman of the school's board of governors) in recognition of Lord Montgomery's "military qualities and work for peace." The Headmaster of St. John's (Mr. Wake) said that "as we educate a great many of the sons of the clergy at reduced fees, it may be that we shall use this income for that purpose." The school has 142 sons of the clergy among its 350 pupils.

(Times - Daily Telegraph - Le Monde, Paris)

B. BRITISH WEST INDIES. — Agreement between Trinidad Government and Texas Company on Safeguards under Proposed Oil Company Transfer.

The Colonial Office published on Aug. 2 the terms of an agreement reached in London between representatives of the Government of Trinidad and Tobago and the Texas Company. Under the agreement the Texas Company pledged itself to enter into a binding undertaking with the Trinidad Government whereby, subject to its acquiring control of the Trinidad Oil Company, it would carry out the following obligations of that company:

(1) To operate its refinery in Trinidad at full economic capacity—i.e., at not less than its present average rate of 70,000 barrels a day—subject to the company being able (*a*) to produce or purchase the necessary crude oil and transport it to the refinery at a reasonable cost; (*g*) to market its refined products at fair and reasonable prices; (*c*) to continue the present processing arrangements, or substitute similar ones. The company also agreed to expand the capacity of its refinery if it considered it practical to do so.

(2) To intensify oil drilling operations in Trinidad so that during the five years beginning on Oct. 1, 1956, the company would in one or more of the following respects operate at a higher average annual rate than in the previous five-year period. (*a*) total number of wells drilled, (*b*) total footage drilled, (*c*) number of barrels of oil produced, (*d*) expenditure on producing operations.

(3) To exploit its existing oil resources in Trinidad in conformity with good practices and sound engineering principles.

(4) To maintain industrial relations on the basis of established practice in Trinidad. In particular, the company would (*a*) honour the terms of the existing agreement between the unions concerned and the Trinidad Oil Company for its unexpired term, (*b*) continue the employment of the management of the company and its subsidiaries in Trinidad on the same basis as before.

(5) To minimize the employment of non-Trinidadians by (*a*) ensuring (so far as reasonably practicable, and without limiting the company's right to select its employees) that they were only engaged when no Trinidadians with the requisite qualifications were available, (*b*) pursuing plans for industrial and technical training and education with a view to Trinidadians replacing other employees and being afforded a reasonable opportunity of occupying the highest positions in the company.

(6) To refrain from committing any discriminatory act against an employee or other Trinidad resident on grounds of colour or race, and not to permit such acts to be committed.

(7) To ensure that at least one director of the company registered in Trinidad to carry on operations should be a Trinidadian.

It was explained that the talks (which ended on Aug. 1) had related mainly to points affecting Trinidad, and that discussion of aspects directly affecting the United Kingdom remained to be completed. (Times - Daily Telegraph) **(Prev. rep. 14972 A.)**

C. UNITED STATES. — Grand Canyon Air Disaster.

The worst civil air disaster in the history of aviation occurred on June 30, when two U.S. airliners collided during a thunderstorm over the Grand Canyon in Arizona, and crashed with the loss of 128 lives. There were no survivors from either machine.

The aircraft involved were a Super *Constellation* of Trans-World Airlines bound for Kansas City, and a United Air Lines *DC*-7 bound for Chicago and Newark (New Jersey). The two airliners had left Los Angeles within a few minutes of each other, and were following virtually the same route in an easterly direction. The Super *Constellation*, manned by a crew of six, was carrying 64 passengers, while the *DC*-7 carried 58 passengers and a crew of five.

At the time of the accident a thunderstorm was in progress along the Arizona-New Mexico border, with heavy cloud at 20,000 feet. Later investigations revealed that the pilot of the *DC*-7 had been given permission to increase his altitude to 1,000 feet above the cloud, without being advised of the presence of the Super *Constellation* at 21,000 feet.

A six-man committee of inquiry into the disaster was set up on July 27 by the Civil Aeronautics Board. It was headed by Mr. Robert Chrisp, chief of the C.A.A.'s Bureau of Safety Investigation.—(New York Times - New York Herald Tribune) **(Prev. rep. Comet Air Disasters, 14397 A.)**

A. SOVIET UNION. — Supreme Soviet Meeting. - Abolition of Finno-Karelian Republic. - Pensions Legislation. - Disarmament Resolutions. - M. Shepilov's Proposal for Ban on Nuclear Tests.

The Supreme Soviet of the U.S.S.R.—the Council of the Union and the Council of Nationalities meeting in joint session—convened in Moscow from July 11-16. The principal decisions taken were (*a*) the abolition of the Finno-Karelian Republic and its incorporation in the Russian Soviet Republic, thereby reducing the number of Union Republics from 16 to 15; (*b*) legislation to increase old-age pensions and other social benefits; (*c*) the adoption of resolutions on disarmament and the banning of nuclear weapons.

Abolition of Finno-Karelian Republic. The request for the abolition of the Finno-Karelian Republic and its incorporation in the Russian Soviet Republic was made by M. Otto Kuusinen, the President of the Finno-Karelian S.S R., on two principal grounds: (i) the increasingly close economic and cultural ties between the area and the Russian Soviet Republic, and (ii) the smallness of the population (about 600,000), which did not justify the continued existence of the Finno-Karelian Republic as a Union Republic of the U S S.R. It was agreed that the area would henceforth have the status of an autonomous republic within the Russian Soviet Republic, under the appellation of the Karelian Autonomous Republic. The Finnish part of the former name was dropped in view of the fact that Finns constituted a very small proportion of the population of Soviet Karelia.

[The Finno-Karelian Republic was constituted after the Russo-Finnish "winter war" of 1939-40. It consisted of the territories formerly comprised in Soviet Karelia (an autonomous region from 1923 to 1940) and those ceded to the U.S.S.R by Finland after the "winter war"—see 3996 B.]

Social Legislation. The Supreme Soviet adopted a law increasing old-age, widows', war veterans', disability, and dependants' pensions, at a total additional cost to the State of 13,100 million roubles (about £1,170 million at nominal values) a year. The minimum old-age pension was raised to 300 roubles a month for men aged 60 and women aged 55, with lower age-limits (50 for men and 45 for women) in the case of workers engaged in particularly difficult jobs such as underground coal-mining. A "ceiling" of 1,200 roubles was fixed as the maximum monthly pension Legislation was also adopted enabling workers to leave their jobs on giving a fortnight's notice, and abolishing the former requirement whereby workers were unable to leave their employment without permission. [Under the former labour regulations any worker who left his job without permission was liable to imprisonment].

Before presenting the pensions legislation to the Supreme Soviet, the Government had submitted it beforehand to party and local organizations for discussion and suggested improvements—the first time such action had been taken in connexion with Government-sponsored legislation. Many amendments were suggested as a result of this "popular consultation," several of which—e g additional privileges for mothers of large families, and improvements in disability pensions—were approved by the Supreme Soviet and incorporated in the Bill.

Banning of Nuclear Weapons. Unanimous approval was given to a resolution passed by the Japanese Parliament in February last, and subsequently circulated to all other Parliaments, calling for a ban on the production of atomic and hydrogen bombs, and the prohibition of tests of atomic weapons. The Supreme Soviet approved a statement expressing "full understanding of the concern of the Japanese people with regard to the continued arms race and the ever-growing tests of atomic and hydrogen weapons," and reiterating the Soviet Government's demand for "the complete banning of atomic and hydrogen weapons, the ending of their manufacture, the prohibition of their use, the destruction of stocks of these weapons, and their removal from the armaments of States." Reference was made to the various proposals presented by the Soviet Government in the U.N Disarmament Sub-committee.

M. Shepilov's Proposal for Ban on Nuclear Tests. In a speech to the Supreme Soviet on July 16—his first as Foreign Minister—M. Shepilov proposed that the Soviet Union, the United States, and Great Britain should agree to ban all tests of nuclear weapons, as a first step towards the outlawing of atomic weapons and the destruction of existing stocks. He suggested that nuclear tests could be banned in three ways. (1) by an agreement within the framework of the United Nations, (2) by a tripartite agreement between the U.S.S.R., the U.S.A., and Britain, to which other nations could adhere; or (3) by unilateral statements whereby each of the three Governments would undertake to abandon nuclear weapon tests immediately.

M. Shepilov said that it might be difficult at the present time to reach agreement on the prohibition of atomic weapons and the destruction of existing stocks. He believed, however, that a ban on nuclear weapon tests could be achieved without lengthy negotiations and without an elaborate system of controls, as there were now technical means of disclosing nuclear explosions in any part of the world. A resolution embodying M. Shepilov's proposal was adopted by the Supreme Soviet.

Disarmament Resolution. The Supreme Soviet adopted a resolution calling upon the Governments and Parliaments of all countries, as "a sacred duty," to adopt "effective measures to stop the arms drive without waiting for the time when the United Nations can find a solution acceptable to all the States concerned." Such action, it was suggested, had been "made easier by the recent relaxation in international tension and the further development of friendly contacts and good relations between countries on the basis of the principles of peaceful co-existence" The resolution also approved the Soviet Government's decision to reduce its armed forces and armaments as "an act of goodwill" and "an exceptionally important beginning to facilitate the practical solution of the disarmament problem."

It was agreed that copies of the resolution on disarmament should be sent to the Parliaments of all countries.
(Soviet Weekly) **(Prev. rep. Supreme Soviet, 14654 A.)**

B. IRAQ. — King Faisal's State Visit to Britain.

King Faisal of Iraq, accompanied by the Crown Prince Abdul Ilah and by the Iraqi Prime Minister, General Nuri es-Said, paid a State visit to Britain from July 16-19. At the end of his official visit King Faisal remained in Britain as a private visitor, leaving for Baghdad on Aug. 12.

It was announced during King Faisal's visit that the British Government would make a gift to the Iraqi Government of two acres of land in the centre of Baghdad for the construction of a National Library of Iraq. In addition, an adjoining 4½-acre site would be made available to the Anglo-Iraqi Friendship Society for the building of a cultural centre.

It was explained in a Treasury minute that the British Government had purchased a 23-acre site in the centre of Baghdad in 1920, on which it had been proposed to erect Embassy buildings. Part of this site would be devoted to the construction of the National Library of Iraq and the cultural centre, another five acres retained for Embassy purposes, and the remainder sold

The value of the land presented to the Iraqi Government and to the Anglo-Iraqi Friendship Society was estimated at about £120,000 in each case. (Times - Daily Telegraph)

C. UNITED STATES. — Employment and Unemployment Figures.

The U.S. Commerce and Labour Departments announced on July 9 that the number of employed persons in the U.S.A. in June 1956 (over 14 years of age, but excluding the armed forces) had reached the record total of 66,500,000—an increase of about 2,500,000 over the June 1955 figure, and 1,000,000 more than the previous peak of 65,500,000 reached in August 1955.

The number of unemployed was 2,900,000, or 4.2 per cent of the labour force. The increase of 300,000 over the previous month, however, was caused primarily by the large number of young people looking for summer holiday work and by university graduates entering the labour market.—(New York Times)
(Prev. rep. 14755 A.)

D. UNITED KINGDOM. — Farm Wages increased.

The Agricultural Wages Board on Aug. 2 reached provisional agreement on an increase of 6s. a week in the minimum wage of adult male farm workers (bringing it to £7 1s. for a 47-hour week), with proportionate increases for women and for juvenile and casual workers.

The agricultural unions had asked for a minimum increase of 10s. a week, but a motion to this effect was defeated by the votes of the employers' representatives and the independent members of the board. The latter then indicated that they would be prepared to support an increase of 6s. a week, and a motion by the workers' representatives proposing this was carried by their votes and those of the independent members, the employers' representatives again opposing.

The cost of the increases (applicable to about 613,000 workers) was estimated at about £10,000,000 in a full year.
(Times - Daily Telegraph) **(Prev. rep. 14647 A; 14831 A.)**

E. UGANDA. — New Governor.

The Colonial Office announced on Aug. 14 that Sir Frederick Crawford, Deputy Governor of Kenya since 1953, had been appointed Governor of Uganda in succession to Sir Andrew Cohen. It was simultaneously announced that Sir Andrew Cohen had been appointed permanent British representative on the U.N. Trusteeship Council in succession to Sir John Macpherson, consequent on the latter's appointment as Permanent Under-Secretary of State for the Colonies. Sir Frederick Crawford had been Governor of the Seychelles prior to his appointment as Deputy Governor of Kenya during the Mau Mau emergency.—(Times) **(Prev. rep. 12296 A.)**

A. POLAND. — Political Developments after Poznan Riots. - M. Ochab's Admissions of Political and Economic Shortcomings. - Government Decisions on Political and Economic Reforms. - Ministerial Changes.

Political developments in Poland since the Poznan riots are described below under cross-headings.

Admissions of Administrative and Economic Shortcomings.

An admission that the Poznan riots had been caused by serious governmental and economic shortcomings, and not entirely by "imperialist agents," was made by the First Secretary of the Polish United Workers' Party, M. Edward Ochab, in a speech on July 19 to the party's Central Committee.

M. Ochab said in connexion with the Poznan riots. "In assessing the reason for these incidents, it would be an error to concentrate attention on the machinations of provocateurs and agents of imperialism The social roots of these incidents should be sought for in the first place. The improvement achieved in living conditions during the Six-Year Plan was most inadequate. The conviction arose that the party and the Government were not doing all in their power to alleviate the situation From an analysis of the events in Poznan, it appears that a considerable part was played by bureaucracy and the soullessness of the authorities, both central and local . . ."

After describing the Poznan riots as "a grave warning to us," and declaring that the next five years must be marked by a "grim struggle" to raise the workers' living standards, M. Ochab refuted the claim—previously made by the official Bureau of Statistics—that real wages had increased by 27 6 per cent during the period of the Six-Year Plan. Investigations by the Central Committee of the United Workers' Party, he pointed out, had shown that the increase was only 13 per cent, and the figures issued by the Bureau of Statistics were therefore "not supported by the experience of the broad masses, whose material situation is difficult—sometimes very difficult" Moreover, the Six-Year Plan had failed to produce sufficient coal and foodstuffs, and had also fallen short by 50 per cent of its goal of raising real wages. M. Ochab attributed these shortcomings to the need to spend "many millions" on armaments, which had led to the diversion of large quantities of coal, steel, and non-ferrous metals, and also of skilled manpower, for the production of military equipment

During the next five years (M Ochab continued) the real wages of workers and peasants would have to be raised by 30 per cent, and 1,200,000 new "units of housing accommodation" would have to be provided. Even with these increases, he admitted, the wage-level would still be comparatively low and the housing position "difficult and painful" Moreover, these targets could not be reached unless coal output increased, since coal accounted for nearly half of Poland's exports.

M. Ochab said that the Poznan disturbances had shown that the links between the party and the workers had been "seriously disturbed." The party had encountered "attitudes of disbelief and disappointment among some of the workers," and it was therefore necessary to change its working methods. For this purpose the party should abandon its former role of "director and manager" in favour of a new role as "guide and educator"; in particular, it should put an end to the practice of issuing orders to, and undermining the independence of, the other two parties in the National Front—the United Peasants' Party and the Democratic Party.

The Poznan riots, M. Ochab emphasized, should not "serve as the justification for any attempt to turn aside the process of democratization," and resolutions would be presented to the Central Committee for further democratizing Polish life and "stabilizing the Socialist rule of law" Among the abuses which would have to be remedied were the overcentralization and direction of the economy, the neglect of agriculture, and the errors made in branding many of the "middle" peasants as "kulaks." These abuses had originated in Stalin's mistaken opinion that class warfare would increase *pari passu* with the growth of Socialism, and this mistake had "led us to look behind everything for alien and hostile opinion, subversion, and imperialist agencies."

Political and Economic Reforms.

After a six-day session of the Central Committee of the United Workers' Party, ending on July 31, it was announced that a number of measures had been decided upon to ameliorate the condition of the workers. It was also announced that the United Workers' Party would in future confine itself to the role of "political inspiration" rather than of "direct management and administration"; that the Seym (Parliament) would in future have more direct control over the Government; and that the non-Communist parties in the National Front would have "broad possibilities for independent activity."

Political Reforms. The resolution said that the Seym, as the supreme legislative body, must have more effective control over the Government "in conformity with the increasing democratization of Polish life." It would therefore convene more often, and deputies would receive more information than hitherto and would wield a greater measure of responsibility than in the past. It was admitted that the United Peasants' Party and the Democratic Party had considerable influence among the peasants and the *intelligentsia* respectively, and they would therefore have greater freedom than in the past. Supporters of these parties, "including progressive Roman Catholic groups," had made "great contributions to the building of Socialism in our country," and differences of outlook between the various parties constituted "no obstacle to the rallying of all patriotic forces within the National Front."

There would also be a further "democratization" of the United Workers' Party itself, but this did not mean that the party would depart from Marxist-Leninist principles in any way It was admitted that the party had "erred" in the past in taking over the nation's management, and —as stated above—its primary emphasis would in future be on 'political direction."

Economic Reforms. These included, *inter alia*, pay increases for 3,600,000 workers and peasants during the present year, totalling 7,000 million zlotys in all, the raising of family allowances for low-paid workers; the abolition of compulsory deliveries of milk to the State, formerly required from peasants, improvements in the working conditions of miners; improvements in industrial safety and hygiene the raising of real wages of manual and office workers by 30 per cent, and of the wages of lower-paid workers by a higher percentage; the raising of the average *per capita* income of the rural population by 30 per cent, and the construction of 1,200,000 "dwelling rooms" to improve the housing conditions of the urban population. These measures were described as the "basic guiding principles" of the new Five-Year Plan.

"Emergency measures" to improve the conditions of the Polish workers and peasants during the next two years were promised by the Prime Minister (M. Cyrankiewicz) in a speech to the Central Committee on July 26.

These measures—which would run concurrently with the first two years of the Five-Year Plan—would be based on the following principles: (*a*) increases in the wages of the lower-paid workers and of those whose earnings had dropped or remained stationary in the past six years, (*b*) the abolition of the practice of raising working "norms" [i.e. production quotas] concurrently with wage increases; (*c*) the re-payment to the workers of all wage-arrears and premiums and the refund of all unjustly-collected taxes, (*d*) stabilization of prices M Cyrankiewicz admitted that 'excessive taxes" had been "illegally collected for years" and that there had been numerous abuses in the price-fixing machinery, whereby unduly high prices had been charged for many commodities.

In the course of his speech M. Cyrankiewicz promised that the two-year period would be one of "strenuous concentrated action to remove the most painful grievances of the working masses and lessen the most glaring disproportions of our economic measures" During this period—lasting to the end of 1957—workers and peasants would receive a 30 per cent increase in real wages and incomes if industrial production was increased by 53-57 per cent and agricultural production by 25 per cent. In addition, the turnover of retail trade would be increased by about 50 per cent and there would be a considerable increase in consumer goods, involving "an appropriate increase in light industries and the foodstuffs industry." The two-year period would also end the era during which "workers, peasants, and intellectuals had been regarded with distrust and restricted by thousands of regulations, when criticism was suppressed, when they were exposed to lawlessness and abuse on the part of authority, and when their grievances, injuries, needs and troubles were disregarded." The Prime Minister added: "We have taken up the struggle for real democratization of our life, and we will continue this struggle"

The Poznan Riots.

The following information about the Poznan riots was given by the Polish Public Prosecutor (M. Marjan Rybicki) in a press interview on July 17: (*a*) 53 persons had been killed or had died of wounds in the riots, not 48 as originally announced; these included nine soldiers and public security officials; (*b*) over 300 people had been wounded, of whom 127 were still in hospital, including 31 soldiers and 13 security officials; (*c*) 323 persons had been arrested, among them 64 persons who had "made use of the incidents to commit acts of burglary and assault" and "33 criminals who escaped from prison and took part in the assaults and looting."

New Members of Politburo. - Ministerial Changes.

Three new members of the Politburo of the United Workers' Party were announced on July 28—M. Adam Rapacki, the Foreign Minister; M. Edward Gierek, chairman of the commission appointed to investigate the Poznan riots; and M. Roman Nowak, party secretary for the province of Opole. They filled the vacancies caused by the death of M. Bierut, the resignation of M. Berman as a Deputy Premier, and the arrest of General Radkiewicz, the former Minister of State Security.

Further ministerial changes were announced on July 16 as a result of the merger of four ministries into two:

(*a*) A Ministry of Food was created by the merger of the Ministry for the Agricultural and Food Industry and the Ministry of Meat and Dairy Products; (*b*) a Ministry of Forestry and Timber Industry was created by merging the Ministry of the Forestry Industry and the Ministry of the Timber and Paper Industry. M. Hoffman, formerly head of the Agricultural and Food Ministry, was appointed Minister of Food, and M. Jan Dab-Kocioł, formerly head of the Ministry of Forestry Industry, became Minister of Forestry and Timber Industry.

Rehabilitation of Polish Home Army.

The anti-Communist Polish Home Army (*Armja Krakowa*), which played the leading role in the Warsaw uprising against the Germans in 1944, was officially honoured by the Polish Government—for the first time since the war—on Aug. 2, the 12th anniversary of the rising. Survivors of the Home Army were given a place of honour in the commemorative ceremonies, and Government representatives were present at the unveiling of a plaque to commemorate the assassination by members of the Home Army of S.S. General Kutscher, the head of the Gestapo in Warsaw.

M. Gomulka readmitted to Party Membership.

Warsaw radio announced on Aug. 5 that the United Workers' Party had rehabilitated and readmitted to party membership M. Wladyslaw Gomulka, the former secretary-general of the party; General Spychalski, the former Minister of Defence; and M. Zenon Kliszko, a former State Secretary in the Ministry of Justice. All three had been expelled in 1949, and subsequently arrested, on charges of "intelligence with the enemy" and "Titoist deviationism." It was admitted that "unfounded and wrongful accusations" had been made against them at the time [see page 14819].

Marshal Bulganin's Visit to Poland.

The Soviet Prime Minister, Marshal Bulganin, and the Minister of Defence, Marshal Zhukov, visited Warsaw on July 22 for the celebration of Poland's National Day.

In the course of a speech in Warsaw, Marshal Bulganin declared that "forces of international reaction" were trying to exploit the situation created by the denunciation of the "cult of the individual" in the U.S.S.R., and to sow dissensions between the Socialist countries as a result of the admissions of the mistakes of the Stalinist era. In addition, "opportunist and subversive elements" in the Socialist countries had "come out of their corners" and were seeking to achieve the same ends. After saying that this had "found its reflection in some newspapers in the Socialist countries, including those of Poland," Marshal Bulganin declared: "The facts show that hostile elements have made use of the newspapers of Socialist countries to sow their venomous seeds, and that some editors of these papers have given way to hostile influences . . ."

[It was commented in the Western countries that Marshal Bulganin's implied strictures on the Polish Press were apparently the result of the greater outspokenness of Polish newspapers since the denunciation of the "Stalin cult."]

During a visit on July 26 to Stalinogrod (formerly Katowice), in Polish Silesia, Marshal Bulganin declared that the ex-German territories now administered by Poland would remain "Polish forever."—(Polish Embassy Press Office, London - Le Monde, Paris - Neue Zurcher Zeitung - Times - Manchester Guardian - New York Times) **(Prev. rep. Poznan Riots, 14967 A.)**

A. IRISH REPUBLIC. — Cork City By-election.

The Cork City by-election to the Dail, caused by the death of Mr. P. McGrath (Fianna Fail), was held on Aug. 2 with the following result:

Galvin, John (Fianna Fail) ..	18,704
Sheehan, Michael (Fine Gael) .	10,166
Desmond, Con (Labour) ..	3,919
Others (Independents)	2,779
No change. Fianna Fail majority	8,538

The total valid poll was 35,568, or just over 56 per cent of the electorate of 63,495.

The result constituted a severe setback for Fine Gael, whose poll of first preference votes dropped by 9,526 as compared with the 1954 general election, whereas the Fianna Fail first preference vote declined by only 1,664 in a much lower poll than at the general election (47,916). In 1954 the combined vote of the Fine Gael and Labour parties (the principal parties supporting the present coalition government) was 25,988, and Fianna Fail's 20,368, whilst in the by-election the previous Fianna Fail deficit was turned into a majority of 4,619 over Fine Gael and Labour combined—a turnover of more than 10,000 votes.

The by-election left the distribution of seats in the Dail unchanged, viz.: Government parties (Fine Gael, Labour, Clann na Talmhan, and supporting Independents), 77; Fianna Fail 66, with the additional support of three Independents. (Irish Times, Dublin) (Prev. rep. General Election, 13605 A.)

B. AUSTRIA. — Merger of Left-wing Parties.

The Socialist Workers' Party, commonly known as "Left Socialists," announced on July 15 that it had decided to merge with the Austrian Communist Party. Both parties had already co-operated closely during the last seven years and had jointly contested the general elections. The Left Socialists are not represented in the present Parliament.—(Wiener Zeitung) (Prev. rep. 14889 A.)

C. BOLIVIA. — Presidential Election.

Presidential and Congressional elections held in Bolivia on June 17 resulted in a victory for the National Revolutionary Movement (*Movimiento Nacionalista Revolucionario*, M.N.R.), which has ruled the country since it seized power by armed revolt in 1952 (see 12191 A). The presidential elections were contested by four parties—the M.N.R., whose candidate was Señor Hernán Siles, Vice-President since 1952; the right-wing Socialist Falange (*Falange Socialista Boliviana*), which had been outlawed since 1952 but had benefited from an amnesty; the Bolivian Communist Party; and the Revolutionary Workers' Party, a "Trotskyist" organization. The retiring President, Señor Victor Paz Estenssoro, did not stand for re-election because of ill-health.

The elections were carried out on the basis of a new electoral law under which, for the first time, the franchise was made universal and obligatory for all citizens of both sexes over the age of 21. The former literacy qualification was abolished, as was also the provision whereby citizens had to possess a certain amount of property before they could be registered as electors. In view of the large number of illiterates among the population, particularly among the Bolivian Indians, it was provided that voters who could not read or write could cast their votes by coloured slips—rose-coloured for the M.N.R., blue for the Falange, yellow for the Communists, and green for the Trotskyists. The enfranchisement of the entire adult population raised the number of voters to 1,634,054 (about half the population of the Republic), as compared with about 125,000 in 1951.

Assurances that the elections would be "the freest in Bolivia's history" had previously been given by President Paz Estenssoro, who had announced an amnesty for all the "traditional" political parties, including the outlawed Socialist Falange. The Falangist leader, Señor Oscar Unzaga de la Vega, accordingly returned from exile in Buenos Aires to stand as candidate for his party in the presidential election. On the eve of the poll, however, the Falange announced its withdrawal from the elections after the Bolivian Government had issued a statement alleging that Falangist leaders and certain Army officers had been planning a revolt with the support of the Argentine Government. [These allegations were strongly denied in Buenos Aires.] As, however, the Falange did not notify the Electoral Court of its decision, it remained legally in the election contest.

Official returns issued in La Paz on June 21, covering about 90 per cent of the electorate, stated that the candidate of the National Revolutionary Movement, Señor Hernán Siles, had won the presidential election with 613,993 votes against 122,623 for the Falangist candidate. Only some 12,000 votes were cast for the Communist candidate, and less then 3,000 for the Trotskyist nominee. The M.N.R. was also reported to have won all the seats in the Senate and a large majority in the Chamber of Deputies. Señor Hernán Siles (42) took office as President on Aug. 6.—(New York Times - Le Monde, Paris) (Prev. rep. 12620 A; 12191 A; 11655 A.)

D. UNITED KINGDOM - UNITED STATES. — U.K. Purchase of Surplus American Tobacco against Provision of Housing for U.S. Service Personnel in Britain.

Mr. Macmillan, the Chancellor of the Exchequer, announced in a written reply on June 8 that arrangements had again been made with the U.S. Government under which Britain would import U.S. tobacco for sterling and, in exchange would build houses for U.S. Servicemen and their families in the U.K. at an equivalent cost. These houses—which would be in addition to the 1,500 now being built under the similar agreement made in 1955—would be let to the U.S. authorities so long as they were required, but would remain the property of the British Government. The transaction involved $12,000,000 worth of tobacco, as compared with $15,000,000 under the 1955 agreement. The tobacco would go into the tobacco companies' stocks and the proceeds appropriated to the U.K. defence budget. The Chancellor added that the Government had not accepted any undertakings about the 50 per cent shipping requirement normally connected with surplus commodity disposals by the United States.

The agreement meant that British tobacco manufacturers could buy an additional $12,000,000 of tobacco without drawing on their dollar import quotas, and could thus acquire U.S. tobacco in excess of their normal allocations. The chairman of the Imperial Tobacco Co. (Sir Robert Sinclair) had pointed out in his annual statement in March that British manufacturers had taken advantage of the favourable buying conditions in the U.S.A. for last year's crop (the largest ever known) to purchase a quantity of tobacco in excess of a year's requirements: they regarded this as an insurance against a short or poor crop in the future and hoped that it could ultimately be paid for in sterling. The new arrangements will now enable such payment to be made.

It was pointed out in *The Times* that these arrangements would not affect the tobacco companies' purchases from Commonwealth sources, since the proportion of dollar tobacco consumed by British firms remained limited in relation to total imports. (Times - Manchester Guardian) (Prev. rep. 14207 B.)

A. INDIA. — Sir Chintaman Deshmukh resigns from Cabinet. - Disagreement over Future Status of Bombay City. - Mr. Nehru takes over Finance Portfolio.

It was officially announced in New Delhi on July 24 that President Prasad had accepted the resignation of Sir Chintaman Deshmukh, the Minister of Finance, and that Mr. Nehru would take over the Finance portfolio concurrently with the Premiership.

Sir Chintaman, whose resignation had been pending for several months, explained the reasons for his decision to leave the Government in a statement to the *Lok Sabha* on July 25, during the debate on the States Reorganization Bill.

"I have resigned," he said, "because I do not wish to share responsibility for the Government's decision to separate the City of Bombay from Maharashtra, as embodied in the States Reorganization Bill, and because I wish to protest against the manner in which this issue—so vitally important to the interests of my constituency of Kolaba in particular, and of Maharashtra as well as India in general—has been handled by the Prime Minister." Specifically, he said, his protest referred to "(1) the inability or unwillingness of the Government of India to persuade the Bombay Government to hold a judicial inquiry into the police firings of November 1955 and January 1956, in the course of which about 80 persons were killed and about 450 injured, and (2) the impropriety of the Prime Minister's announcement in June in regard to the future of Bombay while the States Reorganization Bill was before the *Lok Sabha* and had been referred to the Select Committee." [This announcement will be summarized in an article on the States Reorganization Bill to be published in a subsequent issue.—*Ed. K.C.A.*]

As regards (1), he (Sir Chintaman) had "pleaded in vain" for an inquiry, whilst as regards (2) any further discussion with Mr. Nehru had become "useless" after the latter's announcement on the future of Bombay City at the meeting of the All-India Congress Committee. Although he had then asked the Prime Minister to make his pending resignation effective, he had agreed that it should be deferred until Mr. Nehru's return from abroad.

After stressing that he had never been a member of the Congress Party and that at the time of taking office he had warned Mr. Nehru that he would have to resign if there were any major disagreement on matters of principle, Sir Chintaman said that in the matter of the Government's decision concerning the separation of Bombay City from Maharashtra his conscience would not permit him "to remain aloof or unconcerned," as he strongly believed that the decision, with its latest modification, was "grossly unjust and unfair to the people of Maharashtra." However, in view of his role as a non-party financial expert, he had not taken a strong personal stand on this matter until he had become convinced that the decision was unacceptable to the people of Kobala [his constituency] in particular and of Maharashtra in general, and that it involved a "grave risk of economic ruination to them." His efforts to secure acceptance of a larger bilingual Bombay State (including both Saurashtra and Vidarbha) had been rejected by all the Congress committees. The only alternative was therefore, in his view, the formation of a separate Gujerat State and a separate Maharashtra State including Bombay City.

Sir Chintaman said although the States Reorganization Bill as introduced had made no change for the better, he had been content to await the Select Committee's report. The Committee's discussions, however, had been "greatly prejudiced by the extraordinary action of the Prime Minister in making his announcement in Bombay early last June." After asserting that there had been no previous consideration of the new proposal in the Cabinet, and no individual consultation with Cabinet members known to be specially interested in the question, he declared: "This instance is typical of the cavalier and unconstitutional manner in which decisions have been taken and announced on behalf of the Cabinet by certain unauthorized Cabinet members, including the Prime Minister, in matters concerning the reorganization of States . . . It is true that a committee of the Cabinet was constituted to decide boundary matters, but it was never the intention that the committee should decide the fate of Maharashtra and Bombay City on behalf of the Cabinet. In any case, I have a grievance in that I was not consulted in regard to the specific decisions announced, although, as a Minister specially interested territorially and electorally, common courtesy demanded that I should have been. My complaint is that the Prime Minister and the committee of three have arrogated to themselves powers not delegated to them by the Cabinet as a whole."

Turning to the Bombay incidents, Sir Chintaman Deshmukh asserted that an inquiry into the police firings had been refused without valid reason. There was evidence, he alleged, to show that the police had been instructed by the Chief Minister to shoot at sight and to shoot to kill, and that the use of tear-gas before the firing had brought out women and children from their rooms choking for breath, only to be shot down by the indiscriminate firing of the police using tommy-guns, resulting in heavy casualties. The Congress Party's refusal to order an inquiry into the firings, he said, "to my mind shows an animus against Maharashtra with which I refuse to associate myself." Sir Chintaman added:

"These matters—the usurpation of the powers of the Cabinet by an inner circle, and the denial of civil liberties by giving *carte blanche* to the Bombay police—have a bearing on the public interest going far beyond the range of the dispute over Bombay City . . . The aggressive non-violence of many men responsible for the Bombay decision will do far more to disrupt the unity of the country than outbursts of violence, which no sane man will concede and which must be dealt with firmly but not brutally, especially where hundreds of palpably innocent citizens are involved."

Mr. Nehru, in reply, said that Sir Chintaman's account of various developments was "in my opinion not quite correct in all its particulars," nor was it complete.

The Prime Minister denied that the various decisions on the States Reorganization Bill, and particularly on the future of Bombay City, had been taken without consulting the Cabinet. The matter had been under Cabinet consideration "in various ways and for many months" and had been discussed in the Cabinet "on many occasions," and the Cabinet had been informed of the sub-committee's decisions. After expressing "deep regret" at Sir Chintaman's statement, and saying that he would not deal with the merits of the questions raised by him pending the further debate, Mr. Nehru declared: "The hon. member has criticized the various actions for which I am responsible. I accept that responsibility fully, as I must in my capacity as Prime Minister. But I am reluctant to enter into a controversy which to some extent is of a personal character. Since we are ending our close association as members of the Government, I should like this parting to be one of goodwill."

Referring specifically to the charge that his (Mr. Nehru's) announcement in June concerning the future of Bombay City lacked propriety, as the States Reorganization Bill had been referred to a Select Committee, the Prime Minister said that he was "wholly unable to appreciate this argument." What he had announced in June as the Government's policy had already been included in the draft Bill before Parliament, and the only additional statement he had made was that the future of Bombay City might be decided five years later by Bombay itself. There had been "considerable speculation and uncertainty" about this fact, which had called for clarification. "In such circumstances," Mr Nehru added, "it was necessary to state the position clearly. Apart from this, it is the business of Government to develop its policy and place it before Parliament. It is open to the Select Committee to accept it, vary it, or reject it I had, in fact, stated in Bombay that it would naturally be for the Select Committee of Parliament to decide what they thought proper."

As regards the Bombay incidents, Mr. Nehru said: "After the most careful consideration, and in consultation with many colleagues and others, we felt that our principal aim of developing normal and good relations in Bombay between various communities and groups would be jeopardized by such a prolonged inquiry at this stage We felt that our chief effort should be to re-establish good relations."

It was announced on July 25 that Sir Chintaman Deshmukh had asked to be relieved of his associate membership of the Congress Parliamentary Party, which he had joined following his election as an Independent with Congress support.

B. YUGOSLAVIA. — Soviet and East German Aid for Aluminium Production. - Soviet Aid for Agricultural and Lignite Producton.

A joint communiqué issued in Moscow on Aug. 3 by representatives of the Yugoslav, Soviet, and East German Governments announced that an agreement had been concluded between the three countries under which Yugoslavia would build an aluminium works with Soviet and East German aid, the construction starting during the present year. The Soviet Union and Eastern Germany would also co-operate in building a power-station for the works and in increasing the production of bauxite and soda to ensure the planned increase in Yugoslav output of aluminium. The first phase of the scheme, which would result in the production of 50,000 tons of aluminium a year, would be completed by 1961 at latest, while the new works would ultimately have an annual output of 100,000 tons.

To finance the project the Soviet Union and East Germany would grant Yugoslavia a long-term credit of 700,000,000 roubles (about £60,000,000), bearing interest at two per cent and repayable by Yugoslav deliveries of aluminium and aluminium products. As part of the credit, the Soviet Union would supply wheat to Yugoslavia, and the proceeds from its sale would be used to finance Yugoslav internal expenditure on the project.

In a separate protocol Yugoslavia and the Soviet Union agreed on the manner in which the hitherto unallocated $40,000,000 of the previous Soviet loan should be used. It was arranged (*a*) that machinery and equipment would be delivered by the Soviet Union to help in carrying out large land reclamation schemes in the grain-producing areas of Yugoslavia, and for stepping-up the modernization of agriculture generally; (*b*) that Yugoslavia would buy in the Soviet Union the complete equipment for a new lignite (brown coal) mine in the Kosovo-Metohija area, which would have an annual output of 2,500,000 tons.—(Tanjug Agency, Belgrade)

A. PAN-AMERICAN STATES. — Panama Congress of American Presidents. - The Declaration of Panama.

The Presidents of the 20 Latin American republics, together with President Eisenhower of the U.S.A., met at Panama City on July 21-22 to commemorate the 130th anniversary of the Congress of Panama which was convened in 1826 by Simon Bolivar, the liberator of Latin America. The meeting ended with the signing by all the Presidents of a five-point "Declaration of Panama" setting forth the political, economic, and philosophical principles subscribed to by the nations of the Western Hemisphere, and worded as follows:

"We, the Presidents of the American Republics, commemorating in the historic City of Panama the Assembly of the American States of 1826, convoked by the Liberator, Simon Bolivar, which constituted the first collective manifestation of Pan-Americanism, and recognizing the continuing validity of the ideals which inspired the precursors of continental solidarity, subscribe to the following declaration:

(1) The destiny of America is to create a civilization that will give tangible meaning to the concept of human liberty, to the principle that the State is the servant of man and not his master, to the faith that man will reach even greater heights in his spiritual and material development, and to the proposition that all nations can live together in peace and dignity.

(2) The full realization of the destiny of America is inseparable from the economic and social development of its peoples, and therefore makes necessary the intensification of national and inter-American co-operative efforts to seek the solution of economic problems and to raise the standards of living of the continent.

(3) The accomplishments of the Organization of American States ... demonstrate how much can be achieved in the various fields of international endeavour through loyal co-operation among sovereign nations, and move us to strengthen the inter-American organizations and their activities.

(4) In a world in which the dignity of the individual, his fundamental rights, and the spiritual values of mankind are seriously threatened by totalitarian forces, alien to the tradition of our peoples and their institutions, America holds steadfastly to its historic mission to be a bulwark of human liberty and national independence

(5) An America united, strong, and benevolent will not only promote the well-being of the Continent but contribute toward achieving for the whole world the benefits of a peace based on justice and freedom, in which all peoples, without distinction as to race or creed, can work with dignity and with confidence in the future."

In an address to the congress, President Eisenhower proposed that "each one of us should name a special representative to join in preparing concrete recommendations for making the Organization of American States a more effective instrument in those fields of co-operative effort that affect the welfare of our people." He urged that this commission should, in particular, "hasten the beneficial use of nuclear forces" throughout the Western Hemisphere, both in industry and for combating disease, and announced that he would ask his brother, Dr. Milton Eisenhower, to represent the United States on such a body as he had proposed. (New York Times)

B. FRANCE. — Further Unseating of Poujadist Deputies. - The Yonne By-election.

In addition to the seven Poujadist deputies already unseated between Feb. 7 and April 25, the National Assembly decided on May 23 to invalidate the election of M. Duchoud (Haute-Savoie), who was replaced by M. Briffod (Socialist). Two more Poujadists were invalidated on May 30, when M. Robert Martin (Seine-et-Marne) and M. Lamalle (Yonne) were replaced by M. Jean Chamant (Independent) and M. Arbeltier (Socialist) respectively.

On the other hand, the National Assembly validated the election of three Poujadists whose unseating had been recommended by the National Assembly's Commission dealing with this matter: M. Raymond Lainé (Cher), M. Vaugelade (Puy-de-Dôme), and Dr. Courrier (Aube)

The Poujadist deputies previously unseated were MM. Baryelon, Cottet, Calmel, Guichard, Vignal, Baylac, and Cochet.

The latest invalidations brought the total number of Poujadist deputies unseated to 10, thereby reducing the party's strength in the National Assembly from 52 to 42. Conversely, the Socialists gained four seats, the Radicals three, the Independents (*modérés*) two, and the M.R.P. one.

Immediately after being declared elected in the place of M. Lamalle, however, M. Chamant (who had also represented the Yonne department in previous parliaments) resigned his seat and presented himself for re-election at a by-election. He was re-elected on a second ballot on July 15 with a majority of 19,000 over the Communist candidate. M. Lamalle, the unseated Poujadist deputy, had withdrawn after the first ballot, which was inconclusive.—(Le Monde - Le Figaro) (Prev. rep. 14858 A.)

Note. The Yonne by-election was not affected by the recent Bill abolishing Parliamentary by-elections—see 14947 B.

C. INDONESIA.—Repudiation of Debt to the Netherlands. - Netherlands Protest to Indonesia.

It was announced in Jakarta on Aug 4 that the Indonesian Government had decided to repudiate the whole of Indonesia's debt to the Netherlands as laid down in The Hague Round-Table Conference agreements, which had been abrogated by Indonesia in February last. It was stated, however, that Indonesia's debts to other countries would continue to be recognized and their payment guaranteed.

The statement said that the total debt of Indonesia taken over from the Netherlands East Indies administration when Indonesia achieved her independence amounted to 4,081,000,000 guilders (£408,000,000), comprising debts to the Netherlands of 3,661,000,000 guilders (£366,000,000) and debts to other countries totalling 420,000,000 guilders (£42,000,000) Of the 3,661,000,000 guilders owing to the Netherlands, 661,000,000 guilders had been used for economic development in Indonesia, while the other 3,000,000,000 guilders had been used "in the war against the Republic of Indonesia." As Indonesia continued to be responsible for the debt of 420,000,000 guilders owing to other countries which had been contracted by the Netherlands on behalf of the former Netherlands East Indies, this amount was to be deducted from the 661,000,000 guilders owing to the Netherlands. The remaining 241,000,000 guilders could be offset "against the creation of 3,000,000,000 guilders of internal money created by the Netherlands East Indies between 1945 and 1949 in connexion with the waging of the war against Indonesia, the effect of which was imposed on Indonesia by the Round-Table Conference agreements." An official spokesman in Jakarta claimed that the result of this calculation was that Indonesia owed the Netherlands nothing, and added "In fact, the Netherlands is in debt to Indonesia"

The Indonesian Minister of Finance, Dr. Wibisono, said that the primary reason for the Government's decision to repudiate the debts was that they were "of a political nature" and had been "imposed on Indonesia as a kind of compensation to the Netherlands in return for its consenting to recognize the sovereignty of Indonesia."

The Netherlands Government protested against Indonesia's repudiation of her debt to the Netherlands in a Note presented in Jakarta on Aug. 10. The Note described the Indonesian decision as "a flagrant violation of the agreement which Indonesia has voluntarily concluded concerning the taking-over of part of the State debts," and called upon the Indonesian Government to revise its decision and to reimburse the Netherlands Government for the payments made. The Note also said that it was "contrary to accepted standards of international conduct" that the Netherlands Government had not been officially informed of the Indonesian decision. [The Netherlands Government had learned of the Indonesian debt repudiation only from Press reports.]

The Ministry of Foreign Affairs in The Hague issued a statement on Aug 7 which said that the question of the cost of military actions against the Indonesian Republic had been put before a commission of the Round-Table Conference, which, in addition to Dutch and Indonesian representatives, also included Mr. Merle Cochran (U.S.A.), representing the U.N. Commission for Indonesia After having given due consideration to the amount of extra military expenditures, and to the amount of other expenditures which the Commission had attributed to military action, it had come to the conclusion that the Netherlands should cancel 2,000,000,000 guilders and that the other debts should be assumed by the Indonesian Republic. This opinion of the Commission had been accepted by Indonesia and the Netherlands, and 2,000,000,000 guilders of debt had accordingly been deducted from the total assumed by Indonesia. This total, after the aforementioned deduction, had been 871,000,000 guilders at the time of the transfer of sovereignty. At the end of July 1956 the amount outstanding was 649,000,000 guilders, of which 98,000,000 guilders was a non-public debt mainly from State to State, and 552,000,000 guilders was a public debt to individual bondholders guaranteed by the Netherlands Government.

The other creditor countries, the debts to whom will continue to be honoured by Indonesia, are the U.S.A., Canada, and Australia.—(Indonesian Embassy Press Office, London - Netherlands News Agency) (Prev. rep. 14850 B.)

D. UNITED KINGDOM. — Gold and Dollar Reserves in July. - Increase of $20,000,000.

The sterling area had a gold and dollar surplus in July of $20,000,000 after taking into account (*a*) $16,000,000 received in U.S. defence aid, (*b*) $19,000,000 paid to the E.P.U. in respect of the June settlement, and (*c*) $9,000,000 paid to the creditors of E.P.U. in bilateral settlements. As a result, the sterling area's gold and dollar reserves rose to £2,405,000,000 on July 31.

Provisional figures for the E.P.U. July settlement showed that the U.K. had a deficit of £24,000,000, which would be settled in August, three-quarters in gold and dollars. (Treasury Press Office) (Prev. rep, 14981.)

AUGUST 18—25, 1956

A. INDIA. — States Reorganization Bill. - Joint Select Committee's Report. - Bill passed by House of the People. - Creation of Larger Bilingual Bombay State. - Bill for West Bengal-Bihar Border Changes. - Special Guarantees for Telengana. - Presidential Rule in Travancore-Cochin. - Ministerial and Gubernatorial Changes.

The report of the Joint Select Committee of the Indian Parliament appointed to consider the States Reorganization and Constitution (Ninth Amendment) Bills was presented to the House of the People on July 16 by the Home Minister, Pandit G. B. Pant. The principal amendments proposed were as follows:

(1) The Committee accepted the proposal that Bombay City should be placed under Central administration, on the understanding that this decision would be "subject to review in five years in the light of the statement made by the Prime Minister in Bombay on June 3" (see below) Minutes of dissent advocating the inclusion of Bombay in Maharashtra were recorded by two Congress, one Hindu Mahasabha, and two Communist members.

(2) The new Karnataka State should be known as Mysore, and Andhra-Telengana as Andhra Pradesh

(3) Provision should be made for joint meetings of two or more Zonal Councils to discuss questions of common interest, and for the representation on the Zonal Councils of States in which the Council of Ministers might not be functioning at any time.

(4) The number of seats allocated to Bombay City, Delhi, and Himachal Pradesh in the House of the People should be increased from five, four, and three to seven, five, and four respectively, and in the Council of States from three, two, and one to five, three, and two respectively, in view of the changes in their constitutional structure and of the fact that the Central Parliament would legislate for these areas.

(5) A Legislative Council (Upper House) of 70 members should be established in Maharashtra. The decision on the establishment of Legislative Councils in Andhra Pradesh and Madhya Pradesh should be left to the discretion of those States, since there was at present no Legislative Council in any part of their territories

(6) The total number of members in the Legislative Councils of Mysore and Punjab should be reduced to one-quarter of the total membership of the Legislative Assemblies of those States

(7) The life of the present Andhra Legislative Assembly should be extended till five years after the re-election of the Telengana Assembly—i e to seven years, which would enable general elections to be held in Andhra at the same time as in other States.

(8) The Andhra High Court should be transferred to Hyderabad as the High Court of Andhra Pradesh.

(9) Provision should be made to overcome the difficulty that, on account of the reorganization of States and the transfer of certain constituencies from one State to another, some persons might not be entitled to stand as candidates in the next general election in the States in which they might wish to stand.

(10) The terms and conditions of service guaranteed to employees should not be affected by any nominal change in employers in respect of statutory State corporations, State commercial undertakings, or State co-operative societies, consequent upon the reorganization of States.

(11) The Committee stressed the need for providing adequate and effective safeguards for linguistic minorities, but rejected a suggestion for the establishment of a statutory board to enforce these safeguards Instead, it suggested that the Government of India should consider the appointment of a special officer for this purpose. Mr. Frank Anthony (Anglo-Indian member) and Dr Lanka Sundaram (Independent), in a minute of dissent, expressed regret at the absence of statutory safeguards for minorities.

(12) The Committee proposed an amendment to the Constitution (Ninth Amendment) Bill restricting the President's power to make regulations for the Union Territories to the Andaman and Nicobar Islands and the Laccadive, Minicoy, and Amindivi Islands, and providing that Parliament should be the law-making body for the other Territories Mr. N C. Chatterjee (president of the Hindu Mahasabha), in a minute of dissent, maintained that "some definite provision for a democratic set-up should be made for the Union Territories other than the Andaman and Nicobar Islands."

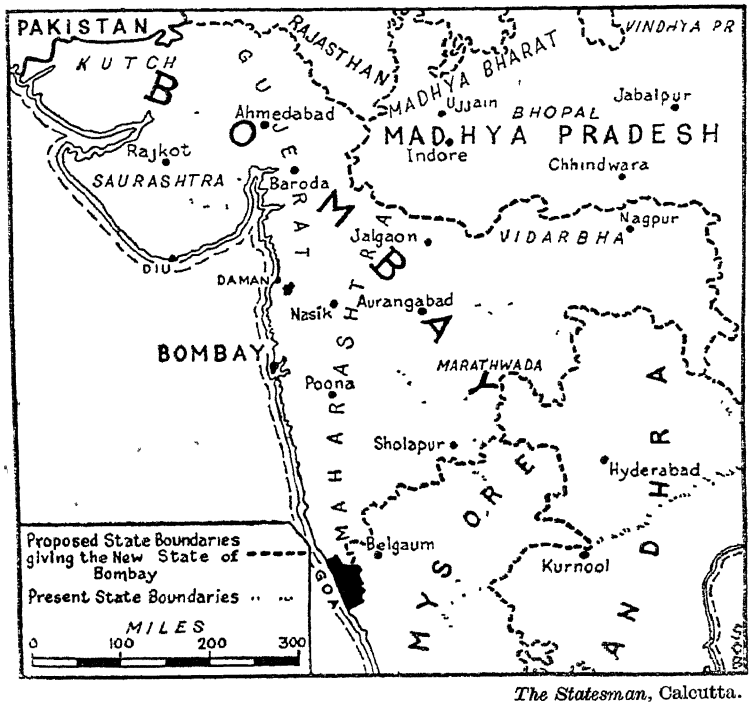
(13) Provision should be made enabling the appointment of the Governor of a neighbouring State to be in charge of the administration of a Union Territory as agent of the President.

(14) The designation "Chief Commissioner" for the head of a Union Territory should be changed to "Administrator"

The Bombay City Controversy. - Creation of Larger Bilingual Bombay State. - The Bombay and Ahmedabad Riots.

At a meeting of the All-India Congress Committee (A.I.C.C.) held in Bombay on June 3, Mr. Nehru (who on the previous day had strongly denounced the violence and lawlessness that had arisen in connexion with the States reorganization problem) stated that "the people of Bombay will be given at the proper time and in the proper circumstances the right to decide what the future of their city should be." The decision, he added, should not be taken immediately, as for the moment Bombay had "disqualified itself" from so deciding; he suggested therefore that an interval of five years should be allowed to elapse, during which "passions would have time to subside." Mr. Nehru also proposed that the Bombay High Court should continue to be the High Court for Maharashtra, Gujerat, and Bombay City, and that one Public Service Commission should serve all three areas.

Rioting broke out on June 2 in the area of Bombay where the Committee was meeting, the demonstrators stoning Congressmen and police and looting shops. Following Mr. Nehru's statement, the riots spread to other areas of the city on June 3, when members of the A.I.C.C. and other Congress supporters were assaulted and cars, buses, and trains stoned. The police were forced to open fire several times in self-defence, total casualties being given as two persons killed by police fire and 81 injured, including 24 members of the A.I.C.C and 30 policemen.



The Statesman, Calcutta.

The Maharashtra Pradesh Congress Committee adopted on June 17 a resolution, moved by Mr. B. S. Hiray (Revenue Minister of Bombay), expressing "deep discontent and dissatisfaction" at Mr. Nehru's proposal, and suggesting that "responsible Congress workers should, if necessary, give up their offices in the Government." The Congress president (Mr. Dhebar) refused, however, to permit Mr. Hiray and Mr. Kunte (Speaker of the Bombay Assembly) to resign their posts. The Vidarbha Pradesh Congress Committee, on the other hand, announced its acceptance of Mr. Nehru's decision, while expressing the hope that Bombay would form part of Maharashtra as early as possible.

The resignation of Sir Chintaman Deshmukh and his subsequent public controversy with Mr. Nehru (see 15035 A) led to further efforts inside and outside the Congress Party to find a solution which would satisfy the Maharashtrian claims and at the same time be acceptable to the Gujeratis. As a result, a new proposal that Maharashtra, Gujerat, and Bombay City, together with Saurashtra, Kutch, Vidarbha and Marathwada, should be united in a single bilingual State was put forward in a petition signed by over 200 M.P.s, and was endorsed on Aug. 6 by an overwhelming majority of the Congress Parliamentary Party at a meeting which was personally addressed by Mr. Nehru, who had obtained the support of the members from Gujerat for the new scheme. The Government of India's decision to accept the proposal for a larger bilingual Bombay State was announced in the *Lok Sabha* by Pandit Pant on Aug. 7.

Moving an official amendment to that effect, **Pandit Pant** paid tribute to a number of Independent members, headed by Mr Frank Anthony and Mr. Kilachand, who had previously submitted a similar amendment and had thereby "opened a door which was half-shut if not banged." In expressing the Government's support, Pandit Pant recalled that both the States Reorganization Commission and the Maharashtra Pradesh Congress Committee (see 14616 A) had originally suggested a bilingual State for Bombay; that Gujerat had also

been " conscious throughout of the fact that an abiding solution for the problem of Bombay and the neighbouring areas of Maharashtra and Gujerat could be found only in a big bilingual State ", that the Indian National Congress had passed a resolution at its Amritsar session in February last declaring itself in favour of large States of a composite character to counteract the present tendency to break up existing States into smaller purely linguistic units, and that he (Pandit Pant) had himself emphasized on that occasion that a lasting solution for Bombay could be found only in a bilingual State The solution now proposed differed from that suggested by the States Reorganization Commission only in that the Marathi-speaking areas of Madhya Pradesh (Vidarbha) would also be included The proposed new State—comprising Bombay City, Maharashtra, Saurashtra, Kutch, Gujerat, Vidarbha, and Marathwada—would have an area of about 200,000 square miles and a population of 50,000,000 (of whom two-thirds would be Marathi-speaking and one-third Gujerati-speaking), and would be the second largest in India after Uttar Pradesh

The official amendment for the creation of a larger bilingual State of Bombay, and defining the areas to be included therein, was adopted by the *Lok Sabha* on Aug. 9 by 241 votes to 40. All the Communist members and some Independents voted against the amendment, while the Praja Socialist Party was divided (Mr. Asoka Mehta, one of its leaders, voted for the amendment). Among Independents supporting the amendment were Mr. Frank Anthony and Mr. Jaipal Singh, while Sir Chintaman Deshmukh and Dr. Lanka Sundaram abstained Mr N. V. Gadgil, president of the Maharashtra Pradesh Congress Committee, opposed the amendment.

The announcement of the creation of a larger bilingual State of Bombay led to renewed riots, this time in Ahmedabad (a city of 800,000 inhabitants and one of India's chief textile centres), which was expected to have become the capital of a separate Gujerat State.

On Aug. 8 over 10,000 university students and most of the city's 40,000 secondary school students staged a *hartal* as a protest against the " Greater Bombay " proposal, while rioting crowds stoned the local Congress office and the offices of the local electricity company, and overturned police vehicles. Five people were killed and 60 injured when the police opened fire to break up the demonstrations. Although a 24-hour curfew was ordered for the entire city on Aug 9, the riots continued both on that date and on Aug. 10. During violent demonstrations in various parts of the city police posts were stormed, roads barricaded, the police stoned, and the private residences of a number of Congress leaders attacked. The police opened fire several times, made *lathi* charges, and used tear-gas to disperse the mob, casualties rising to 15 killed and over 200 injured. Several hundred arrests were made Disturbances also occurred at several towns in the Ahmedabad area—notably at Kalol and Nadiad—in which three people were killed and several injured.

Further outbreaks occurred in Ahmedabad on Aug 13 following a strike called by students and left-wing parties to observe " Martyrs' Day " in memory of the 18 people killed by police fire during the previous week's rioting All shops, schools, offices, and several textile mills were again closed, thousands of demonstrators defied a ban on parades and marched through the streets shouting slogans denouncing the bilingual State decision and demanding a judical inquiry; and mobs stoned mills, damaged municipal property, attacked the police, and stormed the residences of several Congress leaders in the city. The police opened fire twice but there were no casualties In spite of the curfew, the disorders continued on Aug. 14, when over 200 people were arrested, including a Praja Socialist member of the Bombay Legislature.

Passage of States Reorganization Bill by House of the People.

The debate in the *Lok Sabha* on the States Reorganization Bill, opened by Pandit Pant on July 26, was completely overshadowed by the Bombay question (see above). After the Government's new proposals for a bilingual Bombay State had been adopted, the other points raised were speedily disposed of and the Bill was given a second reading on Aug. 9.

In addition to the clauses setting up the new bilingual State of Bombay, the most important amendments adopted on Aug. 9 were the following :

(*a*) The new Bombay State would have 27 seats in the Council of States (as aginst 33 earlier proposed for Gujerat, Maharashtra, and Bombay City) and 66 in the House of the People (against 69 originally proposed for the three separate States).

(*b*) The membership of the new Legislative Assembly for the larger Bombay State was fixed at 396, and that of the new Legislative Council at 72, including 12 nominated members. (This compared with an Assembly of 154 members for Gujerat and one of 280 members for Maharashtra originally provided for under the Bill, which had also envisaged a 70-member Legislative Council for Maharashtra).

(*c*) Mysore was transferred from the Southern Zone and included with the new Bombay State in the Western Zone, the intention being to avoid constituting a zone embracing one State only.

(*d*) The membership of the Legislative Assembly of the new Mysore State was increased from 182 to 208 ; and that of the Mysore Legislative Council from 45 to 52.

(*e*) Provision was made for the creation of a Legislative Council of 72 members for the larger State of Madhya Pradesh.

(*f*) November 1, 1956, was set as the date for the new States to come into being, instead of October 1 as originally provided

A Communist amendment to change the name of Madras State to Tamil Nad was defeated, while another Communist amendment urging the formation of legislatures for Himachal Pradesh, Manipur, and Tripura was also negatived after Pandit Pant had told the House that the Government proposed to take suitable steps to ensure the association of the people in those States with the local administration. Several amendments by Congress and Opposition members proposing the setting-up of a Boundary Commission were also rejected.

The Bill was given a third reading without a division on Aug 10, amidst demonstrations of enthusiasm. The unanimous vote, however, followed bitter attacks on the Government by Communist and Hindu Mahasabha speakers, and a strong condemnation by Mr. Nehru of the anti-parliamentary methods employed by the Opposition.

Professor Hiren Mukerjee (Communist) asserted that the Bill " bristled with acts of injustice " and that the decision on Bombay was " an act of political criminality " motivated by " no other desire than that of appeasing the big-money interests of Bombay." **Mr. N. C. Chatterjee** (Hindu Mahasabha) accused the Government of having reorganized the States in a " haphazard way," and denounced its decisions as regards both Bombay and Punjab.

Mr. Nehru refuted Mr. Chatterjee's allegation that the Congress Party's decision in favour of a larger bilingual State of Bombay was " a sudden political somersault " Whilst it was true that the creation of linguistic States had been Congress policy 30 years ago, present-day Congress policy was completely opposed to it Mr. Nehru added. " There are far more important factors than linguistic States What does it matter whether the border of Bengal or Bihar is here or there ? It is not a political or an economic question, though it may be a question of sentiment But so far as this Government is concerned it makes no difference where the boundaries are " They should, of course, try to satisfy these sentiments and to solve any conflicts, but the unity, security, and homogeneity of India were far more important than anything else, and economic considerations had also to be taken into account. " All this talk of purely linguistic Provinces" was something which tended to lessen the idea of Indian unity, and the events of the past few months had made him more convinced than ever that the idea of creating small States was wrong Although he had been in favour of a large number of small States 20 years ago, he had now completely changed his mind.

Referring to the Ahmedabad riots, Mr Nehru deplored " violent methods of speech and demonstration," and declared that what was happening in the name of *satyagraha* was " something which is a million miles away from what the Mahatma [Gandhi] preached." While he did not claim that the solutions reached were ideal, he reminded the House that they had been arrived at after prolonged consultations. "' After long, interminable debates," Mr. Nehru declared, " you reach certain conclusions, Parliament puts its seal upon it, and it becomes the law of the land What happens then ? Do you go on fighting over it ? Is this the way decent politics are carried on—that immediately you lose in Parliament you take the issue to the streets . . . " ?

Mr. N. V. Gadgil said that he now accepted Parliament's verdict of a larger bilingual Bombay State, and would continue to accept it " until it is amended, altered, or abolished by constitutional and democratic methods." Although there was still some " injustice " in the new arrangement, he advised all parties concerned to restore goodwill and amity, and to extend all possible support to the experiment. " The success of the people of Maharashtra," he concluded " will be judged by the measure of confidence and trust they are able to secure in the people of Gujerat. I have no doubt they will succeed."

Sir Chintaman Deshmukh expressed the view that the new bilingual Bombay State would serve the interests of all sections of the people, and that Bombay City could now "freely throw open its doors to all as it has always done in the past." " Let us resolve," he added, " never to think in terms of a partition again."

West Bengal and Bihar.

On June 14 the Central Government submitted to the Legislatures of Bihar and West Bengal, for their consideration, a draft Bill providing for changes in the boundaries between the two States.

The Bill proposed that about 2,500 square miles of Bihar, with a population of about 1,300,000, should be transferred to West Bengal from Oct. 1, this represented a modification of the States Reorganization Commission's proposals, which had envisaged the transfer of about 3,400 square miles. West Bengal's representation in the House of the People would be increased from 34 to 36, and in the Council of States from 14 to 16, while Bihar's representation would be correspondingly reduced. The Bill also included provisions for the enlargement of the West Bengal Assembly from 241 to 252 members, and a reduction of the membership of the Bihar Assembly ; the division of Bihar's cash and credit balances with West Bengal according to the population ratio ; the division of Bihar's public debt ; and the continued employment by West Bengal of all public servants in the transferred areas.

In West Bengal the Bill was unanimously approved by the Legislative Council on July 4, and by the Legislative Assembly on July 6, subject to " certain suggestions " made in a resolution

moved by the Chief Minister, Dr. B. C. Roy, which sought the transfer of an additional 364 square miles to provide a link between the northern districts and the rest of the State. The Bihar Assembly, on the other hand, urged the Government on July 7 to abandon the Bill, and requested the President to withhold his assent to its introduction into Parliament, a resolution to this effect was adopted by 272 votes to six.

The Bihar and West Bengal (Transfer of Territories) Bill was introduced into the House of the People on July 25, and referred to a Joint Select Committee after a six-hour debate. Congress, Communist, and Hindu Mahasabha members from West Bengal supported the demand for more territory for that State in order to provide a corridor between its two sections and more room for the resettlement of refugees from East Pakistan, while Congress and *Jharkhand* party members from Bihar unanimously opposed the Bill. The Council of States subsequently concurred in referring the Bill to a Select Committee.

Andhra and Telengana.

Andhra and Telengana Congress leaders, including Mr. Gopala Reddi (Chief Minister of Andhra), Dr. Chenna Reddi, and Mr. Ranga Reddi (Ministers for Agriculture and Revenue respectively in the Hyderabad Government), met Pandit Pant in Delhi on July 19 for discussions at which formal agreement was reached on a number of points arising from the proposed merger of Andhra and Telengana in the new State of Andhra Pradesh. The terms of the agreement were officially published on Aug. 10 and were as follows:

The Andhra Pradesh State Assembly would be the sole law-making body for the entire State, and there would be one Governor who would be advised by a Council of Ministers responsible to the State Assembly for the entire field of administration "For the more convenient transaction of the business of government with regard to some specified matters," however, the Telengana area would be treated as a region The members of the State Assembly from Telengana (including Ministers, but excluding the Chief Minister) would constitute a Regional Standing Committee in the Assembly, to which legislation relating to specific matters would be referred. The Committee itself might also make proposals to the State Government for such legislation. [Unlike the scheme adopted for the Punjab, there will be no corresponding committee for the Andhra area of the new State]

The Committee would deal, *inter alia*, with the following subjects: development and economic planning within the framework of the general plans and policies formulated by the State Assembly; local government, public health and sanitation; primary and secondary education, prohibition; sale of agricultural land; cottage and small-scale industries, and agriculture, co-operative societies, and markets. While the Committee would have advisory functions, its advice would "normally be accepted by the Government and the State Legislature," and differences of opinion would be submitted to the Governor for final decision

It was also agreed that the entire revenue from Telengana should be spent on the development of that region, after meeting the proportionate common expenditure of the State, that, for a five-year period, Telengana should be regarded as a unit as far as recruitment to subordinate Government posts in the area was concerned, that, as far as possible, Government employees from the existing Hyderabad State should be automatically integrated into the Government services of Andhra Pradesh without screening, that if, however, any retrenchment should be found necessary later on, the entire personnel of the services of the enlarged State should be treated on an equal footing, and that Urdu should be retained as one of the official languages in the administration and law courts of Telegana for five years.

The Andhra and Telengana leaders differed on the name of the new State, the former preferring Andhra Pradesh and the latter Andhra Telengana This point was referred to the National Congress leadership for final decision, the name of Andhra Pradesh being eventually incorporated in the States Reorganization Bill.

Agitation in the Punjab.

An agitation against the proposed settlement in the Punjab was launched during June by the *Maha Punjab Samiti*, an organization advocating the integration of the Punjab, PEPSU, and Himachal Pradesh into a single State.

Following the rejection by Pandit Pant of this organization's demand for a round-table conference on the question, clashes between the police and demonstrators took place at Hoshiarpur (Punjab) during the night of June 13-14 and on June 17; during these disturbances 33 policemen and 29 Congressmen were injured by stone-throwing, 48 demonstrators wounded in *lathi* charges, and 69 arrests made.

Replying on July 6 to a letter from Captain Keshav Chandra, president of the *Maha Punjab Samiti*, Pandit Pant reaffirmed the Government's decision to implement the regional formula, but gave an assurance that the power of the Regional Committees to make proposals for legislation to the State Government would be confined to the subjects specified as coming within the scope of the Committee's powers.

Ministerial Changes in Indian States.

Recent governmental changes in a number of Indian States are summarized below:

Travancore-Cochin. The Government of Travancore-Cochin headed by Mr Govinda Menon resigned on March 11, after six members of the Legislative Assembly had resigned from the Congress Party as a protest against the proposed transfer of five Tamil-speaking districts to Madras. As a result of the six members' action the Government had been left in a minority in the Assembly, being supported by only 54 of the 118 members. President Prasad accordingly issued a proclamation on March 23 dissolving the State Assembly, and announcing that he had assumed all the powers of the State Government. A separate Order provided that the powers assumed by the President would be exercisable by the *Rajpramukh*, acting on the advice of an adviser appointed by the President.

Moving a resolution in the House of the People on March 29 approving the introduction of Presidential rule in Travancore-Cochin, Pandit Pant said that it would have been impossible for the Opposition parties to form a stable coalition Government, in view of the differences between them on the subject of States' reorganization The holding of immediate elections would also have been inadvisable, as it was hoped to form a new State on Oct 1, and new elections would therefore have to be held early in 1957 in any case. The resolution was carried by 100 votes to 25

The House of the People passed a Bill on May 28 empowering the President to make laws for Travancore-Cochin, and setting up a parliamentary committee which he might consult before enacting laws for the State.

Punjab. Following the resignation on Jan 15 of Mr Bhimsen Sachar, Chief Minister of the Punjab, Sardar Pratap Singh Kairon (Development Minister in Mr. Sachar's Cabinet) formed a Government on Jan. 23. The other members were Sardar Singh Bajwa, Pandit Mohanlal, and Professor Sher Singh, while two more Ministers—Sardar Gurbanta Singh and Mr. M C. Jain—were appointed on April 23. Mr. Sachar's resignation was the result of long-standing differences between his supporters inside the State Congress Party and those of Sardar Kairon, which had compelled the national Congress leadership to intervene

Sardar Kairon (a Sikh) put forward a nine-point programme on taking office which laid special emphasis on the promotion of communal harmony, the redress of the legitimate grievances of any section of the population, and the suppression of any attempts to sow dissension. He announced on Feb 28 that, in order to "remove all traces of bitterness and create a peaceful atmosphere in the State," all cases pending against Akali Sikhs in connexion with the Amritsar riots of July 4, 1955 (see 14412 C) would be withdrawn, as well as those against four Opposition members of the State Assembly (two Communists, an Akali, and an Independent) He also announced that Dr Kali Charan, leader of the Hindu "Greater Punjab Front," would be released from detention.

Madhya Bharat. Mr Takhatmal Jain was elected leader of the Madhya Bharat Assembly Congress Party on April 2, 1955, and succeeded Mr Gangwal as Chief Minister on April 16. Mr Jain, who first became Chief Minister in 1950, had lost his seat in the 1952 elections but was re-elected at a by-election in 1955

Madras. Following the resignation of Mr. Rajagopalachari as Chief Minister of Madras on April 8, 1954, Mr Kamaraj Nadar (who had been elected Leader of the Congress Party in the State Legislative Assembly on March 31) was appointed Chief Minister on April 13, 1954 The membership of his Ministry was as follows · Mr Kamaraj Nadar (Chief Minister, Public Affairs, Home and Police, Planning and Development); Mr A. B Shetty (Public Health, Co-operation, Housing, and Ex-Servicemen); Mr M. Bhaktavatsalam (Agriculture, Animal Husbandry, Women's Portfolio, Forests, Fisheries, Community Projects, Industries, and Labour); Mr. C Subramanian (Finance, Food, Education, Law Courts, and Prisons), Mr B. Parameswaran (Transport, *Harijan* Uplift, Hindu Religious Endowments, Registration, and Prohibition), the Raja of Ramnad (Public Works and Accommodation Control); Mr M A. Manickavalu (Land Revenue, Commercial Taxes, and Rural Development); and Mr S. S. Ramaswami Padayachi (Local Administration)

Gubernatorial Appointments.

Mr. Fazl Ali, a former Judge of the Supreme Court and chairman of the States Reorganization Commission, was appointed Governor of Assam on April 20, 1956, on the retirement of Mr. Jairamdas Daulatram. Mr. Bhimsen Sachar, the former Chief Minister of Punjab, was appointed Governor of Orissa at the beginning of August in succession to Mr. P. S. Kumaraswamy Raja, who had resigned because of ill-health.—(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London) **(Prev. rep. States Reorganization, 14866 A; Bombay, 15035 A; Travancore-Cochin, 14142 A; Punjab, 12173 A; State Governors, Madras, Madhya Bharat, 12081 A; 13387 C; 12209 A.)**

A. CANADA. — Increase in Bank Rate.

The Canadian bank rate was raised on Aug. 9 from 3 to 3½ per cent, the increase being the fifth in twelve months. (Financial Times) **(Prev. rep. Bank Rate, 14792 D.)**

A. CZECHOSLOVAKIA. — Government Changes. - M. Siroky on Internal and External Policy. - Offer of Non-Aggression Treaty to Western Germany. - Increased Autonomy for Slovakia. - Further Reduction in Armed Forces.

An extensive reshuffle of the Czechoslovak Government was approved by the Central Committee of the Czechoslovak Communist Party on June 15. The changes, which included the dismissal of the Procurator-General and the merger of several Ministries, were as follows:

(*a*) M. Vratislav Krutina, the Minister of Agriculture, was relieved of his ministerial post and appointed secretary of the party's Central Committee.

(*b*) The hitherto separate Ministries of Agriculture and of Forestry were merged into a new Ministry of Agriculture and Forestry under M. Michal Bakula, hitherto Minister of State Control.

(*c*) A new Ministry of Education and Culture was created under M. Frantisek Kahuda, hitherto Minister of Education, to replace the separate Ministries of Education and of Culture

(*d*) The Ministries of Food and of State Purchasing of Agricultural Products were amalgamated under M. Jindrich Uher, hitherto Minister of Food.

(*e*) M. Josef Kroshar, hitherto Minister of Forestry, was appointed Minister of State Control, succeeding M Bakula.

(*f*) The Ministry for Light Industry was replaced by a new Ministry of Consumer Goods under Mme. Bozena Machacova-Dostalova, hitherto Minister for State Purchasing of Agricultural Products

(*g*) M Emanuel Slechta, hitherto Minister of the Building Industry, was appointed Minister-Chairman of the State Committee for Construction, succeeding M Oldrich Beran

(*h*) M. Oldrich Beran succeeded M. Slechta as Minister of the Building Industry.

(*i*) M. Jan Bartuska became Prosecutor-General in succession to M Vaclav Ales, for whom no new appointment was announced

(*j*) M. Vaclav Skoda was relieved of his Deputy-Premiership and appointed Minister of Justice in succession to M. Bartuska

(*k*) No new appointment was announced for the outgoing Minister of Light Industry, M Alois Malek, whilst the outgoing Minister of Culture, M. Ladislav Stoll, was assigned to scientific work.

(*l*) M Julius Maurer, hitherto Minister without portfolio, was appointed permanent Czechoslovak representative on the Council of Mutual Economic Aid in Moscow.

Prime Minister's Review of Internal and External Policy.

The Czechoslovak National Assembly met from July 30-Aug. 1, the session being opened with a speech by M. Siroky, the Prime Minister.

M. Siroky began by surveying recent developments in the international sphere, including the decisions of the 20th Congress of the Soviet Communist Party and the relaxation of international tension. Dealing with the German question, he denounced West German rearmament, but added that the Czechoslovak Government, "in view of the existence of two German States," had declared its willingness to establish diplomatic relations with the German Federal Republic and to develop economic, cultural, and other relations with Western Germany on the basis of good-neighbourly relations It would also regard as "useful" the conclusion of a non-aggression treaty with Western Germany Acceptance of these proposals would promote the strengthening of peace and security in Central Europe and benefit both countries, but unfortunately the German Federal Government had not so far accepted these offers.

As regards relations with Yugoslavia, M. Siroky said that the past year had seen "a basic change" in the relations with that country, which had not only been normalized but had considerably expanded in all fields Economic, cultural, scientific, and technical co-operation had been developed, and Czechoslovakia would make "all possible efforts to strengthen and further extend the sincere fraternal co-operation between the Czechoslovak and Yugoslav peoples, both along State lines and through social organizations"

After referring to the "marked expansion of our friendly relations with India" and to the invitation extended to President Nasser of Egypt, M. Siroky expressed the conviction that Czechoslovakia's relations with France, Italy, the Scandinavian and Western European countries, Great Britain, and the U.S.A. could be improved "on the basis of common interests in the commercial, economic, cultural, and scientific spheres and as regards certain political questions" Without mentioning the kind of questions involved, he said that the Czechoslovak Government had made "considerable efforts at reaching a settlement of these issues with certain Western countries," but that such a settlement "depended on whether the representatives of those countries displayed equal good will" Czechoslovakia fully accepted the "five principles" which envisaged the possibility of peaceful co-existence and competition between socialism and capitalism.

After denouncing certain statements by U.S. leaders, especially Mr. Dulles, as "gross interference in our domestic affairs," M Siroky declared that "the people of Czechoslovakia would not let themselves be turned back from their road to Socialism by anyone or anything," and rejected attempts by "bourgeois ideologists in the West who, by speaking about some form of liberalization of life in Czechoslovakia, intend to open the door to reactionary forces and ideologies." He added: "We shall continue the process of developing and advancing the principles of Socialist democracy in our public life, but we do not intend to clear the way for the enemies of Socialism . . ."

Turning to the country's internal economic development, M Siroky spoke of Czechoslovakia's Second Five-Year Plan, stressing that the first priority would be given to the development of heavy industry and the accelerated expansion of the fuel, power, and raw material bases. The Government were also devoting much attention to the further development of the engineering industry, and giving high priority to the development of agricultural production, which was "lagging behind." The basic condition for success in this sphere was the further development of co-operative farming [i e , collectivization] so that in the course of the Second Five-Year Plan the Socialist sector would gain "a decisive preponderance"

The Government were also pursuing a policy of gradually reducing working hours with the aim of introducing a 46-hour week as from Oct 1, 1956, without any reduction in wages. A revision of the present wages system, which was "not perfect," could, however, only be brought about "after the productivity of labour has been increased, production costs reduced, and the necessary pre-requisites in production created."

Finally, M Siroky spoke about the proposed decentralization of governmental functions in Slovakia to improve the work of the State and economic machinery (see below).

Extended Powers for Slovak National Council.

On Aug. 1 the Czechoslovak National Assembly passed a Constitutional Revision Bill enlarging the powers of the Slovak National Council.

The Bill empowered the Slovak National Council (*a*) to appoint or dismiss the Slovak Board of Commissioners (the governmental and executive organ in Slovakia) and any of its members—which had hitherto been a matter for the Czechoslovak Government, (*b*) to approve the economic plan and the Budget for Slovakia within the framework of the national plan and Budget All those Articles in the Constitution which made the Slovak Board of Commissioners responsible to the Czechoslovak Government were abolished The Bill also improved the status of the Hungarian and Ukrainian minorities in Slovakia as far as their economic and cultural development was concerned

Further Reduction in Armed Forces.

It was announced in Prague on July 25 that the Government had decided to reduce the strength of the Czechoslovak Army by another 10,000 men, following the earlier cut by 34,000 which had been announced on Aug. 24, 1955. It was stated that this decision had been taken because there had been a "noticeable relaxation of tension in international relations." (Czechoslovak Bulletin, Prague - Neue Zurcher Zeitung)

(Prev. rep. Cabinet, 14817 A; Armed Forces, 14384 D.)

B. UNITED KINGDOM. — Trade Unions. - Formation of Anti-Communist Movement in Electrical Trades Union. - Area Vigilance Committees.

A movement to counteract Communist influence in the Electrical Trades Union was launched on Aug. 11 by a "vigilance committee" led by Mr. Ernest Pinner, a shop steward, who announced that area vigilance committees would be formed and that it was hoped to have at least one supporter in every E.T.U. branch.

Mr Pinner said that the new committee would attempt to weaken the Communist "stranglehold" on the union; that it would inquire into the "dictatorial" attitude of shop stewards in determining strike action without consulting members, that it would inquire into the advisability of holding a ballot of all members before strike action was decided upon; that it would encourage all trade unionists to take a keen interest in trade union affairs, and in particular to attend branch meetings; and that it would ensure that union finances were used solely for the benefit of members and not in furtherance of foreign political objectives The last-mentioned statement referred to the recent action of the E.T.U. executive in donating £20 to help pay for legal aid for Cypriot trade union officials and mayors who had been detained under the emergency regulations.

The Labour Correspondent of *The Times* pointed out that the E.T.U. had been "almost wholly under Communist domination" since 1948, and added: "The three chief officers and a majority on the executive are Communist Party members, and in many areas they exercise detailed control down to branch level." (Times - Manchester Guardian)

C. SOUTHERN RHODESIA.—Three-year Extension of Subversive Activities Act.

The Subversive Activities Act, which provides *inter alia* for "the prohibition and suppression of subversive propaganda whether called by the name of Communism, Fascism, or otherwise," was extended by the Southern Rhodesian Parliament on Aug. 1 for a further three-year period. The Minister of Justice (Mr. Stumbles) thought that it would not be appropriate at the present time to relax the Act, which it was "as well to have on the statute book," though Parliament could repeal the legislation within the next couple of years if it wished. The Act would have expired automatically had it not been renewed. (Federal Information Department)

A. THE SUEZ CRISIS. — Opening of London Conference. - Invitations refused by Egypt and Greece. - Soviet and Egyptian Proposals for Larger Conference. - Statement by President Nasser. - Broadcasts by Mr. Selwyn Lloyd and Mr. Menzies.

The London Conference on the Suez Canal opened at Lancaster House on Aug. 16, only two of the invited countries having refused to accept the invitations—Egypt and Greece.

The Egyptian Government's reasons for declining to attend the conference were given by President Nasser in a press statement on Aug. 12 (see below). The Greek Government refused the invitation on the grounds (1) of "the conditions in which the London conference was called," and (2) of "the special circumstances in which Greece finds herself at present" It was explained in Athens that the first objection was based upon the fact that the conference had been summoned without prior consultation with Egypt, "the main interested Power," and that it had been convened in an atmosphere of "war tension and pressure"—an apparent reference to the Anglo-French naval and military precautions in the Mediterranean area The second objection was understood to refer to the Greek dispute with Britain on the Cyprus question. It was stated by Government spokesmen in Athens that the Greek Government had proposed that the conference should be postponed to a later date, that it should be held elsewhere than in London, and that its membership should be enlarged

Opening of London Conference.

The heads of the 22 delegations attending the London conference consisted mostly of the Foreign Ministers of the various countries, several of whom—e.g. the American, French and Soviet Foreign Ministers—were accompanied by strong delegations of officials and experts. The leaders of the national delegations were as set out below, in alphabetical order of countries ·

Australia—Mr. Menzies, the Prime Minister, accompanied by Mr. Casey, Secretary for External Affairs; **Ceylon**—Sir Claude Corea, High Commissioner in London, **Denmark**—Hr H C Hansen, Prime Minister and Foreign Minister; **Ethiopia**—Mr. Aklilou Habtewold, Foreign Minister; **France**—M Pineau, Foreign Minister; **German Federal Republic**—Herr von Brentano, Foreign Minister, **India**—Mr. Krishna Menon, Minister without portfolio; **Indonesia**—Mr. Abdulgani, Foreign Minister; **Italy**—Dr Martino, Foreign Minister; **Japan**—Mr Shigemitsu, Foreign Minister, **Netherlands**—Mr. Luns, co-Foreign Minister; **New Zealand**—Mr. Macdonald, Secretary for External Affairs, **Norway**—Hr Lange, Foreign Minister, **Pakistan**—Mr Hamidul Huq Chowdhry, Foreign Minister, **Persia**—Dr. Ardalan, Foreign Minister, **Portugal**—Dr Cunha, Foreign Minister; **Soviet Union**—Mr Shepilov, Foreign Minister; **Spain**—Señor Artajo, Foreign Minister, **Sweden**—Hr Undén, Foreign Minister, **Turkey**—Mr Birgi, Secretary-General of the Foreign Ministry; **United Kingdom**—Mr Selwyn Lloyd, Foreign Secretary; **United States**—Mr. Dulles, Secretary of State

The British Prime Minister, Sir Anthony Eden, welcomed the delegates in a brief speech in which he described the occasion for calling the conference as "among the gravest that any of us have had to face since the Second World War." After Sir Anthony had withdrawn, the delegates reached rapid agreement on procedural matters and agreed that Mr. Selwyn Lloyd should preside as chairman for the duration of the conference.

Developments in the Suez crisis up to the opening of the conference are described below under cross-headings, in continuation of 15013 A:

Soviet Acceptance of Invitation. - Support for Egyptian Nationalization of Suez Canal.

Though accepting the invitation to the London conference, the Soviet Government made a number of reservations with regard to its attitude, and at the same time put forward a number of counter-proposals. Notably, the Soviet statement made the following points · (1) the London conference could not be regarded as an international meeting authorized to take any decisions on the Suez Canal; (2) Soviet participation in the conference would not commit the U.S.S.R. to any of the "obligations" set out in the Western Powers' Note, or any which might infringe Egypt's right to nationalize the Canal; (3) invitations should have been extended to 22 more nations, including the East European States, the Arab States, and the People's Republic of China; (4) the conference should have been postponed until the end of August so that better arrangements could have been made.

The text of the Soviet Note was issued by the Tass Agency on Aug. 9 and is summarized below:

The Soviet Government declared that it could not agree "with the assessment made in the statement of the three Powers [i.e. Britain, France, and the U S.A.] on the Suez Canal," nor could it agree with the Western Powers' "attempt to place in doubt the legality of the act of nationalization of the Suez Canal Company taken by the Egyptian Government." After denying that the Suez Canal Company was "an international institution the status of which cannot be changed by the Egyptian Government," and asserting that the nationalization of the Company "has no bearing on the question of freedom of navigation on the Canal, which is regulated by the Convention of 1888," the Note continued: "The nationalization of the property of enterprises situated in the territory of any country is, according to accepted principles of international law, an internal business of the State concerned . . The U.N. General Assembly, in December 1952, passed a special resolution on the rights of peoples to dispose freely of their natural wealth and resources . . . In view of this, the Soviet Government considers the decision of the Egyptian Government to nationalize the Suez Canal Company as a fully legal act stemming from the sovereign rights enjoyed by Egypt."

The Soviet Note said that the nationalization of the Suez Canal would in no way affect freedom of navigation on the Canal, which was guaranteed under the 1888 Convention As Egypt had pledged herself to respect that convention and to guarantee freedom of shipping, there was "no reason to express any concern in that respect, the more so as Egypt . . . is able to ensure normal navigation on the Canal in a manner not inferior to any private company" After pointing out that the nationalization of the Suez Canal Company had had "no effect on the uninterrupted passage of ships of all countries through the Canal, which continues to function as it had functioned before nationalization," the Soviet Note added. "It can be seen from this that the Egyptian Government fully realizes the great importance of freedom of navigation on the Suez Canal, and that the anxiety on this matter expressed in the three-Power statement is unfounded."

After pointing out that the Egyptian Government had undertaken to pay compensation to the Company's shareholders, the Soviet Note continued "The fact that the Suez Canal has for decades remained in hands other than Egyptian—in the hands of a company in which British and French capital predominated, and which used the Canal for its enrichment and interference in the internal affairs of Egypt—cannot serve as a foundation for the preservation of such an abnormal situation in the future One must take account of the fact that relations created in the past through conquest and occupation . do not conform to the principles of co-operation between sovereign and equal States, that is, to the principles and aims of the United Nations. Since the Governments of Britain and France, as well as of the United States, recognize the high principles of the U N., and state that they welcome the changes which have taken place in their relations with countries which were formerly in a state of colonial dependence, the Governments of these Powers should not hinder the realization by these States of their sovereign rights"

Continuing, the Note said that the Soviet Government could "not remain indifferent to the fact that at the present time an even more acute situation is being created in the region of the Near and Middle East" It went on to accuse Britain and France of "crude and unjustified pressure against Egypt" by "inadmissible measures" such as economic reprisals and naval and military movements, thereby creating "a threat to the maintenance of peace and security" which was "incompatible with the principles of the United Nations." These "attempts to use force against a State exercising its sovereign rights" could cause "the most serious damage, primarily to the Western Powers themselves in the area of the Near and Middle East," and would "by no means help in decreasing international tension and consolidating trust among nations"

Reverting to the invitation to participate in the London conference, the Soviet Note continued. "Britain and France declare that the aim of the conference is to work out measures to assure the functioning of the Canal in conformity with the 1888 Convention. Such an arrangement does not appear clear, the more so as . . . the Convention remains intact and is fully respected. If, however, the conference aims at a revision of the nationalization of the Suez Canal Company, this would be an open case of interference in the internal affairs of Egypt, whose rights as a sovereign State to nationalize the Company cannot be disputed by any international conference whatsoever . . ." Moreover, the three Western Powers had convened the conference "without consultation with the Soviet Union and other signatories of the 1888 Convention."

The Soviet Note went on to complain (1) that "the choice of countries invited to the conference has been tendentiously made, with a view to securing a majority of its participants to support the proposals prepared by Britain and France", and (2) that the list of countries invited did not conform to the principles set out in the tripartite statement—i e. countries which were signatories to the 1888 Convention, and those "primarily interested in the use of the Canal." The Note continued.

"Among the signatories of the 1888 Convention were Austria-Hungary and Germany. Austria, Hungary, Czechoslovakia, and Yugoslavia are the legal heirs of Austria-Hungary, none of these countries has been invited to the conference From Germany only one part of the country has been invited—the German Federal Republic—but not the other part, the German Democratic Republic . There have not been invited to the conference the Arab States whose territories are directly adjacent to the Canal and which are vitally interested in the settlement of this question—namely, Syria, Lebanon, Saudi Arabia, Jordan, Sudan, Libya, Yemen, Iraq, Tunisia, and Morocco. The majority of the Arab States are the successors of the former Ottoman Empire, which was a party to the 1888 Convention. Nor have there been invited to the conference such maritime Powers making extensive use of the Canal as the Chinese People's Republic, Poland, Bulgaria, Rumania, Burma, and Finland.

"Thus the projected London conference is a conference of a group of countries which are shareholders of the Suez Canal Company, with another group arbitrarily chosen by these shareholders The conference has been called in a manner by-passing the United Nations . . . Without the agreement of the parties to the 1888 Convention, London has been chosen as the venue of the conference, although, if one adheres to the spirit of the 1888 Convention, the discussion of all issues linked with the operation of the Canal should take place in Cairo." For all these reasons, the Soviet Government considered that the London conference " cannot . . . be regarded as an international conference authorized to take any kind of decisions on the Suez Canal.

" The Soviet Government regards it as most appropriate to discuss the problems connected with freedom of navigation on canals and straits of international importance within the framework of the United Nations There are a number of canals and straits which are of international importance. As the tripartite statement raised the problem of internationalization of the Suez Canal, the question logically arises . Why is the Suez Canal singled out from a number of no less important straits and canals ? In this matter the Soviet Government proceeds from the principle that any solution of the problem of canals and straits possessing international importance must be based on the necessity of respecting the sovereign rights of the States through whose territory these sea-lanes pass "

The Soviet Government went on to propose that the following countries should be invited to the London conference, in addition to those to whom invitations had been sent · Austria, Albania, Bulgaria, Burma, Czechoslovakia, Finland, the German Democratic Republic (Eastern Germany), Hungary, Iraq, Jordan, Lebanon, Morocco, Poland, Rumania, Saudi Arabia, Sudan, Syria, Tunisia, and Yugoslavia It was also " essential that such a great Power as the Chinese People's Republic should take part in the conference "

Despite the above-mentioned objections, the Soviet Government expressed its willingness to attend the London conference, as it desired " a peaceful solution of questions " and as the conference might " provide an opportunity . for an approach to the settlement of questions connected with the freedom of navigation on the Suez Canal which . . may be acceptable to the Egyptian State as well as to other countries concerned " In accepting the British invitation, the Soviet Government emphasized that it considered itself in no way bound by the " principles or obligations " set forth in the tripartite statement, or which might " infringe the sovereign rights and dignity of Egypt." The Soviet Note also expressed the view that it might have been better to convene the conference at the end of August so as to give more time for preparatory work

In conclusion, the Soviet Note expressed its conviction that the issues in dispute " can and should be settled by peaceful means in accordance with the rights and legitimate interests of the peoples," and its hope that other Governments would show " wisdom and far-sightedness " and " refrain from such actions as could bring undesirable consequences."

Egyptian Rejection of Invitation. - Statement by President Nasser.

As stated above, the Egyptian Government rejected the invitation to attend the London conference, for reasons explained by President Nasser at a press conference on Aug. 12.

In his statement, which was broadcast by Cairo Radio, President Nasser said that the Egyptian Government could not agree with the assertion in the tripartite declaration that the Suez Canal Company had always had an international status Paragraph 16 of the Suez Canal Company agreement of 1866 laid down that the Company was an Egyptian *société anonyme* (limited company) with a 99-year concession, and that it was subject to the laws and customs of Egypt. This view had been recognized by the British Government and defended in 1939 before the Mixed Court of Cassation in Alexandria, when the British representatives had described the Suez Canal Company as a legal body recognized by, and definitely subject to, Egyptian law

" It is true," President Nasser continued, " that the Company was established under the name of the Universal Suez Maritime Company. But what is the legal effect of this title ? The fact remains that this name cannot deprive the Company of its Egyptian character, as it is Egyptian according to the principles of Egyptian law, the principles of international law, and the foundation charter of the Company . . . It cannot at the same time be Egyptian and non-Egyptian, or an Egyptian and an international company . . "

As regards the status of the Suez Canal, President Nasser declared : " The Egyptian Government regrets to say that the statement of the Foreign Ministers of the three [Western] Powers distorts the facts and gives a picture far removed from reality by alleging that the Canal has an international status. The preamble to the 1888 Convention . . says that the Canal shall be open and free, whether in peace or war, to every commercial ship or warship irrespective of its nationality In paragraph 16 of the 1888 Convention it is clearly stated that none of the obligations in the agreement in any way affects the sovereign rights of the Egyptian Government. Paragraph 14 shows clearly that there is no relation whatsoever between the 1888 agreement and the Suez Canal Company, as the obligations arising from the agreement are not bound by the period for which the concession to the Company was granted. This would have expired in 12 years and the Egyptian Government would have taken the place of the Company's administration."

President Nasser went on to give a point-by-point reply to the tripartite statement, which he accused of having " mentioned some facts and omitted others which prove our right." " Paragraph (1) of the statement," he declared, " said that Egypt, by her agreement with Britain in 1954, admitted that the Suez Canal is a waterway of international importance from the economic, commercial and strategic points of view. But the statement omitted the fact that the 1954 agreement says clearly that the Canal is an integral part of Egypt In paragraph (2) the three Governments recognize the right of Egypt, as an independent sovereign State, to nationalize its property, but deny her the right to nationalize the Suez Canal Company They allege that it was a unilateral confiscation by one State of an international agency responsible for the administration and maintenance of the Canal . . This ignores all the treaties and agreements which say that the Suez Canal Company is an Egyptian company governed by Egyptian law. It ignores also the fact that the Egyptian Government would have taken over the administration of the Canal when the Company's concession expired, and the fact that the Canal is an inseparable part of our territory. The agreement of 1888 will still be in existence whether the Company or the Egyptian Government administers the Canal . The nationalization of the Company is a decision taken in accordance with the Egyptian Government's sovereignty, and any attempt to give the Suez Canal Company international status is merely an excuse to interfere in Egypt's internal affairs "

With regard to paragraph (4) of the tripartite statement, which said that " steps should be taken to establish operating arrangements under an international system designed to assure the continuity of operation of the Canal," President Nasser commented as follows . " This statement is clearly aimed at depriving Egypt of her sovereignty over the Suez Canal, which is an inseparable part of Egypt . . The Egyptian Government regards the establishment of an international body as nothing but a polite form of what might be called international colonialism . . The statement shows that the object of the London conference is open interference in Egypt's internal affairs . . "

President Nasser continued " The three-Power statement was followed by a large-scale international conspiracy to starve and terrorize the Egyptian people. The three Powers immediately froze Egyptian assets and funds in their banks . . . Britain and France mobilized their reserves and officially announced that their troops and fleets were on the move The Egyptian Government strongly deplores these measures, and regards them as a threat to the Egyptian people to make them surrender part of their territory and sovereignty to an international body, which in fact is international colonialism By adopting these measures, the British and French Governments are threatening world peace and order contrary to the U.N Charter, which they are pledged to respect These measures . . . are deplored not by Egypt alone but by all free peoples and those who are struggling for independence and sovereignty after having rid themselves of colonial rule."

After reiterating that Egypt was determined to maintain full freedom of navigation on the Suez Canal, and pointing out that 766 ships had passed through the Canal in the fortnight since nationalization, President Nasser expressed surprise that the British Government had decided to convene a conference on the Suez Canal without prior consultation with the Egyptian Government. Moreover, it was proposed that the London conference should be confined to only 24 States, although the British Government was " fully aware that 45 countries used the Canal in 1955 " " Therefore," President Nasser declared, " the Egyptian Government is convinced that this conference and the circumstances in which it was convened cannot be regarded in any way as international, and that it is not entitled to take decisions. The conference has no right to discuss any issue concerning the sovereignty of Egypt or of any part of Egypt, and the invitation therefore cannot be accepted by Egypt."

In conclusion, President Nasser said that Egypt believed it was " essential to do everything in her power to ensure world peace and respect for her obligations in accordance with the U.N. Charter and the resolutions of the Bandung Conference, which recommended that all international problems should be solved by peaceful means." The Egyptian Government was therefore ready to attend a conference representing the signatories of the Treaty of Constantinople (the 1888 Convention) and other countries whose ships used the Canal, " to reconsider the Constantinople agreement and reach an agreement confirming and guaranteeing freedom of navigation through the Suez Canal " President Nasser suggested that such an agreement should be registered with the United Nations and should be open to the adherence of all countries if they wished.

Despite Egypt's refusal to attend the London conference, Wing-Commander Sabry (head of President Nasser's Political Office) arrived in London on Aug. 17, apparently to hold a " watching brief " for President Nasser and the Egyptian Government. He had several meetings on subsequent days with Mr. Shepilov and Mr. Krishna Menon. Major Salah Salem, the former Minister of National Guidance, also arrived in London on Aug. 18 to cover the conference for the Cairo newspaper *Al Shaab*, of which he is editor.

On arrival at London Airport, Major Salem declared that the Egyptian Government and people would not accept internationalization of the Suez Canal, and added that the Canal would be " blown up " if British troops landed in Egypt. On Aug. 15 Major Salem gave a recorded interview to the B.B.C. in which he said that the London conference had " lost its value as a means of solving the Suez situation because it has overlooked the U.N. as the recognized body to deal with international situations." He expressed his conviction that a conference under U.N. auspices, or one such as had been proposed by President Nasser, could produce a solution which would " simultaneously guarantee freedom of navigation to all maritime nations, as well as preserve the sovereign rights of Egypt over her territory."

Developments in Britain. - Mr. Selwyn Lloyd's Broadcast. - Mr. Gaitskell's Meeting with Prime Minister.

In a broadcast on Aug. 14, Mr. Selwyn Lloyd described the Suez situation as the third and most serious international crisis since the war, the other two being the Berlin blockade of 1948 and the Korean aggression of 1950. He denounced President Nasser's unilateral seizure of the Suez Canal as an "act of aggression," declared that "law must prevail," but emphasized that Britain was not bellicose and that force was "always the last resort." Any solution, however, "must include some form of international control for this essential waterway." The Foreign Secretary spoke as follows:

"... It is a very serious situation I do not want to sound alarmist, but a threat to the Suez Canal is a threat to the life and strength of Britain and of Western Europe on the one side, and to the countries of Asia on the other. It also deeply affects America. We in Britain know that Colonel Nasser's action is a breach of international law...

"The Suez Canal Company is not just an Egyptian company It is, it is true, technically registered in Egypt, but in a matter of this sort we have to look at the substance, not the technicalities. The substance of the matter is that the company is international. It was formed for an international purpose It is internationally owned. Its administration is centred outside Egypt. The Egyptian Government has always before accepted the position that Egyptian domestic law only applies by consent to the constitution and powers of the company. A company possessing such an international character cannot lawfully be nationalized in the way in which that has been done Further, a contract with such a company cannot be broken by one party to it.

"This company held a concession from the Egyptian Government. At the end of this, in 1968, the Canal itself and some, not all, of the company's assets would have reverted to Egypt. That concession was solemnly reaffirmed by Colonel Nasser as recently as June of this year [see below]. His action, therefore, in seizing the Canal is a breach of the terms of the concession and involves the breaking of his word.

"I am not denying the right of countries to nationalize domestic industries or services. Provided there is no illegality about it, countries can nationalize what they please, but this act of nationalization is unlawful for the reason I have stated. It strikes at the rule of law between nations.

"Faced with this situation, H M Government's policy has been clear from the beginning As the Prime Minister said in the House of Commons on July 30, the unfettered control by one Power of this international waterway cannot be accepted. From the first the Government have sought an international solution, arrived at by international discussion On July 29, when I first met the representatives of the French and U.S Governments, I put to them our view that there should be an international conference to deal with this matter. The other two Governments readily agreed.

"At the Conference proposals will be put forward that an international authority for the Canal should be set up. The purposes and functions of that authority should be·

(1) To take over the operation of the Canal.

(2) To ensure the efficient functioning of the Canal as a free, open and secure international waterway.

(3) To ensure to Egypt an equitable return

(4) To arrange for the payment of fair compensation to the Suez Canal Company.

"In our view the authority should consist of a Council of Administration drawn from those Powers chiefly interested in the Canal. It should have under it the necessary technical, working and administrative organs. In all this there would be an important role to be played by Egyptians and the Egyptian Government

"These proposals were discussed by me with Mr Dulles and M. Pineau There is no disagreement between the three of us about them They were sent to all the Governments invited to the Conference. I believe that this idea of an international authority to control an international waterway is in the true interests of all those concerned and commands the approval of an overwhelming majority of thinking people.

"It is interesting to remember that in 1946 the Soviet Union declared themselves in favour of the principle of international control of the Suez Canal The idea that, just because the Canal passes through Egyptian territory, such an international authority would infringe Egyptian sovereignty bears no relation to modern ideas of what sovereignty really is

"The primary task of the Conference will be to express its opinion upon our proposals. We regret very much that Colonel Nasser is not sending a representative who could have put forward his point of view. We made it clear that acceptance of the invitation did not presuppose acceptance of our main contention. I hope that even yet the Egyptian Government may see fit to enter into an agreement along the lines I have indicated.

"You may ask, how did we decide upon the countries to be invited to the London Conference? It was not easy to draw the line. Eventually we decided to ask the eight parties to the 1888 Convention, together with eight more countries owning the largest tonnage of shipping which goes through the Canal, and a further eight countries whose pattern of trade is most vitally affected by transit through the Canal. The list includes Egypt, the Soviet Union, and other countries whose views probably are not the same as our own

"We have acted and intend to act in the spirit of the Charter of the United Nations. The method by which we have chosen to proceed is directly in accordance with the Charter. It has always been in our thoughts that there should be some link between the International Authority which we propose and the United Nations. It has also been our intention to give Parliament an early chance to discuss the results of the Conference

"The allegation has been made that the Conference is being held under the threat by us to use force. As to that, I ask you to consider the methods by which Colonel Nasser chose to carry out his unlawful act. He announced it at the end of an angry speech directed against the Western Powers, and made in a fit of temper because he was not to get from the United States and ourselves the money which he wanted to build the Aswan Dam. He took action without previous consultation of any sort with the Company itself. He did not consult other parties to the Convention of 1888 He did not consult any of the Arab States He treated them like satellites. He promised to pay compensation to the shareholders, but he did not indicate whence it would come He said he would divert the revenues of the Canal to build the Aswan Dam Finally, he included in his decree of nationalization an article ordering the employees of the Company, many of them British, to stay at work under the threat of arrest and imprisonment if they did not. Troops were moved in to seize the property of the Canal Company. He had already mobilized about 75 per cent of his armed forces. He has gone further since. That is what he has done by way of force and threat of force.

"We have 13,000 British nationals in Egypt. We have a base operated by British civilians containing valuable equipment Many of our ships use the Canal. In these conditions we should be lacking in our duty if we did not take elementary military precautions to safeguard British interests effectively should the need arise That, of course, means having some forces available in the Mediterranean. These military precautions are not inconsistent with the U N. Charter.

"We have to remember that the present ruler of Egypt is a military dictator. He played a leading part in overthrowing the Egyptian monarchy by a military coup. He removed his own leader, General Neguib, by similar methods He now rules supreme. He can change his mind overnight. He can denounce an international agreement or imprison a British subject according to his mood of the moment. He maintains himself in power by methods well known to us from what happened in certain countries in the inter-war years.

"We have tried hard to promote better relations with him. He said that if only we could settle the Sudan problem, that would lead to better relations We made an arrangement by which Egypt abandoned her claim to the sovereignty of the Sudan and the way was open to Sudanese independence. But our relations with Egypt did not improve. Colonel Nasser then said if only we could settle the problem of the base, that would lead to better relations We did settle the problem of the base, but the better relations did not come

"Now he has committed this act—not only unlawful, but also an act of defiance, a deliberate challenge made without regard to the interests of his fellow Arab States or of the under-developed countries The great need of such countries at the present time is foreign capital. It is obvious that the blow to confidence administered by Colonel Nasser will make it more difficult for under-developed countries to obtain such capital. His action, whatever the outcome of our conference, will damage the material prospects of countless millions in poorer countries

"We have in our time done much to create and help Arab nationalism Our record in Iraq, Jordan, the Sudan, and Libya proves that fact. Colonel Nasser is misusing Arab nationalism to further his own ambitions I read the other day a little book which he wrote about his revolution Like other dictators before him, he reveals on paper the pattern of his thoughts and ambitions. The three stages are clear: (1) control of the Arab States and the oil; (2) control of the whole of Africa, (3) control of all Moslems throughout the world. Running through the book is the theme: 'Who is the hero who will achieve all this?' I think we can guess Colonel Nasser's answer... These thoughts, these actions, are all too similar to what we saw happen between the wars with other dictators.

"I believe there have been three critical times for us in the past 10 years. First there was the threat to Berlin in 1948, which was defeated by the Berlin air lift Secondly, there was the Communist aggression in Korea in 1950. That was repelled by force of arms. The third threat, and in my view the most serious for all of us in Britain, is this act of aggression against this great international waterway The strength and prosperity of much of the world depends upon it. But for us it is a question of our national livelihood, jobs, standard of living, and position in the world. It is a deliberate challenge. All our friends in the Middle East are watching to see how we meet it. Although having made his coup, Colonel Nasser's language is now milder and he makes all sorts of promises about how well he is going to behave in the future That again is according to the pattern I believe we have to take counsel from our past experience If he is not checked now, what will his next step be?

"We have to be resolute in this situation. We must not permit the right of free passage through the Canal to depend upon the transient impulses of a single military dictator Therefore I say to you: the rule of law must prevail. We are not bellicose, neither the British Government nor the British people With Britain force is always the last resort. We shall work with all our power for a peaceful solution, but that solution must include some form of international control for

this essential waterway We are not seeking British control ; we are seeking international control. We want a plan which will take full account of the legitimate requirements of Egypt. We want to preserve the rights of the users of the Canal To achieve such a solution is the task which faces the collective wisdom of the statesmen gathering in London."

The following statement was issued by the Parliamentary Committee of the Labour Party (the Labour "shadow Cabinet") after a 2½-hour meeting on Aug. 13 :

"The Committee endorsed the speech of the Leader of the party in the House of Commons debate on Aug 2 [see 15013 A] and, in particular, the following points :

(1) His condemnation of Colonel Nasser's action, not because the act of nationalization in itself was wrong but because of the arbitrary character of that action and the grave anxieties thereby created regarding the utilization of a vitally important international waterway and the political repercussions in the Middle East

(2) That armed force, nevertheless, could not be justified except in accordance with our obligations and pledges under the U N Charter

(3) That, apart from the continued stopping of Israeli ships in disregard of the Security Council resolution of 1951, Colonel Nasser had not done anything so far which justified the use of armed force against Egypt

"In view of public anxiety, the Committee call upon the Government to make plain that the military measures taken in the last 10 days are purely precautionary, solely intended for defence against possible aggression, and not preparations for armed intervention outside and inconsistent with our obligations under the U N Charter

"The Committee consider that the prime purpose of the international conference now assembling in London should be to prepare a plan which would guarantee :

(1) The efficient operation and development of the Canal,

(2) A fair and reasonable financial return to Egypt,

(3) No interference with the right of free passage,

(4) No arbitrary raising of dues,

(5) No discrimination amongst those using the Canal.

"To this end any such plan should, as suggested by Mr Gaitskell on Aug 2, be associated with the United Nations The Committee urge that the conclusions of the conference should be submitted to a special meeting of the U.N. General Assembly

"The Committee invited the Leader of the party to request the Government to arrange for the recall of Parliament immediately after the conclusion of the London Conference"

Mr. Gaitskell, accompanied by Mr. James Griffiths (Deputy Leader of the Opposition) and Mr Alfred Robens (the Labour Party's chief spokesman on foreign affairs in the House of Commons), saw Sir Anthony Eden at 10, Downing Street, on Aug. 14. An official statement said that the Prime Minister had given an assurance that he would "bear in mind" the views expressed by Mr. Gaitskell and his colleagues. Mr. Gaitskell said after the meeting that "the Prime Minister seemed to be broadly in agreement with our view and to appreciate the importance of the recall of Parliament after the London conference, although no definite answer was given to our request."

Broadcast by Prime Minister of Australia. - Support for Tripartite Statement.

The Prime Minister of Australia, Mr. Robert Menzies, broadcast on the Suez Canal crisis from London on Aug. 13. Mr. Menzies, who had recently been visiting the United States, spoke as follows :

"Colonel Nasser's action . . . has created a crisis more grave than any since the Second World War. The leading trading nations of the world are all vitally concerned. You in Great Britain are concerned, for a threat to the Suez Canal will, if not resisted, encourage other acts of lawlessness and so reduce the economic strength of your country that the whole standard of living may be drastically reduced. This comment excludes the effect upon Britain's prestige and authority in the world. It is apparently not fashionable to speak of prestige . . .

"I have been interested to observe, both in the U.S.A. and London, a disposition in some private quarters to find legal virtues in what Nasser has done, and to accuse national leaders either of trying to deny Egypt its so-called legal right to nationalize the Suez Canal, or of prematurely dealing with a risk of stoppage which may never arise . . . I would like to discuss, very briefly, the arguments of those who honestly find themselves beset by intellectual doubts . .

"The Canal was not built by Egypt. It was the product of the vision and engineering genius of a Frenchman, De Lesseps, and the financial resources of a company whose shareholding was and is (subject to Nasser's recent action) international. The then Government of Egypt granted to the Company a concession, on stipulated terms, not due to expire until 1968. The Suez Canal Convention of 1888, by which Egypt is bound, contained an express recital that it was desired to establish 'a definite system destined to guarantee at all times and for all Powers the full use of the Suez Maritime Canal' The validity of the Convention and of the concession granted to the Company has never been challenged by Egypt On the contrary, the Convention was expressly upheld by the Anglo-Egyptian Treaty of 1954, while as recently as June of this year the Egyptian Government, in its last financial agreement with the Company, acknowledged the duration and international character of the concession and of the system under which the Canal was run Yet on July 26, 1956, less than two months later, Nasser signed a law purporting to nationalize the Canal Company. But 'nationalization' is only a political term. What he did, expressed precisely, was to repudiate Egypt's contractual obligations under the Concession, without consultation and without agreement

"International law is not a precise body of jurisprudence It is always in the making But if there is one thing clear, it is that national contracts with the Governments or citizens of other nations must be carried out unless there is legal excuse for the non-performance. If this were not so, all talk of international law would become meaningless on the very threshold Nasser has therefore begun by violating the first principle of international law For people to conceal or excuse this violation by talking about the general power of Governments to expropriate property within their own boundaries is, therefore, both irrelevant and absurd If, at any time and for any reason of real or supposed self-interest, a nation could claim that its sovereign rights entitled it to set treaties aside or violate international contracts, all talk of, or reliance upon, international law would be a sham

"Let us take an important example. The Panama Canal was constructed by the U S A on land belonging to the Republic of Panama, a perpetual lease of land being granted to the U S A for that purpose If Nasser can validly terminate, 12 years ahead of time, a concession granted to the internationally-owned Suez Canal Company because, forsooth, he claims an unfettered right to 'nationalize' as part of Egyptian sovereignty, then Panama, equally sovereign, could validly terminate its perpetual lease to the U.S A., take over the Panama Canal, and collect the dues It is little wonder that the American Administration regards the Nasser action with such gravity . .

"Let me point out to what strange conclusions this uncritical acceptance of the so-called right to nationalize will lead First, it is common ground in France, the U.K , the U S.A., and other nations, including my own, that the forthcoming conference should aim at some new international arrangement ensuring the continued use of the Suez Canal as an international waterway. Let us suppose that such an arrangement is made and agreed to, and that, under conditions which fully recognize Egyptian sovereignty and protect Egypt's legitimate financial interests, a joint authority is set up, under long or perpetual lease, to conduct and stabilize the use of the Canal and its facilities And then suppose that at some future date the Egyptian Government says : 'We denounce this agreement We nationalize the operation of the Canal' Will we once more be told that Egypt is legally correct, and that no international agreement can stand in the way of her sovereign rights ? If such nonsense is the law, why have any international agreements at all ? Associating the agreement with the U.N. will make no difference. For if such agreements can validly be set aside by one nation for its own purposes, in the name of its sovereign rights within its own territory, the position will be the same whether the agreement is made in London or recorded in the archives of the United Nations in New York.

"Second, there are those who, having upheld the 'right to nationalize,' go on to say : 'In any case Egypt has not yet prevented our ships from using the Canal.' True, but what will these critics have us do if and when Egypt does ? Will we not once more be told that Egypt's sovereign rights include the right to deny the use of the Canal despite any agreement to the contrary, including both the new agreement and the Convention of 1888 ? These so-called intellectual arguments and hesitations come down to this : that whatever Egypt does or may do, we can and must do nothing . . .

"We are about to try to deal, by negotiation, with a matter which is vital to the trade and economies of a score of nations To leave our vital interests to the whim of one man would be suicidal. We in Australia applaud the statement made by France, the United Kingdom, and the United States. We cannot accept either the legality or the morality of what Nasser has done . . ."

Developments in the United States.

The Suez Canal crisis was discussed by President Eisenhower with Congressional leaders on Aug. 12. Among those present at the White House meeting were Vice-President Nixon, Mr. Dulles, Senator George (chairman of the Senate Foreign Relations Committee), Senator Johnson (Democratic leader in the Senate), Admiral Radford (chairman of the Joint Chiefs of Staff), and Mr. Arthur Flemming (Director of Defence Mobilization).

An official communiqué said that all those present "recognized the importance of dependable operation of the Canal as a major artery of world traffic," and that President Eisenhower and Mr. Dulles had pointed out that "in view of the acceptance by 22 of the 24 nations invited, the conference will offer the opportunity of reaching a peaceful and equitable solution in accordance with the concepts of the 1888 governing treaty."

On the eve of Mr. Dulles's departure for the London conference, the State Department issued a statement reiterating that there was "complete agreement" with Britain and France "that there should be international means to ensure the practical and efficient functioning of the Canal as a free, open and secure international waterway in accordance with the Convention of 1888." The statement added that "the United States has not altered its views in this respect and is not aware of any difference in this matter between the British and French Governments and itself."

Representatives of 13 international oil companies met in New York on Aug 8 to discuss the Suez Canal question. The meeting, convened by the Federal Government, was held in closed session and was presided over by Mr. Stewart, head of the Oil and Gas Division of the Department of the Interior The companies represented included such major U S. oil corporations as Standard Oil of New Jersey, the Arabian-American Company (Aramco), and the Gulf Oil Company.

On the following day Mr. Flemming announced the formation of a Middle East Emergency Committee to pool the resources of the American petroleum industry to meet the oil needs of the U S.A. and Western Europe if Middle Eastern supplies should be cut off as a result of the Suez crisis.

East European Support for Egypt.

A statement expressing support for Egypt in the Suez dispute was issued by President Tito of Yugoslavia on Aug. 12, similar statements being issued by the Polish, Bulgarian, and East German Governments.

President Tito, who described Yugoslavia as "the legitimate maritime inheritor of the former State of Austria-Hungary," maintained that Egypt had the full sovereign right to nationalize the Suez Canal, and criticized what he described as the "atmosphere of force" which had accompanied the convening of the London conference He maintained that only an international conference, in which Egypt should participate, could "discuss conditions for the application of the principle of free navigation, on an equal footing and without imposing conditions on Egypt."

The arguments set forth in the Polish and Bulgarian statements were identical with those in the Soviet statement issued by the Tass Agency (see above) Both countries complained that they had not been invited to the London Conference, asserting that they were "important users" of the Canal. The East German Government announced that it had decided to send a "delegation" to London headed by Herr Rau, the Minister of Trade and a Deputy Premier, and insisted that it should have been invited because Germany was a signatory to the 1888 Convention. The British Foreign Office, however, stated that no East German delegation would be admitted, pointing out that "H M Government have always taken the view that the East German authorities are quite unrepresentative of the population of the Soviet zone of Germany"

Developments in Arab Countries.

The Political Committee of the Arab League, meeting in Cairo on Aug. 13, issued a statement fully supporting President Nasser's declaration, and describing his proposals as giving "genuine assurance to all States of freedom of navigation through the Canal."

A nation-wide 24-hour strike was called by the Egyptian Government on Aug. 16 to synchronize with the opening of the London conference. At the same time Cairo Radio appealed for stoppages of work in all Arab countries in support of Egypt, and called upon all Arabs "from the Persian Gulf to the Atlantic" to observe a five-minute "silence of mourning" during the day.

The strike was universal throughout Egypt, all transport coming to a halt for 24 hours and all shops, banks, cafés, etc , remaining closed Public utilities, however, were unaffected, and there was no interruption of shipping in the Suez Canal. Protest strikes in support of Egypt also occurred on a large scale in Syria, Lebanon, Jordan, and Libya, and to a lesser extent in Iraq, the Sudan, Tunisia, and Morocco, stoppages of work in the two latter countries being on a minor scale Saudi Arabia remained unaffected.

In Amman (the Jordanian capital) rioters were prevented by the police from attacking the British and French Embassies, while in Tripoli the police used tear-gas to disperse mobs attempting to converge on the British Embassy In Syria, a strike of oil-workers stopped the flow of oil through the Iraq Petroleum Company's pipelines at Deir es-Zor for several hours The strikers resumed work after the Syrian Minister of National Economy had flown to the area and warned them that their trade union organization would be dissolved unless they returned to work immediately

The Under-Secretary of the Iraqi Foreign Ministry said on Aug. 16 that Egypt had asked Iraq to mediate with Britain on her behalf in the Suez Canal dispute. It was stated that this approach had been made by Dr. Fawzi (the Egyptian Foreign Minister) to Senator Tewfik es-Suwaidi, leader of the Iraqi delegation at the meeting of the Arab League's Political Committee. Reports of an Egyptian request for Iraqi mediation were, however, denied by the Egyptian Ambassador in Baghdad and were not confirmed in Cairo.

Statement by Director-General of Suez Canal Company. - Shortage of Canal Pilots. - Reduction in Canal Convoys.

The Director-General of the Suez Canal Company (M. Georges-Picot) said in Paris on Aug. 14 that nearly all its non-Egyptian employees had remained loyal to the Company, had refused to work for the new Egyptian Authority, and had asked to be repatriated. [The non-Egyptian employees include 148 of the 187 pilots on the Canal and some 270 Europeans in administrative positions of special responsibility.] If more than 700 ships had passed through the Canal in the fortnight since nationalization, as stated by President Nasser, this was solely because the Company had asked its non-Egyptian personnel to remain temporarily at their posts until the outcome of the London Conference, when further instructions would be issued. M. Georges-Picot also stated that between 50 and 60 per cent of the canal dues since nationalization had been paid in London and Paris by British, French, Scandinavian, and some other shipping companies.

Refuting Colonel Nasser's allegation that 120,000 Egyptian labourers had died during the building of the Canal, M Georges-Picot accused the Egyptian President of having "lifted" this figure from Herodotus, who had mentioned a precisely similar figure in reporting the death-roll during the building of another canal in Egypt in 630 B.C In actual fact, 1,394 Egyptians had died during the building of the Suez Canal—a figure representing one per cent of the labour force employed, and less than the Egyptian mortality-rate at the time.

The new Egyptian Authority for the Suez Canal announced on Aug. 14 that daily convoys through the Canal were being reduced from four to three—two southbound from Port Said to Suez, and one northbound from Suez to Port Said. No official reason was given, but the Egyptian Embassy in London stated on Aug. 16 that convoys had been reduced because "a number of foreign pilots on holiday in Europe have not returned to their posts at the end of their vacation," resulting in "unusual strain on the remaining staffs." The Embassy said that 11 such pilots had failed to return to their duties.

Colonel Yunis, the vice-president of the nationalized Egyptian Authority, stated on Aug. 20 that all Egyptian embassies and legations abroad had been instructed to recruit pilots for the Authority and to arrange for checking of credentials, medical examinations, etc. He admitted that 27 pilots—British, French, Norwegian, and Dutch—had failed to return from leave, and said that the Authority had recruited 27 new Egyptian trainees, together with a few Greeks. In a further statement on Aug. 22, Colonel Yunis said that British and French pilots were free to leave their jobs if they gave advance notice in writing; in that case, however, the Egyptian management would not be responsible for any delay affecting British and French ships, because "it will get Egyptian, Greek, and other pilots to guide ships of other nationalities through the canal on schedule first, and only then will it arrange for them to take French and British ships through." Colonel Yunis nevertheless gave an assurance on the following day that there would be "no discrimination against any ship, whatever the pilot situation."

It was commented in Western newspapers that the lack of qualified pilots might seriously effect the efficient functioning of the Suez Canal, particularly as Egypt—with only a small navy and merchant marine—had few men with the necessary training and experience in such highly skilled work.

Pre-Nationalization Agreement between Egyptian Government and Suez Canal Company.

Prior to the nationalization decree, an agreement was concluded on June 10 between the Egyptian Government and the Suez Canal Company on the question of the Company's earnings of foreign currencies. Under the terms of this agreement the Company undertook to transfer a total of over £20,000,000 to Egypt over the next eight years, as follows: £10,000,000 by the end of 1956, £3,000,000 by the end of 1957, £2,000,000 in 1958, and a little over £1,000,000 in each of the five years 1959-1963, the latter sum being equivalent to the Egyptian Government's share in the Company's profits. In return, the Company would receive Egyptian pounds which it would use for investment in Egyptian development projects until the expiry of the Company's concession in 1968.

This agreement was referred to by Sir Anthony Eden in his speech to the House of Commons on Aug. 2 (see 15013 A), and also by Mr. Selwyn Lloyd and Mr. Menzies in their speeches of Aug. 14 and Aug. 13 respectively (see above). (Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Financial Times - Australian News and Information Bureau - Tanjug Agency, Belgrade) **(Prev. rep. Suez Crisis, 15013 A; 15001 A.)**

A. UNITED KINGDOM. — The Economic Situation. - Conclusion of Prime Minister's Talks with Industry. - Preparation of Improved Economic Statistics. - Chancellor's Meeting with Bankers. - Control of Borrowing extended. - Further Price "Pegging." - Increased Capital Expenditure. - Hire-Purchase Statistics.

The Prime Minister, Sir Anthony Eden, concluded his series of talks with representatives of industry (see 14977 A) on Aug. 1, when the representatives of the T.U.C., private industry, and the nationalized industries were invited at three separate meetings to comment on a statement prepared by the Government which was published the same evening.

The statement, after referring to the White Paper published in March on the economic implications of full employment (see 14802 A), said "The Government have played and will continue to play their part in combating inflation through fiscal, monetary, administrative and other methods In particular they will maintain their efforts to limit their own demands on the national product, one example of which is the reduction of £76,000,000 recently announced in the original estimates of Government expenditure for 1956-57 [see 14977 A.]

"In their discussions with leading representatives of industry the Government have made two points—first, that the mounting severity of foreign competition renders it more urgent than ever to break the cost-price spiral, and secondly, that our economic circumstances are now favourable to the maintenance of a period of steady prices if we avoid further increase in our domestic costs. Apart from the possible effects of a major disturbance in international relations, the future of the general price level now lies largely in our own hands.

"During the course of these discussions a number of practical contributions have been made towards securing the objective of steady prices over a substantial period The Government welcome them

"The progress made so far has been reflected throughout the economy. Retail prices have in the last two or three months been comparatively steady, exports in the first half of 1956 have shown a substantial increase; there has been a considerable improvement in our balance of payments and in our gold reserves.

"But this improvment is by no means sufficient and the threats to the future stability of costs and prices still remain The Government must therefore emphasize that the national interest can be served only by a continuing effort to keep prices steady and if possible to reduce them, even where this process would affect profits and dividends. All those responsible for wages questions should show a similar recognition of the national needs.

"The Government believe that these discussions have already made a notable contribution towards a national understanding of the joint action necessary for the maintenance of full employment and for increasing production. It is their intention to make further use of this method of consulting industry as occasion may require for the future."

Improved Economic Statistics.

On the same day (Aug. 1) the Chancellor of the Exchequer, Mr. Macmillan, gave details in the House of Commons of the proposed extension of the Government's collation of economic statistics foreshadowed in his Budget speech (see 14821 A).

Mr Macmillan said that the Government would:

(*a*) ask for monthly statistics of production and orders from some important industries not already supplying them;

(*b*) institute an annual sample inquiry into fixed investment and stocks in the distributive and service trades, for which the supply of information would be compulsory, and, in addition, ask more firms in these trades to volunteer quarterly information on fixed investment and stocks;

(*c*) consult the building and civil engineering industries, through the Ministry of Works, about the possibility of their providing analyzed information of their new contracts;

(*d*) invite a number of companies voluntarily to provide quarterly estimates of profits, in confidence, to the Inland Revenue Department, which would summarize the returns:

(*e*) study, in co-operation with the Bank of England, how best to improve statistics of the balance of payments,

(*f*) hold a continuing enquiry among a small sample of households in order to provide up-to-date information about changes in income and expenditure, thus keeping up-to-date the information obtained by the Ministry of Labour in 1953-54.

Mr Macmillan added that the Government were also considering what improvements and extensions could be made in the presentation and publication of statistics to keep Parliament, industry, and the public as fully informed as possible. One important objective was to combine the available information into quarterly estimates of the national expenditure and its components.

Chancellor's Meeting with Bankers.

On July 24 Mr. Macmillan met about 30 prominent bankers, led by the Governor of the Bank of England, at the Treasury to discuss the economic situation.

A statement issued after the meeting said that the Chancellor had emphasized that the control of inflation was an essential condition of success in dealing with all other economic problems, and that he had stressed the Government's determination to press on with the measures it had taken.

"The Government," the statement continued, "recognized the valuable part already played by the banking system in maintaining credit restrictions in the face of considerable difficulties. But the Chancellor asked that the contraction of credit should be resolutely pursued and that there should be no relaxation in the present critical attitude towards applications for bank finance The representatives of the banking organizations took note of the Chancellor's statement and undertook to meet the Chancellor's wishes and the national needs."

Aggregate figures extracted from the balance-sheets of the 'Big Five' banks up to June 30, 1956, showed a decline in advances of £171,000,000 during the previous twelve months to £1,698,000,000.

Control of Borrowing Extended.

An Order was made on Aug. 1 to extend the Control of Borrowing Order and the need for Treasury consent to company transactions in which property was transferred in consideration of securities, which might then be sold for cash.

Price-Pegging Measures.

Following the undertakings given by the nationalized industries to "freeze" prices for various periods (see 14977 A), similar undertakings were announced by a number of private industrial concerns.

These included the Imperial Tobacco Co. (until April 30, 1957), Thomas De La Rue & Co (until March 31, 1957), Gillette Industries (until Dec 31, 1956), Lister & Co (knitting wools—until Jan 1, 1957), The Distillers Co (whisky—until Dec 31, 1956), W. & A Gilbey (wines and spirits—until Dec 31, 1956), Bath and Portland Stone Firms (until Dec 31, 1956), Reckitt and Colman (chemical and food products—indefinitely), and Laporte Chemicals (hydrogen peroxide, detergents and other chemical products—until March 31, 1957)

Imperial Chemical Industries Ltd. announced on July 30 that it would make no further increase before June 30, 1957, in the home trade prices of the majority of its products, including chemicals, dye-stuffs, explosives, fertilizers, fibres, paints, pharmaceuticals and plastics, unless exceptional factors intervened. Some goods, however, mainly those involving non-ferrous metals, were excluded from the "freeze" because of widely fluctuating raw material prices

The Cement Makers' Federation, announcing an increase of 3 shillings a ton in the price of Portland cement from July 1, added that the new prices would not be increased in ordinary circumstances before June 30, 1957.

Capital Expenditure in First Quarter of 1956.

Capital expenditure in the first quarter of 1956 was 27 per cent higher for manufacturing industry as a whole than in the first quarter of 1955, but 12 per cent lower than in the fourth quarter of 1955.

Machine-tools.

The following table gives details of orders and deliveries of metal working machine-tools for 1955 and the first quarter of 1956:

	New Orders			Total deliveries
	Home	Export	Total	
	(£ million)			
1956—				
March	5.75	1.93	7.68	6.93
February	7 54	2.10	9.64	6 95
January	6.32	1.87	8.19	6 39
First quarter	19.61	5.90	25.51	20.94
1955—				
Fourth quarter	18.89	5.51	24.40	20 23
Third quarter	17.71	4 84	22.56	18 21
Second quarter	20 16	5 46	25.62	18.63
First quarter	18.50	5 50	24.00	18 00

Although there was some slackening of new business in March, the value of new orders still exceeded the total value of output.

New Factory Buildings.

Details of the rate of approvals of new factory buildings for 1955 and the first quarter of 1956 are given in the following table:

	Schemes approved	
	Number	Area (thousand square feet)
1st quarter, 1956	762	21,700
4th ,, 1955	715	17,172
3rd ,, 1955	812	20,771
2nd ,, 1955	859	29,715
1st ,, 1955	934	24,004

The figures for the first quarter of 1956 showed a decline of 9 per cent from the corresponding quarter of 1955, but an increase of more than 25 per cent over the last quarter of 1955.

Hire-Purchase Sales.

The following tables, from figures issued by the Board of Trade, show trends in hire-purchase sales between October 1955 and June 1956:

(i) *Index Numbers of Value of Goods Sold by Retailers on Hire-Purchase per Week* (all household goods shops—Dec. 1955 = 100):

1955		
October	November	December
119	105	100

1956					
January	February	March	April	May	June
69	67	66	65	67	68

(ii) *Hire-Purchase Sales as a Percentage of Total Retail Sales* (all household goods shops) :

		1955			
	October	November	December		
	35	35	33		
		1956			
January	February	March	April	May	June
29	30	28	28	28	28

(iii) *Index Numbers of Value of New Hire-Purchase Credit extended by Finance Houses direct to Hirers per Calendar Month* (all goods, Dec. 1955 =100) :

		1955			
	October	November	December		
	125	112	100		
		1956			
January	February	March	April	May	June
114	117	90	96	108	101

The combined hire-purchase debt owing to retailers and finance houses at the end of June was some 12 per cent below the level at the end of 1955, when it was estimated to be at least £450,000,000, or between £9 and £10 per head of the population, compared with roughly £58 per head in the United States

Figures issued by Hire-Purchase Information showed that hire-purchase contracts (covering motor vehicles, caravans, farm equipment and machinery) dealt with in July 1956 amounted to 65,720 compared with 70,846 in June 1956 and 87,842 in July 1955.

Restrictions on hire-purchase and credit sale agreements were further tightened by the Board of Trade on Aug. 21, 1956.

Orders issued on that date (*a*) prohibited rentals for fixed periods of less than nine months, (*b*) restricted the re-hiring of goods by two or more people living on the same premises ; (*c*) required that charges in connexion with hiring, other than in the supply of electricity or gas, should be ascertainable in advance, thereby preventing the hire of television sets on the slot-machine principle

On the other hand, the February restrictions were amended to allow industrial firms to make progress payments on capital goods before or during manufacture

Purchasing Power of Earnings.

In a parliamentary reply on Feb. 23, 1956, the Financial Secretary to the Treasury (Mr. Brooke) said that on the basis of available figures, and taking no account of changes in direct taxation or benefits received, the purchasing power of average industrial earnings had risen by 7½ per cent between April 1945 and April 1951 and by 16 per cent between April 1951 and April 1955.—(Treasury Press Office - Board of Trade Journal - Times - Manchester Guardian - Daily Telegraph - Financial Times)

A. PERU. — Inauguration of President Prado. - New Cabinet. - Legalization of Aprista Party. - Revocation of Expulsion of Haya de la Torre.

The newly-elected President of Peru, Dr. Manuel Prado, was officially inaugurated for a six-year term of office on July 28. On the same day the new Peruvian Congress passed a series of Bills which legalized the Aprista party (*Alianza Popular Revolucionaria Americana*) after eight years of outlawry ; revoked the law under which the Aprista leader, Señor Raul Haya de la Torre, had been exiled ; restored all confiscated property of Aprista party members ; and ordered the immediate release of all political prisoners. The Bills were signed by President Prado as his first act on taking office, and all remaining political detainees were released the same evening. Most of them were Army officers who had been imprisoned for plotting against the regime of General Odria, the former President ; they included General Marcial Merina, who led the abortive revolt at Iquitos in February last.

A new Cabinet was formed by President Prado on July 29, with the following membership. Prime Minister and Foreign Affairs—Dr. Manuel Cisneros (a lawyer and newspaper publisher) ; Government and Police—Dr Augusto Thorndike, Finance and Commerce—Dr. Juan Pardo ; War—General Alejandro Cuadra, Navy—Rear-Admiral Emilio Barrón ; Aviation—General Manuel P Garcia ; Education—Dr. Jorge Basadre, Development and Public Works—Señor Carlos Alzamora ; Justice and Culture—Dr. Jorge Fernandez ; Public Health—Dr. Jorge Haaker, Agriculture—Señor Edgardo Masias, Labour—Dr Ricardo Elias

In his inaugural speech President Prado pledged his Government to assure all democratic freedoms, and said that special concern would be paid to legislation to improve the conditions of the workers. He also said that his Government would base itself on the principle of Western hemispheric solidarity, and that Peru would be "an advance outpost in defence of the hemisphere against all threat of totalitarian infiltration." (New York Times)

(Prev. rep. 15000 A.)

B. JAPAN. — Elections to Upper House.

Elections were held on July 8 for half the membership of the Japanese Upper House (the House of Councillors), in accordance with the constitutional requirement whereby half the members are elected at three-yearly intervals. [The 250 members of the House of Councillors hold their seats for six-year terms, half of them retiring every three years.] The actual number of seats filled was 127—i.e. half the House's membership (125) plus two vacancies outstanding.

The elections were the first to be held since the emergence of a two-party system in Japan (see 14531 A). Results were as follows, showing for each party the newly-elected members, those not up for election (incumbents), and total party strengths in the new and former Houses :

	Newly-elected members	Incumbents	New House (total)	Old House (total)
Liberal Democrats .	61	61	122	122
Socialists .. .	49	31	80	68
Green Breeze Society ..	5	26	31	43
Communists .. .	1	1	2	1
Minor parties and Independents ..	11	4	15	16

The most notable feature of the elections was the important gains made by the Socialists, who increased their representation by 12 seats and polled 11,156,057 votes (37.6 per cent), compared with 8,536,126 (29.9 per cent) at the last Upper House elections in 1953. The Liberal Democrats (the Government party) maintained their position unchanged, polling nearly 3,000,000 more votes than in 1953—14,354,005 (48.3 per cent) against 11,359,623 (39.7 per cent) The biggest setback was suffered by the conservative Green Breeze Society (*Ryokufukai*), which lost 12 seats to the Socialists and polled only 653,843 votes (2 2 per cent), compared with 2,883,568 (10.1 per cent) in 1953 The Communists, though having only two members, almost doubled their poll as compared with 1953—from 599,054 votes (2 1 per cent) to 1,149,009 votes (3 8 per cent). Among the minor parties, the Farmer-Labour group lost the two seats it held in the former House.

The elections were of particular significance because the Government needed a two-thirds majority in the Upper House (i.e. 167 of the 250 members) to carry out its proclaimed intention of revising the post-war Constitution—the so-called "MacArthur Constitution"—so as to permit the rearmament of Japan. As a result of the elections, the Liberal Democrats and the Green Breeze Society (which usually supports the Government) command together only 153 seats in the new Upper House—i.e. 14 fewer than the number necessary to pass constitutional amendments. The necessary two-thirds majority is also not forthcoming in the Lower House (see 14133 A). Rearmament is strongly opposed by the Socialist Party, which advocates a "neutralist" foreign policy, friendship with the Soviet Union and Communist China, and the abandonment of the U.S.-Japanese defence pact.—(Japanese Embassy Press Office, London - New York Times - New York Herald Tribune)

(Prev. rep. General Election, 14133 A ; Upper House Elections, 12956 A.)

C. UNITED NATIONS. — Convention for Protection of Cultural Property in Wartime. - Entry into Force.

The U.N. Convention on the protection of art treasures and cultural property in time of war came into force on Aug. 7, by which date it had been ratified by five of the signatories to the convention signed in The Hague in May 1954—Burma, Egypt, Mexico, San Marino, and Yugoslavia. A sixth ratification, that of Hungary, was completed on Aug. 17.

The Convention had been signed by 50 countries—including Britain, France, the Soviet Union, and the U.S.A.—at or after The Hague meeting, which was held under the auspices of the U.N. Educational, Scientific, and Cultural Organization (Unesco). It laid down that all public buildings, monuments, etc., of cultural and artistic value would be marked in time of war with a special emblem (a blue cross on a white background) which all belligerents would be obliged to respect ; that a register of such property would be kept at Unesco headquarters in Paris ; and that all signatories to the Convention would take the necessary steps to safeguard art and cultural treasures in time of war, including the building of bomb-proof shelters capable of housing works of art, manuscripts, pictures, books, sculptures, and scientific collections. Vandalism, pillage, or misappropriation are prohibited under the Convention, as well as the export of artistic and cultural objects from any territory under occupation.

The Convention provided that it would come into force when ratified by five signatories.—(Le Monde, Paris - United Nations Review, New York - U.N. Information Centre, London)

(Prev. rep. Unesco Convention, 14084 A.)

A. INTERNATIONAL FINANCE CORPORATION. — Coming into Force of Charter. - Mr. Garner appointed President of I.F.C. - Statement of Policy.

The Charter of the International Finance Corporation (see 14168 A) came into force on July 21 when France and Western Germany became members, bringing the total membership to 31 countries and capital subscriptions to $78,366,000. The 31 members, with their subscriptions, were :

Australia	$2,215,000	Guatemala	$22,000
Bolivia	$78,000	Haiti	$22,000
Canada	$3,600,000	Honduras	$11,000
Ceylon	$166,000	Iceland	$11,000
Colombia	$388,000	India	$4,431,000
Costa Rica	$22,000	Japan	$2,769,000
Denmark	$753,000	Jordan	$33,000
Dominican Republic	$22,000	Mexico	$720,000
Ecuador	$35,000	Nicaragua	$9,000
Egypt	$590,000	Norway	$554,000
El Salvador	$11,000	Pakistan	$1,108,000
Ethiopia	$33,000	Panama	$2,000
Finland	$421,000	Peru	$194,000
France	$5,815,000	Sweden	$1,108,000
Germany (Western)	$3,655,000	United Kingdom	$14,400,000
United States	$35,168,000		

On July 24 the Directors of the I.F.C. appointed Mr. Robert Garner, previously Vice-President of the International Bank, to be President of the Corporation. Mr. Garner nominated Mr. J. G. Beevor as Vice-President and General Manager of the I.F.C., Mr. Richard Demuth as Assistant to the President, and Mr. Davidson Sommers as General Counsel.

Mr. Garner (62) was born at Bolton (Mississippi) and graduated at Vanderbilt University. Before becoming a Vice-President of the International Bank in 1947 he had been a Vice-President of the Guaranty Trust Company and of the General Foods Corporation

Mr. Beevor (51) was born at Newark (Notts.) and graduated at New College, Oxford. Before joining the International Bank in March 1956 to assist in organizing the I.F C., he had been managing director of the Commonwealth Development Finance Company.

Mr Demuth (46) was born in New York City and graduated at Princeton. He became Special Assistant to the U.S Attorney General in 1939 and in 1947 joined the staff of the International Bank, where he retains the position of Director of Technical Assistance.

In a signed article in *The Times* on July 25, Mr. Garner stressed the experimental nature of the new corporation and outlined the principles on which it would be run.

" The corporation's aim," he wrote, " is to make investments in private productive enterprises in member-countries, particularly in the less developed areas. These investments are to be made in partnership with private investors from capital-exporting countries, or from the country where the enterprise is situated, or preferably in partnership with both. It is envisaged that the corporation's investment will never be more than half of the capital needed for a venture, and often considerably less than that . . . The rate of interest in each case would be a matter for negotiation, depending on the risks and on the other terms of the investment. In general, it would be reasonable to expect that loans would normally run between five and 15 years.

"An International Finance Corporation investment can range from a fixed interest first mortgage bond, enjoying absolute priority for capital and income, to an unsecured income debenture, which may carry rights approaching closely to the rights of share capital Moreover, since the corporation will wish to make profits appropriate to the risks it will incur and to revolve its funds by selling its successful investments to private purchasers, it is expected that its holdings will be of such a kind that purchasers will have some rights of conversion into share capital. For instance, an appropriate form of investment would be either a debenture carrying some rights of conversion into shares, or a debenture coupled with an option certificate or warrant for the subscription or purchase of stock or shares in the enterprise. Some rights of participation in profits before conversion may also be a feature . . .

"For several reasons, the corporation's investments are likely to be in industrial rather than other fields. For one thing, if the I F.C is to be able to begin to revolve its portfolio fairly soon, industrial investments offer the best opportunities. Such investments are likely to become productive and saleable in a shorter period than investment in agricultural enterprises or public utilities. Also, the risks of industrial investments are more easily assessable and the principles of successful industrial investment are more nearly identical throughout the world than are those of, say, agricultural investments."

At the first meeting of the I.F.C.'s Board of Directors on July 24, member-governments were asked to make full payment for their shares of the Corporation's capital stock within 30 days. (International Finance Corporation, Washington - Times) **(Prev. rep. 14499 A.)**

B. BENELUX. — Population Figures.

The General Secretariat of the Benelux Customs Union announced in July that the combined population of the three Benelux countries was 20,029,000 as at Dec. 31, 1955—the Netherlands, 10,822,000 ; Belgium, 8,896,000 ; Luxemburg, 311,000.—(Netherlands News Agency) **(Prev. rep. 14933 D.)**

C. SOVIET UNION - POLAND - UNITED STATES.— Allegations of Violation of Soviet and Polish Territory by American Aircraft. - U.S. Rejection of Allegations.

The Soviet Government, in Notes delivered in Washington on May 14 and July 10, alleged that U.S. military aircraft had violated Soviet airspace on a number of occasions in April and July.

(1) The flights mentioned in the earlier Soviet Note were alleged to have occurred over northern and eastern parts of the Soviet Union on April 5, 12, 15 and 18, but a U S Note in reply denied that any such flights had taken place. The text of these Notes was not published

(2) The Soviet Note of July 10 asserted that on July 4 and 5 twin-engined medium bombers had penetrated into Soviet territory as far as Kaliningrad (formerly Konigsberg), Kaunas and Vilna (Lithuania), and Baranovichi, Brest-Litovsk, Minsk, and Pinsk (Byelorussia) Further violations were alleged to have taken place on July 9, no details being given. The Note said that " these violations can only be assessed as deliberate and carried out for reconnaissance purposes " After drawing attention to the presence of General Twining [Chief of U S Air Staff] in Western Germany at the time of the alleged flights, it declared that " full responsibility for the possible consequences of such violations rests with the U S. Government " and demanded that the U.S. Government should " take measures to punish those guilty and to prevent such violations in the future."

The U S. reply, delivered on July 19, took exception to the Soviet suggestion that the alleged flights had been arranged by General Twining, and continued " A thorough inquiry has been conducted and it has been determined that no U.S. military planes based, or flying, in or adjacent to the European area at the time of the alleged overflights could possibly have strayed, as alleged, so far from their known flight plans, which carefully exclude such flights as the Soviet Note alleges "

The Chief of Staff of the Soviet Air Force, Marshal Rudenko, admitted to foreign press corespondents on July 23 that the Soviet pilots who had observed the aircraft referred to in the Note of July 10 had not identified them as bearing U S markings, but only as being of U S types. He added that Soviet pilots had orders not to shoot in cases of " casual violation " of airspace by foreign aircraft, but said that if violation was " continuous and deliberate " they would act accordingly.

The Polish Ambassador in Washington (M. Spasowski) delivered an oral protest to the U.S. State Department on July 16, alleging flights by U.S. aircraft over Polish territory in late June and early July. A statement issued by the Polish Embassy said that M. Spasowski had stressed that the number of incidents showed that it was an " organized action." (New York Times - New York Herald Tribune) **(14723 A.)**

D. PERSIA. — Shah of Persia's Visit to U.S.S.R. - Relinquishment of Soviet Oil Concession in Persia.

The Shah of Persia, accompanied by the Empress Soraya, paid a State visit to the Soviet Union from June 25 to July 12 in response to an invitation extended by the Soviet Government earlier in the year. During their three weeks in the U.S.S.R., the Shah and the Empress visited many industrial, agricultural, and educational establishments, attended the opening session of the Supreme Soviet on July 11 (see 15032 A), and visited many parts of the Soviet Union by air, including Stalingrad and other cities. The Shah also had meetings with President Voroshilov, Marshal Bulganin, and other Soviet leaders.

At a State banquet given in the Shah's honour on July 10, President Voroshilov gave assurances of the U.S.S R.'s friendship for Persia, emphasized that the Soviet Union had no territorial aspirations, and expressed the hope that Persian territory would " never be used to threaten our southern borders "—an apparent allusion to the Baghdad Pact, to which, however, neither President Voroshilov nor the Shah alluded directly. In reply, the Shah stressed that Persia " has never joined and never will join any aggressive blocs directed against the U.S.S.R.," and reiterated that Persia desired peace and friendship with the Soviet Union and all countries. In an implied reference to Persia's membership of the Baghdad Pact, the Shah declared : " If the Persian Government has undertaken measures for defence, they have been dictated by the needs of the State on the basis of past experience and of the general international situation."

Moscow Radio announced on July 28 that the Soviet Government had decided to relinquish all its rights in the Kevir-Khuryan Oil Company in northern Persia, and to transfer them to the Persian Government. It was stated that this decision had been taken " with the object of strengthening and developing good-neighbourly relations between the Soviet Union and Persia," and as a manifestation of Soviet foreign policy towards the " countries of the East that have taken the road of free and independent development."

The Kevir-Khuryan Company was set up in 1925 as a joint Soviet-Persian concern to exploit the oilfields of northern Persia and to refine and sell the oil products. The concession was for a 70-year period.—(Times - Le Monde - Soviet Weekly)

AUGUST 25—SEPTEMBER 1, 1956

A. THE SUEZ CRISIS. — London Conference. - U.S. Plan for International Control of Suez Canal. - Indian Plan for Egyptian Operation of Canal with International Advisory Body. - 18-Nation Support for U.S. Plan as amended by Pakistan, Persia, Turkey, and Ethiopia. - Soviet, Ceylonese, and Indonesian Support for Indian Plan. - Five-Nation Committee formed by Majority Powers. - President Nasser's Acceptance of Discussions with Five-Nation Committee.

The London Conference on the Suez Canal ended on Aug. 23 after having lasted for seven days. Two plans for the future of the Canal were put forward during the conference :

(1) A U.S. plan, presented by Mr. Dulles and later amended by Pakistan, Ethiopia, Persia, and Turkey, for international control of the Canal. It was supported by 18 countries—Australia, Denmark, Ethiopia, France, the German Federal Republic, Italy, Japan, the Netherlands, New Zealand, Norway, Pakistan, Persia, Portugal, Spain, Sweden, Turkey, the United Kingdom, and the United States.

(2) An Indian plan, presented by Mr. Krishna Menon, for the operation of the Canal by Egypt, assisted by an international advisory body representing users of the Canal. This plan was supported by the Soviet Union, Indonesia, Ceylon, and India herself.

The 18 countries supporting the majority plan decided at the end of the conference to appoint a five-nation committee, under the chairmanship of the Prime Minister of Australia (Mr. Menzies), to present and explain this plan to President Nasser and the Egyptian Government. The committee would represent all 18 countries supporting the plan, its four other members being the Foreign Ministers (or their representatives) of Ethiopia, Persia, Sweden, and the United States.

It was also agreed at the suggestion of Mr. Selwyn Lloyd (chairman of the conference) that a verbatim report of the proceedings should be sent to President Nasser, including both the majority and minority plans, together with separate proposals presented by the Spanish delegation.

The London Conference is described below under cross-headings and on a day-to-day basis :

August 16. - Mr. Dulles on Principles of Suez Canal Settlement.

The conference was opened with a speech by the U.S. Secretary of State, who set forth the principles under which, in the U.S. Government's view, the Suez Canal should operate in future.

Mr. Dulles said that President Nasser, in his speech of July 26 " purporting to nationalize the canal," had made it clear that Egypt's action was not merely retaliation for the British and American refusal to finance the Aswan Dam. He (Colonel Nasser) had declared that Egypt intended " to score one triumph after another " and to use the canal for the " grandeur of Egypt." After commenting that " the grandeur of a nation is not rightly measured by its ability to hurt or threaten others," and pointing out that inter-dependence as well as independence was a characteristic of the modern world, Mr. Dulles continued :

" In the Suez Canal, the interdependence of nations achieves perhaps its highest point. The economic life of many nations has been shaped by reliance on the Canal system, which has treaty sanction. To shake and perhaps shatter that system, or to seek gains from threatening to do so, is not a triumph, neither does it augment grandeur The Suez Canal, by reason of its internationalized character both in law and in fact, is the last place wherein to seek means of gaining national triumphs and promoting national ambitions.

" President Nasser . . . now says that Egypt will accord freedom of transit through the Canal, that operations will be efficient, and that tolls will continue to be reasonable. But we are bound to compare those words with other words which have perhaps a more authentic ring. We are also bound to note the difference between what the Treaty of 1888 called ' a definite system destined to guarantee at all times and for all Powers the free use of the Suez Canal ' and an Egyptian national operation which puts other nations in the role of petitioners

" One thing is certain. Whatever may be the present intentions of the Egyptian Government, the trading nations of the world know that President Nasser's action means that their use of the Canal is now at Egypt's sufferance. Egypt can in many subtle ways slow down, burden, and make unprofitable the passage through the Canal of the ships and cargoes of those against whom Egypt might desire, for national political reasons, to discriminate. Thus Egypt seizes hold of a sword with which it could cut into the economic vitals of many nations . .

" What is required is a permanent operation of the Canal under an international system which will, in fact, give confidence to those who wish to use it Confidence is what we seek, and for this it is indispensable that there should be an administration which is non-political. That, I think, is the key to the problem—an operation which is non-political in character. The Canal should not be allowed to become the instrument of the policy of any nation or group of nations, whether of Europe, Asia, or Africa.

" The United States does not believe that the Egyptian Government had the right to wipe out the Convention establishing the rights of the Suez Canal Company until 1968. That arrangement had the status of an international compact. Many nations relied on it. The operating rights and assets of the Company were impressed with an international interest . . . "

Mr. Dulles expressed his conviction, however, that " a fair and equitable plan can be devised which will recognize the legitimate interests of all." Such a plan, he emphasized, should be governed by the following four principles :

(1) The Canal should be operated efficiently as a free, secure international waterway in accordance with the principles of the Convention of 1888.

(2) Its operation should be divorced from the influence of national politics, from whatever source derived.

(3) There should be recognition and satisfaction of all legitimate rights and interests of Egypt in the Canal and in its operation, including an equitable and fair return.

(4) Provision should be made for the payment of fair compensation to the Suez Canal Company.

Mr. Dulles went on to say that a plan along the following lines would satisfy all the above-mentioned requirements

(1) The operation of the Suez Canal in accordance with the principles of the 1888 Convention would be made the responsibility of an international board to be established by treaty and associated with the United Nations Egypt would be represented on such a board, but no single nation would dominate it. Its composition would be such as to assure that its responsibilities would be discharged solely with a view to achieving the best possible operating results, without political motivation in favour of, or in prejudice against, any user of the Canal.

(2) Egypt would by appropriate arrangement have the right to an equitable return which would take into account all legitimate Egyptian rights and sovereignty.

(3) The arrangement would make provision for payment to the Suez Canal Company of fair compensation.

(4) Any differences on the last two points would be settled by an arbitral commission appointed by the International Court of Justice.

In conclusion, Mr Dulles emphasized that such a plan would not infringe on Egypt's sovereignty ; that the 1888 Convention had made the Canal an international and not an Egyptian waterway ; and that Egypt had always recognized the Convention as binding, and continued to recognize it as such He added " We recognize that at this stage any proposal should be flexible, within the limits of such basic principles as we have outlined Egypt's views should be ascertained. But we believe that the principles set forth, and a plan such as that outlined, contain the basic elements needed to restore confidence and to assure that the Suez Canal will be operated in accordance with the Treaty of 1888."

The Soviet Foreign Minister made a speech which largely recapitulated the arguments in the Soviet Note of Aug. 9 (see page 15041). Mr. Abdulgani, the Foreign Minister of Indonesia, supported Egypt's action in nationalizing the Suez Canal, while Dr. Cunha (Portugal), Hr. Undén (Sweden), and Dr. Martino (Italy) spoke in support of the U.S. proposals.

Mr. Shepilov commented that the conference had been convened " by two signatories to the 1888 Convention [Britain and France] together with the United States, which is not a signatory of the Convention." He protested at the fact that no invitations had been sent to the successor States of the Austro-Hungarian Empire or to the Arab States, the German Democratic Republic, the People's Republic of China, and other maritime States " making extensive use of the Canal "

Mr. Abdulgani pointed out that the Suez Canal was of fundamental importance not only to the Western but also to the Asian nations—" the Achilles heel of our national economy." He maintained that the Canal itself was an integral part of Egypt, supported the Egyptian Government's right to nationalize the Suez Canal Company, which was " an Egyptian legal entity and therefore subject to Egyptian law ", and said that the crux of the matter was unrestricted freedom of navigation on the Canal, which had been laid down in the 1888 Convention and reaffirmed by Egypt herself. After expressing the opinion that the Convention " could still be used as a basic guarantee for the future," Mr. Abdulgani declared that was " in the interest of Egypt herself that the Suez Canal should be operated efficiently and that free passage should be secured for every nation without discrimination."

August 17. - Soviet Proposal for Wider Conference. - French Proposal for Non-profit-making International Authority. - Speeches by Mr. Shepilov and M. Pineau.

Mr. Shepilov, in a further speech on this date, supported the Egyptian Government's proposal (see page 15042) for a wider international conference on the Suez Canal with the participation of " States signatories to the 1888 Convention and of all States which make use of the Canal."

The Soviet Foreign Minister said that there were two aspects of the Suez Canal question (1) nationalization of the Suez Canal Company, and (2) freedom of navigation on the Canal. The first aspect "fell exclusively within the competence of the Egyptian State" and "could not be discussed at this conference if we are desirous of observing the principles of non-interference in the internal affairs of States." The second aspect affected many nations.

After defending the nationalization of the Suez Canal Company as "a lawful and justified act," and referring to nationalization measures in France, Great Britain, and Mexico as a justification of Egypt's action, Mr. Shepilov accused the Suez Canal Company of having "recently started disorganizing activities aimed at paralysing normal navigation on the Canal and creating international complications." He asserted that the Company, founded on the basis of a century-old concession, had "a pronounced colonialist character" and that its continued existence was "incompatible with mid-20th century conditions." He went on to accuse the Company of having cared less for the proper upkeep of the Canal than for its revenues, declaring in this connexion: "It is characteristic that the Company's income in 1955 amounted to about 35,000 million francs, while its expenses did not exceed 18,000 million francs. From the profits of over 10,000 million francs Egypt received little more than 1,000 million francs. It is only natural that the Egyptian Government has drawn the proper conclusions and nationalized the Company."

The Western Powers (Mr Shepilov continued) proposed that the Canal should in future be run "not by Egypt but by other foreign Powers from behind the signboard of an international authority," a proposal which was "contradictory to the basic principles of the United Nations and the provisions of international law." The Soviet Union could not agree that "a part of the territory of Egypt over which the Suez Canal passes should be considered as territory over which Egypt has no sovereign rights," and the establishment of an international authority as proposed by the Western Powers "would actually mean the restoration of the former Suez Canal Company under a new signboard and with the participation of some new States." Referring to what he described as "military preparations" in Britain and France, M. Shepilov said that any attempt to impose the Western plan on Egypt by force would mean a "violation of peace in the Near and Middle East" which might "flame up into a large conflict covering the whole area and possibly going outside its limits."

M. Shepilov said that the Soviet Government fully understood the interest of Britain and France in the Suez Canal and in the sea communications with the Middle East, in which both countries had important interests. But it believed that "the solution of these questions should be arrived at by methods of economic co-operation on equal and mutually advantageous terms which are acceptable to all the countries concerned," and not by "the media of coercion" He continued ·

"We have to seek the solution of questions connected with secure safeguards for freedom of navigation on the Suez Canal and its effective functioning as a free, open, and safe navigable sea route. We must work out—with the indispensable participation of Egypt and with regard for her rights and interests as a sovereign State, as well as for the interests of all States which use the Canal—proper measures which would establish such safeguards. The Convention of 1888, which is still valid, provides for freedom of navigation on the Suez Canal. The Egyptian Government has confirmed its obligations under that convention. There arises the question of concluding .. a new international convention, or an agreement supplementary to the Convention of 1888. Egypt, under whose sovereignty and in whose possession the Canal is, would assume obligations to assure freedom of navigation; to protect the Canal and its installations against any violations; to maintain the Canal in a proper condition; and to carry out works to increase the capacity of the Canal . . . "

In conclusion, Mr. Shepilov said that "if the exchange of opinions at this conference results in some generally acceptable principles," it would be possible to convene a larger and "more representative" conference along the lines suggested by the Egyptian Government. He suggested that the composition, time, and place of such a conference could be worked out by a preparatory commission consisting of representatives of Great Britain, France, the United States, the Soviet Union, India, and Egypt.

The French Foreign Minister, M. Pineau, proposed that the Suez Canal should be run by a non-profit-making international authority consisting of "the main interested countries and users of the Canal, including Egypt."

After recapitulating the French Government's view that Egypt was not entitled to nationalize the Suez Canal Company, in view of the latter's international character and the fact that it was "a limited liability company set up under French law," M. Pineau suggested that an international body such as he had proposed could usefully be linked with the United Nations. It might also be laid down that any attack on the international authority would automatically be regarded as aggression under the U N. Charter. "The international authority," he continued, "would have the following powers· fixing of tariffs, management of the Canal, determination of necessary investments, indemnification of the Suez Canal Company, and payment of dues to Egypt It would draw no benefits itself Any excess of revenue over expenditure would be placed entirely at Egypt's disposal, after payment of compensation to the Suez Canal Company. No selfish interests would be served by this sytem, moreover, it would show the Egyptian people that no-one refused them the right to a fair return. During the next 12 years [i e. until the expiry of the Suez Canal Company's concession in 1968] we could, for example, adopt a system whereby part of the Canal's profits would be earmarked for compensating the Company, and part for Egypt, which would receive all the profits at the end of the 12-year period. Thus, from a financial point of view, Egypt would find herself in just as favourable a position as is provided for in the 1888 Convention . . . "

M. Pineau concluded "The following question has often been put to us If Colonel Nasser does not accept the solution proposed by this conference, what then? How is it to be imposed on him? In fact, the means would be numerous. But I do not consider we are here to study them; our task is to find a solution, and not the method to carry out that solution in practice. But in my view one thing is certain Colonel Nasser will be all the more ready to accept a solution if he does not see among the users of the Canal divisions which it would be easy for him to exploit. History shows that those who bear the responsibility for wars are often those who have preached peace but who lacked courage at the time when they should have shown firmness. Dictators have always gambled and won on the weaknesses and divisions of their victims . . "

The representatives of New Zealand, Norway, Denmark, Western Germany, Japan, Persia, and Turkey gave general support to Mr. Dulles's proposals, while the Spanish Foreign Minister put forward separate proposals on behalf of his delegation.

Mr. Macdonald (New Zealand) emphasized that the problem was essentially one of international trust and confidence, which had been "seriously shaken" by Colonel Nasser's action. After commenting that "we can hardly be content with vague assurances and a loose system if trust is non-existent," Mr Macdonald said: "I shall invoke one example from history which highlights this question of trust. On Sept. 1, 1951, the Security Council adopted a resolution . . . which is especially relevant to our discussions. It stated that the restrictions applied by Egypt against shipping to Israel were 'an abuse of the right of visit, search, and seizure' It stated also that 'these restrictions, together with sanctions applied by Egypt to certain ships which have visited Israeli ports, represent unjustified interference with the rights of nations to navigate the seas and to trade freely with one another . . .' Accordingly the Security Council called upon Egypt 'to terminate the restrictions on passage of international commercial shipping and goods through the Suez Canal wherever bound, and to cease all interference with such shipping beyond that essential to the safety of shipping in the Canal itself and to the observation of international conventions in force.' Egypt did not obey the Security Council's resolution, and has not obeyed it since It has continued to prevent free passage through the Suez Canal of shipping bound to or from Israel The significance of this fact is clear. Despite Colonel Nasser's declarations of willingness to abide by the 1888 Convention, there can be no assurance that he would not, in pursuit of some national interest or in prosecution of some private grievance, discriminate against the shipping of other countries as he discriminates today against that of Israel . . . This example from history provides a warning and a guide. Its significance becomes all the greater in the light of recent events . . . "

Hr. Lange (Norway) said that Mr Dulles' proposals were generally acceptable to his Government, though any suggestions which the conference might agree upon should be kept flexible "in view of the necessity for future negotiations with Egypt as the sovereign of the territory through which this great international waterway runs." He fully agreed with Mr. Dulles' opinion that the Canal "should not be allowed to become the instrument of the policy of any single country," and that the only real safeguard for the interests of user-nations was "the operation of the Canal by an international regime non-political in character," taking account of "the legitimate interests of Egypt as the territorial sovereign." Hr. Lange criticized Egypt's unilateral action, taken without prior notice or consultation, as having "dealt a severe blow to international confidence," and associated himself with the idea that some link should be established between the future international regime and the United Nations After saying that Norway, as the second largest user of the Suez Canal, was "frankly worried" about a possible breakdown of Canal traffic, the Norwegian Foreign Minister emphasized that a solution must satisfy two minimum requirements. (1) free passage without discrimination, and (2) an administration "able and willing" to assure efficient administration, maintenance, and development of the Canal

Hr. Hansen (Denmark) spoke along similar lines, strongly supporting the idea of an international board for the Canal associated with the United Nations **Herr von Brentano** (Western Germany) said that the principle of free navigation through the Canal should be internationally guaranteed and that any agreement should be based on the Convention of 1888, taking full account of the interests of Egypt. **Mr. Shigemitsu** (Japan) believed that the parties to the dispute had not exhausted all means of compromise, and stressed that any solution must be in accordance with the spirit of the U.N. Charter.

Mr. Birgi (Turkey) said that all parties, including Egypt, recognized that freedom of navigation through the Canal was indispensable, and that a solution had to be sought "of a nature to satisfy the legitimate interests of all the parties concerned, beginning with Egypt." "In the light of these points of departure," he continued, "the question of setting right the extremely dangerous state of affairs created by the Egyptian Government's decision to nationalize the Canal—unfortunately in an untimely manner, unilaterally, and without consulting not only those directly interested, but even its partners of the Arab League—would become easy if one could rid the problem of

a number of emotional elements, involving the principles of independence, national sovereignty, State prestige, and even, to speak frankly, of the sentimental antagonism between East and West The circumstances and the state of mind in which the Egyptian Government decided to effect the nationalization of the Suez Canal Company—reflected in certain declarations by President Nasser, of which Mr. Dulles cited characteristic passages—indicate that we are faced with a problem, the difficulty and gravity of which arise chiefly from political and emotional elements . . .

" Some in good faith, and others by ulterior design—the motives of which I should not like to analyse here—have seen fit to present this question of nationalization as involving a manifestation of the national sovereignty of an Arab and Islamic State, and to look upon the issue as one concerning the prestige not only of such a State but also of an entire family of States. The Turks are Islamic by faith Turkey desires the full sovereignty and independence of all the Arab countries, including of course Egypt. She also wishes to see them strong, prosperous, and protected against any aggression wherever it may come from, and against any pressure whatever may be its nature. We would not be here today if we had the slightest suspicion that there was any question of infringing the sovereignty, independence, or prestige of the Egyptian nation . . "

After declaring that " the right to effect nationalization . . . cannot be denied to any sovereign State, provided that it respects certain universally recognized rules of law and equity," the Turkish delegate continued · " The facts are that the Canal is an artificial waterway necessitating constant maintenance and improvement . . . Since there is unanimity in recognizing the international character of freedom of passage. why should there be any reluctance to admit that the case which we have to examine . . calls for an impartial and international guarantee ? What is there that would be incompatible with the sovereignty or prestige of Egypt ? Is there any question of infringement of sovereignty ? Is it not true that international arrangements, freely consented to among sovereign States, constitute the very basis of international life ? What country has not accepted, in full exercise of its sovereign rights, commitments which involve the freedom of its action ? . . . . For all these reasons the Turkish delegation supports as a basis for equitable discussion the suggestions made by Secretary of State Dulles . . "

Dr. Ardalan (Persia) spoke of the importance of the Suez Canal to his country, and said that he would support any international system compatible with Egypt's sovereignty which would ensure free and secure navigation through the Canal. He supported Mr. Dulles's proposals as " constructive."

Señor Artajo (Spain) said that Egypt's action in nationalizing the Canal was unobjectionable provided that the shareholders' rights to compensation were respected As several Articles of the 1888 Convention were outdated, he believed that a revision should not be delayed. He did not think it was necessary that an international administration should assume the direct management of the Canal, and proposed instead that countries using the Canal should be represented on the Board of Directors of the Egyptian Authority with sufficient power to safeguard free navigation on the Canal

At a subsequent press conference at the Spanish Embassy, Señor Artajo explained that the Spanish proposals envisaged " efficient " and " proportionate " representation of user-countries on the board of the Egyptian Authority. The countries represented would be chosen not by weight of their shipping tonnage passing through the Canal but by the bulk of the cargoes carried, and for reasons of " political sensibility " they should not be confined to the great Powers.

August 18. - Statements by British, Australian, Pakistani, Ceylonese, and Netherlands Delegates.

The principal speakers on this date were Mr. Selwyn Lloyd (U.K.), Mr. Robert Menzies (Australia), Mr. Hamidul Huq Chowdhury (Pakistan), Sir Claude Corea (Ceylon), and Mr. Luns (Netherlands).

The British Foreign Secretary emphasized that a solution of the Suez Canal problem should contain " three necessary ingredients " : (1) the shareholders of the Suez Canal Company should be justly treated ; (2) whatever new arrangements were made should command " the support and confidence of those with the technical skills which are necessary for the successful operation of the Canal " ; (3) the Canal " must be freed from politics."

Mr. Selwyn Lloyd spoke as follows · " We have 13,000 British subjects in Egypt. We have a base there operated by British civilian contractors. We have British ships passing through the Canal. I do not want to talk too much about the past, but the methods adopted by Colonel Nasser, the occupation of the Company's property by armed troops, the order to the employees to stay at work or else go to prison—all these things were indicative of an attitude of mind such that anything might happen at any time . . We have therefore taken certain military precautions I have not the slightest doubt we were right to do so. Nevertheless, it is our firm and sincere desire that we should reach a peaceful settlement. British Governments and British people do not like the use of force. It is for us always the last resort. As a nation we are very slow to anger, but when it is clear that vital interests are threatened by acts of deliberate hostility, we stand fast whatever the odds.

" There is one other matter to which I want to refer about the past, and that is the illegality of the action of Colonel Nasser . . . In my opinion, the Egyptian Government have been guilty of an illegal act. The breach of contract is not the less so because it is a Government which commits the breach . . . Everyone round this table really knows in his heart of hearts that the Canal Company was an international company Whatever an Egyptian Government could do with the assets of that company in Egypt because it was technically incorporated in Egypt, the fact is that the matter was handled in such a way as to disregard the rule of law between nations . . .

" It has been inferred outside this conference that any international participation in the control or operation of the Suez Canal would be an infringement of Egyptian sovereignty. I do not accept that proposition .. That view, I submit, is based on a complete misconception of the nature of sovereignty under international law. Sovereignty does not mean the right to do exactly what you please within your own territory. Sovereign government is the right in a general way to organize and govern the national territory and economy according to the wishes of the Government of that territory. But the doctrine of sovereignty gives it no right to use the national territory, or do things within the national territory, which are of an internationally harmful character The maxim ' So use your own that you do not hurt that which belongs to another ' is one which is accepted by every legal system in the world . . .

" I have found the approach of the Governments represented here most reassuring There seems to be agreement that a system must be evolved which will, having due regard to Egyptian sovereignty, be a safeguard for the world and its interests in this international waterway . . . Almost every one of you who has spoken has indicated his support for that thesis . . . "

After saying that Mr Dulles had " set out certain principles whereby a proper balance would be held between the sovereign rights of Egypt and the requirements of those nations who benefited from the Canal," Mr. Selwyn Lloyd pointed out that the economies of many Asian countries, as well as Western European countries, depended to a large extent upon the efficient working of the Canal. " To give but a single example," he added, " I believe that the successful completion of the Second Five-Year Plan in India depends to no small extent upon the way the Canal is operated."

Mr Selwyn Lloyd went on to enumerate the above-mentioned " three necessary ingredients " which were essential to a solution. On the third point, he said · " If one Government is going to control transit through the Canal according to political considerations, it is impossible to see where the line would be drawn. The risks of increased tension would be immeasurable. The only safe answer is that the operation of the Canal should somehow or other be under international control. It is in Egypt's interest to take this matter out of the arena of international politics. I think that we are really all agreed on this Some international system must be evolved

" How is it to be brought about ? The first step is for this conference, I hope unanimously, to declare itself in favour of certain principles. Such a declaration would not be an interference with the domestic affairs of Egypt . . . The kind of international body that has been suggested would only deal with matters which, by virtue of the Convention of 1888, reaffirmed in 1954, were with Egypt's consent taken out of the realm of its internal jurisdiction.

" The next matter for us to consider is how these principles are put to the Egyptian Government. Mr. Shepilov has suggested another conference of some 46 countries. With respect, I do not think that is a good idea We should not make rapid progress by that method. It would take a great deal of time and the urgency of this crisis does not really permit of that Consequently I wish to invite my colleagues to agree that we should do two things as soon as possible. First, formulate the principles to which I have referred ; and secondly, arrange how they should speedily be conveyed to the Egyptian Government."

The Australian Prime Minister, Mr. Menzies, expressed the view that there would be advantages to both sides—i.e. the canal-users and Egypt—on making an arrangement " along the lines indicated by the U.S. Secretary of State."

Mr. Menzies said that he had been " greatly impressed " by the speech of the Turkish delegate, which had disposed of the idea that nations east and west of Suez had interests which were antagonistic. The truth was that " we all have a common interest in a free, open, competently managed, and ever-improving Suez Canal." Mr. Shepilov, moreover, had agreed that there must be freedom of navigation on the Canal, and this seemed to give a " pretty good initial common ground from which we can proceed to consider the vital question of how this freedom is to be guaranteed."

After pointing out that the Canal was " literally a going concern which must be constantly kept in good shape and in good repair, and which, judging by the present saturation of traffic, will need to be extended," Mr. Menzies continued : " Everyone concedes the vital international significance of this Canal. The head of the Egyptian Government does not himself—at any rate at this time—deny it. What we have to determine is therefore not an academic question about sovereignty, but whether, by accepting the position created by Egypt's action, we are all, as users of the Canal, to enjoy the privilege of users merely on sufferance, and whether we should be willing to put the economic future of our own nations into the hands of one nation or of one man . ..

"With all those considerations in mind, I say that our task is to seek a solution which, first of all, recognizes Egypt's legitimate territorial rights. Secondly, to preserve the status of the Canal as an assured international waterway conducted in international interests, and not for national political or economic gain That represents the true and precise nature of our task .

"I do not propose to argue the legal question of whether Egypt had the right to terminate the concession granted to the Suez Canal Company and to take over its property and operations For myself, I believe that the long-standing contract with the Company and its intimate association with the 1888 Convention possessed an international quality which excluded it from nationalization. But that does not matter for the purposes of the present debate. The deed has been done, or at least partly done, because the shareholders have not yet been paid out , and the proposals of Mr. Dulles proceed on the assumption that in the making of a settlement the act of nationalization is not to be revoked. We start there. We do not engage in legal discussions which might turn out, and I think would turn out, to be completely fruitless. Our problem is of the future, and we ought to work out the settlement of that problem as sensible men, in the light of the practical circumstances and having regard to past facts and past actions.

" I have approached this matter from this point of view in order to get out of this conference a coherent body of world opinion behind proposals intrinsically fair and reasonable. I am therefore going to concentrate my attention on the advantages to be derived on both sides—by us, representing the users of the Canal, and by Egypt herself—by making an arrangement along the lines indicated by the U.S. Secretary of State I detect occasionally an undercurrent of feeling that in some way this is unfair to Egypt—that it consists of ' pushing something down Egypt's throat.' Well, we have all had a few feelings in the past week or two , but I am going to ask this conference to see that this proposal by Mr Dulles is, in fact, eminently fair to Egypt, and that Egypt will get from this matter advantages which deserve to be understood—and, in particular, deserve to be understood by Egypt

" First of all, these proposals recognize the termination of the existing Canal Company. So if there is to be an argument about nationalization, or some feeling in Egypt that the Canal Company cannot rise again—all right—the point is conceded—the Canal Company is taken over. In the second place, there may be some feeling in Egypt that it is wrong for private citizens to be drawing profits from an international waterway of this kind All right , under this plan there will be no private profits—there will be international control, international financing. The only substantial sum of money going to any nation will be the amount of money that is paid to Egypt herself, as the territorial owner of the Canal and its works. So private profit disappears from this matter In the third place, Egypt's sovereignty and physical ownership are recognized. Fourthly, there will be paid to Egypt an equitable return, perhaps by way of rental, some share of fees or dues, I do not know ; obviously that must be a very substantial sum of money I myself am rather attracted by the idea that the right set-up would be for Egypt as the owner, the landlord, to grant to the new authority a perpetual lease under which it would pay a rental adjusted from time to time as the business of the Canal grows. That can be considered perhaps hereafter, but it certainly will mean that Egypt will secure from this property a substantial, steady and assured return. The fifth point I make is this I have heard some arguments among the lawyers, but I have not heard any one of them say that Egypt could take over the Company without paying fair compensation to the shareholders Under this proposal the new authority conducting the Canal and its financial operations would make some arrangements for buying out the shareholders If that does not present some advantage to Egypt, I will be much surprised. Sixthly, the financial future of this Canal as a revenue-earner or an expanded revenue-earner would be assured by the setting-up of an international authority ; and Egypt would, in consequence, be relieved of future financial liabilities of an unknown but obviously very extensive kind . .

I do not believe that there is a man sitting at this table ..who does not believe that the future of this Canal is pretty dismal unless there is a complete feeling of confidence in its independent future, in the impartiality of its administration, and in the fact that a large number of nations each has an interest in maintaining it, keeping it out of politics, keeping it out of wars, keeping it out of disputes, and letting it serve the interests of the commerce of mankind . . "

The Ceylonese delegate, Sir Claude Corea, doubted whether it was possible for Egypt to accept the U.S. plan and at the same time " to conserve her sovereign position."

Sir Claude Corea said that it was essential to find a *via media*, " towards which the remarks of Mr. Menzies contributed so greatly," between the views of Egypt on the one hand and of the canal-users on the other. In seeking this " middle way " it was essential " to restore an atmosphere of goodwill and understanding," and it should be recognized that " international goodwill and the maintenance of peace transcend the special interests of either side " After defending Egypt's action in nationalizing the Suez Canal Company, and maintaining that she was fully within her sovereign rights in doing so, Sir Claude pointed out that the 1888 Convention " guarantees to the whole world for all time the free use of this waterway "—a position which had been accepted and reaffirmed by the Egyptian Government itself. It appeared to him, therefore, that no difficulty need arise, since the Canal would remain " free and open " and would be operated by " the legitimate body which has inherited the right."

" The practical question which comes up," he continued, " is whether Egypt enjoys the confidence of other countries, and whether she is in a position to undertake this enormous burden . . . For that reason I favour an approach which will lead to a kind of compromise ; which will recognize the factual position of Egyptian sovereignty and at the same time provide some machinery which will enable the Canal to be operated in a satisfactory way For this purpose we have before us the U.S. plan. The immediate point that arises is the question is it possible to ask Egypt to accept that plan and at the same time to conserve her sovereign position ? If . the idea is to establish a board and vest in that board the full control and operation of the Canal, which it must be admitted is the property of Egypt, is it possible for Egypt to renounce her sovereign position and accept that ? The position I want to put to this conference is that there should be such modification of this proposal that we should proceed, first, from the basis of the sovereignty of Egypt in regard to this matter , and then, with the approval of the sovereign power, seek out a measure which will ensure the satisfactory operation of the Canal. . "

The Foreign Minister of Pakistan urged that the nationalization of the Suez Canal Company should be regarded as a *fait accompli* and that, while protecting the legitimate interests of Egypt, machinery should be set up to ensure " efficient, unfettered, and continuous freedom of navigation to all nations without discrimination."

Mr. Chowdhury expressed his Government's view that, irrespective of the other issues involved, Egypt was fully within her sovereign rights in nationalizing the Suez Canal Company. He believed that there was no real conflict of interests involved, since all parties agreed that a peaceful solution must be found and that there should be no infringement of Egypt's sovereignty in any settlement reached Freedom of navigation without discrimination was of paramount importance to all users of the Canal, and if this freedom were ensured and the necessary improvements effected, the Suez Canal would be progressively profitable to Egypt

Mr. Chowdhury continued " The nations of the world which have been using this Canal for nearly a century, and have thereby given it the character of an international highway, can claim a prescriptive and legal right to its use The Egyptian Government has expressed its obligation to uphold the principles of freedom of navigation and non-discrimination set forth in the Convention of 1888 . The fact remains, however, that the nationalization of the Suez Canal Company at the time and under the circumstances has shaken the confidence of a large number of interested countries in the future security of their line of communication through the Canal The restoration of this confidence and security is, therefore, one of the principal objectives of this conference."

The Pakistani Foreign Minister went on to propose (1) that nationalization of the Suez Canal Company be accepted as a *fait accompli* , (2) that questions of compensation be considered separately between the parties concerned ; (3) that " effective machinery should be set up in active collaboration with Egypt to ensure efficient, unfettered, and continuous freedom of navigation to all nations without discrimination " , and (4) that a committee be set up to negotiate with Egypt and report back to the conference on the basis of these peoposals

The Netherlands delegate, Mr. Luns, urged a settlement along the lines suggested by Mr. Dulles.

Mr. Luns said that the Netherlands Government " viewed with great concern the growing tendency on the part of certain countries, of which we have seen some striking examples in recent months, to discard their international obligations and to further their national ends through unilateral action violating the rights of others." [An apparent reference to the Indonesian Government's action in unilaterally repudiating its debt to the Netherlands, taken shortly after the Egyptian nationalization of the Suez Canal and without prior consultation with the Dutch Government—see 15036 C.]

Pointing out that Holland was a signatory to the 1888 Convention, and one of the main users of the Suez Canal, Mr Luns expressed his Government's " apprehension in view of this new example of disregard for international obligations," and its concern over the question of freedom of navigation He fully agreed with the New Zealand delegate that Egypt's ban on Israeli shipping on the Canal, in defiance of the U N. Security Council, raised grave doubts as to the future willingness of the Egyptian Government to abide by the 1888 Convention. Moreover, Egypt's action in nationalizing the Suez Canal Company, coming only a short time after it had concluded an agreement with that Company, " does little to encourage confidence in the attitude of that Government towards the binding force of agreements "

After expressing his Government's support for " a solution along the lines indicated by our U S. colleague," Mr. Luns added : "The establishment of an international Board, charged with the operation of the Canal and brought into relationship with the United Nations, would seem essential in order to guarantee the efficient functioning of the Canal and to avoid domination by a single Power . . . "

August 20. - U.S. and Indian Proposals.

Mr. Dulles, on behalf of the U.S. delegation, presented detailed proposals suggesting that the operation and development of the Suez Canal should be the responsibility of an international Suez Canal Board, which would be granted by Egypt " all rights and facilities appropriate to its functioning." The text was as follows :

· The Governments approving this statement, concerned at the grave situation regarding the Suez Canal, seeking a peaceful solution in conformity with the purposes and principles of the U N , and recognizing that an adequate solution must on the one hand respect the sovereign rights of Egypt, including its right to just, fair compensation for the use of the Canal, and on the other hand safeguard the Suez Canal as an international waterway in accordance with the Convention of 1888, join in this expression of their views

(1) They affirm that, as stated in the preamble of the Convention of 1888, there should be established ' a definite system destined to guarantee at all times and for all the Powers the free use of the Suez Maritime Canal.'

(2) Such a system should assure :

(*a*) Efficient and dependable operation, maintenance, and development of the Canal as a free, open, and secure international waterway in accordance with the principles of the Convention of 1888

(*b*) Insulation of the operation of the Canal from the influence of politics of any nation

(*c*) Respect for the sovereignty of Egypt.

(*d*) A return to Egypt for the use of the Suez Canal which will be fair and equitable and increasing with enlargement of its capacity and greater use

(*e*) Payment to the Universal Suez Canal Company of such sums as may be found its due by way of fair compensation.

(*f*) Canal tolls as low as is consistent with the foregoing requirements, and, except for (*d*) above, no profit.

(3) To achieve these results on a permanent and reliable basis there should be established by convention

(*a*) Institutional arrangements for co-operation between Egypt and other interested nations in the operation, maintenance, and development of the Canal and for harmonizing and safeguarding their respective interests in the Canal To this end, operating, maintaining, and developing the Canal and enlarging it so as to increase the volume of traffic in the interests of world trade and of Egypt would be the responsibility of a Suez Canal Board Egypt would grant this Board all rights and facilities appropriate to its functioning.

The members of the Board, in addition to Egypt, would be other States chosen in a manner to be agreed upon from among the States parties to the Convention, with due regard to use, pattern of trade, and geographical distribution the composition of the Board to be such as to assure that its responsibilities would be discharged solely with a view to achieving the best possible operating results without political motivation in favour of, or in prejudice against, any user of the Canal. The Board would make periodic reports to the United Nations.

(*b*) An arbitral commission to settle any disputes as to the equitable return to Egypt or fair compensation to the Universal Suez Canal Company, or other matters arising in the operation of the Canal.

(*c*) Effective sanctions for any violation of the Convention by any party to it or any other nation, including provisions for treating any use or threat of force to interfere with the use or operation of the Canal as a threat to peace and a violation of the purposes and principles of the U.N Charter.

(*d*) Provisions for appropriate association with the United Nations and for review as may be necessary."

In presenting these proposals, Mr. Dulles emphasized that there was "no disregard of Egypt's sovereignty" and that "what we are proposing is courteously to inform Egypt of certain facts and ask her whether or not she is prepared to enter into a convention which will take account of those facts."

Mr. Dulles said in the course of his speech "The views expressed [at the conference] should be communicated to the Government of Egypt so that it can decide what it wishes to do in the light thereof. If Egypt finds these views generally acceptable as a basis for negotiating a treaty or convention, then there would be the task of drawing up a treaty between Egypt and the subscribers to these views If, on the other hand, Egypt is not willing to proceed on a basis which seems indispensable to the countries which largely use and depend upon the Canal, then . that will present a new situation to be considered by our Governments at that time. There might or might not in that event be further concerted decisions as between all or some of the participants in this conference That would be something to be determined by the Governments in the light of the circumstances It is from this standpoint that the U S delegation has prepared and circulated a paper which sets forth certain views as to how the future operation of the Suez Canal can be put upon a secure basis . . "

Mr. Krishna Menon, for India, submitted a different set of proposals suggesting that the Suez Canal should be operated by Egypt with the assistance of "a consultative body of user-interests formed on the basis of geographical representation and interests, and charged with advisory, consultative, and liaison functions." The Indian plan was worded as follows :

" Realizing that it is imperative that a peaceful and speedy solution to the Suez Canal situation must be found in accordance with the principles of the U.N. Charter, the Indian delegation proposes that negotiations be opened without delay on the basis of '

(1) The recognition of the sovereign rights of Egypt.

(2) The recognition of the Suez Canal as an integral part of Egypt and as a waterway of international importance.

(3) Free and uninterrupted navigation for all nations in accordance with the Constantinople Convention of 1888.

(4) The tolls and charges being just and equitable, and the facilities of the Canal being available to all nations without discrimination.

(5) The Canal being maintained at all times in proper condition and in accordance with modern technical requirements relating to navigation.

(6) Due recognition of the interests of users of the Canal.

"Recalling that the Convention of 1888 set out as its purpose the establishment of a ' definite regime destined to guarantee at all times and for all the Powers the free use of the Suez Maritime Canal ' ; taking note that Egypt has declared, as lately as July 31, 1956, that she is determined to honour all her international obligations , and recalling the 1888 Convention and the assurances concerning it given in the Anglo-Egyptian agreement of 1954, the Indian delegation makes the following proposals in the belief that they will provide the basis for negotiations for a peaceful settlement :

(1) That the Constantinople Convention of 1888 be reviewed to reaffirm its principles and to make such revisions as are necessary to-day, and, more particularly, incorporating provisions in regard to just and equitable tolls and charges and the maintenance of the Canal as set out in (4) and (5) above.

(2) That all steps for the purposes of (1) above be considered, not excluding a conference of the signatories of the 1888 Convention and all user-nations of the Canal.

(3) That consideration be given, without prejudice to Egyptian ownership and operation, to the association of international user interests with the Egyptian Corporation for the Suez Canal. [i.e. the new Egyptian Authority superseding the Suez Canal Company].

(4) That a consultative body of user interests be formed on the basis of geographical representation and interests, charged with advisory, consultative, and liaison functions.

(5) That the Government of Egypt transmit to the United Nations the annual report of the Egyptian Corporation for the Suez Canal

These proposals were presented after a lengthy speech by the Indian delegate in which he defended Egypt's right to nationalize the Suez Canal Company, upheld Egyptian sovereignty over the Canal, but at the same time emphasized that the Canal should be freely open to the shipping of all nations in accordance with the 1888 Convention.

Mr. Krishna Menon stressed that the Suez Canal was as much a "lifeline" for India as for the more advanced and industrialized nations of the West, as nearly 76 per cent of India's imports and about 70 per cent of her exports passed through the Canal. Recapitulating the arguments put forward by Mr. Nehru (see page 15018, second column), Mr Menon said India had "reservations with regard to the character and composition of this conference" and "deeply regretted the absence of Egypt from our midst." Although the Indian Government took the view that "no final solutions, or even approaches to final solutions, are possible without the participation of the country most concerned," it nevertheless considered that "our labours here may lead to the next step towards the fulfilment of our object"

Defending Egypt's right to nationalize the Suez Canal Company, Mr. Menon maintained that the latter was "a concessionaire from the Egyptian Government" and that its status, "legal, factual, and otherwise" was "derived from the concession granted by Egypt in the exercise of her sovereign rights." "It is necessary to bear in mind," he continued, "that the Suez Canal Company cannot be identified with the Suez Canal. The Company is only the agency that operates it . . . At the same time, while the former agreements, present agreements, and indeed the consensus of views at this conference, all recognize . that the Canal is an integral part of Egypt, it is necessary to state that this waterway, which connects two oceans and carries a very considerable volume of world traffic, has an international character . . "

After reiterating that nationalization "was an act within the competence of the Egyptian Government," Mr Menon went on : "I think, however, that the manner in which it was carried out aggravated the situation. We would have liked to have seen it carried out in the normal manner of international expropriation—with adequate notice. and in a less dramatic manner . . But that does not alter the fact that the Egyptian Government had the right to nationalize . . "

Mr Menon said that India "yielded to no-one in considering that freedom of navigation in terms of the 1888 Convention, and in conformity with international law and usage, must always be maintained" Freedom of navigation had been confirmed by the 1888 Convention, and its maintenance was an obligation, not of the Suez Canal Company, but of the signatories to the Convention on the one hand and of Egypt on the other In an indirect reference to the Egyptian ban on Israeli shipping, Mr. Menon added

" It has often been said that, in spite of the freedom of navigation clauses [in the 1888 Convention], there has been obstruction to navigation in one instance . . The Egyptian Government contends that denial of passage to a particular nationality is consistent with the provisions of the U N. Charter because it is bound up with the security of Egypt. My Government does not seek to pronounce on it, but if the controversy is on the interpretation of the Charter . . the right procedure is for the aggrieved party to go to the World Court. We would be the first to say that if the verdict of the World Court goes against the Egyptian Government, they ought to abide by it . . . "

Reverting to the position of the Suez Canal Company, Mr. Menon said that the whole world knew that the Company's concession would have ended in 1968. "Therefore, apart from the manner in which the nationalization was effected, and the crisis atmosphere it has created, it would appear that the act of nationalization has been antedated by 12 years." Not only the present Egyptian Government, but no former Egyptian Government, had been willing to extend the Company's concession, and as far back as 1910 the then Khedivial Government had refused to entertain such a proposal "I quote this," Mr. Menon said, "to demonstrate that the termination of the [concession] agreement would have had to come some time—in 1968 instead of now. What has happened is the antedating of this position . . . "

After presenting the Indian Government's proposals as set forth above, and stressing that they maintained Egypt's sovereignty on the one hand and provided for the efficient and unhindered use of the Canal on the other, Mr Menon said that the only alternative was the "imposition by the great Powers" of an international authority, against the will of the Egyptian Government and "with all the consequences of the use of force that would necessarily be involved" India herself, he pointed out, would be a victim "whether the Canal went out of service by the action of Egypt or by an act of hostility or war or conflict." But she was "even more concerned . . . at the dreadful consequences which would in effect reverse the currents that have been set in motion in regard to the relations between the Western and Eastern countries and peoples, including the peoples of Asia and Africa, during the last 30 or 40 years We would hate to see the reversal of those currents . . . "

In conclusion, Mr Menon pleaded for a "solution of conciliation and not of dictation."

At a subsequent press conference, Mr. Krishna Menon described India's proposals as "a carpet on which the Western side and Egypt could walk and meet" for a negotiated settlement of the dispute. He expressed the view that the U.S. plan as presented by Mr. Dulles could not be reconciled with Egyptian sovereignty.

August 21. - Four-Power Amendments to U.S. Plan. - Acceptance by Mr. Dulles. - Soviet, Indonesian, and Ceylonese Support for Indian Plan.

The Pakistani Foreign Ministry (Mr. Chowdhury), speaking also on behalf of Persia, Turkey, and Ethiopia, proposed certain amendments to the U.S. plan with a view to making it more conciliatory in character and thus more acceptable to Egypt. These amendments were accepted by Mr. Dulles and incorporated in the U.S. proposals, which were supported by all the countries represented except the Soviet Union, India, Indonesia, and Ceylon, which supported Mr. Krishna Menon's proposals.

Mr. Chowdhury spoke as follows. "We must start with the unqualified acceptance of negotiation with Egypt. There should be no question whatsoever of any imposition of the will of this conference on the Egyptian Government. I have made it clear that we [Pakistan] will only participate if a negotiated and peaceful solution is the aim In reaching a solution the rights of all the parties have to be ensured . . The utmost importance should be attached to the agreement of Egypt to any proposal this conference might adopt . . . "

After expressing the opinion that there was "considerable unanimity on essentials," Mr. Chowdhury said that "the main conflict seems to centre round the composition and authority of the body which shall be responsible for the working of the Canal" Mr. Krishna Menon had spoken of "the association of user-interests" with the Egyptian Authority, while Mr. Dulles had spoken of "institutional arrangements for co-operation between Egypt and other interested nations." "It is agreed by all," he continued, "that user-interests should somehow be associated in the body set up for the management of the Suez Canal. I submit . . that there is no substantial difference between the proposals of the U.S and Indian delegates . . . In view of the fact that acceptance by Egypt would be the corner-stone of any ultimate settlement, I would request the conference to consider the admirable proposals of Mr. Dulles as a basis for negotiations with Egypt . . . "

On behalf of Persia, Turkey and Ethiopia, as well as of his own Government, Mr. Chowdhury then proposed two textual insertions in the U.S. draft, both of which were accepted by Mr Dulles The first amendment, referring to the payment of compensation to the Suez Canal Company, was incorporated in the preamble. The second amendment, incorporated in point (2) of the U S. text, said that the future system of Canal management envisaged in the U S. plan "would be established with due regard to the sovereign rights of Egypt." As a result of these insertions (given below in italics) the amended sections were worded as follows :

"The Governments approving this statement, concerned by the grave situation regarding the Suez Canal, seeking a peaceful solution in conformity with the purposes and principles of the United Nations, and recognizing that an adequate solution must on the one hand respect the sovereign rights of Egypt, including its right to just, fair compensation for use of the Canal, and on the other hand safeguard the Suez Canal as an international waterway in accordance with the Suez Canal Convention of 1888, *assuming for the purposes of this statement that just and fair compensation will be paid to the Universal Company of the Suez Maritime Canal and that the necessary arrangements for such compensation, including a provision for arbitration in the event of disagreement, will be covered by the final settlement contemplated below,* join in this expression of their views

(1) They affirm that, as stated in the preamble of the Convention of 1888, there should be established a 'definite system destined to guarantee at all times and for all the Powers the free use of the Suez Maritime Canal.'

(2) Such a system, *which would be established with due regard to the sovereign rights of Egypt,* should assure

(*a*) Efficient and dependable operation, etc.

Mr. Shepilov (U.S.S.R.), Sir Claude Corea (Ceylon), and Mr. Abdulgani (Indonesia) spoke in favour of the Indian plan, while the Marquis of Santa Cruz (deputising for Señlor Artajo, who had returned to Madrid to consult his Government) asked that the Spanish proposals should be incorporated in the amended U.S. plan, or, alternatively, be presented separately to Egypt as a basis for negotiation.

M. Shepilov asserted that the U.S. plan was "contrary to the national rights of Egypt" and would mean the "reimposition of colonialism" After saying that nationalization of the Canal had not disrupted the free passage of shipping, which remained "normal," he alleged that the Suez Canal Company was trying to disrupt the operation of the Canal by bringing pressure upon the Canal pilots and technical staff He believed, nevertheless, that there had been an "improvement in the international atmosphere" since the conference began, and urged acceptance of the Indian plan, which, he said, was based on the maintenance of Egypt's sovereign rights.

Mr. Menzies (Australia) deprecated Mr. Shepilov's references to "colonialism," declaring that it was "impossible to believe that 16 or 17 nations represented at this table, including several who were once colonies and now enjoy full sovereignty, could be accused of entering into a conspiracy against the sovereign rights of Egypt."

August 22. - Mr. Shepilov's Denunciation of U.S. Plan. - Mr. Selwyn Lloyd's Defence of Majority Proposals.

Although the Conference was due to end on this date, it was agreed to adjourn it for 24 hours in order that Mr. Krishna Menon might have time to receive instructions from the Indian Government. The principal developments on this date were a bitter attack on the U.S. plan by Mr. Shepilov, a defence of the majority proposals by Mr. Selwyn Lloyd, and an announcement by Señor Artajo (who had returned from Madrid) that Spain would adhere to the amended U.S. plan.

Mr. Shepilov declared " . . The U S plan envisages that the Canal should be operated by an international body—the Suez Canal Board—rather then by Egypt. Egypt would afford to that body 'all rights and facilities' to operate the Canal Therefore Egypt would, in fact, relinquish her sovereign rights in favour of an international body which would be in the hands of a group of nations who would dispose of Egypt's national wealth . . . Egypt is to be a kind of poor relation under this international body. She is kindly allowed a place in her own home . . Clearly some Powers have not yet reconciled themselves to the fact that Egypt has become an independent State which cannot accept violations of its lawful rights and cannot allow any discrimination in regard to itself.

"The idea suggested by the Australian representative—to buy from Egypt her sovereign rights to the Suez Canal—is utterly incompatible with respect for the national dignity of the Egyptian people The national sovereignty of any State cannot be the object of a commercial transaction . . A proposal of this kind is an expression of colonialism in modernized form . . .

"The U.S. proposal . . . does not provide a compromise acceptable to the parties concerned. Its purpose is to remove the Canal from the sovereignty, ownership, and operation of Egypt. Instead of the Canal being dominated by one Power—and in the past that Power was in fact Britain—it is now suggested that the Canal be dominated by several foreign Powers. A proposal of that kind is unreal because it ignores the substantial changes that have taken place in the East during recent decades.

"The action of the Egyptian Government is based on the long process of the struggle of the Egyptian nation against colonialism and national oppression, which in Egypt was most vividly manifested in foreign domination over the Suez Canal. An attempt to impose on Egypt a solution against which the Egyptian nation has been fighting for years, and which is at variance with the sovereign rights of Egypt, would mean giving rise to an acute conflict and causing great anxiety throughout the whole area of the Near and Middle East, which cannot be in the interests of the users of the Canal."

The British Foreign Secretary replied to Mr. Shepilov and at the same time spoke of the results of the conference as a whole.

Mr. Selwyn Lloyd spoke as follows " . . . Mr Shepilov included in his statement of the positive work of the conference the fact that the Canal was still working and that nationalization has not disrupted traffic. Unfortunately he made an attack upon the Suez Canal Company, and by implication upon the French and British Governments, on the ground that they are attempting to disrupt the operation of the Canal.

"His contention appeared to be that the Egyptian Government not only has the right to nationalize the assets of the Company but also to nationalize its employees. These men are not chattels. They have, or ought to be allowed to have, the right of free choice. The

Company invited them to make a free choice as to whether they wished to abide by their contractural obligations towards their lawful employers or whether they would serve the new Egyptian Authority.

"At the same time, upon the advice of the British and French Governments, the Company indicated a wish that their employees, whatever their decision, should remain at their posts pending the outcome of this conference. That was a reasonable and conciliatory attitude For how long after the end of this conference the employees will be willing to stay at their posts is a different question. There is no threat to Egypt in this It is a plain statement of a plain fact Free men should be allowed a free choice.

"The only threats have come from Egypt. Within the last few days the Company's employees .. have been invited by the Egyptian authorities to declare that they owe allegiance solely to the new Egyptian management, to whom in fact they have no obligations If they assert any other allegiance, or fail to return to work at the end of their leave, they make themselves liable to the penalties laid down by the nationalization law, which includes imprisonment, or to dismissal That is hardly the way to create confidence among the employees. Mr. Shepilov said that the Canal was working satisfactorily. In fact the number of daily convoys has already been cut from four to three.

"I cannot agree with what Mr Shepilov said. Nevertheless, for different reasons, I believe that this conference has been useful and successful From the beginning, the U K Government wished to proceed by way of an international conference towards a peaceful solution I repeat my regrets that no representative of Egypt has been present I do not think he could have failed to be influenced by the atmosphere. I propose to send a copy of the record to the Egyptian Government That atmosphere . . has been one of scrupulous regard for the susceptibilities of Egypt. Most of the delegates have expressed regret at the manner in which Colonel Nasser chose to act Nevertheless, there has been clearly manifested a common will to reach a reasonable settlement.

"What has emerged from our series of meetings? First, there is agreement on the vital international importance of the Canal. The delegates have reaffirmed soberly but convincingly the importance to them of free transit through the Canal, and of its efficient working This is not a conflict between East and West I cannot emphasize that too strongly. I hope that world opinion will not be led astray by that parrot-cry. It is common ground between us that the standard of living of countless millions east and west of Suez depends to no small extent upon this international waterway.

"Secondly, there is complete agreement between us that there must be association of user-interests with Egypt in the management of the Canal. There is an overwhelming majority in favour of an international system The Convention of 1888 contains limitations upon Egyptian sovereignty. As recently as 1954 Egypt confirmed its agreement to such limitations Therefore, although I understand the emotional appeal aroused by the unconditional assertion of sovereignty, it is common ground that there must be some restraint

"The third point which has emerged clearly from the discussions is that there are two propositions for a solution of this problem. One method is a reaffirmation of the 1888 Convention, coupled with the establishment of an advisory body of users or consultative body of users. That to our mind would not provide the necessary security. An advisory body would be without effective power It could do nothing except proffer advice or make representations. The Canal would be under the effective control of one Government. The second method is to have an operating organization charged with the responsibility of managing and operating the Canal

"We believe that such an agency is an essential part of any settlement for three reasons:

(1) Because it is only such an agency which will command the continued confidence of the technicians employed on the Canal.

(2) Only by the creation of such an agency can the operation of the Canal be insulated from politics, domestic and international

(3) Only if there is such an agency will sufficient confidence be engendered among those who have to produce the capital required for the development and expansion of the Canal.

That is our position. We seek an agreement We seek a peaceful solution. In common with all the other delegates who have supported the U S. statement, I accept the amendments proposed by Pakistan .. The five-Power statement, as it has now become, seems to provide an admirable basis for a peaceful solution It has been overwhelmingly supported at this conference. That fact we warmly welcome.

"As Mr. Menzies pointed out, there are many advantages for Egypt in the arrangements proposed. Equally important, the future of the Canal can be assured . . As a result of this conference, an impressive body of international public opinion has expressed its views. Let us hope that due weight will be given in Cairo to the results of our discussions. Let us not forget that the Governments adhering to the U.S. statement control 80 or 90 per cent of the tonnage passing through the Canal, and include countries whose pattern of trade is vitally dependent upon it . ."

August 23. - Ending of the London Conference.

The conference ended on this date with a formal statement by Mr. Macdonald (New Zealand) on behalf of the 17 countries —excluding Spain—supporting the majority plan, referred to as the "five-power plan" [i.e. the U.S. plan as amended by Pakistan, Persia, Ethiopia, and Turkey]. This statement declared that the 17 countries had requested the Governments of Australia, Ethiopia, Persia, Sweden, and the United States, under the chairmanship of Mr. Menzies, to approach the Egyptian Government on their behalf, to explain to it the purposes and objectives of the five-Power plan, and to ascertain "if Egypt would agree to negotiate a convention on the basis thereof."

As regards the Spanish position, Mr. Macdonald explained (*a*) that Spain supported the five-Power plan, but (*b*) if that plan should be unacceptable to Egypt as a basis for discussion, the Spanish delegation wished its own proposals to be presented to the Egyptian Government as an alternative.

No general statement was issued at the end of the conference, the outcome of which was twofold: (1) on the one hand, Mr. Selwyn Lloyd (as chairman of the conference) forwarded to the Egyptian Government a verbatim report of the entire proceedings, including both the five-Power plan and the Indian plan; (2) on the other hand, the five-member Committee (which subsequently took the name of the Suez Canal Committee) approached the Egyptian Government separately to find out its views on the majority plan.

President Nasser's Acceptance of Invitation to meet Five-Power Committee.

Mr. Menzies called upon the Egyptian Ambassador in London on August 24 and requested him to transmit to President Nasser the following message on behalf of the Suez Canal Committee and of the 18 countries (including Spain) supporting the majority plan:

"I have been requested by the committee .. of which I am chairman, and acting on behalf of the [18] Governments . . . to transmit the request of the committee to meet with your Excellency to place before you and explain the views of the Governments regarding the Suez Canal The committee ask if your Excellency would, as a matter of urgency, advise me whether you would agree to a meeting with the committee for that purpose I would suggest that the time and place of any meeting would be a matter of arrangement after I have had your Excellency's reply to this message"

President Nasser's acceptance of a meeting with the five-Power committee was handed to Mr. Menzies by the Egyptian Ambassador on Aug. 28. The reply acknowledged the receipt of Mr. Menzies' message of Aug. 24 and "agreed to the proposed meeting as requested by the committee." On the following day (Aug. 29) it was announced that President Nasser had agreed to meet the Committee in Cairo on Sept. 3. The Foreign Ministers of Pakistan and Indonesia (Mr. Chowdhury and Mr. Abdulgani), as well as Mr. Krishna Menon, had discussions with President Nasser in Cairo *en route* for the London conference, while Mr Menon and Mr. Abdulgani also broke their return journey in Cairo to see President Nasser after the conference ended.—(Times - Daily Telegraph - Manchester Guardian - Observer - Sunday Times - New York Times - New York Herald Tribune - Le Monde, Paris - Australian News and Information Bureau - Indian High Commissioner's Office, London - Pakistan High Commissioner's Office, London - New Zealand Department of External Affairs - Netherlands News Agency - Norwegian Embassy, London - Turkish Embassy, London - Indonesian Embassy, London - Ceylon Government Information Department, Colombo) **(15041 A.)**

A. NETHERLANDS. — Royal Family. - Queen Juliana to break with Faith-Healer.

A statement was issued on Aug. 24 on behalf of Queen Juliana of the Netherlands and Prince Bernhard stating that the commission of three statesmen (Professor Beel, Professor Gerbrandy, and Jonkheer Tjarda van Starkenborgh Stachouwer) appointed on June 28—see 14975 B—had "reported their findings to us and given us their advice." After expressing their sincere thanks to the commission, Queen Juliana and Prince Bernhard added: "Their advice has been a very valuable contribution to the solution of difficulties that had arisen. We now look forward to the future with confidence."

The commission stated on the same day that its task had been completed and that there was no further ground for concern about the questions that had arisen in connexion with the Royal Family. It announced that Queen Juliana had "permanently broken off all relationship" with the faith-healer, Miss Greet Hofmans, and would no longer see her; that she would no longer attend religious conferences at Het Loo (residence of Princess Wilhelmina, the former Queen), at which Miss Hofmans had taken a leading part, and that the integrity of Miss Hofmans herself was not in question. It was further stated that there was no question of the Queen's abdication, "now or in the future," and that the plans for Princess Beatrix (the heir apparent) to study at the University of Leiden would continue unchanged.—(Algemeen Handelsblad, Amsterdam - Nieuwe Rotterdamse Courant) **(14975 B.)**

A. UNITED KINGDOM. — White Paper on Proposed Changes in Structure of Local Government.

A White Paper proposing a number of changes in the structure of local government, including the setting-up of two Local Government Commissions for England and Wales, was published on July 31 under the title *Local Government: Areas and Status of Local Authorities in England and Wales* (H.M. Stationery Office, 1s.).

The White Paper emphasized that a fundamental alteration of the structure of local government could only be justified if it had shown itself to be incapable of meeting present-day needs. There was no convincing case for radically re-shaping the existing forms of local government in England and Wales, but it was necessary to overhaul the existing system and to make such improvements as would bring it up to date.

To do this, it was suggested (1) that new machinery and procedure were required for reviewing local authority areas and status and for recommending changes, (2) that the principles governing promotion to county borough status needed to be revised; (3) that the pattern of local government in large built-up areas, or conurbations, needed to be improved with a view to creating larger units of administration and facilitating the handling of common problems; and (4) that the number of unduly small county district authorities should be reduced.

It was proposed that two Local Government Commissions, one for England and one for Wales, should be set up "to provide independent and informed guidance," because at present "there exists no satisfactory means of reviewing the organization of local government comprehensively over wide areas and of determining what changes should be made" These Commissions would make recommendations to the Minister of Housing and Local Government on the creation and extension of county boroughs, on any necessary alteration in county boundaries, and on the organization of local government in conurbations. At present the only machinery available for the creation of county boroughs was the promotion of a Private Bill—a practice described as "unsatisfactory, costly, and often abortive"—and the creation of such Local Government Commissions would therefore make the Private Bill procedure unnecessary. [It was pointed out that the last county borough created—Doncaster—was in 1926.] After Parliamentary confirmation of the recommendations, there would be a "standstill" on further changes for a substantial period—the local authority associations had suggested 15 years

One of the Commission's first tasks would be to consider applications by local authorities for promotion to county borough status. It was proposed that, unless the circumstances were exceptional, the qualifying figure should be raised from the present level of 75,000 to 100,000. Within a conurbation [e g Greater London, South-East Lancashire, the West Midlands, West Yorkshire, Merseyside, and Tyneside], where a multiplicity of autonomous local authorities would be undesirable, it was recommended that the figure should be at least 125,000. The raising of the population limits, however, would not necessarily imply "demotion" of existing county boroughs with lesser populations.

The Commissions would be entitled to recommend changes in county boundaries and, in exceptional cases, would not be precluded from recommending the amalgamation of one county with another, or the transfer of territory This, it was foreseen, could happen where the creation of county boroughs left the county no longer a viable unit of administration.

The White Paper expressed the view that the present pattern in the conurbations was not conducive to efficiency or economy, and that it needed to be simplified by reducing the number and variety of local authorities Authorities "of a uniform type" might be created throughout a conurbation

Greater London would come within the scope of the Commission's review, but it was recommended that no promotions to county borough status should be made in Middlesex, on the grounds (1) that the county contained 11 boroughs which might well qualify for promotion to county borough status, and in so doing leave "bits and pieces no longer constituting a viable unit," and (2) that it was desirable to maintain the existence of the county as a component of the Greater London conurbation

The White Paper further suggested that many county districts were too small and that, by amalgamation or otherwise, authorities of reasonable size should be created. County councils were advised to review parish areas to see that where practicable each parish was represented by a parish council.

The White Paper concluded with the assurance that, before framing the legislation that would be required to give effect to the proposed changes, the Government would "wish to have further discussions with the representatives of the local authorities and to consider the views which may be expressed in Parliament and elsewhere." (Times - Daily Telegraph)

B. UNITED STATES. — New Solicitor-General.

Mr. J. Lee Rankin, head of the Justice Department's Office of Legal Counsel, was nominated by President Eisenhower on Aug. 7 as Solicitor-General of the United States in succession to Mr. Simon E. Sobeloff, who had been appointed a judge of the U.S. Court of Appeals.—(New York Herald Tribune)

(Prev. rep. 13408 D.)

C. OBITUARY. — Cardinal Griffin.

Cardinal Griffin, Roman Catholic Archbishop of Westminster, and the only British member of the Sacred College, died on Aug. 20, aged 57.

Bernard William Griffin was born in Birmingham on Feb 21, 1899, the son of a bicycle manufacturer Educated at Cotton College (North Staffs), the oldest Roman Catholic college in England, and Oscott, the seminary of the Archdiocese of Birmingham, he served in the Royal Naval Air Service during the 1914-18 war and subsequently studied in Rome at the English College and the Gregorian University Ordained in 1924, he returned to England in 1927 to become secretary to the Roman Catholic Archbishop of Birmingham (then Dr. McIntyre), and later became Chancellor of the Archdiocese, Director of Studies for the Catholic Evidence Guild, and a member of the religious advisory committee of the B B C. In 1937 he was made Administrator of Father Hudson's Homes, the largest charitable institution in the country for the care of children, in which capacity he organized the rescue work of all Roman Catholic societies. In 1940 he was appointed by the Pope as Auxiliary Bishop of Birmingham with the title of Bishop of Abya.

Dr Griffin became Roman Catholic Archbishop of Westminster in 1943, and three years later was elevated to the College of Cardinals, being at the time its youngest member (he was then 44) In subsequent years he became well known as a forthright speaker for his Church on social problems such as divorce, the importance of family life, and the post-war decline in moral standards, and also as an outspoken opponent of Communism and other forms of totalitarianism He made a 7,000-mile tour of Canada in 1947, and also paid visits during the post-war years to a number of West European countries and the United States. In 1950 he was appointed Papal Legate to the congress which celebrated the centenary of the restoration of the Roman Catholic Hierarchy of England and Wales, and in the same year led the Holy Year pilgrimage of the English and Welsh Hierarchy to Rome Though in serious ill-health for some time before his death, he had continued his ecclesiastical duties without intermission.

After lying in State in Westminster Cathedral, the body of Cardinal Griffin was interred in the crypt of the Cathedral on Aug. 28. The Requiem Mass was attended by episcopal and diplomatic representatives of over 40 countries, including Cardinal Liénart (Archbishop of Lille), Cardinal McGuigan (Archbishop of Toronto), and Archbishop O'Hara, Apostolic Delegate to Great Britain. Tributes to the late cardinal were paid by Anglican, Free Church, and Jewish religious leaders, in addition to those paid by the Roman Catholic Church and laity.—(Times - Daily Telegraph - The Universe)

D. BELGIUM. — The Marcinelle Mine Disaster.

One of the worst mining disasters for many years occurred in Belgium on Aug. 8, when 263 miners—more than half of them Italians—lost their lives after being trapped at depths of 2,000 to 3,000 feet in the Bitter Heart mine at Marcinelle, near Charleroi. The disaster occurred when a wagon fell into a ventilating shaft, cutting an electric cable and causing a short circuit. Fire broke out in the underground galleries and destroyed the lifts, thereby isolating the miners who were working at four levels varying from 2,300 feet to over 3,000 feet.

About 275 miners were in the pit at the time of the disaster, of whom a small number near the mouth of the pit succeeded in escaping The great majority, however, were entombed deep down, and the rescue workers were unable to reach them in time because of the blocking of galleries by falls of roof, lethal concentrations of carbon monoxide, fire, thick smoke, and intense heat Despite intensive rescue operations by day and night, the rushing to the spot of all available fire-fighting equipment from a wide area, and assistance by French and German mining specialists, it proved impossible to reach the deeper levels of the mine in time to rescue any of the entombed men By Aug. 20 the bodies of about 80 miners had been recovered from the deeper levels, while on Aug 23 the bodies of another 166 victims were recovered at depths of 3,400 feet As stated above, over half the victims of the disaster were Italians, most of the others being Belgians, some German, Greek, Polish, Yugoslav, and Ukrainian miners also lost their lives, as well as a British mining engineer who was in the pit at the time.

A relief fund for the families of those who had lost their lives was opened by the Belgium Government, while 2,000,000 Belgian francs (about £14,000) was contributed by the High Authority of the European Coal and Steel Community. Relief funds were also sent by the Gulbenkian Foundation in Lisbon (see 15031 A), the Holy See, and miners' unions in Britain and other countries. Monday, August 13, was observed throughout Belgium as a day of national mourning for the Marcinelle disaster.

A commission of inquiry into the Marcinelle disaster was appointed by the Belgian Government on Aug. 26, its 24 members including representatives of the High Authority of the European Coal and Steel Community and of the I.L.O.

(La Nation Belge, Brussels - Le Monde, Paris)

A. HUNGARY. — Resignation of M. Rakosi. - General Farkas expelled from Communist Party. - Government Changes. - New Five-Year Plan Directives. - Official Admission of Illegal Executions and Forced Confessions.

It was announced by Budapest Radio on July 18 that M. Matyas Rakosi had resigned as First Secretary of the Hungarian Workers' (Communist) Party and had been succeeded by M. Erno Gero, a First Deputy Premier. The announcement said that M. Rakosi had tendered his resignation on the grounds of his age (64) and the fact that he had been in ill-health for two years. Moreover, in a letter to the Central Committee of the Workers' Party, M. Rakosi had admitted that his mistakes "in the sphere of the cult of personality and of Socialist legality" had been more serious than he had first thought, and had reached the conclusion that it would "hamper the development of Socialism" in Hungary if he were to remain First Secretary of the party.

M Rakosi, the leading personality in the Hungarian Communist movement for many years, had previously admitted that the "cult of the individual" had given rise to "serious political and theoretical mistakes" in Hungary (see page 14820, first column) In his letter of resignation he admitted that he himself had made "grave mistakes" in the past, and said that their effects had been "graver than he had thought" He had particularly recognized the "gravity" of his errors after M Khrushchev's speech to the 20th Congress of the Soviet Communist Party, and had recognized that if he did not resign "my mistakes would always give an opportunity for attacks by the enemy, and Socialist development would suffer severely" In tendering his resignation, M Rakosi took the blame for the slow rehabilitation of persons who had been unjustly arrested in the past, and for the fact that there had been insufficient "criticism and self-criticism" by the "leading organs of the party."

The Central Committee accepted M Rakosi's resignation from the post of First Secretary, and paid tribute to his past services to the Hungarian Communist movement. It was understood that M Rakosi would remain a member of the party's Central Committee and Politburo

Expulsion of General Farkas.

General Mihaly Farkas, the former Defence Minister, was expelled from the Hungarian Workers' Party on July 22 for "violations of Socialist legality, unjustified persecution of former leading cadres of the party, and establishing an atmosphere of mistrust." He was also deprived of his military rank. A statement by the Central Committee said that "during the last few years the activities of Farkas inside the party and in the administration were increasingly marked by methods of leadership incompatible with those of a Communist leader, by the abuse of duties with which he had been entrusted, by abuse of power, by conceit, and by an addiction to the excessive cult of his own personality."

General Farkas was previously the superior of Gabor Peter, the former head of the political police, who had been blamed for the trial of Laszlo Rajk, the ex-Foreign Minister who was executed in 1949 on charges of conspiracy to overthrow the Government with Yugoslav assistance. Gabor Peter was sentenced to life imprisonment in 1954 (see 13464 B), and Laszlo Rajk was posthumously rehabilitated by M. Rakosi in March last (see page 14820)

M. Rakosi on Democratization of Political Life.

In March, 1956, the Central Committee of the Hungarian Workers' Party unanimously adopted a resolution instructing the Politburo to "elaborate measures which would be in keeping with the resolutions of the 20th Congress of the Soviet Communist Party and which might be applied to conditions in Hungary." These measures were described by M. Rakosi in a report submitted on May 18 to the Budapest branch of the party.

After admitting his own personal responsibility "in the dissemination and support of the cult of the individual," as well as in "unlawful acts connected with the cult," M Rakosi stated that a number of measures had been taken during the past three years "to guarantee Socialist observance of the law," including the abolition of internment camps, the re-examination of political trials, the full rehabilitation of innocent persons who had been illegally sentenced, and the granting of an amnesty to persons who were guilty. He announced also that all former Social Democrats who had been arrested had been set at liberty, and that rehabilitation proceedings still pending would be completed "satisfactorily and decisively" within a few weeks.

In accordance with the March resolution, M. Rakosi continued, the People's Front would be transformed into "the broadest movement of Hungarian society, embracing all patriotic and democratic forces of the nation" and led by the party and the "worker-peasant alliance." Furthermore, the functioning of the National Assembly would be improved and legislation enacted "only after ramified discussion and parliamentary debate, preceded by thorough work by committees of experts." Measures would also be taken to eliminate over-centralization and bureaucracy. M Rakosi added that there was "no justification for the sharpening of the class struggle" and that the Government and party would "promote an atmosphere of confidence" and "place their trust in all persons who wish to work honestly and help the people's democracy."

Criticisms of Communist Regime. - Party Warning against "Demagogues."

Increasingly outspoken criticisms of the Government and the party, particularly since the Poznan riots in Poland, led the Central Committee to issue a warning on July 1 calling upon the Hungarian workers to be on their guard against "demagogues," and denouncing "demagogic statements directed against the party and the people's democracy." The statement said that "the provocation of Poznan shows that the Hungarian workers must resist all such attempts with determination."

The warning was apparently issued as a result of demonstrations on the nights of June 18 and June 27, when the Petofi Club—a discussion forum organized by the Communist youth movement—held two meetings at the Budapest Officers' Club. These meetings, attended by some 6,000 people—including many Communists of long standing, and a number of officials and intellectuals—developed into outspoken attacks on the present regime and against M Rakosi in particular. At the meeting on June 18, Mme. Rajk (widow of the Foreign Minister executed as a "Titoist" in 1949) was reported to have denounced M Rakosi by name as being directly responsible for her husband's death, and to have described the Government's treatment of political prisoners as much worse than in the days of Admiral Horthy On June 27 the editor of *Szabad Nep* (M. Horvath) was reported to have been loudly applauded when he declared that the application to Hungary of the principles set forth at the Soviet Party Congress "must be decided in Hungary and not in Moscow or Belgrade" At both meetings demonstrations occurred in favour of the restoration to power of M Imre Nagy, the former Prime Minister who had been dismissed and expelled from the party in the previous year on the initiative of M. Rakosi.

Ministerial Changes.

Following M. Gerö's appointment as First Secretary of the Hungarian Workers' Party in succession to M. Rakosi, the following governmental changes were announced in Budapest on July 30: M. Istvan Hidas—First Deputy Premier; M. Gyorgy Marosan—Deputy Premier; M. Imre Horváth—Foreign Minister; M. Sandor Czottner—Minister for Coal-mining and Power Industries; M Gergely Szabó—Minister for the Chemical Industry; M. Rezso Nyers—Minister for the Food Industry; M. Albert Kónya—Minister of Education. It was also announced that M. Gero and M. Sandor Ronai (president of the National Assembly) had been appointed members of the Presidential Council.

M. Gero had resigned as First Deputy Premier on becoming First Secretary of the Hungarian Workers' Party, his former post being taken over by M. Hidas, an industrial expert. M. Imre Horvath, who succeeded M Boldoczky as Foreign Minister, had served as Minister in Prague. London, and Washington, and also at the Moscow Embassy. M Marosan, a former Social Democrat, was arrested in 1950 and had only recently been rehabilitated, when he was elected to the Central Committee and Politburo of the Workers' Party. M Boldoczky, the former Foreign Minister, was appointed Ambassador in Moscow.

Relaxation of Restrictions. - New Five-Year Plan Directives.

The Prime Minister, M. Hegedus, in a speech to the National Assembly on the same date (July 30), said that the Government regarded it as its foremost task to give the Hungarian people better living conditions and more freedom. He also announced that the Politburo of the Hungarian Workers' Party had decided to make a number of important amendments to the directives for the Second Five-Year Plan (1956-60).

As regards measures to relax the existing restrictions, M. Hegedus announced

(1) The forthcoming abolition of the compulsory Government loan whereby the income of all citizens had been reduced by between five and ten per cent.

(2) The abolition of the law under which transfer of residence to the larger towns was subject to a permit. [M Hegedus explained that this step would particularly benefit those persons who had been deported from Budapest but had been refused a permit for their return to the capital, even after their deportation had been officially ended.]

(3) Closer supervision of the activities of the police, and the transfer of prison administration from the Ministry of the Interior to the Ministry of Justice.

(4) A revival of parliamentary activities, whilst at the same time restricting the functions of the Presidential Council.

M Hegedus also advocated a resumption of diplomatic relations with the German Federal Republic and an improvement of Hungarian relations with Austria.

As regards the new directives for the Second Five-Year Plan, M. Hegedüs stated that industrial production during the period of the Plan would be increased by only 47-50 per cent, instead of by 50-52 per cent as originally provided. Within the overall percentage the production of raw and basic materials would be increased by approximately 58 per cent, combined with a smaller increase in manufacturing industry, to overcome the present insufficient production of raw materials and semi-manufactured products, which had led to a considerable increase in imports. The manufacture of production goods would be raised by 58-60 per cent, and that of consumption goods by 38-40 per cent.

Specifically, Hungarian industry would increase the production of telecommunications equipment, precision machinery, certain machine-tools, and pharmaceutical products. Hungary would supply to other "friendly countries" [i.e. Soviet-bloc countries] bauxite, aluminium, and other goods, and, in conformity with the decisions of the East European Council of Mutual Economic Assistance (see 14900 A), would concentrate particularly on the manufacture of heavy buses, coaches, and diesel locomotives.

The revised plan provided for higher expenditure on power projects, the building of the first atomic power station being planned to begin in 1957 as a result of technical aid by the Soviet Union. The greatest increase would take place in the chemical and metallurgical industries, while light industry would raise its production by about 25 per cent, and the supply of consumer goods to the population would be increased by about 40 per cent through a reduction of exports

Agricultural production generally would be increased by 27 per cent, and the output of State farms by 40 per cent. The total planned investment in agriculture would increase by 50 per cent as compared with the First Five-Year Plan and the "socialist" [i.e. collectivized] sector would be increased to 55-60 per cent of the total agricultural acreage, although the principle of voluntary membership of farm co-operatives would be strictly maintained. It was planned that the real income of workers during the five-year period would rise by 25 per cent, and that a 46-hour week would be introduced by 1960

Improved Working of Parliament.

During the National Assembly's session a Bill was adopted changing the Assembly's Standing Orders with a view to ensuring longer and more regular parliamentary sessions and more adequate consideration of legislation by committees of the Assembly. At the same time members of the Assembly were given the right to question Ministers, which had been virtually in abeyance during recent years.

Admissions of Illegal Executions and Forced Confessions.

The Chief Prosecutor (M. Gyorgy Non) gave the National Assembly a report on the activities of his department.

M Non admitted that those former leading functionaries of the party and State who had been executed in the past had been sentenced on the basis of untrue accusations; they had since been posthumously rehabilitated and their families were being indemnified He also admitted that thousands of innocent people had been imprisoned or sentenced to death during the last few years, and that forced confessions had been extracted from them by illegal means. While promising that "Socialist legislation would never again be violated," M. Non emphasized that no-one would be allowed to criticize the Communist system In conclusion, he admitted that both the police and the law courts had committed "numerous errors," but stated that 23,000 people had benefited from amnesties since 1954 and that the number of those imprisoned had been reduced from 37,000 in 1955 to 27,800 at present.

Release of M. André Marton.

It was announced in Budapest on Aug. 16 that the Hungarian Presidential Council had pardoned M. André Marton, the Associated Press correspondent who had been sentenced to six years' imprisonment in January last on charges of "espionage." Madame Ilona Marton, a correspondent of the United Press, had been released in April.—(Hungarian Review, Budapest - Neue Zürcher Zeitung - Le Monde, Paris - Times - Manchester Guardian - New York Times) **(Prev. rep. 14817 A; Cabinet, 14876 C; 14630 B; General Farkas, 14208 B; Marton Case, 14806 B; 14653 A.)**

A. BULGARIA. — New Foreign Minister.

M. Karlo Lukanov, a Deputy Premier, was elected Foreign Minister by the Bulgarian National Assembly on Aug. 18 in succession to Dr. Mincho Neichev, who had died on Aug. 11, aged 69.

Dr. Neichev, the son of a merchant, studied law at the Universities of Geneva, Berne, and Brussels, set up in practice in Bulgaria, and served as a reserve officer in the Balkan Wars and World War I. A Socialist from his youth, he subsequently joined the Communist Party, was imprisoned several times for illegal political activities, and spent several years in prisons and concentration camps during the Second World War. One of the founders of the Fatherland Front, he served successively as Minister of Justice (1944), Minister of Education (1945), and president of the Presidium of the National Assembly (1947), being titular President of the Republic in the latter capacity. He had been Foreign Minister since 1950.

The new Foreign Minister was Bulgarian Ambassador in Moscow from March 1954 until April of the present year. (Le Monde, Paris - Times) **(Prev. rep. 10746 C.)**

B. AUSTRIA. — Compensation Deliveries to U.S.S.R.

The Austrian Commission for deliveries to the Soviet Union in accordance with the Austrian State Treaty announced on July 31 that during the first year, ended on July 27, goods worth $25,090,184 (652,344,786 Austrian schillings) had been delivered or despatched to the Soviet Union, thereby exceeding the year's target by $90,000. Deliveries included 300,000 tons of oil, tinplate, copper products, electric cables, rayon yarn and tissues, chemicals, wood-working and paper machinery, electrical instruments, etc. (Wiener Zeitung) **(14532 A.)**

C. IRISH REPUBLIC. — Further Import Levies. - Reduced Travel Allowance. - Trade Deficit in First Half of 1956. - Reduction in Public Expenditure.

The Irish Minister of Finance, Mr. Sweetman, announced on July 25 an extension in the levy on imports first imposed on March 14 (see 14832 A), and reductions in public expenditure and borrowing.

Import Levies.

Under the new regulations (*a*) all goods (other than worked or partly-worked precious metals) previously liable to 37½ per cent (full) and 25 per cent (preferential) levies were subjected to new rates of 60 per cent (full) and 40 per cent (preferential).

(*b*) A new range of about 100 items, including office equipment, sewing machines, haberdashery, floor coverings, tableware, glues, polishes, ice-cream powders, canned fish, fruit, and vegetables, were subjected to the levy for the first time at the lower rates of 37½ per cent and 25 per cent.

(*c*) The levies of 1d. or ½d. on newspapers, of 15 per cent on motor cars and motor cycles, and of 5 per cent on newsprint remained unchanged, but commercial vehicles other than buses, previously exempt, became liable to the 15 per cent levy Mr. Sweetman stated that he was in touch with the printing and publishing interests with a view to imposing physical controls to limit the import of newsprint to the 1953 figure (£1,200,000)

(*d*) He also announced a 25 per cent reduction in travel allowances—the maximum which could be enforced under the country's O E E C. commitments New allowances were £50 for children under 12 and £75 for all others

Giving the reasons for the imposition of further severe restrictions so soon after the measures announced in March, Mr Sweetman said that with the exception of imports of motor cars and components, which had declined by £450,000, the effect of the March levies in April and May had been slight, while imports in June had actually been £450,000 higher than in June 1955 The Irish Republic was still importing at an annual rate of £90,000,000 in excess of its exports In the first six months of 1956 as a whole imports had declined by £5,700,000, but exports had also fallen by £4,500,000, and the position was aggravated by the fact that the terms of trade had been moving against the country.

Reductions in Public Expenditure.

Mr. Sweetman went on to announce a general review of public expenditure, which would be reduced by at least £5,000,000, and said that he had decided that only one major public capital issue, a direct Government loan of £20,000,000, should be made in the current financial year No public issues would therefore be sanctioned for the Electricity Supply Board, the *Coras Iompair Eireann* (State Railways), or Dublin Corporation, although the Government would assist these bodies to supplement such funds as they could raise independently.

Loss of Sterling Assets.

Mr Sweetman disclosed that, as a direct consequence of the balance of payments deficit, the country's commercial banks had lost nearly £50,000,000, or two-fifths of their net external assets, since January 1955, and it was therefore essential that any further sales of sterling securities should be kept to a minimum Furthermore, in the present conditions, the creation of new credit could have nothing but harmful effects, and additional capital spending would have to be found from available resources.

Mr. Sweetman added that the measures he had outlined were intended to remedy a "serious situation," and that they would be retained only as long as the situation required. On the other hand he stressed that should further action be necessary, even while the Dail was in recess, the Government would not hesitate to take it, because the country's economic independence was at stake. The real need at the present time was for a substantial increase in the volume and efficiency of the country's national production, and he considered that a rise of 10 per cent in real output was a practicable immediate target. (Irish Times, Dublin) **(Prev. rep. 14832 A.)**

Note. Provisional figures for imports into the Irish Republic in the first six months of 1956 totalled £98,500,000, while exports amounted to £49,000,000 —(Irish Times, Dublin).

D. JAPAN. — Financial Policy. - Relaxation in Compensation Remittances Abroad.

New regulations issued by the Japanese authorities in July eased restrictions on the remittance abroad of compensation payments made by Japan under Article 15(a) of the Japanese Peace Treaty to claimants resident outside Japan. Such remittances had previously been limited to $1,000 a year.

The regulations provided that (*a*) where compensation monies (including restored property) in a non-resident exchange account did not exceed 3,600,000 yen ($10,000) the whole sum might be remitted abroad; (*b*) for any larger accounts, individual holders (but not firms or companies) might transfer abroad 3,600,000 yen in a single remittance.

Applications under the new regulations had to be received by Aug. 31, 1956.—(Treasury Press Office, London) **(Prev. rep. Japanese Peace Treaty, 11681 A.)**

A. UNITED KINGDOM. — Coal Industry. - Production and Developments in First Half of 1956. - The Coal Industry Act. - Compensation Stock Issue.

Provisional figures issued by the Ministry of Fuel and Power on July 3 showed that total saleable output of coal during the first half of 1956 totalled 114,691,600 tons (108,805,300 tons deep-mined, 5,886,300 tons opencast), compared with 113,259,000 tons (108,186,000 tons deep-mined, 5,073,000 tons opencast) in the first half of 1955. Coal imports during the first 26 weeks of 1956 totalled 3,328,700 tons, compared with 5,694,900 tons in the first 26 weeks of 1955, a reduction of 2,366,200 tons.

The following table shows the average weekly rates of coal production and consumption, and of manpower, output, and absenteeism in the second quarter of 1956 :

	Saleable Mined Coal Produced Tons	Plus Opencast Tons	Total Production Tons	Inland Consumption Tons	Overseas Shipments & Bunkers† Tons
April	4,082,700	234,775	4,317,475	4,248,000	188,250
May*	4,055,820	248,720	4,304,540	3,927,400	225,200
June	4,220,775	278,900	4,499,675	3,843,250	185,500
2nd Quarter	4,119,765	254,132	4,373,897	4,006,217	199,650

	Wage-earners on colliery books		No. of shifts worked per wage-earner	Output per manshift at		Percentage of absenteeism
	Total	at coal-face		coal-face Tons	overall Tons	
April	705,950	287,700	4 68	3.334	1.204	12.64
May*	705,300	287,200	4.67	3.327	1.225	12.39
June	703,225	286,200	4.83	3 354	1.239	11.72
2nd Quarter	704,825	287,033	4.76	3 338	1.223	12.25

*Average of five weeks. †Including fishing vessels but excluding coastwise bunkers.

Other recent developments in the coalmining industry are summarized below :

New Opencast Site. Details were given on June 8 of a new opencast project for Scotland, described as " the most ambitious of its kind ever undertaken in Britain," with an estimated total yield of " at least 20,000,000 tons." The scheme envisaged the opening-up of a 1,000-acre site near Kinglassie, on the Fife-Kinross border, where excavations to a maximum depth of 700 ft. would begin in 1958. Initial output was estimated at 600,000-650,000 tons a year.

Underground Coal Gasification. Mr. Aubrey Jones, the Minister of Fuel and Power, announced on June 8 that the National Coal Board and the Central Electricity Authority would jointly build a pilot plant for underground coal gasification, with a view to exploiting the process on a commercial scale. He added that he had stressed the importance of developing the process " with the utmost expedition," and that the N.C.B. intended to associate private enterprise with the project so that full advantage of any developments might be taken in oversea markets.

A Ministry spokesman stated that tests in underground gasification had been conducted in Yorkshire and Worcestershire continuously since 1950, during which time over 5,000 tons of coal had been turned into gas with a calorific value of 70-100 British Thermal units, compared with 500 B.T.U.s for ordinary town gas. As it would not be economical to pipe this gas any distance, it would be used on or near the site to generate electricity.

Reprieve for South Wales Pits. The N C B. announced on May 10 that two South Wales anthracite collieries, the East and Steer pits at Gwaun-cae-Gurwen, Glamorgan, would finally be closed on May 26 owing to miners' " continued restrictive practices, lack of co-operation and low productivity, resulting in serious financial losses." It was explained that there had been " a long history of trouble " at both collieries, both having been closed for a short time in 1948 owing to restrictive practices, whilst in 1949 the Steer pit had been shut down for 18 months. In both cases the pits had been re-opened after undertakings by the miners to co-operate, but in 1955 there had been 47 disputes or " go-slows " at the two pits, whilst in 1956 there had already been 11, culminating in unofficial strikes in support of men dismissed (after repeated warnings) for " go slow " practices. Coal lost at the pits since January 1955 had amounted to 36,000 tons, the output per manshift having been " consistently far below the average for the division."

The South Wales Divisional Coal Board rejected on May 18 an appeal by the National Union of Mineworkers for the withdrawal of the notices, but after further meetings with miners' leaders announced on May 25 that, while it could not withdraw the notices, it was prepared to open one face at each pit immediately. Once improved operational standards and better productivity had been achieved, other faces could be re-opened until all miners had been re-absorbed—a process estimated to take six weeks The men at first rejected these proposals, but on May 25 accepted modified proposals designed to reduce the period before full re-absorption took place from six weeks to four.

The Divisional Coal Board announced on June 15 that during the " probationary period " the Steer pit miners had nearly doubled their output and that, following the men's agreement to the maintenance of a 24-hour cycle of work at all coalfaces and to certain other conditions, it had been decided that both pits should remain open permanently.

N.C.B. Quarterly Accounts. The N.C.B.'s accounts for the first quarter of 1956, published on June 20, showed an estimated surplus (after allowing for £6,100,000 interest) of £6,089,000, against a surplus of £9,175,000 in the last quarter of 1955 and a deficit of £4,395,000 in the first quarter. Losses during the quarter on imported coal totalled £6,100,000. The earnings of adult miners averaged £14. 17s. weekly.

Subsidence Payments. Mr. Aubrey Jones announced on April 16 that the Government had decided that the N.C.B. should be obliged to make good physical damage to land, buildings, service lines, and pipes arising from subsidence due to mining operations, and that the cost (estimated at about £5,000,000 annually) should be included in coal prices Legislation to give effect to this decision would be introduced as soon as practicable

Appointment of Director-General of Reconstruction. The N.C.B. announced on July 3 that it had decided to set up a new reconstruction department at headquarters, and that Mr. H. E. Collins (director of production in the Durham Division, and from 1947-1950 chairman of the Combined Coal Control Group for Germany) had been appointed Director-General of Reconstruction. The new department would be responsible for " securing that the national plan is kept under review and adjusted as necessary, and that major projects are planned and progressed with maximum speed and efficiency."

Dissolution of South-Eastern Divisional Board. It was also announced on July 3 that the N.C.B. had decided that the South-Eastern Division (the Kent coalfield) could in future be better administered by a general manager than by a divisional board , the latter had therefore been dissolved, and Mr. J H. Plumtre (deputy director-general of production at headquarters) had been appointed general manager of the division. Mr. J Norval, the chairman of the former divisional board, had been appointed chairman of the executive then being set up by the N.C B. to develop the technique of underground gasification (see above).

The Coal Industry Bill.

The House of Commons on May 10 gave a second reading to this Bill, which (*a*) increased the total sum which the N.C.B. might borrow for capital purposes from £300,000,000 to £650,000,000, and the maximum to be borrowed in any one year from £40,000,000 to £75,000,000 ; (*b*) provided that if the Board required more than this in any year, the extra sum required must be specified by the Minister of Fuel and Power in an Order needing parliamentary approval.

Mr. Aubrey Jones pointed out on the second reading that the demand for energy was rising faster than at any time since the Victorian era, and that 85 per cent of the primary fuel needed to satisfy the demand was represented by coal. Although it was hoped that the use of nuclear power would save 5,000,000-6,000,000 tons of coal annually by 1965 and 40,000,000 tons annually by 1975, and that after 1970 all new power stations would be nuclear stations, coal would still remain the foundation of the British economy. Recalling that the N.C B.'s revised plans envisaged the investment of £1,000,000,000 over the next 10 years, including £825,000,000 on colliery development, Mr. Jones explained that the Board would find two-thirds of this from its own revenues, but had asked for £400,000,000 additional borrowing powers to see it through the next five years, after which it hoped to be entirely self-financing. This included about £50,000,000 to meet the deficit which it would have accumulated by the end of 1956, but he considered that the deficit should be progressively wiped out by raising coal prices, and not by borrowing or subsidy. The Bill therefore limited the increased borrowing powers to £350,000,000, with strict controls over the amount which could be spent in any one year.

The Bill was welcomed by **Mr. Callaghan** (Lab.) and several other Opposition speakers, but was opposed by a group of Conservative back-benchers headed by **Mr. Nabarro,** the former chairman of the Conservative Parliamentary Party's Fuel and Power Committee. Mr. Nabarro moved its rejection on the grounds that it would extend the N C.B 's power to borrow without proper Parliamentary control, and would permit " a large increase in public expenditure upon an undertaking which has already made continual heavy losses despite large capital investment." He explained that he objected to giving a nationalized industry borrowing powers for 10 years ahead without an annual scrutiny by the House of Commons of the investment programme for the coming year. The controls over expenditure contained in the Bill, he argued, amounted merely to " accountability in retrospect," whereas the Chancellor of the Exchequer should be required annually to lay before the House a statutory instrument setting out the total capital investment needed by the industry in the coming year.

Mr. Nabarro's amendment was defeated by 143 votes to 23 (the Opposition abstaining from voting) and the second reading was given without a further division

After passing through its remaining parliamentary stages, the Bill was enacted on Aug. 2.

Further Issue of Compensation Stock.

The Treasury announced on June 16 that a further issue (the tenth) of 3½ per cent Treasury Stock, 1977-80, had been made in satisfaction of compensation amounting to just under £2,000,000 due to certain undertakings under the Coal Industry Nationalization Act, and that £100 of stock would be deemed equal to £78 10s. compensation due.—(Times - Daily Telegraph - Manchester Guardian - Financial Times - Economist)

(Prev. rep. 14882 A ; [Underground Gasification, 10368 D.)

A. SOVIET UNION. — Demographic Statistics.

The first demographic statistics to be issued in the Soviet Union since the census of 1939 were contained in a statistical handbook issued in July by the Central Statistical Bureau of the Council of Ministers. The estimated population of the Soviet Union in April, 1956, was given as 200,200,000 (87,000,000 urban and 113,200,000 rural), as compared with an estimated population of 191,700,000 in 1940 (60,600,000 urban and 113,200,000 rural).

Population figures for the Union Republics were given as follows:

	1956 (April)	1940
Russian Soviet Republic	112,600,000	107,900,000
Ukraine	40,600,000	41,000,000
Byelorussia	8,000,000	9,200,000
Uzbekistan	7,300,000	6,300,000
Kazakhstan	8,500,000	6,200,000
Georgia	4,000,000	3,600,000
Azerbaijan	3,400,000	3,200,000
Lithuania	2,700,000	2,900,000
Moldavia	2,700,000	2,500,000
Latvia	2,000,000	1,900,000
Kirghizia	1,900,000	1,500,000
Tadjikistan	1,800,000	1,500,000
Armenia	1,600,000	1,300,000
Turkmenistan	1,400,000	1,200,000
Estonia	1,100,000	1,000,000
Finno-Karelia*	600,000	500,000

*Now amalgamated with the Russian Soviet Republic—see 15032 A

The population of the largest cities (over 500,000 inhabitants) at the beginning of 1956 was given as follows:

Moscow*	4,839,000	Stalino	625,000
Leningrad*	2,814,000	Chelyabinsk	612,000
Kiev	991,000	Odessa	607,000
Baku	901,000	Dnepropetrovsk	576,000
Kharkov	877,000	Kazan	565,000
Gorki	876,000	Riga	565,000
Tashkent	778,000	Rostov	552,000
Kuibyshev	760,000	Molotov	538,000
Novosibirsk	731,000	Stalingrad	525,000
Sverdlovsk	707,000	Saratov	518,000
Tiflis	635,000	Omsk	505,000

*Excluding suburbs

Birth- and death-rates in the U.S.S.R. between 1940 and 1955 were given as follows (per 1,000 population):

	Birth-rate	*Death-rate*
1940	31.7	18 3
1950	26 5	9.6
1953	24 9	9 0
1955	25.6	8.4

It was commented abroad that the official estimate of the Soviet population—just over 200,000,000 in April 1956—was considerably below the estimates hitherto prevalent in the Western countries. The decline in the population of the Ukrainian and Byelorussian republics was seen as a consequence of the heavy losses suffered by those areas during the Second World War. On the other hand, the considerable increase in the population of the Central Asian republics—notably Kazakhstan, whose population had increased by over one-third between 1940 and 1956—was regarded as an indication of the growing trend of eastward migration in the U.S.S.R. during recent years, resulting from the industrial and agricultural development of these areas. This conclusion was supported by the fact that several Siberian cities—notably Novosibirsk, Sverdlovsk, and Chelyabinsk—had become among the largest in the Soviet Union.

The sharp decline in the birth-rate since 1940 also aroused comment abroad, in which connexion it was pointed out that the 1956 figure of 25.6 per 1,000 compared with 47 per 1,000 in 1926. On the other hand, the death-rate had been more than halved between 1940 and 1955 and had fallen by nearly one-third since 1926, when it stood at 20.3 per 1,000.
(Soviet Weekly - New York Times)

(Prev. rep. 1939 Census, 3602 B.)

Note. The census taken in January 1939 gave the population of the Soviet Union as 170,467,186. The estimate of 191,700,000 in 1940 apparently included the territories incorporated in the U S S R. in 1939-40—the Baltic States, the former eastern provinces of Poland, Bessarabia, and territory ceded by Finland.

B. UNITED KINGDOM. — July Trade Figures.

Imports into the United Kingdom in July totalled £320,000,000, exports £266,300,000 and re-exports £9,800,000, the adverse visible balance thus amounting to £44,300,000.
(Board of Trade Journal) **(Prev. rep. 15023 A.)**

C. UNITED STATES. — Nuclear Weapon Tests.

The U.S. Secretary of Defence (Mr. Charles E. Wilson) and the chairman of the Atomic Energy Commission (Rear-Admiral Lewis Strauss) announced on July 23 that a series of U.S. nuclear weapon tests in the Pacific had been successfully concluded and had "contributed materially to the security of the United States and the free world." Only two weapon tests—on May 5 and May 21—had been officially announced, though on several occasions during June and July abnormal atmospheric vibrations attributed to nuclear explosions had been recorded by Japanese meteorological stations.

The Atomic Energy Commission and the Defence Department had announced in January last that a series of test explosions would be held during the spring at the Eniwetok proving grounds, in the Marshall Islands. It was stated that they would involve weapons "generally smaller in yield than those tested in 1954," that one of their most important purposes would be "the further development of methods of defence against nuclear attack," and that the operations would be carried out by a task force under the command of Rear-Admiral B Hall Hanlon.

The first explosion, a small one, took place on May 5 at Runit Island, in the Eniwetok atoll. The nature of the device detonated—known as "Lacrosse"—was not made public, but reports by eye-witnesses suggested that it might have been a "pocket-size" hydrogen bomb and not a fission bomb. It was pointed out in the U.S. Press that this would represent an important development, since a fusion weapon would be four times more effective and considerably less costly than a fission bomb of comparable size.

On May 21 the first hydrogen bomb to be dropped from the air was exploded over Namu Island, in the Bikini atoll. It was dropped from a B-52 jet bomber flying at an altitude of 40,000 to 55,000 feet, and exploded at a height of 10,000 feet so as to minimize radioactive fall-out. The "mushroom" cloud produced was estimated at about 100 miles wide and 25 miles high, and it was subsequently stated by Rear-Admiral Hanlon that the bomb had an energy force equivalent to "several million tons of T.N.T." On May 22 it was announced that the bomb was a "sanitary" weapon so far as radioactive fall-out was concerned; there had been no significant fall-out outside the Bikini atoll, and most of the radioactive particles had been carried up into the stratosphere, where they were widely diffused The U.S. Secretary for Air (Mr. Quarles) disclosed on June 16 that the bomb dropped at Bikini on May 21 had missed its target point "by somewhat less than four miles" as the result of a "human error", the statement added, however, that the error was "not great enough to have a serious effect on the success of the experiment."

Atmospheric changes indicating explosions of a nuclear character were recorded on June 26, July 3, and July 9 by the Japanese Central Meteorological Office and many other weather stations throughout Japan It was stated by Japanese scientists that the data recorded on microbarographs had indicated explosions at a point approximately 2,500 miles south-east of Japan—i e in the Bikini region The "shock waves" recorded on June 26 and July 9 were described as greater than those produced by the explosion of May 21

In a report to President Eisenhower on July 19, Rear-Admiral Strauss stated that the tests had shown that it was "possible to localize the fall-out effect of nuclear explosions to an extent not heretofore appreciated," and that "mass hazard from fall-out is not a necessary complement to the use of large nuclear weapons." The report also said that "real progress" had been made in developing "a variety of weapons calculated to meet a wide range of military usage, including defence against air attack."—(New York Times - New York Herald Tribune) **(Prev. rep. U.S. Atomic Weapons Tests, 14214 A; Bikini H-Bomb Tests, 13699 A.)**

D. CEYLON. — U.S. Economic Aid.

An agreement for the grant of $5,000,000 in U.S. economic aid to Ceylon for projects mutually agreed upon was signed in Colombo on April 28 by the Ceylonese Prime Minister, Mr. Bandaranaike, and the U.S. Ambassador, Mr. Crowe. Shortly after assuming the premiership, Mr. Bandaranaike had stated on April 25 that the aid would be granted under the Colombo Plan; that he was satisfied that no "strings" would be attached to the agreement, and that Ceylon was prepared to accept aid on such terms from the U.S.A. or any other country, including the Soviet Union and China.

A further agreement signed between the two countries on June 28 provided that American aid would be in the form of goods and services to be supplied by the U.S A. or other countries in respect of various projects supplementing Ceylon's Six-Year Plan. The total amount of $5,000,000 (Rs.23,810,000) would be divided as follows: Railways, $1,875,000, land and land development, $1,824,000; University of Ceylon, $581,000; freight for dry milk sent to Ceylon for school meals, $491,000; training of Ceylonese personnel abroad and other services, $102,300; agricultural expansion, research, and education, $85,000; industrial development, $35,000; sanitation $6,500.

The aid will come out of U.S. foreign aid appropriations for the year 1955-56. (Ceylon Government Information Dept.)

SEPTEMBER 1—8, 1956

A. CYPRUS. — Temporary Suspension of Terrorist Activities. - Cyprus Government's Surrender Offer to Eoka. - Publication of Eoka Leader's Diary. - The Terrorist Campaign. - Lord Radcliffe appointed Constitutional Commissioner for Cyprus. - British Parliamentary Debates. - Greek and Turkish Attitudes to Cyprus Question. - Turkish Cypriot Proposals.

Two major developments in the internal situation in Cyprus took place during August. The first of these was the announcement by Eoka (the terrorist organization), in leaflets distributed throughout the island on Aug. 16, that the campaign of violence would be suspended in order to facilitate a settlement of the dispute between the Greek Cypriot community and the British Government over the question of self-determination and *enosis*. The second development was the publication by the British Government of the text of a document purporting to be the personal diary kept by Colonel George Grivas (*alias* Dighenis), the Eoka leader, which, it was stated, contained "irrefutable proof" of the complicity of Archbishop Makarios in the organization and activities of the terrorists. These and other developments are described below under cross-headings.

Suspension of Terrorist Activities.

The text of the Eoka leaflet, which was signed "Eoka, Dighenis, the leader," was as follows:

"For 16 months we . . . have been fighting a bitter struggle for freedom. The opponent, who imposed upon us our national liberation movement by his unjustified intransigence, now makes use of the struggle, described by him as armed force, to justify his refusal of agreement with us

"I undertook this struggle not from personal ambition but because I envisaged a free Cyprus. For this purpose I will devote all my strength. I am ready to give proof of my humanitarian sentiments in order to prevent new bloodshed and to help achieve a settlement between the two opposing sides in fulfilment of the wishes of a Greek Cyprus.

"I wish to declare. 'If our adversaries are really sincere when they state that under the conditions created in Cyprus by our activities it is impossible to achieve a just solution which we are seeking, I am ready to suspend the operations of my men.' I await full corresponding action on the part of England to enable the fulfilment of Greek Cypriot claims as they have been expressed, supported, and outlined for future discussion by our Ethnarch, Archbishop Makarios

"To prove my unshakable desire to promote a favourable solution of the work undertaken by Makarios, and to give him once again a chance to solve the Cyprus national question, I order from today a suspension of operations of all forces under my authority.

"The national organization of Cypriot fighters (Eoka) states nevertheless that they will keep their arms ready and at the alert, ready for new sacrifices if these should be imposed on us by any further threat, in the certainty that they have at their disposal the moral and material resources to prevail."

The acting Ethnarch of Cyprus, Bishop Anthimos of Kitium, issued on Aug. 17 a statement on the new situation created by the suspension of violence.

"The British Government," the statement said, "have repeatedly declared that the non-restoration of law and order is a basic obstacle to the solution of the Cyprus question On the part of the Greek people of Cyprus this obstacle is removed by the conditions which are now created We believe that the British Government, respecting the unanimous will of the Greek people of Cyprus, will show a kindred spirit and, by freeing Archbishop Makarios, create the indispensable prerequisites for the attainment of a fair and honourable solution corresponding to the will of the people of Cyprus"

Official comment upon the Eoka leaflet was not made until Aug. 18, when a Government spokesman replied to the Bishop of Kitium's statement. The spokesman pointed out that, although the Bishop had assumed that law and order had been restored, the Eoka leader had in fact called only for the suspension and not the abandonment of the use of violence. "Nor have Greek Cypriot leaders, in particular leaders of the Church, as yet denounced the use of violence," the spokesman added. "Nevertheless it is sincerely a step forward towards the peaceful settlement which all desire. The Government will not be slow in responding. Of necessity there must now be a period during which the Government can see whether the call for suspension of violence is being obeyed."

Government Surrender Terms. - Rejection by Eoka.

The following terms of surrender were offered to Eoka by the Government of Cyprus on Aug. 22:

"In the new conditions created by the decision of the terrorists to call off their campaign of violence, the Government of Cyprus, with the full approval of H.M. Government, have decided that it would now be in the public interest to give the terrorists who are still at large in the island the opportunity of extricating themselves from the position into which their action in taking up arms against the established Government of the country has led them. These terrorists will now be given the opportunity of surrendering with their arms. The offer will remain open for three weeks.

"A terrorist who surrenders during this period . . . will have the choice of being dealt with in one of two ways. He may opt (*a*) to leave Cyprus for Greece as soon as the necessary arrangements can be made, and subject to certain conditions; or he may opt (*b*) to remain in Cyprus Once he has opted for one or other of these courses his decision will be final.

"If he decides to leave Cyprus for Greece the following terms will apply:

(*a*) He will be kept in detention pending his departure.

(*b*) He will not be prosecuted for any crime he may have committed before this announcement, even involving violence against the person.

(*c*) His option will be conditional upon proof that Greece is willing to admit him

(*d*) If a British subject, he will be required to give an undertaking that on arrival in Greece he will apply for Greek nationality and will renounce his British nationality as soon as possible, and that he will not in future claim protection and privileges as a British subject.

(*e*) On his departure he will be declared a prohibited immigrant and will not be allowed to re-enter Cyprus If he is not admitted into Greece, he will be treated as though he had opted to remain in Cyprus.

"If he decides to remain in Cyprus the following terms will apply:

(*a*) If there is evidence against him of the commission of a specific offence involving violence against the person, he will be brought to trial.

(*b*) He will not be brought to trial for any terrorist offence not involving violence against the person committed before this announcement.

(*c*) Unless brought to trial and sentenced, he will remain in detention until released either by the ending of the state of emergency or by virtue of an Order of the Governor, whichever is the earlier.

"At a later stage, when the Governor is satisfied that stable conditions of peace and order have been re-created, he will be prepared to declare an amnesty for certain offences committed by the terrorists and their supporters now in prison or under detention. This amnesty will include those who surrender under the terms of this announcement.

"It must be remembered that the carrying of arms and the possession of arms and explosives without lawful authority continue to be illegal and are offences punishable by death and life imprisonment respectively There will be no relaxation in the efforts of the security forces to enforce the law."

The Government's surrender offer was immediately rejected in an Eoka leaflet signed by "Dighenis" and distributed on Aug. 23.

"As military commander of the fighting Cypriot people," the message declared, "I reply to your demand for the surrender of arms: 'No, come and get them.' It is impossible to halt our campaign until a final agreement is reached. The Government's demand shows insincerity and shortsightedness. Nevertheless, to indicate once more my good will and my desire to prevent bloodshed, I declare that if by the 27th of this month the surrender order is not withdrawn, and negotiations on the basis of Archbishop Makarios's terms are not begun, then I am relieved of obligations in connexion with the truce which I declared of my own initiative, and shall resume my freedom of action."

The Government announced the same day that it would stand firm upon its previous offer, and on Aug. 24 the Governor (Sir John Harding) ordered British Army and Air Force units stationed in the island to remain on active service for a further three months.

In the meantime troops engaged on security operations had discovered a number of bombs in process of manufacture near Khandria An explosion on Aug 24 in the Larnaca area, killing one Greek Cypriot and wounding another, was officially "believed to have been caused by a bomb."

Several unexploded bombs were discovered by members of the security forces on the day preceding the expiry of Eoka's truce offer. Early in the morning of Aug. 28 security forces confined to his house Dr. Dervis, the Greek Cypriot mayor of Nicosia and a member of the Ethnarchy Council, and searched his surgery and the municipal offices The mayor was later released. In Larnaca a youth was detained on the same day after a bomb-throwing incident.

An official statement on Aug. 28 announced that six terrorists undergoing long sentences were being transferred from Cyprus to prisons in Britain, in view of the serious deterioration in discipline at the central prison in Nicosia. The statement said that loss of good-conduct remission was no longer effective as a disciplinary measure, since the terrorist prisoners were confident that they would be released long before the completion of their sentences. The six men arrived in Britain by air the on the same day.

Sir John Harding, broadcasting to the people of Cyprus on Aug. 29, urged them not to be misled into making any new demands until Lord Radcliffe's recommendations for a new Constitution (see below) had been published. Referring to the publication of the Cyprus Government's surrender offer to the terrorists, which had been criticized as coming too soon after Eoka's announcement of a truce, the Governor explained that the Government had had information that the terrorists had only been seeking "a breathing space to manufacture more bombs, refurbish weapons, and recruit more men."

The Grivas Diary.

The British Colonial Office announced on Aug. 26 that among Eoka documents recently captured was a diary kept by the terrorist leader, Colonel George Grivas. The diary contained numerous references to Archbishop Makarios, indicating that the Archbishop had personally taken part in the foundation and initial operational planning of Eoka, that his approval was sought for the date of the commencement of operations, and that he had provided funds which were used for procuring arms for the terrorists. The Colonial Office published substantial extracts from the diary, some of which are reproduced below.

Mr. Lennox-Boyd (the Colonial Secretary) said in a press statement that he was absolutely satisfied as to the authenticity of the documents.

"Much of the criticism to which I and my colleagues have been subjected about our treatment of Makarios, and in particular the deportation," he went on, "was based on the assumption that he was really a moderate and that we were losing the chance of moderate support. That has been blown sky-high by these papers. They show him to be the personal director of the whole tragic business and in no sense a moderate, and involved even in the choice of individual victims for murder He has been behind the original physical intimidation of Eoka, which has prevented freedom of expression. It is our purpose steadily to end this intimidation, and we do not consider the Archbishop to be in any way indispensable to a negotiated settlement."

With reference to a suggestion that the Archbishop might be prosecuted as an accessory in the murders committed by Eoka, Mr Lennox-Boyd said that H.M. Government and the Governor of Cyprus would have to give "very close and immediate consideration to the Archbishop's personal position in the matter."

Mr. Lennox-Boyd added that the translation of the incriminating papers was not yet complete, but that the Government had elected to release some extracts at the present stage; since the terrorists had said that they would resume operations if negotiations on the terms proposed by Archbishop Makarios were not begun by Aug. 27, it was important that the world should be fully aware of some of the issues involved.

Extracts from Grivas Diary. The translated portions of the diary published by the Colonial Office were taken from two separate sections. The first dealt with the period Jan. 10-22, 1955, shortly before the caique *Aghios Georghios* was intercepted while trying to smuggle explosives to the terrorists (see 14221 A) The second section referred to the period April 2-June 26, 1955, after the beginning of the Eoka terrorist campaign. In the earlier part of the diary Archbishop Makarios, the Bishop of Kition, and other prominent persons were mentioned by name, but in the later part Grivas resorted to the use of code-names and symbols. It was stated that among these the term "the General" undoubtedly referred to Archbishop Makarios, and that "X" was used to indicate a symbol representing a cross combined with a bishop's crook.

The extracts began with an entry referring to the Archbishop's arrival from Athens on Jan. 10, 1955. On the following day "Azinas came to my house . . . and told me that the Archbishop wants to see me. Azinas took me in his car and we drove to Larnaca to the Bishopric where we were to meet the Archbishop I saw the Bishop of Kition, with whom I talked until the arrival of the Archbishop. He congratulated me for my courage in coming to Cyprus. I told him about targets which I have earmarked for attack, etc. He appeared to be aware not only of all my movements but also of our present position and future plans, and he told me that he had discussed these with the Archbishop.

"When the Archbishop arrived he told me that on his voyage to America he had met Kyrou [head of the Greek delegation at the U.N. which raised the Cyprus issue in 1954—see 13993 A] in Paris, and that they had agreed fully on the action to take. Later, however, the position had changed—they were hoping to get America's support, which would have meant a majority at the U.N Kyrou had then sent a telegram to the consul here . . without the Archbishop's knowledge. After America turned against us immediate action was necessary, but it was too late by then since they did not have the means of communicating with us quickly.

"I told the Archbishop all about the work we had done and are doing; I also talked to him about the excellent morale of our men. The Archbishop told me that Papagos [i.e. the late Field-Marshal Papagos, at that time Prime Minister of Greece] wants action; the Archbishop added that he [the Archbishop] had decided on March 25 as the date on which operations were to begin. Azinas had objections as regards this date because he considered it to be too late. I, too, told the Archbishop that this date (March 25) ought not to be definitely decided upon since the postponing of action until that date would have the following disadvantages:

(1) The security risk of us not being able to keep our movements and activities secret until that date, the element of surprise representing 90 per cent of our chances of success. To date the British have taken no precautionary measures against action on our part, since all Government offices are completely unguarded and unprotected, and even military establishments are badly guarded and we are easily able to approach them during the night.

(2) We should take advantage of winter weather conditions (rain, snow, etc.), which work on our side—we should also take advantage of the fact that the nights are much longer and can cover all our movements and activities.

"I asked the Archbishop about Papagos and the Archbishop told me that Papagos is now in full agreement with our activities. Until recently Papagos had stood against us because he had heard that Greek officers were involved in our movement and he feared that these officers might well organize themselves against him . . .

"In connexion with material from Athens, Azinas told me that the Archbishop had paid 65,000,000 [drachmas] to Efstathopoulos and Gazouleas. Of this 65,000,000, 25,000,000 were paid to Gazouleas for the new material and the remaining 40,000,000 were paid to Efstathopoulos in respect of his instalment to the cargo ship. Another 40,000,000 to Valvis will be paid to the cargo ship as a final payment after the delivery of the material to us"

The extracts then referred to the preparations made for the reception of the *Aghios Georghios*, whose departure from Athens was marked by a telegram from Gazouleas received on Jan 14. On Jan. 18 reports of police activity in the area where the vessel was expected to land her cargo led Grivas to make the following decisions, noted in the diary:

"(1) There is nothing more to be done at Paphos in addition to the instructions which were issued yesterday—i.e. observation of police movements guarding the coast. Caique only to be signalled if the coast is clear. Speedy removal of material.

(2) A diversionary operation is to be organized at Xeros to give the impression that something is happening there This operation is to be executed by members of sabotage groups . . . who will be given the relevant instructions"

On Jan. 19 Grivas reported receiving "a recommendation by the Archbishop to the effect that we should limit our movements until Sunday. In his message the Archbishop also asks whether we shall be going to Larnaca to inspect our groups in that town. To this my answer was 'yes'"

The extracts from the first period ended with the following entry for Jan 22 "At 10.30 hours Azinas came to see me . . . still no caique. Azinas had seen the Archbishop and notified him that he would have to go to Athens about the caique, but the Archbishop had not agreed initially that it was necessary for Azinas to go. The Archbishop was worried in case the British got to hear of this and should jeopardize the whole business, but he agreed in the end that Azinas should go."

The second group of entries opened with the text of letters between Grivas and "the General" dated April 2 and 3, 1955, on the subject of the "Voice of the Fatherland" broadcasts from Greece. "The General" expressed agreement with a complaint by Grivas that broadcasts saying that "freedom is not gained by terrorism" had a bad effect on morale, and stated that one of his men would be sent to Athens with instructions for those in charge of the radio station.

The entries continued: "*April 7.*—I have prepared a report to the General on the situation and on the reorganization of groups for further activity

"*April 11.*—I have sent a letter to the General asking him to take an interest in the families of those arrested.

"*April 17.*—I have also asked the General to provide the sum of £500 for the purchase of pistols with which the sabotage groups will be supplied

"*April 25.*—Ermis reported that a person was sent by the Bishop of Kition wanting members of our organization to be recommended to him for training .

"*April 27*—I have sent a letter to the General requesting that the Athenian newspapers should be advised to censure the pressure exercised by the Government on its employees to enlist in the Special Constabulary . . .

"*April 29*—'X' has informed me that the General has written that no activity should take place now as 'very important national interests are risked' . . .

"*May 22*—I am preparing a report to the General for the continuation of our activities."

Several entries at the beginning of June 1955 dealt with the possibility of obtaining arms from Egypt, and on June 7 another meeting between Grivas and "the General" was reported. The last few extracts published by the Colonial Office referred to the planning of actual outrages, viz.:

"*June 8*—At 19 30 hours Heron, Thalis, and Dafnis came to the house and I gave them orders. I spoke to the first two on the attempt in Government House on June 9, and on June 10 in the house of Chief Justice Hallinan, where the Governor has been invited for dinner The first attempt with the clock-bomb will take place in any case (in spite of a desire of the General that the placing of the bomb should be made under certain reservations) As regards the second attempt, three ways were discussed (clock-bomb, hand-grenade, and automatic guns). I ordered them to make inquiries and report to me tomorrow which is the best way.

"*June 22*—I have written to the General to ask for clock-bombs from Athens.

"*June 23.*—I have sent a letter to the General advising him to take measures for the protection of his life, following information that the Turks are organizing his assassination

"*June 26*—I reported to the General that I have ordered suspension of activity and that I am preparing something more serious after the new recourse to the U N I asked for approval to execute by ambush the Commander-in-Chief, Middle East Forces. At 14 00 hours I went to Boghaz to find the proper place for ambushing the C.-in-C. I found two places. I received a report from Heron saying that an unsuccessful attempt against the life of Poullis was made last night at 23.00 hours." [Poullis was the policeman murdered by the terrorist Karaoulis in August 1955.]

Reactions in Cyprus and Greece to Publication of Grivas Diary.

An Eoka leaflet distributed on Aug 28 accused Britain of trying to distract attention from criticism of its Cyprus policy by publishing the Grivas diary. "We do not want to make any reply to the documents," it said, "as we consider them a collection of empty words and soap-bubbles. Discussion is vain. Our reply will now be with arms. Our reply is once again: 'Sit down and talk with Makarios on the basis of his terms.'"

Among the persons mentioned in the extracts from the diary, the Bishop of Kition denied that he had ever met Grivas, while M. Kyrou denied that he had met Archbishop Makarios in Paris. Greek newspapers described the British action in publishing the Grivas papers as an attempt to discredit Archbishop Makarios and to justify "fresh coercive measures in Cyprus." It was also alleged in Athens that the documents were "forgeries."

In view of the references in the Grivas diary to the Bishop of Kition (acting Ethnarch of Cyprus in the absence of Archbishop Makarios), a restriction order under the emergency regulations was served upon him on Aug 29 confining him to his residence, subjecting his correspondence to scrutiny, and preventing him from receiving visitors without police permission. The Cyprus Government announced that there would be no interference with his priestly functions or with his administration of ecclesiastical affairs, but that these arrangements might be reviewed later if further information regarding the Bishop's part in the Eoka conspiracy became available, or if further outbreaks of violence took place

The Terrorist Campaign.

The principal developments in connexion with the Eoka terrorist campaign from June 7 until the temporary suspension of the terrorists' activities on Aug. 16 are summarized chronologically below.

June 7 A Greek Cypriot official, Andreas Sergides, was shot dead while entering his office in Limassol

June 12. Three British servicemen travelling in a military vehicle were killed, and seven others, as well as two Greek Cypriots, injured, when an electrically detonated mine exploded near Berengaria, on the outskirts of Limassol

A Greek Cypriot, Stelios Mavromatis, was sentenced to death for shooting two airmen at Nicosia in March

June 16. Mr. William Boteler, U.S Vice-Consul in Nicosia, was killed when terrorists threw bombs into a Nicosia restaurant; three other Americans dining with him were injured The Greek Cypriot *mukhtar* (headman) of Patriki, a village near Famagusta, was shot dead by terrorists.

It was announced that on June 12 seven terrorists, including two men with a price of £5,000 on their heads, had been captured during large-scale security operations in the Troodos mountains initiated on June 11. Although no casualties had been sustained as a result of terrorist attacks during the operations, five soldiers had lost their lives as a result of accidents, including three who died when a lorry went over a precipice.

June 18. Twenty British soldiers lost their lives, and 16 others suffered serious injuries, in an extensive forest fire in the Troodos mountains, where operations were in progress against terrorist hide-outs The fire, which caused an estimated £1,000,000 worth of damage, had raged for several days over a wide area, and was believed to have been started by escaping terrorists.

Two Greek Cypriots—Kyriakos Korsouttas and Andreas Panayides (both 22)—were condemned to death, and a third—Paraskevas Hiropoulis (18)—was sentenced to life imprisonment, for the murder of an R A.F. corporal at Nicosia airport on May 16.

June 19. A Greek Cypriot was shot dead by gunmen at Zeros. A bomb attack was made on a vehicle carrying a chaplain to the funeral of soldiers who had lost their lives in the forest fire, injuring three Greek Cypriot bystanders but missing the vehicle

June 21. A British police sergeant was shot dead in Larnaca and a Turkish auxiliary policeman was injured in a bomb attack in Nicosia

June 22. It was announced that a fine of £35,000 had been imposed on Limassol, where six people had been killed, ten injured, and 70 bomb incidents had occurred since the beginning of the year.

June 24. Five soldiers were injured, two seriously, when bombs were thrown at an Army vehicle near Dhavlos.

A statement on the Troodos Mountain operations, which ended on June 23, said that documentary proof had been found showing that the Kykko monastery had been used as a supply and information centre for the terrorists Five monks had been detained.

June 25. In Nicosia an attempt was made on the life of Mr. Justice Bernard Shaw, senior puisne judge in Cyprus, who had presided over a number of trials of terrorists and had imposed death sentences on six of them; he received shot wounds in the head and neck. The Old City was cordoned following the attack, a woman being accidentally killed when troops fired at a man who failed to reply when challenged.

June 26. Gunmen killed a Greek Cypriot farmer at Akaki, near Nicosia

June 28. An Eoka leader for whose capture a £5,000 reward had been offered—Haralambos Terkorafis—was captured with 17 other suspects during a raid by security forces in the Kyrenia mountains.

July 2. A Greek Cypriot child was killed and two British soldiers were injured by a bomb thrown at a British army vehicle at Komatou Yialou. The terrorist who threw the bomb was shot dead while attempting to escape.

The Government announced that there was evidence that Greek Cypriot schoolboys spending their holidays in Greece were receiving terrorist training there, and that it might be necessary to declare such pupils prohibited immigrants in order to prevent their return.

July 3. A Greek Cypriot clerk, Jacovos Patatsos, was sentenced to death for the murder of a Turkish policeman on April 23.

July 6. Gunmen killed a Greek Cypriot at Curium, near Limassol

July 8. A British Customs official—Mr. G. P. Kaberry—and his wife were shot dead when their car was stopped by terrorists near Ayios Nicolaos A British army sergeant was killed at Morphou. Five terrorists were arrested in the act of mining a bridge near Larnaca.

July 11. A Greek Cypriot and an Armenian were found murdered in a car near Larnaca. Troops and police opened fire on a crowd of Cypriots who attacked the police station at Evrykhou with stones and other missiles

July 12 The Judicial Committee of the Privy Council dismissed appeals against the death sentences imposed on the terrorists Andreas Zakos and Charilaos Michael on Feb 28 for their part in the ambush of Major Combe on Dec. 15, 1955.

July 16 It was announced that 17 wanted terrorists and quantities of arms and ammunition had been captured during a recent large-scale security operation covering 800 square miles of central Cyprus.

A Greek Cypriot—Chrysostomos Panayi (18)—was sentenced to death for throwing a bomb into a military police barracks in Famagusta, killing one military policeman and wounding others

July 17. An R A F. sergeant was shot dead in a private house in a suburb of Nicosia.

July 24. A Turkish Cypriot was shot dead in Galousa.

July 25. A Maltese special constable—Edward Mompalda—was killed by gunmen while walking with his Greek Cypriot fiancée in Nicosia. Sergeant A. McQuillan of the R.A.F was found dying of gunshot wounds in Limassol.

July 30 A Greek Cypriot woman, the village headman of Letymbou, and a Greek Cypriot boy of 16 were killed by gunmen in different parts of the island

July 31. A Greek Cypriot clerk was shot dead by a terrorist who broke into an office in Nicosia.

Aug. 3 Eoka announced that they were holding Mr. J A. Cremer (78), a retired British civil servant living in Kyrenia, who had disappeared on the previous day, and that they would execute him if the death sentences on Zakos, Michael and Patatsos were carried out.

Security forces imposed restrictions of movement on an area of 100 square miles in the mountainous western region, and declared a district near Famagusta a "danger area" in which anyone found wandering would be shot on sight.

Nicos Xenophontos (23) was sentenced to death for shooting and wounding a Greek Cypriot in Nicosia on April 22

Aug 5. Mr. Cremer was set free by the terrorists after an appeal for his release had been addressed to Eoka by the condemned men; he was taken to hospital and later flown to Britain He had been kept bound hand and foot by the terrorists and was badly shaken by his ordeal, but had not been maltreated

Aug. 6 Miss Drossoula Demetriadou, the fiancée of Mr. Mompalda, who was murdered on July 25 [see above], publicly denounced Eoka in a broadcast on Cyprus Radio Miss Demetriadou, who had been flown to Britain with her family for safety, said: "We do not want you, Grivas . . You have brought only death and terrorism to our island. You have brought misery to our homes, and every day your cruel murders poison our lives . . Get out of our island; we do not want you . ."

Aug 7. In anticipation of disorders in connexion with the execution of Zakos, Michael and Patatsos, due to take place on Aug 9, a ban on the use of all vehicles was imposed in the Nicosia area

A British assistant police superintendent, Mr. A. J. Brooks, was fined £25 for causing bodily harm to three Greek Cypriots whom he had been interrogating.

Aug 8. Strikes protesting at the impending execution of the three terrorists took place throughout Cyprus Building workers failed to report for work at Government sites and military bases, dockers walked off ships at Famagusta, 2,000 workers struck in the Larnaca area, and 400 political detainees staged a 24-hour hunger strike An attempted mass break-out from a political detention camp at Pyla was foiled

A former Eoka member denounced the terrorist organization in an anonymous broadcast on Cyprus Radio, in which he said . " Eoka is filled with hate, with poison, like a mad dog which bites only because it is sick. Are Cypriots slaves ? You know they are not Are the English torturers ? You know they are not I shall continue to fight Eoka as a true patriot, and in that I serve Cyprus "

Aug. 9 The terrorists Zakos, Michael, and Patatsos were executed in Nicosia, despite widespread agitation for a reprieve or a stay of execution An attempt was made to blow up the garrison NAAFI club in Nicosia as a reprisal for the executions, causing no casualties and only slight damage A Cypriot was shot dead in Kythrea.

Aug. 10. The proprietor of a Psolomophou coffee shop was killed and a Turkish Cypriot customer injured by masked gunmen dressed as priests. One man was killed and another injured by gunmen in the western mountains.

It was announced that the residence permit of Mr George Spondes, the last Cyprus correspondent of a Greek newspaper in the island, would not be renewed.

Aug. 11. A Greek Cypriot accountant was shot dead in Famagusta

Aug. 12 A Cypriot was killed in the Famagusta area, and another shot dead when gunmen entered a coffee-shop in a village south of Nicosia. A Greek Cypriot taxi driver was fatally wounded in Kythrea

Aug. 13 A 53-ton British-owned yacht was sunk in Kyrenia harbour by means of a bomb affixed to her bow , there were no casualties

Georghios Efthymiou, a Greek Cypriot, was acquitted of the murder of Mr Thomas Mylrea in Limassol on June 6.

Aug. 16. The body of a Greek Cypriot, Christos Papillaros, who had been released from protective custody earlier the same day, was found shot in Nicosia. Two prisoners undergoing medical treatment at Nicosia General Hospital were abducted by armed terrorists

Aug. 16 A Greek Cypriot was found shot dead in an asbestos mine near Nicosia.

New Cyprus Constitution. - Sir Anthony Eden's Statement. - Lord Radcliffe's Visit to Cyprus.

Constitutional progress in Cyprus was discussed at meetings attended by Sir John Harding, British Ministers, and Service chiefs, which took place in London between June 3 and June 23. During and after these discussions the British Government consulted with the Turkish Government on matters relating to the Turkish Cypriot minority and the strategic interests of Turkey in the island. Referring to these consultations in a press statement on June 30 (see " Turkish Policy " below), M. Adnan Menderes, the Turkish Prime Minister, said that Turkey had insisted on the maintenance of the constitutional *status quo* at least while terrorism continued.

Sir Anthony Eden, in a statement to the House of Commons on July 12, announced that the Government had decided to ask Lord Radcliffe to undertake the duties of Constitutional Commissioner for Cyprus.

" It will be his task," said the Prime Minister, " to consider the framework of a new liberal Constitution, including safeguards for the interests of all communities, and to make recommendations " Lord Radcliffe would be leaving for a preliminary visit to Cyprus on July 13, and on his return the Government would draw up his detailed terms of reference The Prime Minister made it clear that the new Constitution would not be put into effect until terrorism in the island had come to an end.

In a brief survey of the situation in Cyprus, Sir Anthony reaffirmed that the principle of self-determination had been accepted by the Government The problem now was to devise a solution that would provide for the protection of the interests in Cyprus of Britain, Turkey, and other countries towards which Britain had treaty obligations This solution had not yet been found, but that did not preclude taking steps to promote the internal political development of the island.

In reply to questions by Mr. Gaitskell (Leader of the Opposition) the Prime Minister stated that it was not the Government's intention to take up the international aspects of the Cyprus problem with the NATO Council. He also said that Lord Radcliffe, when in Cyprus, would be available for consultation with the Governor and officials, and " with any others who may wish to speak with him."

[Lord Radcliffe (57), a Lord of Appeal in Ordinary, was Director-General of the Ministry of Information during the Second World War, and presided over the Punjab and Bengal Boundary Commissions after the partition of India in 1947.]

Sir John Harding appealed to Cypriots to co-operate with the Constitutional Commissioner in a broadcast on July 12. " With the drafting of a liberal Constitution and the chance of self-government," he said, " the people of Cyprus can look forward with purpose and hope. Let us have done with negative policies, with death and with destruction."

The Cyprus Ethnarchy Council called a special session in Nicosia to consider Sir Anthony Eden's announcement. A statement issued by the Council on July 13 declared that no-one but Archbishop Makarios could discuss the question of Cypriot self-government as a transitional stage in the progress towards self-determination. The Greek Cypriot people would continue to press for the right of self-determination, which Britain was " bound by international agreements to recognize."

Dr. Kutchuk, the leader of the Turkish Cypriot community, expressed satisfaction with Sir Anthony Eden's statement, but referred to Turkish Cypriot misgivings in view of the Greek ethnic majority in the population. " The only safeguard we can accept," he declared," is equal representation in an Upper House [see " Turkish Policy " below]. Our stand on the self-determination issue is that this should be the subject of a treaty between Britain and Turkey, in which Britain should undertake not to apply the self-determination principle to Cyprus without prior Turkish consent."

Lord Radcliffe arrived in Cyprus for his preliminary visit on July 14. In a broadcast over Cyprus Radio on July 17 defining the object of his visit, he declared . " I have not come here with the duty of negotiating with anyone . . . My duty . . . is something quite different. It is for me to study the situation and then draw up recommendations for a Constitution." Lord Radcliffe returned to London on Aug. 2 after discussions on local government with municipal leaders (including the Greek Cypriot mayors of Nicosia and Famagusta), and talks with Dr. Kutchuk, other leaders of the Turkish community, and Government officials.

House of Commons Debate.

The Government's policy was debated in the House of Commons on July 19, when the Opposition moved a resolution to reduce the Colonial Office Vote by a token amount.

Mr. James Griffiths (Lab) said that after Sir John Harding's visit to Britain in June it had been generally believed that the Government had decided on a new approach to the Cyprus problem. The Prime Minister had made it clear in his speech of July 12 that the approach would be based on the principle of self-determination, but it now appeared that this approach had been abandoned after the Turkish Government had raised objections. After saying that abandonment of the plan had given Turkey a " veto " over the Cyprus issue, Mr. Griffiths asked the Government to state whether they regarded the Cyprus question as an international or domestic matter If it was an international question involving NATO, then it should be taken up with the NATO Council, and the Government could no longer argue that the matter lay outside the jurisdiction of the U.N , as they had done when Greece had sought to place it on the agenda of the General Assembly in 1955 [see 14461 A]. If it was a domestic problem, the Government was responsible for finding a solution

Lord Radcliffe's task, Mr Griffiths continued, had been made impossible by the refusal of the Greek Cypriots to meet him without Archbishop Makarios. It would be months before the Constitutional Commissioner made his recommendations, and meanwhile violence would continue The Opposition had earlier proposed [see 14901 A] a conference in London with representatives of the two communities, including Archbishop Makarios Sooner or later, Mr Griffiths concluded, the Government would have to come back to some such proposal in order to save the Cyprus situation

Mr. Selwyn Lloyd, the Foreign Secretary, replied that the Cyprus question was juridically a domestic problem, but had important international aspects It was wrong to suppose that the Government could have reached a settlement with the Cypriot people without taking account of the strong feelings of Greece and Turkey The Government had accepted self-determination, but the application of the principle was another matter. The Government had not said that the principle could never be applicable, and they were willing to try to work out the conditions in which it could be applied without creating greater problems and dangers **Mr. Aneurin Bevan** (Lab), intervening, accused the Foreign Secretary of " hedging " the Government's commitment to self-determination with so many qualifications as to destroy its validity, but **Mr. Selwyn Lloyd** refused to make a more specific statement about the conditions under which self-determination might be applied

The Foreign Secretary went on to say that Cyprus did not only concern NATO ; Britain's other Middle Eastern alliances had to be taken into account, and a NATO base on Greek soil could not satisfy Britain's needs He suggested that Mr. Griffiths had failed to understand the position of the Turks, for whom Cyprus was an offshore island covering the approaches to their southern ports. Turkey's friendship, moreover, was of tremendous importance to the Commonwealth Commenting on the recent conduct of the Greek Government, the Foreign Secretary said " It does not make for friendship and confidence when people profess high moral principles and at the same time incite people to commit murder Greek subjects, Greek arms, and Greek munitions have gone to help the terrorists. This could not have happened without the connivance of Greek officials." As regards the Greek Cypriot community, Mr. Selwyn Lloyd declared : " The terrorists, aided and abetted by the Orthodox Church, have created a state of affairs in which it requires great courage for individual Greek Cypriots not to toe the *enosis* line One of the difficulties about

persuading the Ethnarchy to accept any Constitution is that they do not really want normal democratic processes by secret ballot as we know them in Britain, because that might very soon mean the end of the political power of the Church" After stressing that Lord Radcliffe's visit to Cyprus was a purely exploratory one, and that he had not gone out as a negotiator, the Foreign Secretary appealed to Members to give the Constitutional Commissioner a fair chance to accomplish his difficult task

Mr. Clement Davies (L) criticized the Government's sensitiveness to the attitude of Turkey, which had specifically renounced her rights in Cyprus under the Lausanne Treaty **Mr. Walter Elliot** (C) proposed that Lord Radcliffe should be empowered to consider partition of the island into a Greek region, a Turkish region, and a British enclave **Mr. Francis Noel-Baker** (Lab) considered that although partition would not commend itself as a solution, there might be a case for separation between municipalities during a transitional period; he appealed to the Government to recall Archbishop Makarios from exile **Mr. Julian Amery** (C) advocated a condominium shared by Britain, Greece, and Turkey

Mr. Lennox-Boyd, the Colonial Secretary, rejected the Opposition's suggestion that Turkey had been given a "veto" over any Cyprus settlement, and reiterated that the Government did not intend to abandon the search for a solution He assured the House that the terms of reference prescribed for Lord Radcliffe's recommendations would be made public after the Government had consulted with him on his return from Cyprus

The Opposition motion to reduce the Colonial Office Vote was defeated by 319 votes to 246.

[Note —Under Article 16 of the Lausanne Treaty of 1923, Turkey renounced 'all rights and title whatsoever over or respecting the territories situated outside the frontiers laid down in the present treaty." Under Article 20, Turkey recognized the annexation of Cyprus proclaimed by the British Government on Nov 5, 1914.]

House of Lords Debate.

The House of Lords debated the Cyprus situation on July 25.

Earl Attlee, opening the debate, drew attention to the Government's "over-emphasis" on strategic considerations and on the Turkish point of view He suggested that there had been some confusion on the question whether Cyprus was to be considered an international or a domestic problem, and called on the Government to adopt a new approach, either through NATO or through direct contact with the Cypriots by bringing back Archbishop Makarios

Lord Lloyd (Under-Secretary, Colonial Office) denied that Cyprus presented "merely another colonial problem" which could be settled at any time between the Government and the Cypriot people. Nor could it be said precisely whether the question was domestic or international, since it was both It would be advantageous if discussion of the whole question could be removed from the international arena, where all parties tended to adopt extreme positions For this reason he was doubtful about referring the question to an international body such as NATO The difficulty with regard to Archbishop Makarios was that he was not prepared to accept any solution which did not give him everything he wanted. There could be no discussion with him until he publicly denounced violence

The Archbishop of Canterbury (Dr Fisher), in a speech pleading for reconciliation in Cyprus, urged that the "explosive" question of self-determination should be dropped for the time being, suggesting that in this way the Cyprus problem would be reduced to a purely internal issue of manageable proportions Archbishop Makarios himself had agreed to do this when in February he had written to Sir John Harding: "Although we do not agree with the pre-conditions on which the application of self-determination is made to depend, we would nevertheless in the interests of the pacification of the country agree to co-operate in the framing and operation of a constitution of self-government as a transitional stage towards self-determination."

Dr Fisher regretted the Government's insistence that terrorism must end before negotiations could begin "Let us," he said "leave the work of terrorism and the harsh duty of its suppression to those whose business it is It should not be allowed to hinder the working out of a constitutional agreement If through avoiding the passions aroused by self-determination and terrorism we can concentrate on achieving an instrument of self-government, success is certainly possible" In conversations he had had with leading Cypriots they had agreed with two main points of emphasis—that a liberal constitution must provide for an elected majority reflecting the composition of the population, and that adequate safeguards must be given to minorities, notably the Turkish Cypriots.

The Primate emphasized that Archbishop Makarios must be "brought back into the picture", that the Ethnarch should have an opportunity of discussing Lord Radcliffe's proposals, when formulated, with other Greek Cypriot leaders; and that he should be one of the signatories to the final draft. A denunciation of violence by Archbishop Makarios, however, must be made a condition of the final settlement, and the sooner this could be made the easier would be the work of co-operation "Reconciliation," Dr Fisher concluded, "is in sight if all the parties can do the simple, humble, unexciting but sufficient thing."

The Marquess of Salisbury (Lord President of the Council) agreed with much of what the Archbishop of Canterbury had said He expressed the hope that Archbishop Makarios would denounce violence publicly, thereby creating a new situation In the meantime he appealed to the Labour Party to give its "full blessing" to the efforts of Lord Radcliffe. If Greek and Cypriot opinion were to know that British opinion was united on this subject, it might give the mission a far greater chance of success

Greek Government's Cyprus Policy. - Greek Memorandum to U.N. Members.

In amplification of the Greek request for a debate on Cyprus during the 11th session of the General Assembly (see 14757 A), the Greek representative at the United Nations (M. Palamas) submitted an explanatory memorandum to all member-countries on June 13.

Commenting on British official statements that Cyprus was essential to the security of British oil interests in the Middle East, the memorandum declared that Britain intended to "keep Cyprus under colonial rule because of strategic and political considerations, in order to be able to discharge her alleged responsibilities in the Middle East. In particular Cyprus is to be used for the defence of British oil interests" The memorandum further alleged that the British Government was pursuing "repressive measures" against the Cypriot population, compared British methods with those used by the Axis Powers during the Second World War, and observed that "wherever law and order do not emanate from the free will of the people, but are the expression of forcibly imposed domination, the case becomes one of oppression." The use of violence by both sides was deplored, but the memorandum asserted "On the British side violence is used against freedom. On the Cypriot side violence is used in favour of freedom."

The British permanent representative at the U.N. (Sir Pierson Dixon) issued a statement on the same day replying to the charges made in the Greek memorandum.

Accusing Greece of carrying on a world-wide campaign of defamatory propaganda against Britain, he added. "In this propaganda campaign, in which the official organs of the Greek Government have not hesitated to urge their supporters in Cyprus openly to violence, the Greek Government have been pursuing the aim of asserting their own sovereignty over Cyprus Such a policy must be doubly deplored when attempts are made to use the U.N as a vehicle for Greek propaganda" The statement also reiterated the British contention that the Cyprus question was a domestic issue over which the U N. had no jurisdiction.

The Greek Prime Minister (M. Karamanlis) made a statement about Greece's Cyprus policy in Athens on July 21, in which he commented upon Mr. Selwyn Lloyd's criticisms of Greece in the House of Commons on July 19.

Claiming that arrangements could be made which would dispel Turkish fears that self-determination for Cyprus would threaten Turkey's security, M. Karamanlis stated that there could be no question of revising the Lausanne Treaty's provisions with regard to Cyprus, since Turkey had explicitly renounced all sovereignty over the island in that document. He went on to insist that Greece had not supported the Cypriot cause by any other than political and diplomatic means As regards Mr. Selwyn Lloyd's praise for Turkey as Britain's ally, M. Karamanlis pointed out that Greece had fought at Britain's side during two World Wars, while Turkey had either fought against Britain or remained neutral. At the same time M Karamanlis reaffirmed that Greece would remain loyal to her international alliances, despite "unprecedented ill-treatment."

Turkish Policy. - Dr. Kutchuk's Proposals.

The attitude of Turkey to the Cyprus issue was defined in a motion adopted on July 12 by the parliamentary group of the Democratic Party (the Government party).

The motion asserted that Cyprus was a part of Turkey and vital to her security, belonging geographically and historically to Anatolia. The island had first been ceded to Britain in 1878 under certain conditions in connexion with the defence of Turkey against Russia, and the 1878 Convention had conditioned the Lausanne Treaty of 1923 Any decision taken by Britain which might lead to a change in the status of the island, being a violation of the conditions of the 1878 Convention, should therefore result in the return of Cyprus to Turkey. The encouragement by the Greek Press and Government of terrorism, involving outrages committed upon members of the Turkish Cypriot community, could not be regarded otherwise than as an unfriendly and even hostile act. The motion further suggested that any disturbance of the existing equilibrium in the eastern Mediterranean between Turkey and Greece, which might be caused by a Greek annexation of Cyprus, would lead to the reopening by Turkey of the question of Western Thrace and the Dodecanese (Greek territories with substantial Turkish populations) Turkey, the resolution concluded, could not approve any move by Britain to negotiate with the terrorists on any basis affecting the present or future status of the island.

M. Menderes (the Turkish Prime Minister), in a press statement on June 30, said that in recent consultations with the British Government on constitutional progress in Cyprus, Turkey had called for the maintenance of the constitutional *status quo* in the island.

Declaring that "Cypriots—Turks and Greeks alike—are well treated and have no cause for complaint," he said there was no point in disturbing the "delicate system" set up by the Lausanne Treaty.

Drawing attention to the intermingling of Greek and Turkish populations in the eastern Mediterranean, M. Menderes pointed out that there were 100,000 Greeks living in Istanbul, as well as many Turks in Thrace In addition to the 100,000 Turks in Cyprus, there were a further half a million Cypriot Turks on the Turkish mainland. Stressing that Greece had never exercised sovereignty over Cyprus, M. Menderes said that she had " worked up this whole tremendous agitation simply to be able to annex an island 40 miles from Turkey and 600 or 700 miles from her own mainland " He went on to suggest that Britain would have little difficulty in suppressing terrorism but for " humanitarian considerations and moral pressures exerted on her in some quarters," and declared that Turkey could not discuss constitutional modifications while terrorism continued. Turkey was not prepared to consider majority self-determination or Greek annexation of Cyprus In conclusion M. Menderes gave a warning that if Britain relinquished her present position in Cyprus and the Middle East, it would open the whole area to Soviet penetration.

Dr. Kutchuk, the Turkish Cypriot leader, gave details on June 27 of the kind of self-governing Constitution which would be acceptable to the Turkish Cypriot community and to the Government of Turkey. He had recently returned from Turkey, where he had had talks with Government leaders.

The three essential points made in Dr. Kutchuk's statement were

(1) There should be a Lower House with an elected member for every 10,000 inhabitants (giving the Greek Cypriots a majority of about four to one).

(2) There should be an Upper House with eight Turkish and eight Greek Cypriot members, which would enjoy a right of veto over measures proposed by the Lower House. One or two British representatives should be permitted in the Upper House to watch over British interests, but their voting rights would have to be discussed with the Turkish Government.

(3) The island should be a self-governing territory within the British Commonwealth, but the Legislature should not have authority to decide on self-determination.

In a further statement at Adana on Aug 15, during a tour of southern Anatolia undertaken with the object of making contact with Turks of Cypriot descent living on the Turkish mainland, Dr. Kutchuk insisted that terrorism must be crushed in Cyprus before the establishment of self-government was contemplated. He expressed regret that the British Government, although it had earlier accepted this contention, appeared to have deviated from its policy by sending Lord Radcliffe to the island as Constitutional Commissioner.

Report of Commission on Cyprus Police.

The Cyprus Government published on Aug 13 the report of a commission of investigation into the Cyprus police force, which had visited the island earlier in the year. The commission consisted of Mr. F. J. Armstrong (a British Government constabulary inspector), Sir Henry Studdy (Chief Constable of the West Riding of Yorkshire), and Lieut.-Colonel G. C. White (formerly Chief Constable of Warwickshire), whose appointment as Commissioner of Police in Cyprus had been announced in June.

The report expressed strong criticism of the conduct of the Cyprus police force before 1954. Pointing out that the Cyprus police had never enjoyed the same respect from the public as the British police, the report stated . " It seems not improbable that the policy adopted with regard to seditious writings and utterances may have contributed to a general feeling in the island that the law can be broken with impunity. In 1954 no fewer than 180 cases of sedition, and in 1955 46 cases, were reported. No proceedings were taken in either year. Comment would be superfluous "

The report went on to draw attention to the Government's unwillingness to sanction expenditure on the police, as a consequence of which morale had declined. Unsatisfactory recruitment, training and leadership before 1954 were also mentioned The police had been intimidated by Eoka, and their loyalty and devotion had been affected by their lack of certainty that the British would stay in Cyprus

The following recommendations were made by the commission

(1) The police should be the special responsibility of a senior Government official, to whom the Police Commissioner should have free and direct access

(2) Scales of pay should be revised

(3) Construction of houses for members of the police force should begin as soon as possible.

(4) A cadet recruitment scheme should be tried on a small scale as soon as conditions made it possible.

(5) British police officers seconded to Cyprus should ensure that Cypriots were trained to carry on their work when they left.

(6) Another 100 British police officers should be seconded for a two-year term.

In publishing the report, the Cyprus Government announced that it had accepted all its recommendations ; that the Deputy Governor would in future have special responsibility for the police ; that £80,000 had been earmarked for police housing in 1956 ; and that the recruitment of additional police officers in Britain was already in progress The first 50 newly recruited policemen arrived in Nicosia on Aug. 29.—(Times - Daily Telegraph - Manchester Guardian - U.N. Information Centre, London - Turkish Embassy, London) **(Prev. rep. 14901 A.)**

A. AUSTRALIA. — Shipping. - Legislation on Future Operation of Commonwealth Government Line. - Agreement with Private Lines on Regulation of Coastal Shipping. - Government Shipbuilding Programme.

The Australian House of Representatives gave a second reading on June 14 (by 44 votes to 22) to two Bills which respectively (*a*) sanctioned a 20-year agreement between the Commonwealth Government and coastal shipping lines regulating competition between these lines and the Commonwealth Government line, and limiting, on certain conditions, the size of the latter's fleet to 325,000 gross tons ; (*b*) provided for the reconstitution of the Australian Shipping Board and the setting-up of a five-member Australian Shipping Commission to operate the Government line. Both Bills had previously passed through the Senate.

Senator Paltridge (Minister for Shipping and Transport), introducing the Bills in the Senate on May 31, said that for some years the Commonwealth Government had been trying to dispose of the ships to private enterprise, but had found that it was not possible to sell them on satisfactory terms. It had therefore decided that Government ships should in future be operated by a Commission with a considerable degree of autonomy.

The object of the Bills was to enable private enterprise to play its part in providing economic and efficient coastal services, while retaining to the Government the ownership of the Commonwealth Government line. Denying that the Government was thereby conferring an undue advantage on the private companies, the Minister said that it was determined to ensure that the Australian coast was served by an Australian-owned fleet of modern ships of the kinds required It also wanted to avoid having its own ships expand unnecessarily into trades already served efficiently by private enterprise.

The agreement proposed in the first Bill (the Australian Coastal Shipping Bill) was intended to be signed in the first instance by 15 companies operating in the coastal trade, but in order to avoid any possibility of monopoly, provision was made for the inclusion of any other company engaged in shipping or stevedoring In return for the Government undertaking to limit the size of its line to 325,000 gross tons, which would be sufficient to cover all Government-owned ships now in service or under construction and to leave a reasonable margin for expansion, the private shipowners would undertake to provide adequate services, and provision was made for an increase in the Government's authorized tonnage if they failed to do so The Government line would make use of private companies for stevedoring and cargo-handling work, as well as for booking passengers and cargo.

Under the second Bill, the proposed new Commission would have wide powers to operate the Government line with a minimum of ministerial control, but the Minister of Shipping and Transport would have power to approve or disallow freight rates, though not to initiate changes in rates The Commission would not have to pay a fixed rate of interest but would be required to pay a reasonable return on capital in the form of annual dividend payments to the Government It should refrain from charging uneconomic freight rates, except that the Government might order it to provide uneconomic services to meet the needs of a particular area—in which case, however, the Government would defray any losses involved Consistent with these obligations, the Commission would charge the lowest rates practicable

During the second reading of the Bills in the House of Representatives, **Dr. Evatt** (Leader of the Opposition) strongly denounced the proposed agreement, and in particular the clause limiting the size of the Government fleet to 325,000 gross tons He declared that if the Labour Party were returned to office it would repudiate the agreement, remove the tonnage restrictions, and restore the Government line's full ability to compete with private companies

The Australian Shipping Board announced on July 13 that the Government's present merchant shipbuilding programme envisaged the construction by 1960 of seven ships of 10,000 tons each, two of 7,000 tons each, and two grain ships of 2,000 tons each, making a total of 88,000 tons. Three of the ships would be built at Whyalla, three at Brisbane, and two at Maryborough. (Australian News and Information Bureau) **(Prev. rep. 10623 A.)**

Note. Mr Menzies, the Prime Minister, had stated in Melbourne on Nov 15, 1955, that the Government was prepared to sell the Commonwealth line, but " only at a proper commercial price " He said that during the past five years the line had shown a profit of £A2,750,000, compared with " a total loss of £A6,000,000 when it was operated under a Labour Government." (Times).

B. PERSIA. — Major Oil Discovery.

A new oil-well, the biggest so far known in Persia, was discovered on Aug. 25 at Qum, 75 miles south of Teheran, during explorations by the National Iranian Oil Company. It was officially stated that it had a 200-foot spout when tapped ; that it was flowing at a rate of 80,000 barrels a day, compared with a daily output of 50,000 barrels at the Aghajari oil-well, hitherto the largest in Persia ; and that it was probable that a large oilfield existed in the Qum region.—(Times).

A. CANADA. — The Trans-Canada Pipeline Assistance Bill. - Federal Aid for Construction of Gas Pipeline. - Opposition Attacks on Government Scheme. - Conflict over Speaker of House of Commons.

The most bitter conflict to take place in the Canadian House of Commons for many years, involving—for the first time since 1932—the curtailment of debate by the imposition of the closure, marked the passage in May and June of the Government's Trans-Canada Pipeline Assistance Bill.

The Bill (1) empowered the Government to advance up to $80,000,000 on short-term loan to a private company, Trans-Canada Pipe Lines Ltd., to enable it to begin the immediate construction of the western section of a pipeline intended to connect the natural gas fields of Alberta with Toronto and Montreal; (2) authorized the formation of a Crown company to build a section of the pipeline in northern Ontario and lease it to the Trans-Canada company.

The pipeline, when completed, will be 2,320 miles in length, and will thus be the longest pipeline for natural gas in the world. It will follow the route Princess (Alberta)-Calgary-Regina-Brandon-Winnipeg-Toronto-Ottawa-Montreal, connecting with U.S. natural gas transmission lines at Emerson (Manitoba) and Niagara (Ontario). Its cost was put at about $375,000,000 (Canadian). The western or "prairie" section will connect Calgary with Winnipeg, a distance of nearly 600 miles, whilst the northern Ontario section will be about 675 miles long and will connect Winnipeg (Manitoba) with Kapuskasing (Ontario).

The pipeline project dates back to 1951, when Trans-Canada Pipe Lines Ltd was formed by a Canadian subsidiary of the Delhi Oil Corporation of Texas, U S A, to construct it Pending the Canadian Government's approval, however, the scheme remained in suspense until January 1954, when a merger on a 50-50 basis was arranged between Trans-Canada and Western Pipelines Ltd, a company largely controlled by Canadian interests. Approval was then given, but construction of the pipeline was still held up and had not begun when in August, 1955, the Tennessee Gas Transmission Company (another U S corporation) announced that, subject to the approval of the U S Federal Power Commission, it had contracted (*a*) to buy from Trans-Canada Pipe Lines 200,000,000 cubic feet of gas daily, to be piped across the Canadian-U S border at Emerson, Manitoba, (*b*) to sell to Trans-Canada about 86,000,000 cu ft of gas a day, with delivery to the Trans-Canada system at Niagara. Another contract with the Canadian Gulf Oil Co (a subsidiary of the U S Gulf Oil Corporation), covering the purchase from Trans-Canada of 170,000,000 cu ft of gas daily for 25 years, was announced in October.

In November 1955 it was announced (1) that the United States Steel Corporation had arranged to supply pipes for the section from Alberta to Winnipeg, and also that the Tennessee Gas Transmission Company had acquired a one-third interest in Trans-Canada, thus becoming an equal partner with the Canadian Delhi Oil and Western Pipe Lines companies, each of them holding one-third of the shares. As a result of a further readjustment of holding interests in the Trans-Canada company, in February 1956, the Canadian Gulf Oil Co and the Hudson Bay Oil and Gas Co (a subsidiary of the U.S Continental Oil Company) each acquired 17 per cent of Trans-Canada stock, whilst the Tennessee company also reduced its holding to 17 per cent, the remainder of Trans-Canada stock was held by the Canadian Delhi Co as to 26 per cent and by Western Pipe Lines Ltd as to 23 per cent, thus giving U S interests a 77 per cent majority

Meanwhile Mr. St. Laurent, the Canadian Prime Minister, had stated in September 1955 that he expected work on the pipeline to begin in the spring of 1956, and that the Government might set up a Crown company to build the difficult northern Ontario section. The reasons underlying the Government's support of the pipeline project, and in particular its willingness to build the northern Ontario section itself, were explained by Mr. C. D. Howe, the Minister of Trade and Commerce, in a speech in Toronto on Jan. 30, 1956.

After pointing out that in the U S A. energy derived from natural gas represented about 25 per cent of all energy produced from coal, water-power, and petroleum, Mr Howe stressed that although Canada possessed abundant sources of water-power, it had become clear that these sources were fast being loaded to capacity As a result, it was calculated that by 1962 Ontario would require other sources of energy, of which natural gas seemed to be the most promising. Limited quantities of natural gas were already being imported into the province from the U S A, and its cleanness and reliability had made it attractive to both householders and industry. The building-up of a market for natural gas, however, would necessarily take considerable time, and this fact would affect in a major degree the ability of the sponsors of the Trans-Canada Pipe Lines project to finance the entire scheme at its inception It appeared impossible to finance the pipeline—the longest and one of the largest-capacity gas pipelines ever to be built—without some form of Government assistance, the difficulty lying in the sparsely-settled area of northern Ontario, which had always been the main obstacle to economic all-Canadian transportation Of the various forms of assistance which the Government had considered, the least objectionable seemed to be the governmental construction and ownership of a section of the line across northern Ontario "When relieved of the capital cost of financing this section of the line," the Minister added, "the Trans-Canada Pipe Lines project would appear to be readily financeable Without help from the Government to the extent I have indicated, the line would seem to be incapable of being financed privately, at least for many years to come"

"The Government of Ontario has shared the concern of the Federal Government in the problem of bringing Alberta gas into this province," Mr. Howe went on. "The two governments have kept in close touch with developments over several years The Federal Government therefore proposed to the Government of Ontario that the two governments join in forming a Crown company to build the northern Ontario section of the line, on the basis of one-third of the cost to Ontario and two-thirds to the Federal Government. This proposal was accepted by the Government of Ontario, subject to legislative approval, with a limit of $35,000,000 on the Ontario participation"

After saying that the project could probably have been financed in some years' time without Government intervention, if it could have been delayed until an adequate demand had been built up, Mr. Howe stressed that the proposed Government participation was intended to enable matters to be speeded up and was not in any sense a subsidy. He added "It seems to me that time is of the first importance, and that under the circumstances Government participation is warranted. This view is shared by the Ontario Government. A subsidy for the line is not desirable, since gas in central Ontario and elsewhere will compete as a fuel with coal and oil I do not think it desirable for governments to subsidize one fuel against competing fuels and one set of producers against another."

Dealing with the widely-raised objection that Trans-Canada Pipe Lines had been sponsored by U S firms and not by Canadian interests, Mr. Howe said that, with few exceptions, all Canadian oil and natural gas producing companies were offshoots of U S firms, and that, on balance, Trans-Canada was "more Canadian than the average of Canada's petroleum industry as a whole." He added that the company had given an undertaking that if public financing took place, at least 51 per cent of the voting stock would be offered to Canadian nationals

It had also been said [the Minister continued] that a trans-Canadian pipeline was not the most economical method of supplying western gas to central Ontario. The alternative most frequently suggested was an exchange of gas with the U S A, under which Alberta gas would be delivered to the central States of the U S.A. on the understanding that gas from Texas should be delivered in equal quantities to central Ontario This proposal, however, ignored the delay with which the U.S Federal Power Commission met proposals to market Canadian gas in the U S A, and the Commission's reluctance to permit U S gas to be exported to Canada Study of the proposal had only confirmed the Canadian Government's opinion that such an exchange would be "entirely unworkable"

In conclusion, Mr. Howe estimated that, largely because of the shortage of steel, the pipeline would not be completed before the autumn of 1958—a year later than originally planned. He pointed out that the procuring and laying of the pipeline itself would be "only part of the project," which would also include (*a*) well-drilling and the erection of gas-purifying plant in Alberta at a total cost of about $250,000,000, (*b*) the building-up of distribution systems and the launching of sales campaigns to ensure a market for the gas; (*c*) the manufacture and sale of gas-using apparatus. All this might inflate the total cost of the scheme—which would be comparable in effects and magnitude with the St. Lawrence Seaway and power projects—to as much as $1,000,000,000

Even before the introduction of the Bill in May 1956, strong criticism of the Government's policy had been voiced in the Canadian House of Commons on March 16 by Colonel George Drew, leader of the Progressive Conservative party.

Describing Trans-Canada Pipe Lines as "fundamentally an American company," Colonel Drew charged the Government with "proposing to use the taxpayers' money to assist U.S. financial interests to establish control over one of Canada's major resources." Instead of the Government's present "sell-out" policy, he declared, one of four alternative courses should be adopted. (1) the whole pipeline question should be referred to a committee of the House of Commons, which would ascertain the facts and make recommendations, (2) Trans-Canada Pipe Lines should be reorganized as an all-Canadian company which could proceed immediately with the project under Canadian control, (3) if Trans-Canada could not carry out its undertakings, the whole matter should be reopened and new interests be permitted to make proposals for an all-Canadian pipeline, (4) if it could be shown that part of the pipeline would have to be built by a Crown company as the Government asserted, the entire line should be built by the State and leased for operation under Canadian control.

Following a decision by the Canadian Board of Transport Commissioners on March 28 to grant Trans-Canada Pipe Lines a further six months in which to show financial ability to construct the pipeline, lengthy Cabinet discussions took place on a proposal to grant the company a Government loan of $72,000,000 (later increased to $80,000,000) to enable it to make an immediate start on the western section. On May 8 it was announced that the Cabinet had approved the granting of the loan.

Mr Howe, announcing the Government's decision in the House of Commons on that date, explained that in recent weeks the Government had urged the Trans-Canada Company to get started during the present year, but that the company had replied that it was waiting for the necessary financing to be arranged All the required contracts had been placed and an option on sufficient 34-inch pipeline secured; but, owing to the U S Federal Power Commission's delay, the financing had not been completed This meant that the Government had to consider whether or not to abandon the Trans-Canada company. To do so would not only be unfair to the company itself, but would add to the delay in getting approval for the export of Canadian gas, which was essential to the success of the pipeline scheme, at any rate in the earlier stages Even more important, however, was the fact that to abandon Trans-Canada now would mean giving up all hope of getting the pipeline started in 1956.

"After careful and prolonged consideration," Mr Howe went on, "the Government therefore asked Trans-Canada whether it would be prepared to construct the western section in 1956 if the Government were to advance a substantial portion, not to exceed 90 per cent, of the cost of construction, at an interest rate of five per cent per annum for a short period . The approach came from the Government, not Trans-Canada Trans-Canada is not in default . "

Mr Howe added that as security the Government had asked Trans-Canada to mortgage all its assets, properties, and undertakings, and had also asked the shareholders to give it an option on their shares at a price representing the paid-up value, less certain deductions. In the event of foreclosure the Government would have the option of taking over Trans-Canada as a going concern, or returning the shares and assets not related to the western or northern Ontario sections and of proceeding independently of Trans-Canada The company and its shareholders had agreed to the proposals, and if they were ratified by Parliament the position would be as follows

(1) The western section of the all-Canadian pipeline would be built in 1956

(2) If Trans-Canada was successful in financing the whole line by March 31, 1957 (the date stipulated for the repayment of the loan from the Government), the advance would be repaid and the construction of the remainder of the line would proceed as originally planned

(3) If, on the other hand, the advance was not repaid by the due date or there was any other default, the Government could take over the line and take whatever steps were necessary and approved by Parliament to ensure its speedy completion.

Mr Howe concluded by stressing that 'in a country like Canada it is of the greatest importance that private enterprise should be given an adequate opportunity and every reasonable chance to do the job" The Government's proposals "did not commit Canada to public ownership," but recognized that if there were "too many handicaps in the way of private enterprise" the Government might have to "take over and construct the whole of the line as a national enterprise."

Mr. Howe's statements led to bitter attacks both from Colonel Drew and from Mr. M. J Coldwell, leader of the C.C.F. (the Canadian Labour party).

Colonel Drew strongly criticized the Government for having, as he alleged, delayed consulting Parliament on the pipeline question for five years, and for having meanwhile "warned off private investors who would have been prepared to go ahead and build a pipeline without the inducement of a 90 per cent loan" The Trans-Canada company, he asserted, was "owned 83 per cent by investors in the U.S A." and the Government's proposals were "nothing more than an invitation to these investors to come to Canada to be financed to the extent of 90 cents on every dollar and retain control over their investment" After demanding legislation to ensure that at all times the president and the majority of the directors of Trans-Canada should be Canadians, he concluded: "Let us by all means have investment from the United States, but let us have that investment under terms which assure effective supervision and control by Canadians in relation to one of the most important of our resources"

Mr. Coldwell charged the Government with "handing over a great national undertaking to a corporation under the control of powerful U.S oil and gas companies," and warned it that the next general election would show that the proposals were "the most unpopular ever put before the people of Canada"

The Trans-Canada Pipe Lines Assistance Bill, implementing the Government's decision, was introduced in the House of Commons on May 14 by Mr. Howe, who explained why he considered it essential that Parliament should approve the proposed loan to Trans-Canada Pipe Lines without delay, and why alternative proposals put forward by a group headed by Mr. McMahon (a Calgary oil executive) were unacceptable. [The McMahon group had proposed to build the entire pipeline by the autumn of 1958 without Government assistance.]

Mr. Howe said that the main reason for the Government's decision to assist the Trans-Canada company was the fact that it possessed an option on the only 34-inch pipeline material available for an immediate start. This material was in store in the U.S A., but unless the company took up its option before the end of the 1956 building season, it would lose it and no pipeline material would be available before 1958 at the earliest. The objection to the McMahon proposals was that they involved the export to the U S A of 400,000,000 cubic feet of Canadian gas a day, compared with only 200,000,000 cubic feet under the Trans-Canada scheme. This would leave only 100,000,000 cubic feet a day for eastern Canada, an insufficient amount to attract capital for building the line eastward from Winnipeg, and quite inadequate for central Canadian requirements

As regards the C C F 's contention that the pipeline should be built as a State venture, the Government did not consider this a practical economic proposition, moreover, it doubted the propriety of using the taxpayers' money to operate a natural gas business in competition with privately-owned coal and oil interests Though it might be necessary for the Government to enter the field, every prudent alternative should be used first. At present there was no suitable alternative to the Trans-Canada scheme, which, unless it were launched at once, would "languish for years to come" For this reason the Government intended to make use of the "guillotine" procedure at every stage of the debate to enable the Bill to become law by June 7—the latest possible date to enable the western section of the line to be completed by the end of 1956

Colonel Drew again denounced the Government's scheme as "a complete sell-out which has no relation to the original proposals," and described the proposed imposition of the closure as "a denial of ordinary Parliamentary rights" and "an act of dictatorship" He demanded that the Government should dissolve Parliament and seek the country's verdict on the scheme at a general election

Mr. Coldwell, who also demanded an immediate dissolution, declared that "instead of financing American corporations and building enormous profits for private American economic buccaneers," the Government should have carried the project to fruition as "a Canadian enterprise under Canadian ownership and guidance to serve the interests of the Canadian people."

After a heated debate lasting over 14 hours, the imposition of the "guillotine" was agreed to on May 15 by 122 votes to 73, the Social Credit and Independent members voting with the Government. The first reading was then given, and after a three-day debate, again marked by stormy scenes over the application of the "guillotine," the Bill was read a second time on May 22

During the Committee stage (May 25-June 1) Colonel Drew questioned the Prime Minister about proposals put forward by Mr Lloyd Champion, a Montreal investment broker, and publicized by him in the Canadian Press Mr. Champion's proposals involved (*a*) the building of the pipeline by an independent company which would pay its suppliers in long-term credits instead of in cash, (*b*) the ensuring of Canadian control by providing that the company's stock should be of two classes, voting and non-voting, with all voting shares held by Canadians Mr St Laurent replied that he had not put the Champion proposals before the Cabinet because Mr Harris, the Finance Minister, had advised him that they "could not be taken seriously"

The Committee stage was marked by repeated Opposition attempts to make use of procedural points to delay progress, countered by the action of the Government in moving "the postponement of further consideration" of each of the six clauses of the Bill before its substance had been considered at all. On May 31 the Speaker (Mr. René Beaudoin) accepted a C.C F. motion intended to prevent the Government from applying the closure, but when the House reassembled on June 1 he reversed his decision, declaring that he "made a serious mistake" in accepting the C.C.F. motion and suggesting that the House should begin its deliberations at the point where the motion had been introduced. The Progressive Conservative and C.C.F. members, however, refused to vote on a resolution to this effect, which was subsequently carried by 140 votes to nil. Meanwhile the Speaker's statement had occasioned violent scenes in which Opposition members swarmed into the central aisle of the House, shook their fists at Mr. Beaudoin over the mace, and described him as a "Government puppet" and "dictator." Colonel Drew also moved a vote of censure on Mr. Beaudoin but was declared out of order, whereupon he announced his intention of bringing up the censure motion later. The closure was then carried by 144 votes to 51, and the Committee stage concluded.

During the third reading debate (June 4) **Mr. Harris,** the Finance Minister, supported the case for building the pipeline quickly. He said that the Government had in mind the possibility that the U S economy might take a downward turn, as it had done in later 1953 and early 1954, as Canada tended to follow U S. economic trends, it was necessary to get the pipeline started in order to provide general employment should such a recession occur.

After further unsuccessful Opposition attempts to delay the Bill's progress, it was given a third reading in the early hours of June 6 by 50 votes to six. The Bill passed through all its stages in the Senate on June 6-7, and received the Royal Assent on the latter date.

The Opposition motion of censure on the Speaker had again been put forward by Colonel Drew during the third reading debate in the House of Commons on June 5. It accused Mr Beaudoin of subordinating the rights of the House to the Government's will, of repeatedly refusing to allow M.P.s to speak

when the rules permitted them to be heard, and of improperly reversing one of his decisions without notice. The motion—the first resolution censuring a Speaker ever put forward in the Canadian House of Commons—was subsequently defeated, the Social Credit members voting with the Government. On July 2 Mr Beaudoin announced that he intended to submit his resignation, but on July 9 Mr. St. Laurent stated that he had persuaded the Speaker to withdraw it.

Immediately following the enactment of the Bill, Mr. St. Laurent announced on June 7 the setting-up of the Northern Ontario Pipe Line Crown Corporation to build the section from the Manitoba border to Kapuskasing, Ontario. The chairman of the Crown Corporation would be Mr. David Golden, Deputy Minister of Defence Production, and there would be four other directors, two of whom would later be replaced by nominees of the Ontario Government.

It was announced on March 28 that negotiations had been concluded in New York for the supply by the South Durham Steel and Iron Co. Ltd. of 636 miles of 30-inch steel pipe for the construction of the central section of the pipeline from Winnipeg to North Bay, eastern Ontario. The value of the contract at present price levels exceeded $32,000,000, and deliveries were stipulated to be completed by July 1959.—(Montreal Star) **(Prev. rep. Industrial Development, 14574 A; 13053 A.)**

A. INTERNATIONAL SUGAR COUNCIL. — Special Session. - Revised Export Quotas.

A special session of the International Sugar Council, attended in London by representatives of 21 countries, announced on July 31 that 1956 export quotas under the international agreement would be raised by 444,000 metric tons to 4,440,000 tons. Restrictions on shipments of more than 80 per cent of initial export quotas before Aug 31 were also waived.

In addition, the U S S R, Czechoslovakia, Poland, Haiti, Hungary, Mexico, and the Netherlands renounced a total of 624,000 tons of sugar from their original or revised export quotas. Additional allowances were therefore made to Cuba, the Dominican Republic, Nationalist China, Belgium, France, and the Philippines, Cuba receiving the greater part of the reallocation (400,000 tons)

The Council's revised estimate of the free market requirements of sugar for 1956 was 5,050,000 metric tons—an increase of 530,000 tons over the original estimate adopted on Dec 1, 1955.—(Financial Times - Economist) **(Prev. rep. 14674 E.)**

B. INDONESIA. — Lifting of Embargo on Rubber Exports to Communist China.

The Indonesian Government announced on June 6 that it would no longer observe the ban on the shipment of rubber to the Chinese People's Republic. In a statement issued by the Foreign Ministry on June 19, it was pointed out (*a*) that the Indonesian decision had been taken because the U.N. General Assembly resolutions of Feb. 1 and May 18, 1951, had permitted U.N. member-countries to revise their attitude concerning the ban on the shipment of strategic materials to Communist China, (*b*) that since that time the position had changed because the war in Korea had come to an end; and (*c*) that Indonesia's rubber industry—like those in all rubber-producing countries—had encountered great difficulties in the past few years and had felt the effects of the embargo The statement referred to the British Government's decision of June 4 to allow Malaya and Singapore to resume limited shipments of rubber to Communist China.—(Indonesian Embassy, London) **(Prev. rep. 14960 D; 14924 D.)**

C. SAAR. — Christian People's Party merged with Federal Centre Party.

A party conference of the Christian People's Party, held at Saarbrucken on July 22, decided with only a few dissentient votes to merge with the Centre Party in the German Federal Republic, and to adopt the name of "Christian People's Party—Centre." Herr Johannes Hoffman, formerly Saar Premier and the chairman of the Christian People's Party, resigned from that post but was elected honorary chairman for life.—(Le Monde, Paris - Frankfurter Allgemeine Zeitung) **(Prev. rep. 14925 A.)**

D. SOUTHERN RHODESIA. — Gwelo By-election.

A by-election at Gwelo for the Southern Rhodesian Legislative Assembly, held on June 8, resulted in the return of the Dominion Party candidate, Mr. C. F. S. Clark, who polled 665 votes against 327 for Mr. R. G. Cumming, of the United Rhodesia Party. The by-election was caused by the election of Mr. R. Williamson (Dominion Party) to the Federal Parliament in the Sebakwe by-election.—(Federal Information Dept)) **(Prev. rep. Sebakwe By-election, 14832 B.)**

E. BUDDHISM. — The "Year of Buddha." - Completion of Sixth Great Buddhist Council.

The 2,500th anniversary of the passing of the Buddha after attaining *nirvana* was celebrated on May 24 in India (the land of the Buddha's birth, teaching, and death), in Burma, Ceylon, Siam, Cambodia, and other Buddhist countries, and by Buddhist communities throughout the world. The date corresponded with the Buddhist festival of *Wesak* (the full moon of May), the most important event in the Buddhist year as being the anniversary of the birth, enlightenment, and death of the Buddha.

The 2,500th anniversary celebrations—known as *Buddha Jayanti*—will last officially for 12 months in India and will be marked by an international exhibition of Buddhist art in New Delhi, special publications on the life and teachings of the Buddha, the screening of a film on Buddhism, and pilgrimages—in which Buddhists from all parts of the world will take part—to the holy places associated with the Buddha's life These will include Lumbini (now in Nepal), the birthplace of Prince Siddhartha Gautama, who was later to become the Buddha; the tree at Buddh Gaya (Bihar) beneath which the young prince, in the rags of a mendicant, attained enlightenment, the deer-park at Sarnath (near Benares), where he preached his first sermon after attaining Buddhahood, and the forest site at Kusinara (Uttar Pradesh) where the Buddha attained *nirvana* and ended his incarnation at the age of 80

The foundation-stone of a memorial to the Buddha was unveiled in New Delhi on May 23 by Mr Nehru in the presence of the Indian Cabinet and the Diplomatic Corps The Indian National Academy of Arts had previously invited architects and sculptors of all nationalities to submit designs for the memorial, and had offered a first prize of 15,000 rupees (£1,125) for the selected design, to be chosen by a committee of assessors, and second and third prizes of 5,000 rupees and 2,000 rupees respectively

The *Buddha Jayanti* celebrations in Burma were marked by the termination of the Sixth Great Buddhist Council, which had been in progress for two years at Yegu, near Rangoon. Only six such Councils have been held in the 2,500 years since the Buddha's death, their purpose being the preservation and codification of the Buddhist scriptures.

The first three Councils, at which the Buddha's teachings were recounted and codified for transmission by word of mouth, were held in India—the first in a cave at Rajagaha (the present Rajgir, in Bihar) *c* 483 B C, shortly after the Buddha's death, the second in 443 B C; and the third (convened by the great Indian ruler, King Asoka) in 247 B.C At the fourth Council, held in Ceylon *c* 27-13 B C, the Buddhist scriptures were committed to writing for the first time in the sacred Pali language. Nearly 1,900 years later, in 1871, the fifth Council was convened at Mandalay by King Mindon of Burma, its principal task being the inscription of the Buddhist scriptures (also in Pali) on some 730 slabs of marble The sixth Council, held at Yegu from 1954-56 (corresponding to the years 2498-2500 of the Buddhist era) had as its chief task the translation of the *Tripitakas*—the thesaurus of Buddhist teaching containing the philosophy of Buddhism, the discourses of the Buddha, and the rules of monastic discipline—into English, Burmese, and Hindi, a work entrusted to a group of Buddhist monks and Pali scholars. It was also proposed to publish an abridgement of the *Tripitakas*—at present comprising some 50 volumes, each of 400-500 pages—in two or three volumes.

The Sixth Buddhist Council was held in a large artificially-constructed cave on the model of that at Rajagaha, where the first Council was held Built in 14 months by the Burmese Government, under the supervision of engineering experts and with the advice of an acoustics engineer, it was able to accommodate 15,000 Buddhist monks and laymen from Burma, India, Siam, Cambodia, Laos, Nepal, Malaya, Vietnam, Pakistan, and other countries When completed, the Sacred Cave was 455 feet long and 370 feet wide, being supported by six great columns—symbolizing the six Buddhist Councils held since the Buddha's death. An International Buddhist Library was also built nearby to house the *Tripitaka* texts and books on Buddhism

The inaugural ceremony on May 17, 1954, (the full moon of May of the Buddhist year 2498) was attended by Dr. Ba U,, the President of Burma, U Nu (then Burmese Prime Minister), who delivered a Speech of Veneration, Mrs Vijayalakshmi Pandit (then President of the U N General Assembly), Mr Dudley Senanayake (formerly Prime Minister of Ceylon), Mr Malcolm Macdonald (then U K. Commissioner-General for South-East Asia), Dr. G P Malalasekera (president of the World Fellowship of Buddhists), and many representatives from Buddhist countries and communities throughout the world. The Sixth Council concluded its work on May 24, 1956, simultaneously with the opening of the *Buddha Jayanti* celebrations. Over 100,000 pilgrims visited Yegu during the last week, including Buddhist delegations from Ceylon, Cambodia, the People's Republic of China, Laos, Nepal, Japan, Siam, South Vietnam, and a number of other countries.

It is proposed in due course to open an International Buddhist University on the site where the Sixth Buddhist Council held its meeting.—(Burma Government Information Office, Rangoon - Ceylon Government Information Department, Colombo - The Statesman, Calcutta - Times of India, Bombay)

A. UNITED KINGDOM. — Mr. Macmillan's Appeal for Restraint in Wages, Prices, and Dividends. - Board of Trade Report on German Competition with British Exports. - Fall in Gold and Dollar Reserves.

Mr. Macmillan, the Chancellor of the Exchequer, issued a Press statement on Aug. 29 in which he renewed his appeal for restraint in wage, price, and dividend increases. At the same time he tried to remove misconceptions about the need for adequate profits in industry which, he said, were essential to ensure vital new investment. His statement was issued a few days before the opening of the Trades Union Congress at Brighton, and was worded as follows:

"... The Egyptian crisis is not the only threat to the future of Britain and her people. There is another danger—more familiar, less dramatic, harder to realize, but in the long run perhaps just as serious. It is the possibility that by our own lack of foresight and sectional divisions we may drive ourselves out of the front rank of industrial Powers and deprive ourselves of the means to prosperity and greatness. If we are inclined to forget this risk, the figures of the gold and dollar reserves for August will serve as a reminder. When they are published they will show quite a substantial fall... [and]... are yet one more reminder that we live and work very near the margin of safety.

"The Government has put the dangers plainly before the country. We have urged all sections in industry not to weaken our competitive power by driving up costs and prices by thoughtlessness or selfishness. These appeals have met with much encouraging response.

"Let me repeat some of the essential facts. Between 1953 and the first half of this year German earnings per hour in manufacturing industry have risen about 15 per cent, and so has output per man-hour; so that wage costs have been steady. American hourly earnings have gone up around 10 per cent, and so has output; wage costs have therefore been steady. British earnings have risen by 20 per cent, output by about 10 per cent, wage costs therefore have risen by about 10 per cent. Could any writing on the wall be plainer than that?

"The White Paper on Full Employment [see 14802 A] shows beyond doubt that the principal cause which has driven up our prices by over half since the war is very simple. As a community we have insisted on increasing our money incomes far more than we have been able to increase our output of goods. While there was little or no competition from Europe, we got away with it—at the cost of internal inflation and all that this means in injustice and hardship to many groups and individuals who cannot defend themselves. Now that we face fierce competition abroad, we can't get away with it. Another round of wage increases unaccompanied by corresponding increases in production is bound to cripple our prospects. This time, we shall all suffer.

"I have seen recent claims that you can put up labour costs without putting up prices by cutting profits. Three years ago at Blackpool Mr. Gaitskell said to the T.U.C.: 'You cannot avoid a fairly high level of profits generally if demand is buoyant and turnover high. These are precisely the conditions that are bound to be associated with full employment.' I agree with that. But I want to set out before you four hard, flat facts about profits—not politics, but plain arithmetic.

"First, profits are not dividends—and, in fact, only one-fifth of company income was distributed as dividends on ordinary and preference shares last year. There is no excuse at all for talking about profits and dividends as if they were the same thing. From the strict point of view of an economist adding up potential inflationary pressures, dividends—whatever their psychological importance—are not a vital factor. This is not a political judgment. It is an arithmetical one. Eight years ago Sir Stafford Cripps made exactly the same point when he spoke at the Trades Union Congress. 'We only have to look at the figures of distributed corporation profits,' he said, 'and compare them with the amount spent on wages and salaries, to know that there is no substantial relief to be obtained from that source. The figure of profits distributed by corporations is about one-tenth of the total of wages and about one-fifteenth of the total of wages and salaries combined. So that even if corporation profits were reduced by a quarter—a very drastic cut—it would mean an average addition to wages and salaries of no more than 4d. in the pound.' What Sir Stafford Cripps said is still true. In 1955, too, company dividends before personal income-tax came to one-fifteenth of wages and salaries. After deducting personal income-tax, the ratio was even smaller; making the best estimate one can, dividends came to something like one-twenty-fifth of wages and salaries. But if dividends, then, account for only one-fifth of company income, who gets the other 80 per cent?

"The second hard, flat fact about profits is this: a quarter of them are paid to the Exchequer in company taxes. This is quite apart from personal income-tax or surtax paid by shareholders on their dividends. In this present financial year, for every £1 of income tax and surtax I expect to get from individuals over the whole income-tax field, I shall get 12s. 6d. from companies. If I had no revenue from taxes on profits, and had to collect that extra money from personal income tax, the income-tax burden would go up 60 per cent; or else I would have to raise the money some other way, such as more than trebling all purchase tax.

"Thirdly, profits figures are always quoted 'gross'—gross company profits. You can, of course, enunciate this as if it was a rude, abusive word—gross profits made by gross profiteers. But it means, of course, that they are reckoned before anything is taken out of them to keep existing factories and plant repaired and up-to-date. Of course this has to be done, or the whole economy would fall to pieces. And it takes a sizeable slice out of company income—about 15 per cent last year. So taxes and capital consumption together make up 40 per cent of the total.

"The fourth flat fact is this. Undistributed profits are far and away the largest source of finance—or savings—to pay for new industrial investment. Everyone agrees that we must have more new investment, and that we must have more savings to finance it. But it does not make sense to agree that we need new investment, and to agree that we need more savings, and then to say that profits are an evil thing, which should all be distributed as wages and salaries. For in the past eight years, companies, after providing for their own capital consumption, have saved enough to finance half the net investment done in the whole country—enough to cover all the net investment in private industry, and, over and above that, make a substantial contribution to investment elsewhere in the economy. Half the real addition to our capital wealth since 1948 has been paid for by savings made by companies. Large investment and a rising standard of living demand large undistributed profits. This may surprise some people, but as Professor Arthur Lewis, who is an economist and a Socialist, remarked, after saying just what I have said to you: 'Since this is clearly the situation in which we find ourselves, we have to face it.'

"I will add a fifth fact. Between 1954 and 1955, wage and salary costs per unit of output rose 5 per cent, while profits per unit of output rose one per cent.

"I am not saying that restraint in dividends and profits does not matter. It does. Dividends, economically, are small, psychologically, they count. If restraint is needed, it must apply to everyone. If the production of goods and services has not increased, there is no more justification for higher profits than there is for higher wages. Those companies which have shown restraint in their dividend declarations have—and I say this emphatically—done the right thing by their country. Moreover, in present circumstances I would like to see profit-margins cut, and the many firms who have undertaken to hold their prices down must be aware that this probably does mean a cut in profit-margins. They, too, are doing the right thing. I would like many more firms to jump on to the plateau and undertake to keep their prices down. Further, our policies on restrictive trade practices are going to mean more competition, and competition is the great enemy of excessive profits.

"What I am trying to do is to show that there is no huge cache of profits which could have been used or can now be used to make a worthwhile addition to wages and salaries, without any ill effects on the economy. That idea dies hard, but it had better die soon—it is just one of the drugs that some people administer, and others swallow, to send themselves to sleep so that they needn't think about the real dangers that threaten them.

"That finishes what I wanted to say about profits, dividends and so forth. More recently another specious and evasive argument has been widely used... A few weeks ago I happened to read a leading article on this subject in an important national newspaper. Here it was contended that because the purchasing power of the pound had fallen to 16s. 5d. since 1951, wage claims must be expected. It is quite true that from 1951 to the first half of 1956 retail prices rose by about 24 per cent. But wage rates rose a good deal faster, by 34 per cent; and earnings by more still—I should think by about 40 per cent. No mention was made of these decisive figures. This kind of argument is dangerous as well as fallacious. For fallacies are always dangerous if they tell people what some of them want to hear. Pleasant untruths are much more seductive than unpleasant truths.

"In any case, the most important fact about prices is that at the present time they are not rising, nor do they appear likely to rise much in the next few months. My forecast of a 'price plateau' aroused a certain amount of scepticism when I made it some months ago, even though I was envisaging a possible rise of 2 to 3 points in view of various changes, including large wage increases, which had already taken place. Since I made that speech in Newcastle [see page 14977, second column] the index has gone down slightly. We have in fact a good prospect of reasonably steady prices. For the first time for some years we may find ourselves with a chance of staying on the plateau. Surely this is a precious opportunity, which it is plain commonsense to seize.

"If the international situation deteriorated and world prices rose, that might through no fault of ours push us off our plateau and create a new situation. But surely we need not push ourselves off it deliberately—of our own volition. I find it hard to believe that when it comes to the point we shall be so foolish. Of one thing I am quite certain... that if there are no better arguments than those we have heard for forcing up prices through wage increases without increased output, then public opinion, which is apt to prove a very powerful factor in these matters, will pronounce a grim judgment on those responsible.

"The Government's appeal for responsible price policies has already been answered by the nationalized industries and many private employers. I ask the trade unions to weigh very carefully the national consequences of any action they may now contemplate. They may have faults to find with the policies of management or of the Government. But they have the means to make their views known to both. Remembering their reputation for practical good sense, I am sure they will not do anything to undermine the economic strength on which their own future depends. Nor is this the time, with all our external dangers, to deal ourselves a self-inflicted wound.

"Of course there are other and important questions which arise. There is the problem of automation, on which the National Joint Advisory Council is already hard at work. There is the problem of industrial mobility. Redundancy in certain sectors of industry will arise even in conditions of full employment. For without movement and elasticity, there cannot be a healthy industrial organism . .

"There is of course some divergence of emphasis about the best methods of regulating our economy. As I have often said before, I think this is rather a battle of words. Certainly the regulatory controls which I am now operating are pretty severe, and are beginning to be effective. Anyway, I have no doctrinaire approach to this problem. To my mind it's just a question of practical commonsense.

"Finally, there are the suspicions which we have inherited from the past. How sad it is that so many people try to fan the embers of these dying fires! In our modern democratic society we ought to be able to forget these growing pains . An ability to learn from experience is one of the marks of maturity

"Broadly speaking, real standards can be increased only by greater capital investment, and greater skill all through industry, leading to higher production . "

German Competition with British Exports.

A report on the impact of West German competition on British exports, published in the *Board of Trade Journal* on July 28, showed that between 1953 and 1955 Western Germany's share of world trade in manufactures had increased from 13.3 to 15.6 per cent, while that of the U.K. had fallen from 21.3 to 19.8 per cent. (In 1950 Western Germany's share had been 7.3 per cent and that of the U.K. 25.5 per cent).

It was pointed out that the expansion of West German exports between 1953 and 1955 had been particularly marked in Austria, the Netherlands, Sweden, Australia, India, Soviet Russia, Venezuela, and Israel, the largest increases being in the following commodity groups · oils and fats (93 per cent, compared with 58 per cent for U.K. exports), food, drink and tobacco (50 per cent, against 15 per cent for the U K.), machinery and vehicles (47 per cent, against 15 per cent for the U.K.), and chemicals (43 per cent, against 31 per cent for the U K.) German textile exports had increased by 39 per cent, while those of the U K.—relatively much more important to the national economy—had declined by 5 per cent Moreover, while the value of Western Germany's motor-vehicle exports had doubled between 1953 and 1955, those of the U.K had risen by only about one-fifth.

Analysing the success of West German competition, the report drew attention to the following points · (*a*) Wages were probably lower in Western Germany than in the U K , (*b*) German workers were working about two hours a week longer than British workers in the autumn of 1955 ; (*c*) West German output had risen faster than wages over the past six years, the reverse having been true in the U.K., (*d*) gross fixed investment in industry in the period 1950-54 averaged 21 per cent of the gross national product of Western Germany and 14 per cent of that of the U.K.

The report concluded that to meet the challenge of German competition "British industry must pay special attention to improving its sales promotion abroad and must not neglect any opportunities of obtaining new export business. At the same time it must invest more in the modernization and expansion of industrial capacity."

Fall in Gold and Dollar Reserves.

The Treasury announced on Sept. 4 that the sterling area's gold and dollar reserves had fallen by $129,000,000 in August after taking into account (*a*) $4,000,000 received in U.S. defence aid, (*b*) $51,000,000 paid to the E.P.U. in respect of the July settlement, and (*c*) $3,000,000 paid to the creditors of E.P.U. in bilateral settlements. As a result of the fall in August—the first monthly decline during 1956—the sterling area's gold and dollar reserves stood at $2,276,000,000 on Aug. 31.

It was authoritatively stated in the Press that there were three main causes for the big loss of gold and dollars in August · (1) the above-mentioned payments to the E P.U , (2) the transfer of $14,400,000 to the new International Finance Corporation (see 15048 A) as Britain's share of its capital ; (3) official support given to sterling in the foreign exchange market during August, as a result of the Suez crisis.

Provisional figures for the E.P.U. August settlement showed that the U.K. had a deficit of £16,000,000, which would be settled in September as to three-quarters in gold and dollars and as to one-quarter by a credit from the Union.—(Treasury Press Office - Board of Trade Journal - Financial Times) **(Prev. rep. 15046 A ; 14977 A ; 15036 D.)**

A. NETHERLANDS. — Old Age Pensions Legislation.

The Old Age Pensions Bill, which had been introduced in the Netherlands Parliament on June 30, 1955, was approved by the Lower House of the States-General on March 23, 1956, and by the Upper House on March 30, 1956. Pensions will be paid from Jan. 1, 1957, and it is expected that about 712,000 men and women aged 65 and over will be eligible. Total annual expenditure on pensions will amount to 722,000,000 guilders £72,200,000).—(Netherlands News Agency) **(14419 B.)**

B. AUSTRALIA. — Balance of Payments, 1955-56. - Industrial Production Figures.

The Australian Federal Treasurer (Sir Arthur Fadden) stated in his Budget speech in the Federal House of Representatives on Aug. 30 that Australian exports in 1955-56 had amounted to £A.773,000,000 and imports to £A.819,000,000—an adverse trade balance of £A.46,000,000. After taking freight payments and other net invisible transactions into consideration, the current account deficiency was £A.221,000,000. Having gained a net amount of £A.148,000,000 from loans and capital transactions, as well as from various movements of funds on private account, the net result of all overseas transactions for the year was a fall in Australia's international reserves by £A.73,000,000 to £A.355,000,000 as at June 30, 1956. Although the latter figure was somewhat higher than seemed likely at one time, Sir Arthur declared that it still represented "an uncomfortably low level of reserves."

Figures of Australian industrial production in the 1955-56 financial year, released on Aug. 24, showed that iron and steel production had reached the record total of 6,257,000 tons, compared with 5,968,000 tons in the previous year, and that the motor industry had turned out the record number of 81,700 car-bodies (9,700 more than in 1954-55). The year also showed records in the production of motor tyres, gas and electricity, cement, superphosphate, paint, washing-machines, electric household machinery, cotton goods, and most woollen textiles.—(Australian News and Information Bureau)

(Prev. rep. Balance of Payments, 14470 A.)

C. AFGHANISTAN - PAKISTAN. — President Mirza's Visit to Kabul. - Discussions with Afghan Leaders.

The President of Pakistan, General Iskander Mirza, paid a State visit to Afghanistan from Aug. 7-12 at the invitation of King Zahir Shah. During his stay in Kabul he had discussions with the King, Prince Daud Khan (the Prime Minister), and other members of the Afghan Government.

A joint communiqué stated that advantage had been taken of President Mirza's visit to discuss "matters of common interest," and that the conversations had taken place in an atmosphere of "warmth and cordiality." It added : "H.M. the King of Afghanistan and the President of Pakistan recognize the need for close co-operation between the two countries, affirm their intention to promote better relations, and declare their united resolve to remove all differences between the two Moslem countries through friendly negotiations, and to establish a firm basis for permanent friendship" It was also announced that King Zahir Shah had accepted an invitation to visit Pakistan.

President Mirza's visit to Afghanistan was regarded in both countries as ending the period of strained relations caused by the "Pakhtoonistan" dispute during the past few years. (Pakistan High Commissioner's Office, London) **(Prev. rep. Afghan-Pak. Dispute, 14481 B ; 14291 A ; 14271 A.)**

D. BRITISH WEST INDIES. — Final Approval of Sale of Trinidad Oil Company to Texas Company.

The Treasury announced on Aug. 28 that "arrangements satisfactory to H.M. Government" had now been made on those aspects of the proposed purchase of the Trinidad Oil Company by the Texas Company which primarily concerned the United Kingdom, and that "all necessary consents by H.M. Government and by the Government of Trinidad and Tobago to the proposed purchase have been or will be given."

The Texas Company announced on Aug. 31 that acceptances of its offer of 80s. 3d. per 5s. stock unit had been received from holders of nearly 97 per cent of the Trinidad Company's Ordinary stock, and that it intended to exercise its powers under the Companies Act to acquire the remainder. The transaction was finally approved at an extraordinary general meeting of shareholders of the Trinidad Company held in London on Sept. 3. The sum of £50,000 was voted to Mr. Simon Vos, the company's chairman, as compensation for loss of office.—(Times - Financial Times) **(Prev. rep. 15031 B.)**

E. JAPAN. — Admission to U.N. Economic Commission for Latin America with Status of Observer.

The U.N. Economic and Social Council unanimously approved on July 20 a joint resolution sponsored by Argentina, Brazil, Ecuador, and the Dominican Republic—the four Latin American countries represented on the Council—admitting Japan to meetings of the U.N. Economic Commission for Latin America with the status of an observer. Japan had expressed the wish to take part in the activities of ECLA in view of her close connexions with Latin America in the spheres of trade and migration.—(Japanese Embassy, London) **(13538 C.)**

A. GOLD COAST. — General Election. - Victory for Convention People's Party. - Dr. Nkrumah's Independence Resolution. - Opposition Mission to London.

General elections were held in the Gold Coast on July 17, except in certain parts of the Northern Territories, where they took place on July 12. The chief parties contesting the elections were the ruling Convention People's Party (C.P.P.) led by Dr. Kwame Nkrumah, the Prime Minister; the National Liberation Movement (N.L.M.), the principal Opposition party led by Professor K. A. Busia; and the Northern People's Party (N.P.P.), which is allied to the N.L.M. Whereas the C.P.P. contested all the 104 seats on a country-wide basis, the Opposition parties conducted their campaigns largely on a regional basis—the N.L.M. candidates standing in Ashanti and the N.P.P. candidates in the Northern Territories.

The final results gave the C.P.P. an overall majority of 88 in the new Legislative Assembly, party strengths being as follows: C.P.P. 71 (including five unopposed returns), N.L.M. 12, N.P.P. 15, others six. Results by regions were as follows, with comparative figures for the last (1951) elections:

	C.P.P.		N.L.M.		N.P.P.		Others	
	1956	1951	1956	1951	1956	1951	1956	1951
Gold Coast Colony ..	44	41	—	—	—	—	—	3
Ashanti	8	19	12	1	—	—	1	1
Transvolta-Togoland	8	8	—	—	—	—	5	5
Northern Territories ..	11	11	—	—	15	14	—	1
Total	71	79	12	1	15	14	6	10

As shown above, the C.P.P. won every seat in Gold Coast Colony, gaining the three formerly held by Independents. In Ashanti, on the other hand, the C.P.P. lost 11 seats to the N.L.M., which emerged as the strongest party with 12 of the 21 Ashanti seats; the remaining seat went to the Moslem Association Party. Party strengths remained unchanged in Transvolta-Togoland, the five Opposition seats being divided between the Togoland Congress (two), Independents (two), and the Federation of Youth Organizations (one). The N.P.P. remained the strongest party in the Northern Territories, gaining one seat from the Moslem Association Party.

Voting was on the basis of universal suffrage, the registered electorate numbering about 1,400,000 out of a total population (including the trust territory of Togoland) of 4,500,000. Only some 50 per cent of the electors went to the polls, compared with 54 per cent in 1951. Voting was heaviest in Ashanti (58 per cent), followed by Togoland (51 per cent), the Northern Territories (49 per cent), and Gold Coast Colony (44 per cent). In aggregate, the C.P.P. polled about 398,000 votes and the Opposition parties 299,000.

The votes cast in the different regions (shown as percentages of the total electorate in each region) were divided as follows: Gold Coast Colony—C.P.P. 38 per cent, Opposition parties 6 per cent; Transvolta-Togoland—C.P.P. 28 per cent, Opposition 23 per cent, Ashanti—C.P.P. 25 per cent, Opposition 33 per cent; Northern Territories—C.P.P. 20.5 per cent, Opposition 28.5 per cent.

Dr. Nkrumah had a majority of 9,244 over his N.L.M. opponent (who lost his deposit), other Ministers re-elected including Mr. Botsio, Mr. Casely-Hayford, Mr. Ofori-Atta, and Mr. Gbedemah. The Minister of Agriculture, Mr. Jantuah, was defeated at Kumasi by an N.L.M. candidate, while the Minister of Trade and Labour (Mr. Asafu-Adjaye) did not seek re-election.

Dr. Busia was re-elected for the N.L.M., whose members in the new Assembly include Mr. Joseph Appiah, son-in-law of Lady Cripps and the late Sir Stafford Cripps. Dr. Danquah, one of the leading personalities in the N.L.M., failed to secure election, as was also the case in 1951.

The new Legislative Assembly convened on July 30, when Sir Emmanuel Quist was re-elected Speaker for the third time. A new Cabinet—recruited, like its predecessor, entirely from the C.C.P. and headed by Dr. Nkrumah—was sworn-in on July 23 by the Governor, Sir Charles Arden-Clarke, its membership being as follows:

Dr. Kwame Nkrumah, Prime Minister, Mr. K. Botsio, Trade and Labour, Mr. K. A. Gbedemah, Finance; Mr. A. Casely-Hayford, Communications; Mr. A. E. Inkumsah, Housing; Mr. A. E. Ofori-Atta, Local Government; Mr. J. H. Allassani, Health; Mr. Ako Adjei, Interior, Mr. J. B. Erzuah, Education; Mr. N. A. Welbeck, Works; Mr. B. Y. Afari, Agriculture; Mr. L. R. Abavana and Mr. K. Edusei, Ministers without portfolio.

A resolution calling for independence for the Gold Coast was moved by Dr. Nkrumah in the Legislative Assembly on Aug. 3, and adopted unanimously in the absence of the Opposition members. The latter had boycotted the debate on the ground that a Constitution should have been agreed upon before the Government introduced such a resolution.

Dr. Nkrumah called upon the British Colonial Secretary (Mr. Lennox-Boyd) to honour the pledge given in his recent statement on the Gold Coast (see 14890 A), and expressed the opinion that there was "nothing to prevent us now from fulfilling the final conditions set forth in the Colonial Secretary's statement, nor any reason why he should feel any reluctance to fulfil his pledge . I am determined to ensure that a firm date for independence is announced without delay. The Secretary of State cannot go back on his word, and I do not think he would wish to do so . . ."

An Opposition delegation representing Ashanti and the Northern Territories, headed by Professor Busia, left Accra for London on Aug. 12 for conversations with Mr. Lennox-Boyd on the question of a Federal Constitution for the Gold Coast. Before leaving Accra, Professor Busia issued a statement claiming that the election results in Ashanti and the Northern Territories had justified the case for a Federal Constitution, and stressing that the Opposition intended to press its case for such a Constitution before independence. The Asanteman Council also issued a statement on Aug. 16 upholding the case for a Federal Constitution, and declaring that the Ashanti people did not wish to lose their separate identity.

B. UNITED KINGDOM. — Viscount Hailsham appointed First Lord of Admiralty. - Resignation of Viscount Cilcennin.

It was announced on Sept. 2 from 10, Downing Street, that Viscount Hailsham (48) had been appointed First Lord of the Admiralty in succession to Viscount Cilcennin (52), who had tendered his resignation from the Government.

Letters exchanged between the Prime Minister and Viscount Cilcennin were published on the same day. In tendering his resignation from the Government, Lord Cilcennin wrote "You will remember that when the Government changes took place last December and you asked me to remain at the Admiralty, I told you that I should wish to be relieved of office this autumn. I have been First Lord for five years, with two previous years on the Board of Admiralty as Financial Secretary, and . . . I feel sure that this length of time is in itself sufficient reason for a change. I could have wished for a more settled time to hand over my post. I feel, however, that it is essential that my successor should be in office for a reasonable period before the autumn Parliament, and, as you know, I have been able in the past few weeks to satisfy myself about the Navy's plans and precautionary measures [i.e. in the Suez crisis]. I should be grateful, therefore, if you would submit my resignation to H.M. the Queen. I appreciate very much your offer of other Government work and I am grateful to you for understanding my reasons for refusing it . . ."

Sir Anthony Eden, in reply, accepted Lord Cilcennin's resignation with regret, and paid tribute to his "long and devoted service at the Admiralty," which had been "of great value during a difficult period of transition."

Viscount Cilcennin (formerly Mr. J. P. L. Thomas until December 1955, when a viscounty was conferred upon him—see 14601 A) had been Financial Secretary to the Admiralty in 1943-45 and First Lord since 1951, when Sir (then Mr.) Winston Churchill formed the Conservative Government after the general election of that year. He was Conservative M.P. for Hereford from 1931 until his elevation to the peerage, and vice-chairman of the Conservative Party from 1945 to 1951. As disclosed in his letter of resignation, he had declined the offer of another post in the Government.

Lord Hailsham, Q.C., was Conservative M.P. for Oxford City (as Mr. Quintin Hogg) from 1938 to 1950, when he succeeded to the peerage on the death of his father, the first Viscount Hailsham. Desirous of remaining in the House of Commons, where he was one of the most prominent and best-known Conservative back-benchers, he appealed to Mr. Attlee (then Prime Minister) to introduce legislation enabling him to remain a member of the Commons, but the request was refused (see 10974 D). Educated at Eton and Oxford, Lord Hailsham served with the Rifle Brigade in World War II, and was wounded in the Western Desert in 1941. He was Joint Parliamentary Under-Secretary for Air in the last weeks of the wartime Coalition Government, and held the same post in the short-lived "caretaker" Government before the general election of 1945.—(Times - Daily Telegraph) **(Prev. rep. 14601 A.)**

C. JAPAN - PHILIPPINES. — Philippine Ratification of Reparations Agreement and Peace Treaty. - Resumption of Diplomatic Relations.

Instruments of ratification of the reparations agreement between Japan and the Philippines, signed on May 9, were exchanged in Tokio on July 23, following approval of the agreement by the Upper House of the Japanese Diet and the Philippine House of Representatives. [The agreement had already been approved by the Japanese Lower House and the Philippine Senate.]

The Philippine House of Representatives also ratified on July 16 the San Francisco Peace Treaty with Japan, by 18 votes to three.

Under a Note exchange of July 23 both countries agreed to raise their respective diplomatic missions in Manila and Tokio to embassy status.—(Japanese Embassy, London) **(14988 C.)**

SEPTEMBER 8—15, 1956

A. UNITED STATES. — The Democratic Convention. - Mr. Adlai Stevenson nominated as Presidential Candidate. - Senator Kefauver nominated Vice-Presidential Candidate. - The Democratic Party's Programme.

The National Convention of the Democratic Party, meeting in Chicago from Aug. 13-17, adopted Mr. Adlai E. Stevenson, the former Governor of Illinois, as Democratic candidate for the Presidential election in November. Senator Estes Kefauver of Tennessee was adopted as Vice-Presidential candidate.

The Candidatures.

The Democratic National Convention was attended by 1,372 delegates from all the States and territories of the Union, the biggest delegations being those of New York (98), Pennsylvania (74), California (68), Illinois (64), Ohio (58), and Texas (56). As a result of the State primary elections, held in a number of States between March 13 and June 5, about 400 of the delegates were pledged to support Mr. Stevenson for the Presidential nomination, 200 were committed to support Senator Kefauver (who, however, had announced before the Convention opened that he did not wish to stand for the Presidential nomination—see below), 141 were committed to support Governor Harriman of New York, and about 300 delegates were pledged to support "favourite sons"—i.e. Governors, Senators, or Representatives whose candidature was sponsored by the delegations of the States in which they hold office, or which they represent in Congress. The remaining delegates (about 320) were uncommitted, notably the delegations from New Jersey (36), Virginia (32), Arkansas (26), Louisiana (24), and Mississippi (22), as well as 24 of the Pennsylvanian delegation.

Mr Stevenson's biggest successes in the State primaries were obtained in California (where he gained all 68 delegate votes), Illinois (63 of the 64 votes), Pennsylvania (50 of the 74 votes, the remaining 24 being uncommitted), Florida (22 of the 28 votes), West Virginia (18 of the 24 votes), and Oregon (all 16 votes)

Senator Kefauver obtained all 28 delegate votes in Wisconsin, 26 of the 30 delegate votes in Minnesota, and all delegate votes in Indiana (26), Maryland (18), and Montana (16) He was also assured of all the 32 votes of his home State, Tennessee.

Governor Harriman of New York obtained 91 of the 98 delegate votes for that State, and was also promised the support of the 28 Oklahoma votes In Kentucky, all 30 votes went to Governor Albert B. Chandler; in Massachusetts, all 40 votes to Representative John W. McCormack; in Michigan, all 44 votes to Governor G. Mennen Williams; in Missouri, all 38 votes to Senator Stuart Symington; in Ohio, 54 of the 58 delegate votes to Governor Frank J Lausche; in South Carolina, all 20 delegate votes to Governor George B Timmerman jr, in Texas, all 58 delegate votes to Senator Lyndon B Johnson, and in Washington State, 20 of the 26 delegate votes to Senator Warren G Magnuson

Senator Kefauver's Withdrawal from Presidential Nomination.

Senator Kefauver—who, as stated above, won important support in several of the State primaries, notably in Wisconsin and Minnesota—had announced on July 31 that he would not be a candidate for the Democratic presidential nomination and had urged his supporters to back Mr. Stevenson as the party's presidential nominee.

In taking this decision, Senator Kefauver expressed his belief that he could "make a great contribution toward unity and eventual victory for the party by withdrawing my name for consideration for the office of President at this time, and asking my supporters wholeheartedly to give their backing to Governor Adlai Stevenson" After pointing out that Mr Stevenson had secured almost 3,000,000 votes in the primaries, or over 600,000 more than he [Senator Kefauver] had obtained, Mr. Kefauver added. "Furthermore, since the primaries have concluded, reliable, nation-wide polls show that most Democratic and independent voters want him [Mr Stevenson] to be nominated He has the support of the majority of Democratic Party leaders . . . Governor Stevenson's delegate lead is such that he could be stopped only by throwing the Convention into a deadlock. I would not want to be a party to this . Victory in November is more important than the victor in August I am anxious that the resources of the party, of myself, and of Governor Stevenson should not be dissipated . . . I am anxious that we begin now to unite the party for a vigorous, resourceful, and imaginative campaign . . ."

Mr. Truman's Support for Governor Harriman.

In a press statement in Chicago on Aug. 11, on the eve of the Democratic Convention, Mr. Harry S. Truman (the ex-President) expressed his belief that Governor Harriman was "the man best qualified to be the next President of the United States."

After expressing his pleasure that "this Convention has many qualified men to choose from, each of whom would make a good President," Mr. Truman added: ". . . Against the mounting crises in the world this Convention must name a man who has the experience and ability to act as President immediately upon assuming that office, without risking a period of costly and dangerous trial and error. In the light of my knowledge of the office of President, I believe that the man best qualified to be the next President of the U.S.A. is Governor Harriman of New York. He will make a fighting and successful candidate because he is dedicated to the principles of our party—the New Deal and the Fair Deal. I know there are several other men who could wage successful campaigns with much credit to the party and the nation, and they are men for whom I have great admiration. But Governor Harriman has had long experience in top Government positions at home He has played a historic role in representing this country in Europe and Asia. He was a tower of strength all through the Roosevelt Administration and all the years of my own Administration. I know him and you can depend upon him. ."

Presidential Nomination for Mr. Stevenson.

Mr. Stevenson secured the Democratic presidential nomination on the first ballot (held on Aug. 16), receiving 905½ votes against 210 for Governor Harriman. [A numerical majority of the 1,372 delegates—i.e. a minimum of 686½ votes—was required to secure the nomination.] The votes were divided between the different candidates as follows:

Mr. Adlai E. Stevenson	905½
Governor Averell Harriman	210
Senator Lyndon B. Johnson	80
Senator Stuart Symington	45½
Governor Albert B. Chandler	36½
Representative James C. Davis	33
Governor John S. Battle	32½
Governor George B. Timmerman jr.	23½
Governor Frank J. Lausche	5½

The candidature of Mr. Stevenson was moved by Senator John F. Kennedy (Massachusetts), and seconded by Governor Hodges of North Carolina, Governor Leader of Pennsylvania, Senator Herbert H. Lehman (New York), Representative William L. Dawson (a Chicago Negro), and Representative Edith Green (Oregon). During the Convention, and prior to the balloting on Aug. 16, an important development in Mr. Stevenson's favour had been the decision of the New Jersey delegation to cast its 36 votes (previously uncommitted) on his behalf for the presidential nomination.

The 905½ votes cast for Mr. Stevenson included those of all the delegations from Arizona, Arkansas, California, Connecticut, Delaware, Idaho, Kansas, Louisana, Nebraska, New Jersey, North Dakota, Oregon, Rhode Island, South Dakota, Tennessee, Utah, West Virginia, and Wyoming, as well as those from the District of Columbia, Alaska, Hawaii, Puerto Rico, the Canal Zone, and the Virgin Islands. In addition, Mr. Stevenson was supported by the majority of the delegations from Colorado, Florida (25 out of 28), Illinois (53½ out of 64), Indiana, Iowa, Maine, Massachusetts (32 out of 40), Michigan (39 out of 44), Minnesota (19 out of 30), Montana, New Hampshire, New Mexico, North Carolina, Ohio (52 out of 58), Pennsylvania (67 out of 74), Vermont, and Washington State.

The candidature of Governor Harriman was moved by Governor Gary of Oklahoma and seconded by Mr. Harry S. Truman, the other seconders including Mr. David J. McDonald, president of the United Steelworkers of America. The 210 votes cast for Mr. Harriman included 92½ (out of 98) from New York, all 28 from Oklahoma, and 11 (out of 30) from Minnesota.

The remaining votes were divided between "favourite sons," viz: the 80 votes for Senator Lyndon Johnson included all those of his home State, Texas (56), and of Mississippi (22); the 45½ for Senator Symington included all 38 from his home State of Missouri, the 36½ for Governor Chandler of Kentucky included all 30 from that State; the 33 for Representative Davis of Georgia comprised all 32 from that State, and one from Alabama, the 32½ for Governor Battle of Virginia included all the Virginian delegation (22); the 23½ for Governor Timmerman of South Carolina included 18 of the 20 votes of that State, and the 5½ for Governor Lausche of Ohio came from that State's delegation—the great majority of whom voted for Mr. Stevenson, as stated above The candidatures of Senator Magnuson (Washington), Governor Mennen Williams (Michigan), and Representative John W. McCormack (Massachusetts) had been withdrawn before the ballot.

After the ballot, Mr. Sam Rayburn (Speaker of the House of Representatives and chairman of the Democratic Party) asked the Convention to choose Mr. Stevenson as presidential candidate "unanimously and by acclamation." A motion to this effect was moved by Governor Gary of Oklahoma (who had previously nominated Mr. Harriman as presidential candidate) and carried by acclamation as suggested by Mr. Rayburn. Assurances of full support for Mr. Stevenson in the Presidential election campaign were given by Mr. Harriman and by Democratic leaders who had supported Mr. Harriman's candidature, including Mr. Truman. [A biography of Mr. Adlai Stevenson is given on page 12373, second column.]

Mr. Stevenson, after thanking the Convention for nominating him as Presidential candidate, announced that he did not wish to indicate any preference in the choice of his Vice-Presidential "running mate." He would therefore depart from tradition and leave the Vice-Presidential nomination to the free and open choice of the Convention.

"Historically," said Mr. Stevenson, "the Presidential candidate has often designated the nominee for Vice-President. Sometimes the choice has been due to personal predilection or political expediency. But always there is the importance of mutual confidence if they are to work together with maximum effectiveness in the interest of the nation. I recognize these considerations, but I respect beyond measure a convention and a party which has conferred upon me its highest honour without asking of me a single commitment except faith in the programme and principles of our party. In these circumstances I have concluded to depart from the precedents of the past. I have decided that the selection of the Vice-Presidential nominee should be made through the free processes of this Convention—so that the party's candidate for this office may join me before the nation, not as one man's selection, but as one chosen by our party, even as I have been chosen . . . "

Vice-Presidential Nomination for Senator Kefauver.

After failing to secure the necessary minimum of votes (i.e. 686½) on the first ballot, Senator Kefauver succeeded in obtaining the Vice-Presidential nomination on the second ballot (held on Aug. 17), in which the figures were :

Senator Estes Kefauver	750
Senator John F. Kennedy	593
Senator Albert Gore	12
Mr. Robert F. Wagner	6
Senator Hubert H. Humphrey	5
Other candidates	6

On the first ballot Senator Kefauver received 483½ votes—203 fewer than the number required for nomination. Senator Kennedy of Massachusetts was runner-up with 304 votes, followed by Senator Gore of Tennessee (178), Mr. Wagner, the Mayor of New York City (162½), and Senator Humphrey of Minnesota (134½). The remaining votes were distributed among a number of other candidates.

Senator Kefauver's success on the second ballot was attributable to a number of "switches" by delegations after the inconclusive first ballot, and to the action of Senator Gore in withdrawing after the first ballot in his favour. [As shown above, Senator Gore received 12 votes from the floor on the second ballot, despite his withdrawal from the contest.] On the second ballot Senator Kefauver gained all 74 Pennsylvania votes (against 54 on the first ballot), all 32 Tennessee votes (cast for Senator Gore on the first ballot), and the 36 Missouri votes (which went to Senator Humphrey on the first ballot), in addition to gaining a number of votes from Ohio, Michigan, and other numerically important delegations.

Senator Kennedy obtained his principal support from New York (96½ votes on the second ballot, whereas on the first ballot all 98 N.Y. delegates had voted for Mayor Wagner), Texas (all 56 votes), Illinois (54½ votes), and his home State of Massachusetts (40 votes). He was strongly supported in all the Southern States except Florida, whose delegation nearly all voted for Senator Kefauver.

Senator Estes Kefauver (53) was born at Madisonville (Tennessee), graduated at the University of Tennessee (A.B.) and Yale University (LL.B.), and practised law at Chattanooga before his election to the House of Representatives in 1939. He entered the Senate in 1948, and two years later presided over the special Senate Sub-committee which investigated crime in the United States (see 11761 A). He was a candidate for the Democratic presidential nomination in 1952, losing to Mr. Adlai Stevenson on the third ballot after leading on the first two (see 12373 A).

The Party Programme.

After prolonged discussion and debate, the Democratic National Convention approved a programme on which the Presidential and Congressional elections would be fought and which the party, if returned to power, pledged itself to carry out in the next Congress. It is summarized below under cross-headings.

General Domestic Policy. After describing the Republican Administration as being in the "hands of political amateurs dominated by representatives of special privilege," and saying that "the party of Lincoln has been made captive to big-businessmen of small mind," the policy statement repudiated the Republican contention that the American people were "now more prosperous than ever before in peace-time." It declared in this connexion :

"For the American farmer, the small business man, the low-income worker, the old people living on a pittance, the young people seeking an American standard of education, and the minority groups seeking full employment opportunity at adequate wages, this Republican prosperity product has been an illusion. The evil is slowly but surely infiltrating the entire economic system. Its fever signs are evidenced by soaring monopoly profits while wages lag, farm income collapses, and small business failures multiply at an alarming rate . The disastrously reactionary farm programme, the hard-hearted resistance to adequate expansion of Social Security and other programmes for human well-being, and favouritism in the award of Government contracts, all have watered the economic tree at the top and neglected its roots . . . Federal budgetary outlays for education and health, old-age assistance and child-care, slum clearance and resources development, and all the other great needs of our people have been mercilessly slashed from an annual rate of more than $57 *per capita* under the Democrats to $33 *per capita* under the Republicans, a cut of 42 per cent . . . "

In carrying out the "Democratic principles for full prosperity for all," the party pledged itself :

(1) "To repudiate the Republican stunting of our economic growth and to reassert the principles of the Full Employment Act."

(2) "To achieve a truly balanced Federal budget in a just and fully prosperous American economy."

(3) "To equitable tax revisions and money policies designed to combine economic progress with economic justice We condemn the Republican use of our revenue and money systems to benefit the few at the expense of the people."

(4) "To work towards the reduction and elimination of poverty in America."

(5) "To full parity of income and living standards for agriculture; to strike off the shackles which the Taft-Hartley Law has unjustly imposed on labour, and to foster the more rapid growth of legitimate business enterprise by founding this growth upon the expanding consuming power of the people"

(6) "To expand world trade and enlarge international economic co-operation."

"By adhering to these principles [the statement continued] we shall strive to attain by 1960 the following full-prosperity objectives for all American families.

(1) A $500,000,000,000 national economy in real terms.

(2) An increase of 20 per cent or better in the average standard of living.

(3) An increase of annual income for American families, with special emphasis on those with incomes below $2,000.

(4) A determined drive toward parity of incomes and living standards for agriculture.

(5) The addition of all necessary classrooms for our primary and secondary schools, the construction of needed new homes, with a proper proportion devoted to the rehousing of low- and middle-income families in urban and rural areas; the increase of benefits under the Old Age Assistance and Old Age Survivors' Insurance programmes; a substantial expansion in hospital facilities and medical research; and a doubling of our programmes for resource development and conservation

(6) National defence outlays based upon our national needs, not permitting false economy to jeopardize our survival."

Social Security. The party pledged itself to "expand and improve the great social welfare programmes inaugurated under Democratic administration . . by broadening and strengthening these programmes by increased benefits to keep pace with improved standards of living; by raising the wage-base upon which benefits depend; and by increasing benefits for each year of covered employment"

Specific pledges were given for (1) "a stronger unemployment insurance system with broader coverage and increased benefits consistent with rising earnings"; (2) the extension to other workers of the insurance programme [enacted by the Democratic Congress in 1946] whereby railway workers were protected against temporary wage losses due to short-term illness; (3) "greater assistance for the aged, the blind, dependent children, the disabled, and other needy persons who are not adequately protected by our contributory insurance programmes."

Health and Medical Care. "... The shortage of trained medical and health personnel and facilities has impaired health standards and increased the cost of hospital care beyond the financial capacities of most American families. We pledge ourselves to initiate programmes of Federal financial aid, without Federal controls, for medical education We pledge continuing and increasing support for hospital construction programmes, as well as increased Federal aid to public health services, particularly in rural areas . ."

Housing. "... We reaffirm the goal, expressed by a Democratic Congress in 1949, that every American family is entitled to have 'a decent home and a suitable living environment.' The Republican Administration has sabotaged that goal by reducing the public housing programme to a fraction of the nation's need. We pledge that the housing-insurance and mortgage-guarantee programmes will be redirected in the interest of the home owner, and that the availability of low-interest housing credit will be kept consistent with the expanding housing needs of the nation. We favour providing aid to urban and suburban communities in better planning their future development and re-development"

Education. "Every American child, irrespective of race, national origin, economic status, or place of residence, has the full right under the law and the Constitution, without discrimination, to every educational opportunity to develop his potentialities. We are now faced with shortages of educational facilities that threaten national security, economic prosperity, and human well-being. The resources of our States and localities are strained to the limit Federal aid should be provided within the traditional framework of State and local control We pledge the Democratic Party to the following :

(1) Legislation to assist States and local communities to build schools, and to provide essential health and safety services for all schoolchildren.

(2) Better educational, health, and welfare opportunities for children of migratory workers.

(3) Assistance to programmes for training teachers of exceptional [i.e. physically or mentally handicapped] children.

(4) Programmes for the training of teachers to meet the critical shortage in technical and scientific fields.

(5) Expansion of student, teacher, and cultural exchanges with other nations."

Agriculture. After declaring that " the Eisenhower Administration has failed utterly to meet the desperate needs of farmers in the face of fantastic promises to do so, and has sabotaged the progressive programmes inherited from prior Democratic Administrations," the statement denounced " President Eisenhower's veto of the constructive legislation passed by the Democratic 84th Congress to reverse the alarming fall of farm prices and restore farmers to a position of first-class economic citizenship in the sharing of benefits from American productive ability " It continued :

" Farmers have had to struggle for 3½ years while their net farm income has fallen more than $1,000,000,000 a year Their parity ratio, which under Democratic Administrations had been 100 per cent or more during the 11 years prior to 1953, dropped to as low as 80 per cent during the Eisenhower Administration, and the farmers' share of the consumers' food dollar shrank from 47 cents in 1952 to as low as only 38 cents One stark fact stands clearly for all to see—disastrously low farm prices and record high consumer prices vie with each other for the attention of responsible Government. In reducing this incongruous spread lies the answer to some of the most vexing problems of agricultural economics. In their courageous fight to save their homes and land, American farmers have gone deeper and deeper into debt. Last year farmers' mortgage indebtedness increased more than in any year in history with the exception of 1923 . . . "

In order " to regain the ground lost during the Eisenhower Administration, and better to serve both consumers and producers," the Democratic Party pledged " continuous and vigorous support to the following policies " .

(1) A " positive and comprehensive programme to conserve our soil, water, and forest resources for future generations."

(2) Programmes to " protect and preserve the family-type farm as a bulwark of American life and encourage farm-home ownership, including additional assistance to family farmers and young farmers in the form of specially designed credit and price support programmes, technical aid, and enlarged soil conservation allowances."

(3) Maintenance of " adequate reserves of agricultural commodities, strategically located for national security purposes."

(4) Promotion of international exchange of commodities " by creating an International Food Reserve, fostering commodity agreements, and vigorously administering the International Trade and Development Act."

(5) " Repeal of the Eisenhower flexible, collapsible price-supports", restoration of supports on basic commodities at 90 per cent of parity, as provided in the Bill vetoed by President Eisenhower, and the regaining of " the full 100 per cent of parity which farmers received under Democratic Administrations " This would be achieved " by means of commodity loans, direct purchases, direct payments to producers, marketing agreements, production adjustments, or a combination of these and other appropriate measures "

(6) " Practical measures for extending price-supports to feed grains and other non-basic storables and to the producers of perishable commodities such as meat, poultry, dairy products, etc."

(7) " A food-stamp or other supplemental food programme administered by appropriate State or local agencies to ensure that no needy family shall be denied an adequate and wholesome diet because of low income "

(8) " A continuing expanded school lunch and special milk programme to meet the dietary needs of all schoolchildren "

(9) " Effective means to reduce the spread between producers' prices and consumers' costs, and improved market facilities and marketing practices."

(10) Expansion of the agricultural research programme to ensure " better distribution, preservation, and marketing of farm products to serve both producers and consumers, and promote increased industrial use of farm surpluses."

(11) " An increased reservoir of farm credit at lower rates, designed particularly to accommodate small family-type farmers and extend crop insurance to maximum coverage and protection."

(12) Return of the administration of the farm programme " to farmer-elected committeemen", and the elimination of " the deplorable political abuses in Federal employment in many agricultural counties as practised by the Eisenhower Administration."

(13) Encouragement of " *bona fide* farm co-operatives which help farmers to reduce the cost-price squeeze, and protection of such co-operatives against punitive taxation."

(14) Enactment of " a comprehensive farm programme which . . . will make the rural homes of America better and healthier places in which to live "

Labour Relations. " . . . We believe that, to the widest possible extent consistent with the public interest, management and labour should determine wage-rates and conditions of employment through free collective bargaining. The Taft-Hartley Act passed by the Republican-dominated 80th Congress seriously impaired this relationship as established in the National Labour Relations Act, enacted under the Roosevelt Administration . . . The vicious anti-union character of Taft-Hartley was expressly recognized by Candidate Eisenhower during the 1952 election campaign. At that time he made a solemn promise to eliminate its unjust provisions and re-enact a fair law. President Eisenhower and his Administration have failed utterly, however, to . . . keep this pledge to the American workers. He was further responsible for administratively amending Taft-Hartley into a more intensely anti-labour weapon by stacking the N.L.R.B. with biased pro-management personnel who transformed the Act into a management weapon by administrative decision. Among such decisions was the removal of millions of workers from the jurisdiction of the N L R.B., which in many cases left them without either State or Federal protective legislation.

" We unequivocally advocate the repeal of the Taft-Hartley Act. It must be repealed because . . . it has been proven to be inadequate, unworkable, and unfair. It interferes in an arbitrary manner with collective bargaining, causing imbalance in the relationship between management and labour.

" Upon return of our national Government to the Democratic Party, a new legislative approach toward the entire labour-management problem will be adopted, based on past experience and the principles of the National Labour Relations Act . . . "

The following specific pledges were given : (1) in view of increases in the cost of living, the minimum wage would be raised to " at least $1.25 an hour, more closely to approximate present needs " ; (2) " as a matter of priority," the protection of the Fair Labour Standards Act would be extended to " all workers engaged in, or affecting, inter-State commerce " In addition, the statement called for legislation to provide " equal pay for equal work, regardless of sex " , to improve the employment opportunities of physically handicapped workers ; to provide for " the protection and improvement of the general welfare of migratory workers " , and for " an effective programme to promote industry and create jobs in depressed industrial and rural areas."

Natural Resources. After accusing the Republican Administration of having " despoiled future generations of their heritage by utter failure to safeguard natural resources," and of " pillaging our dwindling natural resource wealth through political manipulation and administrative subversion," the Democratic Party pledged itself *inter alia* (1) to " preserve and improve our land for the present and future needs of our people," and to ensure that it was " not wastefully exploited to benefit special-interest groups " ; (2) to stimulate and intensify the Soil Conservation Programme " conceived and fostered by the Democratic Party " ; (3) to safeguard the nation's National Parks, scenic beauties, wild-life preserves, etc. ; (4) to set in hand " Federally-financed afforestation, erosion-control, and flood-control programmes . . to protect our watersheds and double the rate of forage and commercial timber growth " ; (5) to promote " rapid and orderly multiple-purpose river basin development throughout the nation " ; (6) to carry out " aggressive programmes to provide abundant supplies of low-cost energy, including the development of synthetic fuel from coal, shale, and agricultural products . to feed our insatiable industrial economy . . . "

Atomic Energy. The Republican Administration was accused of " plunging the previously independent and non-partisan Atomic Energy Commission into partisan policies," with the result that the U S.A was " lagging instead of leading in the world race for nuclear power, international prestige, and world markets." After declaring that " as the U.S A. was the first in the development of the atom as a weapon, so it must lead in bringing the blessings of the peaceful uses of nuclear energy to mankind," the Democratic Party pledged itself

" (1) To restore non-partisan administration of the atomic energy programme and to expand and accelerate nuclear development by vigorous action

(2) To accelerate the domestic civilian atomic power programme by the construction of a variety of demonstration prototype reactors.

(3) To give reality to the ' atoms for peace ' programme, substituting ' deeds for words.'

(4) To increase the production of fissionable material for use in a stockpile for peacetime commitments at home and abroad.

(5) To conduct a comprehensive survey of radiation hazards from bomb-tests and reactor operations to determine what additional measures are required to protect existing and future generations from these invisible dangers.

(6) To make the maximum contribution to the defence of our nation and the free world through the development of a balanced and flexible stockpile of nuclear weapons, containing a sufficient number and variety to support our armed services in any contingency."

Free Enterprise. - Assistance to Small Business. This section of the policy statement read :

" Equal rights for all and special privileges for none, the tested Jeffersonian principle, remains today the only philosophy by which human rights can be preserved by Government. It has been a sad fact in the history of the Republican Party that under its control our Government has always become an instrument of special privilege . . . We have had under Harding, Coolidge, and Hoover, and now under Eisenhower, government of the many by the few, and for the few.

" We recognize monopolies and monopolistic practices as the real barriers between the people and their economic and political freedom Monopolies stifle equality of opportunity and prevent the infusion of fresh blood into the life-stream of our economy. The Republican Administration has allowed giant corporate entities to dominate our economy We pledge ourselves to the restoration of truly competitive conditions in American industry. Affirmative action . . . will be taken to curb corporate mergers contributing to the growth of economic concentration."

The Democratic Party pledged itself to assist " small and independent business " in the following ways :

" (1) The strict and impartial enforcement of the laws originally fostered by the Democratic Party and designed to prevent monopolies and other concentrations of economic and financial powers ; and legislation to close loopholes in the laws prohibiting price discrimination.

(2) Tax relief for all small and independent businesses by fair and equitable adjustments in Federal taxation which will encourage business expansion . . .

(3) The adoption of all practical means to make long- and short-term credit available to small and independent business men at reasonable rates

(4) The award of a substantially higher proportion of Government contracts to independent small businesses , and the award of a far larger percentage of military procurement by value, after competitive bids, rather than by negotiation behind closed doors.

(5) The replacement of the weak and ineffective Republican conduct of the Small Business Administration, and its reconstitution as a vigorous, independent agency which will advocate the cause of small and independent businessmen and render genuine assistance in fulfilling their needs and solving their problems . . .

Taxation. " . . . The immediate need is to correct the inequities in the tax structure which reflect the Republican determination to favour the few at the expense of the many. We favour realistic tax adjustments, giving first consideration to small independent business and the small individual taxpayer. Lower-income families need tax relief , only a Democratic victory will assure this. We favour an increase in the present personal tax exemption of $600 to a minimum of at least $800.

The Republican debt management policy of higher interest-rate serves only to benefit a few to the detriment of the general taxpayer, the small borrower, and the small and middle class investor in Government bonds. We pledge ourselves to a vigilant review of our debt management policy in order to reduce interest-rates . .

Government Operations. After asserting that the Republican Administration had " failed either to understand or trust the Federal employee," and that " its record in personnel management constitutes a grave indictment of policies reflecting prejudices and excessive partisanship to the detriment of morale," the statement continued ·

" Intelligent and sympathetic programmes must be immediately undertaken to ensure the re-establishment of the high morale and efficiency which were characteristic of the Federal worker during 20 years of Democratic administration. To accomplish these objectives we propose .

(1) Protection and extension of the merit system through the enactment of laws to specify the rights and responsibilities of workers

(2) A more independent Civil Service Commission in order that it may provide the intelligent leadership essential in perfecting a proper Civil Service system.

(3) Promotion . . . under laws assuring advancement on merit and proven ability.

(4) Salary increases of a nature that will ensure a truly competitive scale at all levels of employment.

(5) Recognition by law of the right of employee organizations to represent their members and to participate in the formulation and improvement of personnel policies and practices.

(6) A fair and new political loyalty programme which will protect the nation against subversion and the employee against unjust and un-American treatment."

The statement continued . " During recent years there has developed a practice on the part of Federal agencies to delay and withhold information which is needed by Congress and the general public to make important decisions affecting their lives and destiny We believe that this trend toward secrecy in Government should be reversed, and that the Federal Government should return to its basic tradition of promoting the freest flow of information possible in those unclassified areas where secrets involving weapons development and *bona fide* national security are not involved We condemn the Eisenhower Administration for the excesses practiced in this vital area and pledge the Democratic Party to reverse this tendency, substituting a rule of law for that of broad claims of Executive privilege . . .

" The shocking disclosures in the last Congress of attempts by selfish interests to improperly influence members of Congress have resulted in a Congressional investigation now under way. The Democratic Party pledges itself to provide effective regulation and full disclosure of campaign expenditures and contributions in elections to Federal offices."

Foreign Policy and National Defence. This section (the longest in the policy statement) declared

" The Democratic Party affirms that world peace is a primary objective of human society. It is more than a suspension of shooting while fearful nations stockpile armaments of annihilation . The hopes and aspirations of the peoples of all nations for justice and peace depend largely upon the courageous and enlightened administration of the foreign and defence policies of the United States. We deplore the fact that the administration of both policies since 1953 has confused timidity with courage and blindness with enlightenment . . .

" Since 1953, responsibility for foreign affairs has been President Eisenhower's—his alone, and his in full. In the past three years the conduct of his policies has moved us into the realms where we risk grave danger . . . His handling of the day-by-day problems of international affairs has unnecessarily and dangerously subjected the American people to the risk of atomic world war. We need bold leadership, yet in the three years since Stalin's death, in the full year since President Eisenhower's meetings at the ' summit ' [i.e. the Geneva Conference of Heads of Governments], the Republican Administration has not offered a single concrete new idea to meet the new-style political and economic offensive of the Soviets, which represents potentially an even graver challenge than Stalin's use of force.

"President Eisenhower and his Secretary of State talk at cross-purposes—praising neutrality one day, condemning it the next. The Republicans seem unable to make up their minds or to give us leadership, while the unity of the free world rapidly disintegrates. We need to make our peaceful purpose clear beyond dispute in every corner of the world—yet Dulles brags of ' brinks of war.' We need a foreign policy which rises above jockeying for partisan position or advantage —yet not in memory has there been so little bipartisanship in the administration of our policies . . Four years ago the Republican Party boasted of a foreign policy that was to free the Communist satellites, unleash Chiang Kai-shek, repudiate the wartime agreements, and reverse the policy of containing Communist expansion Since 1953 they have done just the opposite—chaining Chiang, standing silent when peoples rise in East Germany and Poland, fraternizing with the Communists, and weakening the positive democratic policy of halting Communist expansion Our friends abroad now doubt our sincerity . . . "

" In Asia, anti-Americanism grows apace, in Burma, Ceylon, Indonesia, India—aggravated by the clumsy actions of our Government, fanned by the inept statements of our ' statesmen.'

"In the Middle East, the Eisenhower Administration has dawdled and drifted The results have been disastrous and still worse threatens Only the good offices of the U N in maintaining peace between Israel and her neighbours conceals the diplomatic incapacities of the Republican Administration. The current crisis over Suez is a consequence of inept and vacillating Republican policy Our Government's mistakes have placed us in a position in the Middle East which threatens the free world with a loss of power and prestige, potentially more dangerous than any we have suffered in the past decade . . . "

The foreign and defence policies of the Democratic Party were set out as follows .

(1) " The United Nations is indispensable for the maintenance of world peace and the settlement of controversies between nations large and small. We pledge our every effort to strengthen its usefulness and expand its role as guide and guardian of international peace and security . . . "

(2) " We pledge determined opposition to the admission of the Communist Chinese into the United Nations. They have proved their complete hostility to the purposes of this Organization We pledge continued support to Nationalist China We urge a continuing effort to effect the release of all Americans detained by Communist China "

(3) " In this atomic age, war threatens the very survival of civilization. To eliminate the danger of atomic war, a universal, effective, and enforced disarmament system must be the goal of responsible men and women everywhere So long as we lack enforceable international control of weapons, we must maintain armed strength to deter war. But technological advances in the field of nuclear weapons make disarmament an urgent problem. Time and distance can never again protect any nation of the world. The Eisenhower Administration, despite its highly publicized proposals for aerial inspection, has made no progress toward this great objective. We pledge the Democratic Party to pursue vigorously this great goal of enforced disarmament in full awareness that irreparable injury, even total destruction, now threatens the human race."

(4) " We stand for strong defence forces so clearly superior in modern weapons to those of any possible enemy that our armed strength will make an attack upon the free world unthinkable, and thus be a major force for world peace."

(5) " We inaugurated and strongly favour collective defence arrangements such as NATO and the Organization of American States, within the framework of the United Nations."

(6) " We believe that in the cause of peace, America must support the efforts of under-developed countries to organize their resources and increase their economic productivity so that they may enjoy the higher living standards which science and modern industry make possible We will give renewed strength to programmes of economic and technical assistance. We support a multilateral approach to these programmes, wherever possible, so that burdens are shared and resources pooled among all the economically developed countries with the capital and skills to help in this great task . . "

(7) " We condemn the Republican Administration for its heartless record of broken promises to the unfortunate victims of Communism. Eisenhower's 1952 pledges to ' liberate ' the captive peoples have been disavowed and dishonoured We declare our deepest concern for the plight of the freedom-loving peoples of Central and Eastern Europe and of Asia, now under the yoke of Soviet dictatorship. The United States, under Democratic leaders, has never recognized the forcible annexation of Lithuania, Latvia, and Estonia, or condoned the extension of the Kremlin's tyranny over Poland, Bulgaria, Rumania, Czechoslovakia, Hungary, Albania, and other countries.

We look forward to the day when the liberties of all captive nations will be restored to them and they can again take their rightful place in the community of nations. We shall press before the U N the principle that Soviet Russia withdraw its troops from the captive countries so as to permit fair, free, and unfettered elections in the subjugated areas, in compliance with the Atlantic Charter and other binding commitments "

(8) " Through the Marshall Plan, the European Economic Organization [OEEC], and NATO, the Democratic Party encouraged and supported efforts to achieve greater economic and political unity among the free nations of Europe, and to increase the solidarity of the nations of the North Atlantic Community We will continue those efforts, taking into account the viewpoints and aspirations of different sectors of the European community, particularly in regard to practical proposals for the unification of Germany "

(9) " The Democratic Party stands for the maintenance of peace in the Middle East . We will urge Israel and the Arab States to settle their differences by peaceful means, to maintain the sanctity of the Holy Places, and permit free access to them We will assist Israel to build a sound and viable economy for her people, so that she may fulfil her humanitarian mission of providing shelter and sanctuary for her homeless Jewish refugees while strengthening her national development We will assist the Arab States to develop their economic resources and raise the living standards of their people The plight of the Arab refugees commands our continuing sympathy and concern. We will assist in carrying out large-scale projects for their resettlement in countries where there is room and opportunity for them.

" We support the principle of free access to the Suez Canal under suitable international auspices . . We will faithfully carry out our country's pledge under the Tripartite Declaration of 1950 [on Palestine] to oppose the use of threat or force and to take such action as may be necessary in the interest of peace, both inside and outside the U N , to prevent any violation of the armistice lines The Democratic Party will act to redress the dangerous imbalance of arms in the area, created by the shipment of Communist arms to Egypt, by selling or supplying defensive weapons to Israel, and will take such steps, including security guarantees, as may be required to deter aggression and war in the area

" We oppose, as contrary to American principles, the practice of any Government which discriminates against American citizens on grounds of race or religion We will not countenance any arrangement or treaty with any Government which would sanction such practices " [This paragraph was an apparent reference to the fact that no American citizens of Jewish origin are permitted to enter Saudi Arabia as members of U.S. economic, technical, or other missions in that country.]

(10) " The peoples of Asia seek a new and freer life and are in a commendable hurry to get it They struggle against poverty, ill-health, and illiteracy In the aftermath of war, China became a victim of Communist tyranny. But many new free nations have arisen in South and S E. Asia South Korea remains free, and the new Japan has abandoned her former imperial and aggressive ways America's task and interest in Asia is to help the free governments demonstrate that their people can have improved living standards without yielding to Communist tyranny or domination by anyone That task will be carried out under Democratic leadership "

(11) " In the Western Hemisphere the Democratic Party will restore the 'good neighbour' policy which has been alternately neglected and abused by the Republican Administration. We pledge ourselves to fortify the defences of the Americas We will intensify our co-operation with our neighbouring Republics to help them strengthen their economies, improve educational opportunities, and combat disease . . . "

Civil Rights. This section of the policy statement was worded as follows · " The Democratic Party is committed to support and advance the individual rights and liberties of all Americans Our country is founded on the proposition that all men are created equal This means that all citizens are equal before the law and should enjoy all political rights They should have equal opportunities for education, economic advancement, and decent living conditions

" We will continue our efforts to eradicate discrimination based on race, religion, or national origin. We know this task requires action, not just in one section of the nation, but in all sections. It requires the co-operative efforts of individual citizens, and action by State and local governments It also requires Federal action. The Federal Government must live up to the ideals of the Declaration of Independence and must exercise the powers vested in it by the Constitution . . .

" The Democratic Party pledges itself to continue its efforts to eliminate illegal discrimination of all kinds in relation to (1) full rights to vote, (2) full rights to engage in gainful occupations, (3) full rights to enjoy security of the person, and (4) full rights to education in all publicly-supported institutions.

" Recent decisions of the Supreme Court relating to segregation in publicly-supported schools and elsewhere have brought consequences of vast importance to our nation as a whole, and especially to communities directly affected. We reject all proposals for the use of force to interfere with the orderly determination of these matters by the courts . . . "

The American Indians. A Federal programme was pledged "to assist Indian tribes in the full development of their human and natural resources, preserving their traditions without impairing their cultural heritage."

Overseas Territories. " The Democratic Party favours increased self-government for Guam and other outlying territories and the Trust Territory of the Pacific "

District of Columbia. The party also favoured " immediate home rule and ultimate national representation for the District of Columbia "

The most controversial issue at the Convention was that section of the policy statement dealing with Civil Rights, on which there were differences of opinion between supporters and opponents of the Supreme Court's ruling against racial segregation (see 14244 A ; 13593 A). Whereas the Northern delegates and a number of leading Democrats—including both Mr. Stevenson and Mr. Harriman—felt that the policy statement should explicitly approve the Supreme Court's ruling on desegregation, the Southern delegates urged the omission of any direct reference to it. Many of the Northern delegates, moreover, asked for a more outspoken condemnation of racial segregation than in the text under discussion. After protracted debate, agreement was reached on the text given above.

Mr. Stevenson's Speech.

The Convention ended on Aug. 17 with speeches by Mr. Adlai Stevenson, Senator Kefauver, and Mr. Truman. Mr. Stevenson's address is summarized below.

In accepting the Democratic presidential nomination, Mr. Stevenson saluted " the distinguished American who has been more than equal to the hard test of disagreement and who has now reaffirmed our common cause so graciously—Harry S Truman." He also welcomed the choice of Senator Kefauver—" a great Democrat and a great campaigner "—as his running-mate, saying in this connexion " If we are elected and it is God's will that I do not serve my full four years, the people will have a new President whom they can trust. He has dignity and convictions, and he will command the respect of the American people and the world."

Mr Stevenson continued : " . The [party] programme is more than a consensus of strongly-held convictions . It speaks of the issues of our time with passion for justice, with reverence for our history and character, with a long view of the American future, and with a fervent dedication to the goal of peace on earth.

" Nor has it evaded the current problems in the relations between the races who comprise America—problems which have so often tormented our national life. Of course there is disagreement in the Democratic Party on desegregation. It could not be otherwise in the only party that must speak responsibly and responsively in both the North and South If all of us are not wholly satisfied with what we have said on this explosive subject, it is because we have spoken the only way a truly national party can—by the understanding accommodation of conflicting views. But in so doing, in substituting realism and persuasion for the extremes of force or nullification, our party has preserved its effectiveness, has avoided a sectional crisis, and has contributed to our national unity . . .

" I do not propose to make political capital out of the President's illness His ability personally to fulfil the demands of his exacting office is a matter between him and the American people So far as I am concerned, that is where the matter rests. As we all do, I wish deeply for the President's health and well-being. But if the condition of President Eisenhower is not an issue as far as I am concerned, the condition and conduct of the President's Administration is very much an issue . .

" What is the truth ? The truth is that the Republican Party is a house divided. The truth is that President Eisenhower, cynically coveted as a candidate but ignored as a leader, is largely indebted to Democrats in Congress for what accomplishments he can claim The truth is that everyone is not prosperous. The truth is that the farmer has not had his share of the national income and the Republicans have done nothing to help him—until an election year. The truth is that 30,000,000 Americans live today in families trying to make ends meet on less than $2,000 a year. The truth is that the small farmer, the small business man, the teacher, the white-collar worker, the retired citizen trying to pay today's prices on yesterday's pension—all these are in serious trouble. The truth is that in this Government of big men—big financially—no one speaks for the little man. The truth, unhappily, is not—in the Republican President's words—that ' our prestige since the last World War has never been so high as it is to-day ' The truth is that it has probably never been lower The truth is that we are losing the military advantage, the economic initiative, and the moral leadership. The truth is not that we are winning the cold war The truth is that we are losing the cold war.

" Do not misunderstand me. I acknowledge the sincerity of the Republican President's desire for peace and happiness for all. But good intentions are not enough The country is stalled on dead-centre while the world goes whirling by. America, which has lifted man to his highest economic state, which has saved freedom in war and peace, which saved collective security, no longer sparks and flames and gives off new ideas and initiatives. Our lights are dimmed. We chat complacently of this and that while, in Carlyle's phrase, ' death and eternity sit glaring.' And I could add that opportunity, neglected opportunity, sits glaring too . . .

" We live at a time when automation is ushering in a second industrial revolution, and the powers of the atom are about to be harnessed for ever greater production. We live at a time when the ancient spectre of hunger is vanishing. This is the age of abundance.

Never in history has there been such an opportunity to show what we can do to improve the equality of living now that the terrible, grinding anxieties of daily bread, clothing, and shelter, are disappearing.

"With Democratic leadership, we can do justice to our children. We can repair the ravages of time and neglect in our schools. We can restore the vitality of the American family farm. We can preserve the position of small business without injury to the large We can strengthen labour unions and collective bargaining as vital institutions in a free economy. We can conserve our resources of land, forest, and water and develop them for the benefit of all We can rekindle the spirit of liberty emblazoned in the Bill of Rights . . .We can make this a land where opportunity is founded only on responsibility and freedom on faith, and where nothing can smother the lonely defiant spirit of the free intelligence

"All these things we can do, and we will. But in the international field the timing is only partially our own. Here the 'unrepentant minute,' once missed, may be missed forever. Other forces, growing yearly in potency, dispute with us the direction of our times Here more than anywhere guidance and illumination are needed in the terrifying century of the hydrogen bomb. Here more than anywhere we must move, and rapidly, to repair the ravages of the past four years to America's repute and influence abroad.

"We must move with speed and confidence to reverse the spread of Communism. We must strengthen the political and economic fabric of our alliances. We must launch new programmes to meet the challenge of the vast social revolution that is sweeping the world, and turn the violent forces of change to the side of freedom. We must protect the new nations in the exercise of their full independence. We must help other peoples out of Communist or colonial servitude along the road to freedom.

"And we must place our nation where it belongs in the eyes of the world—at the head of the struggle for peace. For in this nuclear age peace is no longer a visionary ideal. It has become an absolute, imperative, practical necessity. Humanity's long struggle against war has to be won—and won now. I say it can be won . . .

"There is a spiritual hunger in the world today, and it cannot be satisfied by material things alone Our forbears came here to worship God. We must not let our aspirations so diminish that our worship becomes rather of bigness—bigness of material achievement . . . Once we were not ashamed in this country to be idealists. Once we were proud to confess that an American is a man who wants peace and believes in a better future and loves his fellow-man. We must reclaim these great Christian and humane ideas. We must dare to say again that the American cause is the cause of all mankind . . ."

Mr. Truman expressed his "full support to Adlai Stevenson and Estes Kefauver," describing Mr. Stevenson as "a real fighter" and Senator Kefauver as "an able and efficient running-mate." He added: "I am very well satisfied with the results of this Convention. I accept them fully and completely. I say to all Democrats—no matter whom you supported before, get behind Stevenson and Kefauver. They won the nomination fairly and squarely . . . I am going to do all I can to help Stevenson and Kefauver to victory in November." (New York Times - New York Herald Tribune)

(Prev. rep. 1952 Democratic Convention, 12373 A.)

A. CANADA. — Provincial Elections in New Brunswick, Quebec, and Saskatchewan.

Elections to the Provincial Legislatures were held in New Brunswick on June 18 and in Quebec and Saskatchewan on June 20, except that in the northern Saskatchewan constituency of Athabasca the election had to be deferred until July 4. Results were as follows, party strengths in the former Legislative Assemblies being shown in parentheses:

New Brunswick. Progressive Conservatives 37 (36); Liberals 15 (16). The Progressive Conservative administration headed by Mr. H. J Fleming (the Provincial Premier) was thus returned to office with an increased majority, receiving about 51 per cent of the total vote.

Quebec. *Union Nationale* 72 (68); Liberals 20 (23); Independent 1 (1). The number of seats had been increased from 92 to 93. The election results constituted a personal triumph for Mr. M. L Duplessis, Premier of Quebec since 1936. The *Union Nationale* gains were mostly in urban areas, including Montreal

Saskatchewan. Co-operative Commonwealth Federation 36 (42); Liberals 14 (11), Social Credit Party 3 (nil). Although the C.C.F. Ministry under Mr. T. C Douglas (the Provincial Premier) was returned to power with an overall majority, its poll fell to 45 per cent—the lowest since it took office in the Province in 1944 Another feature of the elections was the advance made by the Social Credit Party, which captured about 21 per cent of the total votes. The Liberals, though dropping from 39 to 31 per cent of the poll, gained three seats at the expense of the C.C.F.

Of the ten Canadian provinces, the Liberals are in power in Manitoba (where they are known as Liberal-Progressives), Newfoundland, Nova Scotia, and Prince Edward Island; the Progressive Conservatives in New Brunswick and Ontario; the Social Credit Party in Alberta and British Columbia; the C.C.F. (Labour) in Saskatchewan; and the *Union Nationale* in Quebec.—(Montreal Star - Dept. of External Affairs, Ottawa)

B. UNITED KINGDOM. — Expenditure on Public Social Services.

Tables prepared by the Central Statistical Office in collaboration with Government Departments, giving details of expenditure on Social Services in Great Britain by the Central Government, the National Insurance Funds, and Local Authorities for the financial year 1955-56, together with revised figures for earlier years, were published in the May issue of the *Monthly Digest of Statistics*.

The table below shows consolidated current expenditure on Social Services, including administrative expenses, the figures relating to the financial years ended March 31, except in the case of expenditure by Scottish local authorities, whose financial year ends on May 15.

	1949-50	1950-51	1951-52	1952-53	1953-54	1954-55	1955-56*
				(£ million)			
National Insurance schemes	403 1	406 2	431 0	512.0	539 6	551.6	664 0

*Estimates.

Amounts recovered by contributions from the public towards particular services have in general been deducted, so that only the net expenditure is shown. Pensions paid under the National Insurance schemes, however, have been included in full, no deduction being made for the revenue received from employers' and employees' contributions National Insurance benefits, as well as war pensions and grants, paid to persons overseas, and National Assistance payments in respect of maintenance of Poles living in the U.K., are not included. For industrial rehabilitation, training and employment of the disabled, the figures cover only expenditure by the Central Government, expenditure by local authorities on these services being included with their expenditure on National Assistance, as separate figures are not available. Superannuation contributions paid by local authorities and by bodies operating the National Health Service are included as part of the current cost of the service, but pensions paid to retired employees, e.g. retired teachers and doctors, are excluded. All transfers from one public authority to another have been eliminated from the consolidated expenditure totals, and, in the case of Central Government grants to local authorities, only those for special social services are included.

Expenditure on National Insurance schemes comprises the National Insurance Fund and the National Insurance (Industrial Injuries) Fund; it includes retirement pensions (including pensions to widows over 60), other widows' benefits, and guardians' allowances, sickness benefits, maternity benefits, death grants, unemployment benefits, and industrial injuries benefits. (Monthly Digest of Statistics - Ministry of Labour Gazette)

C. TUNISIA. — Abolition of Polygamy.

The Prime Minister of Tunisia, M. Bourguiba, announced in a broadcast on Aug. 10 that the Government intended to issue decrees whereby (1) polygamy would be abolished; (2) the minimum age for the marriage of girls would be fixed at 15 years; and (3) every Tunisian woman reaching the age of 20 would have complete freedom of choice of husband, and would no longer have to obtain the consent of her parents or guardians before getting married. As a result of these changes, the Tunisian husband would "lose the arbitrary right to repudiate his wife when he wills it," and divorce could only be obtained through the courts.

Under Islamic marriage and divorce procedure, as set forth in the Koran, Moslems are allowed up to four wives, and may divorce any or all of their wives by a simple affirmation—"I divorce thee"—pronounced before a Koranic court in the presence of two witnesses. The Tunisian Government's action made Tunisia the second predominantly Moslem State, after Turkey, to abolish polygamy and to depart from the traditional marriage and divorce customs of Islam. The new decrees will not have retroactive effect—i.e. Moslems already married to more than one wife will not be affected by the legislation

The decrees announced by M. Bourguiba were sealed by the Bey of Tunis on Aug. 14, and enter into force on Jan. 1, 1957. (Le Monde, Paris - New York Times)

A. THE SUEZ CRISIS. — Breakdown of Discussions between "Menzies Committee" and President Nasser. - Egyptian Refusal to accept International Control of Suez Canal. - New Egyptian Proposals for "Negotiating Body." - Anglo-French Ministerial Discussions. - French Troops stationed in Cyprus. - Suez Canal Company authorizes Non-Egyptian Employees to leave Egypt. - Egyptian Allegations of "Spy Plot." - Arrest of British Nationals. - Expulsion of British Diplomats in Cairo and Egyptian Diplomats in London.

Following President Nasser's acceptance of discussions with the five-member Suez Canal Committee set up after the London conference (see page 15055), talks on the Suez Canal question were held in Cairo from Sept. 3-9 between the committee on the one hand and President Nasser and his advisers on the other. The members of the committee comprised Mr. Menzies, the Prime Minister of Australia (chairman), the Foreign Ministers of Ethiopia, Persia, and Sweden (respectively Mr. Habtewold, Dr. Ardalan, and Hr. Osten Undén), and Mr. Loy Henderson, of the U.S. State Department, representing Mr. Dulles. [Mr. Henderson was U.S. Ambassador in Teheran at the time of the Abadan crisis.] On the Egyptian side, participants in the discussion included Wing-Commander Sabry (President Nasser's political adviser), and Dr. Mahmoud Fawzi (the Foreign Minister), in addition to President Nasser himself. It was agreed at the start of the discussions that no statements or communiqués would be issued by either side until the talks had ended.

The "Menzies committee" had five meetings with President Nasser and his advisers between Sept. 3 and Sept. 9, when the talks ended in complete deadlock. A brief communiqué issued on the latter date said that the committee had "presented and explained the proposals of 18 of the nations which participated in the London conference on the Suez Canal, and in turn had received the views of the Egyptian Government with regard to them." It added that the discussions had been conducted "in a frank and informal manner" and that the five-nation committee "is departing from Cairo and will report to its principals the outcome of its discussions." Mr. Menzies, accompanied by Mr. Henderson and Hr. Undén, left Cairo for London by air on the same day, while Mr. Habtewold and Dr. Ardelan returned to Addis Ababa and Teheran respectively

Throughout the Cairo discussions, which took place in an atmosphere of courtesy, President Nasser made it plain that Egypt did not intend to depart from her previously announced position: (*a*) that she would not agree to any form of international control for the Suez Canal, as envisaged in the 18-Power resolution of the London conference; (*b*) that she would not relinquish sovereignty over the Canal; (*c*) that she was ready to guarantee complete freedom of navigation for all shipping, without any discrimination, provided the first two points were accepted.

After the Cairo discussions had ended and Mr. Menzies had returned to London, the text was published of the principal documents exchanged by the two sides during the Cairo meetings. They comprised (1) an *aide-mémoire* presented by the five-nation Committee to President Nasser on Sept. 3; (2) a letter sent by Mr. Menzies, in his capacity as chairman of the committee, to President Nasser on Sept. 7; and (3) President Nasser's reply, conveyed in a letter to Mr. Menzies on Sept. 9. These documents are summarized below.

Committee's Aid-Mémoire to President Nasser.

After explaining that the five-nation Committee had been "authorized by 18 nations, which are the major users of the Suez Canal, to approach the Egyptian Government on their behalf, to present to it certain proposals relating to the future operation of the Canal, and to explain to the Egyptian Government the nature and objectives of such proposals," the *aide-mémoire* continued:

"It will be readily understood that the nations for whom we speak regard their vital economic interests as being deeply affected by the future of the Canal. They have a clear belief that, if the Canal is to be maintained and developed as a waterway open to vessels of all nations, it should be detached from politics and the management of its operations should be placed on such a basis as to secure the maximum of international confidence and co-operation

"We wish to make it clear that those whom we represent have not approached this problem in any spirit of hostility There is a long history of friendly relations with Egypt In two great wars, several of the nations we represent have had a direct and mutually helpful association with Egypt. We have all welcomed Egypt's attainment of complete self-government, and we would desire that anything done or proposed now should be regarded as containing no derogation from Egypt's sovereignty and national dignity. These two points of view were clearly illustrated by the whole temper and tone of the discussions at the London conference.

"It is our deep conviction that the negotiation of a convention along the lines suggested in our proposals would be for the benefit of Egypt and all nations using the Canal, and would help to restore the kind of peaceful international atmosphere which the world so desperately needs.

"In case it should be thought that what we are proposing conflicts with the sovereign rights of Egypt with regard to the Canal, which flows through Egyptian territory, we should at the outset make it clear that we do not believe that the Convention of 1888, and a Convention of the kind we are suggesting supplementary to that of 1888, affect Egypt's sovereign rights at all It is, indeed, the existence of those sovereign rights and their continued recognition which afford the whole basis of our proposals It is our desire and need that there should be a definite system for the operation, maintenance and development of the Canal, which, while it recognizes Egyptian sovereignty, will serve dependably, for a long time to come, the manifest interests not only of Egypt but of all users of this most important waterway. We trust that our discussions will proceed amicably on this basis . . ."

The *aide-mémoire* then gave the final text of the 18-nation resolution adopted at the London conference—i.e the resolution presented by Mr. Dulles on behalf of the U.S delegation (see page 15053, first column), incorporating the amendments moved by Pakistan, Persia, Turkey, and Ethiopia (see page 15054).

Mr. Menzies' Letter to President Nasser.

Mr. Menzies' letter to the Egyptian President was worded as follows:

"Our discussions have been conducted in an atmosphere of courteous frankness and responsibility. But they have . . . disclosed deep differences of approach and principle In these circumstances we consider that it would be helpful that my Committee should set down, in summary and objective form, the underlying purposes of the 18-Power proposals and the nature of the reasons underlying them. This seems desirable because, as our talks have been conducted in private, without records and with great informality, neither you nor we would desire that there should be in future any misunderstanding on the part of our principals or of yourself as to what we were proposing to your Government

"From the outset, you will have observed that the 18 nations have not attempted to arrive at any joint opinion as to the validity or otherwise of Egypt's nationalization decree The London Conference felt that a debate on this point would be fruitless, since the conference possessed no authority to make any judicial determination It was therefore considered much more practical to work out constructive proposals which assumed that the act of nationalization had occurred; that the problem of the payment of compensation to the Suez Canal Company would be properly dealt with, with provision for arbitration in the event of difference; and that what was needed was the establishment of principles and methods for the future . . The proposals evolved in this atmosphere have been placed before you and have been much debated between us. We have, as you know, gone beyond the mere presentation of the proposals and have sought to explain and establish what we believe to be the large questions of principle involved.

"It would be tedious and unnecessary to recapitulate all the discussions that have occurred on all the points of interpretation that have arisen. The simple truth is that we quite early realized on both sides of the table that there were certain central matters, without agreement upon which subsidiary matters could not usefully be determined The two crucial proposals emerging from London were:

(1) That the operation of the Canal should be insulated from the influence of the politics of any nation, and

(2) That, to enable this to be done, there should be established, under an international convention to which Egypt would be a party, a body charged with the operation, maintenance, and development of the Canal. Such a body, we propose, should be constituted of people from various countries, including Egypt The members would not be subject to political direction, and should be given in the convention, with the free consent of Egypt, wide powers of management and finance so that it could inspire confidence, deal with the future financial requirements of the Canal, and ensure a non-discriminatory and non-political management of Canal traffic. The proposed body would naturally have due regard for the laws and institutions of Egypt.

"You have with complete frankness made it clear to us that the existence of such a body operating the Suez Canal would, in the view of Egypt, be a derogation from Egyptian sovereignty; that it would in substance represent a reversal of the policy announced by you on July 26.

"We cannot agree with this view. Nowhere in our proposals is there any denial of Egypt's territorial sovereignty. On the contrary, the London proposals expressly recognized these rights in paragraph (2) of the resolution. The whole essence of what we have put forward is—to use a homely illustration—that Egypt's position as the landlord of the Canal being completely accepted, she should proceed by international agreement to instal a tenant so constituted that the future of the Canal would be satisfactory both to its owners and to those many nations who use it.

"We believe . . . that it cannot seriously be maintained that when a landlord grants a lease of premises, that lease derogates from his ownership The fact is that the lease is an expression of and conditional upon his ownership. On this analogy our proposals would mean that the tenant of the Canal would pay to Egypt a substantial rental

which must unquestionably grow as the traffic through the Canal increases, and that in the meantime the tenant would, in the exercise of his managerial and financial powers, be constantly improving the value of Egypt's asset. Indeed, as the 'tenant' in this analogy would be a body which includes Egypt herself, the position of Egypt would be even stronger.

"In paragraph 3 (a) of our proposals there is a reference to 'institutional arrangements.' As we felt that this phrase might be regarded as admitting of a variety of applications, we undertook the task of illustrating what it meant. We pointed out that what we were saying was merely illustrative and was not designed to narrow the broad significance of the proposals themselves.

"But, as we have said, one form of 'institutional arrangement' which comes readily to mind is the case of the International Bank for Reconstruction and Development That Bank was created by agreement among a considerable number of nations. It was not incorporated under the law of any one country. It owes its existence to the agreement of many countries. Its powers are defined by an international document. Without being in the technical sense incorporated under some pre-existing law it has extensive powers, but also because in its capital structure and growth it has enjoyed the unquestioned confidence of a great variety of member-nations. Its existence has not, so far as we know, been regarded as derogating from the sovereignty of any nation, even though it enjoys a wide immunity from national laws

"We have become conscious of your firmly held view that there is no occasion for a Canal Authority possessing an international character, because of your Excellency's belief that Egypt is herself capable of conducting and ensuring the future of the Canal, and has never challenged the 1888 Convention or its declarations about the freedom of the Canal. To answer this point, we found it necessary to put before you quite frankly and objectively certain considerations which, from the point of view of the 18 nations we represent—nations who among them represent over 90 per cent of the traffic passing through the Canal—are of vital significance.

"The traffic through the Canal has almost reached what might be described as saturation point. Even to maintain it in its present shape requires the constant services of a highly skilled, experienced, and specialized engineering and transportation staff. This staff has been built up over a long period of years. There has been an increasing intake of Egyptian personnel, but the great majority of the key employees are still nationals of other countries From the point of view of Egypt herself it is desirable that there should be a continuity of skilled operation Such continuity, in our judgement, cannot be assured unless there is complete mutual confidence among those actually operating the Canal, the Government of Egypt, and the users of the Canal.

"But the matter does not end there. It is clear that as a result of increased traffic, Egypt can enjoy very substantial and increasing benefits from the Canal if the Canal can retain the confidence of its principal users. The number of tankers passing through the Canal could double or treble in a few years if such confidence exists To deal with such traffic, expansion of the Canal will be necessary. Whether expansion consists of widening, deepening, constructing by-passes, or even duplicating the Canal, the capital costs will be substantial If these costs are to met over a period of time from Canal revenues without serious current reductions in Egypt's income from the Canal, or without the imposition of burdensome increases of dues, they must be derived from funds accruing from an increase in traffic—an increase which would come only if the users maintain confidence in the Canal.

"It must be remembered that the increased dues would impose grievous burdens upon those many millions of people in the world who, in the long run, pay the coasts and charges incurred by the cargoes they ultimately buy or sell. If expansion would not be necessary, it would be because the users' confidence would be lacking and many of them would have found ways to avoid remaining dependent on the Canal. The benefit, therefore, which Egypt might have gained would be materially lessened

"We have therefore, in the interest of Egypt and the users, urged that the structure of the body actually conducting the Canal operations should be such as to inspire world-wide confidence and bring about a capacity to raise the necessary capital sums because of a prevailing feeling of security on the part of those who may be asked to provide them.

"In short, what we have proposed is that, Egypt's sovereignty being fully recognized, the actual operation, maintenance and expansion of the Canal should be reposed in a body (established under international convention) which would include people from various nations—including, of course, Egypt—with extensive financial powers and responsibilities.

"As we believe that an international waterway like the Suez Canal should not become an instrument of the political policy of any nation or nations, we proposed that the members of this body should not be mere delegates of any nation or be under any obligation to observe political instructions. On the contrary, we proposed that the parties to the convention should select them with regard to their personal qualities of ability, integrity, and experience.

"It is true in a sense that our proposed convention would be an arrangement made between Governments, and that original appointments to the proposed authority would be made by Governments But we firmly believe that, with good will and good faith, persons so appointed could serve in a non-political manner as readily, for instance, as do the judges of the International Court of Justice.

"As we have throughout emphasized, it is essential that if it is to be a truly international waterway as envisaged by the 1888 Convention, there should be no politics in the Suez Canal—whether those of Egypt or of any other nation. Your Excellency has told us with clarity and frankness that you do not believe that the Canal could be excluded from the politics of Egypt, since it is part of Egyptian territory and assets. To this, we have pointed out that if the Canal is to remain fully available for any of Egypt's political purposes, subject only to the 1888 Convention, then the many nations using the Canal will have to realize that their pattern of oversea trade will be at any time subject to the decision of Egypt alone

"We are, of course, conscious of your own view that these considerations are adequately met by the guarantee of freedom under the 1888 Convention. But, if that Convention is to contain the only limitation, it seems clear to us . that there could be, for political purposes, many discriminations in traffic and marshalling control which did not fall foul of the Convention , that, Canal dues being within Egypt's sole control, differences of opinion as to their level will almost inevitably be fixed by reference to Egyptian budgetary needs, with the strong possibility that they would be raised to the maximum that the traffic could bear , and that future development of the Canal might well be controlled by local budget considerations—a danger which independent finance by a special international body would entirely avert.

"We have stated and restated that the setting-up of such a body as we have proposed would create such a feeling of assurance in the minds of all user-nations that the necessary financial provision could be secured, the burden of such matters being no longer the sole responsibility of Egypt herself We have further emphasized that under our proposals there would no longer be private shareholders or dividends. The one nation which would obtain an assured annual net revenue from the Canal would be Egypt.

"Your Excellency has repeatedly and vigorously explained to us that the setting-up of a Suez Canal body of the kind envisaged in our proposals would, to the eyes of Egypt, represent either foreign domination or seizure We have pointed out that the truth is that no arrangement for the tenancy of the Canal can be either domination or seizure if it is freely agreed to by Egypt And it is, as you know, that willing and free agreement which all of our negotiations have been designed to secure

"It remains only to emphasize two other large matters which arise in the course of our proposals. The first was our proposal that the new body, having been constructed by international convention, should be brought into relationship with the United Nations This was done in the case of the International Bank by an agreement with the U N which had the effect of making the Bank a 'specialized agency' under the Charter, but which, of course, did not affect the freedom of the Bank in the conduct of its business

"Association between our proposed body and the U N in a similar fashion could, we believe, give great satisfaction all round the world and, if adopted, would considerably strengthen international confidence and security We also proposed an arbitral commission to settle disputes There might be disputes as to the equitable return which Egypt should have from the Canal There might, in the course of the years, be other disputes involving one or more of the constituent nations. Any such matters, if they could not be resolved by agreement, should be arbitrated upon by an independent commission enjoying international confidence

"Our proposal did not mean that such an arbitral commission would be the authority to deal with the normal problems which arise in the course of management, such as claims which might arise in relation to the employment of people, or contracts with subsidiary contractors .. It would only be in any dispute of a genuinely international character that the jurisdiction of the arbitral commission would be invoked

"At the London conference it was agreed by all the nations represented that any arrangement entered into must be completely fair to Egypt and must pay scrupulous regard to Egypt's territorial sovereignty. Our whole presentation of the matter to your Excellency has been made in that spirit and with that desire It is for this reason that I have repeatedly pointed out, while representing nations who are users of the Canal, that we are deeply and urgently concerned in obtaining the highest possible measure of confidence and an effective and practical guaranteed freedom and future for the Canal.

"There are in our proposals marked advantages for Egypt which we have discussed at length, but which we now summarize as follows.

(1) Egypt's ownership of the Canal being recognized, it is to her great advantage to have the Canal maintained, improved, and made more profitable as the years go on.

(2) The future financial burdens involved in such maintenance and improvement would be carried and handled by the new body and, therefore, Egypt would in fact be relieved of them.

(3) Egypt alone would draw profit from the Canal.

(4) A just and fair method of compensating the shareholders of the Suez Canal Company would have been agreed upon.

(5) The dangerous tension now existing internationally would be relaxed on terms satisfactory to the user-nations and entirely consistent with Egypt's proper dignity, independence, and ownership, and thus a world contribution would be made to the peaceful settlement of international problems.

"It is the understanding of the Committee that you have taken the position that you are unable to accept the basic proposals put before you I would be grateful if your Excellency would inform the Committee whether or not this understanding is correct, supplementing your statement with such views as you may care to express.

"If, unfortunately, the understanding of the Committee is correct, the task entrusted to the Committee by the 18 Powers of presenting and explaining these proposals, and ascertaining the attitude of the Egyptian Government with respect to them, would have been carried out In such an event, there would appear to be no alternative other than for the Committee to request your Excellency to receive it at your early convenience so that it may be prepared, after a final conversation with you, to take its leave"

Mr. Menzies also forwarded to President Nasser the Spanish proposal made at the London conference—namely, that if no agreement could be reached with Egypt on the basis of the 18-nation proposals for an international board, negotiations should proceed "along the lines of an international participation on the Egyptian body administering the Canal."

President Nasser's Letter to Mr. Menzies.

After acknowledging Mr. Menzies' letter, President Nasser continued.

"You have referred to the 18 countries as representing over 90 per cent of the users of the Canal. Besides this being distinctly a statistical exaggeration, our understanding of 'users of the Canal' includes those countries which, even though they have no ships passing through the Canal, use the Canal for the passage of the bulk of their foreign trade. An illustration of this would be such countries as Australia, Siam, Indonesia, India, Pakistan, Persia, Iraq, Saudi Arabia, Ethiopia, and the Sudan Furthermore, the principle of sovereignty, the right of ownership, and the dignity of nations are all deeply involved in this problem.

"At least in appearance, the starting-point of the present crisis was July 26, 1956, when, in the exercise of one of its prerogatives, the Government of Egypt nationalized the 'Universal Maritime Company of the Suez Canal' That the Government of Egypt was fully entitled to nationalize that Egyptian company cannot be seriously contested In nationalizing that company, the Government of Egypt stated unequivocally that it considers itself bound by the 1888 Convention guaranteeing freedom of passage through the Suez Canal, and its readiness to give full and equitable compensation to the shareholders. Furthermore, on Aug 12 the Government of Egypt announced its willingness to sponsor, with the other Governments' signatories to the Constantinople Convention of 1888, a conference—to which would be invited other Governments whose ships pass through the Suez Canal—for the purpose of reviewing the Constantinople Convention and concluding an agreement between all these Governments reaffirming and guaranteeing freedom of passage through the Suez Canal.

"Nowhere and at no date can there be found any instance where the Government of Egypt has violated any of its international obligations concerning the Suez Canal For nearly 50 days, and in spite of the difficulties created by France and the United Kingdom, and by segments of the former Suez Canal Company, the traffic through the Canal has been proceeding with regularity and efficency.

"The crisis and the so-called 'grave situation' are, therefore, artificially created by the above-mentioned quarters, as witness among other things

(*a*) Statements containing threats of force.

(*g*) Mobilization and movements of troops by France and the United Kingdom

(*c*) Incitement to employees and pilots working in the Suez Canal to abandon their work, made by France and the United Kingdom and by some officials of the former Suez Canal Company, and

(*d*) Hostile economic measures taken against Egypt.

"With all this going on we have repeatedly been made to listen to references to a 'peaceful solution' and to 'free negotiations' to achieve such a solution. Need one emphasize the contradiction between the reality and the professed aim? If there is anything which flagrantly violates and disdains the letter and spirit of the U N. Charter, it is such acts of attempted intimidation, economic pressure, and incitement to sabotage.

"In contrast to this, the Government of Egypt has announced its full readiness to negotiate a peaceful solution in conformity with the purposes and principles of the U N. Charter This remains the policy and intent of the Egyptian Government. We have studied most carefully all the proposals submitted in and outside the London conference with regard to this problem, including the proposals of the 18 countries which the committee represents. We find ourselves in agreement with the 18 countries when they state that the solution must ·

(*a*) Respect the sovereign rights of Egypt

(*b*) Safeguard freedom of passage through the Suez Canal in accordance with the Convention of 1888.

(*c*) Respect Egypt's right of ownership

(*d*) Ensure the efficient and dependable operation, maintenance, and development of the Canal.

"When, however, we come to consider the ways and means proposed by the committee to attain these objectives, we find that they are self-defeating and that they lead to opposite results from those aimed at. The 'definite system' as proposed by the Committee would, in fact, mean 'taking over the operation of the Canal.' as circulated by the sponsoring Government [i e. Britain] immediately before the [London] conference, and in substance maintained throughout, in spite of variance of expression

"The system proposed is bound to be considered by the people of Egypt as a hostile infringement of their rights and sovereignty, all of which precludes real co-operation. It can, moreover, be asked whether it was the Suez Canal Company which guaranteed freedom of passage through the Canal? Was it not indeed the Government of Egypt which safeguarded, and still safeguards, that freedom of passage? Would that freedom be, or could its actual practice be, safeguarded by the proposed Suez Canal Board? Is it not to be expected that this Board would be not a source of comfort and help, but of misunderstanding and trouble?

"In all this we keep constantly in our mind the vital importance of genuine international co-operation as distinct from domination by any country—be it single domination, as the one which Egypt has just got rid of, or collective domination, as the system proposed by the Committee would inevitably be considered Any attempt to impose such a system would indeed be the signal for incalculable strife and would plunge the Suez Canal into the turmoil of politics, instead of insulating it from politics as seems to be the professed desire of the Committee.

"Whatever the system of operation of the Canal, it will depend on the close, full, and willing co-operation of the people of Egypt, through whose country the Canal runs It is obvious that such indispensable co-operation cannot be obtained if the people consider the operating body as hostile and as derogating from their sovereignty, rights and dignity

"Strangely enough, those who pose as protagonists of 'insulating' the Suez Canal from politics have been the authors of many acts which diametrically contradict this announced purpose What is the 'internationalization' of the Suez Canal, the convening of the London conference, with for the most part tactically-selected invitees, the delegating of the Five-member Committee, the threats, the deployment of armed forces, the economic measures—what are all these, if not politics?

"You have mentioned that the delegates of any nation represented on the proposed Suez Canal board should not be under any obligation to observe political instructions. They will, nevertheless, be nationals of their respective countries and subjects of their respective Governments, and it will be extremely unlikely that they will be immune from the influence of such relationships The similes you have put forward of the International Bank and the International Court of Justice do not, in our opinion, either hold or convince. We believe that the real insulation of the Canal from politics would best be guaranteed by a solemn and internationally binding commitment in the form of a reaffirmation or a renewal of the 1888 Convention, either of which, as we have already declared, is acceptable to us

"It has been alleged that Egypt aims at discriminating against one of the countries you represent, namely, the United Kingdom, and that the Government of Egypt has among its objectives the disruption of British economy and the interruption of the United Kingdom's lines of trade and supply through the Suez Canal It is clear beyond cavil that nothing could be farther from the truth, and no-one could validly point out a single reason why, and for what useful purpose, the Government of Egypt should entertain such a policy.

"You mentioned international confidence. I have in this connexion called your attention to the fact that confidence is a two-way proposition, and that, while the confidence of other nations is important, that of the Egyptian people is at least of equal importance in this respect—and that it cannot be had if the Egyptian people, as a result of certain acts and policies, are impelled to doubt and lose faith in the existence of international justice and the rule of law in international relations.

"If the real objective is to secure freedom of passage through the Suez Canal, the answer is there—namely, that passage through the Canal has always been and continues to be free. The only danger to this freedom of passage stems from the threats, the redeployment of armed forces, the incitation of employees and workers to sabotage the operation of the Canal, and the economic measures against Egypt If on the other hand, as it seems, the objective is to amputate and sever from the body of Egypt one of its main limbs, if the aim is to deprive Egypt of an integral part of its territory, we should be told of it

"It should be abundantly clear by now that Egypt, by the very nature of things, is vitally interested in the maintenance of peace and security, not only around the Suez Canal but also throughout the area in which it exists and all over the world. It should be equally clear that, if only from sheer self-interest, Egypt is devoted to freedom of passage through the Canal and is equally devoted to the concept of an efficient, enlightened, and progressive operation of the Canal without any discrimination or exploitation whatsoever. In this last connexion I mentioned to the Committee that the Government of Egypt is ready to enter into a binding arrangement concerning the establishment of just and equitable tolls and charges.

"As for the future development of the Suez Canal, to which you referred, I wish to reiterate that the Government of Egypt is determined to do everything possible in this respect It has already announced its intention to carry out the development programme which was planned by the former Canal Company, and other programmes of much wider scope and longer range . . . We have also announced our intention to earmark an adequate percentage of the revenues of the Canal to its future development, and to divert none of the revenues needed for such development to other channels.

Both for the development and for the operation of the Canal the Government of Egypt does, and will always be ready to, benefit by the knowledge and experience of experts from all over the world The crux of the present situation is, in our opinion, that the proposed system . . . aims at securing for a group of users of the Canal control of it by taking over its operation , of taking the Suez Canal out of the hands of Egypt and putting it into other hands It is difficult to imagine anything more provocative to the people of Egypt than this. Such an act is both self-defeating and of a nature to generate friction, misunderstanding, and continuous strife. It would be, in other words, not the end but the beginning of trouble

" I would like, on the other hand, to reaffirm that the policy of my Government remains :

(1) Freedom of passage through the Suez Canal and its secure use without discrimination.

(2) The development of the Canal to meet the future requirements of navigation

(3) The establishment of just and equitable tolls and charges.

(4) Technical efficiency of the Suez Canal

" We trust that the Suez Canal will thus be insulated from politics and, instead of being a source of conflict, will again become a link of co-operation, mutual benefit, and better understanding between the nations of the earth "

New Egyptian Proposals for " Negotiating Body."

A few hours after the Menzies mission left Cairo, the Egyptian Government sent Notes to the U.N. Secretary-General and to all countries except Israel proposing immediate discussions between all States using the Suez Canal for the creation of a " negotiating body " to consider the questions of freedom of navigation, canal development, and toll charges on the Canal. It was also suggested that this body might review the Convention of 1888.

The Note expressed the Egyptian Government's opinion that a solution of the Suez Canal dispute was possible " without prejudice to Egypt's sovereignty or dignity." It stated that the Egyptian Government had reviewed not only the 18-nation proposals drawn up at the London Conference but also the proposals of India, Spain, and " other views which have been expressed from time to time outside the London conference." In addition, it recalled President Nasser's proposal of Aug 12 (see page 15042) for a conference of signatories of the 1888 Convention with the aim of reviewing and reaffirming the guarantees of freedom of navigation on the Canal An official spokesman in Cairo emphasized that the new proposals ruled out international control of the Canal

The latest Egyptian proposals had not been presented to the five-nation committee during the Cairo discussions.

A spokesman of the British Foreign Office commented as follows on these proposals : " The Egyptian statement does not appear to suggest any basis for negotiations. The last action of the Egyptian Government has been the unqualified refusal of the proposals put forward as a basis for negotiation by the Menzies mission on behalf of the 18 Powers."

Anglo-French Ministerial Discussions.

The French Prime Minister (M. Mollet) and the Foreign Minister (M. Pineau) visited London on Sept. 10-11 for discussions with Sir Anthony Eden and Mr. Selwyn Lloyd, following President Nasser's refusal to negotiate on the basis of the 18-Power proposals. The following communiqué was issued after the Anglo-French talks had concluded :

" The French Prime Minister and the Minister of Foreign Affairs conferred with the Prime Minister and the Foreign Secretary at 10, Downing Street, during the evening of Sept. 10 and again in the morning of Sept 11. The general purpose of this meeting was to consider the situation arising from the refusal of President Nasser to agree to negotiations on the basis of the proposals of the 18 Powers for the future regulation of the Suez Canal. They paid tribute to the skill, patience and unity of the Five-Power Committee, led by the Australian Prime Minister, in explaining these proposals to President Nasser.

" The Ministers recalled that from the outset their Governments acted in full conformity with the purposes and principles of the United Nations. Their immediate reaction to the unilateral act of President Nasser was to join with the U S Government in summoning a meeting of those mainly interested in the Canal, including Egypt, in order to discuss this evident threat to the well-being of a very large proportion of the inhabitants of the globe. Though Egypt unfortunately refused to attend, this conference succeeded in producing a plan, approved by States representing over 90 per cent of the user-interests in the Canal, which was eminently fair to all concerned and took full account of Egypt's sovereignty and interests.

" The Ministers agreed that the refusal of President Nasser to negotiate on this basis created a very grave situation They discussed the further measures to be taken and reached full agreement upon them.

" The Ministers were glad to note that present events had clearly demonstrated the identity of French and British will to uphold the rule of law in international affairs. They expressed their determination to develop their co-operation and to resist, by all appropriate means, any arbitrary interference with rights established under international agreements and any action incompatible with ' justice and respect for the obligations arising from treaties and other sources of international law ' " [From the Preamble to the U.N. Charter.]

Mr. Gaitskell, the Leader of the Opposition, accompanied by Mr. Morgan Phillips, secretary of the Labour Party, had a meeting with M. Mollet before the French Prime Minister returned to Paris.

Mr. Menzies' Return to London. - Statement on Cairo Talks.

Before leaving Cairo for London, Mr. Menzies had described the situation as " very grave " but otherwise made no reference to his talks with President Nasser. On arrival in London the same evening (Sept. 10) Mr. Menzies went to 10, Downing Street, to see Sir Anthony Eden and M. Mollet and to report on his talks with President Nasser. He took no part in the Anglo-French negotiations.

In a press statement at London Airport, Mr Menzies said that the position was " precisely the same as before the London conference began " After recapitulating the merits of the 18-nation proposals, and stressing that they were completely consistent with Egypt's sovereignty, he said · " The answer to our proposals, after long detailed arguments to and fro, is that Egypt will have nothing to do with any peaceful solution of the Canal issue which does not leave Egypt the absolute and undisputed master of the whole of the operations of the Canal, subject only to the 1888 Convention, which, in a broad way, guarantees freedom of traffic—a freedom, of course, which could be set on one side with the greatest of ease by political management, which we sought to avoid by having a guaranteed non-political management " Mr Menzies emphasized that there had been complete unanimity among the members of the Five-Nation Committee throughout the Cairo discussions

French Troops stationed in Cyprus.

The following statement was issued by the British Foreign Office on Aug. 29 : " The French Government have informed H.M. Government that, in view of developments in Egypt and the Canal Zone, they wish to be in a position to ensure, in case of need, the protection of French nationals and their interests in the Eastern Mediterranean. For this purpose the French Government have asked and H.M. Government have agreed that a contingent of French troops should be temporarily stationed in Cyprus "

Contingents of French troops and airmen—unofficially estimated at about 2,700 men, including a detachment of paratroopers—disembarked at Limassol on Sept. 7 from the 15,000-ton French troopship *Athos II*. During the previous week military stores had been landed at Limassol and Famagusta from French cargo-ships and freighters. No official information was given as to the strength of the French forces in Cyprus, but the figure of about 7,000 was mentioned in the French and British press Precautions were taken by the British forces in Cyprus against possible Eoka terrorist attacks during the disembarkation of French troops and *matériel*

The Visiting Forces Act of 1952 (see 12856 B) was extended to Cyprus by Order-in-Council on Aug 30 as a result of the temporary stationing of French troops in the island The effect of the Orders-in-Council will be that French courts-martial in Cyprus will have the same legal competence to try any offences committed by French personnel as, for example, U.S courts-martial possess in dealing with certain civil offences committed by U S troops in Britain.

Suez Canal Company's Authorization to Non-Egyptian Pilots to leave Employment. - Resignation of European Pilots.

The Suez Canal Company issued a statement in Paris on Sept. 11 authorizing its non-Egyptian employees in Egypt to cease work on Sept. 14 or 15 and to make immediate arrangements for repatriation.

After thanking its non-Egyptian employees in Egypt for " the effort they have made for nearly seven weeks [i e. since the nationalization of the Canal] in the service of the international waterway," the statement continued ·

" The Board is aware of the very great difficulties these employees have had to face, and the distressing moral atmosphere in which the Company has asked them to work in response to the wishes of the British and French Governments, who were anxious to facilitate, first, the work of the London conference, and then the mission of the Committee of Five presided over by Mr. Menzies.

" This mission now being completed, the further period of work called for by the Company a fortnight ago [see below] is now coming to an end Consequently, all non-Egyptian employees who, before Aug 15, asked to be repatriated, thereby intimating that they did not accept any contract with the *de facto* Egyptian Authority, are authorized to stop working on either Sept. 14 or 15, according to the particular requirements of the department in which they are employed. They should forthwith make arrangements for repatriation with the assistance, if required, of diplomatic and consular representatives "

Two earlier statements had been issued by the Company on Aug. 26 and Aug. 28, as summarized below :

(1) The first statement pointed out that although the Company's non-Egyptian personnel desired to be repatriated without delay, they had been asked at the request of the British and French Governments to remain at their posts until the London conference had ended.

"From information from the Canal," the statement continued, "it is evident, on the one hand, that working under duress is daily becoming more and more intolerable and unacceptable to the employees, and on the other hand, that the *de facto* Egyptian Authority is gradually destroying the international organization which was an indispensable factor in the efficiency of operation of the Canal One can quote as examples: the dismissal or replacement of chiefs responsible for the various sections of the service; interference from a new and inexperienced Egyptian administration at all levels, uncertainty as to the safety of individuals and property; police supervision over all foreigners and even over Egyptians in the employment of the Company, and pressure to obtain, by means of a declaration, the rupture of ties with the Company ..

"Under these conditions, the Company is convinced that the safety of its staff and the preservation of the integrity of its organization are now beyond its control It has therefore advised the Powers who are considering the future of the Canal that if the Company's non-Egyptian personnel were to be constrained to remain longer in the Canal Zone, the responsibility for such a decision would rest with these Powers . . ."

(2) The second statement (Aug 28) was issued after the end of the London Conference. After taking note of the 17-nation declaration, it stated (i) that practically all the Company's non-Egyptian personnel had registered with their diplomatic representatives [in Cairo] by Aug. 15 and had asked to be repatriated; (ii) that the Company therefore felt that it had no right to ask its non-Egyptian employees to remain at their posts "beyond a time-limit agreed to in consideration of the mission with which Mr Menzies was entrusted by the London conference"; and (iii) that the necessary instructions would be issued to these employees after the Menzies mission had completed its discussions with the Egyptian Government [These instructions were issued on Sept. 11, as stated above]

M. Paul Reymond (the former chief of the transit department of the Suez Canal Company), and spokesman of the remaining non-Egyptian employees) informed Colonel Yunis (chief administrator of the Egyptian Canal Authority) on Sept. 12 that the British, French, Italian, Dutch, and Norwegian pilots and other employees wished to leave their jobs at midnight on Sept. 14. In reply, Colonel Yunis gave assurances that no obstacles would be placed in the way of their repatriation, and said they would be given every facility to leave Egypt. On the following day the Egyptian representative at the U.N. notified the Secretary-General (Dr. Hammarskjold) and all member-states that his Government were determined to "assure the continuation of normal passage through the Canal," and that the responsibility for any hampering of navigation as a result of the withdrawal of foreign pilots would rest with those "who have endeavoured to create conditions aimed at obstructing the so far unaffected normal working of the Canal." The Egyptian letter described the withdrawal of non-Egyptian pilots as an "act of intimidation" by the Suez Canal Company, and accused the British and French Governments of having "endorsed this act of intimidation."

Press reports from Cairo stated that the resignations of non-Egyptian employees might account for as many as 500 administrative and technical staff and between two-thirds and three-quarters of the Canal pilots The only substantial group of non-Europeans remaining under the Egyptian Authority would be Greek pilots, nearly all the others being Egyptians

In pursuance of its aim of recruiting 300 pilots for service under the nationalized authority, offers of employment to qualified applicants had been made by Egyptian embassies and legations abroad in a number of countries—either by advertisements in the Press or by direct approach to pilots' and master mariners' organizations Among the countries in which such advertisements appeared were France, Italy, Holland, Western Germany, the Scandinavian countries, Greece, Yugoslavia, the Soviet Union, India, the U S A, and Switzerland. It was announced in Moscow on Sept 4 that a group of Soviet Baltic pilots (the number was not given) had volunteered for service with the Egyptian Authority, while it was also officially stated that 15 pilots had been recruited in Greece, 12 in India (from the Hooghly River pilot service), and 10 in Yugoslavia It was understood that only a small number of applications had come from the Western countries, and there was no official confirmation of Egyptian claims to have recruited a number of German pilots engaged on the Kiel Canal service.

Egyptian Allegations of "Spy Plot." - Arrest of British Nationals. - British Diplomats expelled from Cairo. - Retaliatory Expulsion of Egyptian Diplomats in London.

Colonel Hatem, the head of the Egyptian Government's Information Office, announced on Aug. 28 that two British nationals—Mr. James Swinburn and Mr. Charles Pittuck—and four Egyptians had been arrested in connexion with an alleged "spy ring" and would be brought to trial. The arrest of two other British nationals—Mr. James Zarb and Mr. John Thornton Stanley—on similar charges was announced on Aug. 29 and Sept. 3 respectively. It was stated in Cairo on the latter date that about 30 persons of "various nationalities," including a number of Egyptians, were under arrest in connexion with the alleged "spy ring."

Of the four arrested Britons, Mr. Swinburn (who has lived in Egypt for 25 years) had been secretary of the British-owned Arab News Agency since 1952; Mr. Pittuck was assistant manager of the Marconi Radio Telegraph Co of Egypt (which is not connected with the Marconi Company in London); Mr. Zarb was a Maltese businessman resident in Egypt; and Mr Thornton Stanley was manager of the Prudential Assurance Company in Cairo

The Egyptian authorities described Mr. Swinburn as head of the alleged "spy ring," and said that he had "confessed" that he had worked with Mr. J. B. Flux and Mr. J. B. Gove, First Secretaries at the British Embassy in Cairo. These allegations were strongly denied by the Embassy, which described them as "completely false and without foundation," and which pointed out that no official notification had been given of the arrest of Mr. Swinburn and the other British nationals After repeated representations, the British Consul-General in Cairo (Mr. Basil Judd) was allowed to see Mr. Swinburn and Mr. Pittuck on Aug 30, Mr. Zarb on Sept. 6, and Mr. Stanley on Sept. 9.

Mr. Flux and Mr. Gove were declared *personae non gratae* by the Egyptian Government on Aug. 28 and were asked to leave the country immediately. As a reprisal for their expulsion, against which a strong protest was made, the British Government declared two officials of the Egyptian Embassy in London—Mr. Salah Kafifi and Mr. Hamdi Mohammed Nassef, respectively Attaché and Commercial Attaché—*personae non gratae* and ordered them to leave Britain within 72 hours.

Expulsions of British Oil Officials and Western Press Correspondents.

Prior to these developments, the Egyptian Government had expelled two British oil officials and several Western newspaper correspondents, as described below.

The British Embassy in Cairo lodged a strong protest with the Egyptian Government on Aug 11 over the deportation of two British oil company officials—Mr A. E Hawke, assistant engineer of the Anglo-Egyptian Oilfields (Shell) Company, and Mr H. L Peleuve, assistant manager for administration of the same company Mr Hawke and Mr Peleuve had been arrested and deported two days earlier "for reasons of public security"

Three Western newspaper correspondents in Cairo—Mr William Stevenson of the *Toronto Star*, Miss Ann Sharpley of the London *Evening Standard*, and Mrs. Eileen Travis, a U S citizen working for the London *Daily Mail*—were expelled from Egypt on Aug 27 at 24 hours' notice, no reason being given. Mr. Sefton Delmer, of the London *Daily Express*, had been expelled from Cairo some weeks previously

Mr Stevenson said in Rome on Aug 27 that he believed that he and Miss Sharpley had been expelled because they had discovered that a former leading Nazi propagandist, Dr. Johann von Leers, was working in Colonel Hatem's department, despite Egyptian efforts to hide his identity and his presence in Egypt Mr Stevenson added that he had had a personal interview with von Leers, who had told him that he spent 18 months in prison at the end of the war after capture by U.S troops, that he had subsequently fled to South America and worked for the Peronista regime in Argentina, and that he had been engaged as a propaganda expert by the Egyptians after Perón's fall from power. [Von Leers, a former professor of history at Jena, served in Goebbels' Propaganda Ministry as a "racial expert," specializing in anti-semitic propaganda.]

The 1,700-ton Egyptian destroyer *Al Quaher* (ex-H.M.S. *Myngs*) sailed from Portsmouth for Egypt on Aug. 24, while the second destroyer of the same class, *Al Fateh* (ex-H.M.S. *Zenith*), left Southampton on Aug. 30. Neither vessel carried any ammunition or torpedoes. An Admiralty spokesman pointed out that both ships had been sold to Egypt a long time ago, that they had been manned and commissioned by the Egyptian Navy, and that no restraint had been placed upon their departure.—(Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - Australian News and Information Bureau - New York Times) **(Prev. rep. Suez Crisis, 15049 A.)**

A. FRANCE. — M. Poujade fined for Tax-Resistance.

A Paris criminal court sentenced M. Pierre Poujade and six other Poujadist leaders on July 4 to pay fines of 200,000 francs (£200) each on charges of inciting people to refuse to pay taxes or to delay payment of taxes. When the proceedings started on June 11 M. Poujade had told the court that he had deliberately sought trial on the grounds that the present fiscal system was unfair to small tradesmen and artisans. (Le Monde) **(Prev. rep. Poujadists, 15036 B.)**

B. SOVIET UNION. — Ministerial Appointment.

It was announced in Moscow on Sept. 4 that M Lazar Kaganovich had been appointed Minister of the Building Materials Industry in succession to M. Pavel Yudin, who had died in April. M. Kaganovich (62), a First Deputy Premier, had recently resigned from the chairmanship of the State Committee on Labour and Wages.—(Times) **(Prev. rep. 14929 B.)**

A. UNITED KINGDOM. — Motor Industry. - Decline in Exports and Home Sales. - Short-time Working and Dismissals on Account of Redundancy. - Strikes at B.M.C. and Ford Factories.

The normal seasonal recession in the automobile industry during the winter and spring months of 1955-56 was aggravated by a severe decline in car exports, as well as by a large reduction in sales in the home market following the purchase tax increases introduced by the Chancellor of the Exchequer in his autumn Budget, and the "credit squeeze" and other anti-inflationary measures announced by Mr. Macmillan on Feb. 17. The recession was at first marked by extensive short-time working and a small amount of redundancy in the Coventry and Birmingham areas, the situation being made more difficult by the Standard Motor Company's decision to lay off about 2,640 workers during the re-tooling of its Coventry tractor factory, and by a subsequent announcement that the men could not be reinstated. Later, as the recession developed, large-scale dismissals at short notice took place at the factories of the British Motor Corporation, and were followed by calls for strike action to which about half of the Corporation's remaining employees responded. "Protective" notices given to its employees by a subsidiary of the Ford Motor Company making bodies for some B.M.C. models led to 12,000 workers at Dagenham ceasing work until the notices were withdrawn. A summary of these developments is given below under cross-headings.

The Early Stages of the Recession.

The first effect of the recession was experienced at the Longbridge (Birmingham) works of the Austin Motor Company (one of the components of the British Motor Corporation), where a four-day week was introduced for about 18,000 workers on Jan. 13 The Austin Company's action was followed on Feb 23 by the decision of the Rootes group to work a four-day week at its two Coventry factories, and by that of the Ariel Motor Cycle Company (Birmingham) to dismiss a fifth of its 600 workers. On Feb. 29—by which date about 20,000 vehicle workers in the Midlands were working short time—the Daimler Motor Company of Coventry announced that it proposed to place "several hundred" workers on a three-day week, while on March 1 the Standard Motor Company (also of Coventry) decided to cut production of its smaller models—those most affected by hire-purchase restrictions—by two-fifths, and to place a percentage of its workers on part-time On March 2 four-day working was also introduced for 400 workers at the Excelsior Motor Cycle Co (Birmingham).

Meanwhile the cuts in chassis production had been reflected in the output of firms making car bodies and components. Amongst body-building firms, short-time working was introduced on March 1 at the Birmingham works of Fisher and Ludlow Ltd. and at the Cowley (Oxford) works of the Pressed Steel Company, whilst on March 2, Mulliners Ltd. of Birmingham announced that 250 of its 800 workers would be discharged as redundant and the remainder placed on a short week. Short-time working was also introduced at the Birmingham works of Serck Radiators Ltd., though only 10 per cent of the employees were affected.

Mr. Macleod, the Minister of Labour, stated in a parliamentary reply on March 6 that, notwithstanding the increase in short-time working in the moter-vehicle and allied trades, few dismissals for redundancy had taken place in the Midlands. Apart from a few employees of a Coventry firm making motor accessories, the only workers in these trades registered as unemployed were 388 motor-cycle and cycle workers in the Birmingham area, a further 60 dismissals were expected at Coventry.

The gap between production and sales nevertheless continued to grow, and on March 7 the Rover Company announced that, owing to the number of unsold cars on hand, production at its Solihull (Birmingham) works would be cut by 25 per cent and the 12,000 workers placed on a four-day week. Short time was also introduced from March 10 at the Doncaster works of Briggs Motor Bodies Ltd (a subsidiary of the Ford Motor Company), the assembly of Ford "Popular" cars being cut from 750 a week to 600 Among firms making components, short-time was introduced on March 7 at the Darlaston (Staffs.) works of Rubery, Owen and Company, Ltd (making wheels) and on March 10 at the Leamington works of the Lockheed Hydraulic Brake Co Ltd. and at the Fort Dunlop (Birmingham) works of the Dunlop Rubber Company Ltd. Ministry of Labour figures for the Midland region, published on March 20, showed that 23,603 workers were under-employed in the motor-vehicle industry and 3,317 in the motor-cycle and cycle industries

The normal springtime improvement in demand, especially for smaller cars, led to a subsequent reduction in under-employment in industries in the Midlands, and on April 6 it was stated that 7,000-8,000 fewer workers were on short-time than in mid-March. The improvement was most noticeable at Coventry, where Rootes Motors (which at one time had had 12,000 employees on a four-day week) were again in full production, whilst the Standard Company, which had anticipated that 1,250 of its 11,600 employees would be on short time, had actually only 300 affected No change was reported at the Austin and Rover factories at Birmingham, the Daimler works at Coventry, or the Briggs (Ford) works at Doncaster, and on April 16 production of car bodies at Doncaster was again cut and 200 men discharged. Nevertheless, on April 19 Mr. Macleod estimated the number affected by short-time working in the vehicle and allied trades in the week ended April 14 as 27,000 (including 12,000 in Birmingham), or 11,000 fewer than in the preceding week.

Attitude of the Trade Unions.

Following the Austin Company's announcement of its intention to introduce short-time working, a meeting at Birmingham on Jan. 14 of shop stewards from B.M.C. factories called for (1) a ban on overtime working at all the Corporation's factories until full-time working was resumed at Austin's; (2) the removal of the embargo on trade with China; (3) the lifting of Budget restrictions on hire purchase, and a reduction of car purchase tax; (4) a shorter working week for the same money, and full discussion of means of sharing out the work available.

The Government's "disastrous economic policy" was strongly criticized by the National Union of Vehicle Builders, which, at a meeting of the West Regional Council of the Labour Party at Birmingham on March 2, submitted a resolution calling for its reversal. The resolution was adopted unanimously after Mr Gaitskell (Leader of the Parliamentary Labour Party) had declared that redundancy and short-time working were "bound to happen if attempts are made to counter inflation, not by direct action, but by cutting down demand all over the place" On March 10 N.U.V.B. delegates meeting in Birmingham adopted a resolution calling on the Government to give 'maximum emphasis" to the building-up of an export drive, and to ease hire-purchase and credit restrictions in the meantime.

Redundancy at Standard Tractor Works.

Meanwhile, the managing director of the Standard Motor Co. (which, in addition to producing cars, makes tractors for the Massey-Harris-Ferguson organization) had announced that about 2,600 workers would be laid off in the summer months while the tractor factory was being re-tooled at a cost of £4,000,000 to enable it to produce heavier tractors. About 1,500 men would be laid off in May and the remainder in June, but it was hoped to be able to re-absorb them as soon as the new plant and equipment came into use.

An attempt on March 5 to bring about a strike of Standard workers in protest against the company's refusal to discuss the redundancy question was at first unsuccessful, but on April 26, after the management had declined to negotiate with the unions on the question of introducing short-time working as an alternative to redundancy, 11,000 Standard workers stopped work. The strike was called off on May 16 to allow negotiations to take place, and on May 24 the company announced that 1,000 of the displaced men would be transferred to the car factory and that they would consider proposals for retaining a further 1,000 men.

In a further announcement on May 30, the company stated, however, that owing to production problems it had proved impossible to transfer as many of the redundant tractor men to car manufacture as had been intended, and that the 2,600 workers earmarked for temporary lay-off would be dismissed permanently. It was explained that the original hope of increasing car production had proved illusory and that, in the event, production had actually fallen since February by 600 cars weekly. The company was prepared to meet the situation by working a four-day week on some car work, and, of the 3,840 men who would be affected by the change-over in the tractor factory, 1,200 would be transferred to car production. Of the remaining 2,640, half would receive notices immediately and the other half within three weeks. A tax-free payment of £15 would be made to every employee who continued to work until his notice had expired

This second announcement was followed on May 31 by a decision of shop stewards at the Standard works to recommend the members of their unions to ask their national officials to call a strike. The strike call, however, received little support from the rank-and-file, and on June 4 the shop stewards decided to await guidance from their official leaders On June 6 a meeting of the leaders of the nine unions principally concerned, held at York under the chairmanship of Mr. H G. Brotherton (president of the Amalgamated Engineering Union), decided to ask the Minister of Labour to convene immediately a meeting between Standard representatives and themselves, with a view to finding means of avoiding the prospective dismissals at the Standard factory

A meeting between Mr Macleod and the union leaders took place on June 3, the latter stressing their opinion that the Standard Company were being "unduly pessimistic" about the industry's prospects, and that the dismissals could be avoided by further short-time working Mr. Macleod, however, emphasized that the Government considered that it was for manufacturers themselves to decide whether the demand for their products justified the retention of all their employees, and refused to press the Standard Company to change its mind regarding the dismissals At a further meeting on June 15, Mr Macleod informed union leaders that the Standard Company had told him that it would be impossible to reduce working hours further without lowering organizational efficiency and the quality of the company's products. It had expressed the opinion that no useful purpose would be served by a meeting with the unions under Ministry auspices, but had agreed to meet union executives if the latter desired it.

Discussions accordingly took place on June 19 between the union executives and the Standard company, at which the former asked the company to consider the possibility of avoiding redundancy by introducing a 3-day week, giving a warning that if this request was refused there was "every likelihood of an official dispute at the Standard works." The company, however, absolutely declined to introduce further short-time working or to arrange to share out the available work in its Coventry factories, although it agreed (*a*) to investigate the possibility of absorbing about 250 of the redundant workers in other departments, (*b*) to give priority to the dismissed men when labour was engaged for the reorganized tractor works

After further discussions with union officials, the Standard management announced on June 26 that, "in order to give both sides an opportunity of examining the matter further," production of existing-type tractors would be continued for another 7-10 days, and dismissal of the second batch of redundant men (due to leave on June 28) delayed for a similar period On the following day, however, the company notified the Confederation of Shipbuilding and Engineering Unions (with whom it had meanwhile agreed to re-examine the possibility of working a 3-day week) that in view of the threat of strike action—which, it alleged, had been made by the unions—it had decided to break off negotiations The statement said "The board is forced to the conclusion that it is put under duress by threats of strike action. Negotiation under duress is quite impossible . The offer to re-examine the possibility of a further extension of short-time working is withdrawn This does not alter the decision to extend notices of dismissal"

On June 1 the New Zealand Minister of Railways (Mr McAlpine) had announced that his department would offer permanent employment to "certain categories of workers among the 2,640 being laid off by the Standard Motor Company" He added that only those who could pay their way to New Zealand would be "well advised to take up the offer immediately," although the question of assisted passages for single young men and women would be considered

The Strike at British Motor Corporation Factories.

The most serious strikes in the industry broke out in July at factories operated by the British Motor Corporation, following the dismissal on account of redundancy of about 6,000 workers, chiefly at the Austin works at Birmingham, the Morris works at Cowley, and components factories at Birmingham, Oxford, and Llanelly. The dismissal notices, which were accompanied by one week's wages in lieu of notice, had been preceded by short-time working at several B.M.C. factories, but came as a complete surprise to the workers concerned, as well as to shop stewards and local trade union officials.

In an explanatory statement issued on the same day, the Corporation recalled that the expansion programme planned in 1954 envisaged a production rate in 1956 of 12,500 units weekly, there being every indication at that time that world markets could be expected to absorb this production During the present trading year the number of vehicles sold abroad and their currency earnings had been higher than for the same period of the previous year, whilst B M C. sales at home had risen from 35 2 per cent to 40 7 per cent of the total home sales of the six largest British producers of cars. It had now become clear, however, that anti-inflationary policies abroad were beginning to take effect, whilst at home increased purchase tax, new hire-purchase restrictions, and heavier costs of coal, gas, power, and wages had raised the cost of vehicle manufacture and resulted in a fall in demand. Although many other car manufacturers had raised prices in October, 1955, B M C had postponed similar action and had resisted the inflationary pressure for several months, but it had eventually been forced by the increase in engineering wages in March, 1956, to raise the prices of its vehicles by 7½ per cent—the first increase since 1952 Meanwhile, other factors had affected expansion abroad, e g retail sales had fallen in Australia—for many years the Corporation's biggest export market—owing to increased sales tax and cuts in import licences, while New Zealand, another important market, had cut import licences by one-third in December last

The approximate number of workers employed and the number to be dismissed at B M.C factories were given as follows

Factory	Town	Labour force	No dismissed
Austin Motor Company	Birmingham	20,000	3,000
Morris Motors	Cowley	7,000	800
Morris Radiators ..	Oxford	1,500	180
Nuffield Metal Products	Birmingham	4,000	700
Fisher and Ludlow	Birmingham	4,000	600
S U. Carburettors	Birmingham	1,200	90
Nuffield Metal Products	Llanelly	1,000	100
Tractors and Transmissions	Birmingham	4,000	430
		42,700	5,900

Strong criticism of the "profoundly disturbing" course pursued by the B.M.C in announcing the dismissals at such short notice was expressed by Mr Macleod in the House of Commons on June 28. The Minister added that it would not be possible for all the dismissed men to find employment in their own localities, and that at his request the Ministers of Transport and of Fuel and Power had asked the British Transport Commission and the National Coal Board to accelerate their rate of labour intake so as to help men find jobs. The N C.B. had agreed to send a special recruiting team to the Birmingham area for this purpose.

The sudden announcement of the dismissals without prior consultation with the shop stewards caused strong resentment among many B M C workers, and on June 28 1,000 night-shift men ceased work at the Birmingham works of Nuffield Metal Products Ltd.—the B M C company where the percentage of dismissals to the total labour force was highest On the same day strike action was threatened at the Austin Longbridge works and the Oxford works of Morris Motors and Morris Radiators, but this was for the moment averted and on July 4 trade union leaders met B M.C. representatives to discuss the situation caused by the dismissals. This meeting, however, proved fruitless, the B M C stating that there was no possibility of re-employing the discharged men in the immediate future and rejecting, 'because of the national issues involved," the union's suggestion that they should be paid compensation Further attempts to call a strike at Longbridge failed, but after the Corporation had issued a statement on July 7 repeating its refusal to reinstate the men or to pay them compensation, a meeting of union leaders in London on July 9 unanimously resolved to recommend strike action at all B M C factories on July 23, unless the Corporation had meanwhile agreed to union demands. This recommendation was endorsed on July 10 by the executive of the Amalgamated Engineering Union, to which a large percentage of automobile workers belong On the same day, however, the B M C issued a statement condemning the threatened strike as an attempt by the unions to force it to negotiate under duress, and warning them that it was not prepared to do so under any circumstances.

A meeting of leaders of the 15 trade unions having members at B M C. factories decided on July 14 to ask the Minister of Labour to convene an immediate meeting of the parties to the dispute Separate talks accordingly took place at the Ministry of Labour on July 16 between Sir Wilfrid Neden, the Ministry's Chief Industrial Commissioner, and representatives of the B M C. and the Engineering Employers' Federation, and between Sir Wilfrid and trade union leaders, but were unsuccessful A subsequent Ministry statement explained that the union leaders had been unable to agree to the employers' demands (1) that the strike should be called off to enable the dismissals to be discussed at local levels, (2) that the question of compensation, as apart from the dismissals themselves, should be negotiated between the unions and the Engineering Employers' Federation, and not by the unions direct with the British Motor Corporation.

Pre-strike ballots held by the unions at B.M C. factories indicated very considerable opposition to the strike, and at some factories a majority of employees voted against it In the event, the immediate response to the strike call was very partial, B M.C. figures published on July 23 (the first day of the stoppage) showed that, of a total day labour force of 43,444 at the Corporation's 12 factories, 23,245 workers (53 5 per cent) had reported for work, the percentages at work in individual factories ranging from only 10 per cent at the Fisher and Ludlow Birmingham works, 12 per cent at Morris Car Bodies, Coventry, and 16 per cent at Nuffield Metal Products, Birmingham, to 78.9 per cent at the Austin Works at Longbridge, 85 per cent at Morris Motors at Cowley, 90 per cent at Morris Radiators at Oxford, and 100 per cent at the M G. works at Abingdon Figures for the subsequent night shift, however, were less favourable to the Corporation, less than one-third of the 3,600 night-shift workers reporting for duty

Meanwhile the Transport and General Workers' Union, in an effort to bring about a complete stoppage of work at B.M.C. factories, had instructed its lorry-driver and docker members not to handle the Corporation's products, its busmen members not to carry B M.C. employees to and from work, and its building-trade members not to work on B M C contracts This action was followed on July 24 by instructions by the Amalgamated Engineering Union to its members to declare "black" (i e untouchable) all car accessories made by outside firms for the B M C. At the same time more vigorous picketing at factory gates (accompanied by minor clashes with "loyal" workers) resulted in a slight decline in the numbers reporting for duty, but figures published by the Corporation at the close of the day showed that 53 per cent of its employees were still at work, the situation remaining much the same on July 25. On the latter date, however, Mr. Macleod appealed to both sides in the dispute to use the breathing-space afforded by the annual fortnight's holiday (due to begin at all B.M.C factories on July 26) to try to find a solution of their differences The Engineering Employers' Federation thereupon indicated its willingness to discuss with the unions all problems arising out of redundancy, including compensation.

At Mr. Macleod's invitation, informal discussions between the two sides began at the Ministry under Sir Wilfrid Neden's chairmanship on Aug 1, the issue being narrowed to the question of compensation for the dismissed workers. The resumed talks on Aug 9 resulted in agreement being reached on the following basis: (1) subject to local negotiations, compensation would be paid to dismissed men who had been employed by the Corporation for three years or more, (2) compensation would be at the rate of one week's pay for men with service of from 3-10 years and two weeks' pay for 10 years and upwards; (3) local joint inquiries would be held to see whether any of the dismissed men could be found work at B M C factories, (4) in any future cases of redundancy there would be appropriate consultations between the management and the unions. The strike was accordingly called off immediately, and work was resumed when the holidays ended on Aug 13 It was unofficially estimated that about 2,000 of the 6,000 redundant men would qualify for compensation, and that nearly all those dismissed from the B.M.C.'s factories had found other jobs.

The Stoppage at Briggs Motor Bodies Factory (Dagenham).

As a result of the strike at B.M.C. factories, "protective" notices of dismissal were issued on July 23 to over 2,000 employees at the Dagenham works of Briggs Motor Bodies Ltd., a Ford subsidiary (see above).

The company explained that because of "the strike action which has now involved one of our suppliers in the B M C. group," production of some Ford models was likely to be 'seriously affected," and that although every effort would be made to maintain production up to the annual holiday, it might be necessary to lay off many Briggs employees if a settlement of the B M C dispute was not speedily reached. The company's refusal to withdraw the notices was followed on July 25 (the eve of the firm's annual holiday) by an unofficial stoppage of about 12,000 workers. On July 29, however, the Briggs management announced that the notices would be withdrawn in view of Mr. Macleod's appeal of July 25 (see above), and in order to "help towards a better atmosphere" Talks thereupon took place between the management and union representatives, and although it was announced on July 30 that they had broken down, fresh negotiations resulted in a settlement of all the points at issue Full working was resumed at Dagenham when the holiday period ended on August 13

Redundancy Dismissals at Vauxhall Motors Ltd.

Vauxhall Motors Ltd. (Luton) announced on July 31 that 520 production workers who had been with the firm less than six months would be dismissed during August on redundancy grounds. The first batch of 200 would be given notice on Aug. 9 and leave on Aug. 16, but would be paid until Aug. 23, while a further 320 notices would be issued on Aug. 16. The firm's announcement said that the possibility of working short-time as an alternative to the dismissals had been discussed, but had been found impracticable as the proposed reduction in output did not affect all models equally. The agreed procedure, which had been drawn up in consultation with the trade unions, would be based, broadly speaking, on the principle of "last in, first out."

Three-day Week at Standard Motor Company.

The Standard Motor Company announced on Aug. 23 that a three-day working week would be introduced throughout its car-making division, and that, in addition, 1,000 employees would be dismissed from Aug. 31. The situation had been discussed with local union officials and senior shop stewards, who were "fully acquainted with the necessity of reducing manpower," as a result of the company's decision that production must be cut in view of the decline in sales. All employees affected would receive *ex-gratia* payments of one week's basic wage. It was stated in the Press that the proposed dismissals would reduce the Standard Company's labour force to about 8,000, the lowest figure since the war.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14698 A.)**

A. SOVIET UNION. — Minimum Wage Law.

A minimum wage law, the first of its kind introduced in the U.S.S.R., was published on Sept. 9 after approval by the Council of Ministers and the Central Committee of the Soviet Communist Party. It provided for (*a*) a minimum wage of 300 to 350 roubles (nominally £27-31) a month for workers in industry, construction, transport, and communications; (*b*) a minimum wage for all other workers, including unskilled workers, of 300 roubles a month in towns and of 270 roubles a month in rural areas. The law also provided that no income-tax would be levied on workers or students whose wages or grants were less than 370 roubles a month. It was estimated that the legislation (which comes into force on Jan. 1, 1957) would raise the wages of the lowest-paid workers by one-third. (Soviet Weekly) **(Prev. rep. 15032 A.)**

B. NEW ZEALAND. — Adherence to International Wheat Agreement.

The N.Z. Minister for Industries and Commerce (Mr. Halstead) announced on Sept 11 that New Zealand had decided to join the new International Wheat Agreement which came into force on Aug. 1. Of the total guaranteed quantity of wheat covered by the agreement (8,244,000 metric tons), New Zealand's guaranteed purchases would be 160,000 metric tons. (New Zealand Government Office, London)

(Prev. rep. Wheat Agreement, 14889 B.)

C. BRAZIL. — France joins Multilateral System.

By an agreement signed in Rio de Janeiro on Aug. 23, and coming into force immediately, France joined the system of multilateral trade and payments (the so-called "Hague club") between Brazil on the one hand and the United Kingdom, Western Germany, Italy, Austria, the Netherlands, and the Belgo-Luxemburg Economic Union on the other. (Board of Trade Journal) **(Prev. rep. 15007 A.)**

D. WESTERN GERMANY. — Ban on Communist Party. - Ruling of Federal Constitutional Court.

The Federal Constitutional Court at Karlsruhe ruled on Aug. 17 that the West German Communist Party was unconstitutional, and ordered its dissolution. At the same time it ordered the confiscation of the party's assets and forbade the party to continue its activities in any form, either through existing organizations under Communist control—e.g. youth movements—or through new ones which might be formed for that purpose.

Applications for the banning of the Communist Party and the neo-nazi Socialist Reich Party had been made to the Constitutional Court by the Federal Government in November 1951, on the ground that both parties aimed at the overthrow of the democratic order and the imposition of a totalitarian régime. The applications were made under Article 21 of the Basic Law of the Federal Republic, which lays down (*a*) that "parties which, according to the aims and the behaviour of their members, seek to impair or abolish the free and democratic basic order, or to jeopardize the existence of the Federal Republic, shall be declared unconstitutional"; (*b*) that the question of constitutionality should be decided by the Federal Constitutional Court The Socialist Reich Party had been declared unconstitutional and banned in October 1952 (see 12697 A), whilst the case of the Communist Party had been before the Court for five years until the final ruling was given on August 17.

In giving the Court's judgment—which ran to 420 pages—the president of the Constitutional Court, Dr. Wintrich, said that the Communist Party's aim was "the setting-up of a Socialist-Communist social order by means of proletarian revolution and dictatorship of the proletariat"—an aim which was in clear contradiction to Article 21 of the Basic Law, and which, if carried out, would make it impossible to uphold the fundamental democratic principles of the Basic Law in a State based upon a proletarian dictatorship.

The Federal Minister of the Interior (Dr Schroder) said that there would be no "witch-hunt" as a result of the Court's judgment, and that any individual prosecutions would be confined to what was necessary to fight Communism in the Federal Republic. He pointed out that the West German Communist Party had only some 70,000 members and 13 daily newspapers with a total circulation of 48,000, together with four weeklies.

Communist Party offices were entered and closed down by the police in Dusseldorf, Munich, Nuremberg, Dortmund, Karlsruhe, and a number of other cities after the Constitutional Court's judgment had been made known. Few documents were found, however, as many of the offices had been vacated beforehand, apparently in anticipation of the party's outlawry. A number of individual Communists were arrested in different parts of the Federal Republic, but nearly all were released within a few hours The leader of the party (Herr Max Reimann), for whose arrest a warrant had been issued in August 1952, had been living for some time in Eastern Germany, together with other leading West German Communists.

At the last Federal elections (1953) the Communist Party polled only 611,000 votes and failed to return any members to the *Bundestag*, whereas in the previous (1949) elections it had polled 1,360,000 votes and returned 14 deputies At the time of its dissolution the party was represented in only two of the *Land* Parliaments—in Bremen (four members) and Lower Saxony (two members).

The outlawing of the West German Communist Party was bitterly attacked by the press and radio in Eastern Germany, and was also denounced in a resolution of the Soviet Communist Party. A Federal Government spokesman described Soviet protests as "gross interference in internal German affairs" and said that the Soviet Communist Party would have been better advised to study the consequences of the "Stalin cult," the achievements of which had included "the creation of a colonial system in the Soviet zone of Germany." (Frankfurter Allgemeine Zeitung - Times - Daily Telegraph)

(Prev. rep. 12697 A.)

E. INDIA. — First Atomic Reactor in Operation.

Dr. Bhabha, chairman of the Indian Atomic Energy Commission, announced on Aug. 4 that India's first atomic reactor at Trombay (near Bombay) had gone into operation on the same day. The reactor, which is of the "swimming pool" type, had been built entirely by Indian scientists and engineers within one year. Dr. Bhabha also announced that the facilities of the reactor—the first to go into operation in Asia—would be made available to scientists of countries "in this region and beyond." Mr. Nehru stated on Aug. 24 that the fuel elements used in the new reactor had been obtained on hire from the U.K. Atomic Energy Authority. (The Hindu, Madras)

(Prev. rep. 14360 A, page 14363; 14711 B.)

A. EASTERN GERMANY - SOVIET UNION. — East German Ministerial Visit to Moscow. - Agreement on Halving of East German Support Costs for Soviet Troops. - Further Soviet Economic Aid to Eastern Germany. - Aid for Construction of Atomic Power Station.

An East German delegation led by Herr Grotewohl, the Prime Minister, visited Moscow on July 16-17 for discussions with the Soviet Government. The delegation also included Herr Walter Ulbricht (First Secretary of the Central Committee of the Socialist Unity Party, and First Deputy Premier); Herr Selbmann (Deputy Premier and head of the Industry and Transport Commission); Herr Nuschke (Deputy Premier); Herr Loch (Deputy Premier); Herr Scholz (Deputy Premier and head of the Agriculture Commission); and Herr Lothar Bolz (Deputy Premier and Foreign Minister). Soviet leaders taking part in the negotiations included Marshal Bulganin, M. Khrushchev, M. Molotov, M. Pervukhin, M. Malenkov, Marshal Zhukov, and M. Shepilov.

A joint communiqué was issued on July 17 announcing that the Soviet Union had agreed to halve the East German contribution towards the cost of Soviet troops stationed in Eastern Germany; that further Soviet aid for the economic development of the German Democratic Republic would also be forthcoming; that the Soviet Union would assist Eastern Germany in setting up a large atomic power station under an agreement signed between the two countries; and that cultural, technical, and scientific co-operation would be intensified. The communiqué also denounced the introduction of military conscription in Western Germany and appealed to Britain, France, and the U.S.A. to reduce their forces in Germany on the lines of the recent reduction in the Soviet forces.

The principal sections of the communiqué were as follows (cross-headings inserted):

Soviet-East German Relations. "It was unanimously noted that all-round friendly relations were successfully developing on the basis of the Agreement on relations between the Soviet Union and the German Democratic Republic signed on Sept. 20, 1955, and on the principles of equality, mutual respect for sovereignty, and non-interference in internal affairs."

Reduction of German Support Costs. "Guided by the desire to collaborate towards the further development of the national economy of the German Democratic Republic, and to raise the material well-being of its population, the Governments of the Soviet Union and the German Democratic Republic have agreed as from Jan 1, 1957, to reduce the German financial contribution levied under the said agreement for the maintenance of Soviet troops in Germany from 1,600,000,000 [East German] marks to 800,000,000 marks annually. The halving of the German contribution toward the cost of maintaining Soviet troops is connected with the considerable reduction in Soviet military forces, which includes the reduction in the number of Soviet troops stationed in Germany . . ."

Soviet Economic Aid and Co-operation. Both Governments reaffirmed their "agreement on the considerable increase of mutual supplies during 1956, over and above those called for in the existing trade agreement, and including a Soviet grant of foreign currency to the German Democratic Republic for purchases of essential goods on the open world market." They also reaffirmed "the agreement on the grant of Soviet long-term credits to the German Democratic Republic on favourable terms."

The communiqué added: "Both sides agreed to take measures to ensure the fuller and more rational utilization of the industrial potential of the German Democratic Republic, and to increase mutual deliveries of machinery and equipment suited to modern technologies, and of other products and materials. As the outcome of the discussions on economic measures, the German Democratic Republic will receive during 1957-1960 large additional resources for the development of her national economy . . ."

Scientific, Technical and Cultural Co-operation. "The agreement signed in April, 1956, on cultural and scientific co-operation between the two countries has led to fuller mutual use of cultural and scientific achievements and modern technology. It was considered desirable . . . to extend contacts between Soviet and German scientific establishments and scientists and technologists, to exchange scientific-technical information and students, and to take other measures leading to the development of scientific and technological progress in both countries."

Soviet Aid for East German Atomic Power Station. "It was agreed to set up in the German Democratic Republic an atomic power station of 100,000 kilowatts capacity The Soviet Union will render aid by preparing the blueprints of the station and supplying the German Democratic Republic with the necessary equipment and material. An agreement concerning this was signed by both Governments simultaneously with the signing of the present statement."

Disarmament. "Both parties are unanimous in their view that the recent relaxation in international tension creates favourable conditions for reaching agreement . . . between the great Powers on disarmament and the adoption of effective measures for all-European security . . They consider that the attempts of certain Powers to make disarmament dependent on certain conditions can only prevent the solution of the disarmament problem and the settlement of other political problems."

West German Rearmament. "The initiative recently taken by the German Democratic Republic in reducing the size of its Army, and its proposal to limit the sizes of armed forces both in West and East Germany and to ban the stockpiling of atomic weapons on German territory . . . create real possibilities for mutual understanding between the German Democratic Republic and the German Federal Republic on issues vital to the German people.

"The Governments of the Soviet Union and the German Democratic Republic point out that the introduction of compulsory military service in Western Germany, contrary to the wishes of the German people, creates serious difficulties in the way of settling the national problems of the German people, and prevents the improvement of the political situation in Germany and in Europe as a whole. The responsibility for this state of affairs is borne by the present Government of the German Federal Republic."

Appeal for Reduction of Western Forces in Germany. "Taking into consideration that the Soviet Union, during recent months, has reduced the number of its troops in Eastern Germany by more than 50,000 men, the Soviet Union and the German Democratic Republic appeal to the United States, Great Britain, and France to reduce in their turn the number of their own troops stationed on the territory of the German Federal Republic, with a view to ultimately recalling all foreign troops from German territory. The Governments of the Soviet Union and the German Democratic Republic are convinced that now, 11 years after the end of the war, when the existence of two sovereign German States is widely recognized internationally, the presence of foreign troops on German territory cannot be considered as normal."

German Reunification. "The Government of the German Democratic Republic stated that . . . its activities were devoted to the re-establishment of the national unity of Germany as a free, peace-loving, and democratic State The Soviet Government extends full sympathy and understanding to this aim, which expresses the just national aspirations of the German people. Adhering to the Leninist principle of the right of nations to self-determination, the Soviet Government considers that the restoration of German unity is the affair of the German people themselves. Both sides expressed complete unanimity that under existing circumstances there is only one way to unite Germany, namely, by discussion and agreement between the Governments of both German States—the German Democratic Republic and the German Federal Republic."

Marshal Gretshko, C.-in-C. of the Soviet Forces in Eastern Germany, had announced on June 14 that, in addition to the 20,000 men withdrawn in 1955, another 33,500 men, including three air divisions, were also being withdrawn.

Herr Walter Ulbricht, addressing the Central Committee of the Socialist Unity Party during its meeting from July 27-29, gave further details of Soviet aid to Eastern Germany, and of plans for the economic development of the German Democratic Republic as a result of Soviet economic assistance.

Soviet Aid. Herr Ulbricht stated that the additional aid from the Soviet Union under the latest Moscow agreements, to help the development of the East German economy, would amount to 7,500,000,000 roubles in the next four years. It would be supplementary to the ordinary trade between the two countries and to long-term credits previously granted by the U S.S R, and would be provided in the following ways:

(1) The Soviet Union and other "People's Democracies" would supply Eastern Germany with foodstuffs to create the necessary reserves for the complete abolition of food rationing in 1957 [see below]

(2) Orders from the U S.S R. and the "People's Democracies" would ensure the use of East German factories to full capacity, machinery production would thus have to be brought up quickly to world standards, involving the introduction of modern technology. A small number of nationally-owned and private factories would have to convert to new lines of production as soon as possible to meet the new market requirements.

(3) Regular supplies of raw materials would be ensured by the agreements with the Soviet Union and by other arrangements with the "People's Democracies," although there would have to be still greater efforts on the part of the German Democratic Republic to utilize its own raw material resources and to practice the greatest economy in the use of materials.

(4) The scientific and technical co-operation with the Soviet Union would be an important help in reaching world levels in technology, and the Soviet-German agreement on the building of an atomic power station would lead to great technical progress.

(5) In the financial sphere (*a*) there would be the halving of the East German contribution to the costs of the Soviet forces in Eastern Germany; (*b*) higher prices had been agreed upon for Soviet purchases of uranium and other ores mined in Eastern Germany by the joint Soviet-German "Wismot" undertaking, and (*c*) the U S S.R. was extending to Eastern Germany a 10-year credit for the supply of goods at two per cent interest.

Food Rationing. Herr Ulbricht said that the Politburo believed that it should be possible to abolish food rationing completely in Eastern Germany during 1957. The basis for this would be provided by measures to increase agricultural production and by imports from the Soviet Union and some of the "People's Democracies." [Meat, fats, and sugar are still rationed in Eastern Germany.]

Pensions. A special commission would be appointed to overhaul the pension system, and it was hoped to put a new old-age pensions scheme into effect during 1957. It would be applicable to men of 65 and over and women of 60 and over, and based on average earnings in the last five years of employment, with a minimum of 50 per cent of such earnings payable as pensions.

Working Week. Herr Ulbricht also announced that it was planned to reduce the present 48-hour week to 45 hours in 1957, without affecting wages. The shorter working week would begin in the mining industry, to be followed by the iron and steel and metallurgical industries, chemical factories, power plants, etc It was further planned to reduce the working week to 42 hours generally, and to 40 hours in certain branches of industry, during 1958-60.

Release of Political Prisoners. Herr Ulbricht reiterated earlier announcements according to which 691 former or present Social Democrats who had been sentenced for "anti-State activities" had been released About 15,000 persons sentenced to imprisonment for crimes or offences had been amnestied and similarly released; 3,308 alleged war criminals had been liberated, and only 11 war criminals guilty of particularly serious crimes against humanity were still under detention A number of people sentenced by "other State organs" had also been rehabilitated.

Aim of Five-Year Plan. Herr Ulbricht stressed that the next Five-Year Plan had as its aim that by 1960 the German Democratic Republic should overtake the German Federal Republic in reaching world standards of science and technology, and in providing higher standards of living for the workers.

The Central Committee decided at this meeting, in accordance with the recommendations of a special commission, to rehabilitate a number of leading members of the Socialist Unity Party who had been "disciplined" in the past. They included the following persons:

(*a*) Franz Dahlem, a former East German Minister and a leading Communist, who had been removed from the Politburo and punished in 1953 for "political blindness",

(*b*) Anton Ackerman, Hans Jendretzky, and Elli Schmidt, who had all been removed from high party posts in 1953,

(*c*) Paul Merker, another former Communist leader, the accusations against whom were stated to be only of a political nature and not to have justified criminal proceedings

The Central Committee also passed a resolution regretting and cancelling all "false accusations" formerly made against the Yugoslav Communists, and expressing the wish for friendly relations with the Yugoslav Communist Party.

The report of another special commission appointed by the Central Committee to investigate judicial organs and procedures had been published on June 21. It contained severe strictures on Dr. Hilde Benjamin, the Minister of Justice, and Dr. Melsheimer, the Chief Public Prosecutor.

The report accused both Dr Benjamin and Dr. Melsheimer of failing to control their departments and of so reducing the rights of legal defence that many innocent persons had been punished along with the guilty. They were also accused of having misled judges and prosecutors, paralysed their "creative initiative," and betrayed the principle of "Socialist legality"

In addition, the report accused Herr Wollweber (the Minister for State Security) of making unsubstantiated charges against unsuccessful or inefficient scientists and technicians, of unjustified detention, especially of critics of the regimes and of infringement of the rights of accused persons Measures were proposed to protect accused persons in future and to improve the judicial system

The French, British, and U.S. Ambassadors in Germany protested on May 16 to M. Pushkin, the Soviet Ambassador, against a parade of East German troops in East Berlin during the May Day celebrations. The protest said that such demonstrations of German armed forces in Berlin constituted "a threat to the security of the city," and were "incompatible with its special status" and "contrary to the wish expressed by our Governments of bringing about a relaxation of tension." (Neues Deutschland, East Berlin - Times - Le Monde, Paris)

(Prev. rep. 14880 A.)

A. UNITED KINGDOM. — Winding-up of East Coast and Lynmouth Flood Disaster Funds.

The Chancellor of the Exchequer announced on July 3 that all claims on the Lord Mayor's National Flood and Tempest Disaster Fund (raised after the East Coast floods of 1953) had been met, and that the total sum disbursed by the Fund was £7,270,000, of which the Government had subscribed £2,105,000.

On Aug. 17 it was announced that the contributions to the North Devon and West Somerset Relief Fund (set up after the Lynmouth flood disaster of 1952) had totalled £1,336,425, all of which had been disbursed among 1,710 people who suffered from the floods. The Fund would accordingly close down, a trust fund of £34,000 being established for the families and dependants of the 34 people who lost their lives in the disaster.—(Times - Daily Telegraph) **(13697 B; 13637 A.)**

B. NORTHERN IRELAND. — Facilities for Capital Issues. - Extension of Capital Grants for Industry Scheme. - Power Development Plans. - Projected Atomic Station.

The U.K. Chancellor of the Exchequer, Mr. Macmillan, stated in a parliamentary reply on Aug. 1 that he had written to Lord Kennet, chairman of the Capital Issues Committee, promising Treasury consent for capital issues for investment in Northern Ireland.

The Chancellor's letter said "I have lately been considering the need for more capital investment in N. Ireland There, in contrast to the rest of the U K., are unused resources which might be developed for the benefit of our economy as a whole. I am therefore writing to let you know that the Treasury will be ready in principle to consent to proposals to raise money exclusively for investment in Northern Ireland, provided that the proposals are otherwise acceptable to the Capital Issues Committee and that the raising of such money does not allow the applicants' existing resources to be used for a purpose for which the Committee would not recommend consent"

The *Board of Trade Journal* started on July 7 that the N.I. Government would extend its Capital Grants to Industry Scheme (providing a 25 per cent grant towards investment in new industrial buildings, plant and machinery installed in Northern Ireland) beyond Dec. 31, 1956, when it was due to expire. New large-scale projects were to be assisted under the wider powers of the Industries Development Acts, which enabled the Government to assist an industrial enterprise by means of a grant or loan or by provision of a special basic service. [Between 1945 and June 1956, 114 firms had set up new industrial plants in Northern Ireland and 70 more had expanded their activities.]

The N.I. Government's plans to meet future demands for electric power, providing for an increase in output from 360,000 kw. in 1956 to about 1,000,000 kw. in 1969, were published in Belfast as a White Paper on July 7.

The White Paper stated that generating capacity at the existing station in Belfast would be expanded by 180,000 kw. by 1959, a new station of at least 60,000 kw. would be set up at Derry between 1959 and 1962; and the capacity of the existing station near Larne would be increased by 30,000 kw. during the same period.

A major atomic power station (on a site still to be chosen) would come into operation probably in 1963-64, with an initial output of 200,000 kw., which would increase by 100,000 kw. in each of the two following years The cost of this project was estimated at £66,000,000, and of the whole of the main electrical power development programme at £80,000,000, up to 1968-69.

The Northern Ireland Development Council announced on July 7 that Chemstrand Ltd. (a subsidiary of the American Viscose Corporation and the Monsanto Chemical Company) had reached an agreement with the N.I. Government to build a £3,500,000 plant at Coleraine to manufacture 'Acrilan' acrylic fibre, for use in clothing and other textiles. Production was expected to start in January 1959.—(Treasury Press Office - Board of Trade Journal - Times - Belfast Telegraph)

(Prev. rep. N. I. Development Council, 14622 A.)

C. INTERNATIONAL COURT OF JUSTICE. — Decision on Oral Hearings of Petitioners by U.N. Committee on South-West Africa.

The International Court of Justice gave its advisory opinion on June 1 in response to a request from the tenth session of the U.N. General Assembly, which had asked the Court whether it was admissible for the U.N. Committee on South-West Africa to grant oral hearings to petitioners on matters relating to the territory.

In an earlier advisory opinion, given in 1950 (see 10840 A), the Court had found that the Union of South Africa—which took over the administration of South-West Africa under a League of Nations mandate after World War I, and incorporated the territory as a province of the Union after World War II—continued to have international obligations under the former mandate, including the obligation to transmit petitions from the territory to the United Nations The question later arose whether the U N. Committee on South-West Africa was entitled to receive oral petitions, since the Mandates Commission of the League of Nations had never held such hearings.

The International Court's latest decision was taken by eight votes to five.—(U.N. Information Centre, London)

(Prev. rep. 14667 A, pp. 14670-71; 14323 F.)

D. JORDAN. — Akaba Port Project.

A contract for the building of a port at Akaba, at the head of the gulf of the same name (see map, page 14436), was awarded by the Jordanian Government on Sept. 6 to a West German firm, the Zuplin company of Frankfurt. The contract, worth £2,200,000 and the biggest ever awarded by Jordan, was secured by the German firm in the face of over twenty bids from firms of different nationalities, including British.—(Times)

SEPTEMBER 15—22, 1956

A. UNITED STATES. — The Republican Convention. - General Eisenhower and Mr. Nixon nominated as Presidential and Vice-Presidential Candidates. - The Republican Party's Programme.

The National Convention of the Republican Party, meeting in San Francisco from Aug. 20-23, unanimously adopted President Dwight D. Eisenhower as the party's presidential candidate, and Vice-President Richard M. Nixon as vice-presidential candidate, for the Presidential elections in November. President Eisenhower and Vice-President Nixon received the votes of all the 1,323 delegates attending the Convention, no other nominations being put forward.

The candidature of President Eisenhower was moved by Representative Charles E Halleck (Indiana), the eight seconders including Governor McKeldin of Maryland and Dr. Helen Edmonds, one of the leading Negro scholars in the U.S.A. and Professor of History at North Carolina College Vice-President Nixon's candidature was moved by Governor Herter of Massachusetts, the seconders including Mr. Harold Stassen (who, as described below, had unsuccessfully tried to secure Governor Herter's nomination as Vice-Presidential candidate) and Senator John W. Bricker, of Ohio. Among leading Republicans who spoke in support of President Eisenhower and Vice-President Nixon was Mr. Thomas E. Dewey, Governor of New York and Republican candidate for the Presidency in 1948.

Mr. Stassen's Campaign to secure Vice-Presidential Nomination for Governor Herter.

A month before the opening of the Convention, Mr. Harold Stassen (adviser to the President on disarmament, and former Governor of Minnesota) had issued a statement on July 23 announcing his intention to launch a campaign to secure the nomination of Governor Christian A. Herter as Vice-Presidential candidate instead of Mr. Nixon.

Mr. Stassen, who had informed both President Eisenhower and Vice-President Nixon of his intention, gave the following reasons for supporting Governor Herter in preference to Vice-President Nixon. (1) independent voters in the U.S.A. and "important portions of the Allied and neutral world" would have "greater confidence in an Eisenhower-Herter ticket"; (2) "an Eisenhower-Herter ticket would run at least six per cent stronger than an Eisenhower-Nixon ticket"; (3) this six per cent margin [calculated on the basis of public opinion polls organized by Mr. Stassen] would be "certain to reflect decisively in a number of Senatorial and House "seats" and 'might well be the margin of majority or minority in Congress." After asserting that the opposition to Mr. Nixon as Vice-President was reflected most strongly among "the best-informed and younger voters," Mr. Stassen declared that Governor Herter had "a lifetime record of effective action reflecting thoroughly the same broad and basic philosophy as that of President Eisenhower in both domestic and foreign affairs" In subsequent statements, Mr Stassen expressed his belief that "Mr Nixon is not the strongest Vice-Presidential candidate we could pick," and his conviction that Mr. Nixon's nomination would cost President Eisenhower "millions of votes" if they ran together in November.

On July 30 it was announced that President Eisenhower had granted Mr. Stassen four weeks' leave of absence from his official duties so that he could have "the time and opportunity to pursue certain political activities without involving his official position or the White House." At the beginning of August Mr. Stassen accordingly launched his campaign—described by him as an "Ike and Chris" campaign—to obtain support for Governor Herter as the Republican Party's vice-presidential nominee.

Mr. Stassen's campaign, however, received negligible support from the Republican Party as a whole. The party's campaign committees in the Senate and House of Representatives issued a joint statement describing Mr. Stassen's action as "irresponsible" and expressing full support for Mr. Nixon as an exceptional and "trial tested" candidate. Governor Herter himself, moreover, had declined from the outset to campaign against Vice-President Nixon, and had informed the chairman of the Republican Party (Mr. Leonard W. Hall) that he would "consider it a privilege to nominate Nixon at the Republican National Convention."

In a press statement on Aug. 1, President Eisenhower said that the Republican National Convention would be free to choose any Vice-Presidential candidate it wished, and that he would express no preference himself. He indicated, however, that he would regard Vice-President Nixon's nomination with "satisfaction," and said that Mr. Nixon was "perfectly acceptable to me, as he was in 1952." On Aug. 22, while the Convention was in progress, President Eisenhower called a press conference at which he announced (*a*) that he had had a conversation with Mr. Stassen; (*b*) that Mr. Stassen had told him that he had now "become convinced that the majority of the delegates want Nixon"; and (*c*) that, as Governor Herter had declined to run himself, Mr. Stassen proposed to second Mr. Nixon's nomination "in order to get his own position clear before the Convention and the American public." The President added that Mr. Stassen would resume his duties at the White House and would give his full support to the "Eisenhower-Nixon team" in the election campaign.

As stated above, the nomination of Mr. Nixon as Vice-Presidential candidate was moved by Governor Herter—who declared that Mr. Nixon had been "a great Vice-President because he possesses in outstanding degree the qualities of intelligence, loyalty, and dedication"—and was seconded by Mr. Stassen, who pledged full support for both President Eisenhower and Vice-President Nixon.

[Biographies of President Eisenhower and Vice-President Nixon are given respectively on page 12553, first column, and page 12333, first column.]

The Party Programme.

The programme of the Republican Party adopted at the National Convention is summarized below under cross-headings:

General Principles. - Defence of Administration's Record. The Republican programme began with an affirmation of principles: "While jealously guarding the free institutions and preserving the principles upon which our Republic was founded and has flourished, the purpose of the Republican party is to establish and maintain a peaceful world and build at home a dynamic prosperity in which every citizen fairly shares"

Defending the Administration's record, the statement declared: "... In four years we have achieved the highest economic level with the most widely-shared benefits that the world has ever seen. We of the Republican Party have fostered this prosperity and are dedicated to its expansion and to the preservation of the climate in which it has thrived .. We shall continue to encourage the good business and sound employee relationships which have made possible for the first time in our history a productive capacity of more than $400,000,000,000 a year. More than 66,000,000 people have full-time jobs, with real wages and personal income at record highs ... We are proud to have fulfilled our 1952 pledge to halt the skyrocketing cost of living that in the previous 13 years had cut the value of the dollar by half and robbed millions of the full value of their wages, savings, insurance, pensions, and Social Security ..."

Economic Policy. After reviewing the Republican Administration's achievements in reducing the size of Federal budgets, and in halting the rise in the cost of living which had been in progress when it took office in 1952, the programme went on to describe the principal future objectives of the party as follows:

"(1) Further reductions in Government spending without weakening the support of a superior defence programme or depreciating the quality of essential service of Government to our people.

(2) Continued balancing of the Budget to ensure the financial strength of our country ... and to maintain the purchasing power of a sound dollar and the value of savings, pensions and insurance.

(3) Gradual reduction of the national debt."

In addition, and in so far as these aims were consistent with a balanced budget, the party proposed to reduce taxes, especially on lower and middle incomes, to help the development of small businesses, and to study ways to remove inequitable effects of taxation, as well as to continue to leave the Federal Reserve System free "to combat inflation and deflation by wise fiscal policy."

The programme expressed the belief that sound currency with stable purchasing power was the essential basis for economic growth and a higher standard of living. In furtherance of a policy of economic expansion, emphasis would be laid on the development of transport services Attention was called to the Administration's initiation of soundly financed air, highway and maritime programmes, the development of nuclear power for shipping being especially mentioned.

After referring to the "atmosphere of confidence" created by the Eisenhower Administration's policy, including the elimination of "a host of needless controls," the programme stressed Republican belief in free enterprise and "good business for all business—small, medium and large." Dwelling upon the work of the Small Business Administration and of the Cabinet Committee on Small Businesses, the Republican Party pledged support full to small businesses by means of financial and technical aid where necessary, and in the following ways:

(1) Additional technical research in problems of development and distribution for the benefit of small businesses.

(2) Legislation to permit closer Federal scrutiny of mergers tending towards the creation of monopolies.

(3) Procedural changes facilitating enforcement of the anti-trust laws.

(4) Vigorous policies to protect investors and provide maximum opportunities for financing small businesses without costly "red tape"

The programme went on to review the Administration's labour policy, claiming that in addition to an increase in wages earned, the relative purchasing power of the wage-packet was greater in 1952 since it was not "eaten away by rising taxes and soaring prices." It added that during the Republican Administration "the Federal

minimum wage had been raised for more than 2,000,000 workers. Social security has been extended to an additional 10,000,000 workers and the benefits raised for 6,500,000. The protection of unemployment insurance has been brought to 4,000,000 additional workers."

For the future, the Republican Party expressed its intention to :

(1) Continue the Eisenhower Administration's programmes of assistance to workers with special employment problems, e.g older or handicapped workers, members of minority groups, and migratory workers.

(2) Improve the Federal-State employment service and make unemployment insurance more effective.

(3) Protect, by legislation, the assets of employee welfare and benefit plans in order to assure the workers of their rightful benefits.

(4) Assure equal pay for equal work.

(5) Clarify and strengthen the eight-hour laws to benefit workers subject to Federal wage standards.

(6) Extend the protection of the Federal minimum wage laws to as many workers as possible.

(7) Eliminate discrimination in employment on grounds of race, creed, colour, ancestry, or sex.

(8) Improve economic conditions in areas with persistent and substantial unemployment.

(9) Revise the Taft-Hartley Act to protect more effectively the rights of the unions, management, individual workers and the public

Health, Education and Welfare. The policy statement pointed out that " Republican action created the Department of Health, Education, and Welfare as the first new Federal department in 40 years, to raise the continuing consideration of these problems for the first time to the highest council of Government, the President's Cabinet." It went on to pledge the Republican Party, *inter alia*, to alleviate the shortage of school classrooms in the U.S.A., to ensure equality of educational opportunities for all children ; to support intensified medical research into cancer, mental disease, heart disease, etc., and to "seek the extension and perfection of a sound system of Social Security."

Agriculture. Republican agricultural policy was directed towards creating the widest possible markets returning full parity to farmers for the sale of their products, and to avoid making them dependent upon Government subsidies to maintain their incomes. The party pledged itself :

(1) To undertake research, in collaboration with the States, aimed at finding new uses for existing products, improving the quality of farm products, and developing more efficient marketing.

(2) To encourage farmers to solve their own problems, giving them as free a hand as possible, while following policies which were fair to them all.

(3) To provide assistance by means of price supports ; to continue existing commodity loan and marketing agreements, while making every effort to develop accurate measurement of farm parity ; and to ease temporary market surpluses, especially of perishable goods, by effective purchase and donation.

(4) To safeguard soil and water resources.

(5) To encourage voluntary self-supporting Federal crop insurance, and to provide prompt temporary relief in case of drought or other natural disasters.

(6) To support farmer-owned and farmer-operated co-operatives, and to assist private and co-operative sources of credit by supplying supplemental credit through the Farmers' Home Administration where needed.

(7) To promote the existing rural development programme.

(8) To collaborate with farmers and others in promoting the Great Plains programme to improve land usage in areas subject to wind erosion.

(9) To " assist the young people of American farms and ranches in their development as future farmers and homemakers."

(10) In general, " to keep agriculture strong, free, attuned to peace and not war, to stand ready with a reserve capacity at all times as a part of our defence, based on sound agricultural economy."

Defending the Administration's agricultural policy, the statement said *inter alia* : " Our Republican Administration fostered a constructive Soil Bank programme to reduce surpluses and to permit improvements of our soil, water and timber resources. The Democratic Party's tactics of obstruction and delay may have prevented our farm families from receiving the full benefits of this programme in 1956. However, by aggressive action we now have the Soil Bank in operation, and in three months half-a-million farmers have contracted to shift more than 10,000,000 acres from producing more surpluses to soil reserve for the future. For this they have already earned $225,000,000. This programme is a sound aid to removing the burdens of surpluses which the Democrat programmes placed on farmers . . . "

Federal Government Integrity and Efficiency. " The Republican Party is wholeheartedly committed to maintaining a Federal Government that is clean, honourable, and increasingly efficient It proudly affirms that it has achieved this kind of government and dedicated it to the service of the people. Our many economic and social advances of the past four years are the result of our faithful adherence to our 1952 pledge to reverse a 20-year Democratic philosophy calling for more and more power in Washington. We have left no stone unturned to remove from Government the irresponsible and those whose employment was not clearly consistent with national security.

" We believe that working for the Government is not a right but a privilege. Based on that principle we will continue a security programme to make certain that all people employed by our Government are of unquestioned loyalty and trustworthiness. The Republican Party will, realistically and in conformity with constitutional safeguards for the individual, continue to protect our national security by enforcing our laws fairly, vigorously, and with certainty . . .

"We promise unwavering vigilance against corruption and waste . . . We condemn illegal lobbying for any cause and improper use of money in political activities, including the use of funds collected by compulsion for political purposes contrary to the personal desires of the individual We pledge to continue our far-reaching programme for improving the efficiency and effectiveness of the Federal Government . . . We are unalterably opposed to the unwarranted growth of centralized Federal power . . . We will vigorously promote, as we have in the past, a non-political career service under the merit system which will attract and retain able servants of the people. Many gains in this field, notably pay increases and a host of new benefits, have been achieved in their behalf in less than four years."

Civil Rights. " The Republican Party points to an impressive record of accomplishment in the field of civil rights, and commits itself anew to advancing the rights of all our people regardless of race, creed, colour, or national origin. In the area of exclusive Federal jurisdiction, more progress has been made in this field under the present Republican Administration than in any similar period in the last 80 years. The many Negroes who have been appointed to high public positions have played a significant part in the progress of this Administration.

" Segregation has been ended in the District of Columbia government and in the District's public facilities, including public schools, restaurants, theatres, and playgrounds. The Eisenhower Administration has eliminated discrimination in all Federal employment. Great progress has been made in eliminating employment discrimination on the part of those who do business with the Federal Government and secure Federal contracts . . . The regulatory agencies under this Administration have moved vigorously to end discrimination in inter-State commerce. Segregation in the armed forces of the U.S.A. has been ended. For the first time in our history there is no segregation in veterans' hospitals and among civilians on naval bases This is an impressive record. We pledge ourselves to continued progress in this field . . .

" The Republican Party accepts the decision of the U.S. Supreme Court that racial discrimination in publicly-supported schools must be progressively eliminated. We concur in the conclusion of the Supreme Court that its decision directing school desegregation should be accomplished with ' all deliberate speed ' locally through Federal district courts. The implementation order of the Supreme Court recognizes the complex and acutely emotional problems created by its decision in certain sections of our country where racial patterns have been developed in accordance with prior and long-standing decisions of the same tribunal.

" We believe that true progress can be attained through intelligent study, understanding, education, and goodwill. Use of force or violence by any group or agency will tend only to worsen the many problems inherent in the situation This progress must be encouraged and the work of the courts supported in every legal manner by all branches of the Federal Government, to the end that the constitutional ideal of equality before the law, regardless of race, creed, or colour, will be steadily achieved."

Immigration. Support was expressed for an immigration policy " based on equality of treatment, freedom from implications of discrimination between racial, national, and religious groups, and flexible enough to conform to changing needs and conditions." Congressional consideration of the extension of the 1953 Refugee Relief Act was also recommended.

Foreign Policy. After a lengthy review of the development and improvement of the international situation since the Eisenhower Administration took office, the programme pledged the party's support for the U.N , the collective security system, and for co-operation with the other American countries, based on the " good neighbour " policy

" Where needed," it continued, " we shall help friendly countries maintain such local forces and economic strength as provide a first bulwark against Communist aggression or subversion. We shall reinforce that defence by a military capacity which, operating in accordance with the U.N. Charter, could so punish aggression that it ceases to be a profitable pursuit. We will continue efforts with our friends and allies to assist the under-developed areas of the free world in their efforts to attain greater freedom, independence, and self-determination, and to raise their standards of living.

" We recognize the existence of a major threat to international peace in the Near East. We support a policy of impartial friendship for the peoples of the Arab States and Israel to promote a peaceful settlement of the causes of tension in that area, including the human problem of the Palestine-Arab refugees . . We regard the preservation of Israel as an important tenet of American foreign policy. We are determined that the integrity of an independent Jewish State shall be maintained We shall support the independence of Israel against armed aggression "

After pledging the Republican Party to seeking the reunification of Germany and the " liberation of the satellite states . . . and other once-free countries now behind the Iron Curtain," the programme declared . " We continue to oppose the seating of Communist China in the U.N., thus upholding international morality. To seat a Communist China which, by word and deed, defies the principles of the U.N. Charter would be to betray the letter, violate the spirit, and

subvert the purposes of that Charter. It would betray our friend and ally, the Republic of China. We will continue our determined efforts to free the remaining Americans held prisoner by Communist China."

Great importance was attached to the maintenance of world trade and productivity, and the programme proposed the removal of impediments to international commerce " on a gradual, selective and reciprocal basis, with full recognition of the necessity to safeguard domestic enterprises, agriculture and labour against unfair import competition." The Republican Party was, however, opposed to any trade with the Communist world which might threaten the security of the U S A. or her allies

Recognizing that " poverty and unrest in less developed countries make them the target for international Communism," the party promised to continue technical and economic assistance with respect to such countries. " We will strive," the programme stated, " to bring about conditions that will end the injustices of nations divided against their will, of nations held subject to foreign domination, of peoples deprived of the right of self-government We reaffirm the principle of freedom for all peoples, and look forward to the eventual end of colonialism. We will overlook no opportunity that, with prudence, can be taken to bring about a progressive elimination of the barriers that interfere with the free flow of news, information and ideas, and the exchange of persons between the free peoples and the captive peoples of the world We favour the continuance and development of exchange-of-persons programmes between free nations We approve appropriate action to oppose the imposition by foreign governments of discrimination against U S. citizens, based on their religion or race "

After stressing that a bipartisan approach to foreign policy was important to give continuity and to inspire confidence both at home and abroad, this section of the policy statement ended with an assurance of the continuation of " the dynamic, courageous, sound and patriotic policies which have protected and promoted the interests of the U S A during the last four years "

Defence. Since the military strength of the U S.A was a key factor in maintaining world peace, it was important that its striking force—the strongest in the world—should continue to include (*a*) a jet-powered, long-range Strategic Air Force, and a Tactical Air Force of the fastest and latest types of planes ; (*b*) the most effective guided and ballistic missiles ; (*c*) a modern Navy with a powerful air arm , (*d*) an Army of unequalled mobility and fire-power , and (*e*) leases strategically dispersed at home and around the world. These could only be maintained with adequate man-power, and the programme promised continued incentives to make a military career attractive and rewarding.

An effective research and development programme would continue to supply the armed forces with the most modern weapons, and scientific education of young people would help to preserve the U.S A.'s technological leadership in the military field. Measures for the protection of the civilian population and a strong Civil Defence system would not be neglected.

Natural Resources. The Republican Administration's achievements in the development and conservation of America's forest, mineral, water and fisheries resources were approved in the party programme, together with the Government's financing and protection of the National Park and wild-life reserves. With reference to forest and natural vegetation resources, the party pledged itself to " continue to improve timber conservation practices, recreational facilities, grazing management, and watershed protection of our national forests and public domains."

As regards minerals, the Republican Party believed that " the Federal Government should foster a long-term policy for the development and prudent use of domestic mineral resources, and to assure access to necessary sources abroad, without dangerously weakening the market for domestic production of defence-essential materials " Moreover, the party favoured " reasonable repletion allowances . . . , freedom of mineral producers from unnecessary governmental regulation ; expansion of Government exploration and research ; and establishment of stockpile objectives which will reduce, and where possible eliminate, foreseeable wartime shortages "

The development of water resources and water-power was called for at all governmental levels—Federal, State and local. The party would seek a co-operative solution of all problems of water supply and distribution, reclamation, flood control, etc.

Atomic Energy. " President Eisenhower has inaugurated a strong programme for developing the peaceful atom . . Government and private enterprise are working together on a number of large-scale projects designed to develop substantial quantities of electric power from atomic sources . . . More and more private funds are being invested as the Government monopoly is relaxed . . . Radioactive isotopes are being brought more and more into use on farms, in hospitals, and in industry. The use of isotopes has already resulted in annual savings of hundreds of millions of dollars, and the nuclear age has only just begun.

" It is to the benefit of the U.S.A., as well as to all nations, that the uses of atomic energy be explored and shared. The Republican Party pledges that it will continue this imaginative world-embracing programme. We shall continue to chart our course so as to fortify the security of the free nations and to further the prosperity and progress of all people everywhere."

Alaska, Hawaii, and Puerto Rico. " We pledge immediate statehood for Alaska, recognizing that adequate provision for defence requirements must be made. We pledge immediate statehood for Hawaii. We shall continue to encourage the Commonwealth of Puerto Rico in its political growth and economic development in accordance with the wishes of its people and the fundamental principle of self-determination."

District of Columbia. " We favour self-government, national suffrage, and representation in Congress for the District of Columbia."

Indian Affairs. " We shall continue to pursue our enlightened policies which are now producing exceptional advances in the long struggle to help the American Indian gain the material and social advantages of his birthright and citizenship, while maintaining to the fullest extent the cultural integrity of the tribal groups . . We favour most sympathetic and constructive execution of the Federal trusteeship over Indian affairs . .

President Eisenhower's Acceptance Speech.

In accepting the Presidential nomination, General Eisenhower made a speech, summarized below, on the past and future policy of the Republican Party and Administration.

After thanking the Convention for having nominated him, and expressing his satisfaction that it had retained " the team of individuals selected in 1952," President Eisenhower added " I am not going to attempt a eulogy of Mr. Nixon. I merely want to say this · that whatever dedication to country, loyalty, patriotism, and great ability can do for America, he will do—and that I know."

President Eisenhower continued : " The great Norwegian, Henrik Ibsen, once wrote . 'I hold that man is in the right who is most clearly in league with the future.' Today I want to demonstrate the truth of a single proposition : The Republican Party is the party of the future . .

The first of the five reasons I shall give why the Republican Party is the party of the future is this Because it is the party of long-range principle, not short-term expediency . . . I shall give you several examples of rejecting expediency in favour of principle.

First, the farm issue. Expediency said ' Let's do something in a hurry—anything—even multiply our price-depressing surpluses at the risk of making the problem twice as bad next year—just so we can get through this year ' People who talk like that do not care about principle and do not know farmers. The farmer deals every day in basic principles of growth and life. His product must be planned, cultivated, and harvested over a long period He has to figure not just a year at a time, but over spans of years, as to his soil, his water, his equipment, the strains of his stock—and the strains on his income.

" And so, for this man of principle, we have designed our programme of principle. In it, we recognize that we have received from our forebears a rich legacy : our continent's basic resource of soil. We are determined that, through such measures as the Soil Bank and the Great Plains programme, this legacy shall be handed on to our children even richer than we received it We are equally determined that farm prices and income, which were needlessly pushed down under surpluses—surpluses induced first by war and then by unwise political action stubbornly and recklessly prolonged—shall in the coming months and years get back on a genuinely healthy basis This improvement must continue until a rightful share of our prosperity is permanently enjoyed by agriculture, on which our very life depends.

A second example : labour relations. Expediency said : ' When a major labour dispute looms, the Government must do something—anything—to settle the dispute even before the parties have finished negotiating. Get an injunction Seize the steel mills. Appoint a board. Knock their heads together.' Principle says : 'Free collective bargaining without Government interference is the cornerstone of the American philosophy of labour-management relations . . .

' This Administration has faith in the rightness of the collective bargaining principle. It believes in the maturity of both labour and business leaders to do what is best not only for their own side but for the country as a whole The results · for the first time in our history a complete steel contract was negotiated and signed without direct Government intervention, and the last 3½ years have witnessed one of the most remarkable periods of labour peace on record.

My second reason for saying that the Republican Party is the party of the future is this : it is the party which concentrates on the facts and issues of today and tomorrow, not the facts and issues of yesterday. More than 20 years ago our opponents found in the problems of the depression a battleground on which they scored many political victories. Economic cycles have not been eliminated Still, the world has moved on from the 1930's ; good times have supplanted depression ; new techniques for checking serious recession have been learned and tested . . . But their obsession with the depression still blinds many of our opponents to the insistent demands of today.

" The present and future are bringing new kinds of challenge to Federal and local governments : water supply, highways, health, housing, power development, peaceful uses of atomic energy. With two-thirds of us living in big cities, questions of urban organization must be given high priority. Highest of all, perhaps, will be the priority of first-class education to meet the demands of our swiftly growing school-age population. The Republican Party says · Let us quit fighting the battles of the past and turn our attention to these problems of the present and future, on which the long-term well-being of our people depends.

"Third the Republican Party is the party of the future because it is the party that draws people together, not drives them apart. Our party detests the technique of pitting group against group for cheap political advantage. Republicans view as a central principle of conduct that old motto of ours. *E Pluribus Unum*—'Out of Many, One.'

"As far back as 1856 our party began establishing a record of bringing together, as its largest element, the working people and small farmers, as well as the small business men It attracted minority groups, scholars and writers, not to mention reformers of all kinds—free-soilers, independent Democrats, conscience Whigs, teetotallers, vegetarians, and transcendentalists!

"Now, 100 years later, the Republican Party is again the rallying-point for Americans of all callings, ages, races, and incomes. They see in its broad, forward-moving, straight-down-the-road, fighting programme the best promise for their own steady progress toward a bright future Some opponents have tried to call this a 'one-interest party.' Indeed it is a one-interest party—and that one interest is the interest of every man, woman and child in America. And as long as the Republican Party continues to be this kind of one-universal-interest party, it will continue to be the party of the future.

"And now the fourth reason The Republican Party is the party of the future because it is the party through which the many things that still need doing will soonest be done ... Republicans have proved that it is possible for a government to have a warm, sensitive concern for the everyday needs of people, while steering clear of the paternalistic 'big-brother-is-watching-you' kind of interference. The individual—and especially the idealistic young person—has no faith in a tight Federal monopoly on problem-solving ...

"In our time of prosperity and progress, one thing we must always be on guard against is smugness. True, things are going well; but there are thousands of things still to be done. There are still enough needless sufferings to be cured, enough injustices to be erased, to provide careers for all the young crusaders we can produce or find. We want them all—Republicans, independents, discerning Democrats—come on in and help!

"The Republican Party was created in a devout belief in equal justice and equal opportunity in a nation of free men and women. Its record on social justice rests, not on words and promises, but on accomplishment. The record shows that a wide range of quietly effective actions, conceived in understanding and good will for all, has brought about more genuine—and often voluntary—progress toward equal justice and opportunity in the last three years than was accomplished in all the previous 20 put together. Elimination of various kinds of discrimination in the armed services, the District of Columbia, and among the employees of government contractors, provide specific examples of this progress In this work, incidentally, no-one has been more effective and energetic than our Vice-President, who is head of one of the great committees in this direction ...

"Finally, a party of the future must be completely dedicated to peace, as indeed must all Americans. For without peace there is no future ... No-one is more aware than I that it is the young who fight wars, and who give up years of their lives to military training. It is not enough that their elders promise 'peace in our time'. it must be peace in their time too, and in their children's time. Indeed, there is only one real peace—and that is peace for all time.

"There are three imperatives of peace—three requirements that the prudent man must face with unblinking realism. The first imperative is the elementary necessity of maintaining our own national strength—moral, economic and military. It is still my conviction, as I wrote in 1947: 'The compelling necessities of the moment leave us no alternative to the maintenance of real and respectable strength—not only in our moral rectitude and our economic power, but in terms of adequate military preparedness.

"During the past 3½ years our military strength has constantly been augmented, soberly and intelligently. Our country has never before in peacetime been so well prepared militarily So long as the world situation requires, our security must be vigorously sustained Our economic power is displaying a capacity for growth which is both rapid and sound, even while supporting record military budgets. We must keep it growing. But moral strength is also essential. Today we are competing for men's hearts, minds, and trust all over the world In such a competition, what we are at home and what we do at home is even more important than what we say abroad ...

"The second imperative of peace is collective security We live in a shrunken world; a world in which oceans are crossed in hours; a world in which a single-minded despotism menaces the scattered freedoms of scores of independent nations. To ensure the combined strength of friendly nations is for all of us an elementary matter of self-preservation ... The strength of the free world lies not in cementing it into a second monolithic mass to compete with that of the Communists. It lies rather in the unity that comes of the voluntary association of nations which, however diverse, are developing their own capacities and asserting their own national destinies in a world of freedom and mutual respect.

"There can be no enduring peace for any nation while other nations suffer privation, oppression, and a sense of injustice and despair. In our modern world it is madness to suppose that there could be an island of tranquillity and prosperity in a sea of wretchedness and frustration. For America's sake, as well as the world's, we must measure up to the challenge of the second imperative—the urgent need for mutual economic and military co-operation among the free nations, sufficient to deter or repel aggression wherever it may threaten.

"But even this is no longer enough. We are in the era of the thermo-nuclear bomb that can obliterate cities and can be delivered across continents. With such weapons, war has become, not just tragic, but preposterous With such weapons, there can be no victory for anyone. Plainly, the objective now must be to see that such a war does not occur

"And so the third imperative of peace is this without for a moment relaxing our internal and collective defences, we must actively try to bridge the great chasm that separates [the free world] from the peoples under Communist rule. In these regions are millions of human beings who have been our friends, and who sincerely want peace and freedom ... Of course, good will from our side can do little to reach these peoples unless there is some new spirit of conciliation on the part of the Governments controlling them. Now, at last, there appear to be signs that some small degree of friendly intercourse among peoples may be permitted We are beginning to be able .. to encourage some interchange of ideas, books, magazines, students, tourists, artists, radio programmes, technical experts, religious leaders, and governmental officials. The hope is that little by little, mistrust based on falsehoods will give way to international understanding based on truth ...

"Lincoln, speaking to a Republican Convention in 1858, began with the Biblical quotation 'A house divided against itself cannot stand.' Today the world is a house divided. But—as is sometimes forgotten—Lincoln followed this quotation with a note of hope for his troubled country · 'I do not expect the house to fall,' he said, 'but I do expect it will cease to be divided' A century later, we too must have the vision to sound a similar note of promise for our divided world ..."

Senator Knowland and other Republican Congressional leaders had visited President Eisenhower on July 10 at Gettysburg, where the President was convalescing after his recent operation for an intestinal complaint (see 14940 C). Mr. Knowland quoted the President as saying that he felt "in better shape" then when he made his announcement of Feb. 29 that he would stand for a second term (see 14743 A), and said that the Republican Party were "looking forward to a vigorous and active campaign under his leadership."

A. GREECE. — Restoration of Stoa of Attalos.

The 2,100-year-old Stoa of Attalos, fully restored to its original design was dedicated in Athens on Sept. 3 by King Paul of the Hellenes. The work of restoration had been carried out by the American School of Classical Studies over the past three years at a cost of $3,500,000, the greater part of which had been donated by Mr. John D. Rockefeller jr. and by the Rockefeller Foundation.

The colonnaded Stoa (arcade) of Attalos was in Classical times one of the most splendid of the Athenian buildings, being situated on the eastern side of the Agora—the civic centre and market square of ancient Athens Measuring 382 ft. in length, 64 ft. in width, and two storeys high, it was rebuilt with the identical materials used in the original Stoa and drawn from the same sources—grey limestone for the walls from an ancient quarry near the Piraeus, white Pentelic marble for the façade, and terracotta tiles for the roof from the outskirts of Athens An inscription cut into the façade records the donor of the original Stoa—Attalos II, King of Pergamon in Asia Minor (159-138 B C.), who studied at Athens as a youth and who, on ascending the throne, built the Stoa and presented it to the city as a symbol of gratitude.

The reconstructed Stoa, which preserves as much of the original structure as possible, houses a new museum containing over 65,000 objects found during U S. excavations in the Agora over the past 25 years. The exhibits include a marble inscription containing a law against dictatorship passed by the Athenian assembly in 336 B.C., a Library of Stone comprising some 6,700 "documents" or ancient marble inscriptions from Classical times; bronze voting-ballots and machines for selecting civic officials by lot, used by the Athenian assemblies which met in the Agora; and sculptures, vases, jewellery, weapons, household furnishings, etc, of the Classical period.

The Stoa of Attalos, like all other buildings in the Agora, was destroyed in A.D. 267 by a band of barbarian raiders from the north The Stoas of ancient Athens were favourite meeting-places of the Greek philosophers, who did much of their teaching there; they gave their name to the "stoic" school of philosophy which originated in Athens in the fourth century B.C.

The Freedom of the City of Athens was conferred on several U.S. citizens primarily responsible for the restoration of the Stoa of Attalos—Mr John D. Rockefeller jr (who was not personally present), Mr. John Caskey (Director of the American School of Classical Studies in Athens), Professor Homer A. Thompson (field director of the Agora excavations, and Professor of Classical Archaeology at Princeton University), and Mr. Ward M Canaday, a Toledo (Ohio) industrialist who is president of the trustees of the School of Classical Studies, and who acted as personal representative of President Eisenhower

The area round the Stoa of Attalos, situated below the Acropolis, is to be "landscaped" to restore it to the appearance it had in Classical times. (Times - New York Times)

A. UNITED KINGDOM. — Wage Increases and Trade Disputes in First Half of 1956.

Figures published in the July issue of the *Ministry of Labour Gazette* showed that in the first six months of 1956 the record number of 11,443,000 workers received pay increases aggregating £5,725,900 weekly, compared with 10,486,000 workers and a total of £4,113,000 weekly in the first half of 1956.

The index of wage rates (1947 =100) rose from 154 in December, 1955, to 156 in January 1956, 158 in February, 162 in March, 163 in April, and 164 in May and June. The retail price index (January, 1956 =100) rose to 103 by the end of April, but fell again to 102 5 by the end of May and to 102 4 by the end of June. The following table shows the approximate number of workers affected in each of the principal groups of industries, and the net amount of the weekly changes in wage rates

	Approximate Number of Workers affected	Estimated Net Weekly Increases £
Agriculture, Forestry, Fishing	792,500	297,000
Mining and Quarrying	430,000	284,600
Treatment of Non-metalliferous Mining Products other than Coal	214,500	77,500
Chemicals and Allied Trades	213,000	100,100
Metal Manufacture	220,000	119,600
Engineering, Shipbuilding and Electrical Goods, Vehicles, Metal Goods nor elsewhere specified	2,619,500	1,375,900
Textiles	539,000	144,400
Leather, Leather Goods and Fur	3,000	1,400
Clothing	243,500	127,700
Food, Drink and Tobacco	403,500	167,100
Manufactures of Wood and Cork	188,000	56,400
Paper and Printing	282,500	272,700
Other Manufacturing Industries	34,500	17,200
Building and Contracting	1,244,000	780,600
Gas, Electricity and Water	241,000	173,100
Transport and Communication	1,006,500	499,700
Distributive Trades	1,183,500	535,600
Public Administration	950,500	486,000
Miscellaneous Services	634,000	209,300
Total	11,443,000	5,725,900

Wage increases granted during the half-year in individual industries and services included the following (number of employees affected and estimated total amount involved, where known, shown in parentheses):

Building Workers An increase from April 16 of 2½d. an hour (equivalent to 9s 2d. a week), making, with an additional 1d. an hour already granted under the industry's cost-of-living agreement, a total of 12s 10d. a week (about 1,000,000 employees, £35,000,000) *Dock Workers* Increases from April 18 of 11s. a week for time-workers and of 7½ per cent for piece-workers (about 100,000, £2,500,000) *Engineers.* Weekly increases ranging from 8s for unskilled men to 11s. for skilled men (from March 12) and of 8s. 6d for women (from March 5) (about 3,400,000, £80,000,000). *Local Government Officers.* Advances of about 5 per cent from Jan. 1, with increased subsistence allowances and reorganization of clerical and higher clerical divisions (about 175,000). *Merchant Navy.* Increases of about 7½ per cent from May 14 in the pay of navigating and engineer officers and of ratings (about 75,000) *National Health Service Officers.* Increases for clerical and administrative officers of about 6 per cent from Feb. 1 (about 6,500). *Nursing and Hospital Staff.* Increases from April 1 ranging from £20 a year for student nurses to £95 a year for matrons of large hospitals (about 200,000, £5,500,000) *Police.* Increases from Jan. 1 ranging from £30 a year for junior constables to £130 for chief inspectors (nearly 70,000, £7,500,000). *Railway Workers.* A general increase of 7 per cent for all workers (including footplate men) from Jan. 23 (about 450,000, £25,000,000)

Industrial disputes involving stoppages of work in the first half of 1956 numbered 1,395, compared with 1,209 in the first six months of 1955. About 286,800 workers were directly involved, the total number of working days lost being 1,118,000. (Ministry of Labour Gazette) **(Prev. rep. 15032 D; 14692 A.)**

B. NORTHERN IRELAND. — Cabinet Appointment.

It was announced in Belfast on Sept. 21 that Lord Brookeborough (the N.I. Prime Minister) had appointed the Minister of Home Affairs, Mr. Terence O'Neill, as Minister of Finance in succession to Mr. G. B. Hanna, who had resigned from the Government after his appointment as County Court Judge and Chairman of Quarter Sessions for County Down. It was stated that Mr. O'Neill would continue to hold the portfolio of Home Affairs concurrently with the Finance portfolio. Mr. Hanna had been Minister for Home Affairs from 1953 to April 1956, when he succeeded Mr. Brian Maginess as Finance Minister. His resignation from the Government will cause a by-election in the Duncairn division, which he had represented since 1949. (Belfast Telegraph) **(Prev. rep. Cabinet, 13280 B.)**

C. UNITED STATES. — Highway Construction Act. - Plan for Extensive Inter-State Road Network.

A Bill designed to provide the U.S.A. with a 41,000-mile network of controlled-access inter-State highways was signed by President Eisenhower on June 29. It authorized the expenditure of $33,482,000,000 for this purpose, of which $28,057,000,000 would be found by the Federal Government and the remainder by the State Governments. The Federal contribution would be provided from increased taxation on petrol, tyres and vehicles.

The Highway Construction Act provided for:

(1) The building within the next 13 years of 41,000 miles of "superhighways" to form a network linking 90 per cent of all U.S. cities of over 50,000 inhabitants, including 42 State capitals. Access to the roads would be limited, and they would have at least four vehicle lanes, with as many as eight in crowded areas.

(2) An intensification over a three-year period of the existing Federal aid programme for the improvement of primary, secondary, and urban highway systems under the jurisdiction of the various States.

(3) A three-year construction programme for park, forest, and other public domain roads financed exclusively by the Federal Government.

(4) Expenditure on the inter-State highway system amounting to $25,000,000,000 by the Federal Government and $2,875,000,000 by the State Governments. The internal State highway systems would receive $2,550,000,000 from Federal sources, and this sum would be doubled by an equivalent contribution from the States. The Federal outlay on public domain roads would amount to $448,000,000.

(5) The financing of this programme by the following methods: (*a*) the present Federal tax of two cents per gallon on petrol and other motor fuels would be raised to three cents; (*b*) the price of tyres would include a tax of eight cents per lb. of weight, instead of five cents as at present, (*c*) taxation on the purchase of lorries, buses and trailers would be increased from eight to ten per cent of the manufacturer's price, (*d*) a special tax would be imposed on owners of heavy lorries and buses, at the annual rate of $1.50 per 1,000 pounds of weight

President Eisenhower had urged legislation to improve the U.S. road system—and thus to solve the problems arising from growing congestion and to reduce the very heavy accident rate —in a message to Congress on Feb. 22, 1955, and again in his State of the Union message of Jan. 5, 1956. A road improvement programme had been proposed by the Administration in 1955 but had been rejected by Congress on account of its financial provisions. Under the 1955 Bill a large part of the funds would have been provided by the issue of "highway bonds."

On April 27, 1956, the U.S. House of Representatives passed a Bill which envisaged, in addition to the other proposals finally adopted, the extension of increased Federal aid for State highway building over the full 13-year period during which the inter-State system would be under construction—a provision which would have raised total Federal expenditure to $51,800,000. The Senate's version (approved on May 30) provided that Federal aid for minor highways should continue for three years only. It also differed from the House version in the method recommended for distributing Federal funds to the States for building the inter-State highways, and authorized a total expenditure of $37,230,000,000.

The final compromise version of the Bill was agreed upon by a Joint Congressional Committee on June 20. The compromise accepted the limited three-year provision of Federal aid for State-built highways, and accordingly reduced the total expenditure to $33,482,000,000. As regards the distribution of Federal funds for the inter-State highways, the compromise version embodied the Senate's proposal that each State's share should be based upon its population and area, and on the mileage of its rural postal routes. This, however, would only apply to the first three years of the programme, the apportionment for the remaining ten years being made on the basis of estimates (to be prepared by the Secretary of Commerce) of the actual State-by-State costs of building the system

The final version was approved by both Houses on June 26. (New York Times - New York Herald Tribune) **(Prev. rep. 14633 A.)**

D. INDIA. — Benares renamed Varanasi.

It was announced in June that the Government of Uttar Pradesh, in consultation with the Government of India, had decided to change the name of the city of Benares to Varanasi, with retrospective effect from May 24—the 2,500th anniversary of the birth of the Buddha (see 15069 B).

It was explained that Benares (Banaras) was really a corruption of Varanasi, which was the name used in all ancient books and was probably derived from the names of the rivers between which the city was situated—the Varuna (or Barna) and the Assi. (Indian High Commissioner's Office, London)

A. NORTH ATLANTIC TREATY ORGANIZATION. — General Valluy appointed C.-in-C., Central Europe. - Resignation of Marshal Juin. - NATO Council Memorandum on U.S. Bases in Iceland. - Infrastructure Programme for 1956. - Estimates of Soviet Military Strength.

The appointment of General Jean-Etienne Valluy as Commander-in-Chief, Allied Forces, Central Europe, in succession to Marshal Alphonse Juin was announced on Aug. 2 by General Gruenther, the Supreme Allied Commander in Europe.

General Valluy (57), who served with distinction in both World Wars, was appointed by General de Gaulle in 1943 as Chief of Staff of the First French Army, which took part in the Allied landings in the South of France and subsequently advanced through Alsace into Southern Germany. He commanded the French forces which captured Karlsruhe. In 1946 he went to Indo-China to succeed General Leclerc as C.-in-C. of French forces in the Far East, and two years later was appointed Inspector-General of French Land Forces serving overseas. From 1950-52 he was military adviser to the Minister for the Associated States, and since August 1952 had been permanent French representative on the NATO Standing Group in Washington.

Marshal Juin, whose decision to resign had been confirmed by General Gruenther on June 30, had for some time been advocating a reappraisal of Western defence strategy. He had published an article in the *Revue des Deux Mondes* on June 1 in which he depreciated the strategic importance of the Central European area in view of the rapid development of nuclear weapons, and in which he recommended the formation of a special command in North Africa as a southern flank of the West European defence system.

Other recent developments in connexion with the North Atlantic Treaty Organization are described below under cross-headings.

U.S. Bases in Iceland.

Following the *Althing* resolution of March 28 (see 14804 A), the Icelandic Government formally requested the North Atlantic Council on June 22 to review the continued necessity for the presence of U.S. troops in Iceland. The request was made under Article VII of the 1951 U.S.-Icelandic Defence Agreement, which provided that either signatory might ask the North Atlantic Council to "review the continued necessity for the facilities and their utilization, and to make recommendations to the two Governments concerning their continuation" [see 11454 A].

The North Atlantic Council's recommendations concerning the U.S.-Icelandic Defence Agreement were transmitted to the two Governments on July 26 and published on Aug. 3. They were worded as follows:

"... The Council in the first place considered whether international conditions have so far improved as to warrant a basic change in the arrangements made under the defence agreement between Iceland and the U.S.A. This agreement was made in 1951, at a time when the international situation had seriously deteriorated and unprovoked attacks had been launched against the Republic of Korea ..

"In May of this year the Foreign Ministers of the 15 member-countries met in Paris and ... issued a communiqué in which they reaffirmed that the reasons which gave rise to the Atlantic alliance had not disappeared, and that Atlantic security remained a basic problem. It was the sense of the communiqué that the Western Powers could not relax their vigilance and that the framework of the common defence remained necessary [See 14861 A.]

"Since the ministerial meeting in May, the Permanent Council have continued to examine the international situation. They have noted recent internal developments in the Soviet Union [which] might represent the beginnings of an evolution which would help to bring about a better understanding between the Soviet Union and the free world. It must, however, be recognized that it is as yet too early to assess its true meaning or to conclude that a relaxation of the common defence is warranted.

"The Soviet announcement that they intend to reduce the number of men under arms has also been examined, but it is clear that this unilateral action could readily be reversed and that Soviet offensive capabilities are being maintained. Only an effective international agreement on disarmament with controls would make real security possible for all.

"In the Council's view, therefore, the conclusions reached at its May meeting hold equally good today. The defensive strength of the alliance has been a major factor in bringing about an improvement in the international situation, and a relaxation of the defence effort now could well reverse this trend. .

"Present dangers to peace and to Atlantic security arising from the world political situation are given a sharper edge as a result of developments in new weapons ... and in the speed and range of modern bombers and submarines. NATO has therefore within the last few years made a fundamental reassessment of the military assumptions on which Atlantic defence should be based. This reassessment has shown that, should an aggressor strike, the events of the first few hours might well prove decisive.

"The far-reaching changes made necessary in defence planning, especially to guard against surprise attack, have greatly increased the importance of facilities in strategic areas, and of their maintenance in a state of readiness. This applies not only to Iceland but also to other NATO countries which in recent years have provided necessary facilities, maintained and manned by the forces of their partners in the alliance. None of these Governments deems that the present situation justifies any change in these arrangements.

"These new circumstances have a particular bearing on the special situation of Iceland. Among the 15 members of the alliance, Iceland alone does not maintain armed forces. If the Icelandic Government were to deprive itself of the protection provided by defence forces in the country supplied by its NATO partners, it would be possible for an aggressor to seize control of Iceland with very small forces, either airborne or seaborne, before effective assistance could be rendered. Iceland would thus incur the risk of occupation and the extinction of its freedom.

"It should be borne in mind that an aggressor planning to attack the alliance would in such conditions be strongly tempted, as a preliminary for such an attack, to seize an unprotected Iceland because of its geographical position. Action necessary to evict the invader would in all probability involve great destruction and loss of life ..

"Iceland in enemy hands would represent a great threat to the security of the Atlantic area. The country lies across the natural line of sea and air communications between North America and the European members of NATO. It represents a key position for the defence of these countries against air attack, for the safe conveying of supplies by sea, and for the movement of defensive fighter aircraft between North America and Europe.

"The security of the member countries of NATO would be seriously threatened if these facilities were unavailable in the critical days and hours immediately preceding and following an attack. These considerations underline the importance in present conditions of the stationing in Iceland of armed forces to defend the country and to maintain facilities in a state of readiness and manned by trained personnel. .

"In the view of the Council, the present international situation has not improved to such an extent that defence forces are no longer required in Iceland. Under present circumstances the withdrawal of U.S. forces, now in Iceland on behalf of the alliance as a whole, would leave the country completely undefended. A major deterrent to aggression in the North Atlantic area would no longer exist and a gap would be opened in the chain of defence which maintains NATO security ..

"The North Atlantic Council, having carefully reviewed the political and military situation, find a continuing need for the stationing of forces in Iceland and for the maintenance of the facilities in a state of readiness. The Council earnestly recommends that the defence agreement between Iceland and the U.S.A. be continued in such form and with such practical arrangements as will maintain the strength of the common defence .."

Infrastructure Programme for 1956.

Lord Ismay, the Secretary-General of NATO, announced on June 12 that the North Atlantic Council had approved a £94,000,000 infrastructure programme for 1956.

The total expenditure of £94,000,000 would be divided as follows: (*a*) £38,000,000 for infrastructure in Western Germany, primarily for the development of airfields; (*b*) £46,000,000 for the "seventh slice" of the standard infrastructure programme and the third annual increment of the three-year programme agreed by the Council in April 1953 (see 13061 A); and (*c*) £10,000,000 for the re-allocation of funds which had been distributed in previous years but had not been spent because of modifications in defence planning.

Reviewing the infrastructure programme, Lord Ismay pointed out that about 140 airfields were already operational; that more than 2,000 kilometres (1,243 miles) of pipelines had been laid, and that over 90 per cent of the £147,000,000 telecommunications network had been completed. The member-countries had endorsed the "forward scatter" system for telecommunications and early warning developed in Canada and the U.S.A., and would adopt this technique for NATO telecommunications in Europe. The naval base programme, including some 30 separate projects was also well under way.

General Schuyler, Chief of Staff at SHAPE, announced on July 5 some details of changes in the layout and design of NATO airfields.

General Schuyler said that according to the original plans, 174 airfields should have been ready for operational use by the beginning of 1957. Each of these had been designed for a wing of 75 aircraft, and the average cost of each had been about £3,500,000. The new airfields, however, would be much smaller and capable of accommodating only a squadron of 25 aircraft. They would cost £1,500,000, and, unlike the larger fields (which were designed to include barracks, petrol, lubricant and ammunition stores, etc.), would consist only of a landing-strip and a minimum of installations, with the main support installations about four miles away. All these installations would be easily mobile so that "if an atomic bomb is dropped on an airfield, we hope the planes will be in the air and the supporting installations will be far enough away to be spared the blast, so that they can move to the nearest undestroyed airfield where the planes will land."

After saying that the new target was to have 250 airfields ready within two years, General Schuyler emphasized the difficulties of conversion—partly because work in many cases was too far advanced on the larger airfields, and partly because of the difficulty of finding the terrain in Europe to build three times the number of airfields originally planned. The smaller design, with its greater dispersion, would nevertheless be the plan for the future, and the fields to be built for the new German Air Force would follow this pattern.

German Representations against Possible U.S. and British Troop Reductions in Europe.

At a press conference on July 18, Mr. Dulles (the U.S. Secretary of State) commented on recent rumours about reductions in Western military manpower. These rumours originated in a report in the *New York Times* on July 13 in connexion with a proposal by Admiral Radford (Chairman of the U.S. Joint Chiefs of Staff) which recommended a reduction in U.S. military strength of approximately 800,000 men by 1960. Admiral Radford's plan envisaged the withdrawal of a large part of U.S. overseas forces and the replacement of the five U.S. divisions in NATO by " small token forces " equipped with atomic weapons.

Mr. Dulles said that he saw no political objection to a reduction in the free world's military manpower if such a step were to be recommended by the military leaders. No action, however, would be taken by the U.S.A. which would affect NATO or any other alliance without the agreement of its allies. As regards NATO, Mr. Dulles reiterated the pledge he had given at the London Nine-Power Conference in October 1954 (see 13809 A): that it was the policy of the U.S A. to maintain sufficient forces in Europe, including Germany, to constitute a fair share in the defence alliance

He acknowledged, however, that present developments in nuclear armaments might make manpower cuts in the future likely. Whilst saying that all NATO members should continue to make the contribution agreed upon by the alliance last year, he did not rule out the possibility that the next annual NATO review in September would decide upon troop rductions. He nevertheless stressed that the present NATO goal for Western Germany remained a 12-division army of 500,000 men.

In conclusion, Mr. Dulles said that any general reduction of NATO manpower, including a smaller German contribution to the common defence, would not destroy the Western alliance and would be offset by a greater emphasis on tactical nuclear striking power

Dr. Adenauer, the German Federal Chancellor, discussed the position at a Cabinet meeting on July 21 which was attended by Dr. von Brentano (the Foreign Minister), Herr Blank (Minister of Defence), Dr. Hallstein (State Secretary), and General Heusinger (Chief of the Federal Supreme Military Council), as well as by the German Ambassadors in London, Washington, Paris, and Rome. The Ambassadors had been recalled for consultations because of the concern felt by the Federal Government about Admiral Radford's reported proposals, as well as about the possibility of a reduction in the number of British troops in Germany.

A communiqué said that the meeting had been called because of " the public discussion of a basic change in the military and strategic planning of the U.S.A and Britain envisaging a reduction in the strength of the armed forces accompanied by greater emphasis on nuclear weapons " It continued " The Federal Chancellor would regard the implementation of such a scheme as extremely dangerous, not only for Germany and Europe but for the whole human race In accord with the [German] Cabinet he is of the opinion that a one-sided emphasis on the development of nuclear weapons, accompanied by a reduction in conventional weapons and manpower, would increase the danger of atomic war in the event of a conflict. The reports made by the Ambassadors have confirmed this view of the Federal Government."

It was also announced that the four Ambassadors had been instructed to make " serious representations " to the British, U S , French, and Italian Governments against any such change in military and strategic conceptions.

The Federal Government's Chief Press Officer, Herr von Eckardt, had stated on July 20 that the Federal Government, in addition to opposing any move to reduce conventional weapons and military manpower, would inform the North Atlantic Council at its meeting in September that it intended to carry through its plans to raise a German Army of 500,000 men. It was announced in Washington on July 25 that Mr. Dulles had informed the Federal German Ambassador (Herr Krekeler) that nothing would be done to prevent the Federal Government from raising 12 divisions as originally planned.

In London, Sir Anthony Eden had indicated in a debate in the House of Commons on July 24 that the British Government would make " no sudden, abrupt decision which would throw the whole military gear of our Western unity into confusion." He promised that Britain would consult with her allies before taking any such steps.

An announcement in Bonn on July 26 stated that, owing to the " unsatisfactory and equivocal nature " of the assurances by Mr. Dulles and Sir Anthony Eden, the Federal Government had decided to ask the Western European Union to review Allied strategy and military planning Notes to this effect were transmitted to the Governments of the other member-countries of the Union (Britain, France, Italy, Belgium, Netherlands, and Luxemburg) on July 25. They expressed the view that the proposed reductions should not be made before an agreement was reached with the Soviet Union on controlled disarmament, and that the proposal was a political matter which should be discussed at a W E U. ministerial meeting.

It was announced on Sept. 4 that the W.E.U. Council of Ministers would discuss the question of Allied strategy and military planning at a meeting in Paris in mid-September.

Estimates of Soviet Strength.

A report on the latest appreciation of Soviet military strength was published by SHAPE on July 5 and is summarized below.

Ground Forces. The numerical strength of Soviet ground forces between 1947 and 1956 had remained fairly constant (175 divisions). The mobility and fire-power of all the Soviet divisions, however, had been increased by improved weapons and equipment, and 65 divisions of the present establishment were mechanized and equipped with tanks. The U S.S R., Eastern Germany, and the other East European Communist States had together over 6,000,000 men under arms, of whom about 4,500,000 were in the ground forces. About 3,000,000 of this total were in the Soviet Army.

These figures did not take into account the latest cuts in armed strength announced by the Soviet Government (see 14878 A). The report said, however, that " as yet there has been no evidence that this cut has been actually carried out," and that, although the announced cuts would lead to a reduction in strength of about 1,800,000 men, the U.S S.R. alone " could still have nearly 3,000,000 men in their armed forces " Moreover, the reduction of Soviet forces in Eastern Germany by 30,000 men was only a small proportion of Soviet strength in that country. " Hence the Russian ground potential for a surprise attack on the West would still be great even if the entire cuts were made "

The number of " satellite " divisions was about 80 and had nearly doubled since 1947. The Soviet Union had 22 divisions in Eastern Germany—most of them armoured divisions with tanks and self-propelled guns. In addition, there were 60 more Soviet divisions in the East European " satellite " countries and in Western Russia.

Air Forces. The strength of the Soviet air forces had remained constant in recent years at about 20,000 aircraft, but the increase in potential had risen sharply following the introduction of jet planes. In 1951, about 20 per cent of Soviet fighters had been jet-powered, whereas in 1956 all Soviet first-line light bombers and fighters were jets. Heavy jet- and turbo-prop bombers had also been supplied to operational units since that year

Soviet air strength had also been increased by (*a*) the development of a comprehensive aviation training programme, and (*b*) a programme for airfield construction, special attention being paid to very long runways The number of major airfields in Eastern Europe which could accommodate jet fighters had almost trebled.

The " satellite " air forces had been improved and had a numerical strength of over 2,500 planes, about half of them jet fighters. The network of airfields in Eastern Europe, the control and warning system, and A.A. dispositions were " rapidly becoming capable of providing an effective air defence strip along the western perimeter of the U.S.S R."

Naval Forces. The Soviet Union had about 450 submarines in service, half of them large or medium ocean-going types. The present big naval construction programme laid emphasis on the continued production of large ocean-going submarines. Soviet underwater ordnance stockpiles, together with a considerable air and naval torpedo and mine-laying capacity, " constitute a growing threat, particularly against the lines of communication of Allied Command, Europe "

The report added that the Soviet bloc had developed " a strong capability in the special fields of atomic, chemical, and biological warfare, as well as in the field of guided missiles " The Soviet economy had been able to stockpile whilst at the same time providing equipment and supplies for the Soviet and " satellite " forces, with the result that the U S S.R had more than sufficient tanks, mortars, and anti-tank guns for over 300 divisions.

The Suez Dispute.

A meeting of the North Atlantic Council was held in Paris on Sept. 25, attended by the Foreign Ministers of Britain (Mr. Selwyn Lloyd), France (M. Pineau), Canada (Mr. Lester Pearson), and Belgium (M. Spaak), and by Dr. Hallstein (Western Germany) and the permanent representatives of the other member-countries. A communiqué said that Mr. Selwyn Lloyd, in accordance with NATO practice, had informed the Council of the results of the London conference on the Suez Canal, particularly for the benefit of those NATO members who had not been present at the conference—i.e. Canada, Belgium, Luxemburg, Greece, and Iceland.

Greek Opposition to British Naval C.-in-C., Mediterranean.

The Greek Government announced on Sept. 5, in reply to a request by NATO, that it was not prepared to approve the appointment of a British admiral (Admiral Sir Ralph Edwards) to succeed Admiral Sir Guy Grantham as C.-in-C., Allied Naval Forces, Mediterranean, " in view of the present special conditions prevailing in the eastern Mediterranean, including Cyprus."—(NATO Information Division, Paris - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - Frankfurter Allgemeine Zeitung - New York Times) **(Prev. rep. NATO, 14861 A.)**

A. SHIPPING. — International Waterways. - Review of Existing Control Systems.

In connexion with the Suez Canal crisis, the *Financial Times* (London) published an article on Aug. 3 describing the present position of international waterways other than the Suez Canal—viz., the Panama Canal, the Dardanelles, the Danube, the Rhine, and the Kattegat. The position was summarized in the following manner:

Right of passage	Controlling Agreement	Countries participating
	Panama Canal	
Free to all ships.	Panama Canal Company.	U.S.A. (annual payment to Panama)
	Dardanelles	
Free to merchant ships. Controlled passage of warships.	Montreux Convention.	(Turkey in time of war).
	Danube	
Free to merchant shipping from South Germany to the Black Sea.	International Commission for the Danube Danube River Authority.	U.K., France, Italy. U.S.S.R., Rumania, Bulgaria, Hungary, Yugoslavia, Czechoslovakia.
	Rhine	
Free to merchant shipping.	Central Rhine Commission	U.K., U.S.A., France Western Germany, Belgium, Netherlands, Switzerland
	Kattegat	
Free to all shipping.	Treaties of Copenhagen and Washington	—

The *Financial Times* article is reproduced below (cross-headings) inserted.

The Barcelona Convention. "The first attempt to draw up a comprehensive system of rules applicable to all international waterways was made at Barcelona in 1921, where Russia and the U.S.A. were notable absentees. The outcome was the 'Convention and Statute on the Regime of Navigable Waterways of International Concern,' known as the Barcelona Convention. It has been ratified by 40 countries, including the United Kingdom.

"One of the most important provisions of the Barcelona Convention requires that nations holding sovereignty on particular stretches of international waterway should allow unfettered rights of navigation to vessels flying the flag of any of the contracting States. There are exceptions with regard to warships and other special categories. No charges can be levied except equitable dues for services rendered in maintaining and improving the waterway. Each riparian State undertakes to remove any obstacles and dangers and refrain from measures likely to reduce facilities for navigation. The Convention does not, however, attempt to regulate rights and duties of belligerents and neutrals in time of war, although the Convention continues in force so far as circumstances permit.

The Panama Canal. "Of all international waterways, the Panama Canal is obviously second only in importance to the Suez Canal. Shortly after the establishment of the Panamanian Republic in 1903, the American Government signed a treaty with the Panamanian authorities granting the U.S.A. facilities to build and maintain a canal across the isthmus. By the 1903 Treaty, Panama granted the use, occupation and control of a zone five miles wide on either side of the Canal route in perpetual sovereignty to the U.S.A. The treaty guaranteed free navigation by mercantile and war fleets of all nations. The Americans undertook to pay $10,000,000 down and 250,000 gold dollars per year, this sum was increased by fresh treaties (which also incorporate other concessions to the Panamanians) in 1939 and 1955 [see 14066 B], and now stands at $1,900,000 a year. Since 1951 the Canal and the surrounding territory have been run by the Panama Canal Company, of which all the capital and all the personnel are American.

The Danube. "In Europe, the chief international waterway is the Danube, where navigation has been regulated since 1857. The International Commission of the Danube set up under the provisions of the Treaty of Paris, 1856, was modified by the Danube Convention of 1921, which laid down that the navigation of the Danube from Ulm (Germany) to the Black Sea should be free to ships of all nations without discrimination. Tariffs to provide for the cost of maintaining and improving the waterway were to be levied according to tonnage. The International Commission of the Danube, established in 1857, included all the States bordering the Danube, together with Great Britain, France, and Italy; it continues to meet in Rome. After the Second World War the Rumanian Peace Treaty included provision for the free navigation of the Danube.

"In 1948 the Soviet-bloc countries set up their own Danube River Administration and declared the International Commission to be in abeyance; but the Western Powers have never recognized this Authority, nor the legality of the abrogation of the 1857 and 1921 treaties by the East European States. The International Commission continues to meet in Rome, but it is now confined to attempts to recover pre-war debts.

"Western Germany and Austria do not belong to either the Commission or the Authority, they have made bilateral agreements with the other Danube States to preserve access to the river navigation. Since 1955 the Russians have tried to persuade the Austrian Government to join the Danube River Authority, but so far they have failed.

The Rhine. "Navigation on the other great European waterway, the Rhine, has been under international control since the Convention of Mannheim, 1868. Article I of this Convention stipulated that navigation of the Rhine should be free to the ships of all nations, subject only to service charges. The States bordering the Rhine formed a Central Rhine Commission, which now meets in Strasbourg. The Convention of Mannheim was modified by the Treaty of Versailles, which brought the United Kingdom, Belgium, and Italy into the Central Rhine Commission. This body was reconstituted in 1945, with the United States as a member, but without Italy.

The Kattegat. "The Danish Government levied tolls on ships passing through the Kattegat—which forms the entrance to the Baltic—until 1857, when an American vessel refused to pay. Subsequent negotiation led to the signing of the Treaties of Copenhagen and Washington, by which Denmark waived her right to levy tolls in perpetuity in return for substantial compensation. Since then, the passage of these narrows has been open to ships of all nations without charge. The Danish Government must be given warning of any intention to move warships through the Kattegat.

The Dardanelles. "On the other side of the European land mass, the Dardanelles—connecting the Mediterranean and the Black Sea—have in the past been the cause of many international disputes. The latest agreement affecting the Dardanelles was the Convention of Montreux, 1936, which granted complete freedom of navigation to merchant shipping of all nations in war and peace, subject only to service charges and sanitary measures. Turkey has, however, the right to refuse passage to merchant ships of States at war with her, and to fortify the Straits.

"The regulations applying to passage of warships are more complicated. The total annual tonnage of non-Black Sea powers that may pass through in a year is strictly limited. The Black Sea countries themselves [i.e. the U.S.S.R., Rumania and Bulgaria, in addition to Turkey herself] may send capital ships through the Straits provided they pass singly and are not accompanied by more than two destroyers. Small military craft of Black Sea countries may pass freely. In wartime, these regulations are unaffected so long as Turkey is neutral. If, however, Turkey goes to war or feels herself in immediate danger of war, control of the passage of warships becomes entirely a matter for the Turkish Government.

"The Montreux Convention was valid for 20 years, after which any of the signatories (who included all the main maritime powers of the world) could give two years' notice of denunciation. So far none of them has done so, though Russia has urged the need for revision."

As explained by Sir Anthony Eden on Aug. 2 (see 15013 A), navigation on the Suez Canal is governed by the Convention of Constantinople signed on Oct. 29, 1888, by Austria-Hungary, France, Germany, Great Britain, Italy, the Netherlands, Russia, Spain, and Turkey, and also by the Khedive of Egypt. Article 1 of the 1888 Convention says that the Suez Canal "shall always be free and open, in time of war as in time of peace, to every vessel of commerce or of war without distinction of flag." Article 14, to which Sir Anthony also referred, says that the contracting parties "agree that the engagements resulting from the [1888] treaty shall not be limited by the duration of the acts of concession of the Universal Suez Canal Company"—i.e. although the Company's 90-year concession would expire in 1968, the provisions of the Constantinople Convention would continue to remain in force.—(Financial Times)

B. UNITED KINGDOM. — Victoria Cross Centenary.

The centenary of the institution of the Victoria Cross was commemorated on June 26, when H.M. the Queen reviewed a parade of 300 holders of the V.C. in Hyde Park, London. In addition to British holders of the decoration, contingents of V.C. recipients were present from Canada, Australia, New Zealand, South Africa, India, Pakistan, Ceylon, and the Colonial Empire, together with the relatives of posthumous and deceased winners of the Cross.

The Victoria Cross, which takes precedence over all other Orders and decorations (including the Order of the Garter), can be won only by "a signal act of valour or devotion in the presence of the enemy." It was instituted on Jan. 29, 1856, by Queen Victoria, who conferred the first awards—64 in number—at a military parade in Hyde Park on June 26, 1856. In the century since its inception it has been awarded to 1,344 sailors, soldiers and airmen from all parts of the Commonwealth and Empire and from all walks of life, the recipients including men of many different races, creeds and colours. Three men have won the V.C. twice, one of whom—Captain Charles Upham, of the New Zealand Military Forces—was present at the centenary parade.

A Victoria Cross Centenary Exhibition was held at Marlborough House from June 26 to July 7.—(Times)

A. ORGANIZATION FOR EUROPEAN ECONOMIC CO-OPERATION. — Ministerial Council Meeting. - Agricultural Policy. - Steering Committee for Nuclear Energy. - Trade Liberalization and Tariffs. - Study of Economic Situation. - Reports on Industries.

A Ministerial Council Meeting of the O.E.E.C was held in Paris from July 17-19 under the chairmanship of Mr. Harold Macmillan. It gave special attention to the problems of agriculture, nuclear energy, trade liberalization, and tariffs, and also discussed the general economic situation in member-countries

Agriculture.

The Council approved the proposals of the Ministerial Committee for Agriculture and Food, which suggested how member-countries might reconsider their existing agricultural policies with a view to achieving closer European co-operation. It also expressed " full support " for the measures taken by the Ministerial Committee, which, it hoped, would be able to promote improvements in the structure of agricultural land-holding, increased productivity, co-ordination of agricultural policies, and an expanding intra-European trade in agricultural commodities.

Policy Recommendations of Ministerial Committee. The Ministerial Committee had recommended that each Minister responsible for agriculture should seek to apply to his country's agricultural policy the following guiding principles

(i) the creation of viable farm units sufficiently large to allow the most economical use of the factors of production,

(ii) the adaptation of existing systems of agricultural credit to meet the need for capital in modern farm management,

(iii) the gradual replacement of funds now used for price support by grants or loans for productive investments,

(iv) the expansion of advisory services for farmers,

(v) more flexibility in existing price and income support measures to avoid stimulation of high cost production,

(vi) increased efficiency in marketing systems,

(vii) more flexibility in trade in agricultural products to create conditions for closer co-operation between member-countries.

Decisions of Ministerial Committee. The Committee decided (*a*) that consultations should be arranged between members to discuss price support measures, foreign trade in agricultural products, and export aids, with a view to a gradual co-ordination of policies; (*b*) that members should seek gradually to reduce export aids on agricultural products and not introduce new aids " likely to distort the interplay of competition "; (*c*) to arrange discussions between importing and exporting countries before, during, and after each season on relaxing import regulations for apples, pears and tomatoes,

Report on Agricultural Policies. In its Report on Agricultural Policies, published on May 3, the Ministerial Committee of the O E.E.C. noted that the agricultural economy in most member-countries was strongly influenced by the predominance of small farm units, where the need to secure a minimum income for the farm family determined the pattern of production Although agricultural productivity had increased " remarkably " in the past 6 years, and would probably continue to increase, the Committee expressed the view that much could be done to lower production costs and to adapt production to the needs of the consumer. It also considered that difficulties in international trade might tend to increase because extra productivity was being used by importing countries to improve their self-sufficiency. and by exporting countries to increase their outlets.

The Committee concluded that in most member-countries the predominant objective of agricultural policy was to increase or maintain the standards of living of the agricultural population and to secure a degree of market stability for their products. This policy reflected the discrepancy between the average income of the farm population and that of other comparable industrial groups, which in turn indicated the relatively low value of net output per man in agriculture. " Demographic pressure " was held to constitute a major obstacle to any increase in individual income or improvement in agricultural productivity.

The Committee considered that national agricultural policies should be directed towards ensuring low-cost agricultural production and an increase in *per capita* income for agricultural workers It recommended that each country should pursue a " comprehensive and consistent agricultural policy, with due regard for the interests of other O E E.C members " The general adoption of new measures to relax import restrictions, it stressed, would be made easier " if member and associated countries agreed to abolish or modify schemes of direct or indirect aid to exports of agricutural and food products, whatever the nature of the organization responsible for their administration at national level might be "

Nuclear Energy.

Decisions of Council.

The Council approved the Report of the Special Committee for Nuclear Energy, published on July 17, as a basis for the future work of the O.E.E.C., and decided to set up a Steering Committee for Nuclear Energy, consisting of representatives of all interested member-countries, to carry out the functions laid down by the Council (see below). The Canadian and U.S. Governments were to be associated with the work of this Committee.

Joint Undertakings. The Council also decided (*a*) that if members or associated countries declared their intention to set up a joint undertaking with a view to producing or using nuclear energy for peaceful purposes they would be permitted to undertake the necessary work for this purpose as a group within the Organization, whatever the position adopted by other members, (*b*) that it would approve, as soon as possible, the statutes of study groups set up by members and associated countries for the technical, financial and legal preparations for proposed joint undertakings; (*c*) that these groups should keep the Council informed of their progress.

Belgium, France, Western Germany, Italy, Luxemburg, and the Netherlands (the members of the European Coal and Steel Community and of Euratom) stated during the meeting that they had formed a study group to consider the problems of setting up a plant for the separation of uranium isotopes (see below) Denmark, Sweden, Switzerland and Turkey announced their intention to participate in a study group on this question.

Austria, Denmark, Norway, Portugal, Sweden, Switzerland, Turkey and the U K. announced their intention to form a study group to examine the problems of setting up plant for the chemical separation of irradiated fuels (see below), and the Euratom countries stated that they had set up amongst themselves a group which would take part in this study group's activities

The Council further agreed to establish (*a*) a Working Group of experts on reactors to consider the technical, financial and legal problems raised by the construction and operation of prototype, testing, or research reactors in the form of joint undertakings, and to make suggestions to the Steering Committee as to types which might be adopted for joint ventures,

(*b*) a similarly empowered Working Group of experts on reactors and experts in electrical power supply to consider the problems raised by the construction and operation of nuclear power stations as joint undertakings;

(*c*) a Working Party for liasion with the Brussels Inter-Governmental Conference of the " Messina Powers " [i.e. the members of the European Coal and Steel Community who took part in the Messina conference in June 1955—see page 15030.]

(*d*) an international security control to ensure that the operation of joint undertakings and the implementation of bilateral or multilateral arrangements or use of materials submitted to the control should not further any military purpose.

Intra-European Trade in Atomic Materials and Equipment. The Council agreed that, in the first instance for one year, member-countries should refrain from introducing new, or aggravating, existing obstacles to intra-European trade in products of particular interest to the nuclear energy industry, including nuclear fuels and machinery and a wide range of goods used in producing nuclear energy as well as for other purposes, e g thorium, lithium, zirconium, bismuth and beryllium, radiation detection instruments, cyclotrons, protective containers for radioactive materials, turbines, electric generators, and centrifuges.

Member-governments were specifically debarred from applying new quantitative restrictions on imports and exports of these goods, from reducing existing quotas, transferring any of the products concerned to the State trading sector, or raising or introducing Customs duties on them.

The obligations resulting from this decision would not apply to Greece or Turkey, or, for certain items, to France. Members would be permitted to derogate from the provisions for reasons of national security, but not for balance-of-payments reasons, whilst members of Euratom were in addition allowed to derogate if the terms of their Treaty made it necessary to introduce State trading or to limit exports of certain materials.

Duties of Steering Committee. The Steering Committee was instructed to draw up a draft statute for the international security control, and to open discussions so that agreement might be reached on the arrangements to be made between O E.E.C. and the proposed International Atomic Energy Agency (see 14667 A) as to the exercize of control in the territories of countries participating in both bodies.

The Steering Committee was also instructed (i) to examine jointly with the Steering Board for Trade measures to achieve the greatest possible freedom of intra-European trade for products particularly connected with the production of nuclear energy for peaceful purposes,

(ii) to undertake a detailed study of the problems of protection against radiation in the mining, transport, and use of radioactive substances, and to prepare, in co-operation with the Insurance Sub-Committee, a report on atomic risk insurance,

(iii) to take steps to further the improvement of training in the field of nuclear energy in member-countries;

(iv) to continue, in conjunction with the Standardization Sub-Committee of the European Productivity Agency, the work begun in defining standards for nuclear materials and equipment;

(v) to draw up a draft Statute for the proposed European Nuclear Energy Agency and to make proposals relating to the position of the Steering Committee within this agency;

(vi) to study the arrangements to be concluded between the Organization and Euratom, with a view to co-ordinating or unifying control systems.

Reports to the Council.

The report of the Special Committee on Nuclear Energy dealt with the following main problems.

Uranium Requirements of O.E.E.C. Countries. The Special Committee estimated that the total capacity of nuclear reactors to be installed by O.E.E.C. members, other than the U.K., would amount to 12,500 megawatts in 1965 and 38,500 megawatts in 1970. Such an expansion would require increased supplies of fuel with a higher fissionable content than natural uranium, and the Committee concluded that the production of electrical power from fuel enriched in isotope 235 might provide a valuable interim solution until plutonium or uranium-233 were available in sufficient quantity, and until their use for industrial purposes had been perfected.

Gross requirements of O.E.E.C. countries, other than the U.K., for "additional" uranium-235 were estimated at between 9,600 and 21,000 kg. in the period 1960-65, and between 16,600 and 35,000 kg. in the period 1965-70.

Uranium Isotope Separation Plant. The Special Committee agreed that if a joint uranium isotope separation plant should be begun in the immediate future, the already highly-developed gaseous diffusion system would be the best to adopt, but if outside countries (in particular the U.S.A.) made supplies of enriched fuel available to cover members' total requirements for the next few years, other systems of separation should be considered. The Committee felt, however, that only when members had fuller information about the U.S. offer of Feb. 22, 1956 (see 14765 A) could they make definite arrangements.

The Committee envisaged construction of a plant to process about 500 tons of natural uranium p.a., costing an estimated $50,000,000, plus $20,000,000 for an electric power station and $5,000,000 for an ancillary plant to produce uranium hexafluoride from raw uranium. The complete plant would require about four years to come into production.

Processing of Irradiated Fuels. The Special Committee estimated that the gross quantity of irradiated fuels available for treatment for separating new fissionable materials (such as plutonium) would be of the order of 3,500 tons a year in the period 1960-1970. The cost of building a plant to process 500 tons p.a. of irradiated natural or slightly enriched uranium from nuclear reactors was estimated at about $35,000,000, and the cost of processing at $14,000 a ton. Up to four years would be required to design and construct the plant.

Heavy Water Requirements. At the beginning of 1956 five heavy water research reactors were in use in member-countries; others were being constructed or planned, and the Special Committee thought that expenditure on research might be reduced by co-ordination of effort.

Annual requirements of heavy water by O.E.E.C. countries were estimated at about 400-500 tons for the period 1960-70. Production in 1956 was confined to Norway, where about 12 tons p.a. of heavy water was produced by electrolysis of ordinary water. This output was expected to be increased gradually to 18 tons p.a., and additional plants in Western Germany, Switzerland and France, using the liquid hydrogen distillation process were expected to produce a further 10 tons p.a. in 1957. Proposals had also been made for substantial production in Austria, Portugal, the Belgian Congo, and French African Territories.

In Iceland the presence of geo-thermal steam was thought likely to permit economic production of some thousands of tons of heavy water p.a. by dual-temperature exchange with hydrogen sulphide, but several technical problems remained to be solved. [At the Ministerial Council meeting, Sir Edward Boyle, speaking for Britain, said that British co-operation with New Zealand led her to believe that it was not practicable or economic for European countries to start manufacturing heavy water—see 14658 B.]

The average investment required to produce 100 tons of heavy water p.a. was estimated by the Special Committee at $30,000,000, with a further $15,000,000 for electric generating plant; but if production of heavy water tied to industrial production of hydrogen proved technically possible and commercially efficient, it was thought that Western European requirements could be covered by ancillary works attached to industries using large amounts of hydrogen; in those circumstances production would be widely decentralized and largely in the hands of private industry. An economic price for heavy water for use in electricity production would be about $62 a kg.

Prototype and Testing Reactors. Two types of heterogeneous prototype reactors had actually been built: (i) graphite reactors in Britain, France and Belgium, and (ii) heavy water reactors in France, Sweden and at the Dutch-Norwegian Institute at Kjeller, Norway (see 11918 E). The study of homogeneous reactors was still relatively undeveloped in Western Europe.

France, Sweden and the U.K. would have testing reactors in operation in or before 1958, Belgium and the Netherlands expected to have one by 1959, and Western Germany, Austria and Switzerland hoped to have one by 1970.

Joint Nuclear Power Stations. The Electricity Committee, which dealt with this particular problem, reported that—depending on their access to ample conventional energy supplies at reasonable prices—members might not all feel it a matter of equal urgency to set up nuclear power plants. It suggested that joint action might be justified.

(*a*) in constructing one or more small nuclear power stations of novel design;

(*b*) in constructing a power station of already tested design of a capacity of about 100,000 kw or more, involving a capital outlay of some $55,000,000;

(*c*) in co-ordinating independent construction of several low-capacity nuclear power stations of different designs, with the aim of exchanging information and sharing risks.

The Electricity Committee suggested that the financing of a 100,000 kw power station should provide for complete amortization within 15 years, with an average rate of interest of 4½ per cent, which would make the annual fixed charges 9.3 per cent, or an estimated $3,250,000.

At an average running time of 6,000 hours p.a. the fixed charges would equal 0.55 cents per kwh. Energy prices would depend on technical developments, the cost of fissile materials, and the market for the by-product plutonium, but the Committee estimated that they would range between 0.9 cents and 1.2 cents per kwh, compared with an estimated cost of 0.75 cents per kwh for thermal production. It was pointed out, however, that the cost of producing electricity by conventional thermal methods was likely to rise with ever-increasing prices of fuel, while the costs of nuclear energy would fall as technical advances were made.

Liberalization of Trade.

The Council decided to extend until Dec. 31, 1957, the obligation on member-countries (other than Greece) to liberalize 90 per cent of their imports on private account from other members. The Steering Board for Trade was also instructed to report to the Council before April 1, 1957, on the possibility of including imports on Government account in the computation of liberalization percentages.

The liberalization position of the member-countries, as reported on June 1, 1956, was as follows [subsequently, the U.K. raised its total liberalization percentage to 94 on July 22 and Norway raised its total percentage to 77.5 on July 1]:

	Percentage for			
	Food and feedingstuffs	Raw materials	Manufactured goods	Total percentage
Austria	79.4	98.4	83.3	88.7
Benelux	69	98.6	91.8	91.1
Denmark	80.6	98.1	77.5	85.5
France	72.9	96.3	71.6	82.3‡
Germany, W.	81.3	98	96.2	91.5
Greece*	(100)	(100)	(89)	(95)
Iceland†	56.5	40.9	15	29
Ireland	84.6	97	88.9	90.2
Italy	97.5	100	99.2	99.1
Norway	77.5	88.4	70.1	75
Portugal	88.2	98.9	91.7	93.7
Sweden	79.6	100	90.6	92.6
Switzerland	66.7	100	97.2	92.5
Turkey†	0	0	0	0
U.K.	89.8	83.6	78	84.8
Member-countries combined	82.4	93.7	82.6	86.6

Reference Year 1948 except Germany (1949) and Austria (1952).

*Greece was not obliged to liberalize her imports, but in fact applied an almost total *de facto* liberalization, which has not been taken into account in the total percentage of liberalization for all member-countries given above.

†Turkey and Iceland were authorized temporarily not to comply with their obligations, because of their balance-of-payments position.

‡Increased on April 7, 1956.

On May 11 it was announced that a difference which had arisen between the U.K. and Italy over the position of British insurance companies operating in Italy, and which had been referred to the O.E.E.C. Council by the U.K. under Article 34 of the Code of Liberalization, had been settled on the basis of the Council's recommendations that the Italian Government should relax certain regulations affecting the deposits and reserves of foreign insurance companies.

Tariff Problems.

The Council decided that in view of the proposals made by the "Messina" powers (Belgium, Luxemburg, the Netherlands, France, Western Germany and Italy) to set up a European Common Market or Customs Union (see page 15030)—now under consideration by the Brussels Inter-Governmental Committee—a special Working Party composed of representatives of all member-Governments wishing to take part should be set up to study the possibility of a multilateral arrangement between the proposed Customs Union and other member-countries of O.E.E.C.

The Working Party was asked to examine, in particular, the possibility of setting up a free trade area to include the Customs Union and the other member-countries, and to report to the Council not later than Dec. 31, 1956. On the basis of the report the Council would then decide early in 1957 whether to instruct the Special Working Party to carry out its work as quickly as possible or, if the

report offered no prospect of substantial progress before the end of 1957, to instruct the Steering Board for Trade to complete the study of an automatic plan for the reduction of tariffs on 11 "European commodities" (i.e. commodities imported by each member-country mainly from other members), which would come into operation by Jan. 1, 1958.

The Council also agreed that the Organization should undertake without delay a study of price disparities between members and examine their causes, and that the Steering Board for Trade should report on the general situation as regards trade obligations and barriers to trade before Oct. 31, 1957.

Other Council Decisions.

Examination of Economic Situation. In view of the dangers inherent in continued inflationary pressure, the slowing-down of the expansion of production in member-countries, and the substantial widening of debtor and creditor positions in the E.P.U., the Council agreed to set up a Ministerial Working Party to examine the current economic situation in member-countries with special reference to a harmonization of policies.

Liaison with Brussels Inter-Governmental Committee. The Council agreed to pay special attention to the co-ordination of the Working Parties set up to co-operate with the Brussels Inter-Governmental Committee under the above decisions concerning joint action by members in the field of nuclear energy and on the proposed free trade area in Europe. It was agreed that a Special Group might be set up for the purpose, and also to consider general problems arising from the work of the Brussels Committee.

Working Party on Energy. The Council approved in principle the conclusions of the Commission for Energy in its Report issued on May 8 (see 14929 A), and set up a Working Party of senior officials concerned with the co-ordination of energy supplies to submit proposals relating to:

(*a*) the action which should be taken on the conclusions of the Commission for Energy;

(*g*) other aspects of the Report which might be suitably referred to the appropriate bodies of O.E.E.C.; and

(*c*) the form and terms of reference of a European Energy Commission to be established within O.E.E.C. to carry on the work of the Commission for Energy.

Other Developments in the O.E.E.C.

Fiscal Committee.

The Fiscal Committee, set up to study questions relating to double taxation and similar problems, held its first meeting in Paris on May 23-24 under the chairmanship of Dr. A. J. van der Tempel, Deputy Director-General of the Netherlands Ministry of Finance.

European Productivity Agency.

The Council decided to extend the life of the E.P.A. (which was due to expire in June 1956) until June 30, 1960. The work carried out by the E.P.A. in the past year included the sponsoring of an international conference on modern techniques of management at Deauville on June 4-8, 1956, and the preparation of a bibliography of productivity.

Reports on Industries.

Recent reports on "trends in economic sectors" covered coal (see 14929 A), iron and steel, engineering, marine transport, and textiles. Summaries are given below:

Iron and Steel. The Iron and Steel Committee concluded that increases in members' crude steel production from 66,700,000 tons in 1954 to 77,400,000 tons in 1955 corresponded to a "sound and non-speculative improvement in demand." The virtually full utilization of capacity had reduced the normal margin of flexibility between supply and demand, but the Committee did not think that a shortage of iron or steel would retard general economic development in O.E.E.C. countries in the near future. By 1960, however, the supply prospects of both coking coal and scrap gave cause for some anxiety, and these factors seemed the most likely to limit future expansion of steel output.

Engineering Industries. The Machinery Committee noted that during 1954 and 1955 the demand for engineering products had increased progressively, and considered that domestic demand for durable consumer goods was likely to continue to expand more rapidly than for the other elements of private consumption, such as food or textiles. In 1954 about 6 per cent of the active working population of O.E.E.C. countries was directly employed in engineering industries, the gross value of their production amounting to nearly $40,000,000,000.

General prospects for the engineering industry in O.E.E.C. countries were thought to be good, despite shortages of technicians and skilled workers. But competition from non-member countries was expected to increase, and, in particular, "the tendency of certain Eastern European countries to employ ever more persevering methods to expand their sales of engineering products on all markets" had developed markedly in the second half of 1955 and early 1956.

Shipping. The Maritime Transport Committee deplored the continued prevalence of uneconomic flag discrimination in "the most international of all industries," but noted that a wide measure of liberalization in shipping matters had been achieved by O.E.E.C. countries. Their report also drew attention to the problem of the growth since 1939 of fleets registered under "flags of convenience," the most important of which were:

	(thousands of gross registered tons)			
	Dec. 1939	Dec. 1953	Dec. 1954	Dec. 1955
Liberia	no register	1,619	3,206	4,504
Panama	717	3,942	3,980	3,933
Costa Rica	—	179	263	448
Honduras	84	413	431	395

More than half the ships registered under these four flags at Dec 31, 1955, were tankers, and at the same date the Liberian merchant fleet as a whole was the fourth largest in the world.

The report pointed out that the main reason for these registrations was undoubtedly the very favourable incidence of taxation in the registering countries. Registration under the Liberian flag cost $1 20 a ton net, whilst thereafter an annual tonnage tax of $0.10 a ton was levied with a guarantee that it would not be increased for 20 years. Panamanian registration cost $1 a ton and an annual tax of $0.10 was levied thereafter. Owners of ships flying "flags of convenience" were therefore more favourably situated than their competitors to continue trading in the event of a depression, and were able to build new tonnage out of untaxed profits more readily than owners running ships under their own national flags.

Textile Industries. The Textile Committee reported a "deep-seated malaise" in the textile industry in member-countries, which particularly affected the cotton industry. Uncertainty about the raw cotton policy of the U.S.A. had led to "hand-to-mouth" buying of raw cotton which tended to increase production costs, but the evolution of "cheap labour" cotton industries in Asia was taken as the main long-term problem of European producers, although the export of goods from Eastern countries at "political" prices, bearing no relation to production costs, was also noted.

The rapid development of a national cotton industry in Pakistan, benefiting from cheap labour and cheap indigenous material, and sheltered behind a high tariff, was thought likely not only to affect European producers directly but also to divert Japanese goods from traditional markets to other markets in competition with European goods. Indian cotton production also benefited from very cheap labour, and obtained its raw materials below world prices because of the Indian export tax on raw cotton.

Japan, with low wages, competed successfully with European goods in most export markets outside Europe and could probably expand her production capacity rapidly if she had an opportunity to sell more textile products in members' domestic markets. The Committee emphasized that the overhanging threat of Japanese goods to members' home markets might well be more acute for rayon fabrics than for cotton, because Japan bought her cotton at world prices but benefited from a lower wage level in the rayon producing industry, as well as in textile manufacture.

The Committee concluded that if Asian imports into Europe increased, as they seemed likely to do, many member-Governments might find themselves forced to consider emergency measures such as curtailing their lists of "liberalized" goods for intra-European trade. On the other hand the Committee believed that "vigorous action would lead to a substantial increase in the quantity of textile products consumed in Europe," especially if Governments took "specific fiscal measures permitting an increase in home consumption of textiles."

The Committee also drew attention to the "unsatisfactory repercussions" of artificial aid given by member-Governments to exports and of supplementary duties on imports. The effects of such measures, the Committee said, were often far greater than the imposing Government stated that it meant them to produce, and endangered the very existence of certain sectors of the textile industries of competing member-countries.

Following the publication of the Textile Committee's report in February, 1956, a special *ad hoc* study group was set up by the O.E.E.C. Council to examine the problems of Europe's textile industry. It held its first meeting in July under the chairmanship of Signor A. Pini (Italy).

O.E.E.C. Appointments.

The U.K. was re-elected on July 31 to the chairmanship of the Council for the year 1956-57. It was announced that Mr. Harold Macmillan, the Chancellor of the Exchequer, would be chairman of the Council at Ministerial level and Sir Hugh Ellis-Rees chairman at the official level. M. Gérard Bauer (Switzerland) was re-elected chairman of the Executive Committee for 1956-57.

Signor Gian Gaspare Cittadini-Cesi was appointed Second Deputy Secretary-General of O.E.E.C. on July 6 in succession to Signor Guido Colonna. The First Deputy Secretary-General, Mr. Henry Lintott, submitted his resignation on Aug. 17 in order to return to the British Civil Service.—(O.E.E.C. Information Division, Paris - Times - New York Times - Le Monde - Neue Zurcher Zeitung) **(Prev. rep. O.E.E.C. Council 14788 A; Agriculture, 14383 A; Commission for Energy, 14929 A.)**

A. INDIA. — New Chairman of State Bank.

It was announced in Delhi on Aug. 26 that Mr. H. V. R. Iyengar, Secretary of the Ministry of Commerce and Industry, had been appointed chairman of the board of directors of the State Bank of India in succession to Dr. John Matthai, whose resignation had been confirmed on June 22.—(The Statesman) **(Prev. rep. State Bank, 14279 F.)**

A. SOUTH VIETNAM. — Adoption of New Constitution. - Measures against Opposition Organizations. - French Embassy established in Saigon.

The new Constitution of South Vietnam, which had been unanimously approved by the Constituent Assembly, was officially promulgated on July 7—the second anniversary of President Ngo Dinh-Diem's accession to power.

The Constitution provided for a division of powers between the Executive, headed by the President, the Legislative Assembly, the members of which were excluded from public office, and the Judiciary, headed by a Constitutional Court. Both the President and the Assembly would be chosen by direct suffrage, the former for six years and the latter for four. M. Ngo Dinh-Diem was declared to be the first President of the Republic and eligible for re-election, and was empowered to choose the first Vice-President, whilst it was provided that the Constituent Assembly should serve as the first Legislative Assembly. Legislation might be sponsored by either the President or the Assembly, and in the event of a serious disagreement between them the issue would be referred to a national referendum. When the Assembly was not in session the President might legislate by decree, subject to review when the Assembly convened. The President might veto laws passed by the Assembly, but a three-fourths majority of the Assembly might override his veto. Freedom of speech, of the Press, and of assembly were guaranteed, but during the next four years the President might suspend these rights by proclaiming a state of emergency.

Security Measures.

Armed opposition to the Government continued during the summer, several thousand Caodaist troops being reported in revolt during July and Binh-Xuyen forces being active between Saigon and Dalat. Unrest was also reported in the trade union movement, in which connexion the Vietnamese Confederation of Christian Workers compelled the Government early in July to release a number of arrested trade unionists by threatening to call a general strike.

Strong measures were adopted by the Government during July and August against the various sections of the Opposition. M Le Van-Thien, general secretary of the Socialist Party and a member of the "Revolutionary Committee," was arrested in July on a charge of having visited the dissident Caodaist zone to establish contact between the rebels and the Committee, which had adopted an attitude of open opposition to the Government On Aug. 17 Lieutenant Nguyen Van-Phuoc, an officer with a distinguished war record, was sentenced to death for entering the Binh-Xuyen zone, and it was announced that 23 prominent political figures, including M. Nguyen Huu-Than (a former vice-president of the Assembly of the French Union) and M. Tran Van-An (formerly Minister of Information in General Van-Xuan's Cabinet) would be tried by court-martial on a charge of participating in anti-Government activities during the spring of 1955. Colonel Nguyen Thanh-Danh, a brother of the former Caodaist commander (General Nguyen Thanh-Phuong), and general secretary of the Caodaist party *Vietnam Phuc Quoc Hoi*, was arrested on Aug. 20.

A decree signed by President Ngo Dinh-Diem on Aug. 22 prescribed sentences of death or penal servitude for any Vietnamese or foreigner convicted of passing on to foreign Powers or Communist organizations information considered vital to national security.

Economic Measures.

A communiqué issued on July 1 by the Governor of the National Bank of Vietnam and the exchange control authorities announced the establishment of a limited free market in foreign exchange. The measure was aimed at attracting foreign capital, enabling Vietnamese nationals to repatriate foreign currency, and stamping out the black market.

Under the new system, the official rate of 35 Vietnamese piastres to the U.S. dollar will continue to be used for all import and export transactions and for certain transfers of funds from Vietnam; business profits and foreign residents' savings, however, will be transferable at the free rate, which was provisionally fixed at 72 piastres to the dollar. The consent of the National Exchange Office was required for all transfers, whether at the free or the official rate

Relations with France.

The French Government accepted on July 21 a South Vietnamese request that the French High Commissioner's Office in Saigon should be transformed into an embassy, at the same time the South Vietnamese Government approved the nomination of M. Jean Payart as the first French Ambassador to South Vietnam. M. Hoppenot, the last French High Commissioner, had left Saigon a few days earlier.

The South Vietnamese Government announced on July 24 that its officers would in future be sent to the U.S.A., and not to France as in the past, to complete their military training, as they might be exposed in France to "Communist propaganda." The French Press attributed this decision to the fact that South Vietnamese officers had established contact while in France with General Nguyen Van-Vy, the former Inspector-General of the Army, and other political refugees who had refused to return to Vietnam.—(Le Monde - Le Figaro)

(Prev. rep. South Vietnam, 14949 A.)

B. UNITED NATIONS. — Food and Agriculture Organization. - Mr. Sen elected Director-General.

Mr. B. R. Sen, the Indian Ambassador in Tokio, was elected Director-General of the U.N. Food and Agriculture Organization (FAO) on Sept. 20 in succession to Dr. Philip V. Cardon (U.S.A.), who had resigned in March through ill-health.

The election was made at a special FAO session held in Rome from Sept 10-20, three candidates being nominated for the vacant post of Director-General—Mr. Sen, Dr. John H. Davis (U.S.A.), and Mr S. L Mansholt, the Netherlands Minister of Agriculture. A simple majority (i.e. more than half the votes cast) was required for election After two inconclusive ballots on Sept. 18 (on the second of which Dr. Davis failed by only one vote to secure election), Mr. Sen was elected on the third ballot (held on Sept. 20), receiving 42 votes against 29 for Mr Mansholt. Dr. Davis withdrew from the third ballot, the U S. delegation having announced that it had the fullest confidence in both Mr. Sen and Mr. Mansholt and would accordingly abstain from voting.

Mr. Sen (58), formerly a senior member of the Indian Civil Service, served as Director-General of Food in New Delhi during the war, and later as Permanent Secretary to the Indian Ministry of Agriculture. Prior to his appointment to Tokio (see 14028 C) he had been Indian Ambassador in Washington and Rome, where he took a close interest in the work of FAO. He was educated at the Universities of Calcutta and Oxford. (U.N. Information Centre, London - Times) **(13492 A.)**

C. CANADA. — The French-speaking Population.

The Canadian Department of External Affairs published the following statistics in July (based on studies by Dr. Charles Bilodeau, of Laval University) relating to the population of French origin in Canada and its percentage of the total population:

	Total Population	Population of French origin	Percentage of population of French origin
Newfoundland	361,416	9,841	2.7
Prince Edward Island	98,429	15,477	15.7
Nova Scotia . .	642,584	73,760	11 4
New Brunswick .	515,697	197,631	38 0
Quebec .	4,055,681	3,327,128	81 9
Ontario	4,597,542	477,677	10 4
Manitoba	776,541	66,020	8.5
Saskatchewan	831,728	51,930	6 0
Alberta	939,501	56,185	6 0
British Columbia	1,165,210	41,919	3 5
Yukon and N W. Territories	25,100	1,599	15 6
Total .	14,009,429	4,139,167	30.2

The 1951 census, from which the above statistics are taken, gave the following data about languages spoken by the population—English only, 9,387,395 (67 per cent); French only, 2,741,812 (19.5 per cent); English and French, 1,727,447 (12.3 per cent); neither English nor French, 152,775 (1.2 per cent). (Canadian Department of External Affairs, Ottawa)

(Prev. rep. 1951 Census, 12175 C.)

D. SOVIET UNION. — Lenin Prizes.

It was announced in Moscow on Sept. 7 that the International Stalin Peace Prizes instituted in 1949 had been renamed International Lenin Peace Prizes, ten of which would be awarded annually. In addition, the national Lenin Prizes instituted in 1925 but discontinued in 1935 would be revived.

The International Lenin Prizes, like the former Stalin Prizes, will be awarded to "citizens of any country in the world . . . for outstanding services for the promotion of peace among nations" Each recipient will receive 100,000 roubles, a gold medal bearing Lenin's portrait, and a diploma.

The Lenin prizes, 50 in number, will be awarded annually to Soviet nationals for outstanding work in science, industry, and the fine arts. Thirty prizes will be awarded for new ideas in construction, machine-building, instrument-making, metallurgy, power engineering, and other branches of industry, including automation, 12 for scientific work in physics, mechanics, mathematics, engineering, chemistry, geology, geography, biology, agriculture, medicine, military science, and social science, and eight for outstanding work in literature, the fine arts, music, the theatre, and cinema production. Each prize will be of 75,000 roubles (£6,700).

The International Lenin Peace Prizes and the national Lenin Prizes will be awarded by two committees under the U.S.S.R. Council of Ministers.—(Soviet Weekly) **(10463 D.)**

E. GUATEMALA. — Ending of State of Siege.

The state of siege imposed on June 24 was ended on Aug. 25, all suspended constitutional rights being restored at the same time.—(New York Times) **(Prev. rep. 14959 D.)**

SEPTEMBER 22—29, 1956

A. THE SUEZ CRISIS. — Canal Users' Association formed by Britain, France, and U.S.A. - Recall of British Parliament. - Debates in House of Commons and House of Lords. - Sir Anthony Eden's Statement. - Rejection of Opposition Censure Motion. - Mr. Dulles on U.S. Suez Policy. - Anglo-French Note to Security Council. - Convening of Second London Conference on Suez. - Egypt rejects Proposed Canal Users' Association.

Both Houses of the British Parliament were recalled on Sept. 12-13 for a two-day debate on the Suez crisis. The Prime Minister (Sir Anthony Eden), who opened the debate in the House of Commons, announced that the British Government, in agreement with the U.S. and French Governments, had decided to set up a provisional Suez Canal Users' Association which other countries would be invited to join and which, it was hoped, would prepare the way for a permanent system to be established with the full agreement of all the interested parties.

The House of Commons Debate.

Sir Anthony Eden spoke as follows in opening the debate in the House of Commons:

"Nothing which the Government have done since the debate in August has in any way changed the policy which the Foreign Secretary and I described on that occasion On the contrary, the Government have done, and are doing, everything in their power to obtain a peaceful settlement which takes account of Egypt's legitimate interests, and which adequately safeguards the interests of those many nations vitally concerned in the Canal . . .

"Many alternatives have been canvassed in the weeks we have been away, but the fact is that none is immediately practicable. The alternative route round the Cape would be very expensive, and there are not the tankers to maintain the supplies we need. It is true larger tankers are being built, but it would take several years before they could be ready in sufficient numbers, and the capital cost would be enormous Meanwhile the longer sea-haul would increase freight charges, adding to the costs of production and the cost of living here. It is therefore beyond dispute that any prolonged interference with traffic through the Canal must be a grievous blow to the economy of Western Europe. In this country at least there would be serious industrial dislocation and unemployment.

"It has been said that what matters is the right of free passage through the Canal, which is granted by the 1888 Convention, and that so long as Colonel Nasser is prepared to uphold it, all will be well. I have two comments to make about this. First, the Convention is not in itself sufficient to safeguard the rights of the user-countries. The Convention and the various concessions granted to the [Suez Canal] Company are closely interlocked; and not only is the Suez Canal Company mentioned in more than one Article of the Convention, but the preamble states that its purpose is to complete the system under which the navigation of the Canal was placed by the concession granted to the Canal Company. In other words, the operation of the Canal by the Suez Canal Company was part of a comprehensive system designed by the Agreement of 1888 to ensure the free use of the Canal for all the Powers concerned. By purporting to nationalize the company, Colonel Nasser has destroyed the balance of this system and removed one of its essential guarantees . . .

"But there is more to it than this. The rights of the user-countries are not derived from the 1888 Convention alone. They have also become established by long and uninterrupted use of the Canal They are not limited to the free right of passage defined in the Convention. The users are also entitled to insist on efficient operation, administration, and maintenance of the Canal in the interests of all the users without any discrimination, and they have also the right to expect that the level of dues shall be reasonable It follows from this that its revenues cannot lawfully be exploited by one country for its own purposes.

"It may be argued that the Canal Company is an Egyptian company and that in nationalizing it Colonel Nasser is only exercising his sovereign rights; that he is only doing what we have done here. That is not so. The Company has always had an international character, and with the passage of time this character has been increasingly apparent . What Colonel Nasser has in fact done is to take away the international character from the Canal Company; and there is really no analogy whatever with the industries which have been nationalized here, and which were entirely our domestic concern.

"Nationalization, in the accepted sense of the term, means the transfer of an enterprise from private control to public control It does not mean the transfer of an enterprise from international control to national control. Nationalization is indeed a wholly inappropriate word to apply to Colonel Nasser's action I suggest that the word 'seizure' would be more accurate But if that should offend anybody we shall have to coin a new and very hideous word, the accuracy of which cannot be challenged. What Colonel Nasser has done is to 'de-internationalize' the Canal.

"No nation has the right unilaterally, and in defiance of existing agreements, to remove its international character from the most important waterway in the world. It was and is an illegal act. It is a breach of a contract. It is implicit in the preamble of the Convention that so long as the Canal Company's concession exists, the operation of the Canal should not be entrusted to any single Power but should be operated by the Company for the benefit of all nations. The sudden dissolution of the Company 12 years before the concession runs out must clearly be regarded as a breach of Egypt's international undertakings.

"In all these circumstances, including the way in which the Company was seized and its assets confiscated, it is hardly surprising that H.M. Government and the other nations principally concerned found themselves unable to accept the assurances which Colonel Nasser has so far been willing to give. They declined to leave the operation of the Canal, on which the livelihood of so many nations depends, in his hands alone"

Speaking of the London Conference, the Prime Minister continued: "There were many who had little hope that the conference could achieve results. However, in the event all these fears were falsified, and the conference showed a remarkable consensus of opinion. No fewer than 18 nations, with one reservation by Spain, supported the plan put forward by Mr. Dulles. That this result was achieved was due in large measure to skilful and patient steering by the chairman, the Foreign Secretary [Mr. Selwyn Lloyd]. I have heard that on all sides from the foreign Powers who were present. It was also due to Mr. Dulles' effective and vigorous advocacy of the plan, and it was a commendable feat to reach so much agreement on so complicated an issue in so short a time.

"The only Government which appeared consistently to be opposed to any form of internationalization of the Canal was the Soviet Government. The Soviet representative perpetually repeated attacks on the alleged colonialism of the maritime Powers He ignored the fact that, alone among the 18 nations, Soviet Russia has in the years since the war enormously extended its territorial boundaries and increased the number of its subject peoples . . .

"Mr. Menzies and his colleagues went to Cairo, explained the proposals of the 18 Powers with great care and patience, and did all they possibly could to persuade Colonel Nasser that the agreement which they sought was reasonable, fair, and could be profitable to Egypt. They made it abundantly clear that such an agreement would fully recognize Egyptian sovereignty and would provide a basis of confidence for the maintenance and future development of the Canal. But unfortunately, despite the eloquent pleading of Mr. Menzies, supported by his colleagues in unanimity, no progress was made in Cairo.

"Colonel Nasser rejected the proposals without weighing their merits or listening to reason. This was certainly no fault of those who travelled to see the President of Egypt. The Committee of Five worked with unity and wisdom. Mr. Menzies led it with a distinction which was recognized by his colleagues on the committee and by all the nations represented. Colonel Nasser was surely ill advised not to heed so powerful a combination of nations, representing more than 90 per cent of the traffic which passes through the Canal. I cannot help feeling that when the history of these times comes to be written, President Nasser's refusal of the plan brought to him by the Committee of Five will be quoted as a classic example of how a man threw away a great chance of permanently benefiting his people.

"Not everyone yet realizes the advantages the 18-nation plan offered to Egypt. The traffic, particularly in oil tankers, is steadily increasing. It is, indeed, expected to double under normal conditions within the next 10 years. The Canal needs constant maintenance; it is going to require major capital expenditure. The latest estimate is that £100,000,000 or more will have to be spent there if it is to continue to handle the expanding traffic. Mr. Menzies' mission's offer to Egypt was that this great financial responsibility should be taken over by an international authority, while Egypt should be internationally recognized as the landlord and should draw an income based on the traffic passing through the Canal. This plan has been rejected out of hand—the more is the pity.

"The 22-Power conference in London and the mission of Mr. Menzies' committee represented a very considerable effort to reach a solution by agreement. This effort has failed. In consequence, we have carefully considered, in consultation with our French and American allies, what our next step should be. We have decided, in agreement with them, that an organization shall be set up without delay to enable the users of the Canal to exercise their rights. This Users' Association will be provisional in character, and we hope it will help to prepare the way for a permanent system which can be established with the full agreement of all interested parties. Though discussions are still proceeding between the three Governments—the U.S.A., France, and ourselves—about the details of this plan, I can give the House the broad outline. It will be as follows:

"The members of the Users' Association will include the three Governments I have mentioned, and the other principal users of the Canal will be invited to join. We hope that the pattern of membership will be as representative as possible. The Association will employ pilots, undertake responsibility for co-ordination of traffic through the Canal, and in general act as a voluntary organization for the exercise of the rights of the Suez Canal users. The Egyptian authorities will be requested to co-operate in maintaining the maximum flow of traffic through the Canal. It is contemplated that Egypt should receive appropriate payment from the Association in respect of facilities provided by her, but the transit dues will be paid to the Users' Association and not to the Egyptian authorities.

"We recognize, of course, that a provisional system of this kind, designed to meet an emergency, cannot be in a position to provide for the major developments which are becoming urgently necessary if

the Canal is to continue adequately to serve the interests of its users, and we also recognize that the attitude of the Egyptian Government will have an important bearing on the capacity of the Association to fulfil its functions I must make it clear that if the Egyptian Government should seek to interfere with the operation of the Association, or refuses to extend to it the essential minimum of co-operation, then that Government will once more be in breach of the Convention of 1888."

Amidst Opposition cries of "resign" and "deliberate provocation," the Prime Minister continued: "I must remind the House that what I am saying is the result of exchanges of view between three Governments. In that event [i e. Egyptian refusal to co-operate with the proposed Canal Users' Association] H.M. Government and others concerned will be free to take such further steps as seem to be required, either through the United Nations or by other means, for the assertion of their rights.

"I shall no doubt be asked what are the intentions of H.M. Government about the reference of this dispute to the United Nations The Government certainly do not exclude that On the contrary, it may well be necessary. Meanwhile we have considered it our duty, jointly with the French Government, to address a letter to the President of the Security Council informing him of the situation which has arisen. This letter does not ask for any action at this stage, but it puts us in a position to ask for urgent action if that becomes necessary. At the same time there are certain facts in the reference of the matter to the Security Council which the House should face frankly."

Sir Anthony Eden went on to refer to the Abadan crisis, saying in this connexion "The Government took that issue to the Security Council. It tabled a resolution which was opposed by Russia and Yugoslavia. In an attempt to meet this, our resolution was whittled down Even so, the Soviet Government would not have it, and as a result the resolution was made dependent on the findings of the International Court. The International Court later said it had no jurisdiction, and therefore the resolution before the Security Council lapsed and we never went there again. I recall that the Labour Government of the day uttered a warning that the Security Council's failure to act effectively might create a most serious precedent for the future. I think they were right."

Turning to the position of the Suez Canal pilots, Sir Anthony said "The Suez Canal Company agreed, at the request of the French Government and ourselves, to urge the pilots to remain at their posts, first until the London conference had taken place, and then again until Mr. Menzies' mission was completed . . . After Nasser's sudden seizure of the Company, it was not unnatural for its non-Egyptian staff to consider their own futures. They were expected to work for a Government to which they owed no allegiance, and they were threatened with imprisonment by the Egyptian Government if they did not continue at their work. If these pilots decide to leave Egypt, it will clearly be the responsibility of the Egyptian Government . . . In view of certain statements widely made, I wish to make it clear that it was not this Government who have taken the pilots out. On the contrary, twice our efforts have been made to keep them in, in order to give negotiations a chance. But there really is a limit to which men can be pressed, and this limit has been reached."

The Prime Minister continued . "There has been much public discussion on the use of force in relation to events on the Canal. I must point out that in this instance it was Egypt which used force. The operation of the Canal has been taken over in complete disregard of Egyptian international obligations The assets of the Company and its offices were seized by armed agents of the Egyptian Government. The Company's employees were compelled to continue at their work under threat of imprisonment. To condone such actions is to invite their repetition and bring international law into contempt

"In recent weeks certain military preparations have been made in the Mediterranean They are limited in scope. On account of them we have been charged in some quarters with sabre-rattling How ludicrous that is! It might be regarded as provocative if I were to relate all the circumstances which could arise in Egypt. I will mention only one. Members will recall the appalling massacre of foreigners which took place in Cairo in 1952. Many people of several nationalities, not by any means only our own, were murdered in the most brutal conditions. I happened to be in charge of the Government at the time, as Sir Winston Churchill was returning from the United States. It is true the Egyptian Army intervened to stop further bloodshed, but Members must judge how much that action was due to the knowledge that we had a plan to intervene by force in the last resort

"If military preparations were justified a month ago, they are justified to-day. I must make it plain that the Government have no intention of relaxing them It is also, we think, right and proper that our French allies should be placed in a position to defend their numerous nationals and interests. We have therefore extended to them any facilities available to us which they require [i.e for the stationing of French troops in Cyprus].

"In these last weeks I have had constantly in mind the closeness of the parallel of these events to those of the years before the war. Once again we are faced with what is, in fact, an act of force which if not resisted will lead to others There is no doubt that, if Egypt continues to reject every effort to secure a peaceful solution, a situation of the utmost gravity will arise. Many other Eastern lands now begin to understand that the fate of their country is included in Colonel Nasser's scheme. The Leader of the Opposition has warned us of what would happen if Colonel Nasser had his way. He said: 'If Colonel Nasser's prestige is put up sufficiently and ours is put down sufficiently, the effect in that part of the world will be that our friends will desert us, because they think we are lost, and go over to Egypt.'

"That is true. The consequence of this would be that the standard of life in Western Europe and of many lands in Asia would be at Nasser's mercy There are those who say we are not justified in reacting vigorously unless Colonel Nasser commits some fresh act of aggression. That was the argument used in the 1930s to justify every concession that was made to the dictators. It has not been my experience that dictators are deflected from their purpose because others affect to ignore it. Reluctance to face reality led to the subjugation of all Europe and to a World War. We must not help to reproduce step by step the history of the 1930s. We have to prove ourselves wiser this time, and to check aggression; by the pressure of international opinion if possible, but if not, by other means, before it has grown to monstrous proportions As has been rightly said by the Foreign Secretary: 'For this country military action is always the last resort, and we shall go on working for a peaceful solution so long as there is any prospect of achieving one'

"The Government are not prepared to embark on a policy of abject appeasement, nor, I think, would the House—or most of it—ask them to, because the consequences of such a policy are known to us . We will continue to make every effort, in concert with our allies, to secure our rights by negotiation, but should those efforts fail the Government must be free to take whatever steps are open to them to restore the situation That is the policy of the Government which I ask this House to approve."

Mr. Hugh Gaitskell (Leader of the Opposition), in a speech strongly critical of the Government's handling of the situation, insisted that force should not be used except with the authority of the United Nations and in accordance with the U.N. Charter, and called upon the Government to take the Suez dispute to the Security Council.

Mr. Gaitskell said that some of the steps of which the Prime Minister had spoken had "the gravest implications" and could "not but divide the nation even more grievously." Because the Opposition criticized the Government, that did not mean that they condoned or excused Colonel Nasser's actions, but neither did it mean that the Opposition must support the Government without reservation in everything it did.

"The points at issue [Mr Gaitskell continued] are fundamental and quite specific They concern the attitude of the Government to the use of force as the means of solving this dispute, and the closely related question of the Government's attitude to the U.N and the Charter. The Prime Minister has spoken of the Government's attitude to force, but he has not told us the full story.

"At first, after the announcement of Colonel Nasser's action, the general impression that most of us had, and certainly the Press had, was that military measures were not being contemplated. Some five days later, however, views on the subject began to change. So much so that Mr. Griffiths and myself twice saw the Prime Minister before the debate on August 2.

"Among the things discussed was the question of force. I then gave the Prime Minister some warning that if he contemplated the use of force to impose a solution, he could not rely on the support of the Opposition. The debate followed, and the Prime Minister in his speech made virtually no reference to this subject at all. All he told us was that certain precautionary measures of a military nature were being taken When he said just now that the Government stick to the policy which they had adopted then, the plain fact is that no policy on force was then announced.

"The day after the debate there appeared in almost every newspaper the story that it was the Government's intention after the conference, and if Colonel Nasser refused to accept the conclusions of the conference, to impose that solution by force. *The Times* said: 'The position is that Britan and France are prepared to take action if a reasonable agreement cannot be reached.' We had not been told that in the debate on August 2 . . .

"These stories came, of course, from Government sources What the Government were not willing to tell the House they put out through Downing Street and the Foreign Office . . . When I read these reports I was so dismayed by them that I wrote immediately to the Prime Minister warning him again about what our attitude would be. On Aug. 13 we had a meeting of our Parliamentary Committee [the Labour "Shadow Cabinet"]. We went to see the Prime Minister and his colleagues the following day We argued with them on this point. We begged them to issue a statement. Unfortunately they did not do so, presumably because they were not in agreement with what we suggested they should say

"There was another development at this time which could not be ignored—the very considerable publicity being given to the troop movements, and to the scale on which they were taking place. There can be no doubt that the combination of these two things—the stories emanating from the Government that they intended to use force, and the scale of the military measures as they unfolded—gave the impression that the Government intended simply to impose a solution by force

"What was the effect of this? There is not much doubt that in the rest of the world and in the Middle East, far from diminishing Colonel Nasser's prestige, it led to a rallying of all the Arab States to him. It gave Colonel Nasser the best propaganda opportunity he could possibly have, because he was able to represent his action and all that followed as part of a struggle on the part of the Eastern against the Western nations, of the small countries against the large countries,

of the ex-colonies against imperialists. This was, and he was able to so represent it, a piece of 19th-century gunboat diplomacy. If Members are really content to go it alone with France, with the whole of the rest of the world against us—well, they are simply making for disaster.

"Nevertheless the London Conference achieved, I agree, some considerable improvement. It reduced the temperature. It pushed force into the background. It above all broke the line-up between East and West, and that was extremely important. The choice of the Five-Nation Committee was wise, and I have no criticism of the way in which it presented the case to President Nasser.

"But the fact remains that this sabre-rattling, because that is what it was, had a disastrous effect on world opinion and is still a very grave handicap in the way of a proper solution of this problem. Either the Government seriously intend to use force—and what the Prime Minister said this afternoon certainly seems to suggest that——or they could simply be bluffing. If they intend to use force in this way—that is, in the absence of any further deliberate provocative action by Colonel Nasser or aggression by him—simply to get a solution of this problem, I say that the consequences to this country, far from being good, will be disastrous.

"Conservative Members must understand this—in ignoring the Charter and taking the law into our own hands, we are reverting to international anarchy. We are asserting the view that each nation decides on its own what to do. We are saying that only power counts, and I ask Members to consider rather more seriously than they have done whether they think we would gain from this.

"If they feel indifferent to these moral considerations, I would ask them nevertheless to look at the probable consequences of military action taken in these conditions. There can be not the slightest doubt that the other Arab States will rally wholeheartedly to the side of Egypt. There can be no doubt at all that if there is anxiety about oil supplies now, those anxieties would be enormously aggravated. There can be no doubt of the reaction in India, which may well leave the Commonwealth in consequence . . . I ask them to consider something even more serious Have the Government really considered seriously what the Soviet Government is likely to do if we go to war to impose a solution by force on Egypt? They may not come in, but is it not extremely probable that within a very short time there would be Russian volunteers sent to the help of Egypt? Does it mean that the Government are prepared to risk what might even become a general war over this issue?

". . . The Government may believe that they can achieve a quick victory—a matter of a few parachute brigades, seizing the Canal, overthrowing Nasser, and then you have control. Exactly how do you then proceed? Exactly how are you going to get a settlement? Are you going to leave the troops there, or are you going to withdraw them again? If you do you will leave behind in the Middle East such a legacy of mistrust and bitterness towards the West that you will thrust the whole of the area almost forcibly under Communist control. That is the greatest danger of all If you simply destroy the area by conducting a savage war, there can be no doubt that it would be the greatest breeding-ground for Communism you could possibly have.

"I am not, of course, saying—nor have I said—that there are not circumstances in which force might be justified. If, on the other hand, all this talk is merely to threaten Egypt, is that not a tremendous risk to take? If Colonel Nasser calls the bluff, as so far he has done, then there is the gravest danger of a second and perhaps even more substantial prestige victory for him. Our indictment against the Government is that they have brought this country into a position where we are in this dilemma—that either we carry out the threats of force, or we face the greatest diplomatic climb-down in our history . . .

"The Prime Minister has told us a little of what it is intended to do. I think that, if it were the purpose of the Users' Organization to provide a bit of machinery for negotiation, I would not object to it; but what has alarmed me and my friends is what it is apparently proposed that this organization should do. The statement that they intend to employ their own pilots to pilot their own ships through the Canal, that they intend that the dues should be paid not to Egypt but to the organization, seems dangerously like a highly provocative step. We are told that if the Egyptian Government refuses co-operation, then the Government reserves the right to take further steps, either through the U N. or by other means. What do the Government mean by 'other means'? Why should there be any other means? If there is such a dispute, why should it not go to the United Nations? That is what the Charter enjoins, and that is what should happen.

"As I understand it, the U.S.A. has indicated its support for the Users' Organization. Are we to take it they also agree with the proposition that the ships are to have pilots of their own and are to go through the Canal whether the Egyptians like it or not? Are we to take it that the United States themselves will employ pilots in this way, and will be prepared to send their ships through the Canal? We must have an answer to that . . .

"I do not feel that the vague reference to informing the U.N. in the least meets the situation at the moment. On what grounds do the Government refuse to inform the U.N. of the dispute under Article 33? Why should it not go to the Security Council immediately? I do not say the Security Council will produce an automatic solution. We are well aware of the veto rule. The purpose of taking this dispute to the U.N. is not merely to go through the formalities so that we may then use force. It is so that there may be a further period of negotiation.

"I believe that it is not particularly difficult to find a compromise solution. The 18-Power plan was never regarded by the Powers themselves as the last word in this dispute What matters are the ultimate aims. Colonel Nasser is on record that he quite agrees with that. I have never said we should accept his word. I do not think we can. Supposing he will not negotiate. We have to ask ourselves again the question: is force justified? I must repeat what I said before—force is justified in certain circumstances clearly laid down in the Charter. It is not justified if no actual violent armed attack has taken place, or if the U.N. have not approved it. It is as clear as that. So far, although I would not deny that Nasser's action involves threats to us, they are threats only. I cannot believe that the world in general, or public opinion in this country, would really support going to war on the difference between having a supervisory board or an advisory council . . ."

Mr. Gaitskell said that if the matter went before the U.N , he hoped that the question of freedom of Israeli shipping through the Canal would be raised again. He did not accept the view that the U.N. had failed because no action had been taken to implement the 1951 resolution. "Everyone knows why the British Government have not lifted a finger to enforce that resolution," Mr. Gaitskell declared. "It is because the Arab States would not like it"

Continuing, Mr. Gaitskell emphasized that the use of force was not justified as a solution of the present problem, force was justified in self-defence, which was a different matter. "If Colonel Nasser refuses to negotiate," he declared, "we should cling to the line adopted by Mr. Menzies and his committee in presenting the case in Cairo. We should go for the alternative routes and say to Nasser: 'If you will not come to terms with the Canal users, you cannot blame them if they have no faith in the future of the Canal and decide to make alternative arrangements, go in for large tankers, and build additional pipelines through Turkey.' The Prime Minister spoke of the extra cost. Is it so very great? Does he know how much difference it would make to the price of petrol? I think about a penny a gallon."

Turning to the position of the Canal pilots, Mr. Gaitskell said that he could understand that many of them felt great dissatisfaction and uncertainty about staying at their posts. But the Government's policy should have been to do everything possible to avoid any outside pressure upon them to withdraw, and indeed, to exert the maximum influence upon them to stay. The Canal Company, however, had sent out a circular letter—which seemed totally unnecessary—telling their pilots that they must choose by Aug 15 whether to stay at their jobs or to resign. This was really "an open invitation to stop the canal." If the British Government had been party to this decision, he asked whether the Government themselves were not in breach of the 1888 Convention, which pledged the signatory Powers to do nothing to obstruct the Canal in any way.

Mr. Gaitskell concluded. "I want to say positively what I think we ought to do. We ought to take this matter at once to the Security Council, and we ought to take steps to influence world opinion in our favour. We can do that in two ways We can first of all renew the appeal, which was made up to a certain point by the British and French Governments, asking the pilots, in spite of their difficult conditions, to do everything they can to keep the Canal open . . . Secondly, the Government should make a declaration that they will not use force except in accordance with the U.N. Charter. Thirdly, they should make it plain that they would accept any decision of the U.N. on this dispute . . . Every motive—self-respect, self-interest, our responsibility for world leadership, our membership of the Commonwealth, our alliances—points to the same conclusion: that we should stand by our pledges to the United Nations, honestly and fairly, and by our restraint and our patience set an example to the world."

Members who spoke in the ensuing debate included Mr. Clement Davies, leader of the Liberal Party, Sir Victor Raikes, Major Patrick Wall, Major Tufton Beamish, and Sir Robert Boothby (Conservatives), and Mr. Mellish, Mr. Richard Crossman, Mr. Maurice Edelman, and Mr. Kenneth Younger (Labour).

Mr. Clement Davies (L.) urged that the 22 countries attending the London Conference should be recalled to decide upon the next step following the failure of the Menzies mission. In that way it might be possible to get a direct agreement. Failing this, the matter should be sent to the United Nations. The apparent decision of Britain and France to take some definite action of their own was "a most dangerous thing to do," and it seemed, listening to the Prime Minister, "as though the U.N. Charter had never been drawn up." Mr. Davies believed that an appeal to the U.N. would be all the stronger if supported by at least 18 of the countries represented at the London Conference.

Sir Victor Raikes (C.) declared that no-one but a fool or knave would seriously suggest that Britain wanted war for the sake of war, or that anyone wanted to use force for the sake of force. What they wanted to prevent was a triumphant Egypt, supplied with Russian weapons and backed by Russian prestige, sweeping Israel out of existence. Commending the Government's action, Sir Victor declared: "Unless you are prepared to use force in the last resort, you will get no sense out of Colonel Nasser."

Major Patrick Wall (C.) said that if Colonel Nasser got away with the Canal seizure, British prestige in the Middle East would be eliminated and Nasser would be in sight of his dream of creating an Arab empire "from the Atlantic to the Caspian." To "bring Nasser to reason" Britain should consider nationalizing the headwaters of the Nile.

Major Tufton Beamish (C.) said it would be a grave mistake to use the U.N. as an excuse for not defending British interests. He did not believe that any responsible Government could be bound by the U.N. to do nothing to protect its own security. If the same threats were being made to the Panama Canal as were being made to the Suez Canal, there would be no-one in the U.S.A. who would not be immediately ready to take the strongest action to ensure America's rights.

Mr. Mellish (Lab), who accused the Government of being "hell bent for war," declared that he "could not and would not support this Government in the use of force," and threatened "to take the fight down to the docks of this country" [Mr. Mellish is M.P. for Bermondsey, largely a dockside constituency.]

Mr. Crossman (Lab.) said that the proposed Canal Users' Association was not intended as a serious plan but was a "method of provoking Colonel Nasser." Its sole purpose, he alleged, was "to bring war a stage nearer, not in the desire to have an actual war but because the Government knew that in this game of psychological warfare each step must look more and more like war each time the bluff is called." Colonel Nasser, however, would not "climb down" and would not let pilots employed by the Canal Users' Association take ships through the Canal.

Mr. Edelman (Lab.), on the other hand, thought that the Prime Minister had been right to take precautionary measures to safeguard British interests in the Mediterranean. There was no use in ignoring the fact that Nasser was a dictator and that he had established a police state in Egypt. If he were allowed to get away with these actions, a damaging blow would be struck at the whole concept of international law.

Mr. Younger (Lab.), like Mr. Crossman, criticized the proposed Canal Users' Association as "ill-conceived and provocative." It seemed, on the face of it, as if the scheme was aimed at provoking a refusal of transit rights on the part of Egypt, thereby forcing that country to take some kind of physical action against traffic going through the Canal "as a preliminary to the use of force on our side." If that was the purpose, the scheme would be opposed by the Opposition, which stuck to the view that the matter should be referred to the United Nations.

Sir Robert Boothby (C.) thought that the Canal Users' Association should be tried out before the dispute was sent to the U.N. Britain's whole future as a great industrial Power was at stake, and if Nasser got away with his present actions he would use his enhanced power and prestige to blackmail the West and bully the Middle East. "On Nasser's own showing," he declared, "Israel is next on the list. Shameless appeasement does not pay . . . "

The Foreign Secretary (Mr. Selwyn Lloyd) opened the second day's debate by moving, on behalf of the Government, a motion of confidence which (1) condemned "the arbitrary action of the Egyptian Government in seizing control of the Suez Canal"; (2) endorsed "the proposals of the 18 Powers at the London conference which would ensure that an international waterway so essential to the economic life . . . of this and other countries would not remain in the unrestricted control of any single Government"; (3) welcomed "the sustained and continuing efforts of H.M. Government to achieve a peaceful settlement"; and (4) affirmed support for the statement of policy made by the Prime Minister.

Mr. Selwyn Lloyd said that Mr Gaitskell's speech to the House was in marked contrast to his earlier speech of Aug. 2 (see pp. 15013-14), in which the Leader of the Opposition had taken exception to Colonel Nasser's action on three grounds: (1) that the purported act of nationalization had been carried out in relation to a company which was not an ordinary company conducting ordinary activities; (2) that it had been carried out without negotiation and by force, (3) the political background and the repercussions on the entire world of this episode in the Middle East. In laying emphasis on these three points, the value of Mr. Gaitskell's speech was that he had been registering a degree of unity in the House. "I do not believe opinion in this country has altered on these three points," Mr. Selwyn Lloyd declared. "I only wish that equal emphasis had been given to them in the speeches that came from the Opposition yesterday. But this is the basis from which we begin. I still believe that an overwhelming majority of people in this country uphold those three points."

In any plan to deal with the Suez Canal, the Foreign Secretary continued, there had to be three ingredients. Firstly, the organization must give the employees, and particularly the foreign employees, sufficient confidence in the system. Secondly, such a system would be much better if it gave confidence to those who had to produce the capital if the Canal was to be maintained, increased and developed as it should be. Thirdly, it should have the confidence of the users.

It had been made clear at the London conference that the international agency should have a relationship with the U.N., and anyone who read the plan in its final form would notice that scrupulous regard had been paid to the susceptibilities and interests of Egypt. This fair plan had been put to the Egyptian Government with skill and patience by the Menzies mission, but had been flatly rejected.

"It has been said," the Foreign Secretary continued "that the Government should have immediately referred the matter to the United Nations. Let us consider what would have happened. At the London conference the Soviet representative made it clear that he would not support our plan for international control. He sought to assert a veto. He said the conference could come to no conclusion except on the basis of unanimity. That view was not accepted and the 18-Power plan was produced. But the Soviet representative did everything in his power to make it difficult for Egypt to accept the plan and to negotiate within the framework of it.

"What would have happened if we had gone to the Security Council? There would have been a Soviet veto, and no resolution would have been passed. What next? It might be said that we should have called a special Assembly. What would have happened? Whether or not in the end a two-thirds majority would have been obtained for any resolution, there would have been weeks of debate, innumerable amendments tending to whittle it down, and finally, at most, a recommendation Instead of that we have made effort after effort to procure by peaceful means a satisfactory method of operating the Canal. As far as the U N is concerned, the Prime Minister has stated the decision of the Government that it may be necessary to go to the Security Council We shall go, not as a formality, but as a genuine effort to improve the prospect of a peaceful settlement . . "

After referring to criticisms of the military precautions taken by the Government, the Foreign Secretary said that he agreed with what Mr. Edelman had said—that the Prime Minister would have been guilty of a grave dereliction of duty if he had failed to take those measures.

"I want to deal with the Users' Association," Mr. Selwyn Lloyd continued. "This was denounced by the Leader of the Opposition as 'provocation.' One would have thought that in a matter of this seriousness he would at least have taken a little time to consider the matter before doing his best to ruin the chances of this organization. Mr Gaitskell having said that, it is very much more difficult for Colonel Nasser to accept it or discuss it"

Explaining the legal position, the Foreign Secretary said that the 1888 Convention, together with the Suez Canal Company's concession, had constituted a balanced scheme The position of the users had been safeguarded partly by the Convention and partly by the fact that the Canal was operated by an international company whose operation of the Canal formed part of the basis of the Convention. The Egyptian Government had destroyed the balance of the scheme by taking the operation of the Canal from an international company, an action which had removed one of the guarantees afforded to the user-interests under the Convention. Egypt was not entitled to substitute herself for the Company as the operating authority, as this was contrary to the scheme assumed by the Convention. It was true that the user-countries might not be able to prevent the Egyptian Government from purporting to nationalize the Company under Egyptian law, or excluding it from carrying out operating activities, but the Egyptians could not require the users to recognize the validity of this state of affairs, or to recognize Egyptian operation of the Canal in lieu of that of the Company. The user-companies retained their passage-rights under the Convention and were not obliged to make use of or limit themselves to the facilities provided by Egypt. "That is the legal position," the Foreign Secretary declared, "and therefore I say we are absolutely right to seek to form some sort of organization of users . . Until 1968 the international company is an essential part of the operation of the Canal, whatever Egypt may be able to do in domestic law with regard to some company registered in Egypt. She is in breach of international law in taking that company out of international obligation."

Continuing, the Foreign Secretary said that the Opposition's amendment of censure on the Government [see below] was a "somewhat extraordinary document." It deplored the Government's refusal to invoke the authority of the U.N. in the dispute, but this was a wholly false charge. The Prime Minister had made it clear that H M Government had from the outset been acting in accordance with Article 33 of the U N. Charter, moreover, they had circulated to the Security Council a statement of the position, thus preparing the way for a reference to the Council if this should seem to be the right course at any given time. "How can this be termed a refusal to invoke the authority of the United Nations?", Mr. Selwyn Lloyd asked. "Article 33 enjoins members to seek every means of settling their disputes and finding a solution among themselves before bringing their case to the U.N That is precisely what we are still trying to do . . . I find it amazing, after the way in which this country and our allies and other associates have been so constantly provoked by Egypt, that Members opposite should utter warnings to refrain from provocative action. That warning might really have been addressed to Cairo and not to Downing Street . . . We are not prepared to allow unrestricted control of the operations on the Canal to pass into the hands of one Government or one man. And on that issue we are not prepared to compromise."

Mr. Selwyn Lloyd categorically denied that there had been any wrongful collusion between H.M. Government and the Suez Canal Company, or that the Government had sought to exert any pressure on the pilots to leave their jobs. On two occasions the Government had intervened to keep the pilots at work, "but there is a limit to what free men can be expected to undergo." After strongly denying that there was any truth in the allegation that the pilots had been called out to make possible the formation of a Canal Users' Association, Mr. Selwyn Lloyd said: "The likelihood that the pilots would not remain at work was one of the reasons for seeking to set up the users' organization."

On behalf of the Opposition, Mr. Alfred Robens moved an amendment which (1) condemned "the arbitrary methods employed by the Egyptian Government in respect of the Suez Canal Company"; (2) expressed support for "the legitimate rights of the users of the Canal"; (3) deplored "the refusal of H.M. Government to invoke the authority of the United Nations over the dispute"; and (4) called upon the Government "to refer the dispute immediately to the U.N., to declare that we will not use force except in conformity with our obligations under the U.N. Charter, and to refrain from any form of provocative action."

After saying that it was the function of the Opposition "to restrain a foolish and strong-headed Government from taking this country into war," **Mr. Robens** said that the Prime Minister, if he read the newspapers, should be aware that over half the nation was opposed to force. The T.U C., representing many millions of workers, had made their position plain that force should only be used on the authority of the United Nations. [A resolution to this effect had been approved at the annual Trades Union Congress held a week earlier.] The Prime Minister had said that if Egypt refused facilities to the proposed Canal Users' Association, Britain, France, and America might have to take further steps as required, either through the U.N. or "by other means"—a statement which most people interpreted as a threat of force. Should the Government resort to force, the entire Commonwealth would be weakened, all the Arab and Asian peoples would be united against Britain, and "we should stand condemned at the bar of world opinion."

Mr. Robens denied that there was any parallel between Colonel Nasser and Hitler, and accused the Prime Minister of trying to make Nasser appear "a more powerful man than he was." The use of force against a "poverty-ridden nation of 20,000,000 people, half of whom are illiterate," might succeed in overthrowing Nasser, but it would not destroy Arab nationalism. The right place for negotiations was the U.N., and the Government should not proceed with the idea that the great Powers could "bludgeon Egypt into a settlement."

Among the speakers in the ensuing debate, Sir Lionel Heald (C.), the former Attorney-General, urged that the Suez dispute should be taken to the Security Council before there was any resort to force.

Sir Lionel Heald stressed that there was a clear obligation under the U.N. Charter that the matter should be referred to the Security Council before resort was had to force. If agreement by negotiation was impossible, the right thing to do was to refer the question to the U.N., as had been made clear by Lord McNair, lately President of the International Court of Justice. [See House of Lords debate, below.] After expressing his conviction that no member of the Government had ever contemplated the use of force without reference to the U.N., Sir Lionel declared "If a reasonable and proper plan, supported by other nations, is put to the U.N. and approved there, I personally will be prepared to support the Government in any measures it thinks necessary to carry out."

Mr. Gaitskell asked the Foreign Secretary, in view of Sir Lionel Heald's "very remarkable speech," if he was "now prepared to make a declaration that the Government will only use force in accordance with our obligations under the U.N Charter?" **Mr. Selwyn Lloyd** replied: "At the moment we are seeking a peaceful settlement of this matter under Article 33. We intend to make every effort, and it is only when we are satisfied that these efforts have failed that this question arises."

Mr. Wedgwood Benn (Lab.) said that if the Prime Minister was not willing to give an assurance that the dispute would be taken to the U.N., he would be deliberately provoking war Such a war would be "a war without national unity at home or allies abroad, without purpose and without hope," and would bring "disgrace, dishonour, and possibly disaster" to Britain

Several Conservative Members, including **Mr. David Price** and **Mr. Cyril Osborne,** supported Sir Lionel Heald's view that force should only be used after reference to the U.N., and with its authority.

Mr. Hugh Gaitskell wound up the debate on behalf of the Opposition.

Mr. Gaitskell said that he found it hard to reconcile the Prime Minister's views of the proposed Canal Users' Association with those of Mr. Dulles, who had emphasized that the U.S.A. did not intend to "shoot its way through the canal" if Egypt tried to block the passage of U.S. ships navigating the canal under the auspices of the Association [see below]. Addressing the Prime Minister, Mr Gaitskell said: "Tell us tonight whether you will say on behalf of the Government that it, too, has no intention of shooting its way through the Suez Canal. The country and the world will be waiting for your answer."

Continuing, Mr. Gaitskell said that he stood by what he had said on Aug. 2 about the implications of Colonel Nasser's action. "I want to make it perfectly plain that we on this side fully realize that Nasser can be dangerous; we understand there are threats involved, but they are so far threats only." He agreed that Nasser's actions were reminiscent of those of Hitler, but that did not mean that the two situations were the same. In the case of Germany, Britain had been confronted with the most powerful military State in Europe and perhaps in the world, but the same could not be said of Egypt.

If there were fears that Nasser would "get away with it" and then proceed to attack Israel, the answer was to allow Israel to purchase arms. If there were fears that Nasser might achieve a prestige victory, the Government should be careful that they did not give him a greater prestige victory by their actions. If Nasser refused negotiation, they should adopt the line laid down by Mr. Dulles and by Mr. Menzies in his letter to Colonel Nasser—namely, that shipping should be re-routed round the Cape and additional pipelines developed. This would have a "salutary economic effect" on Colonel Nasser.

As regards the Foreign Secretary's complaint that U.N. procedure was slow and that it might be weeks before anything was done, Mr. Gaitskell declared: "What is wrong with weeks and weeks elapsing without war?" He did not believe that Britain would lose ground as the weeks went by; on the contrary, Colonel Nasser's prestige might suffer far more seriously as a result than from any threat to use force.

Mr. Gaitskell concluded: "We must behave in a way which wins the support of world opinion. It is precisely to this end that our amendment is directed. Refer the matter to the U.N. Let us get in first, and let us make sure that we get in as plaintiff and not as defendant Our case is a good one. I believe the Government think that. Do not let them prejudice it by unnecessary action. The Government must refrain from any form of provocative action. I beg the Prime Minister to say that he will ask the U.N. for action, and to give us an assurance that he too, like Mr. Dulles, has no intention that we should shoot our way through the Canal, and that the Government have no intention of using force except in accordance with the Charter."

The Prime Minister, replying to the debate, stressed that the Government desired a settlement of the Suez dispute by peaceful means, and that it had acted throughout in conformity with the U.N. Charter. At the end of his speech he gave an assurance that, except in an emergency, the Government would not resort to force without first bringing the matter before the Security Council.

Sir Anthony Eden said that the allegation that the Government did not desire a peaceful solution, made by some Opposition Members, was "a cruel and unjust charge [which] echoes the 1951 accusations of warmongering" The Government's record over the past five years—in Korea, Indo-China, Persia, and Trieste—showed that its constant aim had been to achieve a peaceful solution of disputes. Though peace was "the aim of all of us," his long experience of public life had taught him that "true and lasting peace cannot be bought at the price of the surrender of legitimate rights to outside pressures and forces." After recalling his opposition to the pre-war "appeasement" policy, Sir Anthony added (turning to Sir Winston Churchill, who was present in the House but took no part in the debate): "The majority of the country did not agree with me then, but Sir Winston agreed with me then and he tells me that he agrees with me now. We have all of us, in all parties, learned our lesson since then Do not let us unlearn that lesson now."

If Colonel Nasser was allowed to succeed in the action he had taken, Sir Anthony continued, there was no doubt whatever what his next step would be—an attack on Israel, which Colonel Nasser had described as "a stooge of imperialism" in his speech of July 26 announcing the nationalization of the Suez Canal. "My own forecast" said the Prime Minister, "is that if the getting-away-with-it takes place, there will be such a rush of Powers, such haste to get on the band-wagon of the Egyptian dictator, as has not been seen in our generation in any country"

As regards the present position, Sir Anthony declared: "The offer of the Menzies mission still stands and has not been withdrawn. It is still open to acceptance by Egypt. The Users' Association proposal is not an alternative but a provisional plan to meet the immediate situation. This country, the U.S.A., and France are in complete agreement ."

Pressed by Mr. Gaitskell to say that the Government would "not shoot their way through the Canal," Sir Anthony continued . "I said we were in complete agreement with the U.S.A. on what to do. The first thing is to have some co-operation from the Egyptian Government. We propose to ask for it. If they do not give it they are in default under the 1888 Convention. If they were in default, we should take them to the Security Council.

"Now I come to the question of when and how we should make use of the Security Council We have been acting in strict conformity with U N procedure. For the past seven weeks we have been following the course enjoined by Article 33 of the Charter—to seek first of all a solution by negotiation, inquiry, mediation, or conciliation And those efforts have not succeeded.

"Mr. Gaitskell asked us to submit this question to the Security Council now. But I would remind the House that we are not handling this problem entirely on our own. We are dealing with it in association with our allies and a number of other countries too, and I believe it is the wish of the House that we should act in concert with them. I must therefore ask the House to allow the Government to judge, in the light of their continuing consultations with other Governments, what is the best moment at which it may become advisable to have recourse to the Security Council. Our letter which we sent to the President of the Security Council yesterday [see below] is sufficient indication of our intention.

"I want now to deal with the question: would the Government give a pledge not to use force except after a reference to the Security Council? If such a pledge or guarantee is to be absolute, neither I nor any British Minister could give it. No-one can possibly tell what will be Nasser's action, either on the Canal or in Egypt. Nevertheless, I will give this reply, which is as far as, I think, any Government could go. It would certainly be our intention if circumstances allowed—

or in other words, except in an emergency—to refer a matter of that kind to the Security Council Beyond that I do not think any Government could possibly go. But I repeat, the Government must be the judge of circumstances. That is something no Government can share, no executive can share, with anybody else, either with Parliament or otherwise. I am confident Parliament itself, on reflection, will believe that to be sound doctrine."

After the Opposition's amendment had been defeated by 321 votes to 251, the Government's motion was carried by 319 votes to 248—a majority of 71. The Liberals voted for the Government's motion.

The House of Lords Debate.

The two-day debate in the House of Lords (Sept. 12-13) took place on a Government motion of confidence similar to that moved in the House of Commons. Earl Attlee, on behalf of the Labour peers, moved an amendment of censure similar to that moved in the Commons by Mr. Robens. The Opposition's amendment was defeated by 145 votes to 18 (a Government majority of 127), and the Government's motion was subsequently adopted without a division.

The Government motion was moved by the **Marquess of Salisbury** (Lord President of the Council), whose speech was on similar lines to those of the Prime Minister and the Foreign Secretary. Speeches in support of the Government's policy and its handling of the Suez crisis were made by **Lord Kilmuir** (the Lord Chancellor), **Lord Vansittart, Lord Hore-Belisha, Lord Hankey,** and a number of other Conservative and Liberal National peers. **Lord Rea,** leader of the Liberal peers, supported the Government's attitude and deplored Egypt's rejection of the 18-nation proposals drawn up at the London conference and presented in Cairo by the Menzies mission.

Earl Attlee, in moving the amendment of censure, stressed that there was no support in the Labour Party for the actions of Colonel Nasser, "an imperialistic dictator." It was, however, "impossible to uphold the sanctity of international law by committing breaches of it yourself," and it was therefore essential to refer the matter to the United Nations. Criticisms of the Government's attitude, and demands that the Suez dispute should be taken to the U.N., were also made by other Labour peers, among them **Earl Jowitt, Viscount Stansgate, Lord Silkin,** and the **Earl of Listowel.**

Lord McNair (lately President of the International Court of Justice) said that he found it difficult as a lawyer to reconcile some of the Government's actions, such as the massing of forces in the Eastern Mediterranean, with the existing rules governing the use of armed forces. After pointing out that force was no longer a discretionary instrument of policy, but that its use was regulated by law, he said that he was "unable to see the legal justification of the threat or use of armed force by Britain against Egypt to impose a solution of this dispute." He urged that H.M. Government should take the initiative in placing the matter before the Security Council, or calling a special session of the General Assembly, "so that we may go there as plaintiff instead of defendant."

The Archbishop of Canterbury (Dr Fisher) commended the Government for acting with great restraint in face of Colonel Nasser's aggression. After appealing for party unity, he asked the Government to take the dispute to the U.N., if necessary, thereby bringing "relief to a vast number of citizens who are perplexed, unhappy, uneasy, and frightened as to what might happen." If the U.N. failed to act as umpire, Britain would have every right to proceed on her own; if the U.N. decision was favourable to Britain, "we could take steps with other nations to see it was implemented", and "if the U.N. came to a conclusion unacceptable to us, it is our duty to accept it." After appealing to the Government to say that it would not resort to force against Egypt without first going to the U.N., Dr. Fisher added: "That seems to be near enough to the wishes of the Government, near enough to the desire of the Opposition, and near enough to the realities of the situation, to enable an agreed policy under which the whole nation can unite. . ."

Lord Beveridge, though agreeing that Colonel Nasser was "thoroughly untrustworthy," said that the idea of going to war with Egypt to internationalize the Canal was "the way of madness" Instead of the use of force, there was a choice of direct reference to the U.N. or the serious exploration of alternatives to the Suez Canal. Economic and not military force was the way to get the Canal back into general use, and the Government "should decline to accept anything less than the Dulles-Menzies plan."

Viscount Astor doubted whether the Canal Users' Association was practicable, since the Egyptians had only to withold co-operation to make the scheme impracticable People who urged the use of force were "many years out of date," and if Britain got into a "shooting war" with Egypt she would "risk losing much of the uncommitted world between Siam and North Africa." Colonel Nasser could be isolated by financial pressure and by diverting shipping round the Cape of Good Hope.

Lord Killearn (Ambassador in Cairo from 1937 to 1946) asked whether the Government had considered the possibility of withholding from Egypt the Nile waters on which she depended. [The Nile has two sources—the White Nile, rising in Uganda, and the Blue Nile, rising in Ethiopia.]

Mr. Dulles on U.S. Suez Policy.

At a press conference in Washington on Sept. 13, Mr. Dulles said that the United States was ready to participate in the proposed Canal Users' Association.

The 18-nation proposals drawn up at the London Conference, said Mr. Dulles, had furnished "a proper and reasonable basis for working out the question of the operation of the Canal in accordance with the 1888 Convention." As Egypt had refused to negotiate "on the basis which the overwhelming majority of the users suggested," it had to be considered "what further steps could be taken towards a just, peaceful settlement."

"Prime Minister Eden," Mr. Dulles continued, "yesterday set forth the concept of an association of users of the Suez Canal. Prior to his making that speech, the U.S.A. had informed him that if the U.K., alone or in association with others, should propose a Users' Association to be organized by the 18 sponsors of the London proposals, and perhaps others, the U.S.A. would participate in such an organization . . Certain things are clear (1) the user nations have rights under the 1888 treaty, (2) these rights cannot legally be nullified by unilateral Egyptian action, (3) it is normal for users to seek to work in association when rights which they possess jointly are in jeopardy.

"So we think it is wise that voluntary co-operation among the users of the Canal should continue. We do not believe that their rights can be adequately safeguarded if each nation, much less each ship, fends for itself. We believe that, under the present circumstances, practical co-operation with Egypt can be effectively achieved only if the users are organized so that they can deal jointly with Egypt and Egypt can deal jointly with them.

"We are prepared to participate in a users' organization on the basis which I have indicated. It is our thought that the Users' Association would, among other things, provide qualified pilots for the users' ships, initially receive the dues from ships of members of the Association passing through the Canal, which sums would be used to defray expenses of the organization and to pay appropriate compensation to Egypt for its contribution to the maintenance of the Canal and for the facilities of transit; and, so far as practical, arrange for the pattern of traffic of member-vessels through the Canal.

"It is our hope that on-the-spot arrangements for co-operation can be achieved without prejudice to the rights of anyone. This may provide a provisional *de facto* working arrangement until formal agreements can be reached. Of course, we recognize that what is suggested provides no permanent solution. We shall be unremitting in our efforts to seek by peaceful means a just solution giving due recognition to the rights of all concerned, including Egypt."

Asked what would happen if Egypt denied transit to ships of the Users' Association, Mr. Dulles said that in such an "unhappy contingency" the U.S.A. would not attempt to "shoot its way through the canal" but would re-route its vessels round the Cape. The U.S.A. would be prepared to help other nations take the same course by making available to them tankers now in "mothballs," and by loans from the Export-Import Bank to enable them to purchase American oil. Asked whether the Canal Users' Association was "an American idea," Mr. Dulles said that it was the "result of very intensive thought given to the subject by the State Department in consultation with the British and French Ambassadors."

President Eisenhower, at a press conference on Sept. 11, emphasized that the U.S.A. had from the outset been dedicated to a peaceful and reasonable solution of the Suez dispute. "We established the U.N. to abolish aggression," he declared, "and I am not going to be a party to aggression if it is humanly possible . . . to avoid it."

Egyptian Rejection of Canal Users' Association.

The Western Powers' proposal to create a Canal Users' Association was denounced by Colonel Hatem, head of the Egyptian Government Information Department, as "an act of provocation with the obvious aim of creating a situation resulting in armed aggression and leading to war." President Nasser, in a speech on Sept. 15 to Egyptian air cadets, similarly denounced the proposed Canal Users' Association.

President Nasser declared that the proposal to set up a Canal Users' Association was designed to "rob Egypt of the Canal" and "deprive her of her rightful Canal dues," thus constituting a "clear violation" of the 1888 Convention. It was impossible to have two bodies running the Canal [i.e. the Egyptian Authority and the proposed Users' Association], and equally impossible for two bodies to collect Canal dues, "unless it is suggested that we, too, can form an association for the users of the Port of London."

After accusing Britain and France of "sabre-rattling," "provocation," "threats, and international thuggery," President Nasser alleged that the non-Egyptian pilots of the former Suez Canal Company had been incited to give up their jobs by a "conspiracy" between Mr. Selwyn Lloyd and M. Georges-Picot [managing director of the Company] "with the aim of persuading the world that Egypt cannot preserve freedom of navigation on the Canal." Navigation had nevertheless continued uninterrupted, and on the previous day (Sept. 14) the record number of 50 vessels—the biggest number to pass through the Canal in a single day for many years—had been piloted safely through by "the 70 Egyptian and Greek pilots who refused to be bribed and preferred to continue in their jobs."

Criticizing the U S. Government's support for the projected Canal Users' Association, President Nasser declared : " I cannot tell what America's stand is. The President of the United States says he wants peace—and then the Secretary of State suggests plans that would eventually lead to war."

President Nasser said in conclusion . " What users of the Canal have the right to is free passage through the Canal—and this we guarantee . . . But we are determined never to surrender any of our rights. We shall resist any aggression . . . Those who attack Egypt will bring disaster upon themselves . . . We shall fight an organized war as well as a guerrilla war . . . We shall defend our freedom and independence to the last drop of our blood . . . "

Anglo-French Note to Security Council.

The British and French representatives on the Security Council presented a joint Note on Sept. 12 to the President of the Council (Dr. Nuñez-Portuondo, of Cuba, who held that position during September) declaring that Egypt's refusal to negotiate a settlement of the Suez dispute on the basis of the Menzies Committee's proposals was " an aggravation of the situation which, if allowed to continue, would constitute a manifest danger to peace and security." No formal request was made for a meeting of the Security Council, but the signatories requested that the Note be brought to the attention of all Council members.

Convening of Second London Conference on Suez.

The British Foreign Office announced on Sept. 14 that a second conference had been convened in London for the following week by the British, U.S., and French Governments to discuss the setting-up of the proposed Canal Users' Association. Invitations had been sent to the other 15 countries [i.e. in addition to the U.K., France, and the U.S.A.] which had supported the 18-nation resolution adopted at the earlier London conference.—(Times - Daily Telegraph - Manchester Guardian - Observer - Sunday Times - Le Monde, Paris - New York Times - New York Herald Tribune) **(15079 A.)**

Note. Further developments in the Suez dispute will be described in subsequent issues, including the second London conference and the discussions in the U.N. Security Council. (Ed. K.C.A.).

A. UNITED KINGDOM. — Chester-le-Street By-election.

Polling took place on Sept. 27 in the Chester-le-Street division of County Durham, the by-election being caused by the death of Mr. Patrick Bartley (Labour). Result :

Pentland, Norman (Labour)	27,912
Rees-Mogg, William (Conservative)	6,625
No change. Labour majority	21,287

Figures at the general election were . P. Bartley (Lab.) 32,323, D. A. Wright (C.) 10,047—Labour majority, 22,276.

The Labour candidate polled 80.82 per cent of the votes and the Conservative candidate 19.18 per cent, as compared with respective percentages of 76 29 and 23.71 at the general election. The Labour proportion of the poll thus rose by 4.53 per cent

The electorate numbered 53,191 (a decrease of 56 since the general election), of whom 64.9 per cent went to the polls, compared with 79.5 per cent at the general election.

Mr. Bartley (47), a former miner, had represented Chester-le-Street since 1950 He died on June 25.

The new Member, Mr. Norman Pentland (43), is a colliery checkweighman.—(Times - DailyHerald) **(Prev. rep. 14984 A.)**

B. MEXICO. — Campaign to eradicate Malaria.

A nation-wide campaign for the eradication of Malaria in Mexico, to be carried out within five years, began on Sept. 7. Under an agreement signed on Dec. 5, 1955, between the Mexican Government, the U.N. Children's Fund (Unicef), the World Health Organization, and the U.S. International Co-operation Administration, Mexico undertook to provide $12,000,000 toward the cost of the campaign, Unicef to supply $8,400,000 for equipment such as insecticides, spray-guns, etc., and the W.H.O. and I.C.A. to supply technicians. According to Mexican health officials and W.H.O. experts, Mexico has the worst malaria record in the Western Hemisphere, some 23,000 Mexicans dying annually of the disease and about 2,000,000 contracting it each year.

During the first three years of the campaign the interiors of 700,000 houses and buildings throughout the country will be sprayed at six-monthly intervals, Mexico having been divided into 50 areas for this purpose. Approximately 400 " spraying brigades," each equipped with a jeep and the necessary equipment, will be in constant action throughout this period. During the first phase of the campaign, treatment of persons suffering from malaria will be carried out simultaneously with the eradication of mosquitos. The second phase—i.e. the final two years—will be devoted to inspection and evaluation of the programme.—(New York Times)

C. SCIENTIFIC RESEARCH. — Synthetic Diamonds produced in the U.S.A. - Industrial Uses.

The first diamonds ever to be produced by a laboratory process were shown to scientists on Feb. 15, 1956, at the General Electric Company's research station at Schenectady, New York. The achievement was the result of four years' research work by a team of G.E.C. chemists and physicists—Drs. Francis P. Bundy, Herbert M. Strong, H. Tracy Hall, and Robert Wentort.

It was disclosed that synthetic diamonds had been produced by simulating pressures and temperatures existing at a depth of 240 miles below the surface of the earth. A special pressure vessel, contained within a 1,000-ton hydraulic press, had maintained for relatively long periods pressures greater than 100,000 atmospheres (i.e. 1,500,000 pounds to the square inch) and temperatures above 5,000 degrees Fahrenheit. In some cases man-made diamonds, exact duplicates of real diamonds, had been produced in a matter of minutes, while in others the process had yielded solid clusters of small diamonds. Many variations of colour, clarity, and crystallinity found in natural diamonds had been observed in the man-made crystals. The synthetic diamonds were produced from a carbonaceous substance, the nature of which remained secret but which was believed to include graphite. The basic constituent of the synthetic diamonds was carbon, as in the case of natural diamonds, the only difference between the two forms of carbon being the arrangement of the atoms in the structure of their respective crystals. As compared with natural diamonds, however, the man-made diamonds were very small, the largest yet produced being one-sixteenth of an inch in length and weighing one-tenth of a carat.

Although the synthetic diamonds passed all the tests for natural diamonds, including very great hardness, it was pointed out by Dr. Guy Suits (vice-president of the G.E.C. and Director of Research) that it would be " decidely premature " to conclude " that we are about to make diamonds of a size and quality suitable for gem use," since it was not yet known what conditions of pressure and temperature were required to produce diamonds of the desired colour and size. In a subsequent statement on May 3, Dr. Suits disclosed that man-made diamonds were being produced in limited quantities at a pilot factory in Detroit, and forecast that they would have an important impact on U.S. industry and defence. He explained that the commercial value of synthetic diamonds stemmed primarily from their " incredible hardness," which was of great importance for such industrial uses as cutting and grinding.

(New York Times - New York Herald Tribune)

D. TRINIDAD. — General Elections.

General elections for a new Legislative Council were held in Trinidad on Sept. 24, the former Legislative Council having been dissolved on May 26 after approving a five-year development programme costing about £18,000,000. The elections were the first to be held under the revised Trinidad Constitution, which has increased the number of elected seats in the Legislature from 18 to 24, provided for the appointment of a Chief Minister, and raised the number of Ministers from five to eight. [The revised Constitution is based on the recommendations submitted in February last—see 14698 B—and subsequently approved by the British Government.]

The People's National Movement (P.N.M.), a new party formed eight months earlier under the leadership of Dr. Eric Williams, a West Indian political economist educated at Oxford, won the elections by securing 13 of the 24 seats—an overall majority. Five seats were won by the People's Democratic Movement (predominantly Hindu), three by the Home Rule Party, two by the Trinidad Labour Party, and one by an Independent. About 80 per cent of the electorate went to the polls (against 70 per cent in 1950), the P.N.M. receiving 103,000 votes out of the 239,000 cast.

Three Ministers were defeated by P.N.M. candidates—Mr. Albert Gomes (Industry and Commerce), one of the best-known West Indian politicians; Mr. Norman Tang (Health); and Mr. Roy Joseph (Education). Mr. Learie Constantine, the West Indian Test cricketer and chairman of the P.N.M., was elected by a narrow majority of 145 votes, defeating the mayor of Port of Spain.

The P.N.M., which has affinities with the People's National Party (P.N.P.) in Jamaica, advocates self-government for Trinidad and Dominion status for a British Caribbean Federation within five years. Its electoral victory was warmly welcomed by the Chief Minister of Jamaica, Mr. Norman Manley.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Trinidad Constitution, 14698 B ; 1950 General Elections, 11187 A.)**

A. SOUTH AFRICA. — Racial Legislation, 1955-56.

The 1956 session of the South African Parliament, which ended on June 14, was largely devoted to legislation on racial questions. In addition to the South Africa Act Amendment Act (see 14805 A), important measures adopted included the Industrial Conciliation Bill, which forbade the formation of racially mixed trade unions and provided for the division of existing mixed unions into separate racial bodies; four Bills—the Native Administration Amendment Act, the Natives (Prohibition of Interdicts) Act, the Natives (Urban Areas) Amendment Act, and the Population Registration Amendment Act—which restricted the Natives' right of access to the courts; and Bills amending the Group Areas and Bantu Education Acts. Summaries of these Acts, and of other racial legislation enacted during the 1955 and 1956 sessions, are given below.

Labour Legislation.

Two Bills dealing with labour legislation were enacted by the Union Parliament, as described below.

The Industrial Conciliation Act was originally introduced in the House of Assembly on May 12, 1954. After passing its second reading on June 2, 1954, it was referred to a Select Committee which introduced a number of minor modifications. Its main provisions were as follows:

(1) No new mixed unions would be registered.
(2) A mixed union might be divided into separate racial unions if a majority of its White or Coloured members demanded it, its assets then being divided between the two new unions.
(3) Mixed unions must have separate branches and separate meetings for White and Coloured members, and their executive committees must consist entirely of Europeans.
(4) Trade unions and employers' organizations were forbidden to affiliate to political parties or to give financial support to candidates for Parliament or for Provincial or local councils.
(5) The Minister of Labour was empowered to reserve certain kinds of work for members of particular races.
(6) An Industrial Tribunal of five members was established to carry out arbitration, advise the Minister on reservation of work, and hear appeals against decisions of the Registrar of Trade Unions on registration and the division of union assets
(7) The Minister of Labour might declare any industry or occupation an essential service, and prohibit workers employed in it from striking
(8) Strikes were prohibited unless a majority of members of the union concerned had voted in favour of a strike by secret ballot.

In its revised form the Bill was reintroduced into the House of Assembly in January 1956, and, despite strong opposition from the United and Labour parties, was given a third reading without amendment on April 11 (by 67 votes to 41). The Bill passed its third reading in the Senate on May 1.

Outside Parliament the Bill was opposed by three of the four trade union federations—viz., the South African Trade Union Council (which has about 150,000 White and Coloured members), the South African Federation of Trade Unions (with 50,000 White members), and the South African Congress of Trade Unions (which includes White, Coloured, and Native workers)—as well as by the Federated Chamber of Industries (representing the major part of South African industry) and the National Federation of Building Trade Employees. It was supported by the Co-ordinated Council of Trade Unions (19,000 members) and by the Federal Consultative Council of Railway Employees, who were not affected by the Bill During the debate in the House of Assembly it was officially stated that 44 trade unions consisted entirely of White workers and 10 entirely of Coloured workers, and that 125 unions were mixed

The Native Building Workers Amendment Act (enacted on Jan. 9, 1956) made more stringent the provisions of the Native Building Workers Act of 1951, under which Natives were forbidden to do skilled building work in towns except in the Native areas. White householders and businessmen might, however, be granted permission to employ Native labour if White skilled labour was not available.

Legislation on Legal Rights of Natives.

Five Bills, summarized below, were enacted by the Union Parliament on this subject.

The Native Administration Amendment Bill (1955) extended the powers of Native chiefs and headmen to try minor offences committed in areas under their control, and to impose sentences of flogging or fines in money or stock. A convicted Native would have a right of appeal to a Native Commissioner. The Bill was given a third reading in the Senate on March 23, 1955, by 34 votes to five, the United Party voting with the Government.

The Native Administration Amendment Bill (1956) made the Governor-General Supreme Chief of the Natives in Cape Province, and empowered him, if necessary, (*a*) to remove a Native to another area without previous notice, and (*b*) to order the removal of a whole tribe without first obtaining parliamentary approval

The effect of the clause declaring the Governor-General Supreme Chief in the Cape (a position which he already held in the other three Provinces) was to extend the Natal code of Native law to the Natives living in the Cape. Under this code chiefs may be punished without trial for disobedience to the orders of the Minister of Native Affairs; collective fines may be imposed on tribes or communities; Natives considered "dangerous to the public peace" may be imprisoned by administrative order, and no appeal to the courts against any decision of the Minister is permitted.

The Bill passed its third reading in the House of Assembly on May 21, 1956, by 85 votes to 49.

The Natives (Urban Areas) Amendment Act (1956) empowered municipalities to banish without trial any Native whose presence was considered 'detrimental to the maintenance of peace and order," and provided for the individual's punishment if he failed to obey the ejection order. If within five years the individual received a second such order, a Chief Native Commissioner might confine his movements to rural areas or to one specific area, and if he failed to comply with the Commissioner's order he might be sent to a work colony.

The Bill was given a third reading in the House of Assembly on June 14, 1956, by 44 votes to 24, and in the Senate on the same day by 43 votes to 5

The Natives (Prohibition of Interdicts) Act provided that if a Native was ordered under any law to move from one place to another, he might not apply to the courts for an interdict against the removal order. He might, however, seek redress after he had complied with the order, and if the court held that it was invalid he might receive compensation and be restored to the position he was in before the order was issued. The Bill received a third reading in the House of Assembly on June 9, 1956, by 56 votes to 34.

The Population Registration Amendment Act laid down that "a person who in appearance obviously is a member of an aboriginal race or tribe of Africa shall, for the purposes of this Act, be presumed to be a Native unless it is proved that he is not in fact and is not generally accepted as such." The period during which a person might lodge an appeal against his racial classification—which, under the Population Registration Act of 1950 (see 12211 A), had been unlimited—was restricted to 30 days from the date when he was notified of his classification. The House of Assembly gave the Bill a third reading on June 14, 1956, by 47 votes to 50

This Act reversed a ruling of the Transvaal Supreme Court, which, when dealing with the appeal of a Coloured man who had been wrongly classified as a Native, laid down that in cases of disputed classification the onus of proof rested with the Director of Census.

Apartheid Legislation.

Five Bills dealing with various aspects of *apartheid* (racial segregation) are summarized below.

The Natives (Urban Areas) Amendment Act (1955), which passed its third reading in the House of Assembly on March 3, 1955, by 69 votes to 47, and in the Senate on March 31 by 17 votes to 9, contained the following provisions.

(1) The number of Native employees allowed to live in any one building in a European urban area was limited to five. (2) The Minister of Native Affairs was empowered to order the removal of any Native community for health or safety reasons, or if town or regional planning demanded it (3) Natives from the High Commission Territories were forbidden to enter urban areas without permits. (4) Work camps would be established to which "idle or undesirable" Native youths might be sent by a Native Commissioner or magistrate (5) When Natives were removed from one area to another, local authorities would not be legally required to provide houses for them, but only a site on which the Natives themselves could erect new homes (6) Natives would not be allowed to return to an urban area after an absence of more than 12 months, unless they returned to their previous employer and to the same class of work.

The Group Areas Amendment Act (1955) laid down that the Land Tenure Advisory Board responsible for the administration of the Group Areas Act (see 12211 A) should have power to refuse to hear persons not directly implicated in a particular inquiry The Bill was strongly criticized by the Opposition as an attempt to circumvent a ruling of the Transvaal Supreme Court that all persons affected by the Board's inquiries were entitled to a hearing It was given a third reading in the House of Assembly on Feb 7, 1955, by 84 votes to 51.

The Group Areas Further Amendment Act provided for the creation of "border strips" between group areas, in which only a public authority or a person authorized by the Minister of the Interior might own land or premises, and in which no-one might occupy such land or premises except for a purpose approved by the Minister. These strips could be proclaimed in the same way as a group area, with immediate effect or with effect from some future date. The Bill passed its third reading in the House of Assembly on June 17, 1955, and in the Senate on June 21

The Minister of Lands (Mr. Sauer) stated that the "border strips" were intended to keep the different racial groups apart, and might be used for the erection of factories employing both Native and European labour.

The Group Areas Development Act set up a Group Areas Development Board which, on the proclamation of a group area, would take control of all affected property in the area, and would receive an option to buy any of it.

The basic value of the property (i.e the value of the land and the cost of buildings erected on it, minus depreciation) would be decided by an independent appraiser If the owner of property wished to sell it he must notify the Board, which would either let him negotiate a sale or itself buy the property. If the price received by the owner was more than the basic value, he would pay the Board 50 per cent of

the difference between the selling price and the basic value; if it was less, the Board would pay him 75 per cent of this difference. If an owner sold his property for a price above the basic value without notifying the Board, the Board might demand 75 per cent of the difference, but if he sold it for less he would not be entitled to compensation. Disputes between an owner and the Board regarding compensation would be referred to arbitration

Dr. Donges (Minster of the Interior) said that the Bill's objects were to assist members of the group leaving a proclaimed area to free their capital, so that they could buy land and dwellings in the area to which they were moving; to permit the development of such areas, in order to make them suitable for the incoming group, and to ensure that land in areas proclaimed for non-Europeans should not be so high in price as to prevent them from buying homes there.

The Bill passed its third reading in both Houses on June 21, 1955.

The Group Areas Amendment Act (1956) laid down a uniform procedure in all Provinces for obtaining parliamentary approval for the proclamation of Coloured group areas, and enabled certain areas classified as approved Native residential areas, to be dealt with in terms of the Group Areas Act. [Hitherto the procedure in Transvaal and the Orange Free State had differed from that in the Cape and Natal.]

The Bill was strongly criticized by the Opposition on the ground that it would enable the Government to remove Natives from the few urban areas where they still had rights of ownership. Opposition amendments providing that Natives removed from such areas should receive adequate compensation for all existing property rights which might be taken away, and should be granted freehold title in the areas to which they were removed, were rejected.

The Bill received a third reading in the House of Assembly on April 18, 1956, by 87 votes to 47, and in the Senate on May 3 by 59 votes to 10.

Educational Legislation.

The Bantu Education Amendment Act (1) authorized the Minister of Native Affairs to refuse or cancel the registration of a private school, irrespective of the recommendations of the Native Affairs Commission; (2) laid down conditions for the registration of private schools, e.g. that fees should not be charged, and that the curriculum, the qualifications and behaviour of the staff, and the school buildings should conform to the Government's standards; and (3) permitted the Minister to delegate his powers to the Secretary of Native Affairs in cases where the Minister's personal approval was necessary for changes in subsidies to schools.

During the second reading debate, Mr. Maree (Nationalist), the Native Affairs Commissioner charged with supervision of educational policy, stated that when the Government subsidy was withdrawn from Roman Catholic mission schools in 1957, all the 800 schools would have to apply for re-registration Dr Verwoerd (Minister of Native Affairs) added that they would not be allowed to charge fees, as the Bantu had to be protected against the possibility of "exploitation."

The Bill was given a third reading in the House of Assembly on May 1, 1956, by 63 votes to 36, and in the Senate on May 9 by 49 votes to seven.

About 5,000 Protestant mission schools had been taken over by the Division of Bantu Education on April 1, 1955, whilst the Roman Catholic schools had continued to function independently. Following Dr. Verwoerd's statement, the Roman Catholic Archbishop of Cape Town (Dr. McCann) said that the Church had hoped to run its schools on an economic basis, but that, if it was not allowed to accept fees, it might be necessary to finance them from general Church funds.

Strong protests were aroused by a Government order of Feb. 7, 1956, which directed the Anglican private school of Christ the King in Sophiatown, Johannesburg (attended by 550 Native children) to close down at the end of the quarter. The Anglican Bishop of Johannesburg (Dr. Reeves) said that "the only fault we can imagine of which this school has been guilty—if fault it is—is that those who have been privileged to be scholars have been receiving a more adequate education than that provided in a great number of schools for African children." Dr. Verwoerd stated on March 6 that the school had been ordered to close because fees were being charged and there was an "undesirable spirit" in the school.—(Cape Times - Die Burger, Cape Town) **(Prev. rep. Racial Legislation, 13350 A; Bantu Education Act, 14077 A.)**

A. NETHERLANDS. — Constitutional Reform.

Following the recent general elections, the Bill increasing the membership of the Lower House of the States-General from 100 to 150, and of the Upper House from 50 to 75, was re-enacted by the new Lower House on July 11 (by 71 votes to six) and by the Upper House on Aug. 21 (with only one dissenting vote). It comes into force in the autumn of 1957. (Netherlands News Agency) **(Prev. rep. 14858 B.)**

B. SHIPPING. — The "Andrea Doria" Disaster.

The worst disaster in the history of transatlantic maritime navigation for many years occurred on July 26, when the liner *Andrea Doria* (29,083 gross tons), of the Italian Line (*Società Italia per Azioni di Navigazione*), foundered about 200 miles from New York after having been in collision with the motorship *Stockholm* (12,644 gross tons), of the Swedish-American Line (*Svenska Amerika Linien*). The great majority of the 1,709 passengers and crew on board the *Andrea Doria* were rescued by ships in the vicinity and landed at New York, but a small number were killed when the collision took place and others remained unaccounted for. The total number known or presumed to have lost their lives in the disaster was given on Aug. 9 as 52, including five of the crew of the *Stockholm*.

The collision occurred during dense fog shortly before midnight on July 25 in an area, about 45 miles south-east of Nantucket Island, known as "the crossroads of the Atlantic," where the "shipping lanes" used by vessels trading from U S Atlantic ports to Europe and Canada intersect The *Andrea Doria* was inward bound to New York from Genoa, while the *Stockholm*, with about 750 passengers and crew on board, was on passage from New York to Gothenburg. The Swedish ship's bows struck the *Andrea Doria* just below the navigating bridge amidships, causing immediate flooding of one of the 11 watertight compartments into which the Italian liner's hull was divided Although the ship had been designed with the intention that the flooding of any two of these compartments should not affect her stability, she at once took a heavy list which increased gradually as water entered cabins through portholes, thus preventing the launching of any of her lifeboats for some hours

The 44,000-ton French liner *Ile de France* (which had left New York on July 25 for Havre) and the U.S. freighter *Cape Ann* (bound for New York from Hamburg), which were in the vicinity at the time of the disaster, launched boats and rescued 760 and 129 persons respectively. Rescues were also effected by a U.S Army transport (which took off 156 passengers), by the U.S destroyer *Edward H. Allen* (76 persons taken off), and by Coast Guard and other craft, while 533 other survivors were taken on board the *Stockholm*, which returned to New York in a badly damaged condition. The *Andrea Doria* remained afloat until about 10.0 a.m. on July 26—i.e. for over 10 hours after the collision occurred

At the time of their construction the *Andrea Doria* and her sister-ship the *Cristoforo Colombo* were the largest and fastest vessels built in Italy since the war, and the eighth largest liners in the world. The maiden voyage of the *Andrea Doria* took place in 1953 (see 12764 A), her loss being received in Italy as a national disaster. On Aug 8 the Italian Line announced that it had contracted with the Ansaldo company of Sestri Ponente (where the *Andrea Doria* was built) for a new ship to replace her, but slightly larger and faster. Every effort would be made to have the new liner ready for her maiden voyage before the end of 1959.

The U.S. House of Representatives on July 27 authorized its Merchant Marine and Fisheries Committee to investigate the circumstances of the collision, which took place in spite of the fact that both liners were equipped with the latest aids to navigation, including efficient radar. On Aug. 9 the Swedish-American Line filed a petition in the New York Federal District Court asking that the line should not be "held liable for any loss, damage, injury, or destruction arising from the collision," which, the petition alleged, had been caused solely by "the fault and negligence of the *Andrea Doria*." On Aug. 10, however, the Italian Line brought a counter-suit in the Federal District Court against the Swedish-American Line, claiming $25,000,000 damages on the ground that the disaster had been allegedly caused by "the fault and negligence of the *Stockholm* and her crew." Preliminary hearings began on Sept. 20. (Lloyd's List and Shipping Gazette - New York Times - Corriere della Sera, Milan) **(Prev. rep. "Andrea Doria," 12764 A.)**

Note. The loss of the *Andrea Doria*—which, because of the elaborate subdivision of her hull, had been claimed to be unsinkable through ordinary maritime hazards—recalled that of the "unsinkable" *Titanic* on her maiden voyage from Southampton to New York in 1912, when over 1,500 lives were lost The *Titanic*, however, collided with an iceberg which ripped a hole diagonally over the full length of the ship's side, all the watertight compartments being thereby opened to the sea. The most serious collision in fog conditions to take place in peacetime in the present century occurred in the St Lawrence in the spring of 1914, when the Canadian Pacific liner *Empress of Ireland* sank with the loss of over 1,000 lives after being rammed by the Norwegian collier *Storstad*. (Ed K C.A.).

C. AVIATION. — Atlantic Flight by British V-Bomber.

The first non-stop flight across the Atlantic by a British V-bomber was made on Sept. 2, when a Vickers Valiant bomber arrived at Marham R.A.F. Station (Norfolk) 6¼ hours after leaving the Lowring Air Force Base, Maine, U.S.A. The machine was piloted by Wing-Commander L. H. Trent, V.C. (Times - Daily Telegraph) **(Prev. rep. 14406 B.)**

A. MOROCCO. — Clashes between "Liberation Army" and French Forces. - "Liberation Army" incorporated in Royal Army. - Moroccan Claim to Mauritania. - French Citizens expelled on Conspiracy Charges. - Rejection of Istiqlal Demand for One-Party Government. - Incorporation of Spanish Zone. - Interim Agreement on Status of Tangier.

Developments in Morocco during the past three months are described below under cross-headings, in continuation of 14946 A.

Clashes between "Liberation Army" and French Forces.

A number of clashes occurred during June between the French forces in Morocco and bands of the "National Liberation Army," particularly on the Algerian border and in the Agadir area in southern Morocco. The most serious incident occurred on June 20, when 11 French soldiers were killed in a clash with "Liberation Army" units at Aïn-Chaïr, near the Algerian border and about 45 miles north-west of Colomb-Béchar. Elsewhere in Morocco some 400 men of the "Liberation Army" made an unsuccessful attack on the frontier post of Oum-El-Achar, a French officer was kidnapped in the Agadir area, and a French police post at Bou-Izakarn (60 miles south of Agadir) was raided and stripped of arms. French troops arrived at Agadir on July 1, and three days later occupied the police post of Foum-El-Hassan (about 150 miles north-west of Tindou) in spite of strong protests by the Moroccan Government.

A Cabinet meeting at Rabat, presided over by the Sultan, decided on July 4 to send M. Balafrej (the Foreign Minister) and M. Guedira (Defence Minister) to Paris "to confront the French Government with its responsibilities." At the same time Prince Moulay Hassan (Chief of Staff) was ordered to reoccupy Foum-El-Hassan and other posts which had been occupied by the French. On July 5 Prince Moulay Hassan had a meeting with General Cogny, the new French C.-in-C. in Morocco, a provisional agreement being reached whereby Foum-El-Hassan was jointly occupied by French and Moroccan forces and the French military authorities undertook to keep the Moroccan Government informed of all future troop movements.

M. Balafrej and M. Guedira had discussions in Paris from June 8-14 with M. Pineau (Foreign Minister), M Bourgès-Maunoury (Defence Minister), and M Savary (State Secretary for Tunisian and Moroccan Affairs) Before returning to Rabat on July 15, M. Balafrej told a press conference that a "gentlemen's agreement" had been reached on the status of French troops in Morocco, but gave no details of its terms. In an interview with *Le Monde* he had expressed the opinion that the Moroccan Army should be responsible for control of the frontiers; that Morocco should not be used as a base for the French forces fighting the Algerian insurgents; and that it should be the task of the French forces in Algeria to prevent Moroccans from crossing the frontier to join the insurgents, as the Moroccan Army was not yet strong enough to undertake this responsibility.

The Moroccan Government issued a statement on July 28 protesting against recent movements of French troops in the Oujda area, which had been made without the authorization of the Moroccan authorities, and alleging that the French forces had "sown terror" in the neighbourhood. After discussions between M. Guedira, General Cogny, and M. Dubois (the French Ambassador) it was decided on Aug. 31 to send a joint commission to the eastern frontier to investigate recent incidents in this area. Clashes between French troops and Moroccan civilians had previously occurred at Marrakesh on June 29, when ten civilians lost their lives, and at Casablanca on Aug 7, when a Senegalese soldier was killed and 14 soldiers and 22 civilians wounded

"Liberation Army" incorporated in National Army.

The situation had meanwhile been eased, however, by the decision of the "National Liberation Army" to incorporate itself in the national Moroccan Army.

Opinion inside the "Liberation Army" had for some time been divided on the advisability of this step, and on June 26 Si Abbes Messadi, one of its leaders who favoured integration, was kidnapped and murdered by a rival leader, Si Hajjaj. Prince Moulay Hassan arrived in the Rif area on July 2 and was met by a delegation of 1,000 members of the "Liberation Army," who asked to be incorporated into the Royal Army on behalf of themselves and 5,000 of their comrades. Among those who rallied to the Sultan were the followers of Si Hajjaj, who was arrested. Some 250 leaders of the "Liberation Army" returned with Prince Moulay Hassan to Rabat, where they took the oath of allegiance in the Sultan's presence

Prince Moulay Hassan, accompanied by Dr. Khatib, the "general" of the "Liberation Army," had a meeting on July 22 with the leaders of the bands operating in the Marrakesh area and the Atlas Mountains, as a result of which they too agreed to accept integration By the end of August it was estimated that 10,000 members of the "Liberation Army" had come to Rabat, about half of whom would be incorporated into the Royal Army, whilst the remainder would be rehabilitated in civilian occupations; it was estimated that 2,000 to 3,000 irregulars still remained organized in independent bands, mainly to the south of Agadir and along the Algerian frontier. Two leaders of bands which had not yet submitted, Si Ben Aïssa and Si Mohamed El Oukdi, were arrested in the Fez area on Aug. 10 and Aug. 14 respectively.

Moroccan Claims to Mauritania.

In a speech at Tangier on June 19, the leader of the Istiqlal, Si Allal El Fassi, demanded the incorporation in Morocco of south-western Algeria, the Mauritanian area of French West Africa, and the Spanish Sahara (Rio de Oro). He declared that Morocco, though independent, was "not completely unified," and that "Moroccans will continue the struggle until Tangier, the Spanish and French Sahara, and Mauritania, are liberated and unified."

At a press conference in Cairo on July 3, Si Allal El Fassi said that Moroccan and Mauritanian nationalists had been forced to raise this question by the introduction into the French Parliament of a Bill for the integration of the Sahara into French national territory. A map of "Greater Morocco," published on July 5 in the Istiqlal daily *Al Alem*, included not only the territories mentioned by Si Allal El Fassi, but, in addition, the French Sudan and the Tanezrouft area of southern Algeria.

A Mauritanian section of the *Bureau du Maghreb* in Cairo was established on June 26 under M. Horma Ould Babana (a former deputy for Mauritania in the French National Assembly), who described himself as leader of the Mauritanian Nationalist Movement. M. Babana was present at Si Allal El Fassi's press conference on July 3, and was received on July 23 by the Sultan of Morocco.

M. Suleiman Sheikh Sidya, the Mauritanian representative in the Assembly of the French Union, declared on July 7 that the claims of certain Moroccan leaders in no way expressed the desire of the population of Mauritania, which had never been part of the Sherifian Empire.

Relations with France.

Other recent developments affecting Franco-Moroccan relations are summarized below under cross-headings.

Economic Negotiations. Negotiations for an economic, financial, and monetary agreement were opened in Paris on June 27, the respective delegations being led by the Moroccan Finance Minister (M Benjelloun) and M. Savary. M. Benjelloun, who said that large-scale investments from public or private sources were needed to raise the living standards of the Moroccan people, put forward proposals for economic aid totalling about 40,000,000,000 francs, of which about 35,000,000.000 francs would be supplied by the French Government's fund for the economic and social development of overseas territories, and the remainder by specialized financial agencies and private French investors At a press conference on Aug 14 M. Benjelloun stated that the French Government had agreed to a loan of 6,500,000,000 francs.

Dismissal of French Officials. The Moroccan Government decided on Aug. 11, as an economy measure, to place 275 of the 5,700 French officers serving in the police at the French Government's disposal, and ordered 247 of them to leave the country before Sept. 1. The officials concerned had all been employed under the French protectorate in the intelligence service, and included 16 commissioners who, at the time of their dismissal, were working under the direction of Nationalists against whom they had formerly taken action. The French Embassy in Rabat announced on Aug 16 that discussions on this matter were taking place between representatives of the two Governments.

Expulsion of French Citizens. Seven members of the extremist settlers' organization, the *Union pour la Présence Française*, were arrested on Sept. 7 on charges of circulating leaflets inciting the Berber tribes to revolt against "the Arab Sultan" and "the Arab Government." The organization was subsequently dissolved and 64 French settlers, nearly all of whom had been members of the *Présence Française*, were arrested on Sept. 11-12 and ordered to leave the country; they included M. Mattei, a former secretary-general of the organization, who had previously been expelled by the French authorities in July 1955 for counter-terrorist activities. A strong protest against the expulsions was lodged by M. Dubois, who contended that no proof had been supplied that all the persons expelled had been engaged in subversive activities.

Istiqlal Demand for One-Party Government.

The National Council of the Istiqlal Party adopted a 37-point programme on Aug. 20, and at the same time called for the withdrawal of Istiqlal Ministers from the present coalition government as soon as possible, and for the opening of discussions with the Sultan with a view to forming "a homogeneous government capable of carrying out the Council's emergency programme."

The Istiqlal programme included demands for the evacuation of French troops from Morocco; active support for the Algerian insurgents; direct negotiations with the U.S. Government on the American air bases in Morocco; the abrogation of the Treaty of

Algeciras [which provides for an "open door" policy in Morocco]; the strengthening of links with the other Arab countries, Government control of public resources; nationalization of certain enterprises, protection of industry against foreign competition; sequestration of property acquired by "traitors", agrarian reforms; distribution of State lands to workers; and fiscal and administrative reforms.

The National Council of the Democratic Independence Party, meeting on Aug. 21, ordered its representatives in the Government to "continue their task in the conduct of public affairs under the enlightened leadership of Si Bekkai."

The Democratic Independence Party called for an economic programme which would raise the living standards of the working classes, and for a foreign policy programme which would include the evacuation of foreign troops; the ending of the "war against the Algerian people"; recognition of Algerian independence, and the inclusion in Morocco of Mauritania, the Spanish *enclave* of Ifni, and the ports of Ceuta and Melilla. [The Istiqlal's programme had made no reference to Ceuta and Melilla, which are regarded as integral parts of Spain.]

In a broadcast on Aug. 31, Si Bekkai declared that "no government could have done better under the same conditions and in the same time," and asserted that there was "no governmental crisis but only growing-pains."

After declaring that "the mission of the Government of National Unity is not completed," Si Bekkai added: "The realization of the Government's programme calls for the mobilization of all the country's forces. It cannot be left to the representatives of one faction of the population to the exclusion of others. No political body can lay claim to hegemony in Morocco, where there has not been a genuine consultation of the people . . . We are advancing peacefully towards a constitutional monarchy and an electoral law."

It had previously been announced on August 2 that a Consultative Assembly would be set up, consisting of 73 members chosen by the Sultan from lists submitted by the political parties, trade unions, economic and social bodies, professional organizations, and youth movements, or appointed by the Sultan himself. The Assembly would meet twice a year, discuss the Budget, submit questions to Ministers, and enjoy parliamentary immunity.

Incorporation of Spanish Zone.

The transfer of the powers of the Spanish authorities in the Northern (Spanish) zone was officially completed on Aug. 1, the Moroccan Ambassador to Spain (M. Abdelkhalek Torres) being charged with the temporary co-ordination of governmental services in Tetuan with the departments in Rabat. The Sultan appointed five governors, four pashas, and a caid for the Northern zone on Aug. 6, whilst it was announced in Madrid that the Spanish High Commissioner, General Valino, had been withdrawn from Morocco as his functions were at an end.

Prince Moulay Hassan had announced on June 14, after his negotiations in Madrid, that the 9,000 Moroccans serving in the Spanish Army would be transferred to the Moroccan Army.

Interim Agreement on Status of Tangier.

An interim agreement on the status of Tangier was signed at Rabat on July 5. It provided (1) that the Administrator would be replaced by a Governor appointed by the Sultan, (2) that the four joint administrators for economic affairs, hygiene, public assistance and labour, finance, and judicial affairs would be known as Counsellors; (3) that the zonal police force would be brought under national control, and the Franco-Moroccan special police placed at the Moroccan Government's disposal; (4) that the Tangier Legislative Assembly would hold three plenary sessions during the transition period, its powers being limited to regional affairs; (5) that the Zone's budget and fiscal system would remain autonomous during the transition period; (6) that laws passed by the Sultan would be applied to Tangier when they were considered urgent, and that the Control Committee would not issue legislative ordinances.

Professor Abdallah Guenoun, a former Minister of Justice in the Spanish Zone, was appointed Governor of Tangier by the Sultan on July 8.

Moroccan-Jewish Emigration to Israel.

Some 5,500 Moroccan Jews, who had been living in a transit camp since the suppression of the Cadima society on June 11 (see 14946 A), were allowed to leave for Israel on Aug. 23. Since 1948 about one-third of the Moroccan-Jewish community, which then numbered about 250,000, had left the country, including 26,000 in 1955 and an average of 3,000 a month during the first six months of 1956.—(Le Monde, Paris - Le Figaro, Paris - A.B.C., Madrid) **(Prev. rep. 14946 A.)**

A. INDIA. — Final Passage of States Reorganization Bill and Bihar and West Bengal (Transfer of Territories) Bill. - New Ministry in Mysore.

Following its adoption by the House of the People (*Lok Sabha*), the States Reorganization Bill was finally passed by the Upper House (*Rajya Sabha*) on Sept. 11, thereby completing parliamentary action on the Bill in preparation for November 1, when the 26 existing States will be replaced by 14 States and six Union territories. The *Rajya Sabha* had given the Bill an unopposed third reading on Aug. 25, after some 130 amendments had been either withdrawn or rejected.

The Bihar and West Bengal (Transfer of Territories) Bill, with minor amendments proposed by the Joint Select Committee to which it had been referred, passed its third reading in the *Lok Sabha* on Aug. 17, only two members opposing. During the debate Pandit Pant stated that the transfer of territories involved was not exclusively based on the linguistic principle but was also designed to meet administrative needs and to ensure geographical continuity; moreover, it would be of national advantage, as the whole of the border with East Pakistan would come under one State [i.e. West Bengal]. In the *Rajya Sabha* the Bill was passed on Aug. 28 by 28 votes to two, with a number of members abstaining.

The Bombay Controversy.

The Gujerat Pradesh Congress Committee, meeting at Ahmedabad on Aug. 19, adopted by 100 votes to 10 a resolution accepting the decision to form a bilingual Bombay State. Opponents of this decision organized a voluntary "curfew" in the city from 9 a.m. to 9 p.m. on the same day, and in consequence a meeting which Mr. Morarji Desai (Chief Minister of Bombay) was to have addressed had to be cancelled for lack of an audience.

Mr. Desai informed the Committee that he would fast "so long as the citizens of Ahmedabad do not hear me peacefully." After discussions with prominent Ahmedabad citizens, however, Mr. Desai agreed on Aug. 25 to break his fast (which had lasted for five days) on the understanding that he would be allowed to address a meeting on the following day.

During this meeting, which was attended by about 50,000 people, a section of the crowd stoned the platform and afterwards stoned vehicles and pedestrians leaving the meeting. One man was killed when the police opened fire on rioters, and over 250 people were injured by police fire, lathi charges, and stone-throwing.

A conference of the *Samyukta Maharashtra Samiti*, meeting in Bombay on Aug. 20, decided to continue the agitation for a unilingual Maharashtrian State including Bombay City, and to call for a general strike on Nov. 1—the date fixed for the inauguration of the bilingual State.

New Cabinet in Mysore.

Mr. Hanumanthaiya, Chief Minister of Mysore, resigned on Aug. 18 on the ground that his support for the incorporation of Mysore in a single Karnataka State had lost him the confidence of the Assembly. A new Government was formed on Aug. 19 by Mr. Kadidal Manjappa, the Revenue Minister, who had opposed the States Reorganization Commission's recommendations (see 14488 A). The other members of his Government, all of whom had held office in Mr. Hanumanthaiya's Ministry, were Mr. A. G. Ramachandra Rao, Mr. H Siddaveerappa, Mr. R. Nagan Gowda, Mr. T. Channaiah, and Mr. H. M. Channabasappa.—(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London) **(Prev. rep. 15037 A.)**

B. SPEED RECORDS. — New World Water Speed Record set up by Mr. Donald Campbell.

A new world water speed record of 225.6 miles an hour was set up on Coniston Water (Lake District) on Sept. 19 by Mr. Donald Campbell in his jet-powered speedboat *Bluebird*. Mr. Campbell thereby broke his own former world record of 216.2 m.p.h. which he had set up at Lake Mead, Nevada, in November, 1955. In setting up the new record, Mr. Campbell reached a speed of 286 m.p.h. on the first run over a measured kilometre, becoming the first man to travel at over 280 m.p.h. on water. Because of fumes which rendered him almost unconscious on the first run, when the *Bluebird* was rocking violently, Mr. Campbell's speed on the second run was reduced to 164 m.p h., giving an average for the two runs of 225.6 m.p.h. (Times - Daily Telegraph) **(Prev. rep. 14623 B.)**

C. GREECE - RUMANIA. — Diplomatic Relations.

Diplomatic relations between Greece and Rumania were resumed on Aug. 25 for the first time since the war. (Times) **(Prev. rep. 13757 A.)**

A. PAKISTAN. — Mr. Mohammad Ali's Resignation from Premiership and Moslem League. - Coalition Government formed by Mr. Suhrawardy.

The Prime Minister of Pakistan, Mr. Mohammad Ali, received a vote of confidence on Aug. 27 from a meeting of 40 Republican and United Front members of the National Assembly. The meeting was boycotted, however, by most of the Moslem League members of the Assembly, who maintained that the Republicans were not entitled to attend. Moreover, Mr. Chundrigar (Law Minister) and Pir Ali Mohammed Rashidi (Minister of Information) had tendered their resignation from the Government before the meeting, while two more Ministers—Mr. Kayani (Communications) and Sardar Amir Azam Khan (Refugees)—resigned on Sept. 6 from the Moslem League, which they described as a "cesspool of intrigue," and joined the Republican Party.

Mr. Mohammad Ali—who, as a result of these resignations, was left as the only Moslem League member of the Cabinet—announced on Sept. 8 that he had resigned both the Premiership and his membership of the Moslem League.

In his statement Mr. Mohammad Ali said that he had "come to this agonizing decision after deep thought and after a close study of the course of events in the country during the past few months." Describing his relations with the leaders of the Moslem League, he observed that "even so signal an achievement as the passing of the Constitution, for which the Moslem League may well have taken credit, drew largely adverse comments from its leadership." On the advice of prominent Moslem League members he had announced in March that Dr. Khan Sahib should continue as Chief Minister of West Pakistan, yet in April these same leaders had refused to accept Dr. Khan Sahib as Chief Minister of the Province.

After the meeting on Aug. 27, Mr. Mohammad Ali continued, it had become "increasingly clear to me that a section of the League leadership was determined to block all avenues of service that I could render to the country . . . I have suffered all this in silence, hoping that wiser counsels would prevail, but the campaign of vilification and slander against me has continued with unabated fury. At the meeting on Aug. 27 the majority of the coalition party members—an absolute majority in the National Assembly—expressed their confidence in me . . I consider it a point of honour that, having decided to resign from the Moslem League, I must resign also from the Premiership."

Mr. Mohammad Ali concluded "It is my conviction that if democratic institutions are to be worked successfully, the leadership of the country must be vested in Parliament. In a parliamentary democracy it is the representatives of the people in Parliament who are primarily charged with the duty of managing the affairs of the country If parliamentary leadership is continually subjected to the caprice of personal and power politics by elements external to it, democratic concepts and constitutional practices will have lost all their relevance."

On Sept. 10 President Mirza asked Mr. H. S. Suhrawardy, the leader of the Awami League, to form a Government after Mr. Mohammad Ali had declined the task. The membership of the new Cabinet, consisting of four Awami League members and five Republicans, was announced on Sept. 12 as follows:

Mr. H. S. Suhrawardy (Awami League)—Prime Minister, Defence, Kashmir Affairs, States and Frontier Regions, Economic Affairs, Education, Health, Law, and Refugees and Rehabilitation.
Malik Firoz Khan Noon (Republican)—Foreign Affairs and Commonwealth Relations.
Mr. Abul Mansur Ahmed (Awami League)—Commerce and Industries.
Syed Amjad Ali (Republican)—Finance.
Mr. Abdul Khaleque (Awami League)—Labour and Works.
Mir Ghulam Ali Talpur (Republican)—Interior.
Mr. Dildar Ahmad (Awami League)—Food and Agriculture.
Sardar Amir Azam Khan (Republican)—Information and Broadcasting, and Parliamentary Affairs.
Mian Jaffar Shah (Republican)—Communications.

Mr. Hussein Shaheed Suhrawardy (63) was born at Midnapur (West Bengal), studied jurisprudence at Oxford, and was called to the Bar at Gray's Inn. Before partition he was a prominent Moslem League member of the Bengal Legislative Council, holding the office of Food Minister (1943-45) and Chief Minister of the Province (in 1946). In 1950 he left the Moslem League to form the Awami League, of which he became president. As Law Minister from 1954-55 he was largely responsible for the unification of West Pakistan.

Malik Firoz Khan Noon (formerly Sir Firoz Khan Noon) was Indian High Commissioner in London from 1936-41, Indian member of the British War Cabinet from 1944-45, Governor of East Bengal from 1950-53, and Chief Minister of the Punjab from 1953-55. He relinquished his British knighthood after the formation of the Dominion of Pakistan in 1947.

In a broadcast on Sept. 12, Mr. Suhrawardy stated that he would pay special attention to the Kashmir question and to the eradication of corruption.

After stressing that Pakistan desired friendly relations with all countries, and declaring that the Government's foreign policy would be based on "goodwill towards all and malice towards none," Mr. Suhrawardy declared "We stand for a speedy solution of the Kashmir dispute by the democratic method of a free and impartial plebiscite. I intend to pay special attention to the problem, with a view to finding a solution. In the meantime, this Government wishes to reassure all Kashmiris that the securing of the right of self-determination for them is an article of faith with us. Come what may, we will not fail them."

Turning to internal affairs, Mr. Suhrawardy said that the first problem facing the country was that of political stability, which could "never be obtained unless we allow free play to democratic processes, uphold the Constitution in letter and spirit, and ensure the rule of law . . . We must have a clean administration and clean politics. It is said and felt that corruption is rampant, that no-one gets even his just dues unless he stoops to unscrupulous methods. Let us all endeavour to get together and eradicate corruption from our midst . . . It is necessary that there should be general elections based on adult suffrage as soon as possible, and that these elections should be absolutely free and above-board. We shall make every endeavour to hasten elections and have as tight a time-table as possible, but I fear that there has been so much dilatoriness, and that so much initial work has yet to be done, that elections cannot be held as soon as we should wish them to be."

Declaring that food shortages in East Pakistan had reached "tremendous proportions bordering on famine," Mr. Suhrawardy gave a pledge to "rush foodgrains to that area until it is saturated."

The formation of Mr. Suhrawardy's Cabinet marked the end of the rule of the Moslem League, which had controlled both the Central and Provincial Governments from the establishment of Pakistan in 1947 to 1954. It lost control of East Pakistan after the 1954 provincial elections, and of West Pakistan when Dr. Khan Sahib formed his Republican Government in April 1956.—(Pakistan High Commissioner's Office, London - Dawn, Karachi - Times) **(Prev. rep. 15006 A.)**

B. LITERATURE. — Book Selections, August and September.

Selected books published in Great Britain, the United States, and France, are given below:

Great Britain. Cockburn, John—"The Hungry Heart." A Biography of James Keir Hardie (Jarrolds, 18s.)
Crankshaw, Edward—"Russia without Stalin: The Emerging Pattern." (Michael Joseph, 18s.)
Linklater, Eric—"The Dark of Summer" (Cape, 15s.)
Macaulay, Rose—"The Towers of Trebizond." (Collins, 13s. 6d.)
Nicholas, H. G.—"To the Hustings." An Anthology of Election Scenes from English Fiction. (Cassell, 18s.)
Phillips, C. E. Lucas—"Cockleshell Heroes" (Heinemann, 16s.)
Plumb, J. B.—"The First Four Georges" (Batsford, 21s.)
Rees, J. Tudor—"Reserved Judgement." The Autobiography of a Judge. Published posthumously. (Frederick Muller, 21s.)
Russell, Bertrand—"Portraits from Memory and Other Essays." (Allen and Unwin, 16s.)
Snow, C. P.—"Homecomings" (Macmillan, 15s.)
"The New Outline of Modern Knowledge." Edited by Alan Pryce-Jones. (Victor Gollancz, 25s.)
Toynbee, Arnold—"An Historian's Approach to Religion." (Oxford University Press, 21s.)
Trevelyan, Raleigh—"The Fortress: A Diary of Anzio and After." (Collins, 12s. 6d.)

United States. Burns, James MacGregor—"Roosevelt: The Lion and the Fox." (Harcourt, Brace and Co., New York, $5.75)

SEPTEMBER 29—OCTOBER 6, 1956

A. INDIA. — The Second Five-Year Plan.

An Industrial Policy Resolution, enunciating the principles which the Government intended to follow with regard to industrial development, was presented by Mr. Nehru to the House of the People on April 30, 1956. It divided industries into three categories: (1) those whose future development would be the exclusive responsibility of the State; (2) those in which the State would generally take the initiative in establishing new undertakings, but in which private enterprise would also be expected to supplement the State's efforts; (3) all the remaining industries, whose future development would generally be left to private initiative and enterprise.

The Resolution said that it was essential to accelerate the rate of economic growth, to speed up industrialization, and, in particular, to develop heavy industries and machine-making industries, expand the public sector, and build up a large co-operative sector. It was equally urgent to reduce existing disparities in income and wealth, and to prevent private monopolies and the concentration of economic power in the hands of small numbers of individuals. Accordingly, the State would progressively assume "predominant and direct responsibility" for setting up new industrial undertakings and for developing transport facilities, and would also undertake State trading on an increasing scale At the same time, however, the private sector would have an opportunity to develop and expand The principle of co-operation should be applied wherever possible, and a steadily increasing proportion of "private sector" activities should develop along co-operative lines.

The Resolution declared: "Adoption of a socialist pattern of society as the national objective, as well as the need for planned and rapid development, require that all industries of basic and strategic importance, or in the nature of public utility services, should be in the public sector Other industries which are essential, and which require investment on a scale which only the State in present circumstances can provide, have also to be in the public sector. The State has, therefore, to assume direct responsibility for future development of industries over a wider area. Nevertheless, there are limiting factors which make it necessary at this stage for the State to define the field in which it will undertake sole responsibility for further development, and to make a selection of industries in the development of which it will play the dominant role."

The following categories of industries were listed in the resolution:

Category "A". All new units in these industries, except where their establishment in the private sector had already been approved, would be set up by the State only, though this would not preclude expansion of existing privately-owned units or the possibility of the co-operation of private enterprise with the State in establishing new units when the national interest so required. Railways and air transport, arms and ammunition, and atomic energy would be developed as Central Government monopolies. Wherever co-operation with private enterprise was necessary, the State would ensure—either through majority participation in capital or otherwise—that it had the necessary powers to guide the policy and control the operations of the undertaking concerned

The following 17 industries were comprised in Category "A" (1) arms, ammunition, and allied items of defence equipment, (2) atomic energy; (3) iron and steel, (4) heavy castings and iron and steel forgings; (5) heavy plant and machinery required for iron and steel production, mining, machine-tool manufacture, and such other basic industries as might be specified by the Central Government, (6) heavy electrical plant, including large hydraulic and steam turbines; (7) coal and lignite, (8) mineral oils, (9) mining of iron ore, manganese ore, chrome ore, gypsum, sulphur, gold, and diamonds; (10) mining and processing of copper, lead, zinc, tin, molybdenum, and wolfram, (11) minerals specified in the Schedule to the Atomic Energy (Control of Production and Use) Order, 1953; (12) aircraft, (13) air transport; (14) railway transport; (15) shipbuilding, (16) telephones and telephone cables, telegraph and wireless apparatus (excluding radio receiving sets), (17) generation and distribution of electricity.

Category "B". The State would increasingly establish new undertakings in these industries with a view to accelerating their future development, though at the same time private enterprise would also have an opportunity to develop in this field, either on its own or with State participation

The following 12 industries were listed: (1) all other minerals except "minor minerals" as defined in Section Three of the Minerals Concession Rules, 1949, (2) aluminium and other non-ferrous metals not included in Category "A", (3) machine-tools, (4) ferrous alloys and tool steels; (5) basic and intermediate products required by chemical industries, such as manufacture of drugs, dye-stuffs, and plastics, (6) antibiotics and other essential drugs, (7) fertilizers, (8) synthetic rubber; (9) carbonization of coal; (10) chemical pulp, (11) road transport; (12) sea transport

Category "C". This would comprise all other industries, the development of which would be undertaken ordinarily through private initiative. The State would facilitate and encourage these industries in the private sector, would provide financial aid, and would give special assistance to enterprises organized on co-operative lines for industrial and agricultural purposes.

The draft outline of India's Second Five-Year Plan, covering the years 1956-61, was published in New Delhi on Feb. 10. The plan was presented in its final form to the *Lok Sabha* on May 15, after it had been approved by the National Development Council.

It provided for a total development outlay by the Central and State Governments of Rs.48,000,000,000, and also envisaged the investment of Rs.24,000,000,000 by the private sector. The principal objectives were laid down as: "(*a*) a sizeable increase in national income so as to raise the level of living in the country; (*b*) rapid industrialization, with particular emphasis on the development of basic and heavy industries; (c) a large expansion of employment opportunities; and (*d*) reduction of inequalities in income and wealth, and a more even distribution of economic power." National income over the five years 1956-61 was expected to increase by about 25 per cent, and *per capita* income by 18 per cent, as compared with the 11 per cent estimated during the period of the First Five-Year Plan.

A summary of the principal provisions of the Second Five-Year Plan is given below.

Approach to the Second Five-Year Plan.

The economy had responded well to the stimulus of the first plan Both agricultural and industrial production had recorded substantial increases; prices had attained a reasonable level; and India's external accounts were virtually in balance. The important targets proposed in the first plan had been realized, and some of them had been exceeded. On the other hand it had not been possible to implement the plans for a new iron and steel plant and a new heavy electrical plant except to a small extent, and there had also been shortfalls in expenditure on community projects, education, village and small industries, etc.

The principal objective of the Second Five-Year Plan was to secure a more rapid growth of the national economy and to increase the country's productive potential. The core of development was rapid industrialization, involving substantial expansion of the iron and steel industry and of the production of non-ferrous metals, coal, cement, heavy chemicals, and other items of basic importance. Industrial development along these lines required a great deal of capital, but absorbed comparatively little manpower. Studies made by the Planning Commission indicated that although the Second Five-Year Plan would not have any significant impact on the carry-over of unemployment from the previous period, it would provide employment opportunities for the new entrants to the labour force and relieve under-employment in agriculture and in village and small industries The working force in mining and factories, in construction, in trade and transport, and in services would undoubtedly increase relatively faster than in agriculture and allied pursuits.

It was emphasized that the achievement of a socialist pattern of society had been accepted as the objective of economic policy, which meant that the basic criterion for determining the lines of advance was social gain rather than private profit. The benefits of economic development should accrue more and more to the less privileged classes of society, and there should be a progressive reduction of the concentration of incomes, wealth and economic power. Nevertheless, the socialist pattern of society was not rooted in any doctrine or dogma, nor was it regarded as a fixed or rigid pattern.

As regards the financing of the plan, the task involved in making credit at reasonable rates available all over the rural areas was formidable, but the new and integrated approach involving joint and co-ordinated action by co-operative agencies, the Reserve Bank, and the State would make a rapid advance possible The provision for deficit financing in the second plan was relatively large, and even after allowing for this there remained a residual gap

Finally, it was stressed that any plan covering a five-year period must be regarded as essentially flexible The draft plan therefore had to be regarded as a framework within which more concrete and detailed plans for each year would have to be worked out and implemented.

Finance for the Plan.

Industry, mining, and railway development would account for nearly one-half of the total expenditure in the second plan, as compared with about one-third in the First Five-Year Plan. The allocations between the various sectors were shown as follows, compared with the allocations in the first plan:

	First Plan		Second Plan	
	Total Provision	Per Cent	Total Provision	Per Cent
	(million rupees)			
Agriculture and community development	3,570	15	5,680	12
Irrigation and flood control	4,010	17	4,860	10
Power	2,600	11	4,270	9
Industries and minerals	1,790	8	8,900	19
Transport and communications	5,570	24	13,850	29
Social services, housing and rehabilitation	5,330	23	9,450	20
Miscellaneous	690	3	990	2
Total	23,560	100	48,000	100

Of the total developmental outlay of Rs 48,000,000,000 in the public sector, Rs.10,000,000,000 represented current expenditure of a developmental nature and Rs 38,000,000,000 represented investment —i e. outlay on the building-up of productive assets. Investment in the private sector for the period of the second plan was envisaged at roughly Rs.24,000,000,000, of which about Rs.5,750,000,000 was expected to be in organized industries and mining; the information available in regard to plantations, private transport, and electricity undertakings did not permit anything more than a guess, but an allowance of Rs.1,250,000,000 had been made for investment in these spheres. Investment in agriculture and in village and small industries was largely non-monetary in character and had been excluded from present estimates; monetary investment in this sector was roughly estimated at Rs 2,000,000,000. Construction (houses, shops, schools, hospitals etc.), might account for as much as Rs.10,000,000,000 of investment over the five-year period.

Taking the public and private sectors together, investment in the economy over the second plan period worked out at Rs.62,000,000,000. If, as was expected, national income over the next five years increased by about 25 per cent, this programme would mean raising the rate of investment in the economy from the present level of about 7 per cent of national income to about 10 per cent by the end of the second plan, assuming that some Rs.11,000,000,000 became available from external sources.

The following "tentative estimate" of the financial resources planned to meet the public expenditure of Rs.48,000,000,000 was given :—

	(millions of rupees)	
Surplus from current revenues		8,000
(a) at existing rates of taxation	3,500	
(b) additional taxation	4,500	
Borrowings from the public		12,000
(a) market loans	7,000	
(b) small savings	5,000	
Other budgetary sources		4,000
(a) Railways' contribution to the development programme	1,500	
(b) Provident funds and other deposit sources	2,500	
External assistance		8,000
Deficit financing		12,000
Uncovered gap		4,000

It was pointed out that it was not possible at present to indicate how the uncovered amount of Rs.4,000,000,000 was to be raised, though it would have to come from domestic sources

State Plans.

The proposed outlay by the States during the period of the Second Five-Year Plan was given as Rs 22,409,000,000, divided as follows (in millions of rupees) :—

Andhra	1,190	Hyderabad	1,002	Ajmer	79
Assam	579	Madhya Bharat	673	Bhopal	143
Bihar	1,942	Mysore	806	Coorg	38
Bombay	2,662	Pepsu	363	Delhi	170
Madhya Pradesh	1,237	Rajasthan	974	Himachal Pradesh	147
Madras	1,731	Saurashtra	477	Kutch	79
Orissa	1,000	Travancore-Cochin	720	Manipur	62
Punjab	1,263	Jammu and Kashmir	339	Tripura	85
Uttar Pradesh	2,531			Vindhya Pradesh	249
West Bengal	1,537				
Totals	15,672		5,354		1,052

The total of Rs 22,409,000,000 was made up by Rs.59,000,000 for the Andaman and Nicobar Islands; Rs.95,000,000 for the North-East Frontier Agency; Rs.48,000,000 for Pondicherry, Rs. 122,000,000 for the Central Government's share of the Damodar Valley Corporation; and Rs.7,000,000 for National Extension Service and Community Projects.

Production and Development Targets.

Some of the principal production and development targets are shown in the following table, compared with 1950-51 (before the first plan) and 1955-56 (at the end of the first plan) :

	1950-51	1955-56	1960-61	Percentage increase in 1960-61 over 1955-56
Agriculture.				
Food grains (million tons)	54.0*	65.0	75.0	15
Cotton (million bales)	2.9	4.2	5.5	31
Sugar cane—raw (million tons)	5.6	5.8	7.1	22
Oilseeds (million tons)	5.1	5.5	7.0	27
Jute (million bales)	3 3	4.0	5.0	25
Irrigation and Power.				
Area irrigated (million acres)	51	67	88	31
Electricity, installed capacity (million kw.)	2.3	3 4	6.9	103
Minerals.				
Iron ore (million tons)	3.0	4.3†	12 5	191
Coal (million tons)	32.3‡	38 0‡	60 0‡	58
Large-scale Industries.				
Finished steel (million tons)	1.1	1.3	4.3	231
Pig iron—for sale to foundries (million tons)	—	0.38	0.75	97
Aluminium ('000 tons)	3.7	7.5	25.0	233

*Relates to the year 1949-50. †Relates to the calendar year 1954. ‡Figures relate to calendar years. §In terms of ammonia sulphate.

Special Aspects of the Plan.

Employment. During the Second Five-Year Plan the authorities would be faced with a threefold task with regard to employment: (1) the existing unemployed in both urban and rural areas, (2) the increase in the labour force, estimated at about 2,000,000 people a year, (3) the under-employed in rural occupations and those engaged in household occupations in urban areas. The number of jobs which would have to be created in order to eradicate unemployment completely during the second plan period (quite apart from the additional jobs which would have to be created for those who were under-employed) was estimated at 15,300,000—viz., 5,300,000 representing the backlog of unemployed (2,800,000 in rural and 2,500,000 in urban areas) and 10,000,000 new entrants to the labour force (6,200,000 in rural and 3,800,000 in urban areas)

Agriculture. *Crops* During the period of the first plan the total cropped area had increased from 326,000,000 acres to 352,000,000 acres in 1954-55. The area under food crops had risen from 257,000,000 to 272,000,000 acres, and that under commercial crops from 49,000,000 to about 60,000,000 acres, but the area under other crops (20,000,000 acres) had shown little change As a result of achievements during the first plan, it was no longer necessary to place a dominant emphasis on the production of cereal crops. Aspects of land utilization which had been neglected in the past—e.g. horticulture, cultivation of fodder crops to support livestock development and dairy farming, and village plantations for the supply of fuel—should receive sustained attention. At the end of the second plan the consumption level for food grains was expected to increase from the present level of 17.2 oz. per adult to 18.3 oz.

The additional area under irrigation during the second plan would be about 21,000,000 acres (compared with 17,000,000 acres under the first plan), and the consumption of nitrogeneous fertilizers was expected to be trebled As regards particular crops, emphasis would be placed on intensive sugar-cane development schemes in non-sugar-

factory areas ; an increase in the production of long-staple varieties of cotton ; and an improvement in the quality of jute Rubber, tea, and coffee problems were being examined by the Plantation Enquiry Commission One of the more important aims in the agricultural sector was an increase in the production of fruit and vegetables.

Livestock In providing for an outlay of over Rs. 400,000,000 for animal husbandry and Rs.220,000,000 for dairying, it was hoped that greater progress would be made in these branches of agriculture during the Second Five-Year Plan Despite a cattle population of over 155,000,000, and 43,000,000 buffaloes, the net value of livestock products in 1950-51 amounted to only Rs 6,640,000,000, or about 16 per cent of agricultural income. The available supplies of cattle-feed fell considerably short of requirements and, in relation to supplies available, about one-third of the cattle population could be regarded as being surplus. This surplus was likely to increase as the effects of epidemics and famines were brought under control, and as a result of action taken in recent years to place a total ban on the slaughter of cattle After comparing the low Indian milk yields with those obtaining in other countries, and pointing to the fact that *per capita* milk consumption in India was only about half that recommended as a suitable minimum for balanced nutrition, the draft plan called for the doubling of milk production over the next 10-15 years

With regard to the development of poultry and of sheep and wool, Rs 30,000,000 and Rs 15,000,000 respectively had been provided. It had been estimated that the average egg-laying capacity of a hen in India (about 50 eggs a year) could be increased by 50 per cent over the next five years through improvement of the indigenous stock and control of disease

Forestry. As forests covered about 22 per cent of the total area of India, as against the 33 per cent recommended in the Government's resolution on forest policy, sustained efforts would have to be made in the sphere of afforestation Some Rs 270,000,000 had been provided for this purpose in the second plan, which envisaged 600,000 acres of afforestation, 300,000 acres of new plantations, and the improvement of 50,000 acres of pasture lands.

Soil Conservation. Rs.200,000,000 had been allocated for this purpose, and a comprehensive programme drawn up envisaging soil conservation measures over a total area of 3,000,000 acres

Irrigation and Power. At the beginning of the first plan the total area under irrigation from all sources was 51,500,000 acres. of which 17,900,000 acres were irrigated by Government canals, 2,800,000 acres by private canals, 14,700,000 acres by wells, 8,800,000 acres by tanks, and 7,300,000 acres from other sources. By the end of the first plan 7,000,000 acres would have been brought under irrigation by large and medium-sized projects, whilst during the second plan the additional area was expected to be 21,000,000 acres ; of the latter, 12,000,000 acres would benefit from projects undertaken during the first plan, and 9,000,000 acres from new projects included in the second plan. There would be 188 new irrigation projects under the second plan, mostly of medium or small size.

The total installed capacity of power generating plants at the beginning of the first plan amounted to only 2,300,000 kw., about half of which was held by electricity supply companies, the remainder being divided between the public sector (i e. the Central and State Governments) and industrial establishments generating their own power. During the first plan installed capacity had risen to 3,400,000 kw., of which the " public sector " share was 1,400,000 kw., in addition, work on power plants with an aggregate capacity of about 200,000 kw. had almost been completed, and these would be commissioned before the end of 1956 During the period of the first plan *per capita* consumption of electricity had risen from 14 to 25 units, and the transmission network had been more than doubled

It was estimated that over the next ten years installed capacity would need to be expanded by 20 per cent annually, which meant that the target for 1956 should be about 15,000,000 kw., it was against this background that the programme of raising installed capacity to 6,800,000 kw. by the end of the second plan had to be considered. Of the planned increase of 3,500,000 kw. between 1955-56 and 1960-61, 2,900,000 kw (including 2,100,000 kw. of hydro-electric power) would be from the public sector, 300,000 kw from electricity supply companies, and 300,000 kw. from industrial establishments generating their own power and from the lignite project In all, 44 new and extension schemes would be undertaken during the second plan, of which 25 would be hydro-electric and 19 steam-power stations *Per capita* consumption of electricity during the next five years was expected to increase from 25 to 50 units

By the end of the first plan about 95 per cent of towns with a population above 20,000 had been electrified ; the aim in the second plan was to provide electricity supplies for small towns of a population of 5,000-20,000 which were centres for the development of the adjoining rural areas In this group there were about 4,000 small towns, of which only about 40 per cent had been electrified so far ; during the second plan 80-90 per cent of these towns were expected to be provided with electricity. The large-scale electrification of villages with a population of less than 5,000 was a difficult problem, as there were over 500,000 such villages scattered all over India

Industries. A considerable proportion of the increase in industrial production under the first plan had been obtained through fuller utilization of existing capacity—e g in textiles, sugar and vegetable oil—which had been made possible mainly by the increased supply of raw materials. In some industries—for example cement, paper, soda ash, caustic soda, rayon, and bicycles—the increase in production had been accounted for both by more intensive utilization of the available capacity and by additions to production capacity In other industries—such as some of the light engineering industries—lack of domestic demand had held back production as compared with the targets. The draft referred to various industrial projects which had been completed during the first plan (see 14103 A), but said that projects relating to the iron and steel industry and to the manufacture of heavy electrical plant had taken much longer than anticipated when the plan had been drawn up

Deficiencies in the industrial sector and in the organization for achieving rapid industrial progress, which had been revealed by the experience of the first plan, would be corrected to a considerable extent under the industrial development programmes proposed for the second plan. The most important single weakness was the low level of steel production, but this was being made good by the programme for the expansion of steel production through the establishment of three new plants in the public sector and the expansion of productive capacity in the existing units (see 14792 A).

Expansion of industrial capacity during the second plan was conceived in terms of the following priorities . (1) development of iron and steel production, machine-building, heavy engineering, and heavy chemicals, including nitrogenous fertilizers , (2) expansion of capacity in respect of other developmental commodities and producer goods, e.g. cement and phosphatic fertilizers , (3) modernization and re-equipment of national industries already in existence, e.g. jute, cotton, and sugar ; (4) fuller utilization of installed capacity in existing industries wherever there were wide gaps between capacity and production ; (5) expansion of capacity for consumer goods.

The level of iron and steel production was a major factor in determining the rate of progress for the economy as a whole, and conditions in India were especially favourable for producing iron and steel at relatively low cost. Heavy engineering and machine industries were a natural corollary of iron and steel, and provided the base for large-scale industrialization It was intended that during the Third Five-Year Plan India should be able to build the essential requirements of steel plants comprising coke-ovens, blast furnaces and steel smelting shops, and machinery for power generating stations, in addition to manufacturing in her own workshops the bulk of the machinery and capital equipment needed in different industries. The establishment of a heavy machine-building industry called for action at several points ; in addition to the expansion of steel and aluminium production (which had already been taken in hand), this would include the manufacture of ferrous and non-ferrous alloys, tool steel and stainless steel, and specialized rolling facilities An integrated development programme would also have to provide for the establishment of foundries, forge and structural shops, gear-cutting shops, and the production of a wide range of machine-tools.

As regards projects in the public sector during the second five-year period, the plan referred to the construction of the three steel plants at Rourkela, Bhilai and Durgapur (see 14792 A). The programme for the establishment of heavy engineering industries included a heavy steel foundry at the Chittaranjan locomotive factory (see 14103 A), whilst for the manufacture of heavy electrical equipment a consultants' agreement had been reached with a leading British firm, whose report was to be prepared before the end of 1956 , the total investment on this project, which was expected to take seven or eight years to complete, might be of the order of Rs.250,000,000. Other projects would include the expansion of the Government's radio equipment factory at Bangalore ; of the Chittaranjan locomotive factory to increase its annual output to 300 locomotives ; of the Hindustan Shipyard ; and of the rate of construction at Visakhapatnam, where, besides the construction of a dry dock, preparatory steps for the establishment of a second shipyard were to be taken

In view of the paucity of coal deposits in southern India, high priority had been given to the multi-purpose lignite project at Neiveli, in the South Arcot area Under this project 3,500,000 tons of lignite were to be produced per annum and used for (*a*) the generation of power in a station of 211,000 kw. capacity, (*b*) the production of carbonized briquettes in a carbonization plant of about 714,000 tons annual capacity, and (*c*) the production of 70,000 tons of fixed nitrogen in the form of sulphate nitrate. Besides the fertilizer factory to be established in South Arcot, it was also proposed to set up two more fertilizer factories ; one of these, at Nangal, would produce nitro-limestone corresponding to 70,000 tons of fixed nitrogen per annum and would also produce heavy water as a by-product, whilst the other, probably at Rourkela, would produce nitro-limestone equivalent to 80,000 tons of fixed nitrogen per annum.

Minerals. The programme of industrial development in the First Five-Year Plan had called for a relatively small increase in the volume of coal production, the main problem having been the transport of coal from pitheads to consuming centres Coal production had increased from 34,300,000 tons in 1951 to 38,000,000 tons in 1955, but the transport deficiencies had never been wholly eliminated. The bulk of coal production was in the private sector, the public sector accounting for only 4,500,000 tons. On the basis of the targets proposed in the Second Five-Year Plan for industries, thermal power generation, and the railways, the demand for coal at the end of the plan was estimated at about 60,000,000 tons, representing an increase of about 22,000,000 tons over the level of production in 1955. It was proposed that about 12,000,000 tons of this amount should be produced in the public sector and about 10,000,000 tons in the private sector—though the exact distribution between the two sectors was still under consideration

As regards other minerals, the plan gave the following production targets for 1960-61 as compared with actual production in 1954, where available : iron ore, 12,500,000 tons (4,310,000 tons) ; manganese ore, 2,000,000 tons (1,410,000 tons) ; limestone, 23,300,000

tons, gypsum, 1,970,000 tons (610,000 tons); bauxite, 175,000 tons (75,000 tons). Of these totals, it was proposed to export by 1960-61 2,000,000 tons of iron ore and 1,500,000 tons of manganese ore. The exploration and development of India's oil resources was stated to be one of the important tasks of the Second Five-Year Plan.

Village and Small Industries. The plan provided Rs 2,000,000,000 for village and small-scale industries, the principal amounts within this total being Rs.595,000,000 for handloom cotton-weaving Rs.550,000,000 for small-scale industries; and Rs.555,000,000 for village industries and *khadi*- and wool-spinning and weaving.

On the general question of expanding village and small-scale industries at the expense of large-scale industry, it was stated that the balance of public advantage would determine in any individual case whether and at what level the capacity of large-scale industry should be limited, it would therefore be necessary to review the situation from time to time, and the licensing of industries should be extended to the field of agricultural processing, especially for rice mills, oil mills, flour mills, etc.

Co-operatives in village and small industries would have to be developed to the greatest extent possible, but on the whole the progress achieved so far had been slow. As regards industrial estates, a number of schemes had been included in the plans of the State Governments. The draft noted that the experience of industrial estates in Britain had been encouraging, especially since the war, but said that successful Indian experience did not yet exist to any great extent. Financial provision existed in the plan, but since the outlay involved was likely to be considerable, it was necessary that the programme should be placed on a sound basis from the start

Transport and Communications. Of the total expenditure of Rs. 13,850,000,000 provided under this heading, Rs.9,000,000,000 was for the railways, Rs 2,630,000,000 for roads, road transport, and tourism, Rs.960,000,000 for shipping, ports and harbours, lighthouses, and inland water transport, Rs 430,000,000 for civil air transport, and Rs.760,000,000 for communications and broadcasting.

Railways. The principal task for the railways in the second plan was to meet the increasing demands for both goods and passenger traffic, goods traffic was expected to increase by about 50 per cent (from 120,000,000 tons at the end of the first plan to about 181,000,000 tons in 1960-61) and passenger train services by 15 per cent. The second important task was to construct new lines, and the programme provided mainly for lines required in connexion with major industrial projects like steel plants, coal mines etc. In all, about 842 miles would be constructed during the plan period, and if additional funds became available later it might be possible to extend this programme by building more lines for opening up backward areas.

During the second plan, 2,258 locomotives, 107,247 wagons, and 11,364 coaches would be obtained, of which 1,352 locomotives, 23,852 wagons and 6,447 coaches would be for the purpose of rehabilitating over-aged stock. There would also be a large-scale renewal of obsolescent track The number of railway personnel was expected to rise from about 1,050,000 at the end of the first plan to over 1,200,000 at the end of the second

Roads. At the beginning of the first plan India had 97,000 miles of metalled roads and about 147,000 miles of unmetalled roads, whilst about 10,000 miles of new surfaced roads and about 20,000 miles of low-type roads were expected to be added during the first plan. Substantially larger resources had been provided for the road programme in the Second Five-Year Plan: in the national highways programme works begun during the first plan would be completed, and in addition work would be undertaken on 600 miles of "missing links" and 60 major bridges, the improvement of 1,700 miles of existing roads, and the widening of 3,000 miles of carriageway.

In 1955-56 almost all road goods transport and about three-quarters of road passenger transport were in private hands. The Planning Commission recommended that goods transport services should not be nationalized during the Second Five-Year Plan, and that where the State Governments did not propose themselves to operate passenger services, permits should be granted to private operators on more liberal terms than hitherto

Ports and Harbours. At the time of partition India had five major ports with a total capacity for handling 20,000,000 tons of cargo per annum During the first plan the construction of a sixth major port at Kandla had been completed (see 14209 D) and the total capacity had been raised to 25,000,000 tons. During the second plan the capacity of major ports would be increased by about 30 per cent.

Shipping. Since 1950 coastal trade had been reserved for Indian tonnage, but the shipping available was not sufficient to carry the traffic At the beginning of the first plan India had a tonnage of 390,707 G.R.T., and the target of 600,000 G.R T. laid down for the first plan was likely to be achieved. In the second plan, after allowing for the obsolescence of 90,000 G R T, the total tonnage was expected to reach about 900,000 G.R.T.

Inland Water Transport. Although the contribution of water transport to India's transport system had been steadily declining since the middle of the 19th century, it still continued to play a significant part in the north-eastern regions of the country. It was estimated that about 5,000 miles of river routes in India could be made navigable by modern power craft; 1,557 miles of rivers were navigable by mechanically propelled vessels; and 3,587 miles of river stretches were navigable by large boats and had the possibility of power development. A number of experimental projects had been undertaken during the first plan, mainly with regard to specially designed craft; during the second plan development works in the Ganga-Brahmaputra region would be carried out.

Civil Air Transport. A large number of civil aviation works had been undertaken during the first plan, including the construction of nine new aerodromes and considerable improvements at many existing ones. During the second plan eight new aerodromes would be constructed and telecommunications and other equipment provided at several aerodromes.

Communications. During the first plan the number of post offices had increased from 36,000 to 55,000, telephone connexions from 168,000 to 260,000, and public call-offices from 338 to 1,218 These and other communication programmes were to be further expanded during the Second Five-Year Plan the number of post offices was expected to increase to 75,000 and the number of telephone connexions to about 450,000

Broadcasting The broadcasting network of All-India Radio included 26 radio stations, and the expansion which had taken place during the first plan ensured that each language had been provided with at least one transmitting station, and that fairly effective coverage was available to almost all the regions The aim during the second plan was to extend the services now available for all the languages to as wide an area as it was at present possible to reach To meet the growing demands of national programmes, and to ensure nation-wide reception of national broadcasts, a 100-kw. short-wave transmitter, as well as a 100-kw medium-wave transmitter, would be set up at Delhi, and 50-kw. short-wave transmitters would be provided at Calcutta, Bombay, and Madras External services would also be expanded To promote rural listening, community receivers would be located in villages with a population of 1,000 and over; about 72,000 sets of this type were expected to be installed during the period of the second plan

Social Services. The distribution of the Rs.9 450,000,000 provided for social services was proposed as follows: education, Rs. 3,070,000,000, health, including urban water supply, Rs. 2,740,000,000, housing, Rs. 1,200,000,000; labour, Rs. 290,000,000; welfare of backward classes, Rs. 900,000,000, social welfare, Rs 290,000,000; rehabilitation, Rs 900,000,000; social schemes relating to the relief of unemployment, Rs. 50,000,000

Education. If the programmes which had been worked out were implemented, it was expected that at the end of the second plan education would be available for 63 per cent of children in the age-group 6-11 years, and for 23 per cent in the group 11-14 years, the number of pupils would increase by 7,600,000 at the primary stage and by 1,300,000 at the middle stage, requiring the establishment of 53,000 new primary schools and 3,500 middle schools. The proportion of trained teachers in primary schools (59 per cent in 1950-51) was estimated to be about 64 per cent by the end of the first plan and was expected to increase to about 79 per cent in the second plan Despite limitations of resources, every effort would be made to implement in the course of the next ten years the directive of the Constitution relating to free and compulsory education up to the age of 14

As regards secondary education, the numbers at schools in the age-group 14-17 years would increase from 2,300,000 to 3,000,000 during the next plan, or about 10 per cent of the population in that age-group. At the end of the first plan about 56 per cent of the staff in secondary schools consisted of trained teachers, and it was planned to increase this proportion to 68 per cent. The number of university and college students had risen from 420,000 at the beginning of the first plan to 720,000 at the end, though the number qualifying in degree and higher examinations in arts, commerce, and science had risen only from 41,000 to 58,000. A number of measures were being taken to improve the quality of university and college education and reduce wastage

Considerable importance was attached to the programme of social education which was now being implemented mainly through the community development and national extension programme, and through the work of non-official agencies. The 1951 census had shown that only 16 6 per cent of the population were literate. Apart from the low percentage of literacy, there was a serious disparity in literacy between men (24 9 per cent) and women (7 9 per cent) and between the urban population (34.6 per cent) and the rural population (12 1 per cent).

Health. The emphasis during the second plan would be on (*a*) the control of communicable diseases which affected large sections of the community; (*b*) the improvement of environmental hygiene, (*c*) the provision of adequate institutional facilities to serve as a base for organizing health services, (*d*) the provision of facilities for the training of medical and health personnel, and (*e*) family planning. The draft stated that the key to the extension of health services and their efficient operation was the availability of trained personnel of all kinds. On the basis of one doctor, one nurse, and one midwife for every 5,000 people, and one health visitor and one sanitary inspector for every 20,000 people, there was a shortage of 90,000 doctors, 80,000 nurses, 80,000 midwives, 20,000 health visitors, and 20,000 health assistants and sanitary inspectors. "Accelerated and sustained action" in the training of personnel was needed if even elementary services were to reach the mass of the people in any adequate degree.

With regard to the control of communicable diseases, it was stated that during the first plan an effective start had been made in combating such diseases as malaria, filiariasis, tuberculosis, leprosy and venereal diseases; as compared with Rs. 220,000,000 allotted in the first plan for the control of such diseases, the second plan provided about Rs 580,000,000.

On family planning it was stated that the programme which had been started during the first plan would be continued on a substantially increased scale; nearly Rs 50,000,000 had been provided and it was expected that 300 urban and 2,000 rural clinics would be set up during the next five years The programme would include (*a*) grants to State Governments, local authorities and voluntary organizations for opening family planning clinics, (*b*) the training of personnel, (*c*) public education on family planning and population problems, (*d*) research in human fertility and in the means of regulating it; and (*e*) demographic research, including the study of inter-relationships between social, economic and population changes, reproductive patterns, motivations affecting the size of the family, and suitable procedures for the rapid education of the people

Housing. Both in rural and in urban areas housing was "a problem of vast dimensions." Of 54,000,000 houses in rural areas, a large number needed reconditioning or rebuilding, in the villages, relief and assistance in the provision of sites was especially urgent in the case of Scheduled Castes and other backward classes. In urban areas the housing problem had grown from year to year over the past two decades. For an urban population of 62,000,000 there were in 1951 about 10,000,000 houses, and the shortage in that year was roughly estimated at 2,500,000

During the period of the first plan some 1,300,000 urban houses had been built, including about 600,000 built by private enterprise. For the decade 1951-61 the number of houses required in urban areas was estimated to be about 8,900,000, taking into account the shortage estimated for 1951, an estimated 33 per cent increase in population, depreciation of existing houses at the rate of 1 per cent per annum, and replacement of 11 per cent of existing houses. During the Second Five-year Plan 1,900,000 dwelling units were expected to be built in urban areas, so that, as far as could be estimated at present, the shortage of houses in urban areas in 1961 might be about 5,300,000—about twice as great as in 1951

Of the provisional allocation of Rs. 1,200,000,000 for housing, Rs. 450,000,000 would be for subsidized industrial housing, Rs. 400,000,000 for low-income group housing, Rs. 200,000,000 for slum clearance, Rs. 100,000,000 for rural housing, Rs. 30,000,000 for middle-income group housing, and Rs. 20,000,000 for plantation housing

Labour Policy The present trade union legislation needed to be revised with the object of (*a*) restricting the number of outsiders in the trade unions, (*b*) giving unions statutory recognition under certain conditions, (*c*) protecting office-holders against victimization, and (*d*) improving the financial basis of the trade union movement from within its own resources.

For the successful implementation of the plan increased association of labour with management was essential, and it was therefore recommended that in each undertaking there should be a Council of Management, consisting of an equal number of representatives of management and workers.

Emphasis was being placed on the provision of industrial training facilities. The facilities of the existing training centres administered by the Ministry of Labour (which were now to be transferred to the States) would be increased from 10,000 to 20,000 people a year. Employment exchanges would also be placed under the administration of State Governments, with the Central Government exercising co-ordinating functions

Rehabilitation of Displaced Persons. At the end of the first plan nearly 2,300,000 displaced persons from West Pakistan had been settled on land and their rehabilitation had been assisted with loans and grants. In urban areas, 1,200,000 people had been accommodated in evacuee houses and another 1,000,000 in 200,000 newly constructed tenements. Loans had also been made, vocational training centres established, and grants and scholarships given to displaced students

There had been a continuous influx of displaced persons from East Pakistan into West Bengal and neighbouring States Out of 3,830,000 people who had so far migrated, about 388,000 families had been settled on land and in other ancillary occupations, about 350,000 residential units had been constructed in rural areas mainly by displaced persons with loans from the Government; about 22,000 displaced persons had been given vocational and technical training and 8,000 were at present under training; and business loans had been advanced to about 88,000 families.

Under the second plan a major portion of the Rs 855,000,000 provided for rehabilitation would be used for the rehabilitation of displaced persons from East Pakistan.

Prohibition The draft plan called upon the States to institute programmes designed to discourage the consumption of alcohol. These should include the discontinuance of advertisements and public inducements relating to drink, the stoppage of drinking on public premises and at public receptions, and the setting-up of technical committees to draw up phased programmes designed to curtail consumption

One member of the Planning Commission, Mr. K. C. Neogy, specially stressed that it would be difficult to implement the plan in five years, and expressed the view that excessive deficit financing might endanger the economy and cause hardship to certain sections of the population.

The National Development Council, meeting under the chairmanship of Mr. Nehru, concluded a two-day discussion of the draft plan on May 2 by passing a resolution recording its "general approval and acceptance of the objects, priorities and programmes embodied in the Second Five-Year Plan." The Council also decided to set up a Plan Economy and Efficiency Promotion Committee (abbreviated as the PEEP Committee) for the purpose of securing the maximum possible economy and avoiding wastage owing to delays and inefficiency. The Committee will consist of the Union Ministers for Home Affairs and Finance and the Deputy Chairman of the Planning Commission.

The House of the People, after a four-day debate, adopted on Sept. 13 a resolution moved by Mr. Nehru approving the principles, objectives, and development programmes of the Second Five-Year Plan. The Council of States had unanimously approved the Plan's objectives and priorities on Sept. 7. (The Statesman, Calcutta - The Hindu, Madras - Eastern Economist, New Delhi - Indian High Commissioner's Office, London) **(Prev. rep. First Five-Year Plan, 13234 C; 12851 A; Industrial Development, 14103 A; Steel Industry, 14792 A; Nationalization Policy, 14714 A.)**

A. BECHUANALAND. — Return of Seretse Khama. - Renunciation of Claim to Chieftainship.

The British Government's decision to permit Seretse Khama, the former chief-designate of the Bamangwato tribe, to return to Bechuanaland as a private citizen was simultaneously announced on Sept. 26 in London and at a *kgotla* (tribal gathering) at Serowe. It was stated that Seretse would return within a few weeks, and would later be joined by his white wife and their two children.

The Commonwealth Relations Office stated that the Earl of Home (Commonwealth Relations Secretary) had recently received Seretse and his uncle Tshekedi Khama, who was visiting England, at their own request, and that they had handed him "a document signed by both in which Seretse Khama formally renounced for himself and his children all claim to the chieftainship of the Bamangwato tribe, and Tshekedi Khama, who had previously renounced for himself and his children all clain to the chieftainship, reaffirmed his renunciation. Both expressed the hope that Seretse would be allowed to return to the Bamangwato as a private person, and that both he and Tshekedi would be permitted to take part in the political life of the tribe. Each undertook to co-operate fully with Rasebolai Kgamane, the African Authority appointed by the High Commissioner." In these circumstances the Government had decided that Seretse should be permitted to return; that he and Tshekedi should be free to take part in the affairs of the Bamangwato, and that a Tribal Council of an advisory nature should be established, with Rasebolai as chairman.

Seretse Khama had been living in England since 1950, when Mr. Attlee's Government decided not to recognize him as chief of the tribe, and forbade him to return to Bechuanaland for five years without permission. Mr. Churchill's Government subsequently decided in 1952 to exclude him permanently from the chieftainship, and not to allow him to return until another chief had been securely established. At *kgotlas* in 1952 and 1953, however, the tribe failed to reach agreement on the choice of a new chief, whereupon the High Commissioner appointed Rasebolai (the third in succession to the chieftainship after Seretse and Tshekedi) as African Authority. Under the new settlement the chieftainship was left vacant, and was expected to be allowed to fall into abeyance.

B. ITALY. — The Cassino Memorial.

A memorial commemorating 4,068 officers and men of the British and Commonwealth forces who fell in the Battle of Cassino and have no known grave was unveiled at Cassino on Sept. 30 by Field-Marshal Lord Alexander of Tunis, Supreme Allied Commander in Italy during the war. Situated in an amphitheatre of the hills overlooking Cassino, the memorial was built by the Imperial War Graves Commission on land given by the Italian Government.

The ceremony was attended by Field-Marshal Sir Claude Auchinleck, General Lord Freyberg, V.C., and other British and Commonwealth military, naval, and air leaders of World War II, as well as by representatives of the armed forces of Canada, India, South Africa, Poland (represented by General Anders), Brazil, and Greece, and by relatives of those who lost their lives at Cassino An Italian Army contingent was also present, the Italian Government being represented by Signor Campilli (Minister without portfolio), deputising for the Prime Minister, Signor Segni.

The memorial—designed by Mr. Louis de Soissons, with sculpture by Mr. James Woodford, R.A.—consists of a formal garden surrounded by 12 marble columns on which the names of the fallen are inscribed.—(Times - Giornale d'Italia, Rome)

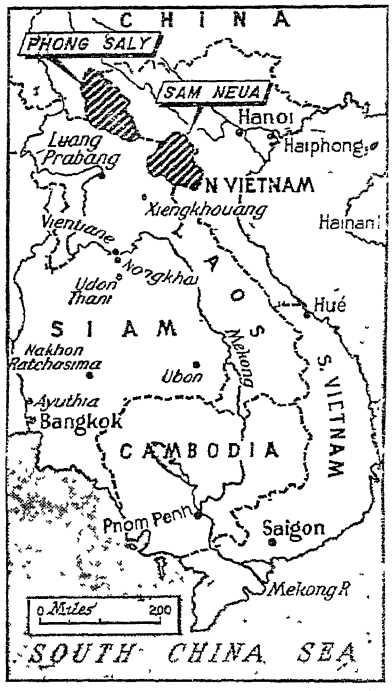
A. LAOS. — Political Developments, 1954-56. - Evacuation of French Union and Vietminh Troops. - Clashes between Royal and Pathet Lao Forces. - General Elections. - New Government. - Political Settlement between Government and Pathet Lao.

In accordance with the terms of the Geneva armistice agreement on Laos, all French Union and Vietminh troops in the country (except 5,000 French troops who were allowed to remain under the agreement) were evacuated by Nov. 19, 1954, whilst the *Pathet Lao* (" Free Laotian ") forces were withdrawn to the two northern provinces of Phong Saly and Sam Neua pending a political settlement The Franco-Laotian Land Forces Command had been officially dissolved on Nov. 1, 1954, following the progressive transfer of its powers to the Royal Laotian Army. The Joint Commission for the enforcement of the cease-fire agreement, on which the French, Royal Laotian, *Pathet Lao*, and Vietminh commands were represented, ceased to function on Feb 15, 1955, and was replaced by a liaison group of representatives of the Royal Laotian and *Pathet Lao* forces.



(*Economist*)

Differences between Royal Government and Pathet Lao Regime. - Abortive Negotiations. - Fighting in Sam Neua Province.

Negotiations for a settlement of the differences between the Royal Government and the *Pathet Lao* regime in northern Laos began in the autumn of 1954, but were not successfully concluded until August 1956, nearly two years later. Developments during this period are described below.

The conclusion of a political settlement was hindered by a fundamental difference of opinion between the Royal Laotian and *Pathet Lao* Governments on the interpretation of the Geneva Agreement, and of an agreement signed at Khang Khay by the two parties in the Joint Commission on Aug 29-30, 1954. The Geneva Agreement provided that there should be 12 provisional assembly areas, one for each province, for the reception of the *Pathet Lao* fighting units, whereas the Khang Khay Agreement had made no mention of assembly areas for the provinces of Phong Saly and Sam Neua. The *Pathet Lao* therefore claimed that they had been given administrative and military control of the whole of these provinces, which were already under their *de facto* control, as compensation for their agreement to withdraw from the other 10 provinces, and that all Royal troops should be withdrawn from them. The Royal Government, on the other hand, maintained that the *Pathet Lao* forces should restrict themselves to the regrouping zones in the two provinces with a connecting corridor, and that, as a sovereign authority, it had the right to move its troops anywhere in Laotian territory.

Negotiations for a political settlement had opened in September 1954, when the Prime Minister, Prince Souvanna Phouma, and the Defence Minister, M. Kou Voravong, met Prince Souphanou Vong, head of the *Pathet Lao* Government. They were delayed, however, by a Cabinet crisis precipitated by the murder of M. Kou Voravong at Vientiane on Sept. 18, during a reception at the house of the Vice-Premier, M. Sananikone. [The assailants, who had hidden in the garden, threw grenades and fired revolvers through a window before taking flight.] The crime was attributed to the " Nationalist Laotians," an anti-French terrorist organization unconnected with either *Pathet Lao* or the Vietminh.

M. Sananikone resigned in consequence on Sept. 21, the remainder of the Cabinet following his example on Oct. 19. After several unsuccessful attempts had been made to form a Government, M. Katay Sasorith (leader of the National Progressive Party, and a former Finance Minister) formed a coalition Ministry on Nov. 25 with the Independent Party, led by M. Sananikone, who became Foreign Minister in M. Sasorith's administration.

The *Pathet Lao* leaders had already announced on Nov. 4, 1954, their recognition of the authority of the Royal Government and their willingness to place the provinces of Phong Saly and Sam Neua under its administration. The opening of negotiations, however, was again delayed by a dispute over the meeting-place, and in consequence the situation deteriorated in these provinces, where a number of clashes between Royal and *Pathet Lao* troops took place between December, 1954 and March 1955. Discussions were eventually opened on Jan. 15 1955, and concluded on March 9, when both parties agreed to instruct their forces to cease all hostile acts against the other side

On April 8 the Royal Government informed the International Control Commission that political talks were being impeded because the *Pathet Lao* considered themselves as having conquered Phong Saly and Sam Neua. It accordingly suggested (i) that Royal administration should be re-established in these provinces, (ii) that the *Pathet Lao* units should be collected in assembly areas, and (iii) that, pending general elections, they should be represented in the administration of the two provinces. The *Pathet Lao* put forward counter-proposals for a Joint Political Council of three delegates from each side which would settle all disputes, including the problem of the administration of the two provinces, enforce the agreement reached on March 9, prepare for general elections, and form a national coalition Government in which the *Pathet Lao* would be represented.

Negotiations were re-opened on April 19, but a week later the Royal Government withdrew, claiming that no basis for agreement existed. The International Commission informed both parties on June 4 of its concern at the lack of progress towards a political settlement, and pointed out that the frequency and seriousness of incidents had increased in spite of the agreement concluded on March 9. In a second letter on June 15, the Commission commented that the Royal Government's right to administer Phong Saly and Sam Neua might be deduced from the Geneva Powers' recognition of the unity of Laos and of the Royal Government's sovereignty over the whole country, moreover, this right had been recognized by the *Pathet Lao* in November 1954 In view of prevailing conditions in those provinces, however, it would be difficult to establish the Royal administration there without a political settlement, and the Commission therefore suggested that talks should be resumed without delay. Discussions between military representatives of the two parties on means of preventing incidents subsequently opened on June 27

On July 7, however, fighting between the Royal and *Pathet Lao* forces broke out near Muong Peun (a post held by Royal troops about 20 miles S of the town of Sam Neua), and as a result the Royal Government broke off the military talks on July 9 The Government claimed that the *Pathet Lao* forces had begun the fighting, with the " open and direct complicity of the Vietminh " whereas *Pathet Lao* spokesmen asserted that several battalions of Royal troops had been sent to the Sam Neua area, had repeatedly attacked the *Pathet Lao* forces during June, and had been responsible for the latest fighting. Following an appeal for a cease-fire by the International Commission, the situation was reported on July 11 to have returned to normal Further clashes in the Muong Peun area nevertheless occurred during August, each side accusing the other of responsibility

Political and military talks were re-opened on Oct. 9 in Rangoon under the auspices of the International Commission, the Government delegation being led by M. Katay Sasorith and the *Pathet Lao* delegation by Prince Souphanou Vong. A new cease-fire was concluded on Oct. 11, and negotiations for the re-establishment of Royal administration in Phong Saly and Sam Neua and on arrangements for the general elections [see below] were subsequently held in Vientiane. The *Pathet Lao* delegation maintained that a political settlement should precede the integration of the two provinces, and that this should take place by stages, they also proposed that the voting-age should be reduced, that women should be allowed to vote, and that mixed control committees should be set up to supervise the elections All these proposals were rejected by the Royal Government, which insisted that it was constitutionally bound to hold elections during 1955, and that the electoral law could be changed only by the National Assembly. The Government accordingly informed the International Commission on Nov. 9 that it had been unable to reach agreement with the *Pathet Lao*, and would therefore proceed with the elections

General Elections.

The Laotian general elections had originally been scheduled for Aug. 28, 1955, but, owing to the then unresolved conflict between the Royal Government and the *Pathet Lao*, had been postponed by the National Assembly until December 25. The Laotian Government had informed the International Commission on June 7 that it would be impossible to organize elections in the provinces of Phong Saly and Sam Neua as long as the Royal administration had not been re-established in those areas, and on June 10 the National Assembly accordingly postponed the elections until December.

Voting took place on Dec. 25 in the ten provinces controlled by the Government and in those areas of Phong Saly and Sam Neua occupied by its troops; they passed off peacefully except for some sporadic fighting in the Muong Peun area. Government spokesmen claimed that about 80 per cent of the electorate had voted despite appeals by the *Pathet Lao* for a boycott of the elections. Of the 39 seats in the Assembly, 21 were won by the National Progressive Party, eight by the Independent Party, three by the Democrats, two by the National Union Party, and five by non-party candidates

The new Assembly met on Feb. 13, 1956, and M. Sasorith's Government resigned on the following day. After both M Sasorith and Prince Souvanna Phouma (also a member of the Progressive Party) had failed to secure the two-thirds majority required by the Constitution for investiture as Prime Minister, the latter succeeded in forming a Government on March 21, 1956.

Settlement between Royal Government and Pathet Lao.

The *Pathet Lao* leader, Prince Souphanou Vong, arrived in Vientiane on Aug. 1 for talks with the new Prime Minister (who is his half-brother), and on Aug. 5 a new agreement was concluded between the two parties. Its terms were as follows:

(1) The Royal Government and *Pathet Lao* would end all hostile acts against each other

(2) The Government would respect the rights and democratic liberties of all citizens without discrimination, and permit the *Pathet Lao's* political organizations to conduct their activities legally

(3) The provinces of Phong Saly and Sam Neua would be brought under Royal administration.

(4) The *Pathet Lao* forces would be integrated in the Royal Army. Pending their integration, the troops of both sides would retain their present positions and would not increase their strength in men or armaments.

(5) Two mixed commissions, civil and military, would work out detailed arrangements for the transfer of Phong Saly and Sam Neua to governmental control and the integration of the *Pathet Lao* in the Army and civilian life.

(6) Elections would be held throughout the country, on the basis of adult suffrage and secret ballot, to increase the number of deputies from 39 to 60.

(7) A Government of National Union would be formed in which the *Pathet Lao* would be represented.

(8) In foreign affairs the Laotian Government would pursue a policy of peace and neutrality, adhere to the "five principles of peaceful co-existence," and maintain good relations with all countries Moreover, Laos would not join any military alliance, nor authorize any military bases on Laotian territory except those provided for in the Geneva Agreements.

Following the conclusion of this agreement, Prince Souvanna Phouma paid a visit to Peking, where he and the Chinese Prime Minister, Mr. Chou En-lai, signed an agreement on Aug. 23 whereby Laos reaffirmed her policy of neutrality and China and Laos undertook to observe the "five principles of peaceful co-existence," to develop good-neighbourly relations, and to develop economic and cultural relations. During his return journey Prince Souvanna Phouma visited Hanoi, the capital of North Vietnam, where he signed a similar agreement on August 30 with President Ho Chi-minh.

A. SOVIET UNION. — Opening of Boarding Schools.

The first boarding schools in the Soviet Union, 285 in number, were opened on Sept. 1, the beginning of the new school year. The official *Pravda* said that they would be the precursors of a nation-wide system of boarding schools which would "become the basic form of common secondary and technical education for the rising generation." The Government's intention to create such schools had been announced by M. Khrushchev at the 20th congress of the Soviet Communist Party in February.

The boarding schools will accommodate some 70,000 children The scheme applies at present to children between the ages of seven and 17, but will ultimately be extended to cover those of kindergarten age. Many of these schools will be connected with specific industries—e.g. mining, railways, oil plants, and collective and State farms—in furtherance of the Government's aim of the "polytechnization" of education, as expounded by M. Khrushchev at the 20th party congress (see page 14747, second column) It was officially stated that the scheme would be voluntary in character and that children would not be sent to boarding schools without their parents' consent. Parents would be required to contribute to the support of children in boarding schools, except where there were many children in the family, or where the parents' wages were small.

Other educational reforms coming into operation on Sept. 1 included compulsory secondary education (up to 17 years) throughout the U.S.S.R. and the abolition of all fees, including university fees, in conformity with the resolutions adopted at the 20th party congress. At the same time new syllabuses were widely introduced in secondary schools providing for greater practical work in workshops, laboratories, etc., in accordance with the "polytechnization" policy, and for a corresponding reduction in the time devoted to arts subjects generally. (Times)

B. LIBERIA. — Development Concessions for Italy.

It was announced in Rome on Sept. 22, after talks between President Gronchi and President Tubman of Liberia, that the Liberian Government would grant Italy concessions for exploring and exploiting some of the natural resources of Liberia, and that negotiations would be speeded up for the concession to an Italian company of part of the free port of Monrovia. President Tubman (who was on a tour of Europe) had announced an "open door" policy for trade and investment in Liberia early in 1956. The United States has at present the biggest financial investments in the republic, but there are also important German, Swedish, Spanish, and Italian interests.—(Giornale d'Italia, Rome - Financial Times)

C. SUEZ CANAL. — Traffic in 1954 and 1955.

Figures published by the Suez Canal Company on June 15 showed that 14,666 ships, of an aggregate net tonnage of 115,750,358, passed through the Canal in 1955, compared with 13,215 ships aggregating 102,498,851 net tons in 1954. Merchandize passing through the Canal in 1955 totalled 107,558,000 tons, against 99,881,000 tons in 1954.

The following table shows the comparative position of the various countries using the Canal in 1955:

	No. of Transits	Tonnage		No. of Transits	Tonnage
Great Britain	4,358	32,789,874	Costa Rica*	83	283,117
Norway	1,835	15,594,949	Finland	51	266,692
Liberia*	1,096	14,030,172	Saudi Arabia	19	242 711
France	1,217	10,826,255	Egypt	101	197,537
Italy	1,376	9,220,224	Spain	50	129,833
Panama*	904	8,074,498	Yugoslavia	52	120,491
Netherlands	687	4,774,138	Pakistan	26	106,797
Sweden	483	3,822,236	Czechoslovakia	16	78,410
United States	380	3,134,238	Indonesia	14	62,709
Denmark	379	2,897,246	China	8	32,235
Germany (W.)	377	2,458,621	Switzerland	5	31,849
Greece	273	1,387,280	Lebanon	30	25,360
Japan	147	998,498	Morocco	3	25,317
Soviet Union	171	901,244	Burma	8	19,916
Portugal	101	757,818	Ethiopia	26	18,840
India	120	616,020	Bulgaria	4	17,458
Poland	102	607,455	Rumania	6	17,214
Honduras*	38	420,695	Philippines	3	15,576

Turkey	61	346,976	Other countries	18	24,704

* "Flags of convenience"—see table on page 15099

Northbound cargoes through the Canal in 1955 totalled 87,426,000 tons (against 74,551,000 tons in 1954), and southbound cargoes 20,082,000 tons (22,370,000 tons in 1954). The principal northbound traffic in 1955 consisted of petroleum products (66,893,000 tons), followed by metals and ores (5,300,000 tons), cereals (2,488,000 tons), oil seeds (1,803,000 tons), and textile material and fibres (1,744,000 tons). The main items of southbound traffic were: machinery and wrought metals (3,759,000 tons), cement (2,863,000 tons), and fertilizers (2,454,000 tons). (Annual Report of the Suez Canal Company for 1955) **(Prev. rep. 13006 A.)**

D. UNITED STATES. — Religious Affiliations.

Statistics published on Sept. 15 by the National Council of the Churches of Christ in the U.S.A. showed that 100,162,529 Americans (60.9 per cent of the population) were members of churches, temples, or synagogues in 1955—the highest figure ever recorded, and the first occasion on which the 100,000,000 mark had been passed. The figures, collated from information supplied by 258 religious bodies, showed that church membership had increased by 2.8 per cent in 1955 as compared with a 1.8 per cent increase in population. Membership of the six principal denominations was given as follows:

	1955	1954
Protestant	58,448.567	57,124,142
Roman Catholic	33,396,647	32,403,332
Jewish	5,500,000	5,500,000
Eastern Orthodox	2,386,945	2,024,219
Old Catholic and Polish National Catholic	367,370	367,918
Buddhist	63,000	63,000
Total	100,162,529	97,482,611

The 58,000,000 Protestants fell into nine general groupings, including Baptist, Methodist, Presbyterian, Lutheran, Episcopalian, Congregational, and Disciples of Christ. The largest Protestant grouping was the Baptist (18,793,097 persons in membership of 27 Baptist church bodies), followed by 11,784,060 Methodists in 22 church groups and 7,059,593 Lutherans in 19 church groups. The largest single Protestant denomination was the Methodist Church (9,292,046 members), followed by the National Baptist Convention (8,467,439), the Protestant Episcopal Church (2,757,944), and the Presbyterian Church (2,645,745). The Church of Christ, Scientist (Christian Scientists), which has many members in the U.S.A., was not included in the statistics because a regulation of that Church forbids the "numbering" of people.

It was pointed out (*a*) that the Protestant Churches usually counted only those who have attained full Church membership (mostly 13 years of age or older); (*b*) that the Roman Catholic Church counted all baptized persons, including infants; and (*c*) that members of the Jewish faith were defined as those in membership of Hebrew religious congregations.

The figure of 60.9 per cent of the population with formal religious affiliations compared with 57 per cent in 1950, 49 per cent in 1940, and 36 per cent in 1900.—(New York Times)

A. UNITED KINGDOM. — Teaching Profession. - New Burnham Scales. - The Teachers (Superannuation) Bill. - Protests by Teachers' Unions.

Increased salary scales for teachers in primary and secondary schools in England and Wales, costing some £31,000,000 a year and benefiting some 240,000 teachers, were proposed in recommendations of the Burnham Committee made public on April 30, 1956. The award was approved by the Ministry of Education on June 28 and came into force on Oct. 1.

Earlier Developments. At a meeting of the Burnham Committee (comprising representatives of teachers' organizations and education authorities) in November 1955, the local education authorities had put forward a tentative offer of a five per cent interim increase in salaries, together with a promise of a general review of salaries at a later date. These proposals were considered at a meeting of the teachers' panel of the Committee held on Dec. 20, and the panel later approached the local authorities' representatives to ask for an early opening of negotiations. The principal body represented on the teachers' panel, the National Union of Teachers (N.U.T.), had decided at its Easter conference at Scarborough in 1955 to press for the raising of the basic minimum scales (for men) of £450 rising by annual increments to £625, to £500 rising by increments to £1,050. This demand was endorsed by the Incorporated Association of Assistant Masters in Secondary Schools at its Worthing conference in January 1956.

The attitude of the Government towards the forthcoming Burnham Committee talks was set forth in the following statement issued by the Ministry of Education on Jan 5 :

" The Government would have been willing to approve the introduction of a reasonable interim increase of salaries from April 1, but they also agree that a thorough review of teachers' salaries is needed, and welcome the early start of negotiations for this purpose

" Even so, a new Burnham award would not normally come into operation for another 15 months, and the Minister has no power to make such an award retrospective But if, as a result of the early start of deliberations, a settlement is reached and agreed by all parties which can be introduced from a date earlier than April 1, 1957, the Government will sympathetically consider adopting such a date.

" It is, however, very important that this major review of teachers' salaries should be well and carefully done, and therefore if the Burnham Committee should return to the suggestion of an interim increase the Government would be prepared to consider it."

A meeting of the main Burnham Committee took place on Jan. 26, at which it was agreed that negotiations should begin at once with a view to arranging a salary increase to come into effect on or before Oct 1, 1956.

In a memorandum submitted to the Committee during March by the National Association of Head Teachers, suggesting an increase in the basic minimum for head teachers from £1,789 to at least £2,500, perturbation was expressed at the relative decline in head teachers' salaries. In spite of increased responsibilities as a result of the 1944 Education Act, differentials between the remuneration of head and class teachers had steadily decreased. Among other recommendations, the memorandum suggested the introduction of a fractional differential for head teachers which would reflect modifications in the basic Burnham awards.

Burnham Committee Recommendations. The following changes in the basic salary scales for men and women teachers were recommended by the Burnham Committee on April 30 ·

	Basic minimum	Annual increment	Basic maximum
Men	£	£	£
Existing rates .	450	18	725
Proposed rates . ..	475	25	900
Women			
Existing rates .	405	15	580
Proposed rates ..	430	20	720

Proposals were aso made for additional allowances for posts involving special responsibility, and for substantial increases in the salaries of head teachers. A " good honours graduate" headmaster of a large grammar school would have his maximum salary raised to £2,200.

The Burnham Technical Committee recommended in June increased salary scales for teachers in technical colleges and institutes, and in art colleges and schools in England and Wales, to bring them into line with the increases for primary and secondary teachers.

Teachers' Reactions to Burnham Recommendations. The recommendations of the main Burnham Committee provoked varied reactions from different teachers' associations. A special conference of members of the N.U.T. (which enjoys a majority representation on the teachers' panel of the Burnham Committee) passed on May 11 a resolution confirming their acceptance of the proposals. On the other hand, Mr. D. I. Davies, president of the National Association of Schoolmasters (N.A.S.), expressed great disappointment, observing that the " paltry increase of 10s. a week as the minimum will not prove the attraction necessary to recruit [teachers] to the profession, while at the maximum teachers will be, comparatively, £150 worse off than before the war."

Miss A. M. Pierotti, general secretary of the National Union of Women Teachers, expressed dissatisfaction that nothing had been done to reduce the difference between men's and women's salaries.

Mr. A. T. L. Rimmer, general secretary of the National Association of Head Teachers, said that the new scales recognized in some measure the necessary differential between the head teacher and the assistant teaching staff, but criticized the lack of provision for head teachers of primary schools and regretted the absence of an incremental scale by which the growing experience of the head teacher might be recognized.

New Salary Scales for Scottish Teachers. The Scottish Education Department announced on March 22, 1956, an interim increase of seven per cent in the basic part of the salary for teachers employed by education authorities. In addition, revised scales for certain honours graduates and for certain teachers in further education were published. These increases were made under the provisions of the Education (Scotland) Act, 1946.

Further increases, estimated to cost an additional £3,000,000 annually, were proposed in draft regulations issued by the Secretary of State for Scotland on Aug. 21. The effect of these increases (scheduled to come into force on Nov. 1, and to remain in operation until March 31, 1960) is seen in the following examples

	Old Rates		*New Rates*	
	Basic min	Basic max	Basic min	Basic max.
Graduate Teachers, Secondary Schools	£	£	£	£
1st and 2nd class honours .	663	1,134	675	1,200
3rd class honours .	610	984	625	1,085
Ordinary graduates . .	581	922	600	1,040
Primary School Teachers (non-graduate)				
Women with 4 years' training	486	712	500	810

The Teachers (Superannuation) Bill.

The Ministry of Education and the Scottish Education Department announced on Oct. 20, 1955, that proposals had been put to representatives of local education authorities and teachers' associations with reference to the introduction of a revised contributory pensions scheme for teachers. A similar Bill had been introduced in 1954, but had been withdrawn by the Government before its second reading after it had been subjected to strong criticism both by teachers' organizations and by M.P.s of all parties (see 13589 A).

The announcement of Oct. 20 stated · " Although, like the Bill which was dropped in 1954, the new scheme requires from teachers a contribution of six per cent instead of the present five per cent, it embodies two new features of great importance to them. The Government will accept liability to provide all (instead of only two-thirds) of the money needed for the new scheme to start without any deficiency, and secondly, the teachers are assured by the new Bill of a stable rate of contribution, even if deficiencies arise again in the future."

The proposals were immediately rejected by the N.U.T., while the N.A.S. issued a statement saying that the plan was " tantamount to a cut in salary " and that its members would continue to resist the raising of contributions.

Further details of the proposals became known when the new Bill was introduced in the House of Commons on Nov. 25, 1955. Among new benefits proposed were an increase in the lump sum payable to teachers on retirement, an increase (from 40 to 45 years) in the length of service which could be counted for pension purposes; more liberal provision for teachers whose health broke down at an early age; and a reduction in the period over which the average salary for pension purposes was calculated.

The Bill was given a second reading by the House of Commons on Dec. 6, 1955, by 299 votes to 249.

Sir David Eccles (Minister of Education) said that the new Bill was necessary to replace existing legislation on the subject, which was no longer workable. The actuarial deficit on teachers' pensions would amount to £290,000,000 for England and Wales and £34,000,000 for Scotland by March 1956, and the Bill would provide for the Exchequer to assume responsibility for this. After that time, the new rate of contribution would help to keep the fund solvent, while any deficit that might arise in the future would be met by local authorities with the aid of Exchequer grants.

Mr. Michael Stewart (Lab.), the principal Opposition spokesman, asserted that there was no real difference between the new Bill and that which had been dropped in 1954. **Miss Herbison** and other Labour Members believed that the Bill would have an adverse effect upon recruitment to the teaching profession, and called for its withdrawal.

After extensive opposition to the Bill had been expressed by members of the teaching profession (see below), Sir David Eccles tabled an amendment during the Committee stage to defer the Bill's entry into force from April 1 to Oct. 1, 1956. This, he pointed out, would mean that the increase in contributions would coincide with the salary increases recommended by the Burnham Committee, described above. The amendment was approved on Feb. 2 and the Bill was given its third reading on March 22 by 285 votes to 235. It was enacted on July 5 after passing through the House of Lords.

Teachers' Protests against Bill.

Strong opposition to the Teachers (Superannuation) Bill was expressed by all branches of the teaching profession, the N.U.T. resolving on Nov. 19, 1955, that its executive should "employ, if necessary, the full resources of the union to defeat the Bill."

Initially, the opposition to the Bill took the form of representations to M.P.s by teachers' organizations, and the publicizing of the teachers' point of view in the Press and elsewhere. After the Bill was introduced in Parliament, however, the opposition grew in intensity and the N.A.S., followed later by the N.U.T., inquired into the possibilities of imposing a ban on "extraneous duties" which were usually performed voluntarily by teachers, such as the collection of National Savings and duties in connexion with the school meals service. On Dec. 10, 1955, the N.U T. asked all its members to stop collecting school savings during the spring and summer terms of 1956 as a protest against the Bill. The N A S. supported this movement, and, as a result, teachers in membership of these two unions refused during the spring and summer terms to collect National Savings in schools. Other teaching associations, however—notably the Associations of Assistant Masters and Assistant Mistresses, the membership of which is largely drawn from grammar-school teachers—refused to take part in such action.

After the Teachers (Superannuation) Bill became law, the executive of the N.U.T. decided on July 7 to lift the ban on the collection of school savings, but issued a statement declaring that the increased pension contributions were "imposed on the profession in spite of the strong opposition of the union." The N.U.T. said that it considered the increase to be "a serious injustice to teachers," and declared that its case against it "remains unaltered by recent developments in salary negotiations and six months' postponement of the Bill's operation."

Sunderland Teachers' School Meals Dispute. - High Court Action.

Throughout the summer term some 200 N.A S. members employed by the Sunderland Education Committee refused to collect money for school meals, as a protest against the Bill. The local authority threatened all the teachers concerned with dismissal, but later decided to give notice to only five of them. Six N.A.S. members brought a test action against the local education authority, seeking a declaration that its decision to dismiss the teachers was *ultra vires* and in breach of its statutory duty under the 1944 Education Act, and that employers were not entitled to impose upon teachers duties in connexion with school meals other than actual supervision.

Mr. Justice Barry, giving judgment for the teachers on July 13, ruled that, under the provisions of the 1944 Education Act, the collection of money for school meals could only be a voluntary service by teachers, and that it was not within the statutory powers of the local education authority to dismiss teachers for refusing to undertake it.

The Sunderland branch of the N A.S. resolved on July 14 to continue the ban on the collection of school-meals money, after hearing a report by the six members involved in the High Court action. The ban was lifted, however, on July 20, and on Aug. 15 the local authority agreed to withdraw the dismissal notices issued to the teachers involved in the High Court action.—(Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. Teachers' Salaries, etc., 13589 A.)

A. UNITED STATES. — Presidential Election. - Labour Unions' Support for Democratic Nominees.

The executive committee of the unified American Federation of Labour and Congress of Industrial Organizations (AFL-CIO) decided on Aug. 28, by 17 votes to five, to recommend its 15,000,000 members to support the Democratic candidates (Mr. Stevenson and Senator Kefauver) in the forthcoming presidential election. The decision was confirmed by the general board of the AFL-CIO, consisting of the heads of 145 unions in membership of the organization, at a meeting in Chicago on Sept. 12. Mr. George Meany (president of the AFL-CIO) and Mr. Walter P. Reuther (president of the United Automobile Workers) were among those speaking in support of the resolution, which was adopted with only a few dissenting votes. At the executive committee's meeting on Aug. 28 Mr. Meany had pointed out that although the AFL-CIO supported the "Stevenson-Kefauver ticket", it was committed to a strictly non-partisan policy and would "not become part of any political party, attempt to dominate any party, nor permit any party to dominate us."—(New York Times - New York Herald Tribune)

(Prev. rep. AFL-CIO, 14595 A.)

B. LONDON. — New Lord Mayor.

Sir George James Cullum Welch (60), Alderman of Bridge Within, was elected Lord Mayor of London at Guildhall on Sept. 29 for the civic year 1956-57, in succession to Sir Cuthbert Ackroyd. The new Lord Mayor is a solicitor. (Times) **(14442 D.)**

C. GOLD COAST. — Independence in 1957.

The British Colonial Secretary (Mr. Lennox-Boyd) informed the Governor of the Gold Coast (Sir Charles Arden-Clarke), in a dispatch published on Sept. 18, that, subject to parliamentary approval, the Gold Coast would be granted independence within the British Commonwealth on March 6, 1957, under the name of Ghana.

In a dispatch of Aug. 23, Sir Charles Arden-Clarke informed Mr. Lennox-Boyd that Dr. Nkrumah (Prime Minister of the Gold Coast) had formally requested him to transmit to the Colonial Secretary his request that Mr. Lennox-Boyd, in accordance with his statement of May 11 (see 14890 A), would declare a firm date for the attainment of independence by the Gold Coast. A motion calling for "the independence of the Gold Coast as a sovereign and independent State within the Commonwealth under the name of Ghana" had been adopted by the Legislative Assembly on Aug 3, with the support of 72 of the 104 members (see 15072 A), and in the Governor's view this constituted the "reasonable majority" which Mr. Lennox-Boyd had stipulated as necessary before a date could be fixed for independence. [The 72 members supporting the motion consisted of 71 elected as Convention People's Party candidates and an Independent who had applied for the Government Whip immediately after election.]

In his reply, dated Sept 15, Mr. Lennox-Boyd stated that "H.M. Government will at the first available opportunity introduce into the U.K. Parliament a Bill to accord independence to the Gold Coast, and that, subject to parliamentary approval, "H M. Government intend that independence should come about on March 6, 1957." The U.N. Trusteeship Council, Mr Lennox-Boyd continued, had passed a resolution in July noting that the will of the majority of the inhabitants of British Togoland, as expressed in the recent plebiscite, was for union with an independent Gold Coast, and recommending that the trusteeship agreement should be terminated upon the attainment of independence by the Gold Coast. Provided that this resolution was endorsed by the U N. General Assembly, appropriate action would be taken to include the territory of British Togoland within the independent Gold Coast. The necessary steps would also be taken to give effect to the Legislative Assembly's desire that the name of the Gold Coast should be changed to Ghana. "It is the earnest hope of H M Government," Mr Lennox-Boyd concluded, "that at this turning-point in the history of the Gold Coast all sections of the community will be able to work together for the general good."

Dr Nkrumah's announcement to the Legislative Assembly of the date for independence, made on the same day (Sept. 18), was greeted with jubilation by Government supporters, who carried the Prime Minister from the building shoulder-high. Mr. Akoto, chairman of the National Liberation Movement (the leading Opposition party, which advocates a federal Constitution), stated on Sept. 19, however, that the Movement and its allies would pursue their demand for an agreed Constitution before the grant of independence; if this demand was not granted before March 6, 1957, they would from that date "consider the Gold Coast and Togoland as separate and sovereign States within the British Commonwealth."

Professor Busia (the Leader of the Opposition, who was in London at the time for consultations with the Colonial Secretary) urged that independence should be accompanied by effective constitutional safeguards. He appealed to Mr. Lennox-Boyd to visit the Gold Coast and "make an effort to bring the parties together to settle the constitutional dispute," declaring that this suggestion "offers the only hope . . . of securing for the Gold Coast a peaceful and happy independence and steady progress within the British Commonwealth."

Dr. Nkrumah said on Sept. 20 that the Assembly would have ample opportunity to debate the Constitution, which would be published as a White Paper, and that the Government would be willing to discuss details with the Opposition before the debate.—(Times - Daily Telegraph - Manchester Guardian)

D. UNITED KINGDOM - CANADA - UNITED STATES. — Opening of Transatlantic Telephone System.

The first transatlantic telephone system, permitting direct telephonic conversation between Britain, Canada, and the U.S.A., was simultaneously inaugurated on Sept. 25 in London, Ottawa, and New York. Begun in 1953, it was completed two months ahead of schedule by the joint efforts of the British Post Office, the American Telephone and Telegraph Company, and the Canadian Overseas Telecommunications Corporation.

The transatlantic telephone system—the longest submarine system of its kind in the world—is described in 13282 A. Prior to its inauguration, transatlantic telephone calls were made by radio-telephone and were thus subject to atmospheric interference.—(Times - Montreal Star - New York Times)

(Prev. rep. 13282 A.)

A. AVIATION. — 1956 Session of ICAO Assembly. - Report on Sovereignty in Outer Space. - World Air Traffic in 1955. - European Civil Aviation Conference.

The tenth session of the Assembly of the International Civil Aviation Organization (ICAO) was held in Caracas (Venezuela) from June 19 to July 19. The session was attended by representatives of 58 member-countries, as well as by a number of observers. A summary of the principal decisions taken is given below.

Sovereignty in Outer Space. A report was presented to the Assembly recommending the conclusion of an agreement on the use of outer space by nations of the world. It pointed out (1) that there was good reason to believe that "mechanical contrivances" would travel beyond the earth's atmosphere in the near future, (2) that none of the rules which furnished legal guidance to States on problems of sovereignty were applicable to outer space; (3) that the Chicago Convention on International Civil Aviation, which had been ratified or adhered to by all 67 countries in membership of ICAO, gave each of these nations complete and exclusive sovereignty over the airspace above its territory, but made no mention of whether this sovereignty extended beyond the boundaries of the atmosphere, (4) that there was at present no U.N. Specialized Agency responsible for working out agreements on sovereignty, rights, and privileges beyond the atmosphere; (5) that, as space craft would have to pass through the atmosphere before reaching outer space, the matter was necessarily of interest to the ICAO. The report added, however, that the subject though of considerable legal interest, could not be discussed by the Organization until it had been officially raised by a member-state.

Professor J. C. Cooper, of the Institute of International Air Law at McGill University (Montreal), and legal adviser to the International Air Transport Association, circulated a document to ICAO members suggesting that a convention on sovereignty in outer space should:

(1) Reaffirm the Chicago Convention giving the subjacent State full sovereignty in areas of the atmospheric space above it, up to heights where "aircraft," as now defined, could be operated; such areas being designated "territorial space."

(2) Extend the sovereignty of the subjacent State upwards to 300 miles above the Earth's surface, designating this second region as "contiguous space," and provide for right of transit through this zone for all non-military devices, ascending or descending.

(3) Accept the principle that all space above "contiguous space" should be free for the passage of all "mechanical contrivances"

These solutions, Professor Cooper believed, would aid the future peaceful use of rockets and space satellites, and provide reasonable security for the subjacent State. He recognized that the physical and scientific information needed to reach sound decisions might not yet be available, but thought the information collected by the International Geophysical Year programme [see 14349 A] would help greatly

Dr. Edward Warner, president of the ICAO Council, said that "the law of the outer regions beyond those accessible to aerodynamically-supported aircraft, not long since a subject of sheer fantasy, begins to claim serious thought from serious students, and to engender discussion of the possibility that a new convention may be needed to define its status." If such discussion was needed, he thought ICAO was the proper body through which to conduct it.

Air Navigation. The Assembly recognized that in certain regions and on certain routes the inadequacy of air navigation facilities and procedures to meet the needs of civil aircraft at present in use had resulted in serious deficiencies. Increased demands had been imposed on air navigation services by (*a*) the considerable variation in the stages reached in aeronautical developments in various countries; (*b*) the constant expansion of international air transport, entailing a continuous growth in the density and frequency of air traffic; and (*c*) the introduction of jet aircraft into commercial aviation For these reasons, the Assembly instructed the ICAO Council to set up a special panel of highly qualified experts in the field of air navigation to assess the trends and main developments in international civil aviation within the next 15 years.

Technical Problems. The Assembly attached special importance to the elaboration of ICAO's technical programme. In this connexion its recommendations included: (*a*) the formulation and implementation of recommended "standard practices" for world air traffic; (*b*) regional plans for aviation facilities and services; (*c*) maintenance of proficiency in the technical staff of the ICAO Secretariat, (*d*) the joint civil and military use of air space and air navigation facilities and services; and (*e*) assistance to member-States through regional offices and through the training activities of ICAO's Air Navigation Bureau.

Simplification of Air Travel. The Assembly underlined the importance of further action to facilitate air travel by the elimination of unnecessary formalities relating to passport control, public health regulations, and Customs inspection

Council. A new Council was elected for a three-year period ending in 1959, consisting of representatives of Argentina, Australia, Belgium, Brazil, Canada, Egypt, France, India, the Irish Republic, Italy, Japan, Lebanon, Mexico, Netherlands, Portugal, Spain, Sweden, South Africa, the U.K., the U.S.A., and Venezuela.

Budget. The Assembly approved a net Budget of Can $3,567,732 for the year 1957, compared with Can.$2,826,971 for 1956.

Other recent developments connected with ICAO are described below.

Air Traffic in 1955. Figures of air traffic during 1955, published by ICAO on Dec. 29, 1955, showed that passenger traffic carried by international and domestic scheduled airline companies reached the record total of 69,000,000 passengers, against 59,000,000 in 1954 and 52,400,000 in 1953 Cargo carried also reached a record figure of 907,000,000 ton-miles in 1955, against 760,000,000 in 1954 and 710,000,000 in 1953. Comparative figures are given below

	Miles flown	Passengers carried	Passenger miles	Cargo ton-miles	Mail ton-miles
		(all figures represent millions)			
1937	165	2.5	880	n.a	n.a
1945	373	9.3	5,100	77	90
1953	1,165	52.4	28,900	710	188
1954	1,265	59 0	32,620	760	223
1955	1,407	69 0	38,530	907	257

n a =not available.

Technical Assistance. Details of ICAO's technical assistance plans for 1956 were announced by the Secretary-General, Mr. Carl Ljungberg, on Dec. 13, 1955. As a result of an allocation of $1,205,750 by the U.N. Technical Assistance Board and the Specialized Agencies, compared with $1,048,141 in 1955, technical assistance activities would be increased to the highest level ever, and would include regional projects in Latin America and the Middle East and 27 national projects

Membership. It was announced during the tenth session of the ICAO Assembly that the Sudan would become a member of the Organization on July 29, bringing the total membership to 69. Cambodia and the German Federal Republic had become members on Feb 15 and June 8 respectively

European Civil Aviation Conference.

The first session of the European Civil Aviation Conference, set up by the 1954 conference on the co-ordination of European air transport (see 13656 A), was held at Strasbourg from Nov. 29 to Dec. 16, 1955.

The conference was attended by representatives of 18 European countries (Austria, Belgium, Denmark, France, Western Germany, Greece, Iceland, the Irish Republic, Italy, Luxemburg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom), and by observers from nine other countries (Canada, Egypt, Israel, Japan, Lebanon, Liberia, Mexico, the U S A, and Yugoslavia) and from 10 international organizations. The principal decisions of the Conference are summarized below

Constitution. As regards its internal organization, the Conference decided (*a*) that it would call its own meetings and settle its own agenda, (*b*) that it would maintain close liaison with ICAO, and (*c*) that it would hold annual plenary sessions, the main task of which would be to review the development of intra-European air transport in order to promote co-ordination, better utilization of resources, and orderly development. It was also recommended that reports on the plenary sessions should be presented to the Consultative Assembly of the Council of Europe.

Draft Multilateral Agreement for Intra-European Non-Scheduled Services. The Conference prepared a draft agreement establishing freedom of operation for certain categories of non-scheduled commercial flights, such as (*a*) aircraft engaged in humanitarian or emergency missions, (*b*) transportation of passengers in "air taxis," i.e. small aircraft with a maximum seating capacity of six passengers, (*c*) charter flights where there was no re-sale of space; (*d*) isolated flights of a maximum frequency of once a month; and (*e*) all freight and passenger operations between regions with no reasonably direct connexion by scheduled air services.

"Freedom of operation" was defined as the abolition of any requirement for prior permission for the flight or, at least, the simplification of the procedure necessary to obtain such permission.

The agreement was opened for signature at the ICAO Paris Office on April 30, 1956, when it was signed by Belgium, France, Luxemburg, and Switzerland. The German Federal Republic and the Irish Republic signed the agreement on May 30

Multilateral Agreement on Intra-European Scheduled Services. There was a wide exchange of views regarding the principles which ought to serve as a basis for a multilateral agreement on the exchange of commercial rights for intra-European scheduled air services. It was recognized that the time was not yet ripe for the preparation of such an agreement to replace the bilateral agreements at present in force. Some delegations thought that the best policy would be to seek co-operation at the level both of Governments and of airlines, while others considered that co-operation between the air companies alone offered the most promising results.

Helicopter Ferries. The Conference exchanged views on the problems raised by the development of helicopter services and "heliports," and concluded that improvements were necessary as far as operating economy, safety, all-weather operation, and noise reduction were concerned.

It was announced during the tenth session of the ICAO Assembly that Dr. Edward Warner would not seek re-election as President of the ICAO Council, but would remain in office pending the appointment of a successor.—(International Civil Aviation Organization, Montreal - Council of Europe Directorate of Information, Strasbourg) (Prev. rep. 14487 C.)

A. AUSTRALIA. — The Stevedoring Industry Act and Industrial Conciliation and Arbitration Act. - Creation of Federal Conciliation and Arbitration Commission and Industrial Court.

The Federal Parliament approved during June two Bills designed respectively (1) to overcome difficulties arising from labour shortages at Australian ports and thus ensure a quicker turn-round of shipping; (2) to bring about a more expeditious system of conciliation in labour disputes.

Both Bills were based largely on recommendations contained in a report (published on March 15) of the committee appointed in 1954 to examine waterfront conditions. The report described these conditions as "chaotic," and strongly criticized (*a*) the dilatoriness of the Stevedoring Industry Board in dealing with shipowners' applications for increased labour quotas at certain ports; (*b*) the absence under existing legislation of any effective sanctions by which the Board could enforce its regulations and control labour, (*c*) the grave delay (in some cases amounting to six years) before claims submitted by the Waterside Workers' Federation were heard by the Arbitration Court; (*d*) the absence of any clear separation of functions between the Arbitration Court and the Stevedoring Industry Board.

The Stevedoring Industry Act.

The first Bill, to amend the existing Stevedoring Industry Act, included the following provisions:

(1) The replacement of the existing Stevedoring Industry Board by a new authority, to be known as the Australian Stevedoring Industry Authority, comprising an independent chairman and two other members, representing respectively the employers' and trade union sides of industry, but not drawn either from shipping or waterfront interests or from the unions actually involved.

(2) A new type of labour recruitment at "seasonal" ports (e.g. Hobart in the fruit-loading season and North Queensland ports in the sugar season), under which the new Authority would fix the number of temporary men needed, and the Waterside Workers' Union would be empowered to admit them to membership

(3) The recruitment of supplementary labour for use in the evening and at weekends, so as to meet emergencies caused by "gluts" of shipping or shortages of labour after bad weather. This labour would not be used if union labour were available, and men would not be allowed to work unless their names had been recorded with the Authority and their engagement approved by it.

(4) A guaranteed minimum wage to registered waterside workers for four weeks succeeding the last use of supplementary labour.

(5) Retention of the existing provision under which port workers' registrations may be cancelled or suspended for breaches of discipline, and the empowering of the new Industrial Court [see below] to impose on employers fines ranging from £A100 to £A1,000 for failure of discipline, or to order their registrations to be cancelled of suspended.

The Federal Minister of Labour (Mr. Holt) introduced the Bill in the House of Representatives on May 29.

Mr. Holt explained that the power of the new authority would be limited, so as to avoid impinging on employers' control over their labour and methods of working. It would be responsible for (*a*) investigating means of bringing about greater efficiency in cargo handling; (*b*) inquiring into the cause of port delays; (*c*) encouraging safe working and providing special protective clothing for men handling certain cargoes. The Bill left the primary responsibility for labour recruitment to the W.W.F., as at present It laid down that once port quotas were fixed, the union would have to provde the required labour; if it failed to do so, however, the new port authority would recruit labour itself, but both the union and the employers would have the right to object to the registration of any particular recruit.

Mr. Holt stressed that the clause providing for the recruitment of supplementary labour was not intended to provide a second labour force outside the W.W.F. The need for supplementary labour would be rare if union men were transferred from port to port to meet emergency demands, and the new provision was only in the nature of a reserve of manpower to be used, when necessary, to avoid cargo congestion or delays to shipping.

The Federal Parliamentary Labour Party decided unanimously on May 30 to demand the withdrawal of the Bill. **Dr. Evatt** (the Leader of the Opposition) denounced the measure as "a shipowners' Bill" which "contained clauses indicating an attack on the trade union movement;" he added that the Labour Party was "very disturbed" that the 1954 inquiry committee had not reported on "the notorious and extortionate profits made by shipping combines."

The Bill was also strongly opposed by the W W.F., whose secretary (Mr. Healy) declared that it would give the new stevedoring authority power to fix union fees and recognize "company unions," and who described the provision sanctioning the employment of outside labour at nights and weekends as "an attack on the 40-hour week."

The Bill was passed by the House of Representatives on June 14 after nearly three weeks of bitter debate, in which the Opposition unsuccessfully contested nearly all its major provisions and the Government repeatedly applied the closure. A large number of Opposition amendments were defeated in the Committee stage, but in order to meet the wishes of the Australian Council of Trade Unions the Government introduced an amendment (subsequently agreed to) postponing until 1957 the operation of the provisions for the use of supplementary labour in the evenings or at weekends.

During the second reading debate in the Senate (June 21) two Senators on the Government side announced that they could not support the Bill, the second reading being given by a majority of only one vote (24-23). The Bill passed its remaining stages in the Senate on the same day.

Earlier, on June 6, W.W F. members at all Australian ports except Fremantle, Port Pirie, and Port Lincoln had stopped work for 24 hours in protest against the Bill, the Sydney branch voting for a national strike unless it was withdrawn. On June 21 a conference of the A C.T.U. in Melbourne passed a resolution demanding the Bill's withdrawal, and authorizing its executive to "take whatever action it might deem proper" to prevent its implementation if it became law.

The new Australian Stevedoring Industry Authority assumed control of labour at all Australian ports on Aug. 14.

The Industrial Conciliation and Arbitration Bill.

This Bill, introduced by Mr. Holt in the House of Representatives on May 10, amended the existing Arbitration Act and provided for:

(1) The setting-up of a new Federal Conciliation and Arbitration Commission, comprising a president and deputy-president with judicial qualifications, as well as lay members drawn from the present conciliation commissioners.

The president would assign specific industries to lay members, who would deal with all disputes in those industries; but if the president thought fit, he or the deputy-president might handle major disputes themselves. Appeals from the decisions of single members would rest with three members of the Commission, including the member who made the original decision and one layman. In addition, "conciliators," having purely conciliatory functions and no power of arbitration, woud be associated with the Commission.

(2) The establishment of a new Industrial Court with disciplinary powers, in order to remedy the situation created by a recent High Court judgment declaring that the Federal Arbitration Court could not constitutionally be vested with power to impose penalties.

The new Court, replacing the existing Court, would consist of a Chief Judge and not more than two other judges. It would be empowered (*a*) to order compliance with an arbitration order and forbid persons or organizations to commit or continue to commit offences against arbitration; (*b*) to grant leave to appeal against acts or decisions of industrial registrars, (*c*) to determine an appellant's eligibility to be or remain a member of an organization registered under the Arbitration Act; (*d*) to determine points of law referred to it by the Conciliation Commissioner. The Court would have the same power to punish contempt as the High Court, wth maximum penalties of £A500 or 12 months' imprisonment.

A demand for the postponement of further consideration of the Bill until the Privy Council had decided an appeal then before it regarding the exercise of penal powers by the Arbitration Court, was put forward by the Australian Council of Trade Unions on May 17. Mr. Holt announced on May 21, however, that the Government had decided that the Bill must be passed before the end of the present session, since it was "undesirable to leave important aspects of the arbitration system unresolved" until the Privy Council had announced its decision.

During the second reading debate (May 22) **Dr. Evatt** moved an amendment calling for the withdrawal of the Bill for reconsideration. He contended that it "perpetuated the worst features of existing legislation," would contribute nothing to the problem of solving industrial unrest, and would cause only "frustration and unrest to salary- and wage-earners." The freezing of the basic wage for the past three years, he said, had "cost workers hundreds of millions of pounds," whereas at the same time they had had to bear the brunt of "an unprecedented surge of profiteering." He alleged that the Bill aimed at circumventing the High Court's decision that the Arbitration Court had no judicial power by "establishing a new court of pains and penalties which would victimize trade unionists and would have no support from decent employers." The essential feature of an effective Australian arbitration system, Dr. Evatt argued, should be "the vesting in Parliament of full powers, both in relation to industrial matters generally and to a just fixation of prices and profits on a national basis"

The Opposition amendment calling for the Bill's withdrawal was defeated by 56 votes to 31, and the Bill was passed by the House of Representatives on June 7 with two Government amendments: (1) setting out the responsibility of the Conciliation and Arbitration Commission for handling disputes at Australian ports; (2) empowering the Industrial Registrar to exempt conscientious objectors from trade union membership. After passing through all its stages in the Senate, it came into force on August 14.

Sir Arthur Fadden (the acting Prime Minister) announced on Aug. 22 that Senator Spicer, the Attorney-General, would resign from the Federal Government to become Chief Judge of the new Industrial Court, and would be succeeded as Attorney-General by Senator O'Sullivan, the Navy Minister. The other members of the Industrial Court would be Mr. Justice Dunphy and Sir Edward Morgan, both judges of the former Arbitration Court. The president of the new Conciliation and Arbitration Commission would be Mr. Justice Kirby, and the Deputy-Presidents under him would be Mr. Justice Foster, Mr. Justice Wright, and Mr. Justice Ashburner. The new Commission held its first meeting on Aug. 21.

Mr. Justice Ashburner, of the Federal Arbitration Court, on June 18 awarded port workers throughout Australia a wage increase of 8d. an hour, increasing the hourly rate to 9s. 10d., equivalent to £A14 15s. for a 30-hour week. The Waterside Workers' Federation had asked for an increase of 1s. 6½d. an hour. (Australian News and Information Bureau - Times)

(Prev. rep. 14709 A; 14188 D.)

A. SOVIET UNION. — Nuclear Weapon Tests.

A series of nuclear weapon tests was carried out in the U.S.S.R. on Aug. 24, Aug. 30, Sept. 2, and Sept. 10. The first three tests were announced by the U.S. Atomic Energy Commission before any statement was issued in Moscow, whilst the fourth test was announced by the Tass Agency a few hours after it had taken place.

A Tass announcement of Aug. 31, made after the U.S. announcements [see below], said that tests had been carried out on Aug. 24 and Aug. 30 "for the improvement of nuclear weapons" and the "evolving of new types of armament" for the Soviet armed forces. They had been carried out at a considerable height to allow "a sharp reduction in the fall-out of radioactive materials", and for the same reason "the smallest possible amounts of active substances were used in the charges." The statement recalled that the U S S.R. had "repeatedly presented in the U.N. proposals for an absolute ban on atomic and hydrogen weapons"; said that these proposals were "not meeting with support on the part of the U.S A. and some other Western Powers"; and mentioned the thermo-nuclear tests carried out by America and Britain earlier in the year.

A further announcement on Sept 10 said that the tests carried out on that date and on Sept 2 were held "in connexion with the programme of scientific research work." Like the earlier tests, they had been carried out "at great heights far removed from populated areas."

In the U.S.A., a statement by the chairman of the Atomic Energy Commission (Rear-Admiral Lewis Strauss) was issued on Aug. 26 by President Eisenhower announcing that the U.S.S.R. had detonated on Aug. 24 "a nuclear device with a yield less than a megaton at the usual Soviet proving ground." It was stated that "this proving ground, where most of the Soviet tests have occurred, is located in south-west Siberia, north of India, Pakistan, and Afghanistan and west of China. In addition to this area, the Soviets have also utilized the area of the Barents Sea for nuclear testing." [The first area mentioned would lie in Soviet Central Asia, approximately between the Aral Sea and the Chinese frontier, the Barents Sea is inside the Arctic Circle, to the extreme north of European Russia.]

The statement pointed out that this was "the 13th announcement by the U.S.A. concerning nuclear weapon tests in the U S S.R., whereas the Soviet Government had only issued three brief statements about such tests, two of which had followed U.S. announcements." It added: "Although there have been but 13 announcements by the U.S.A. regarding Soviet tests .. the actual number of Soviet detonations is significantly higher than 13 . . . This country [the U S.A.] does not disclose all the U S.S.R. shots of which it has knowledge, but limits itself to statements about explosions of special interest because of their large size . . or some other unusual fact. For example, the U S.A. stated on Nov. 23, 1955, that the explosion then announced was 'the largest thus far in the U S.S.R and in the range of megatons.' This was later confirmed by Mr. Khrushchev, when he stated in Bangalore, India, on Nov. 27, 1955, that this Soviet explosion was 'of unprecedented power.'" [See 14566 A.]

In releasing this statement, President Eisenhower said. "I wish again to emphasize the necessity for effective international control of atomic energy and of such measures of adequately safeguarding disarmament as are now feasible. This is a goal which the U.S.A. has consistently sought and which has received the support of a large majority of the members of the United Nations."

Two further U.S. statements, on Aug. 31 and Sept. 3, said that the second and third Soviet nuclear tests had taken place "in the same region" and were in "the same range of size as the previous bursts."—(Soviet Weekly - New York Times)

(Prev. rep. 14943 C; 14566 A.)

B. UNITED KINGDOM. — Proposed New Terminal at Milford Haven for Large Tankers. - Plan to make Milford Haven largest Oil Distributing Centre in Europe.

The British Petroleum Company announced on Sept. 4 that it was planning the construction at Popton Point, near Milford Haven, of a tanker terminal capable of berthing the largest tankers yet built or contemplated.

The statement said that oil from the terminal would be pumped through a 60-mile pipeline to the company's refinery at Llandarcy, near Swansea, which at present received its oil from tankers berthed in the Queen's Dock, Swansea. This dock could not accommodate tankers carrying over 16,000 tons, but the new installations at Popton Point would have two berths able to take ships up to 100,000 tons. The project (expected to cost about £5,000,000) was, however, still subject to approval by several of the authorities concerned, and no starting-date for work on the new terminal and pipeline had been fixed

A development scheme intended to make Milford Haven the principal oil-distributing centre for Britain and the Continent, including a dry-dock able to accommodate tankers of 100,000 tons deadweight, was announced on Sept. 14.

The cost of the scheme—prepared by a firm of industrial consultants at the request of the Milford Haven Development Committee—was put at £13,000,000-£15,000,000. Mr. C A. Samuels, managing director of C.A.S (Industrial Developments) Ltd., the firm concerned, explained that it had been asked by the Milford Docks Company to submit proposals for the development of a 45,000-ton dry dock and berths, as authorized by the Milford Docks Act of 1945, the estimated cost being £4,400,000. Since the Act was drafted, however, tankers of 60,000-100,000 tons had been laid down, and it was claimed that these larger ships could carry oil from the Middle East to Britain round the Cape more cheaply than smaller vessels could bring it in *via* Suez Britain's dependence on the Suez Canal for her Middle Eastern oil supplies could thus in time be ended. Except for Fawley, the Isle of Grain, and Grangemouth, however, there was at present nowhere in Europe where tankers of 60,000-100,000 tons could discharge, and there were only two dry-docks large enough to take 100,000-tonners, both of them being at present used to capacity. Mr. Samuels added that the scheme had been put before the Prime Minister and referred by him to the Minister of Transport.

The recent purchase by the Esso Petroleum Company of a 650-acre site on the north shore of Milford Haven was announced on Sept. 10. The object of the purchase was not disclosed.

(Times - Daily Telegraph - Manchester Guardian)

C. SPAIN. — Workers' Universities.

Four "workers' universities" (*Universidades Laborales*), the first of their kind in Spain, were opened at the beginning of the new academic year in October at Córdoba, Seville, Gijón and Tarragona. Intended primarily for the sons of workers, their principal function will be to provide higher education so as to prepare the students for posts as managers, engineers, technologists, etc., for the industrial and agricultural projects planned by the Spanish Government.

The *Universidades Laborales*, each planned on the lines of a "university city," were created by the Minister of Labour (Señor José Antonio Giron) in co-operation with the Ministry of Education and the Falangist Party, and were established under a statute approved jointly by the Ministries of Labour and Education. Each of the "workers' universities" will ultimately have accommodation for 2,000 resident students and some 1,000 outside students. Entrance will be by examination for boys between 10 and 18 years, and there will also be special courses for adult workers selected by the Falangist syndicates Board and lodging, books, medical treatment, etc., will be supplied free to all students

The Jesuit Order will be in charge of teaching at the *Universidad Laboral José Antonio Giron* (named after the originator of the scheme) at Gijón, while the Dominican Order will be in charge of teaching at the *Universidad Laboral Onesimo Redondo* (named after a deceased Falangist leader) at Córdoba. At the other two workers' universities—the *Universidad Laboral Virgen de los Reyes* at Seville and the *Universidad Laboral Francisco Franco* at Tarragona—teaching will be in charge of lay professors and lecturers.

(Times - A.B.C., Madrid)

D. GERMANY. — Release of Karl Dönitz.

The former Grand Admiral Karl Dönitz (65), Hitler's designated successor as "Führer" in the last days of the war, was released on Sept. 30 from Spandau prison (Berlin) after completing the ten-year sentence to which he had been condemned by the International Military Tribunal at Nuremberg. He was flown by a British plane to Dusseldorf, where he announced his intention of living in retirement.—(Frankfurter Rundschau)

OCTOBER 6—13, 1956

A. THE SUEZ CRISIS. — Second London Conference on Suez. - Establishment of 15-Nation Canal Users' Association. - Suez Dispute referred to Security Council by Britain and France. - Egyptian Counter-complaint to U.N. - French Criticisms of Second London Conference. - Further Anglo-French Ministerial Discussions. - Soviet and Indian Opposition to Canal Users' Plan. - Mr. Menzies on the Suez Situation. - Italian Attitude to Suez.

Developments in the Suez situation (in continuation of 15101 A) are described below under cross-headings, including the second London conference on Suez; the setting-up of a 15-Power Suez Canal Users' Association; the reference of the Suez dispute to the U.N. Security Council by the British and French Governments, and also by Egypt; and reactions in various countries to the Western Powers' proposals to set up a Canal Users' Association.

Second London Conference on Suez.

The second London conference, convened by the British, French, and U.S. Governments to discuss the proposed establishment of a Canal Users' Association, was held from Sept. 19-21 under the chairmanship of Mr. Selwyn Lloyd. It was attended by all the 18 Powers who signed the majority proposals of the first London conference—i.e. the proposals presented to President Nasser by the Menzies mission. In accepting the invitation, however, several Powers—notably the Scandinavian countries, Italy, Pakistan, and Persia—refused to commit themselves definitely to membership of the Association until its functions and purposes had been clarified.

At a meeting in Stockholm on Sept. 16 between the Prime Minister and Foreign Minister of Denmark (Hr. Hansen) and the Foreign Ministers of Norway and Sweden (respectively Hr. Lange and Hr. Undén), it was agreed that the Scandinavian countries should attend the second London conference After expressing the desire of Denmark, Norway, and Sweden for a peaceful solution of the Suez problem, the communiqué expressed the conviction of the three Governments that the question had "reached a stage where it would be appropriate to refer the matter to the United Nations." At a subsequent press conference, Hr. Undén said that the Scandinavian countries would not commit themselves in advance to membership of the proposed Canal Users' Association, but would await the outcome of the London discussions before taking a definite decision.

The new Foreign Minister of Pakistan (Mr. Firoz Khan Noon) emphasized on Sept. 16 that his Government, in accepting the invitation to the second London conference, was in no way bound to membership of the Canal Users' Association, the functioning of which was not clear at the present moment. Moreover, Pakistan "could in no case associate herself with the use of force or with any solution imposed on Egypt against her will."

In Rome, it was announced on Sept 13 that the Italian Government had requested Britain to furnish "further clarification" of the plan for setting up a Canal Users' Association.

After several plenary sessions at which the delegates expressed the views of their respective Governments (see below), the second London conference ended on Sept. 21 with (*a*) a general declaration by the 18 Powers, and (*b*) a declaration providing for the establishment of a Suez Canal Users' Association (abbreviated S.C.U.A.). The text of these documents was as follows:

General Declaration.

"(1) Representatives of the 18 Governments who joined in the proposals which were submitted to the Egyptian Government by the Five-nation Committee presided over by the Prime Minister of Australia . . . met in London from Sept. 19-21, 1956. Their purpose was to consider the situation in the light of the report of that committee and other developments since the first London conference.

(2) They noted with regret that the Egyptian Government did not accept these proposals and did not make any counter-proposals to the Five-nation Committee

(3) It is the view of this conference that these proposals still offer a fair basis for a peaceful solution of the Suez Canal problem, taking into account the interests of the user nations as well as those of Egypt. The 18 Governments will continue their efforts to obtain such a settlement. The proposal made by the Egyptian Government on Sept. 10 was placed before the conference, but it was considered too imprecise to afford a useful basis for discussion

(4) A declaration was drawn up providing for the establishment of a Suez Canal Users' Association This Association is designed to facilitate any steps which may lead to a final or provisional solution of the Suez Canal problem. It will further co-operation between the Governments adhering to it concerning the use of the Canal. For this purpose it will seek the co-operation of the competent Egyptian authorities pending a solution of the larger issues. It will also deal with such problems as would arise if the traffic through the Canal were to diminish or cease. The Association will be established as a functioning entity at an early date after the delegates to this conference have had an opportunity to consult their respective Governments.

(5) The conference noted that on Sept. 12 the Governments of the United Kingdom and France informed the U.N. Security Council of the situation, and that on Sept. 17 the Government of Egypt also made a communication to the Security Council [see below]. The conference considers that recourse should be had to the United Nations whenever it seems that this would facilitate a settlement.

(6) The 18 Governments will continue to consult together in order to maintain a common approach to the problems which may arise out of the Suez question in the future.

(7) It is the conviction of the conference that the course outlined in this statement is capable of producing by peaceful means a solution which is in conformity with the principles of justice and international law as declared in Article 1 of the U.N. Charter"

Establishment of Suez Canal Users' Association.

"(I) The members of the Suez Canal Users' Association (S.C.U.A.) shall be those nations which have participated in the second London conference and subscribe to the present declaration, and any other adhering nations which conform to criteria to be laid down by the association.

(II) The S.C.U.A. shall have the following purposes:—

(1) To facilitate any steps which may lead to a final or provisional solution of the Suez Canal problem and to assist the members in the exercise of their rights as users of the Suez Canal in consonance with the 1888 Convention, with due regard for the rights of Egypt.

(2) To promote safe, orderly, efficient, and economical transit of the Canal by vessels of any member-nation desiring to avail themselves of the facilities of S.C.U.A., and to seek the co-operation of the Egyptian authorities for this purpose.

(3) To extend its facilities to vessels of non-member nations which desire to use them.

(4) To receive, hold, and disburse the revenues accruing from dues and other sums which any user of the Canal may pay to S.C.U.A., without prejudice to existing rights, pending a final settlement

(5) To consider and report to members regarding any significant development affecting the use or non-use of the Canal.

(6) To assist in dealing with any practical problems arising from the failure of the Suez Canal adequately to serve its customary and intended purpose, and to study forthwith means that may render it feasible to reduce dependence on the Canal.

(7) To facilitate the execution of any provisional solution of the Suez problem that may be adopted by the United Nations

(III) To carry out the above-mentioned purposes:

(1) The members shall consult together in a Council on which each member will be represented.

(2) The Council shall establish an Executive Group to which it may delegate such powers as it deems appropriate.

(3) An Administrator who shall, *inter alia*, make the necessary arrangements with shipping interests, will be appointed to serve under the direction of the Council through the Executive Group.

(IV) Membership may at any time be terminated by giving 60 days' notice.

Proceedings of the Conference.

The principal speeches and statements made during the three days of the conference are summarized below:

Mr. Dulles (U.S.A.) opened the conference with a speech in which he outlined the case for a Canal Users' Association as understood by the U.S. Government. After expressing regret at Egypt's "unqualified refusal" of the 18-Power proposals conveyed to President Nasser by the Menzies mission, and declaring that "this attitude of Egypt has created a new and difficult situation," the Secretary of State said that the following facts were clear: "(1) The 1888 Convention gives our vessels the right at all times to pass through the Suez Canal as a free and open waterway. (2) Those rights are jeopardized by the action of the Egyptian Government in preventing the Suez Canal Company from exercising its agreed functions, and by Egypt itself usurping all those functions. (3) When vital rights are threatened, it is natural and elemental to join to meet the common danger."

Mr. Dulles went on to "outline the proposal for association as it is understood by the U.S. Government," speaking as follows.

"(1) It means, first of all, that we should continue our present association. This is not for the purpose of enabling one or more of us to impose our views upon any of our associates. The only basis for association is such a common will as we may freely achieve Nor is it our purpose to coerce Egypt. It is merely that the necessities of the situation make continuing association useful for ourselves and for all who depend on the Canal. Also, such association will be in the interest of Egypt whenever she is willing constructively to seek a solution with those who are chiefly concerned. Also, it is in the interest of world peace that we stand together

(2) We would, I suppose, continue to accept, as a basis for the negotiation of a permanent solution, our joint statement of Aug. 23, 1956 [i.e. the 18-nation proposals drawn up at the first London conference].

(3) We would, I suggest, find it useful to have a small operating staff which would be ready to assist our ships in operating through the Canal. We need not exclude the possibility of finding, on a provisional *de facto* basis, a measure of co-operation with the Egyptian authorities, even though Egypt may not at the present time be willing to agree upon a permanent arrangement to be embodied in treaty form.

(4) It would be useful if our association had a small governing board, chosen from among our number, who would be able to keep us informed with respect to developments; call us together whenever there was occasion; and appoint the administrative agent and fix his authority and the principles which would govern and control his action on behalf of the Association . . . There is much talk at the present time about large tankers which could go round the Cape of Good Hope with greater economy than smaller tankers passing through the Canal. There is talk of new pipelines. I would hope that the Governing Board of the Users' Association would keep in touch with all these projects and keep all members informed of any serious developments which would materially affect our economic lives.

(5) It would be useful if the Association had a modest working fund to be advanced initially by the members and reimbursed out of sums hereafter received from memberships for services rendered.

(6) Membership in the Association would not involve the assumption by any member of any obligation. It would, however, be hoped that members would voluntarily take such action with respect to their ships and the payment of Canal dues as would facilitate the work of the Association and build up its prestige and authority, and consequently its ability to serve."

Mr. Dulles concluded: "Such, in broad outline, could be the Association that we organize. The extent of its practical utility will of course depend much, though not wholly, upon Egypt's attitude But our readiness to co-operate with Egypt on a practical basis serves again to demonstrate our desire to leave no reasonable step untried in the search for a solution of the grave problem that confronts us and, indeed, the world. Our readiness to co-operate with Egypt on a *de facto* provisional basis may also suggest a provisional solution which the U N might find it useful to invoke while the search for a permanent solution goes on."

Mr. Selwyn Lloyd (U.K.) reiterated that "the British Government cannot accept unrestricted control by one Government or one man over the vital Suez waterway; we feel there can be no compromise on that principle." Colonel Nasser, having unilaterally repudiated the Canal Company's concession, might also repudiate any other concession or arrangement at any moment he chose. There had therefore to be some form of international control of the Canal. "Obviously," Mr. Lloyd declared, "we want to proceed by peaceful means We do not want to settle the matter by force. My Government have indicated their determination to act in the spirit of the U.N. Charter and in a manner consistent with its purposes . . . Unless confidence can be restored in the operation of the Canal—not just its technical operation on a short-term basis, but also its future both politically and technically—grave damage will be caused in many countries, and many painful readjustments will have to take place"

Hr. Undén (Sweden) expressed regret that President Nasser had been unable to agree to the proposals conveyed by the Menzies mission. He (Hr. Undén) nevertheless felt that the latest Egyptian proposals gave some indication that Egypt might be prepared to offer guarantees. The Swedish Government accordingly thought that endeavours should be made, by negotiations with Egypt, to find out what international guarantees the Egyptian Government would be willing to offer for securing freedom of navigation on the Canal. It should not be impossible to find an area of agreement for a solution, acceptable to President Nasser, which would give substantial international guarantees to supplement the 1888 Convention The Swedish Government also felt that the best thing at the moment was to bring the whole question before the U.N., particularly now that a serious attempt to reach a voluntary solution outside the U N had been made without success.

Dr. Ardalan (Persia) believed that one reason for the failure of the Five-Power Committee was that it had been restricted to explanation, as opposed to negotiation. He felt that the next step should be an attempt to negotiate within the framework of some agreed proposals, after which the whole question should be brought before the United Nations.

Mr. Firoz Khan Noon (Pakistan) said that his Government believed that the present proposals meant an imposed settlement, to which Pakistan had been opposed throughout. "For this reason," he declared, "I regret to inform the conference that my country cannot associate itself with this proposal" He suggested that the proposal to set up a Canal Users' Association should be dropped and that, instead, the users should invite Egypt to negotiate directly with them

Hr. Lange (Norway) stressed that Egyptian co-operation was essential for any lasting agreement, and expressed the hope that Egypt would ultimately agree to some reasonable settlement involving free passage, good management, and the non-political basis of the controlling authority. In Norway's view, the matter should be taken to the United Nations. This process, however, would take time, and he agreed with Mr. Dulles that a Users' Association should be provisionally established to help solve the many grave practical problems with which they were faced pending a final settlement.

Hr. Hansen (Denmark) reinforced the pleas of Hr Undén and Hr. Lange that the question should be immediately taken to the U.N., while **Mr. Luns** (Netherlands) and **Dr. Cunha** (Portugal) gave full support to Mr. Dulles' proposals for the Canal Users' Association.

M. Pineau (France), like Mr. Selwyn Lloyd, emphasized that control of the Canal could not be left at the mercy of a single Government or individual, or subordinated to the political aims of any single country. As long as Colonel Nasser felt he could obtain an advantage by gaining time and bringing about dissensions among the 18 countries, he would not negotiate. It was therefore essential that the "18" should agree upon "a solution for the future" (*une solution d'avenir*); only then would Colonel Nasser understand that negotiations were in his own interest.

Mr. Habtewold (Ethiopia), while not committing his Government to definite participation in the Association, stressed the need for solidarity among the Canal users. He believed that Mr. Dulles' proposals merited study, particularly as they were based on co-operation with Egypt, and said that Ethiopia favoured recourse to the U.N. if necessary.

Señor Artajo (Spain) said that, in the view of his delegation, no agreement existed as to the nature and ends of the proposed Users' Association Spain had agreed to adhere to an association in a sense emanating from the 1888 Convention, but had to express reservations about an association which assumed a larger role. It was essential to concentrate on finding a definite settlement rather than a provisional solution. While supporting the concept of a Canal Users' Association, he felt that its main duty should be to promote new negotiations with Egypt with the aim of revising the Constantinople Convention, bringing it up-to-date, and assuring freedom of navigation and operational efficiency on the Canal.

As stated above, the conference ended with a declaration of intent to establish a Suez Canal Users' Association. At the final session, however, the delegates of Pakistan, Persia, Ethiopia, Japan, and the Scandinavian countries pointed out that they could not definitely commit their Governments to membership of the S.C.U.A. until the matter had been given further consideration. The French delegate also reserved his Government's position. On the other hand, the delegates of Australia, New Zealand, Western Germany, Italy, the Netherlands, and Portugal intimated that their Governments would join the Association.

Mr. Firoz Khan Noon (Pakistan) expressed satisfaction that the document finally adopted was "quite different from the original draft," since it laid emphasis on co-operation with the Egyptian Government. The plan would be studied by his Government before it decided whether or not to join the Association.

Mr. Habtewold (Ethiopia) also reserved his Government's final position, but, like the Pakistani Foreign Minister, expressed satisfaction at the changes in the final draft as compared with the first version He stressed that Ethiopia did not wish to impose any sort of formula on Egypt.

Hr. Undén (Sweden) said that his Government was not in a position to define its final attitude, but expressed general approval of the plan drawn up; **Hr. Lange** (Norway) intimated that Norway would join the S C.U.A., though for constitutional reasons he could not commit his Government at the moment, while **Hr. Hansen** (Denmark) said that the matter would have to be laid before the Danish Parliament before a final decision was taken.

Sir Percy Spender (Australia), **Sir Clifton Webb** (New Zealand), **Herr von Brentano** (German Federal Republic), **Signor Martino** (Italy), **Mr. Luns** (Netherlands), **Dr. Cunha** (Portugal) and **Mr. Birgi** (Turkey) all indicated that they would recommend their Governments to accept the plan for setting up the Association. **Señor Artajo** (Spain) also expressed general support for the plan, with the reservations that he had made at the first London conference.

M. Pineau (France) said that he could not adhere to the declaration at the moment, as the text had been altered and would require further study by his Government. He added that if his Government's reply was positive, it would certainly contain the reservation that the document gave too much latitude to members of the Canal Users' Association, particularly as regards the payment of Canal dues.

[M. Pineau's complaint about "latitude" over the payment of Canal dues referred to the fact that the declaration provided that members of the Association "might" pay the dues to the S C.U.A. instead of to the Egyptian Government. The French delegation had urged that all dues should be paid to the Association and not to Egypt It was pointed out in the Press that most U.S., German, and Italian ships using the Canal were still paying dues direct to Egypt, these sums amounting to about 40 per cent of the dues paid by all the 18 "London conference" countries]

Together with the two documents issued at the end of the conference, there was also published a letter from Mr. Dulles to Mr. Selwyn Lloyd in which the U.S. Secretary of State said that "immediately upon my return [to Washington] steps will be taken with our Treasury officials and with representatives of owners of American vessels which largely transit the Suez Canal with a view to perfecting this co-operation in terms of actual operating practice."

Creation of Canal Users' Association.

Immediately the conference ended, Mr. Selwyn Lloyd sent out invitations to a further conference of the 18 countries, opening in London on Oct. 1, to set up the new Suez Canal Users' Association. This third conference—attended by the Ambassadors of the countries concerned, with Mr. Selwyn Lloyd in the chair—accordingly opened on that date.

During the preceding week the Danish Parliament had voted on Sept. 25, by 130 votes to seven, in favour of Denmark's adherence to the S.C.U A. The dissenting votes were cast by the Communists. It was also officially announced in the respective capitals on Sept. 27-28 that Norway, Sweden, Turkey, Persia, and the German Federal Republic had decided to join the Association.

The Suez Canal Users' Association was formally inaugurated on Oct. 1, when 15 of the 18 Governments agreed to join the Association—Great Britain, the United States, France, Australia, Denmark, the German Federal Republic, Italy, the Netherlands, New Zealand, Norway, Persia, Portugal, Spain, Sweden, and Turkey, representing together some 90 per cent of all shipping using the Suez Canal. The delegates of the three remaining countries—Ethiopia, Japan, and Pakistan—stated that their Governments had not yet reached a final decision.

The meeting decided to establish (1) an Organizational Committee to make recommendations for setting up the Association's Executive Group and define its functions and those of the Administrator, whom the Executive Group would in turn appoint; (2) an Operational Committee to deal with practical matters affecting use of the Canal, including payment of dues; and (3) a Finance Committee to deal with the Association's internal financial arrangements.

The ambassadorial conference ended on Oct. 5 by electing six of the seven members of the Executive Group—Great Britain, the U.S.A., France, Italy, Norway, and Persia. It was agreed that the election of the seventh member "should not take place immediately because certain of the 18 Governments attending the conference are still considering whether they would become members of the Association." It was also stated that the six members already elected would exercise all the functions of the Executive Group, appoint an Administrator, decide on the headquarters of the S.C.U.A., and take other relevant decisions.

The Executive Group will thus consist of the founder-members of the S.C U.A. (Britain, the U.S.A., and France), two nations west of Suez (Italy and Norway), and two east of Suez (Persia and one to be appointed from Pakistan, Japan, or Ethiopia, if any or all of those countries should decide to join the Association).

Suez Dispute referred to Security Council.

The British and French Governments sent a joint letter on Sept. 23 to the President of the Security Council (Dr. Nuñez-Portuondo, of Cuba, the Council's president during September) asking him to convene the Council to consider the following matter: "Situation created by the unilateral action of the Egyptian Government in bringing to an end the system of international operation of the Suez Canal which was confirmed and completed by the Suez Canal Convention of 1888."

Government sources in London and Paris stated that the decision to go to the Security Council had been taken immediately after the failure of the Menzies mission to Cairo. A British Foreign Office spokesman said "We believe that the time has come when recourse to the U.N. will facilitate a settlement The second London conference reaffirmed the 18-Power proposals presented to the Egyptian Government by Mr. Menzies' committee We shall seek U N. endorsement for these proposals as a fair basis for a settlement We shall maintain our full support for the Users' Association, and believe that the Association will have a useful role to play both in dealing with the Egyptian Government and in facilitating any steps which may lead to a settlement."

On the following day (Sept. 24) the Egyptian Government also sent a letter to Dr. Nuñez-Portuondo asking for a meeting of the Security Council to consider: "Actions against Egypt by certain Powers, particularly France and the United Kingdom, which constitute a danger to international peace and security and are serious violations of the U.N. Charter."

The Security Council, meeting on Sept. 26, decided to debate both the Anglo-French complaint and the Egyptian counter-complaint, and to give priority to the former. It also agreed to invite the Foreign Minister of Egypt, Dr. Fawzi, to take part in the discussions.

The decision to debate the Anglo-French complaint was taken unanimously, while the decision to hear the Egyptian complaint was taken by seven votes (the U.S.A., U S S R, Nationalist China, Cuba, Peru, Persia, and Yugoslavia) to nil, with Britain, France, Australia and Belgium abstaining A Yugoslav proposal that the two complaints should be considered concurrently was supported only by the Soviet representative. The British and French delegates (Sir Pierson Dixon and M. Cornut-Gentille) proposed that Egypt should be invited to take part in the debate without a vote, unanimous agreement being given. Sir Pierson Dixon described the Egyptian counter-complaint as an "outrageous slander" which was intended to "divert attention from the situation Egypt herself has created"

The Security Council met on Oct. 5 to consider the Anglo-French and Egyptian complaints. Britain, France, the U.S.A., the U.S.S.R., and Egypt were represented by their respective Foreign Ministers—Mr. Selwyn Lloyd, M. Pineau, Mr. Dulles, Mr. Shepilov, and Dr. Fawzi. As the presidency of the Council was held by France during October (under the month-by-month rotation of chairmanship among Council members), the meeting was presided over by M. Pineau. [The discussions in the Security Council will be summarized in a subsequent issue.—*Ed. K.C.A.*]

Before turning to the Suez dispute, the Council unanimously agreed, on the suggestion of M. Popovich (Yugoslavia), to defer consideration until a later (undetermined) date of (*a*) an Israeli request to be heard on the issue of freedom of navigation for Israeli ships through the Suez Canal; and (*b*) an application by seven Arab States to take part in the debate.

The Government of Israel had sent a letter to the Security Council on Sept. 26 saying that Israel had a "special interest" in the Suez question because of "the restrictions imposed by Egypt on the passage of Israeli goods and shipping through the Suez Canal in violation of the principles of the [1888] Convention under which the Canal has operated."

Other important developments in the Suez crisis since President Nasser's rejection of the 18-nation proposals are summarized below under cross-headings:

French Reactions. - Anglo-French Ministerial Meeting.

After a three-hour meeting on Sept. 22, the French Cabinet issued a communiqué announcing that France would join the Canal Users' Association, but reaffirming the French Government's determination "to secure the victory of the principle, as defined by the first London conference, of international control of the Canal, and to accept no compromise on this point." Regret was expressed that certain countries at the second London conference had reserved to themselves a freedom of action "which can with difficulty be reconciled with the principle of solidarity affirmed by the eighteen nations" [a reference to the wish of certain countries to pay Canal dues direct to Egypt and not to the S.C.U.A.]. "In these conditions," the communiqué added, "France reserves her liberty of action and will refuse to collaborate in measures contrary to her interests and to the purposes of the 18 nations." The statement ended with a reference to the "complete maintenance of Franco-British solidarity," which would be "given concrete form" by Sir Anthony Eden's forthcoming visit to Paris (see below).

In a speech at Lens on Sept. 23, M. Mollet dwelt on the risks inherent in leaving control of the Suez Canal to a single man or a single Government, and reiterated that "no compromise is possible on the principle of international control of the Canal" After comparing Colonel Nasser's avowed Pan-Arabist aims with the Pan-German policy of Hitler and the Pan-Slavic policy of Stalin, and declaring that the "ambition and pride of one man" might throw the whole Middle East into "ruin and despair," M. Mollet expressed France's "bitterness and anxiety at the fact that the free peoples have not appreciated the danger as we have done, and that our determination is not supported by sufficient unity among our friends and allies." Nevertheless, France was not discouraged, her determination remained unchanged, and Sir Anthony Eden's coming visit would show that "Franco-British solidarity is total."

M. Pineau, reporting to the Foreign Affairs Commission of the National Assembly on the results of the second London conference, declared on Sept. 25 that "the nations who have shown themselves weak during the past two months are those who will have to bear the responsibility for an aggravation of the situation. Those who maintained a firm attitude will have served the cause of peace." Though France had eventually accepted the solution adopted in London, she had done so with reservations and with the aim of maintaining the solidarity of the Atlantic alliance. The most serious moment of the London conference had been on Sept. 21, when Signor Martino had stated that Italy would continue to pay Canal dues to Egypt; from that moment the Users' Association had received "a mortal blow" and had "lost much of its value." M. Pineau, like M. Mollet, reaffirmed Anglo-French solidarity and said that Britain and France were considering the construction of two new pipelines in the Middle East—one through Turkey and the other through Israel.

Sir Anthony Eden and Mr. Selwyn Lloyd visited Paris on Sept. 26-27 for further discussions with M. Mollet and M. Pineau, who had visited London a fortnight earlier (see page 15082). The following communiqué was issued, stating not only that the British and French Ministers were in full agreement on the line to be followed in the U.N. and were determined to continue their close co-operation on the Suez question, but also that they had reviewed Franco-British relations in general, would seek to eliminate "minor points . . . outstanding between the two countries," and would take fresh initiatives to strengthen political, military and economic co-operation among the Western European countries:

"(1) The primary purpose of this meeting, the importance of which has been greatly increased by the latest international developments, was to strengthen Franco-British solidarity in every respect. This result was fully achieved.

(2) In particular, the Ministers defined their common position in the U N. as a result of the Franco-British decision to place the question of the Suez Canal before the Security Council. They were fully agreed on the line to be followed by them in the forthcoming debates.

(3) The Ministers expressed their determination to continue, in respect of any further developments, the close co-operation which has characterized the policy of the two Governments since the beginning of the Suez Canal crisis.

(4) The Ministers reviewed the course of the relationship between France and the U.K. in recent years, and reaffirmed the identity of aim and community of interests of the British and French peoples. They agreed on further studies designed to eliminate such minor points as may be outstanding between the two countries.

(5) Finally, they recalled the action taken by both countries since the war to strengthen political, military and economic co-operation between the nations of Western Europe. They agreed to pursue this policy and to study, in the European organizations to which they belong, or by other means, the new forms which it might take. They expressed their determination to ensure that constructive results should flow from these initiatives."

Soviet Reactions. - Denunciation of Canal Users' Association.

The Soviet Government issued a lengthy statement on Sept. 15 denouncing the Canal Users' Association as "a dangerous provocation" which was calculated to lead to "a still greater aggravation of the situation . . . and to the artificial creation of incidents which could be used as a pretext for the use of force against Egypt."

After referring to the "ever-increasing concentration of British and French armed forces in the immediate vicinity of Egypt," and defending the Egyptian Government's right to nationalize the Suez Canal, the statement alleged that the S.C U.A. was aimed at "withdrawing the operation of the Canal from Egyptian hands and putting it under foreign control." It added that "the military preparations being carried out by Britain and France, with U.S. support, are in flagrant contradiction to the principles of the U N. . . . and . . . cannot be reconciled with British and French membership of the U.N., especially as both countries are permanent members of the Security Council."

The statement reaffirmed the Soviet Government's view that freedom of navigation through the Suez Canal should be guaranteed to all countries, "taking into account the inalienable sovereign rights of Egypt"; recognized that the Canal was important to Britain and France because of the economic relations of those countries with the Eastern nations; and expressed the conviction that "the Suez question can and must be settled by peaceful means, the more so since the Egyptian Government has expressed its complete readiness to take an active part in such a settlement." In this connexion the Soviet Government welcomed the Egyptian Government's invitation to all States to take part in a conference for a revision of the 1888 Convention, and expressed its willingness to take part in such a conference with the aim of concluding an agreement which would guarantee freedom of navigation on the Canal to the shipping of all nations. In conclusion, the statement declared: "The U.S S R., as a great Power, cannot stand aloof from the Suez question . . . Any violation of peace in the Middle East cannot but affect the security of the Soviet State"

It was stated in Paris on Sept. 13 that M. Mollet had received a letter from Marshal Bulganin (the Soviet Premier) on the Suez question. Although its contents were not disclosed, it was understood that the letter was couched in friendly terms, that it denied that the U.S.S.R. had encouraged Egypt to nationalize the Suez Canal, or had any prior knowledge of President Nasser's intention, and that it contained a warning to the French Government to refrain from any action which might precipitate a conflict. It was understood that similar letters had been sent to President Eisenhower and Sir Anthony Eden.

The replies given by Marshal Bulganin to several questions put to him by a U.S. journalist (Mr. Kingsbury Smith, of the International News Service) were broadcast on Sept. 19 by Moscow Radio. Marshal Bulganin intimated that he was ready to take part in a conference of the Heads of Government of Great Britain, France, the U.S.A., the U.S.S.R., Egypt and India with a view to finding a peaceful settlement of the Suez dispute. He suggested that such a conference might be held in Geneva, and that any agreement reached should be submitted to the U.N. for ratification.

Indian Reactions. - Mr. Nehru's Criticisms of Canal Users' Association. - Mr. Krishna Menon's Visits to Cairo and London.

In a statement on Sept. 13 to the House of the People in New Delhi, Mr. Nehru expressed his "surprise and regret" at Sir Anthony Eden's speech of Sept. 12 (see 15101 A), and said that the establishment of a Canal Users' Association was "full of dangerous potentialities and far-reaching consequences."

Mr. Nehru said: "The action proposed to be taken by the three Governments [the U.K., the U.S.A., and France], which purports to be in the interests of users of the Canal and to maintain freedom of use of the Canal, seems, to say the least, surprising, and the consequences that may flow from it may well be very grave. One thing is clear—the action proposed is not the result of agreement, co-operation, or consent, but is to be taken unilaterally and is thus in the nature of an imposed decision. The Government of India deeply regret this development, which will render a peaceful settlement more difficult of realization. . . .

"I have communicated to the Prime Minister of the U.K. and the President of the U.S.A. our view that the situation that emerged after the Menzies mission, and the statement made by the Egyptian Government accepting all international obligations and inviting negotiations, has opened the way to a settlement. We appealed to both the U.K. and the U.S.A. to consider all this and to enable negotiations which will lead to a settlement. We hope that despite all that has happened, and the tensions that have been engendered, the path of peace will be followed. There is no question of appeasement of one side or another. What is to be sought, and what can in our view be obtained, is a settlement satisfactory and honourable to all concerned. The Government of India earnestly hope that the appeal we have made will not be in vain . . . To seek to impose a settlement by force or by threats of force is to disregard the rights of nations . . .

"The Government of India also regret to learn that pilots of British, French, Italian, and other nationalities are being withdrawn. This action is not calculated to promote the use of the Canal and is not in the interests of user-nations The Government of India are desirous that no statement of theirs should come in the way of efforts to diminish tensions and open a way for negotiations. But they cannot fail to point out that the steps announced—to assume the operation of the Canal without the consent and co-operation of the Egyptian Government—are calculated to render a peaceful approach extremely difficult, and also involve a grave risk of conflict.

"I have read the reports of Sir Anthony's speech with surprise and regret, as it appears to close the door to further negotiations. The action envisaged in it is full of dangerous potentialities and far-reaching consequences. I earnestly trust that even now it is not too late to refrain from any such action and to think more in terms of a peaceful negotiated settlement . . . As I have pointed out previously, the proper functioning of the Suez Canal is of vital importance to India We are convinced, however, that this can only be achieved through peacefully negotiated settlements, ensuring the rights not only of Egypt but of all user-countries."

Mr. Krishna Menon, the Indian Minister without portfolio, and Indian representative at the first London conference on Suez, arrived in Cairo on Sept. 17 at the invitation of President Nasser. During a four days' stay in the Egyptian capital he had several meetings with Colonel Nasser, and also saw Dr. Fawzi, Wing-Commander Sabry, and the Assistant Secretary-General of the Arab League. Mr. Menon arrived in London on Sept. 24 for talks with Mr. Selwyn Lloyd and other U.K. Ministers, returned to Delhi a few days later, paid another visit to Cairo during the first week of October, and on Oct. 7 flew again to London for his third visit since the Suez crisis. No statement was issued on Mr. Menon's discussions in London and Cairo, beyond informal statements by Mr. Menon stressing the need for a peaceful negotiated settlement of the Suez dispute. Both in the British and Indian Press however, Mr. Menon's missions were regarded as those of an "unofficial mediator" in the dispute.

Australian Reactions. - Mr. Menzies' Support for Canal Users' Association. - Opposition by Australian Labour Party.

In a speech on Sept. 25 to the Australian House of Representatives, Mr. Menzies defended the setting-up of the Canal Users' Association, stressed the importance of the Suez Canal to the economies of the Western nations, denounced President Nasser's "illegal and high-handed action" in nationalizing the Canal, and expressed the view that the canal users would be justified in imposing sanctions on Egypt if the U.N. could not bring about a solution.

After a lengthy recapitulation of the history of the Suez dispute, Mr. Menzies continued: "On July 26, Colonel Nasser, stung by the refusal of an American loan for the Aswan Dam, purported by a so-called nationalization decree to terminate the concession and appropriate the assets of the Suez Canal Company. In express terms, he made it clear that the Canal was being taken over so that financially it should serve the special needs and interests of Egypt. While he paid lip service to the 1888 Convention, the terms of which he had, in a judgment of the United Nations, glaringly broken in the case of Israel, he made it plain that in future the Canal was to be an instrument of Egyptian politics and the servant of Egypt's financial needs. This position he reasserted in our Cairo discussions. This high-handed and, as I believe, illegal action produced a world crisis. . .

"It would be folly to regard the Canal seizure as a single act to be dealt with in isolation . . . Colonel Nasser, acting in similar fashion to other dictators before him, has made no secret of his ambition to be the acknowledged head of the Arab world, to encourage confiscations of outside investments and installations, and to humiliate and drive out the foreigner. The Canal seizure is, in plain English, the first shot in a campaign calculated, unless it is promptly and successfully resisted, to make the peoples and economies of Great Britain and Western Europe dependent literally from week to week on one man's whim. In a literal sense, the Suez Canal issue is for millions one of survival . . .

"It was said by some that, when the crisis arose after Colonel Nasser's nationalization decree, the matter should at once have been taken to the United Nations. Strongly as we support the Charter, I cannot accept this view. The problem was urgent. The longer Nasser remained in possession of the field, the greater would be the temptation for people to say that we were dealing with an accomplished fact and that nothing could be done about it. It was essential that something should be done about it at once. The nations principally concerned, therefore, decided that they would call a conference of those countries vitally interested in the Canal in order that they might evolve fair and sensible proposals for a just settlement. Hence

the [first] London conference . . . I sincerely believe, with representatives of 17 other nations, that no fairer or more generous proposals have ever emerged from a conference . . When our proposals were rejected, a new proposal was made for the formation of a Canal Users' Association, designed to protect the interests of the nations affected. The nature and form of that Association have been under discussion at the second London conference . . . A plan for a Users' Association having been worked out and adopted, the matter is now going to the U.N. for, we hope, expeditious treatment . . .

" Before I conclude, I want to speak frankly about three matters. One is the question of force. That question calls for a cool and clear answer. There has been a great variety of vocal opinion ranging between what I will call two extreme views. One view is that force should at once have been used to defeat a confiscation by force. This view is out of harmony with modern thinking, at any rate this side of the Iron Curtain. The other is that force can never be employed (except presumably in self-defence) except pursuant to a decision of the Security Council. This I would regard as a suicidal doctrine, for, having regard to the existence of the veto, it would mean that no force could ever be exercised against any friend of the Soviet Union except with the approval of the Soviet Union, which is absurd . . . Each of these extreme views must, I believe, be rejected. The truth is that . . . force—except for self-defence—must never be the first resort, but the right to employ it cannot be completely abandoned or made subject to impossible conditions.

" The evolving history of the British Empire and the Commonwealth of Nations was not the product of any theory. It has been from first to last an inductive process, like the slow creation of common law and of all the great instruments of self-government. It would be a sad day if it allowed itself to be theorized out of existence. We need not get into a timid state of mind in which the very mention of the word ' force ' becomes forbidden. There is no community of nations which can say with clearer conscience that it has set a greater 20th-century example of using force only when forced into it, and then not for conquest but for resistance to aggression. But does this mean that we are to be helpless in the presence of an accomplished threat to our industrial and economic future ? Is it our task to ' patch up ' peace and no more ? Surely, our task is not merely to prevent hostilities but to build up a firm order of law and decency in which ' smash and grab ' tactics do not pay. We must avoid the use of force if we can. But we should not, by theoretical reasoning in advance of facts and circumstances, contract ourselves out of its use whatever those facts and circumstances may be. We must seek peace at all times, but we are not bound to carry that search so far that we stand helpless before unlawful actions which, if allowed to go unchecked, can finally dissipate our own strength and deprive the world of that power and authority, both moral and physical, which resides in the free nations and is still vital to the free world and to the human interests which the free world protects

" What then should be our programme of action in relation to the Suez Canal, that great international waterway, up to now non-political, which is the economic lifeline of hundreds of millions of people north, south, east and west of it ?

" First—Negotiation for a peaceful settlement by means of an honourable agreement So far, we have tried this without success. Our failure has not been due to any unfairness or illiberality on our side, but to a dictatorial intransigence on the other. Should we continue to negotiate on a watered-down basis in a spirit which says that any agreement is better than none ? I cannot imagine anything more calculated to strengthen Colonel Nasser's hand or weaken our own.

" Second—Putting on of pressure by a co-operative effort on the part of the user-nations. Colonel Nasser must be brought to understand that his course of action is unprofitable to his country, and that he is abandoning the substance for the shadow. This is one of the great merits of the Users' Association established by the second London conference. The more Canal revenue is diverted from the Egyptian Government, the less will the Egyptian people believe that it pays to repudiate.

"Third—Should the U.N., by reason of the veto, prove unable to direct any active course of positive action, we may find ourselves confronted by a choice which we cannot avoid making. I state this choice in stark terms ·

(*a*) We can organize a full-blooded programme of economic sanctions against Egypt, or

(*b*) We can use force to restore international control of the Canal, or

(*c*) We can have further negotiations, provided we do not abandon vital principles, or

(*d*) We can ' call it a day,' leave Egypt in command of the Canal, and resign ourselves to the total collapse of our position and interests in the Middle East, with all the implications for the economic strength and industrial prosperity of the nations whose well-being is vital to ours.

" The second matter concerns the attitude and the activities of the Soviet Union. My observations in London and since have convinced me that :

(*a*) The Soviet Union is not looking for a world war but is willing to stir up trouble in those regions where the strength of the Western democracies can be materially weakened.

(*b*) It is anxious to increase its influence in Egypt by the provision of arms and the development of economic ties. How to reconcile this with Egypt's sovereignty is a problem I will leave to Colonel Nasser.

(*c*) It has been in constant and persuasive touch with Colonel Nasser during recent negotiations. It is of great significance that, at the first London conference, Mr. Shepilov openly declared the argument for Egypt in terms which I was later to hear used word for word by Colonel Nasser at Cairo.

" The third matter concerns the impact of the Suez Canal confiscation on Australia and on the great new nations of South and South-East Asia. So far as Australia is concerned, I need hardly say that an open Canal is essential to British prosperity and that a closed Canal could mean mass unemployment in Britain, a financial collapse there, a grievous blow at the central power of our Commonwealth, and the crippling of our greatest market and our greatest supplier.

" The nations and peoples of South-East Asia, being nearer to Suez than we are, are even more dependent on it than we are . . . Colonel Nasser's policy of repudiation in the name of sovereignty is not calculated to help the very countries whose admiration and support he is now claiming. It is ironical that, in the guise of their leader, he is now taking steps to deprive some of the Middle East Powers of the natural and established market for the product of their oilwells.

" A final note of warning is necessary. In or out of the U.N., there are great principles and vital interests at stake. A matter of this kind is not disposed of by being sent to the Security Council or, under present procedures, to the General Assembly. Nothing could suit the Egyptian dictator better than for the free world to lose interest or a sense of crisis and urgency. There must be both speed and realism. We must look ahead, keep our sense of direction, and maintain our impetus.

" Should the U.N. machinery fail to produce an early settlement, are we then to wash our hands of the whole matter, saying : ' Well, it is too bad, but we can do nothing ; Colonel Nasser must be left with his spoils, retreat in the Middle East must go on.' I decline to believe it. The principle of internationally assured non-political control of the Suez Canal is vital. It cannot be watered down without being washed away. To abandon it would be suicidal.

" Therefore if the U.N., once more frustrated by Soviet action, proves ineffective, if it cannot impose economic sanctions or direct any other course of effective action, we, the user-nations, must, in the absence of willing and proper negotiations, be ready to impose sanctions ourselves. The central and unforgettable fact in all this unhappy business is that, unless the Egyptian action is frustrated and the international status of the Canal assured, a score of nations, great and small, will have put their fortunes into pawn. We are at one of the crossroads of modern history. We will take the wrong turning at our peril "

Dr. Evatt, the Leader of the Opposition, bitterly attacked Mr. Menzies' speech as " disgraceful " and " appalling " in view of the fact that the Suez dispute had now gone to the United Nations. He denounced the Canal Users' Association as " provocative," called for a solution of the dispute by negotiation, and declared that economic sanctions against Egypt would not be tolerated by the Australian, British, or New Zealand Labour parties.

A solution of the Suez dispute, Dr. Evatt declared, could not be achieved by " gunboat diplomacy " but by round-table meetings and negotiation. He would like to see an experienced mediator appointed by the Security Council—either Dr. Hammarskjöld, the U.N. Secretary-General, or his predecessor, Mr. Trygve Lie. A " full-blooded programme of economic sanctions " against Egypt would bring hardship to great numbers of people in the Nile Valley and would be condemned by world opinion, by the Security Council, and by the General Assembly. The Australian Labour Party were not opposed to economic sanctions because they might be provocative ; they were opposed to them because they would mean war.

Dr. Evatt denounced the S C.U.A. as a " provocative " organization because, he alleged, it was designed to withhold Canal dues from Egypt and to make it impossible for the Egyptian Government to pass ships through the Canal. He also made a bitter attack on the Suez Canal Company, alleging that—with the exception of the British Government, which was a shareholder—it was controlled by private interests which had made " very substantial profits " over the years, and which included " international oil cartels " and " shipping combines which exploited Australia for so long."

Statements on Italian Attitude.

Following discussions between Signor Martino and Signor Segni (the Prime Minister) a semi-official statement was issued in Rome on September 26 expressing surprise at M. Pineau's remark that Italy's decision to continue paying Canal dues to Egypt under the existing Italo-Egyptian clearing agreement represented a " serious blow " to the Canal Users' Association.

The statement pointed out that it was important for Italy to be able to pay the dues to Egypt through the clearing because Italy was a creditor on the clearing account for 7,000,000,000 lire, so that in actual fact the dues were not a payment to Egypt but a partial refund of the debt owed to Italy. Although, after the nationalization of the Suez Canal, Egypt had requested that Italian ships should pay the dues in cash, the Italian Government had refused this as it did not wish to forego the advantages of the clearing agreement.

The statement also emphasized that Italy's attitude at the London conference had been influenced by her anxiety to avoid the danger of re-routing all Western maritime traffic round the Cape. In the first place, the Government had no legal means to compel Italian ships to follow that route ; secondly, such a diversion of Italian shipping would inflict grave economic damage to Italy.

Despite the Government's statement, Signor Martino's announcement that Italy would continue to pay Canal dues to Egypt instead of to the Users' Association was strongly criticized in the Italian Press, including such influential organs as the *Corriere della Sera* (Milan), *La Stampa* (Turin), and *Resto del Carlino* (Bologna).

The *Corriere della Sera* described the arguments put forward by Signor Martino as completely wrong juridically, pointing out that the Italo-Egyptian clearing agreement of Nov. 8, 1952, was only a contract between the two Governments which could in no way affect the relations between the Italian Government and the Suez Canal Company. If, in the past, the dues payable by Italian ships had been paid into the clearing account, this had been done with the Suez Canal Company's consent. But as such consent had been withdrawn following the nationalization of the Canal, there was no legal basis for continuing to pay the dues to Egypt, and if any court action were instituted by the Suez Canal Company the dues would undoubtedly have to be re-paid to it.

Apprehension was also expressed in the Italian Press about the effect Italy's attitude might have on the solidarity of NATO, in view of the resentment caused in Britain and France.

In reply to these criticisms, Signor Martino made a statement on the Government's policy (unanimously approved by the Cabinet) to both Houses of the Italian Parliament on Oct. 2.

After emphasizing that the Government had never allowed any doubt about its unconditional condemnation of the Egyptian decision which it regarded as a unilateral and completely unjustified breach of an international agreement, Signor Martino declared that from the beginning of the crisis the Government had regarded it as its duty to defend by its attitude the integrity of the Atlantic Alliance "None the less," he went on, "Italy has at the same time formally expressed her opinion that the use of force must be excluded in the efforts to restore the order violated by Egypt. In consequence, our action has been directed at finding, not a compromise between right and wrong, but a technical formula under a settlement which would offer to the users of the Canal the same guarantees as before—i.e freedom of transit for ships of all flags in peace and war, maintenance of the efficiency of the Canal, and the prohibition of any discrimination in tariffs, etc. With this aim Italy has adhered to the Dulles plan."

Dealing with what he called "criticism of the Italian Government's intervention in approaching Colonel Nasser direct" during the presence of the Menzies mission in Cairo, Signor Martino said that by drawing the Egyptian Government's attention to the gravity of the situation in the event of a rejection of the mission's proposals, Italy had "certainly not broken the solidarity of the Canal users and still less that of the Atlantic Powers, having acted in full agreement with the U.S., French, and British Governments, one of whom has even thanked the Italian Government for its initiative."

As regards the second London conference, the Italian Government had never failed to realize that the more countries adhered to the Canal Users' Association, the better the chances would be of efficacious sanctions against Egypt's violation of the 1888 Convention On the other hand, Italy had expressed to her Allies certain legal doubts concerning the exact interpretation of that Convention, and had also told them of her "perplexity, not as regards the setting up of the Association, but about the principal tasks which would be assigned to it initially."

The Canal Users' Association (Signor Martino continued) had now been set up, not as "a provocative association as it appeared to the Egyptian Government at a certain moment," but as an organ for the protection of user-interests and their rights under the 1888 Convention, and as an instrument for negotiation. The Italian delegation, he claimed, had contributed notably to this result "It has been said that Italy remains isolated," Signor Martino added, "but the contrary is the truth, since the great majority of the countries represented at London adhered to our thesis."

Signor Martino admitted that during the second London Conference a number of divergencies had arisen which could not be settled immediately. However, it had to be borne in mind that in an organism representing free nations agreement could only be reached through discussion, and that unanimity and "lightning decisions" were the methods of totalitarian organizations only. "An alliance, if it is to serve the common cause, must have the courage of criticism when necessary. Conformism is bad, and fidelity to one's Allies does not mean obedience to all their wishes." He added that it had become clear since Egypt's unilateral action that the instruments of political collaboration between members of NATO were quite insufficient, and that under the changed world conditions Western solidarity could only be made operative in all spheres and on all occasions if there were in future a "permanent organ of vigilance and political co-operation"

Turning to the question of Canal dues, Signor Martino denied that their payment through the existing Italo-Egyptian clearing constituted any legal recognition of the Egyptian nationalization of the Canal. The contrary was correct, as Italy had refused to agree to an Egyptian request for the adaptation of the clearing agreement to the new situation and for payment in cash to the new Canal Authority

After confirming that Italy had adhered without reservations to the S.C.U.A., Signor Martino pointed to the serious effects which any closure of the Canal would have for Italy, and said that the functioning of the Canal was "a vital necessity for all the Mediterranean countries, including the Arab countries" Egypt, he added, had everything to gain from a settlement which would guarantee the use of the Canal to all users in perpetuity, free from any political interference, and there was no wish anywhere to suppress any national rights of Egypt. Italy, however, had also the fullest comprehension for the attitude and interests of France and Britain, and the Government's policy aimed at combining Italy's national requirements with the defence of certain essential conditions for the Western countries without which there would be "a series of terrible crises in the West"

The Government statement was unanimously approved by the Senate on the same date.

Shipping on Suez Canal. - The Pilot Situation.

Colonel Yunis, the Director-General of the Egyptian Canal Authority, claimed on Sept. 18 that the "pilot crisis" had been overcome, and said that shipping was passing through the Suez Canal smoothly and without incident. Asked by press correspondents what would happen if the Canal Users' Association tried to send a ship through the Canal piloted by one of the former pilots of the Suez Canal Company, he replied only: "Let them try!" He added that the regulations of the Egyptian Authority laid down that "any ship wanting to pass must ask for a pilot from our organization."

Following the resignations of the non-European pilots formerly employed by the Suez Canal Company, which came into effect on Sept 15 (see pp. 15082-83), pilotage duties as from Sept. 16 were taken over by 35 Egyptian and seven Greek pilots employed by the Egyptian Authority. A total of 42 vessels were passed through the Canal on that date without incident, and 36 on the following day. During the subsequent fortnight the number of pilots was reinforced by newly-trained Egyptian personnel, 15 Soviet pilots, and four from Yugoslavia.

It was stated in Port Said on Oct. 7 that 140 pilots were available at that date to take ships through the Canal, with 20 more in the Port Said roads and another 62 in training—making a total of 222. With further Egyptian trainees becoming available, and recruitment from abroad, it was claimed that the Egyptian Authority would have 250 pilots at its disposal by the end of the year, sufficient to take 50 ships a day through the Suez Canal.—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Le Figaro, Paris - Corriere della Sera, Milan - La Stampa, Turin - Soviet Weekly - The Statesman, Calcutta - Indian High Commissioner's Office, London - Australian News and Information Bureau) **(Prev. rep. Suez Crisis, 15101 A.)**

A. INDIA. — Cabinet Changes. - New Ministries.

The following Cabinet changes and ministerial reorganizations came into effect on Sept. 1:

(*a*) Mr. T. T. Krishnamachari, Minister of Commerce and Industry and of the Iron and Steel Industry, took over the Finance portfolio from Mr. Nehru, who had held it since Sir Chintaman Deshmukh's resignation in July. Mr. Krishnamachari remained Minister for the Iron and Steel Industry.

(*b*) The Ministry of Commerce and Industry was divided into a Ministry of Heavy Industries and a Ministry of Commerce and Consumer Industries. Pandit Pant, the Home Minister, took over the Heavy Industries portfolio (retaining the Home Affairs portfolio), whilst Sardar Swaran Singh, Minister of Works, Housing, and Supply, took over in addition the Ministry of Commerce and Consumer Industries.

(*c*) Mr. D. P. Karmarkar (Minister of Trade) and Mr. N. Kanungo (Minister of Consumer Industries) were attached to the new Ministry of Commerce and Consumer Industries.

(*d*) Mr. M. M. Shah (Minister of Heavy Industries) was attached to the new Ministry of Heavy Industries.

The formation of a new Ministry for Community Development under Mr. Surendra Kumar Dey, hitherto Community Projects Administrator, was announced on Sept. 18. Mr. Dey will have Cabinet rank but will not be a member of the Cabinet.

It was officially explained that the creation of the new Ministry would involve no major change in the present organization of the Community Projects Administration, that the new Ministry would maintain full co-operation with the Ministry of Food and Agriculture and would use the resources of that Ministry whenever necessary, that Mr. A P. Jain, the Minister of Food and Agriculture, would be responsible for co-ordinating the work of the new Ministry with that of his own, and that the Central Committee for the Community Projects Administration would continue to function as hitherto.

Co-ordinated development programmes under Community Projects and the National Extension Service already cover 123,000 villages and a population of 80,000,000. It is proposed that the entire country should be served by the National Extension Service during the Second Five-Year Plan period through the creation of 3,800 additional development blocks, of which 1,120 would be converted into community development blocks. A total of Rs.2,000,000,000 (£150,000,000) is provided for community development

It was also announced on Sept. 18 that Mr. Shah Nawaz Khan (Parliamentary Secretary to the Minister for Transport) had been appointed Deputy Minister of Railways and Transport.—(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London) **(Prev. rep. Cabinet, 15035 A; Second Five-Year Plan, 15113 A; Community Projects, 14791 I.)**

A. UNITED KINGDOM.—Survey of National Income and Expenditure.

The Government's *Survey of National Income and Expenditure, 1956*, published on Aug. 20, disclosed that the U.K.'s gross domestic product in 1955 amounted to £16,639,000,000, compared with £8,743,000,000 in 1946, representing an increase of one-third in actual volume over the past decade. The increase in real terms in 1955 was 3½ per cent, as compared with 4½ per cent in 1954. Net income from abroad in 1955 totalled £145,000,000.

Incomes.

The Survey showed (*a*) that personal incomes (before deduction of tax) had risen by 79 per cent between 1946 and 1955; (*b*) that during the same period wages and salaries had both risen by 105 per cent to a total of £10,130,000,000; and (*c*) that income from rent, dividends and interest had risen by 42 per cent to £1,780,000,000. In the same ten-year period income from self-employment had risen by 50 per cent, and the total income of companies and public corporations had increased by 115 per cent. In 1955 wages rose by 9 per cent; income from rent, dividends and interest by 8½ per cent; salaries by 7 per cent; and income from self-employment by 4 per cent.

Salary-earners made up 16 per cent of the total labour force in 1948 and 19 per cent in 1955. Average annual salary earnings increased by 39 per cent in the years 1948-55, compared with an increase of 59 per cent in average annual wage earnings.

In 1955, 15,900,000 persons (counting husband and wife as one person) were in receipt of incomes of less than £500 per annum before tax; 8,850,000 received between £500 and £1,000 p.a.; 870,000 received between £1,000 and £1,500 p.a.; and 575,000 received more than £1,500 p.a. Five hundred persons received more than £6,000 p.a. after tax.

Expenditure.

Between 1946 and 1955 consumers' expenditure in real terms had increased by 19 per cent. The main increases were on private motoring and cycling (172 per cent); furniture and furnishings (116 per cent); and hardware, radio, and electrical goods (93 per cent). The principal decreases were in domestic service (36 per cent), cinema-going (29 per cent), tobacco (8 per cent), and railway travel (8 per cent). Expenditure on private motoring, in real terms, had increased by 27 per cent in 1955. Of every £ spent by consumers in 1955, 6s. 6d. went on food, 2s. 6d. on housing, fuel, and light, 2s. 0d. on clothing, 1s. 4d. on alcoholic drink, and 1s. 4d. on tobacco.

Current and capital expenditure by public authorities (central and local) totalled £6,200,000,000 in 1955, including £1,576,000,000 on defence, £1,015,000,000 on national insurance, pensions and other assurance, £764,000,000 on debt interest, £589,000,000 on education and child care, and £420,000,000 on housing.

Central Government expenditure, at £5,169,000,000, represented 30.8 per cent of the gross national product in 1955, compared with 31.4 per cent in 1954, 35 per cent in 1952, and 46.9 per cent in 1946.

Fixed Investment.

Between 1948 and 1955 fixed investment had increased from £1,435,000,000 to £2,865,000,000. Manufacturing industry accounted for 26 per cent of total fixed investment in 1955, and dwelling construction for 22 per cent.

As a percentage of the gross national product, gross fixed investment had increased from 13.8 in 1948 to 16 in 1954 and to 17.1 in 1955. Net fixed investment had risen from 5.6 per cent of the national income in 1948 to 7.7 per cent in 1954 and 8.6 per cent in 1955. At 1948 prices, net fixed investment was valued at £992,000,000 in 1955, compared with £885,000,000 in 1954 and £531,000,000 in 1948.

Details of net fixed investment by type of asset (for which official estimates were given for the first time in the 1956 *Survey*) were as follows in the period 1951-55:

	1951	1952	1953	1954	1955
		(£ million at 1948 prices)			
Plant and machinery ..	296	242	226	278	338
Vehicles, ships and aircraft	54	24	54	58	80
Dwellings .. .	138	197	307	327	291
Other	149	161	177	222	283

Savings and Investment.

Total net investment (i.e. net fixed investment, investment in stocks, and net investment abroad) was estimated at £1,504,000,000 in 1955, compared with £1,402,000,000 in 1954 and £845,000,000 in 1948. As a percentage of the national income, net investment fell from 8.9 in 1948 to 8.1 in 1951, but rose to 9.7 in 1954 and 9.9 in 1955.

Personal savings in 1955 amounted to about six per cent of personal income—a proportion substantially unchanged since 1952.—(Treasury Press Office) **(Prev. rep. 13922 C.)**

B. SOUTH CHINA SEA. — Territorial Disputes over Ownership of Nansha and Paracel Islands.

Señor Thomas Cloma, director of the Philippine Maritime Institute, laid claim on May 21 to the Nansha (Spratly) Islands, an uninhabited archipelago of islets, coral reefs and shoals in the South China Sea, between South Vietnam and the Philippine island of Palawan. He said that an expedition, led by himself, which visited the islands in March had been the first to discover, survey, or occupy them, and expressed the hope that the Philippine Government would officially sponsor his claim.

The Philippine Vice-President and Foreign Minister (Señor Garcia) stated on May 22 that Señor Cloma's expedition had been a private one, but added that he saw no reason why the islands should not belong to the Philippines "by virtue of occupation and proximity." The Chinese Nationalist Embassy in Manila, however, declared on the same date that the islands had belonged to China since the 15th century, and that any foreign claim to them infringed on Chinese territorial rights. A similar claim was made by the Chinese Communist Government on May 29.

On June 8 the South Vietnamese Foreign Minister (M. Vu Van-Mau) reiterated a claim—already put forward by the Vietnamese delegate at the San Francisco peace conference—to the Nansha as well as to the Paracel Islands farther north. The Paracels, which are equidistant from Vietnam and the Chinese island of Hainan, contain valuable phosphate deposits; the only inhabitants are some fishermen and a small South Vietnamese garrison which had taken over from the French in March 1956, after the withdrawal of the French Expeditionary Force from South Vietnam.

M. Vu Van-Mau claimed that the Paracels had formed part of the Empire of Annam since the early 19th century, and that the Nanshas had been attached to Cochin China since 1929. As Japan (which occupied both groups of islands from 1938-45) had restored them to France by the San Francisco peace treaty, French sovereignty over them had automatically reverted to South Vietnam.

The French Government subsequently recognized South Vietnam's claim to the Paracels, but maintained that Spratly Island (an outpost of the Nanshas) had not been included in the transfer and was still French territory.

A naval force from Formosa visited the Nanshas early in June and hoisted the Chinese Nationalist flag. Señor Cloma, however, returned to the islands shortly after, left 43 settlers, and removed the flag, a gesture which the Chinese Nationalist Embassy in Manila described as "a serious violation of sovereignty." An armed Chinese Nationalist force landed on Spratly Island on July 11, whilst on Aug. 27 a South Vietnamese force also landed, hoisted the national flag, and erected a mark claiming the islands. A strong protest was lodged by the Chinese Nationalist Chargé d'Affaires in Saigon on Sept. 1.

(Times - New York Times - Le Monde, Paris)

C. CHILE. — Cabinet Changes.

It was announced in Santiago on Aug. 27 (*a*) that Sr. Eduardo Urzúa (formerly Director-General of Taxes) and Sr. Alejandro Lazo (Vice-President of the *Banco del Estado*) had been appointed Ministers of Finance and National Economy respectively, succeeding Sr. Oscar Herrera Palacios, who had combined the two portfolios; (*b*) that Sr. Francisco Borquez had succeeded Sr. René Vidal Merino as Minister of Education; and (*c*) that Dr. Roberto Muñoz had replaced Sr. Alberto Araya Lampe as Minister of Health.

It was stated in the Press that Sr Herrera's resignation had been brought about by his objections to an announcement by the Minister of the Interior regarding the payment of a bonus to Government employees, and that the changes at the Ministries of Education and of Health had been made in order to bring back into the Government representatives of the Agrarian Labour Party, the main political group that supported President Ibañez in the 1952 elections. President Ibañez stated that the Cabinet reorganization would not affect the Government's economic and financial policies.

Sr. Osvaldo Sainte-Marie Sorucco (Minister of Mines) had been appointed Foreign Minister on May 24 in succession to Sr. Barbosa Balza.—(New York Times - Bank of London and South America) **(Prev. rep. 14676 B.)**

D. UNITED STATES.—Supreme Court Appointment.

Mr. William Brennan (50), Associate Justice of the New Jersey Supreme Court, was chosen by President Eisenhower on Sept. 29 as a Justice of the U.S. Supreme Court in succession to Justice Sherman Minton (65), who had announced his retirement three weeks earlier on grounds of ill-health. Justice Brennan is a lifelong Democrat and a Roman Catholic. Mr. Minton, Democratic Senator for Indiana from 1934-40, had been appointed to the Supreme Court by President Truman in 1949.—(New York Times) **(Prev. rep. 14050 A.)**

A. NICARAGUA. — Assassination of President Anastasio Somoza. - Election of President Luis Somoza.

General Anastasio Somoza (60), President of Nicaragua and virtual dictator of the country since 1935, died on Sept. 29 in hospital at Balboa (Panama Canal Zone) from gunshot wounds inflicted by an assassin on Sept. 21. While attending a reception at León (a town near Managua, the capital) on the latter date, President Somoza had been seriously wounded by four shots fired by a 27-year-old Nicaraguan, Rigoberto Lopez Perez, who was immediately killed by the Presidential guards. On the advice of U.S. specialists who flew to Managua on President Eisenhower's personal orders, President Somoza was flown to a U.S. military hospital in the Canal Zone for treatment, but died a week later.

A state of siege was proclaimed after the attack on President Somoza, constitutional guarantees suspended, and a number of Opposition leaders arrested, most of whom were subsequently released. It was stated in Managua that the assassin had recently returned to Nicaragua from El Salvador, where he was said to have associated with Nicaraguan political exiles.

Anastasio Somoza, born on Feb. 1, 1896, was the son of a wealthy landowner and grandson of Bernabe Somoza, who seized power by a military *coup d'état* in 1848. After a troubled period in the early 1930s, marked by chronic disorders and the landing of U.S. Marines to protect American lives and property, General Somoza (then Minister of War) seized power by a *coup* in 1935, was elected to the Presidency in the same year, and held office until 1947, when he was succeeded by Dr. Leonardo Arguello, one of his own nominees. President Arguello was overthrown within a short time by General Somoza, with whom he had quarrelled, and the latter then appointed one of his uncles, Señor Roman y Reyes, as nominal President. General Somoza again assumed the presidency in 1950, on the death of President Roman y Reyes, and was re-elected for a six-year term in 1951.

During the latter years of his life President Somoza was engaged in a bitter feud with the President of Costa Rica, Señor José Figueres, culminating in 1955 in a series of frontier clashes which were terminated in about three weeks through the efforts of the Association of American States.

Colonel Luis Anastasio Somoza (33), son of the late President, was elected President of Nicaragua by the National Assembly on Sept. 29, the voting being unanimous He was installed until May 1, 1957, when his father's term would have expired.

President Luis Somoza was head of the Nicaraguan National Guard at the time of his election to the presidency, and has served as President of the Chamber of Deputies and head of the Social Security Administration. From 1936-45 he studied in the U.S.A., first at La Salle Military Academy and subsequently at the University of California, where he graduated in agricultural engineering He owns extensive cattle-ranching, sugar-growing, and other interests.

The Nicaraguan Constitution (which makes no provision for a Vice-President) had been amended in 1955 to allow a second re-election of a President, and to eliminate the former ban on the election of a new President within four degrees of blood relationship to an outgoing holder of the office. Owing to the removal of that ban, Colonel Luis Somoza was legally able to succeed his father as President of Nicaragua.—(New York Times - New York Herald Tribune) **(Prev. rep. 10889 B.)**

B. INDIA. — Akali Sikhs join Congress Party.

A convention of the *Shromani Akali Dal* (the Sikh organization), held at Amritsar on Oct. 2 under the chairmanship of Master Tara Singh, unanimously decided that it was " desirable that the *Dal* should again repose confidence in the Congress and its leaders so far as its political programme is concerned." Its members were accordingly advised to join the Congress Party, with which the *Dal* had co-operated until 1950. The resolution was taken after a report by Master Tara Singh on his earlier discussions with Mr. Nehru and other Congress leaders.

The resolution stated that although the regional formula adopted for the Punjab in the States Reorganization Act fell short of Sikh demands, the *Akali Dal* had accepted it " in the larger interests of the country." After referring to the dangers inherent in attempts of the Hindu *Mahasabha*, the *Jan Sangh*, and the *Maha Punjab Samiti* to wreck the regional formula, the resolution declared that the " only other body in the field which desires to see this formula work successfully is the Congress." The Akali members of the Punjab and PEPSU Legislative Assemblies, and the three Akali representatives in the Central Parliament, were formally asked to join the Congress parliamentary parties.

It was stated in the Indian Press that the total membership of the *Akali Dal* exceeded 400,000 distributed throughout India, the majority living in the Punjab and PEPSU.—(The Statesman, Calcutta - The Hindu, Madras - Indian High Commissioner's Office, London) **(Prev. rep. 14866 A.)**

C. ATOMIC PHYSICS. — The Anti-Neutron.

The discovery of the anti-neutron, a new and hitherto unknown particle with the property of destroying matter in the ordinary state, was announced by the University of California on Sept. 14 as a result of six months' experiments carried out by a team of physicists with the Bevatron (the world's largest atom-smasher). It was stated that the most striking property of the anti-neutron was that, when it came close to an ordinary neutron in the heart of an atom, the two particles annihilated each other. At the moment of annihilation the particles released several hundred times more energy than that produced in the reaction of a hydrogen bomb.

The discovery was made by Dr Bruce Cork. Dr. Oreste Piccione, Dr. Glen R. Lambertson, and Dr. William Wenzel, working as a team under Dr. Edward Lofgren, who is in charge of the University of California's Bevatron. Professor Ernest O. Lawrence (Director of the University's Radiation Laboratory, and inventor of the original Cyclotron) said that the discovery had as yet no practical application, and that " the value of this work lies in expanding our understanding of the nature of matter." It was pointed out by other scientists, however, that when uranium atoms were first split by ordinary neutrons many years ago, no practical application was immediately foreseen, though eventually it led to the creation of the atomic bomb and to the harnessing of atomic energy for power.

The existence of " anti-matter " particles (i.e. particles whose physical properties are directly opposite to those of known matter) had been postulated by physicists for many years but had never hitherto received actual confirmation.
(New York Times) **(Prev. rep. 14960 B ; 14749 D.)**

Note. Neutrons and protons are the two particles making up the nuclei of atoms, protons carrying a positive electric charge and neutrons having no charge. The discovery of the anti-neutron, following closely upon the discovery of the anti-proton (see 14749 D), means that four atomic particles are now known to science.

D. ITALY - SWITZERLAND. — Preliminary Agreement on Great St. Bernard Road Tunnel Project.

An agreement was signed in Turin on Sept. 1 between Italian and Swiss financial groups, providing for the construction of a road tunnel linking the two countries under the Great St. Bernard Pass. The tunnel will be 5.8 kilometres (6,430 yards) long and will make possible an all-the-year-round road connexion between Martigny (Upper Rhône valley) and Aosta. In addition to the boring operations, the project will necessitate extensive improvement and widening of the approach roads, and protective measures against avalanches. The total cost of the scheme was estimated at 43,750,000 Swiss francs.

The agreement provided for the formation of a limited company whose capital of 15,000,000 Swiss francs would be taken over in equal shares by the Italian and the Swiss syndicates [two-thirds of the Italian share have already been subscribed by the Fiat Motor Works in Turin] The remaining 28,750,000 Swiss francs required for the cost of construction would be raised by a loan in Switzerland, where the sponsors include the City of Lausanne and the Canton of Valais.

The agreement is subject to approval by the two Governments.—(La Stampa, Turin - Neue Zurcher Zeitung)
(Prev. rep. Mont Blanc Tunnel, 13783 C.)

E. RELIGIOUS LIFE. — Roman Catholic Church. - Beatification of Pope Innocent XI.

Pope Innocent XI, the 17th-century Pontiff who helped to save European Christendom from the Turkish invasion, was beatified at a ceremony at St. Peter's on Oct. 7 attended by 16 Cardinals and 100 Archbishops and Bishops of the Roman Catholic Church.

In a broadcast from Castelgandolfo, Pope Pius XII described Innocent XI as " one of the most outstanding Popes of the Roman Church " He said that the beatification of Innocent XI, nearly three centuries after his death, " should not only render historical justice to a Pontiff who deserved particularly well of the Church and of Europe but also point out the paths of security, peace, and reform to the present age—an age which, like his own, is marked by an urgent need for spiritual rebirth, by the gravity and vital nature of its disputes, and by enormous dangers which threaten all."

Innocent XI (Benedetto Odescalchi), who occupied the Papal throne from 1676-1689, took the lead in forming a coalition of European nations to resist the Turkish invasion, which was driven back after reaching the gates of Vienna.
(Catholic Times) **(Prev. rep. 13622 A.)**

F. BECHUANALAND. — Seretse Khama returns to Serowe.

Seretse Khama returned on Oct. 11 to Serowe (the tribal capital of the Bamangwato) after six years' exile in England. He was enthusiastically welcomed by large numbers of tribesmen. His wife and two children will join him later.—(Times)
(Prev. rep. 15117 A.)

A. ATOMIC ENERGY.—Extension of Anglo-U.S. and U.S.-Canadian Co-operation Agreements. - Tripartite U.K.-U.S.-Canadian Agreement on Atomic Patents. - U.S. "Atoms-for-Peace" Agreements.

A number of important agreements concerning exchanges of information on atomic energy, and other related matters, were signed in the last few months and are summarized below.

Supplementary Anglo-American Agreement.

An agreement was signed in Washington on June 14 by the chairman of the U.S. Atomic Energy Commission (Rear-Admiral Strauss) and the British Ambassador (Sir Roger Makins) broadening the scope of the Anglo-American Atomic Co-operation Agreement of 1955 (see 14360 A) by providing:

(1) That Britain would send to the U.S.A. "depleted" uranium (i.e. uranium containing less than 0.7 per cent of fissionable U-235) for re-processing into usable atomic fuel. In exchange, the U.S.A. would send to Britain equivalent quantities of enriched uranium.

(2) That the U.K. and the U.S.A. would exchange information on "military package power reactors and other military power reactors for the propulsion of naval vessels, aircraft, and land vehicles."

It was pointed out in the British and U.S. press that the agreement implied that Britain would profit from U.S. experience in the building of nuclear-powered submarines. It was also pointed out that the U.S.A., in turn, was expected to benefit from British advances in using nuclear energy for the generation of electric power and in other ways.

Supplementary U.S.-Canadian Agreement.

A U.S.-Canadian agreement, supplementing that concluded in June 1955, was signed on June 28.

Similar to the U.S.-British agreement, it extended the mutual exchange of information to cover such military uses of nuclear power as atomic propulsion for ships, aircraft, and land vessels.

Canadian-U.S.-U.K. Agreement on Atomic Patents.

It was announced on Sept. 24 that the British, Canadian, and U.S. Governments had signed an agreement to interchange "rights in inventions and discoveries in the atomic energy field on which patents were held or applied for by one Government in one or both of the other countries on Nov. 15, 1955."

The U.K. Atomic Energy Authority explained that the purpose of the tripartite agreement was to allow internal use of the inventions in each country by Government and industry without interference of the other Governments. This would be done by a "cross-assignment" of rights, under which each Government assigned to the others the rights, title and interests owned by it in the other countries. Each assigning Government would retain a non-exclusive, irrevocable, paid-up licence of each invention for its own purposes and for purposes of mutual defence. The exchange gave full rights to each Government in its own country and permitted it to grant licences to industry in accordance with national policy. A non-discrimination clause in the agreement bound each Government to grant licences to nationals of the other Governments on the same terms as to its own nationals.

The agreement was expected to be of particular benefit to the growing private atomic energy industries in each of the signatory countries by avoiding questions of patent infringement Firms engaging in home manufacture would need licences only from their own Governments, whilst firms of one country engaging in business in one or both of the other countries could not be discriminated against by the Governments of those countries.

It was also pointed out that the patents or patent applications falling under the agreement were made up of (i) inventions which had arisen out of wartime collaboration among the three Governments (known as Combined Policy Committees inventions); (ii) inventions which, though within the co-operative arrangement, had been developed independently and were owned by one Government only. "CPC" inventions totalled about 50, whilst the number of patents or applications relating to work carried on independently of the wartime co-operative arrangement amounted to several hundred.

Finally, it was stated that the agreement did not commit the three Governments for the future, and would not affect inventions utilizing information communicated under the U K.-U S. Atomic Energy Co-operation Agreement of June 15, 1955.

U.S. "Atoms-for-Peace" Agreements.

The following agreements on the development of peaceful uses of atomic energy were signed by the U.S.A.:

Australia. This agreement, announced in Canberra on June 20, differed from the "atoms-for-peace" agreements signed by the U S.A. with 27 other countries in that Australia became the fourth country (after Britain, Canada and Belgium) to share in classified information on atomic energy. Valid for ten years, it provided that Australia would obtain from the U.S.A. information on the design and construction of power reactors; information on the production and refining of uranium and thorium; and up to 500 kilograms of enriched uranium when required for research purposes or for power reactors.

Most of the Uranium-235 would be enriched up to 20 per cent, but up to six kilograms of 90 per cent enriched material might be obtained by Australia for a material-testing reactor, the U.S.A. retaining the right to inspect its use for strictly non-military purposes. The agreement—which excluded all military matters—was not limited to the two Governments but covered dealings by private firms and semi-official bodies. In addition, it enabled Australian scientists to visit research establishments in the United States.

Belgium. The U.S.-Belgian agreement (July 12) expanded the co-operation between the two countries beyond the scope of their agreement of June 1955 (see 14360 A), as follows: (1) Belgium would receive eight kilograms of uranium enriched up to 90 per cent for use in the Belgian Government's high-flux material-testing reactor, which is under construction; (2) the spent fuel could be re-processed by Belgium herself, subject to approval of the regeneration facilities by the U.S. Atomic Energy Commission; (3) the field of restricted and confidential information which Belgium could obtain from the U.S.A. would be extended, and would now include techniques for the extraction and preparation of uranium and thorium [thus facilitating the processing by Belgium herself of natural uranium from the Belgian Congo] and also operational techniques of experimental reactors and nuclear power stations. The rights given to Belgium were wider than those accorded by the U.S.A. to any other European country except Great Britain.

An important innovation was a provision that Belgium, if she so desired, might transfer her rights and obligations under the agreement to an "interested group of nations." This was taken to mean that the U.S.A. would be willing to allow confidential information disclosed to Belgium to be passed on to the six-nation "Euratom" organization now under discussion by the members of the European Coal and Steel Community—France, Italy, Western Germany, and the Benelux countries.

France. The Franco-American agreement (June 19) provided: (1) the amount of Uranium-235 available to France from the U.S A. would be raised from six to 10 kilograms under an earlier bilateral agreement to 40 kilograms, some of which would be enriched to 90 per cent, but most to 20 per cent; (2) the uranium supplied by the U.S.A. could be utilized not only for research purposes, as hitherto, but also for prototype reactors for the production of electricity, whilst the 90 per cent enriched uranium would be destined for a material-testing reactor; (3) the U.S. Atomic Energy Commission and the French *Commissariat a l'énergie atomique* would exchange information on techniques, reactors, safety measures, etc., involving French access to U.S. inventions and vice versa, and covering *inter alia* the use of isotopes in agriculture, medicine, and biological research; (4) in addition to Uranium-235, France would also obtain certain quantities —"of the order of grammes"—of U-233 and plutonium for research purposes.

It was pointed out in the French press that France's requirements of natural uranium were covered from her own resources, but that she was not at present producing Uranium-235.

Irish Republic. Like the other "atoms-for-peace" agreements, that signed with the Irish Republic (March 16) provided for U.S. supplies of enriched uranium (13 lb.), the purchase of reactors in the U.S.A., and the provision by the U.S.A. of a certain amount of unclassified technical information.

Netherlands. Under an agreement signed in June, the Netherlands will receive a maximum of 500 kilograms of U-235 from the U.S.A. for the development of her atomic energy programme, as well as non-classified information and nuclear materials such as heavy water and graphite.

New Zealand. The U.S.-New Zealand agreement (June 14) contained the following provisions: (1) The N Z. Government would receive information on the design, construction, and operation of research reactors; (2) private organizations in the U.S.A. would supply to the N.Z. Government, or authorized persons under its jurisdiction, appropriate equipment and services; (3) unclassified information would be exchanged on research reactors, health and safety problems, and uses of isotopes in agriculture, industry, medicine, and biology, (4) the U.S. Atomic Energy Commission, on request, would relase to New Zealand (for use in a research reactor) up to six kilograms of U-235, enriched up to 20 per cent.

Siam. The U.S.-Siamese agreement (March 13) contained the customary provisions for co-operation in the peaceful uses of nuclear energy. In addition, it provided for U.S. aid in the construction of a Siamese experimental reactor, for the provision of a U.S. "atomic library," and for the services of a U.S. expert to help in the training of Siamese atomic scientists.

Switzerland. The U.S.-Swiss agreement (June 21) provided, similarly to the U.S.-Australian agreement (see above), that Switzerland would receive from the U.S.A. up to 500 kilograms of Uranium-235 for universities, research establishments, and private industry, as well as atomic equipment normally regarded as "classified." The uranium would be mostly enriched up to 20 per cent, but up to six kilograms of 90 per cent enriched uranium might be obtained for use in a material-testing reactor The exchange of information and experience were also covered. The agreement was valid for 10 years but could be terminated by either party after five years.

The utilization by universities or private firms of the fissionable material provided under the agreement will be controlled by a joint committee of Swiss and U.S. experts—the first occasion that Switzerland had permitted any form of foreign supervision in her territory. The Swiss Government emphasized, however, in a statement on Aug. 21 that this supervision in no way infringed Swiss sovereignty as it was based on mutual rights and obligations, and that the agreement, being of a non-military character, fully conformed to Switzerland's neutrality policy.

(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Montreal Star - Le Monde, Paris - Australian News and Information Bureau - New Zealand Dept. of External Affairs - Irish Times, Dublin - Netherlands News Agency - Neue Zurcher Zeitung) **(Prev. rep. U.K.-U.S.-Canadian Atomic Co-operation Agreements, 14360 A; U.K. Atomic Patents, 14928 A; U.S. "Atoms-for-Peace" Agreements, 14360 A; 14765 A.)**

A. BRAZIL. — Economic Development.

Recent important developments in the expansion of Brazil's economic and industrial potential are summarized below under cross-headings :

Creation of Council of Development. A decree creating a Council of Development was signed on Feb. 1, 1956, by President Kubitschek, its principal provisions being as follows .

(1) The Council of Development would consist of the Ministers of State, the Chiefs of the Military and Civil Cabinet of the Presidency, the President of the National Bank of Brazil, and the President of the National Bank for Economic Development (see 13024 D)

(2) In collaboration with the National Economic Council, the Council of Development would (*a*) study measures necessary to promote Brazil's economic development ; (*b*) draw up programmes " to increase the efficiency and activities of the Government and to promote private initiative " ; (*c*) " study changes in different sectors of the economy " ; (*d*) analyse statistical reports ; (*e*) " set up projects . . . and keep itself informed on the implementation of measures already approved."

(3) The Council would organize working groups for special economic studies, headed by civil servants or other "persons of recognized competence"

Development of Automobile Industry. A decree of June 16, 1956, set up a new organization, the Automobile Industrial Executive Group (GEIA), to regulate the conditions which should govern the development of an automobile industry in Brazil. The GEIA is headed by the Minister of Transport and is directly dependent on the new Development Council (see above). It will draw up plans for the production of motor vehicles ; negotiate and approve proposals relating to the industry ; and deal with all questions relating to finance, Customs tariffs, import categories, labour materials, and other aspects of the industry.

It was reported during the same month that General Motors (the U.S. company) was studying the possibility of producing motor-vehicles in Brazil under the general conditions offered by the Brazilian Government, and contemplated the erection of a factory at São José dos Campos (São Paulo State) to produce 100,000 vehicles a year by 1963.

Steel Production. - The Volta Redonda Plant. An official report issued in February last stated that the Volta Redonda steel plant (see 9753 C, 8202 G, 8021 B) had completed the first phase of its expansion plan and would be in full production during the present year, when all its new machinery would be in operation Studies on the second expansion programme, designed to raise the plant's annual steel production to 1,000,000 tons, were well advanced, and the loan from the U S. Export-Import Bank [see below] would supply the *Cia Siderurgica Nacional* with the foreign currency necessary to procure equipment.

The *Cia. Siderurgica Nacional*, which operates the steel plant at Volta Redonda (the biggest in Latin America), issued the following figures showing production at Volta Redonda during the past four years .

Products.	1952	1953	1954	1955
		(thousand metric tons)		
Coke	300	332	457	481
Pig-iron . .	359	370	438	498
Steel ingots	476	482	588	666
Rolled steel products ..	360	375	419	513

The output of rolled steel products in 1955 comprised rails and accessories (81,000 tons), rods and other sections (83,000 tons), heavy plates (75,000 tons), hot rolled sheet (114,000 tons), cold rolled sheet (110,000 tons), galvanized sheet (13,000 tons), and tinplate (38,000 tons).

During a visit to Brazil, the U.S. Vice-President (Mr. Nixon) announced on Feb 3, 1956, that the Export-Import Bank had granted a loan of $35,000,000 to the *Cia. Siderurgica Nacional* to enable the output of steel ingots at the Volta Redonda plant to be raised to 1,000,000 tons annually. Two earlier loans, of $45,000,000 and $25,000,000 respectively, had been made by the Export-Import Bank to the C.S N. in 1950 and 1951.

Industrial Development. During the past 12 months a number of new industries have been established in Brazil by foreign companies—American, British, French, German, and others—with the co-operation of the Brazilian Government. [Joint Brazilian-French, Brazilian-German, and Brazilian-U S. development commissions had been established in 1953-54 to promote the country's industrial development and attract foreign capital—see 13568 C, 13216 A, 13024 A]. Some of the largest of these enterprises are described below :

(1) A long-range programme designed to expand heavy industry was begun in February last by the (German) Krupp Company, which had acquired a site for factory development at Campo Olivio (São Paulo State) under a contract signed with the Brazilian Government at the end of 1954. The programme will be carried out in four stages spread over several years, comprising (i) the manufacture of all types of locomotives (steam, diesel, and electric), together with spare parts ; (ii) the manufacture of trucks (lorries) and spare parts for automobile equipment ; (iii) production of harbour and dockside equipment such as cranes, winches, etc. ; (iv) the building-up of a construction industry, including mining machinery, cement plants, stone-crushing equipment, mechanical earth-moving equipment, farm machinery, tractors, etc. The project as a whole will involve investment by the Krupp group of about $25,000,000 spread over a five-year period. The programme is designed to give not only Brazil, but the whole of Latin America, the necessary heavy-industry basis for supplying materials to the transportation, building, and constructional industries Sufficient production is planned to serve the export market as well as to satisfy Brazil's internal requirements.

(2) Plans to establish a plastics industry in Brazil by two U.S. firms—the Union Carbide & Carbon Corporation and W. R. Grace & Company—were announced in February last Union Carbide will construct a factory at Cubatão (near Santos, in São Paulo State) to supply sufficient polyethylene " to satisfy completely the most optimistic estimates " of Brazilian needs for the next ten years. The plant will be adjacent to the ethylene unit of *Petrobras* (the Brazilian Government's Petroleum Authority), with whom Union Carbide have signed a contract. W. R Grace & Co., in collaboration with a German firm (Farbwerke Hoechst A. G , of Frankfurt), will produce a new type of polyethylene developed by the German company in a new plant to be constructed in Brazil.

(3) A factory for the manufacture of boilers and other heavy equipment, established by the British firm of Babcock & Wilcox (Renfrew), went into production during the summer of 1956 Situated on a 128-acre site at Rezende, about midway between Rio de Janeiro and São Paulo, it will manufacture boilers up to medium size, together with a considerable amount of heavy equipment and special machinery for oil-refinery work. It is staffed almost entirely by local labour.

U.S. Loans for Industrial Development. In addition to the $35,000,000 loan for the Volta Redonda steel plant (see above), it was announced in Washington on July 30 that the Export-Import Bank had agreed to make a loan of $151,000,000 for Brazilian economic development generally, divided as follows : $100,000,000 for the purchase of U.S. equipment for Brazil's Federal and State-owned railways , $25,000,000 for port and dredging equipment ; $15,000,000 for the expansion of the Paulo Afonso hydro-electric project (see below) , and $11,400,000 for the expansion of another power project at Itutinga.

The loan was negotiated by Mr. Samuel Waugh, chairman of the Export-Import Bank, and Dr. Lucas Lopes, president of the Brazilian National Bank for Economic Development. It was understood that it had been discussed by President Eisenhower and President Kubitschek at the recent meeting of American Presidents at Panama City (see 15036 A).

The Paulo Afonso Project.

The Paulo Afonso hydro-electric project, referred to above, is the largest of its kind in Latin America and one of the largest in the world. When in full operation it will bring power to an area of north-eastern Brazil twice the size of France, and containing 15 per cent of Brazil's population.

The project, which was officially inaugurated in September 1954, is based on the harnessing of the water-power of the Rio São Francisco (San Francisco River), which runs through six Brazilian States and has a potential of more than 4,000,000 h.p. Four hydro-electric plants are under construction in the São Francisco Valley, the largest being situated at Paulo Afonso Falls, where the river drops nearly 300 feet in its journey from the tableland to the sea From Paulo Afonso, the hub of the project, a series of high-tension power lines will radiate to over 200 cities and towns in the five States which the project is designed to serve (Bahia, Pernambuco, Alagoas, Sergipe, and Paraíba), and, in particular, to the State capitals—respectively Salvador (Bahia), Recife (Pernambuco,) Maceió, Aracaju, and João Pessoa. About 60,000 kw. of energy will be provided at the outset, to be stepped up over a period of years until a final potential of 950,000 kw. is obtained, thereby doubling the supply of electric power in the five States concerned

The hydro-electric scheme forms part of a much larger overall plan for the development of the entire São Francisco Valley between the middle reaches of the river and the sea. In addition to the construction of power stations, the plan comprises 12 regional irrigation schemes, the laying-out of 10 airfields, the building of 11 major highways leading into and out of the Valley, the deepening of the river for navigational purposes, improvements to 27 river ports, and the construction of 33 hospitals, in addition to many schools, health centres, and other institutions.

The area covered by the plan includes some of the world's largest resources of iron-ore, manganese, quartz, mica, diamonds, nickel, and copper, in addition to large resources of phosphates, petroleum, and uranium. The extensive vegetable resources of the area, both in cultivation and in a wild state, include oilseeds, tobacco, cocoa, and vegetable fibres.

Extensive preparatory work was undertaken in the São Francisco Valley before the plan was launched, including the systematic mapping of the river valley and its tributaries by aerial photography, and a large-scale campaign to eradicate malarial mosquitos from areas previously infested by them.

The project is being carried out by a company—the São Francisco Valley Company—set up by the Brazilian Government with a capitalization of $20,000,000, shared by the Government and private investors. In addition to Government and private investment, and assistance from the U.S. Export-Import Bank, one per cent of Brazil's tax revenues for the next 20 years is earmarked for work on the project. (Brazilian Government Bulletins - Bank of London and South America) **(Prev. rep. Five-Year Plan, 14704 B ; Uranium Production, 13710 B ; Steel Industry, 9753 C.)**

A. UNITED KINGDOM. — Electricity Industry. - Report and Accounts of Central Electricity Authority, 1955-56. - Net Surplus of £12,000,000. - Agreement on Linking of British and French Electricity Grids.

The report and accounts of the Central Electricity Authority for the year ended March 31, 1956 were published on Sept. 26. They showed that the Authority itself and the 12 Area Boards had earned a combined surplus of £12,212,242 (compared with a combined surplus of £18,794,478 in the year ended March 31, 1955), bringing the aggregate surplus earned by the Authority since Vesting Day (before transfers to Reserve) to £70,740,000. For the first time the accounts did not include the results of the former South-East Scotland and South-West Scotland Area Boards, now replaced by the autonomous South of Scotland Electricity Board (see 14016 C).

The combined revenue of the Authority and the Area Boards amounted to £380,460,000 (against £365,700,000 in 1954-55), and combined expenditure to £328,300,000 (£311,250,000 in 1954-55), leaving a trading surplus of £52,100,000. The combined net surplus of £12,212,242 shown above was arrived at after deducting £39,900,000 for interest, and included about £6,900,000 earned by the Central Authority itself and £5,300,000 earned by the Area Boards as a whole. Two Area Boards, the South Wales and Yorkshire, incurred deficits during the year.

Salient points from the report are summarized below:

Revenue and Expenditure. Of the combined revenue, £309,900,000 came from the sale of electricity and £10,600,000 from other sources, including the sale or hire of meters and appliances. The principal item of expenditure was generation and purchase of electricity (£182,200,000).

Consumers and Sales. The number of consumers increased during the year by 443,000 to 14,146,585. Sales of electricity totalled over 63,000,000,000 units, or 9.4 per cent more than in 1954-55. The largest percentage increase (11.7) was again in electricity sold to farms, followed by domestic consumption (11 0), commercial consumption (9 8), consumption by industry (8.8), combined domestic and commercial consumption (8.4), public lighting (8 1), and consumption by railways (2.7). Consumption by tramcars and trolley buses declined by 4 7 per cent. Over half the sales during 1955-56 (32,431,000,000 units) were to industry, three-tenths (18,892,000,000 units) to domestic consumers, and one-eighth (8,063,000,000 units) to commercial consumers.

Prices. The average price received for electricity sold for all purposes in 1955-56 was 1 403d. per unit, or 2.3 per cent above the 1954-55 figure and 32 per cent above the figure for 1937-38. The report pointed out that the increase over pre-war prices was "very much less than the price increases for practically all other commodities and services, and far below the increases borne by the Authority and the Area Boards for plant and equipment, civil engineering works, buildings, coal, material, goods, and services."

Generating Plant and Thermal Efficiency. At March 31, 1956, the Authority owned 274 power stations. Although the number of stations had been reduced since 1954-55 by the elimination of certain smaller stations, new plant brought into service during 1955-56 provided a record additional output capacity of 1,600,000 kw., and it was planned to raise total generating capacity from the existing level of 18,800,000 kw. to 27,200,000 kw by 1961.

Although 9.4 per cent more electricity was generated in 1955-56 than in 1954-55, owing to improved efficiency coal consumption rose by only 6.6 per cent. The report stated that thermal efficiency had improved steadily from 20.91 per cent in 1947-48 (the year before nationalization) to 23.85 per cent in 1954-55 and 24.35 per cent in 1955-56, the improvement in 1955-56 over 1954-55 representing a saving of 900,000 tons of coal, or £3,200,000.

Conversion of Power Stations to Oil Burning. Arrangements had now been completed for the supply of heavy fuel oil to 17 power stations, with a total potential consumption of about 5,700,000 tons of oil per year, equivalent to about 9,000,000 tons of coal.

Capital Investment. Investment in fixed assets during 1955-56 totalled just over £213,000,000. The Authority estimated that at least a similar amount would be required in 1956-57 for the proper development of the electricity system. However, in order to keep within the figure of £195,000,000 finally sanctioned by the Minister of Fuel and Power, work on the construction of some power stations had been postponed, thus considerably reducing the amount of plant which could be brought into operation in 1958.

The report pointed out that the combined net surplus of £12,200,000 of the Authority and the Area Boards represented only about 0.6 per cent on the £1,885,000,000 invested by the Authority in fixed assets.

Lord Citrine, chairman of the C.E.A., announced on the same day (Sept. 26) that the Authority would receive tenders on Oct. 1 for the construction of the first two nuclear power stations at Bradwell (Essex) and Berkeley (Gloucestershire). It was hoped that contracts would be given out before the end of the year and that work on the two stations would start early in 1957.

Lord Citrine stated that a generating capacity of about 200,000 kw. was envisaged for these stations, but it seemed probable that the power output of reactors of a given size might be doubled or even trebled within a comparatively short time. "It must not be assumed from this," he added, "that the stations at Bradwell and Berkeley will necessarily be increased in capacity, but more powerful reactors will certainly be available in connexion with the planning and design of future stations . . . It is impossible to predict if or how the nuclear power programme may be modified within the next two decades. What is certain is that nuclear power will make an increasing contribution to the national power requirements in supplementation of the power generated in the Authority's other stations."

Lord Citrine also announced that it was "highly probable" that in the near future the Authority would be inviting tenders from three firms in the U.S.A. for the supply of large transformers. This would be the first occasion on which it had invited tenders from outside the United Kingdom.

Referring to the electricity "price freeze" announced in June (see 14930 C), Lord Citrine said that all 12 Area Boards had responded to the Authority's request that they should not increase their prices before March 31, 1957, athough this had meant straining their finances and, in the case of some Boards, incurring deficits. No deficit was anticipated during the current year for the industry as a whole, but no decision could yet be taken as to possible increases in tariffs after the "price freeze" expired on March 31 next.

Linking of British and French Electricity Grids.

It was jointly announced on Sept. 5 by the Central Electricity Authority and the French nationalized electricity undertaking (*Electricité de France*) that agreement had been reached on the linking of the British and French electricity grids by a submarine power cable across the Straits of Dover. Work on the project would begin in 1957, and the linking of the two grids was expected to be completed in 1960 at a cost of about £4,000,000, to be shared between the C.E.A. and *Electricité de France*. The installation would have a load capacity of between 120,000 and 150,000 kilowatts of direct current at 200,000 volts.

A preliminary study of the scheme had been set on foot after the war, but was dropped owing to technical difficulties. The project again came under consideration in 1951, when it was established that the peak loads in Britain and France occurred at such different times that an interconnexion would be justified. The original proposal was for transmission of about 150,000 kilowatts at 132,000 volts by alternating current, which would have involved the laying of four submarine cables. Ultimately, however, the proposed alternating-current system was dropped in favour of direct-current transmission as a result of new technical developments, and in view of the success of a 100,000-volt link between Sweden and the island of Gotland, which was opened in 1955. In view of these and other considerations, it was finally agreed that a single direct-current cable would be equal to an alternating-current connexion using four separate cables.

It was explained that the link, when completed, would make it possible for Britain to obtain additional power to meet peak demands at times when French generating equipment was not working at full capacity. In the same way, because of the differences in the times of the peak loads in the two countries, Britain could transmit power to France when French demands were heaviest.—(Times - Daily Telegraph - Manchester Guardian - Financial Times - Le Monde, Paris) **(Prev. rep. 14483 A; Atomic Power Stations, 14928 A; Price Stabilization, 14930 C; Capital Expenditure Cuts, 14705 A; U.K.-French Electricity Link, 12355 B.)**

B. JAPAN - BOLIVIA. — Immigration Agreement.

An agreement on the immigration of Japanese nationals into Bolivia, the first of its kind to be concluded by Japan, was signed in La Paz on Aug. 2.

Under the agreement the Bolivian Government will permit a maximum of 1,000 Japanese families, or 6,000 persons, to settle in Bolivia during the next five years to engage in agricultural development. The Japanese immigrants will not only be granted State lands without payment but will also receive various forms of assistance, and enjoy the same social security and labour benefits as Bolivian nationals Japanese doctors, veterinary surgeons, agricultural and industrial experts, and entrepreneurs will be included among the settlers, in order to maintain health and technical services and help the development of industries in the settlement areas.

At present there are about 1,600 Japanese nationals in Bolivia, of whom 70 per cent are engaged in small businesses in La Paz, 20 per cent in farming, eight per cent in industry, and two per cent in other occupations.
(Japanese Embassy, Press Office, London) **(Prev. rep. 13776 A.)**

C. MOROCCO. — First Ambassador to Britain.

The appointment of Prince Moulay Hassan Ben-el Mehdi Alaoui as the first Moroccan Ambassador to Great Britain was announced on Oct. 9. Prince Moulay Hassan is a second cousin of the Sultan of Morocco, and served as the Sultan's representative at Tetuan until the recent integration of the Spanish Zone into the Sherifian dominions.—(Times - Le Monde, Paris)
(Prev. rep. 14946 A.)

A. RHODESIA AND NYASALAND FEDERATION. — The Kariba Scheme. - Main Contracts secured by Italian Firms. - Further Loan Agreements.

The Federal Power Board of Rhodesia and Nyasaland announced on July 15 that a contract worth over £25,000,000 for the main civil engineering work in connexion with the Kariba project, including the building of a dam-wall 400 feet high for the first stage of the scheme, had been awarded to an Italian firm, Impresit (South Africa) (Proprietary) Ltd. A subsidiary company, to be called Impresit (Kariba) Ltd., would be formed immediately. A second contract (worth £9,935,844) for main transmission lines had been awarded to Rhodesian Power Lines (Pvt.) Ltd., a company containing a large Italian participation, which, however, would use considerable quantities of British equipment worth about £4,000,000.

The announcement explained that the Impresit Company's tender (£25,278,000) was £1,466,000 less than the next lowest one and £2,271,000 less than the third lowest, and that the firms combining to form Impresit had had considerable experience in similar work in Italy and elsewhere. The contract included: (1) the construction of a concrete-arch dam across the Zambesi 1,800 ft. long and 400 ft. high; (2) the provision of temporary access roads, and of additional cofferdams and other temporary structures to permit the completion of permanent works; (3) the construction of an underground power station and various ancillary works. The works would be carried out to a precise schedule to permit the supply of power to begin early in 1960; a temporary power plant of about 6,000 kw. capacity, other constructional work, and equipment worth at least £2,000,000 would be obtained from Britain.

It was also announced on July 15 that other contracts had been awarded to British firms as follows:

Boving and Co. Ltd., London, for 140,000 b.h.p. water turbines (£1,072,583); Metropolitan Vickers Electrical Export Co. Ltd., Manchester, for 100 water turbine-driven generators (£1,772,065); English Electric Co. Ltd., Stafford, for generator transformers (£662,500); Ferranti Ltd., Hollinwood (Lancs.) for sub-station transformers (£1,332,250). Smaller contracts, for overhead travelling cranes and shunt compensating reactors respectively, had been awarded to Babcock and Wilcox, Ltd. (London) and C. A. Parsons and Co. Ltd. (Newcastle-upon-Tyne). The award to British firms of two further contracts, together worth over £2,000,000, was announced on Sept. 3: (1) a £2,100,000 contract to the British Thomson-Houston Export Co. Ltd., for the supply and installation of a 330 kw. switchgear and transmission system at the Kariba switching station and sub-stations; (2) a contract worth £36,000 to A. Reyrolle and Co. Ltd., for the supply and installation of switchgear for the Kariba power station itself.

Contracts previously awarded by the Federal Power Board were listed on July 16 as follows: The Cementation Co. Ltd., London, for preliminary works (£1,593,780); Richard Costain (S.R.) Ltd., for housing and associated works (£3,523,175); Hubert Davies and Co. (Johannesburg) and Matthew Hall and Co. (Bulawayo), for camp electrical distribution and house wiring (a total of £237,187); John Laing and Co. (Rhod.) Ltd., A. G. Burton Ltd., and the Irrigation Department of the Southern Rhodesian Government, for access roads (a total of £1,560,000); Shell Company of Rhodesia, for petrol and diesel oil (£1,500,000); Kariba Transport Ltd. (a subsidiary of Rhodesia Transport Ltd., itself a subsidiary of the United Transport Company, a British concern) for transport of materials, supplies, and equipment (about £2,000,000). In addition, smaller contracts had been awarded to a value of about £400,000.

Agreements covering two more loans for the first stage of the Kariba scheme were signed in London on July 12 by Mr. D. Macintyre, the Federal Minister of Finance, and Mr. D. Anderson, chairman of the Federal Power Board, on the one hand, and representatives of the Colonial Development Corporation and the Commonwealth Development Finance Company on the other. The new loans comprised:

(1) £15,000,000 from the C.D.C. for 40 years, bearing interest at one per cent above the British Bank Rate current at the time. The first instalment would be drawn in September, with further drawings at quarterly intervals until the end of 1961, and the first repayment would start eight years after the first drawing.

(2) £3,000,000 from the C.D.F.C. for 20 years at six per cent interest; to be paid in three annual instalments beginning in 1956, repayments commencing in 1963.

A summary of financial arrangements made and contracts awarded in connexion with the first stage of the Kariba scheme was published by the Federal Information Bureau on July 28. The sources of loans, etc., were given as follows:

International Sources.		
World Bank Loan		£28,600,000
Rhodesian Sources.		
Copper Mining Companies	£20,000,000	
British South Africa Company	4,000,000	
Standard Bank of South Africa	2,000,000	
Barclays Bank (Dominion, Colonial and Overseas)	2,000,000	
Federal Government	6,000,000	
		34,000,000
British Sources.		
Colonial Development Corporation	15,000,000	
Commonwealth Development Finance Company	3,000,000	
		18,000,000
Total		£80,600,000

Against this, contracts already awarded (see above) or outstanding totalled £55,117,266, and in addition a total of £24,316,734 would be required for the servicing of loans, movement of Africans, and administrative expenses, etc., making a grand total of £79,434,000.

The summary pointed out that contracts already awarded included about £37,000,000 receivable by British and Rhodesian interests. Thus, out of the main contract awarded to the Impresit Company, about £15,000,000 would probably be spent on work and materials in the Federation, and Britain would supply equipment worth at least £2,000,000. The contract awarded to Rhodesian Power Lines included about £4,000,000 payable to British firms for equipment, while earlier and later contracts awarded to British firms direct accounted for £11,000,000 and £5,000,000 respectively.

The probable ratio of hydro-electric to thermal power in the Federation when the Kariba scheme was completed was officially estimated in June as 88 : 12, the figure for hydro-electric power being equal to that in New Zealand and being surpassed only in Canada, Switzerland, and Norway.

(Federal Information Department, Salisbury - Times - Manchester Guardian - Financial Times) **(Prev. rep. 14751 A.)**

Note. Impresit (South Africa) (Proprietary) Ltd. is a branch of the Impresit Company of Milan, which was founded in 1929 with powerful support from the Fiat Motor Company to co-ordinate the activities of Italian firms carrying out large works in foreign countries. Since 1930 Impresit has been working on improvements to Lisbon harbour, and is also engaged in road-building projects in France and Nigeria. The Company played an important part in the construction of the Trans-Iranian Railway (1930-36), and has carried out important work in Ethiopia and Egypt.

In addition to Impresit (South Africa), the following companies are members of Impresit (Kariba) (Pvt.) Ltd.: Impresa Ing. Lodigiani, Imprese Italiana Allestero, Impresa Umberto Girola, Dott. Ing. Giuseppe Torno, and Impresit (Rhodesia) (Pvt.) Ltd.

The Rhodesia Power Lines Company is closely linked with the *Società Anonima Elettrificazione* of Milan, which will provide the plans for the transmission lines and the steel for the towers in connexion with them. The S.A.E. has already carried out contracts in Australia, New Zealand, India, the U.S.A., Brazil, and the Belgian Congo. (Federal Information Department - Times)

B. UNITED KINGDOM. — Gold and Dollar Reserves in September. - Rise of $52,000,000.

The Treasury announced on Oct. 2 that the sterling area's gold and dollar reserves had risen by $52,000,000 during September, after taking into account (*a*) $3,000,000 received in U.S. defence aid, (*b*) $8,000,000 paid to Canada as a quarterly instalment on the Canadian interest-free loan, (*c*) $34,000,000 paid to the E.P.U. in respect of the August settlement, and (*d*) $3,000,000 paid to the creditors of E.P.U. in bilateral settlements. As a result, the sterling area's gold and dollar reserves stood at $2,328,000,000 on Sept. 30.

The figures covered the receipt of $177,000,000 from the sale of the Trinidad Oil Company to U.S. interests (see 15071 D). But for that sale, the reserves would have fallen by a further $125,000,000 in September, following the fall of $129,000,000 in August.

It was also pointed out in the Press that one of the principal factors in the loss of gold and dollars during the month had been the need for the Exchange authorities to support the official sterling rate in the market, in view of its weakness caused by the Suez crisis.

The cumulative loss during the third quarter of 1956 amounted to $57,000,000 (taking into account the Trinidad Oil receipt), compared with a fall of $335,000,000 in the exceptionally bad third quarter of 1955.

Provisional figures for the E.P.U. September settlement showed that the U.K. had a deficit of £12,000,000, which would be settled in October as to three-quarters in gold or dollars and as to one-quarter by a credit from the Union.

(Treasury Press Office, London - Times) **(Prev. rep. 15070 A.)**

C. SPAIN. — U.S. Economic Aid, 1955-56.

Details of the distribution of $60,000,000 in U.S. economic aid to Spain during the fiscal year 1955-56 were announced at the beginning of September as follows: agricultural products, $27,000,000 (including $15,000,000 for cotton); raw materials, $4,600,000; electrical material (including steel sheets, transport equipment, machinery, etc.), $8,000,000; cement industry, $1,300,000; agricultural equipment, $5,800,000; railway equipment and coal for the State railways, $9,000,000.

(Bank of London and South America) **(Prev. rep. 14742 A.)**

OCTOBER 13—20, 1956

A. EUROPEAN UNIFICATION. — Report of the Brussels Committee. - Common Market and Euratom Projects. - Venice and Brussels Conferences. - E.C.S.C. Common Assembly and French National Assembly Debates. - United Kingdom's Attitude. - Formation of Action Committee for a United States of Europe.

The Foreign Ministers of the six member-countries of the European Coal and Steel Community (France, Western Germany, Italy, Belgium, the Netherlands, and Luxemburg) met in Paris on May 6, 1956, to receive the final report of the Inter-Governmental Committee set up by the Messina Conference in June 1955 to study the question of the establishment of a Common Market and the creation of a European organization for the peaceful uses of atomic energy (see 15025 A). The Foreign Ministers decided to hold a further conference in Venice on May 29-30 for a full examination of the report.

An interim report on the Committee's work had been presented to the Foreign Ministers by M. Spaak, the chairman of the Committee, at a meeting in Brussels on Feb. 11-12. In the communiqué published at the end of that meeting, the Foreign Ministers had declared that the determination of the six countries to establish closer forms of collaboration than those adopted within the O.E.E.C. was in no way incompatible with the efforts pursued within the larger framework of that organization. The statement also said that the work of the Committee had been approved, and that the necessary directives had been given to the Committee to complete its work as soon as possible.

The Brussels Report.

The final report, which was divided into two parts, the first dealing with the Common Market, and the second with Euratom, is summarized below, under cross headings.

The Common Market.

The report said that the principal means towards the creation of a Common Market would be (*a*) the establishment of normal conditions of competition and the harmonious development of all the national economies concerned, with a view to the abolition of present obstacles to trade; (*b*) rules designed to counteract the effect of State intervention or of monopolies; and (*c*) the creation of new resources through the exploitation of under-developed regions, the use of surplus manpower, and the free movement of capital and labour. The following steps would be necessary for the implementation of this programme and the realization of a complete Customs Union:

Abolition of Internal Customs Duties. A maximum period of 15 years would be needed for the complete abolition of all internal Customs tariffs. This period would be divided into three four-year stages, with the possibility of an additional three-year stage at the end, during which all internal Customs duties would be progressively reduced.

Common External Tariff. The tariff policies of the member-countries would be unified, and a common tariff *vis-à-vis* third countries established.

Revision of Import Quotas. During the first four years the member-countries would abide by the rules of O.E.E.C. and would maintain the present level of trade liberalization. After that period quantitative restrictions would be reduced progressively on all products, instead of being completely abolished for individual products only, as laid down by O.E.E.C.

Agriculture. Special transitional provisions would be necessary for agriculture, in view of the wide variation in the stages reached in agricultural development in the member-countries.

Investment and Re-adaptation Funds. Funds would be established for investment and for the re-adaptation of redundant workers, the capital being supplied by the member-countries either directly or through financial institutions.

Institutions of the Common Market. The implementation of these proposals would be entrusted to:—(*a*) A Council of Ministers, which would co-ordinate the general policy of the different Governments. (*b*) A European Commission, which would direct the Common Market in accordance with the principles of the treaty establishing it, and would supervise its functioning and development; its President and members would be appointed by the Governments of the member-countries, and it would take its decisions by simple majority vote. (*c*) A Court of Justice which would be that of the European Coal and Steel Community.

Euratom.

The principal functions and institutions of this organization were set out as follows:

Distribution of Atomic Fuel. Euratom would be the sole supplier of atomic fuel and, as such, would have a prior claim on any uranium, plutonium, and thorium produced by member-countries. The prices of these materials would be fixed by contract. In the event of disagreement, however, the European Atomic Energy Commission (see below) would fix the price, assisted by a mixed committee of producers and consumers, and its final decision would be open to appeal before the Court of Justice of Euratom (see below). The Commission would also be authorized to lay down the conditions for other sales, i.e. exports.

Euratom would supply raw materials to the atomic energy establishments in the Community without discrimination, and in accordance with their production programmes. In the event of a deficiency, materials would be allocated "on the basis of current needs" These distributive functions would be exercised by means of a Distribution Agency, which would have financial autonomy and would be under business management. Its floating capital would be guaranteed by contributions from the consumers. The management of the Agency would be in the hands of a Director or Committee appointed by the Atomic Energy Commission.

Safety Provisions. The use of nuclear products at all atomic energy establishments would be regulated, and all stocks of unused materials would be subject to inspection by Euratom. In the event of an infringement of the regulations or of the use of products for purposes other than those originally stipulated, the materials would be withdrawn from the consumer. A convention would be prepared to provide for regulations regarding the safety of the population.

Common Market for Nuclear Industry. The Atomic Energy Commission would define which materials and equipment were of a nuclear character. Member-countries would then be obliged to abolish any trade barriers for those goods and ensure their free circulation within the Community without delay.

Common Investments. Investments would continue to be in the hands of public or private enterprises. The Commission would be empowered (*a*) to express its opinions on investment plans; (*b*) to organize a research centre for the diffusion of scientific knowledge and a college for the training of atomic technologists; (*c*) to grant, in appropriate cases, any necessary financial assistance; and (*d*) to publish current investment programmes in order to meet any deficiencies or avoid unnecessary duplication. The organization would have no power, however, to direct investments or to criticize the economic soundness of any proposals.

On the other hand, the Commission would be able to participate in enterprises established by industrial groups or by States for the industrial exploitation of atomic energy. Such common establishments would be appropriate for, *inter alia*, the separation of isotopes and the chemical treatment of radioactive uranium.

Institutions. Executive control of Euratom would be exercised by a small permanent European Atomic Energy Commission (equivalent to the High Authority of the E.C.S.C.), whose members would be appointed by agreement of the Governments of the member-countries, but who would not be representatives of any particular Government. In matters of general policy, the Commission would be responsible to a Council of Ministers and a parliamentary Assembly, analogous to those already created for the Coal and Steel Community. There would also be a Court of Justice, which would be that of the European Coal and Steel Community.

The Venice Conference.

In accordance with their decision in Paris, the Foreign Ministers of the E.C.S.C. member-countries met in Venice under the chairmanship of M. Christian Pineau (France) on May 29-30, the following communiqué being issued on the latter date:

"The Ministers noted that the six Governments agreed to take the proposals contained in this [the Brussels] Report as a basis for negotiations, to be pursued with a view to drafting a treaty establishing a Common Market as well as a treaty setting up a European organization for nuclear energy (Euratom). They decided to convene for this purpose a conference which will open in Brussels on June 26 under the chairmanship of M. Spaak At the request of his colleagues M Spaak has agreed to continue in his task of co-ordinator...

"Apart from the proposals contained in the Brussels Report, one question which particularly occupied the attention of the Ministers was that of including overseas territories in the Common Market. At the suggestion of France it was decided, in view of the complexity of this question and the varying status of the territories involved, that after a study by the national authorities concerned the Foreign Ministers would shortly be required to give their views on this problem. They will also be required to give their views on the problem of the possible use of nuclear energy for military purposes.

"The Ministers are agreed that they shall meet periodically to hear reports from the heads of delegations and to take any necessary political decisions

"In pursuance of the Messina Resolution, it has been decided that the treaties now to be drafted shall include clauses laying down the conditions of accession or association by third-party States.

"The Ministers reaffirm their hope that they may immediately welcome among them all countries ready to collaborate with them, on an equal footing, in their efforts. They instruct the chairman of the conference to keep O.E.E.C., the European Coal and Steel Community, the Council of Europe, and the European Conference of Ministers of Transport regularly informed on the progress of their work, and also to address invitations to the member-countries of O.E.E.C. with a view to obtaining their participation in or association with the treaties now to be concluded."

The Brussels Conference.

The Brussels Conference opened on June 26 under the chairmanship of M. Spaak, in accordance with the decisions taken at the Venice Conference.

The conference drew up rules of procedure and appointed (*a*) a Co-ordinating Committee composed of the heads of delegations under M. Spaak, (*b*) a Working Party on the Common Market under the chairmanship of Herr von der Groeben (Germany); (*c*) a Working Party on Euratom under the chairmanship of M. Guillaumat (France); and (*d*) a Drafting Committee at the disposal of the two Working Parties under the chairmanship of Signor Ducci (Italy). The first session of the conference ended on July 21, meetings being resumed on Sept 3. The draft treaties will, when completed, be submitted to the Parliaments of the six member-countries for ratification.

Common Assembly Debate.

The Brussels Report was debated during the first part of the Fourth Ordinary Session of the Common Assembly of the European Coal and Steel Community on May 11, when Mr. Marinus van der Goes van Naters (Netherlands, Socialist) and M. Pierre Wigny (Belgium, Christian Social) presented reports on the Common Market and Euratom respectively.

In the ensuing debate, **M. Michel Debré** (French Social Republican) attacked the Brussels Report as "a doctrinaire fairy tale promising a golden age, and forcing on Europe, not an economic, but a political choice." The Brussels experts, he asserted, had played into the hands of predominant Powers and industries, and would make it impossible for countries economically less powerful to retain their political role. Europe's real problems were being decided elsewhere, and the Brussels experts ought to have mentioned in their plan overseas investments, especially in Africa. M. Debré concluded: "Put in the balance all these European plans and discussions against one single hour of fighting by a French or Moslem soldier in North Africa, and judge which is doing more to combat the forces menacing Europe."

M. Spaak, in reply, warned France of the consequences for Europe if the plans for Euratom and a Common Market were rejected by the French Parliament. He denied that the Brussels Report was a "rehash" of the *Ad Hoc* Assembly plan (see 13021 A) or an economic version of the European Defence Community. The Messina Conference had decided, after the failure of E.D.C., that any future plan for European integration must be made in the economic field, and must be free from any doctrinaire views on the institutional framework of such plans.

Dealing with the imperative need for the economic integration of Western Europe, M. Spaak said that whilst the danger of a third world war had receded, Communist countries had launched a "colossal challenge to the economies of the Western world—a challenge to which no single Western European country could hope to reply." To meet this challenge the Messina Conference had proposed a general Common Market and a pooling of atomic resources for peaceful purposes, and both plans were necessary to make up Europe's economic time lag. In this connexion M. Spaak declared that European countries must "recognize with sadness and shame" their "terribly backward state in comparison with the U.S.A., the Soviet Union, and even Britain." Russia was said to be training 1,000,000 atomic technicians. Belgium, for one, could never hope to catch up, and the same was true of other European countries.

Answering French fears that a Common Market would weaken the economies of its weaker members, especially those with overseas commitments, M. Spaak said: "There is not a word of truth in your allegation. It seems to me that you have a curious view of your country's future—a strange mixture of grandeur and nationalism on the one hand and a terrible inferiority complex on the other. I am astonished that a Frenchman should express these fears when Belgians, Dutchmen, and Italians have shown that they are prepared to go forward. France has only to put her problems to the Community and aid will be forthcoming. The report avoided specific references to France for fear of wounding national susceptibilities."

Those who supported the Brussels Report, M. Spaak went on, wanted an independent Europe—not a neutralist third force, but one whose economic power would ensure its political role in the world. He was not satisfied with the O.E.E.C. plan for the peaceful development of atomic energy. Although its aims were the same as those of the Brussels Committee, it neglected the means, leaving everyone free to pursue his own ends, which was "a bribe for nationalist self-interest." Without majority voting and binding rules no such European institution could hope to succeed, he concluded. Euratom was based on two simple ideas the Community's first option on atomic material, and a system of absolute control. The realization of this courageous and generous plan was essential if the future of Europe was to be assured.

At the end of the debate, the Assembly adopted unanimously, but for one French vote, the draft resolution submitted by the *rapporteurs* which is summarized below.

Common Market. The resolution recalled that the aims of the Common Market were a continuous improvement in the standard of living, full employment, the improvement and harmonization of social conditions, and the development of the under-developed areas within the Community. It stressed that the Common Market would not be confined to the abolition of all discriminative measures (Customs duties, quota restrictions, foreign exchange restrictions, transport preferences, etc.), and to protective measures against monopolies, but that it "pre-supposes a solidarity between member-countries enabling each of them to adapt itself to the new organization without excessive sacrifices while obtaining all its benefits"; in this connexion the proposed re-adaptation and investment funds were of vital importance.

Within the Common Market there should be freedom of movement for goods, persons, capital, and services, but any attempt at autarchy *vis-à-vis* third countries must be avoided. Safety measures would, however, be necessary to help certain member-States to avoid a fall in their social standards in the face of increased competition, and to facilitate the co-ordination of agricultural policy in the various countries. From this it followed that the organs of the Common Market should be granted a measure of competence as regards general economic policy.

The treaty for the Common Market should ensure that social progress would go parallel with economic progress, and the decision to establish a Common Market should be irrevocable even though its realization must take place by stages

Euratom. The resolution stressed that co-operation between the European countries in atomic matters was "urgently necessary" to place those countries in the front rank of the industrial nations and ensure the continuous improvement of their standard of living, but that such co-operation could only be of permanent use if it covered all forms of atomic energy, including atomic fission, fusion, or other methods.

The resolution insisted that the proposed organization should be open to all members of the O E.E.C which agreed to its conditions; that a flexible formula should permit the participation of non-members who wished, however, to co-operate in certain scientific or industrial enterprises; that close association must be sought with Britain; that Euratom should be co-ordinated with the atomic proposals of the O.E.E.C.; and that overseas territories supplying raw materials should receive an adequate reward.

Euratom, the resolution went on, should exercise adequate military and health control, and should ensure economic security, "irrespective of different ideological, political, or economic questions," by distributing without discrimination all raw materials and fissile materials amongst all consumers within the Community. Joint economic and industrial undertakings would be indispensable, and flexible relations with the private sector were necessary to take full advantage of the technical revolution initiated by the discovery of atomic energy.

Whilst recognizing that the use of atomic energy for military purposes, either by Euratom or by some of its members, was outside the competence of the Common Assembly, the resolution stressed, however, that if atomic energy were to be used for military purposes safety control and scientific co-operation should not be allowed to be affected on grounds of secrecy.

Institutions. The new European organizations, the resolution declared, should be given "sufficient real powers" to enable them to carry out their tasks; the competence of the Assembly responsible for ensuring democratic control should be made wider than at present intended; the right balance should be found between the powers of the Council of Ministers and those of the European Commission; maximum use should be made of the existing institutions of the E.C S.C.; and the co-operation of the organizations of employers and employees should be ensured. It was also necessary within Euratom to avoid the political dangers of centralization, and thus to facilitate co-operation with third countries

The Euratom project had previously been debated on April 17 during the Eighth Session of the Consultative Assembly of the Council of Europe, when a resolution was adopted which appealed to the member-countries of O.E.E.C. to develop their co-operation to the fullest extent, and called on the "Messina Powers" to establish within an integrated economic framework a European atomic organization which would be open to all other countries either as full members or in association with it.

French National Assembly Support for Euratom.

After prolonged debate the French National Assembly, on July 11, adopted by 332 votes to 181, with 70 abstentions, a motion approving the continuation of the negotiations for the creation of Euratom on the basis of the principles of the Brussels Report.

The motion, which was put down by M. Depreux on behalf of the Socialists, had been accepted by the Government but was amended before the final vote to meet objections raised by the two Social Republican Ministers—M. Chaban-Delmas (Minister of State) and M. Lemaire (State Secretary for Commerce and Industry)—and by various speakers on the Government side It (*a*) expressed confidence that the Government would bring about efficient atomic co-operation between the largest possible number of European countries while fully developing the French national atomic effort, which was "a fundamental condition for fruitful co-operation", (*b*) authorized the Government to pursue the negotiations for the drafting of a treaty creating Euratom in conformity with the principles stated in the Prime Minister's investiture speech, and on the basis of the Brussels Report and the statements made by the Prime Minister and other members of the Government during the present debate; (*c*) asked the Government to devote itself at the same time to developing atomic co-operation within the framework of O.E E.C by making it easy for each member-country of O.E E C, or even non-member-countries, to participate in or be associated with Euratom.

Prior to the debate, on June 27, a Cabinet meeting decided that France should retain the right to manufacture atomic weapons.

The draft provisions prepared at Brussels for the Euratom treaty had envisaged (i) that the members of the Atomic Community would undertake not to carry out during the first five years any "uncontrolled explosion," i.e., not to make any nuclear armaments, (ii) that at the end of the "transitional" period the Community would decide whether or not to restore to its members their freedom to make such armaments, if three out of the six members agreed to this step.

Strong objections to these restrictions were, however, raised by M. Chaban-Delmas and M. Bourgès-Maunoury (Radical) (Minister of National Defence), and the Cabinet eventually decided that the French delegation in Brussels should insist on an amendment to the clause under (ii) above to the effect that at the end of the transitional period members would, after ordinary consultations between them, automatically regain their liberty to make atomic weapons, except for

Germany, whose position was governed by the Paris Agreements. It was also decided that, whilst not making this a condition *sine qua non*, the French delegation should try to bring about a reduction of the transitional period from five to four years In connexion with this decision, M Mollet pointed out, however, that in conformity with his investiture speech, in which he had referred to the creation of Euratom " for exclusively peaceful purposes," he would not during his premiership give orders for investigations into the use of atomic energy for military purposes

The debate was opened on July 5 on " interpellations " by M. Gouin (Socialist) and M. Pierre-Henri Teitgen (M.R.P.)—both supporters of the Euratom project.

At the Prime Minister's request, the Assembly first heard statements by M. Francis Perrin, High Commissioner for Atomic Energy, and M. Louis Armand, President of the Industrial Development Committee of the Atomic Energy Commission, who explained the urgent necessity of meeting the increasing deficiency in Western Europe's power supplies by means of the utilization of atomic energy.

M. Perrin pointed out that within 10 years French industry would be dependent upon nuclear energy. Coal requirements in 1965 were estimated at 160,000,000 tons, while national production was not expected to rise above 97,000,000 tons. The rising demand for oil fuels and the diminishing sources of hydro-electric power threatened to make France increasingly dependent on the oil supplies of the turbulent Middle East. Extensive co-operation in Western Europe's nuclear research and in the production and pooling of fissile materials would solve the problem of putting atomic energy on an economic basis, and European co-operation would supplement and stimulate the efforts of each individual nation.

In this connexion M. Perrin referred to the great cost and time required for the construction of a plant for the separation of isotopes, which alone would involve the expenditure of 40,000,000,000 francs (£40,000,000), excluding the additional cost of a power station with a capacity of 300,000 kw. to supply the plant. Through the co-operation of the European countries the cost for each of them could be brought within reasonable limits and the time needed for construction and running-in be considerably reduced. The example of the European plant at Geneva now under construction showed how the co-operation of 12 countries allowed the building of a big machine which no country, not even Britain, could have undertaken singly. It was true that France was farther advanced than other European countries as far as atomic research was concerned, but in the long run she could only gain advantages from such co-operation.

M. Louis Armand likewise emphasized that the solution of the complex technological problems in the development of nuclear power would necessitate measures on a scale far beyond the competence of individual European countries, whereas international co-operation and the pooling of materials, knowledge, and equipment would help to solve these problems " What is difficult for France," he said, " will be easy for Europe."

M. Mutter (Independent) said that he accepted that ownership of fissile materials should be granted to a European organization like Euratom which would exercise control over their utilization. He did not understand, however, how this economic and industrial problem could be mixed up with the question of the military uses of atomic energy, which would have to be studied within the framework of disarmament plans and should be kept separate from the economic question **M. Crouzier** (Independent) urged a complete change of France's defence system by adopting atomic weapons and training the armed forces to adjust themselves to the new conditions of atomic warfare. He expressed the view that both technically and financially France was in a position to make atomic weapons while not neglecting the use of atomic energy for the production of power, and declared that she must retain complete liberty to make such weapons.

Replying to these and other criticisms, **M. Maurice Faure** (State Secretary for Foreign Affairs) pointed out that while the Government were prepared to enter into a commitment not to carry out an uncontrolled atomic explosion on their own within a period of four or five years, they would not renounce the right to undertake preparatory research work for such an explosion or to utilize atomic energy for the propulsion of ships As to the manufacture of atomic missiles, this was a much more difficult problem than the construction of an atomic bomb, and the time needed for the perfection of atomic air defence weapons would in any case exceed the four-year period. After the end of that period, member-countries would regain their complete liberty of action after simple consultation with each other, and the rights of France were thus fully safeguarded M. Faure added that the question of the military use of nuclear energy had been excluded from the current Euratom discussions in Brussels at the specific request of the French delegation.

Dealing with other objections to Euratom, M. Faure stressed that the common budget of the organization, which was its " nerve centre," would allow the setting up of joint enterprises, while at the same time facilitating the execution of those national projects which technically appeared to be the most suitable ones He refuted the argument that Euratom and the Common Market were linked with each other, pointing out that Euratom could be set up rapidly whereas the creation of the Common Market necessitated a long investigation into the position of member-countries and the harmonization of their social and fiscal charges.

On the question of British participation in Euratom, M. Faure stated that Britain had never shown any intention to associate herself with any joint enterprise within the European Coal and Steel Community. " If she can be brought to re-examine the question," he went on, " this will only be as a result of a powerful European atomic community, as was the case for the Coal and Steel Community. In this respect there is a certain evolution of British thought in a favourable direction. If Britain associated herself with Euratom the chief political difficulty facing this project would be promptly removed. But we must take into account the insular mentality, and a *de facto* situation of which I became aware a fortnight ago in London [see below]—that England started her atomic work during the last war, that she was put in possession of certain American secrets, whence her considerable advance on France, and that she will next year explode her first thermo-nuclear bomb."

Turning to the question of " supranational powers," M Faure emphasized that as far as the national programmes of the member-countries were concerned, Euratom would be limited to giving advice and providing financial help, and that its power of direction would apply only to joint enterprises in the sphere of research or investments. In general, the functions of all its organs had been restricted to what was absolutely necessary to serve both the common interest and the national interests of its members.

If France were to carry on alone, he declared, she would no doubt make progress, but this would be slow and could only be achieved at a heavy cost and with painful sacrifices in other directions, as she could not do everything at the same time. Euratom, he was convinced, would allow France to reap the fruit of her efforts which had brought her to the front rank of atomic achievements, and far from being a threat to her national independence would guarantee her present and her future

M. Bokanowski explained that the Social Republicans had no objections in principle to an international organization provided with a budget and endowed with sufficient authority, and agreed that France could join such an organization without neglecting the parallel development of her national effort. However, they could not accept the implications which the partisans of the E.C.S.C. saw in European atomic collaboration, and the framework of the E C.S C. was not suitable for Euratom. The Community's experience had been " deceptive, if only because it has not resolved Franco-German differences." France's European policy did not lie in this direction, M. Bokanowski declared, and if the Government were to accept a system which transferred all or part of the rights of France to an organization like the E C S.C , it would start a " frightful political quarrel among Frenchmen."

M. Pleven (U.D.S.R.), the former Prime Minister and Minister of National Defence, expressed the hope that as large a majority as possible would declare itself in favour of the continuation of the negotiations, and appealed to the Assembly not to make its decision the occasion for a revival of animosity between the supporters and opponents of the E D.C or the E.C.S.C. Without Euratom, he said, the danger from the powerful German chemical industry would be much greater, and unity would be replaced by a system of bitter competition. He asked the Government, however, to clarify its position over the renunciation of sovereignty and the requirements of defence. As regards the attitude of Britain, M. Pleven said, he was certain that once Euratom was set up she would co-operate at some future date

M. Pierre André (Independent) thought that France had enough money and technical experience to develop her own nuclear industries, and that she would soon have enough raw materials, as according to certain technical reviews the capacity of French uranium production would reach some 6,000 tons within a few years. It was essential that she should possess the atomic bomb, he declared; without it she would be " utterly dependent upon the assistance of her allies, who would thereby become her masters." By granting priority to Euratom France would, however, lose " legally and materially " the capacity of manufacturing atomic weapons herself, and the retention, in principle, of the right to manufacture them later would be useless in practice if, because of the monopoly of Euratom, she would have insufficient supplies of fissile material for this purpose. Moreover, to wait four years for the reorganization of French defence meant that the country would commit itself to an outdated system and accept " serving as cannon-fodder."

M. Bourgès-Maunoury (Minister of National Defence) gave an assurance that Euratom would not be allowed to prejudice French defence preparations in any way. He emphasized that in his opinion it was essential for a country today to be able to reply to an atomic attack, and that within 10 years any army not possessing the atomic bomb would be outdated. The only choice for France, therefore, was between possessing atomic weapons and giving up all forms of defence. Dealing with the question whether France, either alone or in collaboration with other countries, would be able to equip her army with nuclear weapons, the Minister pointed out that only a limited effort would be required in her case to cover her principal frontier, unlike the position of the U.S.A. and the Soviet Union, which were compelled to cover themselves over vast areas and in all directions. Within these limitations, therefore, he thought that in the long run France would not find it too costly to make her own nuclear weapons.

Meanwhile, however, her only engagement under the Euratom treaty would be not to carry out an uncontrolled explosion for the next four years, and if during that period they pushed on with their research and preparations, especially for the manufacture of plutonium, and were willing to make the necessary long-term investments, " not a single moment will have been lost." Euratom, he declared, would be an aid to French military preparedness in the atomic field rather than a hindrance, as it would enable a more economic deployment of basic nuclear resources.

M. Pineau (the Foreign Minister) gave a similar assurance that France would not abandon any essential part of her national prerogatives and that she would notably retain the right to participate in the work of the International Atomic Energy Agency. In order to allay any fears to the contrary the Government had also decided to abandon the earlier plan to use, for reasons of economy, the Common Assembly and the Court of Justice of the Coal and Steel Community for Euratom, and the French delegation in Brussels would now insist that the institutions of Euratom be kept completely separate. The so-called supranational powers of Euratom, M. Pineau said, would only be economic and technical, and were intended to assure the smooth functioning of the organization.

Euratom, he went on, would remain open to the participation or the association of other O.E.E.C. member-countries. O E.E.C. and Euratom had "complementary functions," although Euratom went much farther than O.E.E C. "If we were less pressed for time," he continued, "we could wait for the good will of the other O.E.E C. countries, and especially of Britain. But Britain has made such an advance over the other countries of Western Europe and has such close links with the U.S.A. that any collaboration on her part with Euratom would create delicate, if not insoluble, problems for her That is the reason why we have not been able to obtain from her more than a promise of association."

Allaying fears that "behind Euratom there stands the shadow of the Common Market," M. Pineau declared that the Common Market plan, though to some extent associated with Euratom, was "a much more delicate matter" and that the Government was not considering it at the moment. Finally, he repeated the assurances given by M Faure and M. Bourgès-Maunoury that the undertaking not to carry out atomic explosions during the first four years would leave France free to construct engines with atomic propulsion and to continue her research into the making of nuclear weapons. Although in the present situation the Government still thought that it was not in France's interest to construct atomic or hydrogen bombs, its views would not commit its successors. In any case, it would take four years to prepare the explosion of an atomic bomb, and much longer still for a hydrogen bomb, and the continuation of French research, therefore, would not in any way pre-judge the eventual decision whether or not to proceed at that time with such an explosion.

M. Kriegel-Valrimont (Communist) declared that Euratom would be disastrous for France and would seriously endanger peace. International co-operation in atomic research was certainly desirable, but Euratom involved for France the abandonment of her sovereign right to possess fissile materials, and would place her "at the mercy of the great German chemical and heavy industrial trusts." An even graver danger was the probability that Euratom would lead to the possession of atomic weapons by the new German *Wehrmacht*, and that it would encourage the German leaders to demand for Germany the right to use atomic energy for military purposes.

M. Gaillard (Radical) denied that Euratom would threaten French independence France, he said, had already lost her military independence through her failure to take advantage of developments in the military sphere of atomic research, and she stood to lose her economic independence if she remained in isolation. Technological progress now demanded efforts on a supranational scale.

M. Paul Reynaud (Independent) felt that Western Europe should free itself from the "costly acrobatics" involved in importing coal from the U.S.A. and oil from the Middle East. Euratom and the Common Market project would help to relieve Europe of its complete dependence upon external support. He was critical of the Government's undertaking not to make the atomic bomb, and instead of the four-year ban on atomic explosions in the Euratom treaty would have preferred a unilateral declaration by France to that effect in order not to limit her future freedom of action. M. Reynaud nevertheless announced that, subject to a small amendment of the resolution, he and his friends would vote for both the Common Market and Euratom, because they did not wish "that France, which has been the initiator of the European idea, should appear as a disabused, weak, and sceptical country which can do nothing but say 'no'."

Winding up the debate in a speech which made a deep impression on the Assembly, **M. Guy Mollet**, the Prime Minister, declared that the only road to real independence lay through Europe since, "confronted by the American and Russian colossi, no European country, Britain not excepted, can hope to make its weight felt and its voice heard in isolation." Recent events in the Soviet Union had given international affairs a certain fluidity, and negotiations had become possible again, but such negotiations should not be limited to "a Soviet-American dialogue" A united Europe, in agreement with its allies, would have an immense role to play in the preservation of peace.

European integration was no less necessary for a solution of the German problem. One of the permanent objectives of Russian policy—as had been confirmed by his [M. Mollet's] talks with M. Khrushchev in Moscow—was the hope of realizing sooner or later a new German-Russian *entente*, and if Germany did not find the necessary openings in the free world she would surely be tempted to yield to the "seductions of M. Khrushchev." "It is therefore necessary to integrate Germany in Europe," M. Mollet said, "to weave between her and us such close and such numerous economic, political, and cultural links that they will prevent her from turning to the East. This has always been the foundation of my policy, and I remain attached to this idea of integration whatever the forms under which it will be carried out."

In the atomic sphere it was of "capital importance" that Germany should not remain isolated. Hitherto the U.S.A. had had confidence in the efforts to unify Europe, but if these broke down again the U.S.A. might conclude an atomic agreement with Germany alone.

In Germany already certain leaders of heavy industry, and especially the chemical industry, secretly wished for the breakdown of Euratom, which for them would be an assurance of regaining soon their economic and political power. That is why it was essential that the German nuclear industry should be organized within and under a European framework.

As regards the question posed by M. Pierre André, M. Mollet said he had asked M. Perrin and M. Armand about their opinion as to whether France, alone, could carry out the whole atomic cycle from the treatment of uranium to the production of electricity. M. Perrin had answered that this was possible, but only with the greatest efforts and at the risk of serious economic sacrifices and long delays M Armand had answered that, whilst France could carry out the task in the strictly technical sense, she was not able to do so in an economically competitive way.

From the technical point of view, he continued, far from encouraging laziness, Euratom would act as a stimulant, and the European effort would not replace, but would add to, the national effort Moreover, it would enable duplication to be avoided and would make possible the more efficient use of human, technical, and financial resources. "If we wish to unite," M Mollet added, "it is in order to do more than we could do alone."

Referring to the institutional aspects of the question, the Prime Minister stressed that the Government had not yet committed itself to any particular formula but tended to favour a procedure similar to that by which the Western European Union Assembly was drawn from among the members of the Council of Europe "Whatever the circumstances," he added, "I have adopted the following maxim · the maximum co-operation between the maximum number of countries. Thus France does not stand to limit herself to the Euratom project but will support any concrete plan likely to obtain within the framework of O.E.E C. the adherence of the principal member-countries . " In this connexion M. Mollet mentioned that everything had been tried to obtain the adherence of Britain, but her present reply left "little hope," although a change of mind was beginning to show itself.

As regards the proposed undertaking not to carry out an atomic explosion during the initial four years of Euratom, M. Mollet repeated the Ministerial assurances given during the debate concerning France's reservation of her right to produce nuclear weapons and to continue her atomic researches, so that at the end of the period she would possess, legally and materially, the capacity to make nuclear weapons. "It is naturally my personal wish," he added, "that general, including nuclear, disarmament will make such a step unnecessary." Replying to M Pleven, M. Mollet also gave an assurance, based on the "most authoritative advice" he had received, that French membership of Euratom would in no way interfere directly or indirectly, either now or in future, with France's defensive capacity, and that there was, in fact, no connexion between the Euratom plan and the future pattern of French national defence.

In conclusion, M. Mollet announced that the Government would not make the vote a question of confidence. Originally he had intended to resign should the vote go against Euratom, but had asked the Cabinet to keep this a strict secret However, as his intention had become known through indiscretions, it would mean in effect that he was making the vote one of confidence by implication. As he had no wish, however, to falsify the vote in this way and to compel deputies to support the Government in order to avoid a new Cabinet crisis, he would not resign whatever the result, and he therefore appealed to all deputies to vote on Euratom, without any other considerations, "in full liberty of conscience" He would accept and carry out whatever the decision of the Assembly might be, but he put his confidence in the Assembly's wisdom and trusted that it would not let slip this great chance for France of taking part in the atomic revolution.

By 401 votes to 180 the Assembly then accorded priority to the Socialist motion over one presented by MM. Guyot and Kriegel-Valrimont on behalf of the Communists, which condemned the Euratom project. Furthermore, the Assembly refused, by 270 to 156 votes, to discuss various amendments to the Socialist motion which had been submitted, and finally adopted that motion in the way it had been amended with the Government's consent.

In the final vote the Socialist motion was supported by 99 Socialists (out of 100), 73 Popular Republicans (M R.P.) (out of 74), 61 Independents (out of 84), 29 Radicals, 18 U.D.S.R. (out of 19), 15 Social Republicans (out of 23), 12 members (out of 14) of the R.G R. (the former Radical wing led by M. Edgar Faure), 12 *Paysans* (out of 14), 8 Overseas Independents (out of 9), 3 Poujadists, and 2 *non-inscrits*.

The opposition consisted of all the 144 Communists and 6 *Progressistes*, 27 Radicals, 3 Social Republicans, and 1 *non-inscrit*.

Twenty Independents, 3 Social Republicans, 1 U D.S R., 1 *Paysan*, and 1 *non-inscrit* abstained, whilst 44 deputies did not take part in the vote, viz., 39 Poujadists, 1 Radical, 1 R G.R member, 1 Overseas Independent, 1 *Paysan*, and 1 *non-inscrit*

Nine deputies (3 Radicals, 3 Independents, 1 R.G.R , 1 M R.P., 1 Social Republican) were on leave or unavoidably absent, and M. Le Troquer (Soc.), who presided, and M. Herriot (Radical), the Assembly's Honorary President, did not vote.

The Radicals were thus almost evenly divided. The 29 Radicals supporting Euratom included MM Billères, Bourgès-Maunoury, Maurice Faure, Gaillard, André Marie, and Queuille, while among the 27 opponents were MM. Daladier, Mendès-France, and de Moro-Giafferri. The abstaining Independents included MM. Pierre André and Crouzier.

Formation of Action Committee for a United States of Europe.

M. Jean Monnet, the former President of the High Authority of the European Coal and Steel Community, announced on Oct. 13, 1955, the formation of an Action Committee for a United States of Europe. It was announced at the same time that in reply to M. Monnet's invitation 33 political and trade union leaders in the six member-countries belonging to the European Coal and Steel Community had agreed to join the Action Committee, and had undertaken to make every effort to secure their organizations' support for M. Monnet's programme. The political leaders represented the Christian Democratic, Socialist, and Liberal parties in the six member-countries—Belgium, France, Western Germany, Italy, Luxemburg, and the Netherlands.

M. Monnet's letter of invitation, the terms of which, he announced, had been accepted by the politicians and trade unionists, said *inter alia*: "The committee will ensure the unified action of the member-organizations in order to arrive by concrete accomplishments at a United States of Europe. Its first task will be, by its own intervention, and by that of its component associations, to express to Governments, Parliaments and public opinion its determination to see that the Messina Resolution (see 15025 A) should become a true step towards a United States of Europe. This resolution called for the study of the expansion of the bases for economic development in the participating countries, notably by the utilization of atomic energy, and the progressive establishment of a European Common Market with the necessary safeguards and the harmonization of social policies. To achieve these objectives, it is necessary to put aside all specious solutions. Mere co-operation between Governments will not suffice. It is essential that States shall delegate certain of their powers to European federal institutions representative of all the participating countries. At the same time the close association of Great Britain with the new developments must be assured. The Committee will also urge that the European Coal and Steel Community . . . be given powers to enable it to develop its activities in the social field."

The following became members of the Committee:

Socialist Parties. Mr. J. A. W. Burger, chairman, Dutch Labour Party parliamentary group, M. Max Buset, chairman, Belgian Socialist Party; M. Jean Fohrmann, member of executive, Luxemburg Socialist Party; Signor Matteo Matteotti, secretary-general, Italian Social Democratic Party; M. Guy Mollet, secretary-general, French Socialist Party; Herr Ollenhauer, chairman, German Social Democratic Party.

Christian Democratic Parties. Signor Fanfani, political secretary, Italian Christian Democratic Party; Herr K. Kiesinger, member of the executive, German Christian Democratic Party, chairman of *Bundestag* Foreign Affairs Committee, M. Robert Lecourt, chairman, French M.R.P. parliamentary group; Mr. Bruins-Slott, Dutch Protestant Party; M. Théo Lefèvre, president, Belgian Christian Social Party; M. N. Margue, member of executive, Luxemburg Christian Social Party; Mr. C. P. M. Romme, president, Dutch Catholic Party parliamentary group.

Liberal and Other Parties. Herr Martin Blank, German Free Democratic Party; M. Maurice Destinay, president, Belgian Liberal Party; Herr Alexander Elbrachter, German Party, member of *Bundestag*; M. Maurice Faure, secretary-general, French Radical Party; M. Pierre Garet, chairman, parliamentary group, French Independent Republicans; Signor Ugo La Malfa, Italian Republican Party; M. René Pleven, French U.D.S.R.

Trade Unions. Mr. J. Albers, Dutch Workers' Movement; M. R. Bothereau, secretary-general, French *Force Ouvrière*; M. Maurice Bouladoux, president, French C.F.T.C. (Christian union); M. Auguste Cool, chairman, Belgian Confederation of Christian Trade Unions; Herr Walter Freitag, chairman of German Trade Union Federation (D.B.G.), Mr. C. P. Hazenbosch, secretary-general, Dutch Christian Trade Union; Herr Heinrich Imig, chairman, German Miners' Federation: Mr. H. Oosterhuis, chairman, Federation of Dutch Trade Unions; M. A. Krier, secretary-general, Luxemburg Workers' Federation; Signor Giulio Pastore, secretary-general, Italian Confederation of Workers; M. André Renard, deputy secretary-general, Belgian General Federation of Labour; Herr Heinrich Straeter, member of executive, German Metalworkers' Federation; Signor Italo Viglianesi, secretary-general, Italian Workers' Union.

The executive committee of the French Socialist Party decided unanimously on Oct. 13, 1955, to declare the party's adherence to the Action Committee. Announcing this decision, M. Guy Mollet, then the party's secretary-general and President of the Consultative Assembly of the Council of Europe, and now the French Prime Minister, declared that "European Socialism is determined to become the motive power in European development."

The Action Committee met in Paris on Jan. 17-18, 1956, and, after hearing a brief statement by M. Monnet on the general outline of the Euratom project, adopted the following declaration:

"(1) To ensure the exclusively peaceful development of atomic energy and the safety of the labour force and the populations as a whole, to facilitate the work and progress of the industries concerned, and to secure adequate supplies of nuclear fuel—it is essential that our countries should together delegate the proper authority and joint powers to a European Atomic Energy Commission by means of (*a*) financial and technical assistance; (*b*) the creation of the necessary joint services and establishments; (*c*) the creation of a Common Market for special material and equipment defined by the Commission; and (*d*) the pooling of knowledge.

(2) The Commission should establish a system of control as follows:

(*a*) All nuclear fuels produced in or imported into territories under the jurisdiction of our countries should be acquired by the European Atomic Energy Commission. This rule would not affect the fulfilment of international commitments now in force. The Commission should retain the outright ownership of nuclear fuels throughout all their processes of transformation. It should place them at the disposal of consumers on an equitable and non-discriminatory basis.

(*b*) The construction and use of nuclear plant should be subject to the prior authorization of the Commission,—such authorization to be given when the necessary conditions have been fulfilled enabling it to supervise the transformations and use of nuclear fuels and to ensure the safety of the labour force and the populations as a whole.

(*c*) Safety regulations for the transport and handling of material, the construction and operation of plant, and the disposal of waste products should be laid down by the Commission, in liaison with international organizations, particularly the United Nations. The Commission should ensure their implementation.

(3) The Commission should be under the parliamentary control of the Common Assembly and under the jurisdictional control of the Court of Justice of the European Coal and Steel Community.

The membership of the Common Assembly should be increased so that it might meet its new responsibilities.

The Special Council of Ministers should ensure harmony between the actions of the Commission and of the national Governments responsible for the general economic policy of their countries.

An Advisory Committee composed of workers, employers and consumers should be appointed to the Commission.

(4) European countries other than our own should be given every opportunity of participating in the Community.

(*a*) Such European countries must be able to play a full part if they accept the above rules. The greater the number of such countries, the greater the advantages each will derive from the common effort.

(*b*) In particular, every effort must be made to secure the full participation of the United Kingdom. Should Britain decline to become a full member, all necessary steps should at all events be taken to ensure her close association

(*c*) European non-member countries should be given an opportunity of using the joint services and establishments or participating in their creation, on the basis of special agreements to be concluded at a later date

(5) The Commission alone should be empowered to negotiate and conclude with third countries all agreements essential to the fulfilment of its task, especially as regards supplies of nuclear materials. The rights and obligations of the member-countries which stem from existing agreements on the peaceful use of atomic energy should be transferred to the Commission, subject to the agreement of the third countries with which such agreements were concluded."

At a further meeting of the Committee in Paris on Sept. 20, 1956, a resolution was published which, after emphasizing the dependence of Western Europe upon Middle East oil supplies as the main source of its energy, called on the Governments taking part in the Brussels Conference and the Parliaments of the countries concerned to take the steps necessary for the Euratom treaty to be submitted for ratification before the end of the year, and for Euratom to begin to operate at the beginning of 1957.

The resolution stated that the Suez crisis was "a grave warning" in this respect. Even if it should be settled peacefully, the fundamental disequilibrium caused by the growing dependence of Western Europe on oil for its energy supplies would remain. By developing and uniting their resources through Euratom, Western European countries would be able to produce atomic energy in sufficient quantities to keep their oil and coal imports within reasonable limits.

British Attitude towards Euratom.

M. Maurice Faure, the French State Secretary for Foreign Affairs, visited London from June 15-17 at the invitation of the British Government for informal discussions on European problems. During his stay M. Faure, who was accompanied by M. Marjolin (the former Secretary-General of O.E.E.C., now working at the Quai d'Orsay), saw Mr. Selwyn Lloyd (the Foreign Secretary), Mr. Nutting (Minister of State, Foreign Office), and Lord John Hope (Parliamentary Secretary, Foreign Office).

No statement was issued afterwards, but authoritative Press reports said that the discussions concerned future atomic energy developments in Europe, and in particular Euratom. Whilst it was denied on the French side that M. Faure had formally invited the British Government to join Euratom, and that this had been rejected by Britain, it was explained that the main purpose of his visit had been to stress the importance for Britain of giving Euratom all possible support within the limits of practical politics. It had been agreed that the establishment of Euratom was in no way incompatible

with atomic development through O E.E C , and that there should be close co-operation between Euratom and those members of O.E E C. not joining it Emphasis had also been laid on the urgent need to forward the integration of Western Europe before the Soviet economic threat developed and before, possibly, the tide turned once more through some feeling of frustration in France or Germany.

British Plan for Commonwealth Association with European Common Market.

Mr. Macmillan, the Chancellor of the Exchequer, and Mr. Thorneycroft, the President of the Board of Trade, outlined tentative proposals for the association of Britain and the Commonwealth with the European Common Market when he had a private meeting in Washington on Sept. 29 with the other Commonwealth Finance Ministers attending the annual meetings of the International Monetary Fund and the World Bank. On his return to London he explained the plan for a " partial free trade area " in Western Europe in a Press statement on Oct. 3.

" The British Government," Mr. Macmillan said, " has been considering in recent months what should be its attitude to such a Customs Union [i.e. the Common Market] if it came into existence. Of course, the United Kingdom might stand outside the Customs Union altogether—but this would involve at the least a loss of advantage for our exports to European markets. At the other extreme we might join the Customs Union—but this would involve the collapse of our system of Imperial Preference within the Commonwealth. Obviously, if such were the only choice, we could not hesitate We must choose the Commonwealth. But can we find a way of associating with this initiative in Europe in such a way as to benefit us all ? . . .

" The O.E.E C., at its Council meeting at the end of July, decided to set up a Working Party to examine possible forms of association between a Customs Union of the Six and the rest of O.E.E.C. This Working Party has just started its work , and the Government authorized the President [of the Board of Trade] and me to discuss the whole question of what our attitude should be with our Commonwealth colleagues.

" If Western Europe, including the U.K., could develop into a free trading area, this would undoubtedly be a great source of strength—a common market of nearly 250,000,000 people. It would, over a period, be able to provide for this country the full advantages of large-scale production which tend in the modern world to be associated with big economic units, such as the U.S A , and now the U.S S.R. If this group were strong and prosperous, it would, moreover, be advantageous for the Commonwealth from two points of view—as a market and as a source of capital. For it is the large units which can accumulate and export capital.

" The form of association we have in mind would be a partial free trade area, consisting of the Customs Union of the Six, the U K. and such other O E.E.C. countries as wished to join The difference between a free trade area and a Customs Union is of course that in the latter case there is a common tariff against all other countries, while in the free trade area each country is free to preserve its own tariff against other countries outside the area. Within such an area tariffs (except for purely revenue purposes) would be reduced in stages and ultimately abolished. This would happen over a long period—at least 10 years and possibly more—so that the industries concerned would have ample time to adjust themselves to the new state of affairs. Of course, the removal of tariffs must not be frustrated by protective quotas and other devices · they must go too.

" I said a ' partial ' free trade area—for this reason. We could not—and this is vital—include raw or manufactured foodstuffs, feedingstuffs, drink or tobacco in a free trade area of this kind. In any case every country, or nearly every country, maintains a certain level of agricultural production ; it is not altogether an economic decision—it is partly social, partly strategic, partly political. British agriculture and horticulture are in a special position, like those of many other countries. But there is another reason, just as important : the Commonwealth reason. For the Commonwealth farmer's special position in the U.K market is the basis of the whole preferential system which springs from Ottawa and gives us and them great material benefits. These preferences must be preserved. So the ' free trade area ' would be ' partial,' and exclude agriculture and foodstuffs generally from its scope. A system of this kind would not interfere with our own and other countries' rights to impose import restrictions to protect our respective balance of payments in times of emergency—in accordance with the accepted rules, under which we already work.

" This is the general idea that the President and I were discussing with our Commonwealth colleagues in Washington, and on which we have asked them to give us their considered views We must also have consultations at home. If such a system is workable, it has great attractions and possibilities. For it may be a way to reconcile and harmonize apparently conflicting interests and responsibilities. The Government has not yet arrived at a conclusion on this vital matter. But we have a responsibility to look for the answer, and we shall not shirk it. There is not a cut and dried plan, to which everyone can find a ready answer. It's a start of a plan, but if you don't start you don't get anywhere. The Government will not be in a position to make final decisions until all these discussions at home and abroad—both in the Commonwealth and in Europe—have gone further. "

" I would add these points. First, I have tried to show that we are considering the possibility of a further natural development of policies which have been proved successful in recent years—the policy of trying to reduce trade barriers and to build more opportunities for trade over as wide an area as possible. We aren't thinking in terms of a regional bloc with a big barrier against the rest of the world A strong Europe would be in a better position to complete the removal of the remaining quota discrimination against the dollar.

" Secondly, the policy of increasing trade—in the Commonwealth, in Europe and in the rest of the world—does indeed reflect our basic national interest as a country dependent upon international trade for our livelihood. It is essential to full employment. But we cannot maintain full employment in the long run unless we have ample foreign markets open to us and unless we are fully competitive to take advantage of them. If we are competitive in the foreign markets, as we must be to survive, we shall be competitive in the home market. The wider opportunities of a larger area of unrestricted trade should provide a sound base if we take full advantage of them for the maintenance of full employment and the development of the standard of living

" Thirdly, I do not think we can properly carry out our duties to the Commonwealth and to the Colonial dependencies unless we can increase our surplus wealth You cannot invest a deficit."

More than 50 prominent persons, including representatives of the principal political parties and trade unions, issued a statement on Oct. 8 urging direct British co-operation and participation in the proposed European Common Market.

The statement said that if Britain joined in the negotiations now she could make her voice heard in the framing of the treaty, without prejudicing her Commonwealth interests and with full safeguards, particularly in the field of agriculture. " It is considered," the statement said, " that the current economic crises of western Europe are due to the lack of balance between the great common market of the United States and the divided economies of Europe The Communist bloc also is moving towards even greater economic unity and now presents a challenge in Africa and Asia which Europe must fit itself to meet The European Coal and Steel Community, which Britain refused to join, has demonstrated the advantages of a European solution "

The signatories of the statement included Mr. E. Beddington-Behrens, Lady Violet Bonham-Carter, Lord Boyd Orr, Mr. Alan Bullock, Mr. Aidan Crawley, Sir Oliver Franks, Mr. C. J. Geddes, Mr. R. J. Gunter, Dame Florence Hancock, Mr. Roy Harrod, Lord Henderson, Mr. Christopher Hollis, Sir Stephen King-Hall, Sir Will Lawther, Lord Layton, Sir Andrew McFadyean, Lord Merthyr, Lord Perth, Lord Rea, Mr Lawrence Robson, Lord Salter, Mr. Sam Watson, Mr. Graham White, and Mr. Woodrow Wyatt.—(Le Monde, Paris - Le Figaro, Paris - Frankfurter Allgemeine Zeitung - Die Welt, Hamburg - Giornale d'Italia, Rome - Corriere della Sera, Milan - Treasury Press Office, London - Times - Daily Telegraph - Manchester Guardian - European Coal and Steel Community, Luxemburg - Council of Europe, Strasbourg)

A. ORGANIZATION FOR EUROPEAN ECONOMIC CO-OPERATION. — Facilities for Increased Trade with Yugoslavia.

The Council of the O.E.E.C. decided on Oct. 15 to recommend to member-countries to enter into bilateral discussions with the Yugoslav Government with a view to ensuring, wherever provisions to this effect did not exist already, that 10 per cent of Yugoslavia's earnings from her exports to member-countries of O.E.E C. should be freely transferable between the latter. In this way Yugoslavia would be able to use part of her earnings for purchases in any O.E.E.C. country, thus developing economic co-operation and facilitating trade between her and the members of O.E.E.C.

The Council also decided to set up a Working Party which would be instructed to study arrangements for holding discussions with the Yugoslav Government, within the Organization, on any trade, financial or economic matters of mutual interest.

Yugoslavia has been represented in the O.E.E.C. by an observer since March, 1955.—(O.E.E.C., Information Division)

B. INTERNATIONAL BANK - INTERNATIONAL MONETARY FUND. — Argentine and Vietnamese Adherence.

Argentina became a member of the International Monetary Fund and the International Bank for Reconstruction and Development on Sept. 20, and Vietnam on Sept. 21, bringing the total membership of the Fund and the Bank to 60. Argentina's quota in the Fund and her share in the capital stock of the Bank were fixed at $150,000,000 each, and Vietnam's quota and share at $12,500,000.

The adherence of these two countries brought the total of members' quotas in the Fund to $8,918,000,000, and the total subscribed capital of the Bank to $9,261,200,000.—(International Monetary Fund, Washington) **(Prev. rep. 14420 A.)**

A. PAKISTAN. — Political Developments in East Pakistan. - Resignation of Sarkar Ministry. - Temporary Suspension of Constitution. - Formation of Rahman Khan Ministry. - Repeal of East Bengal Public Safety Act.

The Governor of East Pakistan, Mr. Fazlul Huq, announced on Aug. 9 that the Provincial Assembly, which had been prorogued since May 22, would meet on Aug. 13 to discuss the Budget. In preparation for the new session, seven motions of no confidence in Mr. Sarkar's United Front Government were submitted by the Opposition parties, in addition to motions condemning the Government's food policy and the detention of members of the Assembly under the East Bengal Public Safety Act. Mr. Fazlul Huq had previously (Aug. 1) amended the Assembly's rules of procedure by increasing from 99 to 130 the number of members whose support was needed before the Assembly could consider a no-confidence motion.

On Aug. 13, four hours before the Assembly was due to meet, it was prorogued by Mr. Fazlul Huq on Mr. Sarkar's advice. Talks on the situation opened in Karachi on Aug. 18 between President Mirza and Mr. Mohammad Ali (then the Pakistani Prime Minister) on the one hand, and Mr. Fazlul Huq and Mr. Sarkar on the other, and on Aug. 20 Mr. Suhrawardy (leader of the Awami League) also met the President and the Prime Minister for discussions. The Working Committee of the East Pakistan Awami League adopted on Aug. 19 a resolution calling on the President to remove Mr. Fazlul Huq from office, on the ground that he had shown party bias in supporting a Ministry drawn from a party of which he was still the leader.

Mr Mohammad Ali issued a statement on the Central Government's attitude on Aug. 23.

He denied that the Assembly had been prorogued with the Central Government's approval or knowledge, and stated that the Government had been informed of the prorogation only after it had taken place. The Central Government had therefore counselled the Chief Minister of East Pakistan to advise the Governor that the Assembly must be summoned to meet before Aug. 31, to ascertain whether he enjoyed the confidence of the majority of its members. Budget expenditure had been authorized till the end of August, and it was the Chief Minister's duty to get the Provincial Budget for the rest of the financial year passed before Aug. 31. The prorogation of the Assembly, however, had deprived its members of an opportunity to pass or throw out the Budget, and thereby express their confidence or lack of it in the Chief Minister.

As there was therefore no time for a proper discussion before Aug. 31, the statement continued, expenditure would have to be authorized till the end of September by Presidential proclamation. If the Assembly met before Aug. 31 and the Chief Minister obtained a vote of confidence, he would present the Budget in time to have it passed before the end of September; if, on the other hand, he failed to obtain a vote of confidence or the Assembly was not summoned to meet before Aug. 31, the Governor would take immediate action to form an alternative Government. "I trust," the statement concluded, "that this exposition of the policy of the Central Government will reassure the people that it is doing everything possible to uphold democratic traditions and the conventions envisaged in the Constitution."

The United Front Parliamentary Party, after discussions lasting three days, decided on Aug. 29 to advise Mr. Sarkar's Ministry to resign; it also adopted a resolution endorsing Mr. Sarkar's advice to the Governor to prorogue the Assembly, and describing Mr. Mohammad Ali's advice to Mr. Fazlul Huq as "uncalled-for and beyond the scope of the Constitution." Mr. Sarkar consequently submitted his resignation on Aug. 30, and on the following day President Mirza provisionally suspended the Constitution in the Province and, for the second time within just over three months, proclaimed President's rule in accordance with Section 193 of the Constitution.

Mr. Fazlul Huq invited Mr. Ataur Rahman Khan, leader of the East Pakistan Awami League, to form a new Ministry on Sept. 4. The new Cabinet took office on Sept. 6 (when President's rule was ended) and was enlarged to 11 members on Sept. 18. In its enlarged form it consisted of seven Awami League members, two Congress Party members, representatives of the United Progressive Party and the pro-Communist *Ganatantri Dal* (Democratic Party), and a dissident United Front member.

The membership and distribution of portfolios was as follows. Mr. Ataur Rahman Khan (Awami League), Chief Minister, Home Affairs, General Administration, Food, Relief and Rehabilitation, Jute, and Planning, Mr. Manoranjan Dhar (Congress), Finance and Minority Affairs; Sheikh Mujibur Rahman (Awami League), Commerce, Labour and Industries, Agricultural and Industrial Development, Social Welfare, Community Development Projects, and Anti-corruption; Mr. Kafiluddin Chowdhury (Awami League), Communications, Buildings and Irrigation, Flood Control, and Forests; Mr. Mahmud Ali (*Ganatantri Dal*), Revenue, Education, State Acquisition, and Jails; Mr. Khairat Hussain (Awami League), Agriculture, and Veterinary and Animal Husbandry; Mr. Abdur Rahman Khan (Awami League), Co-operation, Rural Indebtedness, and Agricultural Marketing; Mr. Masihur Rahman (Awami League), Public Relations and Local Government; Mr. Mansur Ali (Awami League), Legislation, Judiciary, and Registration, Mr. Dhirendra Nath Dutta (United Progressive Party), Medical and Public Health; Mr. Sarat Chandra Majumdar (Congress), Excise, and Salt and Fisheries

Serious unrest had meanwhile developed in East Pakistan as a result of the food situation.

On the recommendation of the United Front Parliamentary Party, the Army had handed back control of food distribution to the civil authorities on Aug. 12, after cancelling 250,000 forged ration cards and seizing large quantities of hoarded grain. This announcement gave rise to widespread anxiety, and on Sept. 3 crowds of villagers marched on Dacca demanding rice at fair prices. An order was issued forbidding meetings of more than five people, and on the following day four people were killed and over 20 injured when the police opened fire on demonstrators. On Sept. 5 a general strike took place in Dacca as a protest against the police firing, and the Awami League threatened to organize a civil disobedience campaign unless the Central Government sent 65,000 tons of grain to East Pakistan within a fortnight.

A conference in Dacca presided over by President Mirza decided on Sept 7 to sanction the procurement from abroad of 500,000 tons of foodgrains by the end of October, instead of the 400,000 tons previously arranged to be supplied by the end of December; to call a conference of district magistrates and Food Department officials to assess the seriousness of the food position and the measures needed to meet it; to vest in district magistrates full powers to deal with food administration and offences against food regulations in their areas, and to establish local food committees in areas where they did not exist. A Foreign Ministry spokesman stated on Sept. 19 that the Indian Government had sanctioned a loan of 2,000 tons of rice to Pakistan.

The Provincial Assembly completed its first full day's business on Sept. 17, when Mr. Ataur Rahman Khan presented his Budget for the remaining six months of the current financial year. Although the Assembly was elected in March 1954, Governor's rule was imposed in the following May, and Mr. Sarkar's Government, which took office in June 1955, did not convene the Assembly until May 22, 1956, when the Speaker adjourned it *sine die*.

The Assembly repealed the East Bengal Public Safety Act on Sept. 20. The Ministry had previously ordered on Sept. 7 the immediate release of 70 political prisoners detained under the Act, the repeal of restrictive orders on 13 other prisoners, and a review of the cases of 10 foreign nationals held under the Act. (Pakistani High Commissioner's Office, London - Dawn, Karachi - Times) **(Prev. rep. 15006 A.)**

B. CEYLON - COMMUNIST CHINA. — Preliminary Agreement on Establishment of Diplomatic Relations and Closer Economic and Technical Co-operation.

Discussions opened in Peking on Sept. 9 between a Ceylonese delegation, headed by Sir Claude Corea, and a Chinese Government delegation, led by Mr. Chang Han-fu (Deputy Foreign Minister).

It was announced on Sept. 16 that both sides had agreed (*a*) to recommend to their respective Governments the establishment of diplomatic relations at ambassadorial level as soon as the necessary arrangements could be made, (*b*) that trade relations between the two countries should be expanded and negotiations for a new trade and payments agreement be commenced as soon as possible; (*c*) that economic co-operation should be developed "on a basis of mutual assistance" and, with this in view, that negotiations should be commenced as soon as possible for the conclusion of a technical co-operation agreement; (*d*) that the aforementioned negotiations should be started during the forthcoming visit of a Chinese trade delegation to Ceylon; and (*e*) that cultural relations between Ceylon and Communist China should be fostered "in order to promote closer friendship and mutual understanding between their peoples."—(Ceylon Government Information Dept., Colombo) **(Prev. rep. Diplomatic Relations, 14849 A; Ceylon-China Trade, 14533 B.)**

C. INDONESIA. — Diplomatic Appointments.

The following diplomatic appointments were announced by the Indonesian Foreign Ministry on Aug. 2: Dr. Sunario (a former Foreign Minister) to become Ambassador in London; Mr. R. Wiwoho Partowidjojo as Minister to Belgium; Mr. M. L. Latjuba as Ambassador to Egypt; Dr. Hadji Rasjidi as Ambassador to Pakistan; Dr. A. Jusuf Helmi as Ambassador to Australia; Dr. Nazir Dt. Pamuntjak as Ambassador to the Philippines; Dr. Sudarsono as Ambassador to Yugoslavia; and Mr. Bambang Sugeng (former Army Chief of Staff) as Minister to the Vatican.—(Indonesian Embassy, London) **(Prev. rep. 13590 C.)**

A. CANADA.—Post-war Financial Assistance Abroad.

A report issued by the Canadian Department of External Affairs on Oct. 15 stated that from the end of the second World War to March 31, 1957 (the end of the fiscal year 1956-57) Canada would have provided aid to other countries worth Can.$4,050,800,000. This included post-war reconstruction loans (made between 1945 and 1947) totalling over Can.$1,700,000,000; military aid to NATO countries totalling over Can.$1,400,000,000; grants to U.N. Agencies and Programmes totalling over Can.$215,000,000; Colombo Plan aid totalling over Can.$162,000,000; relief credits in former enemy-occupied countries totalling over Can.$105,000,000; subscriptions to international financial institutions totalling nearly Can.$375,000,000; and special relief grants to meet various emergencies (floods, earthquakes, storms, famine, etc.), totalling over Can.$8,000,000.

A breakdown of the total covering the period March 31, 1945-March 31, 1957 was as follows (in million Can.$):

Reconstruction Loans.

These comprised loans to Belgium, 68 8, China, 65.0; Czechoslovakia, 16.7; France, 253.4; Netherlands, 123.9; Indonesia, 15.5; Norway, 23.7; United Kingdom, 1,185.0; and U.S.S.R., 15.2; total, 1,767.2.

Military Relief.

Total to Balkan countries, Belgium, Denmark, France, Italy, Luxemburg, Netherlands, and Norway, 105.2

Grants.

(*a*) **U.N. Agencies and Programmes.** U.N. Relief and Rehabilitation Administration, 154.0; Post-UNRRA Relief, 12.1; Intergovernmental Committee on Refugees, 0.2, International Refugee Organization, 18.8; Intergovernmental Committee for European Migration, 0.1; U.N. High Commissioner for Refugees, 0 41, U.N. Children's Fund, 10.05, U N. Korean Reconstruction Agency, 7.75; Palestine Arab Refugees, 4.54; and U.N. Expanded Technical Assistance Programme, 7.2; total, 215.15.

(*b*) **Colombo Plan.** Capital and Technical Assistance, 162.3.

(*c*) **Special Relief.** Greece (wheat), 0 85, Korea (fish), 0.75; Pakistan (wheat), 5.05; Greece (earthquake relief) 0 5, India, Pakistan, Nepal (floods), 0.23; Haiti (fish), 0.03; Japan (flood relief), 0.04; Yugoslavia (fish), 0 05; British West Indies (hurricane relief), 0.05; European Flood Relief (1952), 1 0, and India (flood relief), 0.2; total, 8 6

(*d*) **NATO.** Mutual Aid (transfers from Canadian stocks, new production items, NATO aircrew training, etc.) and infrastructure, 1,417.9.

Other International Organizations.

International Bank, 70.9, International Monetary Fund, 300.0; International Finance Corporation, 3 6.

Since the inception of the Colombo Plan in 1950 Canada had contributed over $128,000,000 up to 1956, whilst for 1956-57 a further contribution of $34,400,000 had been approved by Parliament. Some of the most important projects assisted by Canadian funds were:

(*a*) an atomic reactor in India which also will be available for use by other Colombo Plan countries (see 14877 B),

(*b*) 120 steam locomotives for India to help re-equip the transportation systems (see 14651 A);

(*c*) the Canada Dam to provide flood control for the Mayurakshi River, generate hydro-electric power, and irrigate some 600,000 acres of land in West Bengal (see 14509 E),

(*d*) the modernization of the Bombay Transport System (see 12952 A);

(*e*) a cement plant in the Thal development area in Pakistan (see 14651 A; 13429 A; 12952 A);

(*f*) electrical equipment and engineering services for the Warsak Project near the Khyber Pass in Pakistan which will provide 160,000 kw. of power for West Pakistan (see 14651 A, 12952 A);

(*g*) aerial surveys of the resources of Pakistan, India and Ceylon (see 13429 A; 12952 A);

(*h*) a fisheries research and development scheme in Ceylon to assist the development of that country's fishing industry (see 14651 A; 13429 A, 12952 A);

(*i*) a hydro-electric project on the Kundah River in Madras, India.

From 1950 to March 31, 1956, Canada provided training for 340 trainees under the U.N. Technical Assistance Programme, whilst at least 77 Canadians served overseas as U.N. experts. Under the Colombo Plan, training was provided for 410 students, whilst 69 Canadian experts served abroad.—(Dept. of External Affairs, Ottawa)

B. FRANCE. — C.-in-C., French Forces in Germany.

It was officially announced in Paris on Aug. 9 that Lieut.-General Jacquot had been appointed C.-in-C., French Forces in Germany, in succession to General Noiret, who was retiring. General Jacquot (54) was one of the leading figures in the Resistance Movement in south-western France during the Second World War, and more recently was the last French Commander-in-Chief in Indo-China.—(Le Monde, Paris)

(Prev. rep. 14949 A.)

C. ISRAEL. — Canadian Sale of Jet Fighters.

The Canadian Prime Minister, Mr. St. Laurent, announced on Sept. 21 that, after consultation "with certain friendly Governments," Canada had decided to sell to Israel 24 Canadian-built F86 *Sabre* jet fighters. An Israeli request for the supply of these fighters had been under consideration by the Canadian Cabinet since May.

The Prime Minister's statement declared that the Canadian Government had now decided that it would not be justified in refusing the request, and continued "The Government has been greatly influenced in this decision by the fact that Israel's neighbour has recently received large numbers of jet fighters from the Soviet Union, and, even more important, a considerable number of modern jet bombers, of which Israel possesses none. Assurances have been received from Israel that the interceptors in question will be used solely for defence against aggression."

Mr. St. Laurent added that approval for the *Sabre* jets covered a period of six months, during which time the aircraft would normally be made available and shipped. If at any time during that period the political circumstances should change in any way to warrant a cancellation or postponement of the outstanding part of the order, such action would be taken.

The cost of the aircraft will be about Can.$6,000,000.

In Washington, a spokesman of the State Department said on the same day that Canada had consulted the U.S.A. before agreeing to the sale of fighters to Israel, and that the U.S. Government had raised no objections.—(Montreal Star - Times - Manchester Guardian - New York Times)

D. INDIA - PAKISTAN. — Canal Waters Dispute. - New Interim Agreement.

The Governments of India and Pakistan announced on Sept. 26 that a new interim agreement covering *ad hoc* transitional arrangements regarding the division of the waters of the Indus River system for the year ending March 31, 1957, had been signed in Washington on the previous day by the leaders of the delegations of the two countries. The new agreement continued the arrangements for establishing the amounts of water which India could withdraw by canal from the three eastern rivers (the Ravi, Beas, and Sutlej), on lines similar to those of previous transitional agreements. The announcement also said that the terminal date for the discussions on the preparation of a permanent comprehensive scheme had been extended to March 31, 1957.

Although the period previously envisaged for the termination of the negotiations had expired on March 31, 1956, without a permanent agreement being reached, it had been announced by the International Bank on April 30 that discussions between the two delegations were continuing.—(Indian and Pakistani High Commissioners' Offices, London) **(Prev. rep. 14551 C.)**

E. UNITED NATIONS. — Dismissal of Soviet Translator.

U.N. Headquarters in New York announced on Aug. 24 that a Soviet translator, Viktor Ivanovich Petrov, had been dismissed by the U.N. Secretary-General "on the basis of information received . . . concerning activities of Mr. Petrov not permitted under the provisions of the staff regulations relating to standards of conduct for international civil servants."

The U.S. State Department announced on the same date that Dr. Hammarskjold's action had been based on evidence furnished by the U.S. Department of Justice, showing that Petrov had unsuccessfully attempted to obtain from an employee of a U.S. aircraft company secret information on military aircraft. Petrov, who had been working for the U.N. Secretariat since 1953, had left the U.S.A. on Aug. 23.

F. WESTERN GERMANY - YUGOSLAVIA. — German Ratification of War Claims Agreement.

The *Bundestag* approved on Sept. 27 ratification of the agreement of March 10 between Western Germany and Yugoslavia on the settlement of Yugoslavia's pre-war and war claims against Germany, as well as her post-war commercial indebtedness to the German Federal Republic.

The improvement in the relations between the two countries as a result of the conclusion of the agreement was evidenced by an official visit which a party of Yugoslav members of Parliament, led by M. Pijade (President of the Federal National Assembly), paid to Western Germany during the last week of September.—(Tanjug Agency, Belgrade) **(Prev. rep. 14839 B.)**

A. UNITED KINGDOM. — New Legislation against Restrictive Trade Practices. - Work of Monopolies Commission in 1955.

The Government's Restrictive Trade Practices Bill received the Royal Assent on Aug. 2. Preparation of legislation had been announced on July 13, 1955, by the President of the Board of Trade (Mr. Thorneycroft) during the House of Commons debate on the Monopolies Commission's report on Collective Discrimination (see 14409 A), the Bill being published on Feb. 15, 1956. It embodied the following main principles :

(*a*) the prohibition of the collective enforcement of resale prices ;

(*b*) provisions for the possibility of individual enforcement of resale prices by civil action in the courts ;

(*c*) the setting-up of a Registry of Restrictive Trading Agreements and the public registration of a wide range of agreements, to be selected in sequence by the Board of Trade, covering price rings and other restrictive practices presumed to be against the public interest ;

(*d*) the establishment of a Court, with the status of a High Court, consisting of judges and laymen (sitting in divisions each of a presiding judge and 2 laymen), to decide whether particular registered agreements were in the public interest or otherwise and should therefore be allowed or not ;

(*e*) the reconstitution of the Monopolies Commission to deal with matters affecting single-firm monopolies and with export arrangements, which were not affected by the prohibitions under (*a*) above and were outside the scope of the new Court.

The Bill enumerated the following seven grounds on which it could be pleaded before the Restrictive Practices Court that a practice presumed to be against the public interest was in fact justified :

(i) That the restriction was reasonably necessary for the protection of the public in connexion with the purchase, consumption, installation, or use of goods requiring special knowledge or skill.

(ii) That the removal of the restriction would deny to the public other specific and substantial benefits.

(iii) That the restriction was reasonably necessary as a defence against a large firm in the same trade which was itself resorting to restrictive practices.

(iv) That the restriction was reasonably necessary to enable the parties to negotiate fair terms with persons controlling a preponderant part of the trade.

(v) That the restriction was an essential part of a certified redundancy scheme.

(vi) That the removal of the restriction would be likely to have a persistent adverse effect on the general level of unemployment in an area in which a substantial proportion of the industry was situated, or would be likely to cause a substantial reduction in the volume of earnings of the export trade of the United Kingdom

(vii) That the restriction was reasonably required for the maintenance of another restriction which had been found not to be contrary to the public interest.

It would also have to be shown that the restriction had not operated and was not calculated to operate to an unreasonable extent to the detriment of persons not parties to the agreement—notably purchasers, consumers, users or sellers of the goods concerned.

Other provisions of the Bill laid down :

(*a*) That a maximum penalty of £100 could be imposed for failure to register a practice after notice had been given by the Registrar, with further penalties not exceeding £100, or £10 a day for every day for which the default continued, after a first conviction.

(*b*) That penalties up to two years' imprisonment could be imposed on indictment for making false statements or falsifying documents within the purview of the Court

(*c*) That the judgment of the Court should be reached by a majority of all the members sitting, but that the decision of the presiding judge would prevail on a point of law.

(*d*) That appeal on a matter of law against a decision of the new Court could be made to the Court of Appeal.

(*e*) That the judges appointed to the new Court should include one judge of the Supreme Court of Northern Ireland.

(*f*) That where restrictive practices had been abandoned as a result of a report by the Monopolies Commission made before the Bill came into force, the industries concerned might reinstate them only with the permission of the new Court, which could not be given until three years after the new Bill came into force.

(*g*) That patents would be exempted from registration as restrictive practices.

The second reading debate took place on March 6.

Moving the second reading of the Bill, **Mr. Thorneycroft** said the background of any Bill on this subject was a free enterprise society, and the purpose of any such Bill must be to secure that the virtues of free enterprise—initiative, adaptability, and risk-taking—were not throttled by restrictions which industry imposed on itself. Agreements between traders were tempting ways of avoiding competition ; they thrived in the thirties, when it was powerfully argued that such devices mitigated unemployment and staved off bankruptcy by avoiding cut-throat competition

To-day the problems had undoubtedly changed, but many of the practices continued. They were, indeed, widespread, and although unemployment and stagnation had given way to rising prices and inflation, new arguments had been found for the practices. It was now claimed that they ensured supplies at stable prices while the manufacturers competed in quality and service. If people were free to select where competition operated, it would tend to operate where it had the least marked effect.

All who had studied the matter agreed that some of the practices might be beneficial. But whatever benefits might flow from restrictive arrangements, whatever stability might be secured by them, a price had to be paid for them, which, in an age of rapid technical change, we could ill afford to pay , and the parties to an agreement of this character were not the right people to judge whether the practice was or was not against the public interest.

Broadly, the Bill covered all agreements and arrangements between persons under which mutual restrictions were accepted on the prices, terms, and conditions of trading, what was to be sold, to whom, and where it was to be sold. The power to register was wide, covering virtually all the known restrictive practices by rings and devices in the supply of goods

Mr. Thorneycroft, pointing out that services were excluded from the operation of the Bill, explained that services were coming very close to restrictive practices by workers, the inclusion of which seemed inappropriate to this Bill. This did not mean that nothing could or should be done about them, but the passing of an effective measure in the direction they were considering was an essential pre-requisite to any advance on the other front.

Describing the functions of the Registrar of Restrictive Trading Agreements, Mr. Thorneycroft said he would be appointed by the Crown, and his task would be to keep the register and to initiate proceedings before the Court The Registrar would be advised by the Treasury Solicitor and would be represented in court by counsel nominated by the Attorney-General. It would be his duty to ensure that all relevant facts were placed before the Court, and he would consult the Attorney-General through the Treasury Solicitor on any matters of doubt or difficulty.

Mr. Thorneycroft went on to say that the Government had adopted the principle that the practices which were to be registered were presumed to be against the public interest, and the Bill laid down what had to be established to show an exception. He was firmly of the opinion that it was right to place the onus in this matter fairly and squarely on the shoulders of industry. The parties to these agreements believed firmly, sincerely, and sometimes even passionately that far from causing harm, they would do positive good to everybody concerned. It was not unreasonable that they should be placed in a position to put forward their arguments in favour of that contention.

Discussing the clauses in the Bill making collective enforcement of resale prices unlawful while permitting individual resale price maintenance through the ordinary courts, Mr. Thorneycroft said : " While there are respectable arguments in favour of resale price maintenance, maintaining prices is surely not an end to which all other factors should be sacrificed. Rather, indeed, the reverse. There appears to be a wide measure of agreement for the conclusion that enforcement by trade associations of resale prices greatly exacerbates any evils which might flow from it. There has been a steady expansion of this system under the influence of trade associations, generally of manufacturers and retailers together, and it has led to ever more inflexible and far-reaching devices and arrangements in which everybody is expected to participate It is in this that the main danger lies. A system which could be simply a device to protect the manufacturer of branded goods against the use of his goods in loss-leading has degenerated into a system where great areas of trade are frozen into a fixed pattern of price and profit margins."

The effect of the Government's proposals would probably, perhaps certainly, be a reduction in the area of resale price maintenance, and they would remove the worst features of the system, including in particular its inflexibility. They would provide adequate means of dealing with the problem of the loss-leader, and they would get rid of both the stop list and the private court. These were important and substantial advantages in a field in which no other Government had yet dared to advance at all.

Mr. Douglas Jay (Lab) moved an official Opposition amendment " that this House. believing that consumers should be set free from exploitation by monopolies and restrictive practices operated for private gain, declines to give a second reading to a Bill which disregards the main recommendations of the Monopolies Commission Report of June 1955, and fails to provide speedy and effective action to protect the public."

He said that the Opposition wanted to secure speedy protection for the consumer and they did not believe that the Bill would provide it. " The Opposition," he declared, " take their stand on the basic principle that where there is a monopoly there ought to be public ownership, and where there is private ownership there ought to be competition Monopolistic and restrictive practices are bad because they limit experiment, innovation, progress, and trade. Private enterprise cannot be justified without competition."

Mr Jay contended that the Bill failed to carry out the main majority recommendation of the Monopolies Commission. Under the long and laborious procedure it would be years before this legislation would have any real impact on the present " dark and dense jungle of restrictive practices." It would be quicker and fairer to

apply the Monopolies Commission's recommendations as to procedure to the practices already examined and condemned, and the registration procedure to the wider group where there were admittedly grounds for further investigation

Sir Lynn Ungoed-Thomas (Lab.) said that under the Bill the Court had to decide, without definition, whether or not an agreement was in the public interest That was not the function of a Court at all, but a political or economic decision which should be taken by the executive and for which they should be responsible to Parliament. One did not convert a political matter into a legal matter merely by asking a judge's opinion about it. Judges were being dragged into a vast area of political and economic questions, and they would inevitably be criticized.

There was nothing dynamic in the Bill The Government were divided between *laissez faire* and private monopolists Mr Thorneycroft was an ardent *laissez faire* doctrinaire, and there were alongside him others who believed in restrictive practices. The Bill was a compromise between the two, and for every proposal there was a counter-proposal " It is a formula to conceal dissension and placate the vested interests in the Conservative Party," he asserted. " It is unconstitutional and bogus."

Winding up for the Government, **Mr. Derek Walker-Smith** (Parliamentary Secretary, Board of Trade) denied that there would be delays in the Government's method. They proposed to make an order for the very early registration of common prices, level tendering, and collective discrimination, which formed the great bulk of restrictive trade practices They hoped to get these agreements registered within about three months of making the order. " Those who vote against the Bill," he declared, " will be making a great tactical error They will be voting against a Bill which will do away with the whole unpopular paraphernalia of collective enforcement, which makes the first comprehensive attack on restrictive trade practices, and whose object is to make the economy freer, more flexible, more vigorous, and more vital."

The amendment was rejected by 319 votes to 252, and the Bill read a second time.

Nearly 300 amendments from both sides of the House were presented before the Bill was considered in Committee between April 11 and May 17. The principal Government amendments agreed to during the Committee stage were as follows :

(1) To increase the number of lay members of the Restrictive Practices Court from nine to ten

(2) To empower the Lord Chancellor to select one of the five judges of the Courts for appointment as President of the Court.

(3) To put registered designs, for the purposes of the Bill, into the same class as patents.

(4) To exclude from registration those agreements relating exclusively to exports, or to goods bought, sold, or delivered outside the United Kingdom

In addition, the following amendments moved by Conservative " back bench " M.P.s were agreed to (names of sponsors in parentheses) ·

(5) To enable a person, who proved that he had ceased to be a party to an agreement which was subject to registration, to have his name deleted from the register (**Mr. C. Remnant**).

(6) To ensure that the authority of the High Court should be obtained before a representative of the Registrar might enter any business or private premises for the purpose of securing information in connexion with an alleged restrictive practice (**Sir John Barlow**).

(7) To provide that regulations made under the Bill should be subject to annulment by Order of either House of Parliament (**Mr. C. J. Doughty**).

Opposition amendments rejected included the following :

(*a*) To provide that the decision as to whether an alleged restrictive practice ought or ought not to be prohibited should be made by a tribunal responsible to the President of the Board of Trade, and not by a court of law (**Sir Lynn Ungoed-Thomas**).

Sir Lynn Ungoed-Thomas argued that the question of whether or not a restrictive practice was against the public interest was essentially a political one, and not a matter for a court of law

In the debate, **Mr. E. Fletcher** (Lab.) gave a warning that the Bill, as it stood, would " bring the judges into the arena of political controversy," but **Mr. Thorneycroft** stressed that the proposed transfer of responsibility would " inevitably lead to a bottleneck at the top, since no President of the Board of Trade could give more than a fraction of his time to the study of " stacks of complicated evidence." The amendment was defeated by 209 votes to 162.

(*b*) To delete the subsection empowering the Restrictive Practices Court to allow a restriction to be retained if its removal would " deny to the public specific and substantial benefits or advantages " (**Mrs. Barbara Castle**)

Mrs Castle contended that there was nothing in the Monopolies Commission's report to justify the inclusion of this subsection, which, she said, " reflects the views of the British Industries Federation," and was so " ludicrously wide " as to " render null and void the whole attack on restrictive practices."

After **Mr. Thorneycroft** had stressed that under the Bill all such restrictions were presumed to be against the public interest unless the contrary could be proved, and that the subsection merely defined the sort of argument that might be invoked, the amendment was defeated by 225 votes to 123.

(*c*) To provide that any discount, rebate, or dividend granted by a co-operative society to its customers should not be considered a breach of resale price conditions (**Mr. Oram**).

Mr. Oram argued that, as drafted, the clause permitting individual firms to enforce resale prices constituted a threat to co-operative societies, as some manufacturers imposed bans on the payment of dividends on their products. By giving legal backing to these bans the Bill would encourage other manufacturers to impose similar bans, and the amendment was therefore intended to preserve the right of co-operative societies to pay dividends to their customers.

The amendment was defeated by 230 votes to 196 after **Mr. Thorneycroft** had pointed out that the Bill did not affect the conditions which individual suppliers could impose.

(*d*) To cancel the proposal to reduce the maximum membership of the Monopolies Commission from 25 to 10 (**Mr. George Darling**).

Mr. Darling argued that the Commission ought to be left in its present form to enable it to exercise supervisory control over the many restrictive agreements which the Court might approve. He added that what was needed was " a permanent fact-finding body to examine British industry and find out what is going on " ; in particular it might review the developments taking place as a result of the progress of automation.

After **Mr. Walker-Smith** had stated that the Government had no intention of leaving the Monopolies Commission inactive or inefficient, but considered that its size should be reduced to suit the expected volume of work, the amendment was rejected by 199 votes to 159

(*e*) To provide that the Board of Trade should publish regular reports on the work of the Restrictive Practices Court (**Sir Leslie Plummer**).

Defeated by 159 votes to 119, after **Mr. Thorneycroft** had stressed that the Court's decisions were " matters for itself, and not for the Board of Trade "

(*f*) To secure that the lay members of the Restrictive Practices Court should act as assessors only, and should not participate in the Court's proceedings in the full manner in which the judges would do (**Sir L. Ungoed-Thomas**)

Rejected by 149 votes to 108 after **Mr. Walker-Smith** had explained that the Government considered that the Court would be much more likely to get high-quality assessors if they had the status of full members rather than that of mere technical assessors

(*g*) To omit from the Bill the subsection exempting patents from registration as restrictive practices (**Mr. E. Fletcher**)

Defeated by 263 votes to 222.

(*h*) To speed up procedure by making unlawful, from a date 18 months after the enactment of the Bill, any form of collective discrimination falling within the six categories defined in the Monopolies Commission's report, unless a *prima facie* case for its continuance had been made out before the Court (**Mr. Jay**).

Mr. Thorneycroft pointed out that the amendment would automatically render illegal " any agreement which has not had the luck to be heard within the prescribed 18 months," and the amendment was thereupon negatived by 217 votes to 177

(*i*) To fix a definite date by which agreements should be registered, instead of leaving it to the Board of Trade to stipulate the periods for registration (**Mr. Jay**).

Defeated by 264 votes to 205.

(*j*) To provide that any agreement not registered by a definite date should be treated as if it had been found by the Court to be against the public interest (**Sir Lynn Ungoed-Thomas**).

Rejected by 242 votes to 199 after **Mr. Thorneycroft** had promised to consider adding a provision to enable the Registrar, where there had been a deliberate failure to register, to apply for an Order as if the agreement had been found contrary to the public interest

Other rejected amendments included the following :

(*k*) To subject the Registrar in the exercise of his functions to Board of Trade direction (**Mr. A. Holt**, Lib.)

This amendment was rejected by 243 votes to 204 after **Mr. Walker-Smith** had said that to fetter the Registrar with directives, apart from the guidance contained in the Bill, would make for bad administration.

(*l*) To provide that the Registrar should be appointed by the Attorney-General instead of by the Crown (**Sir J. Barlow**).

After lengthy debate this amendment was rejected, **Mr. Thorneycroft** declaring that to make a departmental Minister responsible for answering day-to-day questions about procedure would be " contrary to the principles of the Bill "

(*m*) To secure that the Registrar should be a barrister or solicitor of at least seven years' standing (**Mr. Remnant**).

Negatived after **Mr. Thorneycroft** had said that it would too greatly restrict the choice of a suitable person

During the Report stage on June 18, a new clause was introduced by Mr. Thorneycroft in accordance with his earlier promise (see above), enabling the new Court, where there was a wilful refusal to register any agreement, to ban it for at least two years. Mr. Thorneycroft also moved amendments to exempt from registration (i) ordinary supply agreements between two persons, (ii) arrangements entered into by a ring where the ring was itself registered, and (iii) sole agency agreements. Other Government amendments were introduced to exempt from registration certain agreements to exchange unpatented information, and inserting further provisions to prevent the collective enforcement of resale prices, e.g. by agreement to sell through a single wholesaler. These amendments were all agreed to.

The Bill was given an unopposed third reading on June 14.

Mr. Thorneycroft, moving the third reading, stressed that the Bill had come through unchanged in its principles and structure but had been improved in its clarity and in the machinery used for its implementation. Parliament would wish to pay tribute to the Monopolies Commission, without whose work it would have been impossible to construct this measure. It was based not merely on their large-scale report on collective discrimination, but on the sum total of the knowledge which they brought to bear in a large number of reports.

Mr. Jay declared that although the Opposition regarded the Bill as far from a good Bill, it had been sufficiently improved to justify their not voting against it on third reading. He added, however, that unless there were on the Restrictive Practices Court a majority of really independent members, who believed that the consumers' interest should be given the benefit of the doubt, there was a danger of a series of decisions white-washing restrictive practices.

In the House of Lords the Bill passed its second reading on June 26 and was considered in Committee on July 11-12.

Lord Bailieu moved an amendment on July 11 to provide that, for the purposes of any proceedings before the Court, a restriction accepted in pursuance of any agreement should not be deemed to be contrary to the public interest if the Court was satisfied on any one of the seven exemptions.

He said he wished to draw the attention of the House to what industry regarded as a fundamental weakness in the Bill, and to which they took great exception. The presumption underlying the Bill was that activities carried on for years by industry, often at the instigation of the Government, were labelled as contrary to the public interest. To that industry strongly demurred, and the amendment sought to remove from the Bill the stigma placed on industry.

Lord Kilmuir, the Lord Chancellor, said in reply that they had succeeded in bringing into the Bill a court which would decide these issues, which were properly justiciable issues. They had thus given to industry the advantage of the best possible machinery for arriving at justice and truth. Industry had complained about the Monopolies Commission, saying it was an inquisitorial procedure contrary to British tradition, and the Government had substituted a justiciable procedure, which was in accordance with British traditions and took one of the most difficult questions of the time out of politics. The amendment, however, would make a change which went to the root of the special solution put forward.

The amendment was thereupon withdrawn.

On July 12 Lord Mancroft (Under-Secretary, Home Office) moved a new clause to bring that part of the Bill dealing with resale price maintenance into operation three months after the passing of the Bill.

Lord Mancroft explained that the new clause would allow manufacturers, who had hitherto relied on collective resale maintenance, a short period in which to adjust their contracts of sale to take account of the prohibition of collective enforcement and powers of individual enforcement. It was recognized that manufacturers might need a breathing space to make adjustments. The rest of the Bill would come into operation immediately on enactment.

The new clause was agreed to and added to the Bill, and was approved by the House of Commons on July 30 by 220 votes to 178. Another amendment adopted by the Lords, to give industry until the end of the period allowed for registration to determine whether they would register or would vary an agreement, was also carried in the Commons by 221 votes to 180.

Registration of Restrictive Agreements.

The Board of Trade on Aug. 2 made the first Order under the Act, to come into force (subject to Parliamentary approval) on Nov. 30, 1956. The Order required that specified classes of agreements (broadly those relating to prices or other terms or conditions of sale, or involving collective discrimination) must be registered with the Registrar of Collective Trading Agreements by March 1, 1957. The Board expected about 1,200 practices to be registered.

Appointment of Registrar.

Mr. Rupert Leigh Sich (48), formerly Principal Assistant Treasury Solicitor dealing with the work of the Ministry of Fuel and Power, was appointed Registrar of Restrictive Trading Agreements on Aug. 7, with a salary of £4,250 p.a.

Winding-up of Tobacco Trade Association.

The Tobacco Trade Association (formed in 1931, and representing manufacturers, wholesalers, and retailers) announced on Aug. 9 that in view of the enactment of the Restrictive Trade Practices Bill its arrangements for the collective enforcement of prices of proprietary brands of cigarettes and tobacco, and its collective ban on gift-coupon trading, would cease as from Sept. 1. Arrangements by individual manufacturers to enforce their own prices would not be affected.

The Association also announced that, as its main functions were concerned with resale price maintenance, it was intended that it should subsequently be wound up

Monopolies Commission's Work in 1955.

The annual report by the Board of Trade on the operation of the Monopolies and Restrictive Practices Acts, 1948 and 1953, covering the year 1955, was published on Feb. 27, 1956.

During 1955 the Commission completed reports on copper semi-manufactured goods (see 14766 A), pneumatic tyres (see 14409 A), sand and gravel in Central Scotland, and hard fibre cordage (see below).

As regards action taken on previous reports, the report stated that after discussions with the Board of Trade the Federation of Calico Printers had agreed to the complete termination of the percentage quantum scheme, together with the obligation to observe minimum prices and uniform conditions of trading (see 13550 A). The Ministry of Works had also obtained confirmation from all firms on Government contracting lists that they would not follow the practices criticized by the Commission (see 14409 A).

Withdrawal of Inquiries.

Mr. Thorneycroft announced in the House of Commons on March 6, 1956, that in view of the introduction of the Restrictive Trade Practices Bill the following inquiries, previously referred to the Commission, would be withdrawn: electric batteries, street lighting equipment, steel frames for buildings, and common prices and tendering (see 14409 A). Other inquiries in progress would be completed before the Bill became law, except the inquiry into chemical fertilizers, which would be referred to the reconstituted Commission. No action would be taken on any matter which would properly come within the jurisdiction of the new Restrictive Practices Court.

The Commission's reports on Sand and Gravel in Central Scotland and on Hard Fibre Cordage were published respectively on March 22, 1956, and June 8, 1956, and are summarized below:

Report on Sand and Gravel in Central Scotland.

This report stated that in the above-named area (in which 75 per cent of the Scottish population lived) the supply of sand and gravel for plaster, cement, road surfacing, filtration, etc., was controlled by the Washed Sand and Gravel Association and the closely related Mid-Scotland Sand and Gravel Association. The common minimum prices and haulage rates fixed by these two bodies were higher than might be expected under free competition and were in the Commission's view unjustified.

The Commission considered that the "stop lists" and other methods by which these prices were supported were not in themselves contrary to the public interest. It found, however, that the system of central invoicing by the Associations, and the arrangements which prevented Association members from buying from non-Association producers and also granted special terms to Association members only, did operate against the public interest and should be withdrawn.

Report on Hard Fibre Cordage.

This report stated that the members of the Hard Fibre Cordage Association, together with certain other suppliers, restricted competition in the manufacture and supply of nearly all the hard fibre cordage sold in the United Kingdom, including manila and sisal ropes, sisal packing cords and twines, trawl twines, and agricultural binder and baler twines

The Commission's principal conclusions and recommendations were as follows:

(1) The Federation's common price system and its arrangements regarding listed dealers, aggregated quantity rebates, resale price maintenance, and exclusive dealing operated against the public interest and should be ended.

(2) Its arrangements for controlling the selling prices of hard fibre cordage imported from the Irish Republic and St. Helena, and for discouraging imports from some other sources, operated against the public interest

(3) The agreement with the National Association of Rope and Twine Merchants, by which this association's members were allowed a special discount and aggregated quantity rebates, and undertook not to buy foreign packing cords and twines, operated against the public interest and should be ended.

(4) Other Federation arrangements operating against the public interest included (i) prohibitions on the sale of "first grade manila" trawl twine or cord and twine made from waste fibre; (ii) the ban on spinning "on commission" for firms outside the Federation, (iii) the obligation to charge "delivered," instead of "ex-works" prices for certain kinds of cordage.

(5) The Federation's arrangements governing the sizes and runnages of cordage and the breaking strains to be quoted by suppliers operated against the public interest in so far as they were obligatory, but it would not be against the public interest for the Federation to issue a recommended code of practice

(6) The pool and quota system, in which most Federation members participated, operated against the public interest and should be ended

Two further reports, respectively on the supply of certain rubber footwear and on the supply of linoleum, were published by the Commission on July 31 and Sept. 18, and are summarized below:

Report on the Supply of Certain Rubber Footwear.

The report (which covered all kinds of rubber boots, including overboots, and footwear with canvas uppers and rubber soles) stated that in 1954 68.7 per cent of rubber boots and 44.3 per cent of the canvas footwear sold in the U.K. were supplied by members of the Rubber Footwear Manufacturers' Association, the Dunlop Rubber Company alone supplying 44.2 per cent of the rubber boots. The

conditions to which the Monopoly and Restrictive Practices (Inquiry and Control) Act applied therefore prevailed in the supply of both rubber boots and canvas footwear.

The Commission's leading conclusions and recommendations were as follows

(1) The Association's price consultations, and the understanding amongst members that they would not negotiate special prices with traders for large orders without notifying each other, operated against the public interest. Association members should cease to consult one another about prices and should be free to negotiate special prices for large orders without notifying one another.

(2) The understanding between Association members not to change their prices during a season operated against the public interest and should be discontinued.

(3) The former understanding between members, to allow compensation to traders in accordance with a uniform practice when prices were reduced, operated against the public interest and should not be revived.

(4) Provided that the Association's price consultations were discontinued, the uniform terms at present available to Association members for prompt payment, and the present method of maintaining resale prices, did not operate against the public interest

(5) The Association's classified list of traders entitled to wholesale prices and terms operated against the public interest and should be discontinued. There was no objection, however, to the Association's circulating to members a recommended list of traders suitable for wholesale terms, provided that it did not consult the distributive trade in compiling it and made it clear that members were not obliged to observe it.

(6) The selection by the Association of users entitled to special terms operated against the public interest and should be discontinued.

The Commission also examined (*a*) the special position of the Dunlop Rubber Company, in view of its very large share in the market for rubber boots; (*b*) practices relating to imports of rubber boots from Hong Kong. As regards (*a*) it found that, except in its capacity as a member of the Rubber Footwear Manufacturers' Association, the Dunlop Company did nothing which operated against the public interest. In regard to (*b*) it found that neither the existing arrangements between the Association of Hong Kong Rubber Footwear Importers and certain exporters, nor that Association's restrictions on the admission of new members, nor the understanding among Association members to sell only to wholesalers and multiple retailers, operated against the public interest. It would, however, see serious objection to the introduction of an exclusive list of traders, or to any understanding by traders to buy Hong Kong rubber footwear exclusively from members of the importers' association.

Report on the Supply of Linoleum.

The report stated that in the two years ended Jan. 31, 1954, about 80 per cent by value of the total home trade in linoleum was supplied by members of the Linoleum Manufacturers' Association, who participated in a common price system and in other practices which restricted competition. The Commission found that at present the common price system did not operate against the public interest, but considered that there were "serious risks" that it might do so in some circumstances if left unamended and uncontrolled. It therefore recommended that the system should continue only under certain conditions, including periodic Governmental reviews of prices, costs, and profits.

The Commission's detailed recommendations included the following:

(1) If the price system were continued, there should be a freer exchange of technical information between firms.

(2) The compulsory observance of the Association's list of wholesalers was against the public interest and should be discontinued. There would, however, be no objection to a recommended list which members could observe as they pleased.

(3) The "loyalty provisions" of the Association's pre-war agreement with wholesalers might be expected, if revived, to operate against the public interest and should be abolished.

(4) The aggregated retail turnover bonus should also be discontinued.

(5) The former scheme, under which a percentage of the invoiced price of goods in each category of linoleum sold as "job lots" below the list price was paid into a "job pool" and periodically distributed to members in proportion to all their sales in the same category, should not be reintroduced, since it might be expected to operate against the public interest.

(6) There was no objection to the Association retaining the right to expel a member for contravening its rules, provided that nothing was done to make it more difficult for a member to leave the Association.

One member of the Commission, Professor Sir Arnold Plant, signed the report with the reservation that he was not satisfied that the safeguards, recommended to prevent the common price system from operating in future against the public interest, would suffice in certain eventualities. He suggested that linoleum manufacturers might prefer to suspend the system for an experimental period.

Another member of the Commission, Mr. C. E. Wrangham, signed the report with the reservation that he did not agree that the common price system might be expected to operate against the public interest, and considered that, while some of the suggested safeguards might be desirable, the facts did not warrant their compulsory introduction.

Commission Membership.

Mr. James Archdale resigned from the Commission with effect from Jan. 1, 1956.—(Times - Manchester Guardian - Financial Times - Board of Trade Journal) **(Prev. rep. 14766 A.)**

A. UNITED STATES - CHINA. — U.S. Naval Plane shot down off Chinese Coast. - Chinese Rejection of U.S. Demand for Compensation.

The U.S. Navy announced on Aug. 22 that a patrol plane carrying a crew of 16 was missing after having been attacked 160 miles north of Formosa and about 32 miles off the Chinese coast. On the following day Peking Radio said that a "Chiang Kai-shek" plane which had "intruded" over some offshore islands 300 miles north of Formosa had been driven off by aircraft and had disappeared in the direction of Formosa after being hit. U.S. naval vessels and aircraft searched in this area on Aug. 24 and recovered wreckage from the missing plane, together with the body of one of the crew. Three other bodies were recovered later.

In reply to inquiries made through the British Chargé d'Affaires in Peking, the Chinese Communist Government stated on Aug. 27 that if the plane proved to be a U.S. naval aircraft, and not a Kuomintang plane as had been believed, they could "not but express great regret." If this were the case, however, it proved that the "manoeuvres of the U.S. Seventh Fleet in this area" and the "intrusion of large numbers of its aircraft for reconnaissance" on Aug. 23-24 were "planned provocations by violating China's territorial air and territorial sea," against which the Chinese Government must "express a serious protest."

A joint communiqué issued on Aug. 31 by the U.S. State and Defence Departments admitted that "the plane might by a navigational error have passed over or near one of the small islands lying about 37 miles to the east of the China mainland," but added that "the position of the elements found from the plane indicated that the actual attack took place over international waters." The statement said that the attack had been made without warning, and announced that compensation would be claimed.

A Chinese Government statement of Sept. 2 rejected both the U.S. protest and the demand for compensation, alleging that the plane had carried out activities over the coastal islands of China and that its "intrusion into the territorial air of China" was "by no means accidental." The statement also said that the area was continually visited by "Chiang military aircraft of the U.S. type," and that in such circumstances it was "entirely justified that the plane . . . should have been taken as a Chiang military aircraft and attacked." In conclusion, the statement reaffirmed the Chinese protest and demanded that the U.S.A. should stop its "provocative activities."

A U.S. Note demanding full compensation for the loss of life and property resulting from the attack was delivered by the British Chargé d'Affaires in Peking on Sept. 10.—(New York Times) **(Prev. rep. 14733 A.)**

B. PORTUGAL. — Development of Steel Industry.

Plans for the large-scale development of the Portuguese steel industry were announced in Lisbon during September. They will be carried out in three stages: (1) the immediate construction of an iron-smelting plant at Leixões (near Oporto) with an annual capacity of 30,000 tons of pig-iron, and of a steelworks and rolling-mill at Alcochete, south of the Tagus; (2) extension of the new Alcochete steelworks, and the erection of blast furnaces with an annual capacity of 200,000 tons of pig-iron, to be completed in 1958; (3) a final target of 300,000 tons of rolled steel per annum, to be attained in eight years by the establishment at Leixões of two Krupp-Renn furnaces with a combined capacity of 120,000 tons, and the extension of the steelworks and rolling-mill, either at Alcochete or by the construction of another plant in northern Portugal. The industry will draw on domestic supplies of iron and solid fuel. (Bank of London and South America) **(Prev. rep. Six-Year Plan, 12755 B; 12540 B.)**

C. SYRIA. — Recognition of Communist China.

Official Syrian recognition of the People's Republic of China was announced in Damascus on July 3. A commercial and payments agreement between the two countries had been signed in April whereby China undertook to supply Syria with machinery, telecommunications equipment, chemicals, steel products, and other manufactured goods, against Syrian exports to China of cotton, cereals, and other raw materials and animal products. The agreement was signed initially for one year and is renewable automatically. All payments will be made in sterling.—(Le Monde, Paris) **(Prev. rep. 14884 C.)**

OCTOBER 20—27, 1956

A. MIDDLE EAST. — Dr. Hammarskjöld's Visit to Israel, Jordan, and Egypt. - Jordanian and Egyptian Infiltration on Israeli Frontiers. - Israeli Reprisal Raids. - Israeli Withdrawal from Israeli-Jordanian Armistice Commission. - Proposal for Entry of Iraqi Troops into Jordan. - British Pledge of Support for Jordan against Possible Israeli Attack. - Vote of Confidence by Knesset in Israeli Government's Policy. - Security Council Debate on Jordanian and Israeli Complaints.

The situation on the borders of Israel, Jordan, and Egypt gravely deteriorated between July and October, as a result of frontier incidents (many of them caused by terrorist activities of Arab infiltrators) and of the Israeli Government's policy of replying to such incidents by organized reprisal raids. Details of developments on the frontiers and their international repercussions are given below under cross-headings.

Dr. Hammarskjöld's Visit to Further Middle East.

The U.N. Secretary-General, Dr. Hammarskjold, accompanied by Major-General Burns, Chief of Staff of the U.N. Truce Supervisory Organization, arrived on July 19 in Jerusalem, where he had long discussions with the Israeli Premier, Mr. Ben-Gurion. A communiqué issued on July 20 stated that they had made "a full and fruitful review of developments in this area since the last visit of the Secretary-General," and had discussed "ways and means to establish the state of affairs envisaged in the armistice agreements between Israel and her neighbours." Dr. Hammarskjold and General Burns afterwards proceeded to Amman for talks with the Jordanian Premier, M. Hashem, and thence to Cairo, where they met President Nasser, Dr. Fawzi (the Egyptian Foreign Minister), and M. Ahmed el Shukairy (Assistant Secretary-General of the Arab League) on July 22. Before leaving Cairo on July 23, Dr. Hammarskjöld stated that he had received assurances from both sides that no action would be taken that would upset the relative calm prevailing along the Israeli frontier.

Frontier Incidents, July-August.

Despite these assurances, a new series of incidents began immediately after Dr. Hammarskjold's visit, the most important of which are tabulated below.

July 24. Two U.N. observers were injured by the explosion of a mine in the Mount Scopus demilitarized zone near Jerusalem while investigating an Israeli complaint that Arab Legionaires had penetrated into the area.

July 25. An exchange of fire occurred in the Jerusalem area, several Jordanians being wounded; a third U.N. observer was wounded when Jordanian villagers fired on a U.N. team which was investigating the incident; and the Arab Legion command announced that an Israeli plane which had flown over Jordanian territory north of Jeruslaem had been shot down.

July 26. Dr. Hammarskjold announced that he had directed "a new strong appeal to all concerned to take all measures necessary for the protection of the cease-fire to which they are bound by solemn undertakings to the U.N." The incidents, he added, were "expressions of the deeply disturbed conditions which still prevail, and which render it imperative for all concerned to impose the discipline which alone can preserve peace and order."

July 27. An Israeli convoy escorting an American archaeologist was fired on in the Negev, east of El Auja, a group of Egyptians fired on an Israeli settlement in the El Auja demilitarized zone, wounding two civilians; and two Israelis were injured when their lorry struck a mine in the same area.

July 28. Hr. Rasmussen, a Danish radio operator attached to the U.N. Truce Supervisory Organization, was killed by the explosion of a mine near the Gaza strip.

Aug. 2. An Israeli patrol fired on a Jordanian patrol in the same area, killing two National Guardsmen. The Israeli-Jordanian Mixed Armistice Commission found Israel responsible for this incident on Aug. 6.

Aug. 16. Armed Jordanians ambushed a bus and two jeeps escorting it on the road to Elath, killing a woman and three soldiers and wounding seven Israelis, whilst five more Israelis were injured when a lorry struck a mine near Beersheba. Dr. Hammarskjold issued a statement on the same day condemning these attacks on Israeli civilians, and announcing that "in the light of the results of the investigations it will be decided what action should be taken by me because of these most serious acts of violence, including requests for punishment of the transgressors." This was the first occasion on which the Secretary-General had commented publicly on Israeli-Arab frontier incidents immediately after they had occurred.

Aug. 17. Israeli units entered the Gaza strip at two points, fired on an Egyptian patrol, three of whom were killed, and ambushed an Army jeep, killing six medical staff. Dr. Hammarskjold immediately issued a second statement deploring these incidents, and emphasizing that acts of retaliation could "not be considered as acts of self-defence in the sense of the U.N. Charter."

Aug. 21. An Israeli patrol which had crossed the frontier in the Jenin area clashed with a Jordanian patrol, an Israeli being killed and three Jordanians wounded. The Mixed Armistice Commission found Israel responsible for this incident on Aug. 29.

Aug. 24. Israeli and Egyptian troops exchanged fire in the Gaza strip area, two Israelis being wounded.

Aug 30. Two Israeli soldiers were killed and four injured when their vehicle was blown up by a mine in the El Auja zone.

Aug. 31. Israeli troops raided Egyptian territory at three points, two in the Gaza strip and one west of the El Auja zone, 13 Egyptian soldiers being killed and two wounded. The raids were believed to be a reprisal for the previous day's incident.

Frontier Incidents and Israeli Reprisal Raids, September-October.

The situation deteriorated further during September and October, when Israeli forces, as reprisals for murders by Arab infiltrators and other frontier incidents, carried out a series of increasingly large-scale raids on military bases on Jordanian territory.

The Rahwa and Gharandal Reprisal Raids.

The succession of incidents began on Sept. 10, when an Israeli unit was fired on by Jordanian National Guards in the Dawiyima area, and a clash ensued in which six Israelis were killed and three wounded. The Mixed Armistice Commission found Jordan responsible for this incident on Sept. 17. Also on Sept. 10, a railway line near Beersheba was blown up by Arab infiltrators, who were believed to have come from Egypt.

As a reprisal for the latter incident, an Israeli patrol crossed the Egyptian border in the El Auja area on Sept. 11, killed five Egyptian soldiers, and wounded a sixth.

Another Israeli force of battalion strength crossed the Jordanian frontier west of Hebron during the night of Sept. 11-12, attacked the police post at Rahwa, killing five policemen and 10 soldiers, and then blew up the building. Five Arab Legionaries were killed and three wounded when the Israelis ambushed a patrol coming to the aid of the police post. Before returning to Israeli territory the raiders also blew up a school building The Mixed Armistice Commission condemned Israel on Sept. 19 for this attack, which was described in the Israeli Press as a reprisal for the Dawiyima incident.

On Sept. 12 infiltrators from Jordan murdered three Druse guards at an Israeli oil-drilling camp in the eastern Negev. As a reprisal, a large Israeli force shelled and blew up the Jordanian police post at Gharandal (45 miles north of Aqaba) on Sept. 13, and also blew up a school building. Nine Jordanian policemen and two civilians were killed in this raid, and four policemen and two civilians wounded. The Mixed Armistice Commission condemned the attack on Gharandal on Sept. 24 as a "flagrant breach of the armistice agreement"

Dr. Hammarskjöld's Warning.

Dr. Hammarskjold, in a statement issued on Sept. 13, emphasized that the "mounting series of incidents" since July had not invalidated the cease-fire agreements concluded in April. These agreements could be "put out of existence only if formally repealed by one of the Governments concerned, or if challenged by actions clearly indicating that the Government does not consider itself any longer bound by the obligation," but such action would re-establish a state of war. On Sept. 14 Dr. Hammarskjold handed almost identical Notes to the Israeli and Jordanian delegates to the U.N., stating that both Israel and Jordan must be held fully accountable for "the disregard of both the appeals from the U.N. and the obligations under the armistice agreement, specifically the cease-fire obligation." The British Foreign Office issued on Sept. 13 a statement condemning the Rahwa raid as a violation of Israel's recent assurances to Dr. Hammarskjold that the cease-fire would be respected.

The Husan Reprisal Raid.

A new series of incidents began on Sept. 23, when machine-gun fire was opened from a Jordanian position on a party of archaeologists who were inspecting ruins at Ramat Rachel, south of Jerusalem, four Israelis being killed and 16 wounded. On Sept. 24 an Israeli woman was killed by Jordanian fire in the Jerusalem area, and an Israeli tractor-driver was killed and another wounded south of Lake Tiberias. The Jordanian authorities alleged that in both incidents on Sept. 24 the persons killed had crossed into Jordanian territory, which was, however, denied by the Israeli authorities.

As a reprisal for these incidents, an Israeli force (estimated by the Jordanian military authorities at 5,000) attacked a Jordanian police post near Husan (four miles west of Bethlehem) during the night of Sept. 25-26, and after fierce hand-to-hand fighting completely demolished it. Further heavy fighting took place at the nearby village of Wadi Fukin, where the raiders blew up a school building. U.N. investigators gave the number of Jordanian casualties as 37 soldiers and police and two civilians (one a 12-year-old girl) killed, and 11 wounded; Jordanian claims that 90 Israelis had been killed were denied by the Israeli military authorities, who gave their casualties as nine killed and eight wounded. The Mixed Armistice Commission condemned the Husan raid on Oct. 4, the meeting being boycotted by Israel (see below).

Israeli, Jordanian, and British Statements. - Dr. Hammarskjöld's Further Warning.

The Israeli Foreign Minister, Mrs. Meir, saw General Burns at her own request on Sept. 26. According to an official statement issued afterwards by the Foreign Ministry, she described the raid as "the inevitable consequence of the chain of murder and aggression committed by Jordanian forces against the citizens of Israel in Israeli territory"; assured General Burns that Israel's policy was "to maintain the cease-fire on a basis of reciprocity"; and requested

Dr. Hammarskjold and General Burns to "take the necessary steps to ensure the observance by Jordan of her cease-fire undertakings." The statement recalled that 36 Israelis had been killed and 51 wounded in Jordanian attacks during the past six months.

M. Rifai, the permanent Jordanian delegate to the U.N., in a statement issued later the same day, declared that the Israeli Government's avowal of its responsibility for the raid "proves that Israel is not qualified to be a member of the United Nations." "We may bring this recent brutal attack before the Security Council any minute," the statement continued, "but if the matter is going to be a further condemnation against Israel, such condemnations have previously been passed and were completely disregarded by Israel. The question therefore becomes whether the Security Council would take real action against Israel for her repeated violations, or whether we ourselves will be compelled to put an end to any such aggression."

A statement issued by the British Foreign Office on Sept. 26 deplored both the recent frontier incidents and the Israeli reprisals, pointing out that "reprisal raids have been repeatedly condemned by the Security Council," and that "the U.N. Secretary-General has expressed the view that such raids cannot be considered as within the limits of legitimate self-defence."

In the course of the same day, Dr Hammarskjold interviewed the representatives of Britain, France, the U.S.A., the Soviet Union, Jordan, and Israel. He afterwards issued a statement recommending that, if the Governments of Jordan and Israel did not bring the situation rapidly under control, "the Security Council should take the matter up in order to reaffirm its policy as established in previous resolutions, and, were the Council to find the continued deterioration to constitute a threat to peace, to decide on what further measures may be indicated."

The Qalqilya Reprisal Raid.

On Oct. 4 raiders from Jordan ambushed two cars on the Beersheba-Sodom road 10 miles from the frontier, killing five Israelis and wounding another, whilst on Oct. 9 two Israeli civilians were murdered seven miles from the frontier between Petah Tiqva and Natanya by Jordanians armed with sub-machine guns. In consequence, Israeli forces carried out during the night of Oct. 10-11 their largest reprisal raid hitherto in the area of Qalqilya (north-east of Tel Aviv), and a pitched battle ensued in which both sides suffered serious casualties.

The attack began at 9.30 p.m. on Oct. 10, when two Israeli infantry regiments, supported by armour and artillery, advanced into Jordanian territory along a six-mile front between Tulkarm and Habla, under cover of a heavy artillery barrage. The main attack was directed against the fortified police barracks at Qalqilya, which served as the regional headquarters for the Arab Legion, National Guard, and police. After a three-hour bombardment of the village amid violent hand-to-hand fighting, the Israelis stormed the barracks and blew it up, together with fuel and ammunition dumps and a pumping station. A Jordanian battalion was ambushed at Nebi Elias while on its way to Qalqilya, and fighting continued for some hours, during which an Israeli company was cut off until relieved by tanks and aircraft. Jordanian Army and National Guard centres in the villages of Habla, Soufin, and Jayous were also attacked, whilst Jordanian artillery shelled three Israeli settlements, though without causing any casualties.

When the attack began the Jordanians informed the Truce Supervisory Organization, and King Hussein hurried from Jerusalem to direct operations in person. An appeal by General Burns for a cease-fire was rejected by the Israelis, but after the demolition of the Qalqilya barracks they agreed to accept his appeal. Fighting was accordingly broken off at 4.30 a.m. on Oct. 11, when the Israelis withdrew. The Israeli military authorities admitted the death of 18 members of their forces, whilst a report issued by General Burns on Oct. 18 gave the number of Jordanians killed as 48, including three civilians. The total casualties, the report pointed out, were the highest resulting from any incident since the Israeli bombardment of Gaza in April (see 14793 A).

The Israeli Foreign Ministry, in a statement issued on Oct. 11, claimed that the raid had been directed against "a centre of Jordanian aggression," which had "reached new heights of ferocity and cruelty" during the last few days. As U.N. organs had "remained powerless before the onslaught of Jordanian aggression," the statement added, Israel had been left to face with her own means "an unbridled campaign of murderous Jordanian assaults."

Israeli Withdrawal from Israeli-Jordanian Armistice Commission.

Israel withdrew from the Israeli-Jordanian Mixed Armistice Commission on Oct. 3, following the Commission's decision concerning the circumstances of the incident on Sept. 23 in which a number of Israeli archaeologists were killed or wounded by Jordanian fire at Ramat Rachel (see above). The Jordanian military authorities maintained that the incident had been caused by a single soldier who had been mentally deranged. This explanation was accepted by the neutral chairman of the Mixed Armistice Commission on Oct. 1, but the Israeli Government contended that more than one soldier had fired, and announced on Oct. 3 that in protest against the Commission absolving Jordan from blame it would no longer participate in the Commission's work.

Dr. Hammarskjöld's Report on Frontier Situation.

A report to the Security Council by Dr. Hammarskjold on the general frontier situation, dated Sept. 12, was published by U.N. headquarters in New York on Sept. 28.

In his previous report of May 9, Dr. Hammarskjold recalled, he had pointed out the dangers arising from the tendency of each party to interpret the armistice agreement to mean "that any one infringement of the provisions of the agreement by one party justifies reactions by the other party which, in their turn, are breaches of the armistice agreement, without any limitations as to the field within which reciprocity is considered to prevail." By the new cease-fire agreements of April and May he had endeavoured to "lift the cease-fire clauses out of the armistice agreements, so as to give them an independent legal status as obligations, compliance with which was conditioned only by reciprocity in respect of the implementation of the same obligations by the other parties." None of the parties concerned, however, had taken advantage of the new situation thus established to take positive steps which would lead to a better general atmosphere. "While in many cases the parties have made energetic efforts to support the cease-fire by appropriate instructions to their forces, they have, seen in retrospect, failed to carry through a discipline sufficiently firm to forestall incidents which, step by step, must necessarily undermine the cease-fire . . . If the cease-fire is permitted continuously to be challenged by actual events, it will lose its sanctity and become a dead letter . . . Acts of violence, supposed to have been staged by one party, have been immediately followed by acts of violence which must be supposed to have been started by persons on the other side 'in self-defence,' as part of a policy of retaliation . . ."

"The efforts of the U.N., whatever the resources used," the report concluded, "can never be of appropriate effectiveness without the co-operation of the sovereign Governments directly concerned . . . I have found no reason to doubt the view formed in April that there is a general will to peace in the region, nor that the state of affairs which we have had during part of this year has been one which has offered unique possibilities for improvements of the situation. However, later developments have indicated that the will to establish peaceful conditions had not grown strong enough for any of those concerned to take the risks necessary for a use of existing opportunities. The possibilities are still there, and the U.N. must continue to impress on the Governments in the region their serious duty to use them."

Iraqi-Jordanian Military Co-operation. - Israeli Warning against Entry of Iraqi Troops into Jordan. - British and U.S. Support for Jordan.

Following the Rahwa and Gharandal raids, King Hussein of Jordan visited Baghdad on Sept. 14-15 for discussions with King Faisal and the Iraqi Premier, General Nuri es-Said. A communiqué issued after the talks said that they had discussed "the dangerous situation arising from the Zionist threats and provocations" and "the immediate measures that should be taken in accordance with the Jordanian-Iraqi defence treaty." An Iraqi military mission subsequently arrived in Amman to discuss the form which co-operation between the two countries should take, including the possibility of stationing Iraqi forces in Jordan, and following the Husan raid the Jordanian Foreign Minister, M. Abdelhadi, visited Baghdad from Sept. 26 to Oct. 1 for further talks. The Egyptian Ambassador in Amman, M. Seif Eddin, delivered a message from President Nasser to M. Hashem on Sept. 15, assuring him that Egypt "will fight if Jordan or any other Arab country is subjected to Israeli aggression, notwithstanding Egypt's preoccupation with the Suez Canal issue."

Following the Qalqilya raid, offers of military assistance to Jordan in the event of further Israeli attacks were received from all the Arab countries. President Nasser informed M. Abdelhadi on Oct. 11 that Egypt would supply Jordan with arms and financial help, and the Syrian Embassy in Amman announced on Oct. 16 that a large consignment of heavy and light arms had begun to enter Jordan as a gift from the Syrian people; this consignment, the Embassy stated on the following day, consisted of arms entirely of Western origin. In Baghdad official sources stated on Oct. 12 that Iraqi troops were ready to move into Jordan at short notice if a request for their support was received.

Grave concern was caused in Israel by this announcement, in view of the fact that Iraq had attacked Israel from Jordanian territory in 1948, had refused (unlike the other Arab States) to sign a separate armistice agreement, and was therefore technically still at war with Israel. Israeli fears were further increased by a proposal made by General Nuri es-Said on Oct. 7, in an interview with a correspondent of *The Times*, that another effort to reach a permanent Arab-Israeli settlement in the Middle East should be made by persuading Israel to negotiate "on the basis of the 1947 U.N.Palestine proposals." This suggestion was welcomed on Oct. 8 by the Foreign Office in London, where a spokesman recalled Sir Anthony Eden's

offer of Britain's good services in bringing about a compromise in his Guildhall speech last year (see 14519 A). The Israeli Foreign Ministry, however, in a statement issued on Oct. 12, gave warning that Israel would regard the entry of Iraqi troops into Jordan as a direct threat to her security and to the validity of the Israeli-Jordanian Armistice Agreement. The presence of Iraqi troops in Jordan, the statement said, would jeopardize the *status quo* in the area, whilst the Iraqi Premier's suggestion was only a move in Iraq's "expansionist drive towards the Mediterranean, which traditionally has been the basic objective of Iraqi policy." Mrs. Meir reiterated on the following day that Israel was "determined to meet the threat to Israel's integrity" which, she said, a movement of Iraqi troops into Northern Jordan would constitute.

In her statement Mrs. Meir again rejected the "British-supported" proposal of General Nuri es-Said for a settlement based on the U.N. partition plan of 1947, saying that Iraq herself had attempted to erase this plan in 1948, "not without the aid of the British Government of those days," and that the territorial changes involved in such a settlement would endanger Israel's very existence

Full support for the proposal to station Iraqi troops in Jordan was expressed by the British and U.S. Governments. Mr. Westlake, the British Chargé d'Affaires officially informed the Israeli Government on Oct. 12 that Iraqi troops were about to enter Jordan and would be stationed there indefinitely. If Israel considered such troop movements a sufficient reason for attacking Jordan, he added, the British Government would feel itself obliged to go to Jordan's assistance, by virtue of the Anglo-Jordanian treaty of 1948 and the Tripartite Declaration of 1950. The U.S. Ambassador, Mr. Lawson, told the Israeli Government on Oct. 13 that the U.S. Government had also approved the stationing of Iraqi troops in Jordan, as likely to stabilize the military situation and reduce the danger of a general conflict. In reply to Israeli inquiries, Mr. Westlake gave assurances on Oct. 14 that the Iraqi forces would be limited in number and would be stationed to the east of the River Jordan.

A communiqué issued by the Israeli Cabinet on Oct. 14 expressed "anxiety and astonishment" at the British "threat" to take action against Israel, and fully supported Mrs. Meir's declaration. The Israeli Ambassadors in London, Washington, Paris, and Moscow were recalled on the same day for consultations.

The proposal that Iraqi troops should be stationed in Jordan aroused concern in Egypt as well as in Israel Major Salem, the former Minister of National Guidance, alleged in his newspaper *Al Shaab* on Oct. 15 that this proposal was the result of a "plot" between the British, Israeli, and Iraqi Governments, and that its real aim was to enable Iraq to take over Jordan on the eve of the Jordanian elections due to be held on Oct 21

An Iraqi military mission headed by Crown Prince Abdul Illah arrived in Amman on Oct. 14 for discussions with King Hussein and the Jordanian Government. At the conclusion of the talks, a Jordanian Government spokesman announced on Oct. 15 that Iraqi troops would not enter Jordan "at this time," but would be placed strategically on the border "ready to make the fastest possible approach" if they were needed. In the event of an attack by Israel they would enter Jordan immediately, and if necessary would cross to the west bank of the River Jordan. Full agreement, he added, had also been reached on the supply of war material to Jordan by Iraq. According to the Amman correspondent of *The Times*, the Jordanian Government's decision not to call in Iraqi troops was attributed by diplomatic sources to the strength of popular feeling against Iraq, to the widespread belief that the Western Powers would use Iraqi forces to influence the voting in the elections and force Jordan to join the Baghdad Pact, and to the Government's fears that their arrival would be followed by riots.

General Ali Abu Nuwar, the Jordanian Chief of Staff, stated on Oct. 16 that if Iraqi troops entered Jordan they would be placed under the command of the Jordanian C-in-C [This decision was believed to represent a concession by the Iraqi Government, which was reported to have refused for some weeks to place its troops under Jordanian command, as a result of its suspicions of Egyptian influence in Jordan.] General Nuwar also said that R A F jet planes stationed at Amman had been put on an alert basis since the Qalqilya raid, and that arrangements had been made with Britain so that he could call on British planes "within the hour" in the event of a new Israeli attack.

Commenting on this statement on Oct 17, a Foreign Office spokesman in London, whilst reaffirming the British Government's intention "to come to the assistance of Jordan in the event of war being made against her," emphasized, however, that "if we are to take action under the treaty, we would obviously have to decide what circumstances warrant the treaty being invoked. Any decision on action would have to be taken in London" There was "no question whatever," he added, of the R A.F. in Jordan being placed under Jordanian command

Two R.A.F. jet fighters from Cyprus flew over Amman on Oct. 18, and four more on Oct 20. The British Embassy, however, described their visit as a routine practice flight

M. Abdelhadi, who had visited Baghdad, Damascus, and Cairo during the previous week, left Amman on Oct. 17 for Riyadh to open discussions with the Saudi Arabian Government on military and financial aid for Jordan.

The Knesset Debate.

A general debate in the *Knesset* on foreign affairs and security was opened on Oct. 15 by Mr. Ben-Gurion, who in his speech strongly criticized the British Government's attitude and stated that Israel reserved her freedom of action if Iraqi troops entered Jordan.

Mr. Ben-Gurion attributed Israel's security problem in recent months to the supply of Czechoslovak arms to Egypt. He scorned the Soviet Union's explanation that the arms were being supplied to Egypt in the interests of Middle East peace and to strengthen the Arab countries' independence, and said that this arms deal had actually redoubled tension in the Middle East and increased it throughout the world. The Arab countries had intensified their "feverish preparations for a second round against Israel," and all efforts by Dr. Hammarskjold and others to bring about an improvement in Egypt's relations with Israel had failed.

Explaining his earlier refusal to launch the "preventive war" advocated by some of the Opposition, the Prime Minister said that he considered war in the first place from the point of view of young people killed and their elders bereaved. His alternative to such a war had been to strengthen Israel's defences and to secure armaments capable of meeting those acquired by Egypt from Soviet sources. In its search for arms, however, the Government had "knocked on many doors and found them closed." Whilst sending heavy tanks to Egypt, the British Government had refused to sell them to Israel, although Britain was a party to the Tripartite Declaration intended to secure a military balance in the Middle East. Britain, however, had previously supplied Israel with a number of Meteor aircraft, and recently France and Canada had each supplied 24 jet fighters (see 14985 A, 15144 C) Although Israel's defences had been greatly improved since the beginning of the year, and he was confident that any Arab attack would end in victory for Israel, her enemies could only be deterred from starting a war against her if Israel received the arms she needed.

As a justification of Israel's policy of reprisals, Mr Ben-Gurion quoted numerous frontier incidents to prove his allegation that the Arab leaders consistently incited their peoples to carry out acts of murder and sabotage against Israel. All Israel's demands to the U.N. Truce Organization to compel the Arab countries to end their attacks had failed—not necessarily because the U.N. truce authorities lacked goodwill, but because they were helpless Israel had therefore had "no alternative but to take action in self-defence," in accordance with her rights under the U.N. Charter, and "murderers, and those who send them, will not be allowed to escape without severe punishment."

Describing General Nuri es-Said's proposal for a settlement on the basis of the 1947 resolution as "a disguised attack on the integrity of our borders," Mr. Ben-Gurion said: "I do not know what were the original sources of this doubtful peace initiative, but the Government of Israel has already expressed its determined attitude to the proposal, as made by the Prime Minister of Britain, on Nov 15 last" (see 14519 A; 14525 A) Although frontier rectifications by mutual agreement could be considered, he continued, "this latest plan to cut up the State of Israel, which has made its way from Baghdad to the Guildhall, or from the Guildhall to Baghdad, will never succeed, and in the form now raised by Iraq's Prime Minister can only be considered as a means of distracting the attentions of the Arab world from the grave Suez problem and diverting it towards Israel." If Iraqi troops moved into Jordan, he emphasized, Israel "feels free to act as she thinks fit," as the entry of Iraqi forces, even if only to the east bank of the River Jordan, would constitute an attack on the *status quo* as laid down in the Israeli-Jordanian armistice agreement. In conclusion, Mr Ben-Gurion referred to the Suez crisis, and observed that although Israel's rights had been affected long before the nationalization of the Canal, she had not been invited to any of the conferences called to consider the question.

During the ensuing debate, **Mr. Begin,** leader of the extreme right-wing *Heruth*, said that limited reprisals "accomplish nothing but casualties"; urged the Government to seize the opportunity to expand Israel's frontiers; and declared that "we have fought the British before and we can fight them again." **Mr. Galile,** a leading member of the left-wing *Ahdut Avodah*, who expressed the view that war with the Arab States was inevitable, advocated that reprisals should not be limited to military objectives, and that the attacking forces should not abandon positions which they had occupied. Spokesmen for the left-wing *Mapam* and most of those from the *Mapai* (Mr. Ben-Gurion's party), on the other hand, supported a policy of restraint.

Replying to the debate on Oct. 17, **Mr. Ben-Gurion** said that it would be unwise to explain with any exactness the meaning of his statement that if Iraqi troops entered Jordan Israel would consider herself free to act, as its concrete interpretation would be determined by circumstances and by the actions of Iraq and other countries. There had been a number of favourable developments in the last few days as regards the danger of Iraqi troops entering Jordan and the Suez problem, but Israel must not be led into over-optimism or rely

on verbal promises. The greatest danger still threatened from the Egyptian dictator, who dominated the other Arab States and never tired of proclaiming his intention to destroy Israel. Turning to the question of Israel's reprisals policy, Mr. Ben-Gurion said that some aspects of this called for adjustment, and the proper body to make recommendations was the *Knesset* foreign affairs and security committee. He confirmed that all recent reprisals raids had received Cabinet approval beforehand, except the Gharandal raid of Sept. 13, full details of which had, however, been known to him in advance. In conclusion, Mr. Ben-Gurion emphasized Israel's desire for peace, which, he said, could be ensured only by building up her defences to a level at which they could serve as a deterrent

A motion approving Mr. Ben-Gurion's statement was adopted on Oct. 17 by 76 votes to 13, only the *Heruth* and the Communists voting against.

Security Council Debate on Jordanian and Israeli Complaints.

The Jordanian Government requested on Oct. 15 that the Security Council should meet as early as possible to take the necessary action to deal with the "most serious situation" arising from the Israeli raids of Sept. 25 and Oct. 10-11, which constituted a "flagrant violation" of the armistice agreement and the U.N. Charter and a threat to peace and security. The Israeli Government submitted on Oct. 17 a counter-charge accusing Jordan of "persistent violations" of the armistice agreement and the cease-fire agreement concluded in April The Security Council opened its debate on the two complaints on Oct. 19.

M. Rifai (Jordan) said that the Israeli reprisal raids represented "premeditated systematic military aggression," and referred to Israel's refusal to co-operate with the Mixed Armistice Commission as "a new failure of Israel to comply with her obligations." Israel, he alleged, was taking advantage of the Arab States' preoccupation with the Suez question and with their internal problems to expand her frontiers by persistent aggression. He therefore called on the Council to apply Article 41 of the U.N. Charter, which provides for the use of economic and diplomatic sanctions to give effect to the Council's decisions, and continued . "If the Council does not take action to stop the Israeli aggression right away, then my country will have to seek other methods by which it could ensure the safety of our borders. Such a development, if it happens, will extend beyond our present local arrangements"

Mr. Kidron, who represented Israel in the temporary absence of Mr. Eban, the Israeli Ambassador to the U.S.A , contended that Jordan had been responsible in every case for "initiating these grievous sequences of bloodshed," and that the U N. Charter did not require Israel to suffer armed attacks upon her territory and population. If Jordan was prepared to put an end to attacks on Israel there would be peace along the frontier.

Sir Pierson Dixon (Britain) said that it was a matter of "very great concern" to Britain that the Council should again be dealing with the border situation, despite Dr. Hammarskjold's "tactful and persistent efforts." "The tension along the border between Israel and Jordan," he continued, "is now greater than at any time since the armistice was signed. It is due to the great restraint shown by the Government of Jordan that the situation has not got out of hand. Our Jordanian ally has our sympathy and commendation."

M. Abdoh (Persia) also praised the Jordanian Government's restraint and condemned Israel's "flagrant aggression." **M Sobolev** (Soviet Union) described as "particularly alarming" the Israeli Government's admission that they had planned and organized their "aggressive actions" as part of a policy of reprisals, although this had repeatedly been condemned by the Council, and called for "energetic intervention" to forestall such acts in the future

The Council's chairman for the month, M. Cornut-Gentille (France) adjourned the meeting until Mr. Eban could be present to put the Israeli case, and called on Israel and Jordan to show their respect for the Council's authority by abstaining from any acts that might further inflame an already dangerous situation.—(U.N. Information Centre, London - Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris) **(Prev. rep. 14985 A.)**

A. UNITED KINGDOM. — Trade Figures, Third Quarter, 1956.

Imports into the United Kingdom in August totalled £322,300,000, exports £253,400,000, and re-exports £8,200,000, the adverse visible balance thus amounting to £60,700,000. The corresponding figures for September were: imports £295,200,000, exports £222,300,000, and re-exports £9,200,000, the adverse visible balance amounting to £63,700,000.

Trade figures for the third quarter of 1956 showed that imports were £937,500,000, exports £742,000,000 and re-exports £27,200,000. The adverse visible balance was thus £168,700,000.—(Board of Trade Journal)

(Prev. rep. 15060 B ; First Half of 1956, 15023 A.)

B. UNITED KINGDOM. — Cabinet Changes. - Mr. Head succeeds Sir W. Monckton as Secretary for War.

It was announced on Oct. 18 from 10, Downing Street (*a*) that Sir Walter Monckton had resigned as Minister of Defence and would become Paymaster-General, with a seat in the Cabinet ; (*b*) that Mr. Antony Head, the Secretary for War, would succeed Sir Walter Monckton as Minister of Defence ; (*c*) that Mr. Head would himself be succeeded at the War Office by Mr. John Hare (Minister of State for Colonial Affairs) ; and (*d*) that Mr. Hare's successor at the Colonial Office would be Mr. John Scott Maclay.

Letters exchanged between the Prime Minister and Sir Walter Monckton were published on the same day. In tendering his resignation as Minister of Defence, Sir Walter wrote .

". . . The military precautions which we have had to take in consequence of the Suez Crisis have been planned and taken. I have done my best, too, to prepare the way for the vital decisions in many fields of defence which have to be made in the weeks and months which lie immediately ahead of us They are not short-term decisions but involve adopting policies which must be pursued and implemented over the next few years. I feel sure that it is essential that the Minister who makes these decisions should be prepared to continue in his office until the end of this Parliament After more than four years as Minister of Labour and the constant and mounting strain which my present office has entailed for me from the moment of my appointment, I do not feel able to carry on for as long as that If I am right in this, though I shall be personally sorry to leave the Ministry, I think that the moment has come for me to go. If you feel disposed to retain me in your Cabinet in a less arduous post, I should count it an honour to go on serving under your leadership and should welcome the opportunity of continuing to give you my loyal support . . . "

Sir Anthony Eden, in reply, accepted "with sincere reluctance" Sir Walter's wish to be relieved of the Defence portfolio, paid tribute to Sir Walter's services, first as Minister of Labour and Manpower and then as Minister of Defence, and expressed the hope that he would accept the office of Paymaster-General and remain in the Cabinet. "This," the letter said, "would relieve you of heavy departmental duties, although you would still be able to give us your help in other ways"

Sir Walter Monckton's appointment to the post of Paymaster-General increased the size of the Cabinet from 18 to 19. The post had been vacant since the major Government changes in December 1955, when the Earl of Selkirk, who had held the office, was appointed Chancellor of the Duchy of Lancaster.

Sir Walter Monckton (65), a lawyer by profession, had been Director-General of the Ministry of Information during the early part of the last World War and subsequently was Director-General of British Propaganda and Information Services in Cairo. He became Minister of Labour on the formation of Sir (then Mr) Winston Churchill's Government in 1951, retained that post under Sir Anthony Eden, and was appointed Minister of Defence in December last.

Mr. Head (50), the new Minister of Defence, served on the staff of Combined Operations during the last war and left the Army with the rank of Brigadier. When the Conservatives were in opposition he led the back-bench attack on the defence policies of the Labour Government, and in 1951 became Secretary for War—a post which he has held since uninterruptedly, first under Sir Winston Churchill and then under Sir Anthony Eden.

Mr. Hare (45), who during the last war fought in the North African and Italian campaigns, is a former Vice-Chairman of the Conservative Party Organization ; he entered the Government last December when he became Minister of State for Colonial Affairs He is a brother of Lord Listowel.

Mr. Maclay (50), is M P. for Renfrewshire West and chairman of the National Liberal group in the House of Commons. He became Minister of Transport and Civil Aviation in Sir Winston Churchill's Government in 1951, but resigned in May 1952 owing to ill-health.

The appointment of Mr. Maclay brought the number of Liberal-Conservative members in senior Government posts to three, the other two being Major Lloyd George (the Home Secretary) and Dr. Charles Hill (the Postmaster-General). (Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15072 B ; 14601 A.)**

C. BRAZIL. — Population passes 60,000,000.

Official estimates published on July 1 showed that the population of Brazil had passed the 60,000,000 mark. The population of São Paulo State had risen to 10,585,000, followed by the States of Minas Gerais (8,404,000), Bahia (5,496,000), Rio Grande do Sul (4,782,000), and Pernambuco (3,916,000). Rio de Janeiro, the capital, had nearly 3,000,000 inhabitants. (O Globo, Rio de Janeiro) **(Prev. rep. 13876 C.)**

D. CANADA. — Resignation of Conservative Leader.

Mr. George Drew (62), leader of the Progressive Conservative Party since 1948, and formerly Premier of Ontario, resigned on Sept. 21 as a result of prolonged ill-health over the past two years. Mr. W. Earl Rowe was appointed acting leader of the party until December, when Mr. Drew's successor will be chosen at a national party convention.—(Montreal Star)

(Prev. rep. 9602 A.)

A. MALAYA.—Appointment of Constitution Commission. - Transfer of Internal Defence and Security to Federation Government. - Creation of Federation Armed Forces. - Surrender Terms for Terrorists. - Rejection of Communist Proposal for New Negotiations. - Progress of Anti-Terrorist Operations.

It was announced in London on March 9 that a Commission was to be appointed to draft a Constitution for a self-governing Malaya within the British Commonwealth. Its chairman and one other member would be from Britain, and it was hoped that its four other members would be from Canada, Australia, India, and Pakistan respectively.

The appointment of Lord Reid as chairman of the Commission was announced by the Colonial Secretary on May 16, whilst the other members subsequently appointed (those from the other Commonwealth countries on nomination by their Governments) were: Sir Ivor Jennings (U.K.), Sir William McKell (Australia), Mr. B. Malik (India), and Mr. Justice Abdul Hamid (Pakistan). As regards a Canadian member, the Colonial Office announced on July 18, the day before the Commission opened its hearings, that Canada had found herself unable to nominate a member and that it had been agreed with the Malayan Rulers that the Commission would carry on its work without a Canadian member.

Lord Reid (66), a Lord of Appeal in Ordinary, was Solicitor-General for Scotland from 1936-41, Lord Advocate from 1941-45, and Dean of the Faculty of Advocates from 1945-48. Sir Ivor Jennings, formerly Vice-Chancellor of the University of Ceylon and now Master of Magdalene College, Cambridge, was a member of the 1948 Ceylon Constitutional Commission. Sir William McKell was Governor-General of Australia from 1947-53; Mr. Justice Abdul Hamid was the chief draftsman of the Constitution of Pakistan, and Mr. Malik was appointed Chief Justice of Uttar Pradesh in 1948.

The terms of reference of the Commission were as follows:

"To examine the present constitutional arrangements throughout the Federation of Malaya, taking into account the positions and dignities of H.M. The Queen and of Their Highnesses The Rulers; and to make recommendations for a federal form of constitution for the whole country as a single, independent, self-governing unit within the Commonwealth, based on parliamentary democracy with a bi-cameral legislature, which would include provision for

(*a*) the establishment of a strong central Government, with the States and Settlements enjoying a measure of autonomy (the question of the residual legislative power to be examined, and to be the subject of recommendations, by the Commission) and with machinery for consultation between the central Government and the States and Settlements on certain financial matters to be specified in the Constitution;

(*b*) the safeguarding of the position and prestige of Their Highnesses as constitutional Rulers of their respective States;

(*c*) a constitutional *Yang do-Pertuan Besar* (Head of State) for the Federation, to be chosen from among Their Highnesses The Rulers;

(*d*) a common nationality for the whole of the Federation;

(*e*) the safeguarding of the special position of the Malays and the legitimate interests of other communities."

The appointment of the Constitution Commission had been recommended by the London Conference (see 14710 A), whose report had been accepted by H.M. Government and the Malayan Rulers on March 1.

Implementation of Other London Conference Decisions.

The following measures were taken to implement the decisions reached at the London Conference concerning the interim period pending the achievement of full independence.

Malayan Responsibility for Internal Defence and Security. The Federation Government announced on March 1 that an Emergency Operations Council had been set up, with the Chief Minister (Tengku Abdul Rahman) as chairman and Lieut.-General Sir Geoffrey Bourne as Director of Operations, and that the Tengku had also assumed the portfolio of Internal Defence and Security. This included responsibility for the Federation's military forces and volunteer forces, the police, and the Home Guard, and would cover all matters of internal security and measures to counter subversion. Immediate effect would also be given to the recommendation that an External Defence Committee should be established.

A new Malayan Army headquarters assumed command in July of all regular armed units raised in the Federation. Totalling 9,000 men, the units which form the nucleus of the new Federation Army consist of seven battalions of the Malay Regiment, one battalion of the Federation Regiment, an armoured car squadron, a field engineer squadron, three units of the Federation Signals, military police units, and headquarters and depot staff. There is also a Federation Military College.

A Federation Armed Forces Council was also set up in July, consisting of the Minister of Internal Defence and Security, a representative of the Rulers of the States, the General Officer Commanding the Federation Army, two other officers, and the civilian Secretary for Internal Defence, provision being made for the appointment of up to three additional members on the establishment of a Malayan Navy and Air Force. This Council, which met for the first time on July 26, possessed initially only advisory powers, but assumed executive authority as regards the command, discipline, and administration of all the Federation's armed forces under a Bill introduced by the Government and passed by the Legislative Council on Sept. 12-13.

Abolition of British Advisers to the Sultans. The Legislative Council of the Federation decided on July 12 to abolish the posts of British advisers to the Sultans. This decision (not applicable to the settlements of Penang and Malacca) was taken by a unanimous vote on a motion of the Chief Secretary (Mr D. C. Watherston), who described the disappearance of the advisers as "a logical step towards the independence of the States," which had developed so much in recent years.

The first British adviser had been appointed in 1874, when the British Government was asked by one of the Sultans to nominate a resident to assist him in ending disorders between Chinese and Malay tin workers. Later the other Sultans also appointed British residents. At the time of the Legislative Council's decision the posts of advisers in Selangor and Negri Sembilan were vacant, and it was left to the other Sultans concerned to arrange for the termination of the appointments of their respective advisers.

Anglo-Malayan Defence Treaty. Discussions on a treaty of defence and mutual assistance, to come into operation with the achievement of Malayan independence, began at Kuala Lumpur on April 16. The working party engaged on drafting the treaty, which was presided over by Sir Robert Scott (British Commissioner-General for South-East Asia), was composed of equal numbers of Malayan and British delegates, with observers from Australia and New Zealand. The principal British representative was Sir Harold Parker (Permanent Secretary to the Ministry of Defence), while the Malayan delegation was led by Tengku Abdul Rahman, the Chief Minister.

Government's Surrender Terms for Terrorists.

Following the abortive Baling talks with the Communists in December 1955 and the expiry of the Government's amnesty offer on Feb. 8, 1956 (see 14710 A), Tengku Abdul Rahman announced new surrender terms for Communist terrorists on March 15.

Appealing to the terrorists to stop the "senseless fighting," the Chief Minister said that the new surrender offer was directed towards those who had not committed murders or atrocities, and who had "genuinely forsworn terrorism." Such members of the terrorist movement would be helped to regain their freedom and would be reunited with their families, whilst alternatively they could choose to be sent to China. If terrorists were prepared to take orders from China rather than show loyalty towards the Malayan Government, it was clear that they were aliens, and (he added) "we should be only too glad if they would return" to China.

No direct reply was made by the Communists to this offer, but on April 1 it was announced that the terrorists had sent a letter to the Malayan Chinese Association declaring that Chin Peng, the Communist leader, was ready to resume talks on ending the emergency. As a condition for the cessation of terrorism, however, the letter demanded the recognition of the Malayan Communist Party by the Government. Tengku Abdul Rahman rejected the Communist proposal in a broadcast on April 2. He declared that he would only meet the Communists again in order to discuss their unconditional surrender, dismissed the letter as a "trick," and continued: "I refuse to be deceived a second time into carrying on talks when they have not the slightest intention of coming to any form of agreement. As soon as they can prove themselves to be law-abiding and loyal to the country they will be released to rejoin the society they have left during these eight years. If any wish to go back to their country of origin I will afford them an opportunity to do so."

General Sir Geoffrey Bourne (then Director of Operations in Malaya), commenting upon the terrorists' letter on April 4 in Kuala Lumpur, expressed the belief that Communist policy had been found to be bankrupt, and that the terrorists were "at their last gasp." He added, however, that four problems continued to confront the Emergency Operations Council, viz. (*a*) obtaining support from all Malayan citizens, (*b*) overcoming the Malayans' fears of committing themselves, (*c*) preventing supplies from reaching the terrorists, and (*d*) getting information about their organization and intentions.

Tengku Abdul Rahman made a further statement on April 25, after Chin Peng's offer to renew the peace talks had been broadcast by Peking Radio. Stressing that "they must come to talks on my terms," the Chief Minister said that he was willing to meet the Communist leader again, provided that an agreed agenda was drawn up and that there was to be no bargaining.

New measures in the Government's campaign against the terrorists were described in a statement by the Chief Minister on May 17.

Emphasizing that the object of the new methods was to enlist a wider measure of public co-operation, he announced that the number of operational units of the Federation Home Guard would be increased from 450 to 850 by Sept. 30; that food control (introduced to prevent

supplies from reaching the terrorists) would be made more efficient and better co-ordinated, and that the number of women searchers in specified areas would be increased by 1,000. On the other hand, some of the emergency regulations would be gradually lifted in certain areas in order to encourage public co-operation with the authorities

New Director of Military Operations.

Lieut.-General Sir Geoffrey Bourne was succeeded as Director of Operations by Lieut.-General Bower on May 19 (see 14931 A, page 14933). When leaving Kuala Lumpur for Britain on this date, he summed up the situation in Malaya as follows:

"First, the Malayan Communist Party in the jungle has lost all hope of victory and cannot impede independence. It can only fight on forlornly, knowing that it costs us much effort and money.

"Second, the issue has never been clearer than it is now. If the Communists in Malaya insist on fighting they have only two prospects —death or surrender. Now that they can see Tengku Abdul Rahman firmly and strongly leading the country forward there remains not the slightest element of nationalism in their cause, and I believe there must be many waverers in their ranks.

"Third, militarily the situation is promising, though the slowing down of incidents and of 'eliminations' may give a different impression It is not a stalemate which we are seeing, it may well be the nearness of victory"

General Bower, however, gave a warning on Aug. 20 against regarding the terrorists as no more than a nuisance while the "hard core" of the terrorist organization still existed. "This," said General Bower, "must be broken, and broken quickly Although almost every citizen in the country has some part to play, in the end it is only the Army, Police and Home Guard that can finish the emergency."

Terrorist Activities. - Operations by Security Forces.

Apart from a number of smaller incidents, the more serious acts of terrorism committed by the Communist rebels were the murder of an estate headman in Central Malaya (Feb. 24); the killing of three Australian soldiers when Communists ambushed a military patrol in the Sungei Siput district, north of Ipoh (announced June 23); and an attack on a police patrol in the Kedah area near the Siamese border, when one police constable was killed (Sept. 15).

Anti-terrorist operations by the security forces included the following:

Two terrorists were killed and another wounded in the Kuata Kubu district of Selangor on March 14; three Communists, including a district committee secretary, were killed in Johore on April 24, and in an engagement in Johore on July 8 security forces killed five terrorists. Large-scale operations were opened in northern Malaya on July 18 with the object of reducing the last major stronghold of the terrorists in the Federation, and on July 30 five terrorists were killed in Kelantan and Perak. On Aug. 25 the security forces scored a major success when they shot dead Yeung Kuo, the deputy commander of the terrorists, in an engagement in southern Selangor. Four terrorists were reported killed in northern Malaya on Sept 6, and another five in Negri Sembilan on Sept. 16

The total number of terrorists killed by the security forces since the beginning of 1956 was given on Sept 17 as 199

During the period under review important operations were conducted by naval and air units in support of ground forces. On June 26 the R.A.F. announced attacks involving over 60 aircraft upon targets in Johore and Negri Sembilan, and on Aug. 23 naval units shelled part of the coast of Johore

In addition to those killed or captured in military operations, numbers of terrorists deserted the Communist bands and surrendered to the authorities. These surrenders generally involved individual terrorists, but occasionally small groups submitted to the security forces, notably a party of 11 Communists who gave themselves up in Selangor on Feb. 27, and three, including two members of the Communist State committee, in Pahang in mid-September.

The successes of the security forces made possible the progressive declaration of further "white areas" [i e. parts of the country known to be free of terrorists where emergency restrictions are lifted] On April 27, 574 square miles of Kelantan inhabited by 19,000 people were declared "white", on May 20, 430 square miles of Trengganu and Kelantan with 31,500 inhabitants were freed from restrictions; and on July 26 part of the Muar area near the coast of Johore became "white."

Appointment of Malayan Commissioner in Australia.

The Colonial Office announced on Aug. 7 that the British, Australian, and Malayan Governments had approved the creation of the post of Commissioner for the Federation of Malaya in Australia. Pending the attainment of full independence, the U.K. High Commissioner in Australia would remain responsible for the representation of the Federation in Australia, but the Malayan Commissioner would be appointed at once to work in close touch with him, with special duties mainly in connexion with trade promotion, publicity, and the welfare of Malayan students.

The Colonial Office further announced that Dato Nik Ahmed Kamil bin Haji Mahmood had been appointed the first Malayan Commissioner in Australia Dato Nik Kamil was First Minister of Kelantan from 1948 to 1953, and Member of the Executive Council for Local Government, Housing and Town Planning from 1953 to 1955, when he retired from the public service

The Australian Minister for External Affairs (Mr Casey) announced on Sept. 3 that six young Malayan civil servants had arrived in Canberra to be trained for the Malayan diplomatic service. Their training would include three months spent with the Australian Department of External Affairs as well as academic studies

Economic Measures.

Tengku Abdul Rahman announced on April 22 the setting up of a special committee to plan economic development in Malaya, consisting of himself, the Ministers of Finance, Commerce and Industry, Agriculture, and Economic Resources, and an Economic Adviser.

The Legislative Council approved on March 19 certain reliefs in industrial taxation, with a view to assuring the availability of capital for investment in Malaya's industrial development The measure provided that the mining industry would be granted tax relief on expenditure incurred in unsuccessful prospecting, and that other reliefs would be granted to encourage new rubber planting and industrial building.

It was announced on June 28 that the Government had set up a 12-member working committee to consider ways of attracting overseas capital investment to Malaya. Government departments responsible for labour, trade and commerce, inland revenue, Customs, agriculture, forestry, and town planning were to be represented on the committee, which was expected to make its report in November.

As a mark of friendship towards the people of Britain, Tengku Abdul Rahman announced on Sept. 12 that Malaya would make a gift to Britain of a house and land in Kuala Lumpur, to be used as the residence and offices of the British representative there after Malaya achieved independence. (Times - Daily Telegraph - Manchester Guardian - Financial Times - Australian News and Information Bureau)

(Pre. rep. 14710 A; 14787 C.)

A. UNITED KINGDOM. — Press. - New Editor of "Manchester Guardian." - New Chairman of Observer Trust.

It was announced on Oct. 17 that Mr. A. P. Wadsworth, editor of the *Manchester Guardian* since 1944, would retire at the end of the month because of continued ill-health, and that he would be succeeded by Mr. H. A. Hetherington, at present an assistant editor and foreign editor on the paper. Mr. Wadsworth would, however, continue to be associated with the *Manchester Guardian* as Editor Emeritus and as a member of the board of the Manchester Guardian and Evening News, Ltd. Mr. Hetherington would also join the board.

Mr. H. A Hetherington (36), a son of Sir Hector Hetherington of Glasgow University, joined the *Manchester Guardian* in 1950 He was educated at Gresham School, Holt, and Corpus Christi College, Oxford, served in the Royal Armoured Corps during the war, and later held a Commonwealth Fellowship at Princeton University (U.S.A.)

On Oct. 13 it was announced that the trustees of *The Observer* had appointed Sir Ifor Evans as the next chairman of the Observer Trust as from Jan. 1, 1957.

Sir Ifor Evans (57) held professorships of English Literature at Southampton, Sheffield, and London Universities, was educational director of the British Council, and from 1946-51 was vice-chairman of the Arts Council of Great Britain

The first chairman of the Observer Trust was the late Lord Astor, who was succeeded on his death in 1952 by Mr. Dingle Foot, Q.C. Since the beginning of 1956 Mrs. Mary Stocks (formerly Principal of Westfield College, London) had been acting chairman. The other members of the Trust are Marshal of the R.A.F. Lord Portal of Hungerford, Sir Keith Murray (chairman, University Grants Committee), Mr. E. M. Nicholson (Director-General of the Nature Conservancy), and Lieut.-Colonel C. H. Golding. Mr. Arthur Mann is an honorary trustee. (Manchester Guardian - Observer) **(Prev. rep. 12756 E.)**

B. WESTERN GERMANY. — Recall of Chargé d'Affaires from Syria.

It was announced in Bonn on Oct. 13 that the German Federal Government had recalled its Chargé d'Affaires from Damascus on learning that Syria had agreed to the opening of a Consulate by the East German Government. The Federal Government's decision implemented its earlier threat that it would withdraw diplomatic recognition from any country recognizing the Government of the German Democratic Republic.—(Frankfurter Allgemeine Zeitung)

(Prev. rep. 14606 D.)

A. SOUTH AFRICA.—Social-Economic Development of the Bantu Areas. - Report and Recommendations of Tomlinson Commission. - The Government's Attitude. - Parliamentary Debate. - Report rejected by African Leaders. - National Congress on Future of the Bantu.

The report was published on March 27 of a Commission on the Socio-Economic Development of the Bantu Areas, appointed by the Union Government in 1951 under the chairmanship of Professor F. R. Tomlinson, professor of agricultural economics at Pretoria University and an authority on Bantu affairs.

The other members of the Commission, in addition to Professor Tomlinson, were Mr. C B Young, Under-Secretary for Native Affairs (Bantu Areas); Dr J H Moolman, of the Natural Resources Development Council, Mr M. D. C. de Wet Nel, M P, deputy chairman of the Native Affairs Commission. Mr. G J. Badenhorst, an industrialist; Dr. C. H. Badenhorst, an authority on missionary work; Dr. J. H. R. Bisschop, of the Onderstepoort agricultural research institute; Mr. J. H. J. van Rensburg, an authority on farming, Mr C. W. Prinsloo, head of the Information Service, Native Affairs Department; Mr F. H. Botha, secretary to the Commission.

The Commission's terms of reference were: "To conduct an exhaustive inquiry into and to report on a comprehensive scheme for the rehabilitation of the Native Areas with a view to developing within them a social structure in keeping with the culture of the Native and based on social-economic planning"

The Tomlinson Commission put forward detailed proposals for the consolidation of the Bantu Areas into seven main divisions or blocks, involving the construction of 100 new Bantu townships, and recommended the expenditure of £104,000,000 on the development of industry, agriculture, and social services in those Areas. The report was divided into four general sections, summarized below, viz., I—an introductory section reviewing the present position of the Bantu population; II—a description of the existing Bantu Areas; III—detailed recommendations for the development of the Bantu Areas; IV—recommendations for planning, finance, and development.

I—Introduction. - The Present Position.

The introductory section gave a general review of the place of the Bantu in South Africa's national economy, together with demographic and other statistical information.

Population. According to the 1951 census, the population of South Africa in that year consisted of 2,643,000 Europeans, 8,535,000 Bantu, 367,000 Asiatics, and 1,103,000 Coloureds Since 1904, while the total population had increased by 144 per cent, the Bantu and Coloured sections had remained almost static in proportion to the total (67 5 and 8.7 per cent respectively), the Europeans had decreased from 21.6 to 20.9 per cent, and the Asiatic section had slightly increased. European immigration, after a large-scale influx during 1890-1904, had diminished to about 2,000 a year, until in 1947 and 1948 it was again responsible for a total net gain of 48,000. "The most important reason for the limited scope of European immigration," the report pointed out, "is the presence in South Africa of large numbers of non-Europeans employed as unskilled labourers, with whom potential unskilled European immigrants cannot compete." In 1951 there were about 650,000 foreign-born Bantu in the Union, at least one-third of whom must be regarded as permanent residents This immigration had contributed considerably to the increase of the Bantu population.

The death-rate in 1952 was under 9 per 1,000 for Europeans, 10 9 for Asiatics, 19.9 for Coloureds, and between 27 and 32 for Bantu. Birth-rates were 45 5 per 1,000 for Coloureds, between 43 and 47 for Bantu, 38.6 for Asiatics, and 26 for Europeans The net reproduction rate was about 1.45 for Bantu, 1.54 for Europeans, 2.03 for Coloureds, and 2.12 for Asiatics

The urban population had risen from under 25 per cent of the whole population in 1904 to 42.6 per cent in 1951. In the latter year 27.1 per cent of the Bantu were living in urban areas, 42.6 per cent in the Bantu Areas, and 30 3 per cent in the remaining rural areas.

The report added "On the basis of the most acceptable population projection . . . we get the following probable population in the year 2000. 4,588,000 Europeans, 21,361,000 Bantu, 3,917,000 Coloured persons, and 1,382,000 Asiatics (total 31,248,000). The Europeans will then constitute only 14.7 per cent of the total, in comparison with 20 9 per cent in 1951. It may, however, be anticipated that the numbers of the European population will still be supplemented by migration in greater or lesser degree, so that their numerical strength will be at a level between 4,588,000 and 6,150,000."

Racial Relations. Racial relations, the report observed, were to a very large extent based on the principle of segregation, which was accepted as self-evident by the vast majority of the European population As the Bantu were introduced into non-Bantu areas and became more and more detribalized and Westernized, however, the European would be confronted with ever greater problems in regard to the maintenance of his position of authority. The principle of separation took the following forms:

(*a*) In the political sphere, government rested in the hands of the Europeans, with very limited Bantu representation in Parliament and the Cape Provincial Council. As a rule the Bantu had no representation in local authorities, and except in the Bantu Areas the administration was exercised almost exclusively by Europeans.

(*b*) In the economic sphere, managerial, professional and skilled workers were almost exclusively Europeans, and the European worker's position was protected against Bantu competition. Bantu workers might not form registered trade unions.

(*c*) There was an almost total absence of free social intercourse between races, and mixed marriages were legally prohibited.

Christian Missions. Seventy-eight recognized Churches and societies were carrying on mission work among the Bantu in 1951, the Methodist Church being the strongest. Religious sectarianism had developed among the Bantu on an unprecedented scale, so that in 1951 1,286 applications by Churches for State recognition were awaiting consideration. Bantu Christians formed 36.1 per cent of the total population, and Bantu heathens 32.5 per cent.

Bantu Education. Expenditure on Bantu education had risen from £2,200,000 in 1945 to £8,500,000 in 1956, of which the State contributed £6,500,000 and Bantu taxpayers £2,000,000. About 1,100,000 Bantu children were attending school in 1956, and over 1,600 Bantu students were attending university institutions.

Political Rights. Under the South Africa Act all male non-Europeans in the Cape who possessed the required property and educational qualifications had possessed the right to vote, whilst in the other Provinces the Bantu had been excluded from the franchise. The Representation of Natives Act of 1936 had placed Cape Native voters on a separate roll, and had provided for their representation by three Europeans in Parliament and two Europeans in the Cape Provincial Council. The Act had also provided for the election of four Senators by chiefs, headmen, Native advisory boards, etc., and for the institution of a Native Representative Council, which was, however, abolished in 1951.

The Bantu were excluded from the municipal franchise in European towns. Native Advisory Boards existed in urban areas to advise town councils on matters affecting adjoining Bantu townships.

The Bantu and the National Economy. Of the Bantu engaged in agriculture in 1946, 66 per cent were entrepreneurs (mainly small farmers in the Bantu Areas) and 34 per cent were employees Productivity in the Bantu Areas was low, the average income of a Bantu farm labourer in 1949-50 being £83 p a, whilst the annual income of farming families in the Bantu Areas was £43 (£22 from farming and £21 from outside work).

There were 427,000 Bantu employed in mining in 1946; they were preponderant in unskilled jobs and largely preponderant in semi-skilled posts. Their average remuneration in cash and kind was £90 p.a. in 1949. Mineral deposits in the Bantu Areas were either not exploited or exploited by European companies who paid royalties to the Bantu.

Of all industrial workers 50.7 per cent were Bantu in 1948-49. Five per cent of skilled workers were Bantu, 40 per cent of semi-skilled workers, and 85 per cent of unskilled. The average wage of Bantu industrial employees in 1948-49 was £110 p.a, compared with £450 in the case of Europeans.

Bantu males constituted 51.2 per cent of male workers in the wholesale and 55.7 in the retail trade in 1946-47, 89 per cent of them being unskilled. Average wages were £103 p a. in the wholesale and £90 in the retail trade. Of transport employees 51.7 per cent were Bantu, of whom the great majority were unskilled

Only 1.1 per cent of economically active Bantu were engaged in the professions, amusements, and sport in 1946, including 11,000 policemen, 4,300 ministers and priests, 14,000 teachers. 74 technicians, 43 doctors, and 13 advocates.

Of the economically active Bantu in 1946, 5 8 per cent of the males and 20.1 per cent of the females were employed in domestic service, forming 88.7 per cent of all domestic servants. Their monthly remuneration in 1952, in cash and kind, was £8 18s. for males and £8 13s. for females.

Income and Social Services. The *per capita* income of the Bantu in 1946-47 was estimated at £23 2, compared with £69.3 for all races. The income of the Bantu, however, was augmented by the amount by which expenditure on Bantu welfare from State and other funds exceeded their own contribution to these funds. In 1951-52, expenditure on Bantu welfare by Central, Provincial and local administrations, and by private organizations (after deduction of Bantu contributions) could be estimated at £28,624,000, or £3 7s. 1d per head of the Bantu population. The portion of expenditure by Union and Provincial administrations which could be allotted to the Bantu amounted to £16,157,000, as compared with a Bantu contribution of £9,677,000.

The report stated "Comparison of the *per capita* government expenditure (all races) on health and education in certain other countries with the *per capita* expenditure for the Bantu population alone in the Union . . shows that the expenditure of the Union in 1951-52 (health £1 6s. 11d, education 15s 9d.) was much higher than that of Kenya (1950. 5s. 1d. and 4s. respectively), Nigeria (1949-50 1s. 2d and 1s 8d.), Uganda (1950. 2s. 4d and 2s. 3d.), the Gold Coast (1949-50 4s 6d and 6s. 1d.), Nyasaland (1950: 1s 7d and 1s 6d.), Tanganyika (1950: 1s. 10d. and 1s 2d), and the Belgian Congo (1950 5s. 8d. and 3s. 8d).

"For Southern and Northern Rhodesia it was possible to calculate the expenditure on Bantu education separately; in Southern Rhodesia it amounted to 6s. 7d. (1951) and in Northern Rhodesia to 6s. 6d. (1950), health expenditure on all races was 13s. 9d. *per capita* in Southern Rhodesia and 12s 5d in Northern Rhodesia in the said years.

"Differences in methods of calculating price levels (as far as these are not expressed in the exchange rates), and in habits and customs, must be borne in mind in international comparisons of *per capita* income. With this reservation, it may be pointed out that the *per capita* income of the Bantu in the Union—namely £19.64 in 1946-47 according to conventional calculation, or £23.17 if that portion of the production of the subsistence sector which does not enter into the market is included in the calculation—is much higher than that of the northern neighbouring States, namely £8.59 in Southern Rhodesia (1946), £5 09 in Northern Rhodesia (1946), £5.93 in Kenya (1949), and £9.57 in the Belgian Congo (1950)"

Non-European Immigration. In 1951 the number of immigrant Natives amounted to nearly 650,000, this implied that the number of Native immigrants had averaged 21,000 a year since 1936. As far as could be established, there was no migration of Union Bantu to neighbouring territories. The main sources of Bantu immigration, according to the 1946 census, were Basutoland (almost 200,000), Portuguese East Africa (141,000), Nyasaland (61,000), Southern and Northern Rhodesia (46,000), Bechuanaland (39,000), and Swaziland (34,000). This immigration was attributable to the high tempo of development in South African mining and industry, and to the consequent fact that higher wages were offered in the Union than elsewhere in Africa south of the Sahara.

II—The Bantu Areas.

This section of the report gave a description of the Bantu Areas, shown on the map on page 15157.

Extent and Resources. The report recalled that the Natives Land Act of 1913 had prohibited the acquisition by any person other than a Bantu of any land in Scheduled Native Areas without the Governor-General's consent, and the acquisition by a Bantu of any land, or interest in land, outside a Scheduled Native Area from a person other than a Bantu. The Native Trust and Land Act of 1936 had prescribed a large number of "Released Areas"—i.e. areas released for acquisition and occupation by Bantu and by the South African Native Trust. The eventual total extent of the Bantu Areas, if the full quota of land to be acquired in each Province was obtained, was 19,422,808 *morgen*; to this must be added 188,660 *morgen* owned by Bantu outside Scheduled and Released Areas, for which provision would have to be made upon expropriation. [A *morgen* is a little over two acres.]

The Bantu Areas were situated chiefly in the eastern parts of the Union, and comprised some 260 separate areas which, taken together, formed a rough horseshoe in shape, curving round the Orange Free State and the Transvaal Their total extent, after addition of all the land provided for under the 1936 Act, would be nearly twice as large as Natal, considerably larger than the Orange Free State, and 13 7 per cent of the whole area of the Union. If the High Commission Territories (which were essentially Bantu Areas) were included, Greater South Africa would consist of 766,000 square miles, of which 348,000 square miles (45 per cent) would belong to the Bantu. Of the total Bantu population of Greater South Africa, 4,700,000 (49 per cent) lived in the Bantu Areas.

The south-eastern sector of the Bantu Areas was very favourably situated as regards water resources; in the north-western sector, however, there was insufficient permanent water, and in some parts the lack of water was so serious that there was scarcely sufficient for stock-farming. The coalfields often impinged on the Reserves, but the principal sources of power were situated within the European area. The less important minerals, such as asbestos, platinum, and chrome, were mostly derived from the Bantu Areas, the north-western sector being much richer than the south-eastern in this respect. There was no industry in the Areas, and in many parts the principal railways and roads passed between them, although no Bantu Area was far from a road or railway.

Population. At present 3,600,000 Bantu lived in the Areas, which were the most densely populated parts of the Union, apart from the large urban centres. There were no Bantu cities or towns in these Areas. At the time of the 1951 census about 569,000 persons were temporarily absent from the Areas; if this number was added to the *de facto* population of 3,633,000, it appeared that 4,202,000 Bantu, or more than half the indigenous Bantu of the Union, had their homes there. The absent males formed about 12 per cent of the total population of the Areas.

III—Development of the Bantu Areas.

Detailed recommendations for the economic and social development of the Bantu Areas were contained in this section, which also discussed the racial considerations involved.

Racial Policy. The report stated that the Commission had become convinced of the very close relationship between the existence and future role of the Bantu Areas and the so-called Native problem in general, and wished to emphasize that a "clear and purposeful policy was absolutely essential." The purpose behind the legislation of 1913 and 1936 had been to create a national home for the Bantu, while limiting their rights in the non-Bantu areas. This policy, however, had not been fully implemented, as a result of (*a*) the undeveloped state of the Bantu Areas; (*b*) the slow rate of purchase of land under the 1936 Act, (*c*) the large-scale process of economic integration over the past decade; and (*d*) the "slow and half-hearted manner" in which administrative powers had been conferred on the Bantu in the Bantu Areas The two population groups [European and Bantu] were becoming more and more interwoven, especially in the cultural, political, and economic spheres, and if this process continued the probable results would be cultural assimilation, the removal or disappearance of all economic measures differentiating between the two groups, cultural and economic equality leading to political equality, increased social contact, and ultimately complete racial assimilation.

The Commission was convinced that there was little hope of evolutionary and peaceful development occurring in South Africa along these lines The European population, if given the choice, would be willing to subordinate economic considerations and advantages to the aim of opposing any development threatening their existence as a separate racial entity, whilst on the part of the Bantu there was "a growing conviction that they are entitled to, and an increasing demand for, the fruits of integration, including an ever greater share in the control of the country" A policy of integration could therefore only lead to "problems and dangers of the greatest intensity."

The only alternative was to promote "the establishment of separate communities in their own separate territories, where each will have the fullest opportunity for self-expression and development." Although the argument was sometimes used that the Bantu Areas were not large enough, or did not possess the required potential for development, to make this policy a practical proposition, it appeared that these Areas, if properly developed, would be capable of carrying a population equal to that of the present Bantu population of the Union, and of providing them with a reasonable standard of living. The implementation of the Commission's policy of separate development, however, would have to be effected within the framework of the consolidated Bantu Areas of the Union, the native areas of South-West Africa, and the High Commission Territories.

[One member of the Commission, Dr. Bisschop, expressed doubts in a minority report about the practicability of any of the three policies which had been suggested—i.e. integration, a combination of economic integration with segregation in all other spheres, and segregation. He accordingly proposed that segregation should be tested in practice, and if, as he feared, it were found impracticable, progressive integration with its economic and political consequences should be accepted.]

Principles of Development. Development of the Bantu Areas was desirable as a means to prevent further deterioration and destruction of their natural resources, to increase the Union's food production, to use Bantu labour more productively, to provide opportunities for the free development of the Bantu, and to raise their living standards. The primary aim should be the welfare of the Bantu, and European participation should be restricted to the extent to which it did not harm Bantu interests Development should be linked with that of the Union as a whole, and should be undertaken in co-operation with the Bantu and, as far as possible, by the Bantu themselves.

Agricultural Development. "To create a stable and productive system of agriculture in the Bantu Areas," the report stated, "it will be necessary to change the present system under which all Bantu endeavour to be farmers—that is to plough, raise crops, and graze livestock—to one in which only those families who want to be full-time farmers are provided with units capable of producing a respectable living" In terms of the present standard of Bantu production, a farming family in the Bantu Areas required on the average 52.5 *morgen* of land to make a gross annual income of £70. On this basis, the Bantu Areas could carry about 307,000 farming families, or about 51 per cent of the population as recorded in the 1951 census. The further 3,000,000 *morgen* which would eventually be added to the Bantu Areas under the 1936 Act would be able to carry 50,000 more families. The Commission estimated the cost of settling 307,000 families in the present area at £46,700,000.

The Commission recommended. (1) All land within the Bantu Areas should immediately be declared "betterment areas," and stabilization (i.e. conservation) measures started. (2) Such measures should, wherever possible, be undertaken with the consent and co-operation of the inhabitants of the Reserves concerned, but where protection of the soil demanded it they should be carried out even without such consent (3) Wherever practicable, settlement should be undertaken on a basis of "economic farm units." (4) A sufficient number of Bantu farmers should be settled as soon as possible in order to test the proposed land units (5) Families for whom provision could not be made should be placed temporarily in the residential sections of the betterment areas, or in Bantu villages or towns. (6) Provision should be made for the sale only of planned and fully stabilized land, and only to settlers already living in the betterment areas. (7) Before being permitted to purchase a second unit, a Bantu should already be in full possession of a farm unit. (8) The sale of arable land and grazing rights should be subject to the condition that they were used efficiently. (9) The Lands Division of the Native Affairs Department should be the principal source of credit.

Irrigation Farming. The irrigable potential of the Bantu Areas was estimated at 63,341 *morgen*, on which it would be possible to settle 36,000 families (216,000 persons) at a cost of £3,000,000.

Sugar-cane Growing. The Commission recommended that 30,000 acres of cane should be planted in accordance with a five-year plan. From this scheme (the cost of which was estimated at £365,200) an annual production of 45,000 tons of sugar could be realized, and 3,750 families could be established in full-time farming.

Fibre-planting. The Commission recommended that an area of about 30,000 *morgen* should be planted with New Zealand hemp and sisal over a 10-year period.

Forestry. The Commission recommended that 255,000 *morgen* (538,000 acres) should be afforested, yielding a net profit of about £32,000,000 over a period of 40 years Total expenditure was estimated at £27,000,000 and gross revenue at about £59,000,000.

Mining. A Bantu Mining Section of the Native Affairs Department should be formed, and should co-operate with the Development Corporation [see below] and the Native Trust in the development of mining. Limits not exceeding 10 years should be set upon the periods for which mines were leased to European enterprises. As far as possible, all mineral rights in Bantu Areas not possessed by Bantu or the Native Trust should be purchased or expropriated by the Trust.

Industry. As examples of goods for the Union and export markets which could be manufactured in the Bantu Areas, the report mentioned cheap clothing, footwear, textile goods, and pressed metal goods. The demand for goods and services inside the Reserves was limited at present by the low income of the population, but as this was raised by general economic development a demand would be created for such industries as baking, building, clothing and textiles, footwear, furniture, and household ware The development of forestry and mixed farming, and the cultivation of fibre crops, sugar-cane. fruit, vegetables, and grain would provide the raw materials for timber, paper-making, rope-making, sugar-refining, canning, dairying, and milling industries The basic requirements for an iron and steel industry were present in or near Bantu Areas, and urban development would stimulate quarrying and cement-making Active encouragement should also be given to handicrafts

To ensure that the labour available was employed as productively as possible, the Commission recommended that technical colleges should be erected in the Areas, that the proposed Bantu University [see below] should make provision for the training of technicians and professional officers, and that existing industrial schools serving Bantu Areas should be expanded The Wage Board should be provisionally responsible for determining wages in all labour disputes in Bantu Areas, and the formation of trade unions should not be permitted at the present stage. It should be the Government's responsibility to provide the necessary basic services, such as power and water, before industries were established.

At least £25,000,000 should be provided by the Government for industrial development in the Bantu Areas over a period of five years. If, after this period, larger amounts appeared to be necessary, their size should be determined in the light of prevailing circumstances.

Everything should be done to assist the Bantu to undertake the establishment, management, and development of industry in their own Areas. For a considerable time, however, Europeans and the Government would have to act as entrepreneurs, subject to the following conditions: (i) Bantu must be employed as far as possible and in occupations in which Bantu could not be engaged within a short time provision should be made for training. (ii) Bantu investors and the Development Corporation should have the first option of taking over the share interests of European entrepreneurs who wished to withdraw (iii) European enterprenuers should aim at allowing the Bantu to participate progressively in the management of, as well as investment in, undertakings

The Government should also act as an entrepreneur through a Development Corporation, which, *inter alia*, would create a special section for the promotion of small Bantu enterprises and of co-operative production.

Location of Industry. Industrial development in European areas near Bantu Areas would enable Bantu employees to live with their families, stimulate development in the Bantu Areas, and relieve pressure on agricultural resources. It would have the disadvantage, however, that "the limitations in the industrial sphere which apply to them in all other European areas would also be in force here, and in such circumstances it will be particularly difficult to create a class of skilled workers and entrepreneurs among the Bantu"

Industrial development inside the Bantu Areas could take place through three main channels: (i) through Bantu entrepreneurs; (ii) through the Development Corporation, either by providing Bantu entrepreneurs with help and guidance or by itself acting as entrepreneur; (iii) through European entrepreneurs. Channels (i) and (ii) should be given preference, but to achieve the desired tempo of development the third channel would also have to be used. The type of industries allowed should be carefully selected so that the number of Europeans was reduced to a minimum, their number should diminish as Bantu were introduced into skilled jobs and administrative and technical positions, and the Europeans employed should be housed in existing "white spots" or temporary "white locations," no right of ownership being granted.

The Commission reached the conclusion that circumstances appeared favourable for an immediate initiation of industrial development in four of the 20 Bantu regions—the Transkei (Cape); Letaba-Shingwedzi (N E. Transvaal); Umzimkulu-Harding (Natal), and the Olifants, Steelpoort, and Blyde River blocks (E. Transvaal).

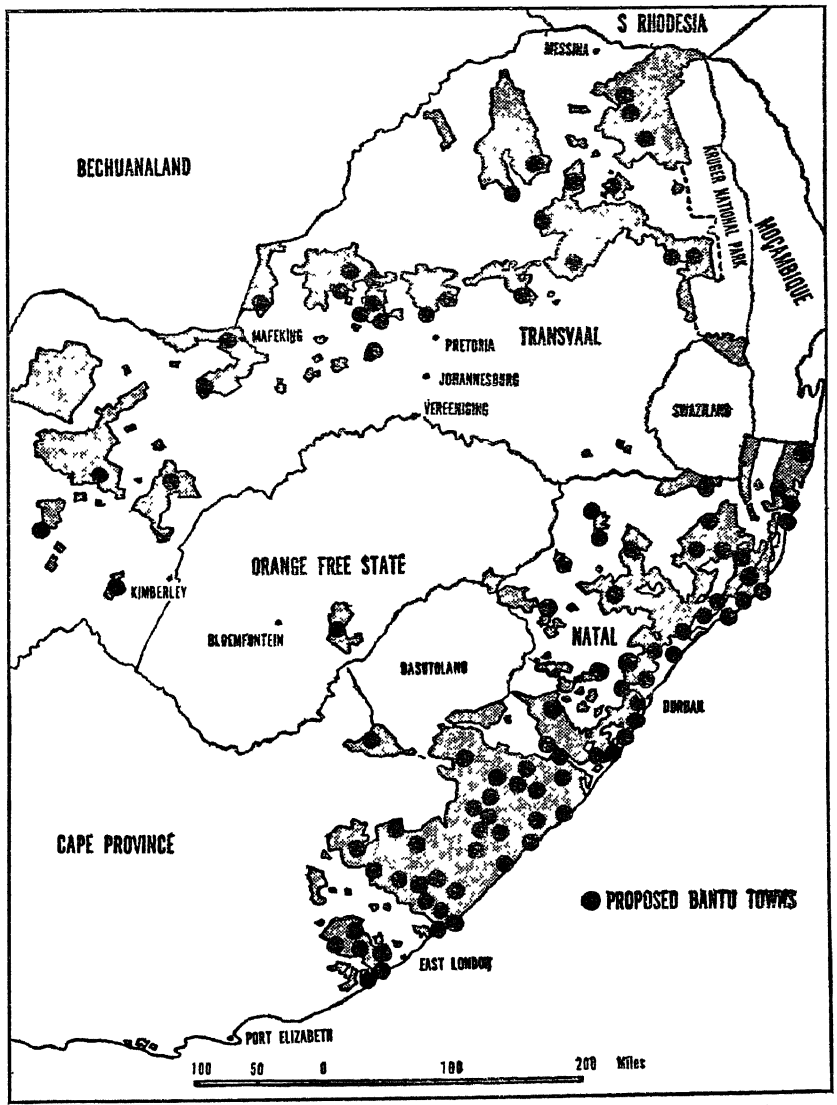
[Two of the Commissioners, Mr. Young and Mr. Prinsloo, submitted a minority report opposing the establishment of industries in the Bantu Areas by persons other than Bantu or bodies controlled by the State.]

Urban Development. - Proposal for 100 New Bantu Towns. The creation of towns was necessary as an inherent part of development, and also for the proper organization of agriculture, as more than 1,500,000 people would have to abandon agriculture in order to give those who remained the opportunity of making a living out of the land without resorting to periodic spells of work elsewhere "The Bantu towns to be established," the report emphasized, "should be towns in the full sense of the word. The Bantu inhabitants must have full proprietary rights; the businesses, the professions, the education, administration, etc., must be completely in the hands of the Bantu, or gradually handed over to them."

Specifically, the Commission proposed the building of 100 new townships in the Bantu Areas—34 in Natal, 32 in the Transkei, six in the Ciskei, 14 in the Northern Areas, and 15 in the Western Areas. Those in the Transkei would include Umtata, which at present had 3,000 European, over 5,000 Bantu, and about 800 Coloured inhabitants, and which the Commission regarded as the future capital of the largest Bantu block in South Africa. The initiative in the establishment of villages and towns should be taken by the Native Affairs Department and the Development Corporation [See accompanying map]

Trade. A special commercial section should be established in the Development Corporation to assist Bantu traders and consumers' co-operatives, e.g. by making provision for commercial training, supply of capital, etc.

Land Tenure. The Commission recommended that title-deeds to both farming and urban land in the Bantu Areas should be granted to the Bantu who purchased such land, and that this form of ownership should replace all other forms of tenure. The holding of title-deeds to agricultural land should be subject to good usage of the land.



The map shows the Bantu Areas (shaded) and the sites of the 100 new Bantu towns proposed by the Tomlinson Commission. (*State Information Office, Pretoria*)

Christian Missions. The report emphasized that the Churches should be deliberately associated with the entire development programme for the Bantu Areas, and recommended that the State should give regular financial support for the training of spiritual workers and missionaries The Commission also recommended "freezing" the further recognition of Churches for as long as the State considered it necessary, stricter supervision of the activities of sectarian movements, and the licensing of all persons wishing to do ecclesiastical work among the Bantu.

Health Services. A comprehensive and co-ordinated Health Service for the Bantu Areas should be established under the Union Health Department This service should be staffed by Bantu as far as possible, but should be operated initially under the direction of Europeans until the Bantu could assume full responsibility A network of clinics should form the basis of the service, and the Bantu should contribute to the cost of the service through a health tax.

Welfare Services. All existing welfare measures in the Bantu Areas should be continued, but should be linked to Bantu Authorities as speedily as possible. Their administration should rest with a special section connected with the Native Affairs Department. All welfare and social security measures applicable to urban Bantu in the European sector should also apply in the Bantu Areas

Education The Commission approved the Native Education Commission's proposals for (i) a lower primary school with a four-year course, (ii) a higher primary school with a four-year course; (iii) secondary and technical schools with four- or five-year courses, (iv) post-matriculation and university training. It also recommended the establishment of a Bantu University of South Africa with constituent colleges, organized on a federal basis. Schools for the training of artisans and of commercial and agricultural workers should be established in the Bantu Areas.

Information The report recommended the conversion of the existing Information Service of the Native Affairs Department into a departmental Enlightenment Service which would furnish the Bantu with information on Government policy, make a study of Bantu movements and organizations, ascertain the wishes of the Bantu and make them known to the Minister and the Department, and furnish the European public with information on the Bantu About two-thirds of the Native Commissioner units should be converted into posts of Magistrates and Inland Revenue Officers, and one-third into Liaison Commissioners, who would explain the Department's development proposals to the Bantu and obtain their co-operation.

Population Capacity. The Commission estimated that the opportunities of employment provided by the Bantu Areas would enable them to support a population of about 8,000,000. If another 1,500,000 were supported by bread-winners working elsewhere in the Union, this would give a total population of 9,500,000

Consolidation of the Bantu Areas. As at present constituted, the Bantu Areas comprised 110 units, in addition to 154 isolated Bantu lands within the European areas The Commission recommended the consolidation of these areas, together with the High Commission Territories [i e. Basutoland, Bechuanaland, and Swaziland] into seven blocks (1) the Tswana Block, with Bechuanaland as nucleus; (2) a Venda-Tsonga Block in the north-east; (3) a Pedi Block, with Sekhukhuneland as nucleus; (4) a Swazi Block, with Swaziland as nucleus; (5) a Zulu Block south of Swaziland; (6) a South-Eastern Nguni Block, with the Transkei as nucleus, (7) a South-Sotho Block, with Basutoland as nucleus.

All European areas and Crown lands situated within these areas would be declared Bantu exchange land, and all Bantu Areas outside them as European exchange areas The coming into being of the seven Bantu Areas would mean that 357,421 square miles (including 65,000 square miles of the Union)—or approximately 47 per cent of the former British South Africa—would be set aside for exclusive utilization by Bantu.

Tempo of Development. Stressing the necessity of immediate action, the report emphasized that delay would result in further deterioration of the soil in the Bantu Areas and an intensification of Bantu settlement in White urban areas. The Commission therefore proposed that development should be enforced over a period of 25-30 years, to ensure that the Bantu Areas should support a population of about 8,000,000 by 1986, in addition to a further 2,000,000 (including absent migrant labourers) who might be housed there on the basis of incomes earned in the border areas or other parts of the Union At this rate of development, the Bantu Areas could accommodate about 60 per cent of the Bantu population by 1981 and about 70 per cent by the year 2000

IV.—Planning, Development, and Finance.

The final section discussed organizational and financial questions arising out of the above recommendations.

Organization. The Commission recommended that the development of the Bantu Areas and co-ordination of the activities of other departments should fall under the control of the Minister of Native Affairs The Minister should increasingly delegate his powers with regard to the Bantu Areas to a member of the Native Affairs Commission, who should at a later stage be raised to the status of a Deputy Minister

A post of Deputy Secretary (Bantu Areas) should be instituted, and the divisions within this part of the Native Affairs Department should be expanded and, when necessary, reorganized into sub-departments, each under an Under-Secretary or Director. Where possible, the organization of the State Departments concerned should be adapted or expanded in such a way that there would be a Bantu Areas division in each. Bantu should be trained by degrees to fill all posts, as far as possible, in these divisions.

The South African Native Trust should make over its development activities to the Development Corporation or the sub-departments mentioned, but should still hold lands in trust and exercise control over matters relating to land rights in the Bantu Areas. The Native Trust Fund should serve as the central treasury for the Bantu Areas, and all parliamentary allocations for use in these Areas should be brought together in a consolidated Budget, drawn up by the Minister of Native Affairs and submitted by the Finance Minister as a separate sub-section of the Union Budget

A Development Council for the Bantu Areas, consisting of a full-time chairman and five to nine full-time members appointed by the Governor-General for their knowledge of the problems involved, should be created to advise the Minister of Native Affairs. There should also be eight part-time members, four of whom should be Bantu

A Development Corporation for the Bantu Areas should be instituted under the Native Trust, with capital funds made available *via* the Trust, and should be empowered to supplement these funds by issuing redeemable shares with restricted dividends and voting powers. Its aim would be the raising of economic and social standards in the Bantu Areas through the promotion of Bantu undertakings and the establishment of its own undertakings, which would eventually be transferred to the Bantu

Finance. The Union Government would be responsible for the financing of the Native Trust and, through it, of the State Departments and development bodies concerned Possible sources of new capital would include loans from home and foreign sources, the International Bank, the U.S. Point Four Programme, and certain of the larger U.S. philanthropic organizations The Native Trust would also receive funds from the sale or leasing of Trust land to Bantu farmers, royalties from mineral exploitation, and profits made by the Development Corporation.

Private enterprises could provide capital by locating their undertakings in the Bantu Areas, subject to certain conditions These would include. (i) that the enterprise should be organized as a separate company, (ii) that only Bantu should be employed except for managerial, technical, and certain skilled posts, and that Bantu should be trained to fill these posts as soon as practicable, (iii) that after a specific period a permit would have to be obtained for the filling of any vacancy by a European (iv) that as long as the company was under European control, it might not obtain any surface or mineral rights in the Bantu Areas without a permit from the Trust.

The Commission estimated the finance required over the first ten years of its development plan as follows

	£
Soil reclamation	27,400,000
Loan facilities for Bantu peasants	3,000,000
Sugar-cane planting	370,000
Fibre cultivation	116,000
Irrigation	3,000,000
Forestry development	3,000,000
Mining development	1,000,000
Industrial development	30,000,000
Towns and villages	12,000,000
Railways and roads	7,830,000
Electricity services	5,000,000
Hospitals and clinics	5,000,000
Welfare and information services	3,600,000
Schools and colleges	3,000,000
Total	£104,316,000

If these proposals were carried out, the present budget of the Native Affairs Department would probably be doubled over the next 10 years, and might rise to about £20,000,000. The sale of land would bring an income of £130,000,000 over 50 years; forestry would return a profit of £32,000,000 over 40 years, and the funds devoted to fibre and sugar-cane cultivation would be recoverable within 50 and 25 years respectively. The profits derived from enterprises undertaken or financed by the Development Corporation might add to development funds, and the higher earnings of the Bantu would also lead to higher income from taxation.

The Union Government's views on the Tomlinson Report were published in a White Paper on April 24, 1956.

The Government accepted the factual material provided by the Commission "as a basis for the further development of ideas and the determination of policy by the Government and the departments concerned," and welcomed the "unequivocal rejection of the policy of integration and of any theories of a possible middle course, as well as the justification by the Commission of the policy of *apartheid*." The White Paper also declared that the Government welcomed "the endorsement of its standpoint, maintained throughout the years, that sufficiently rapid progress will have been made and the further advancement of the process of separation guaranteed—in other words, that security would be ensured for White civilization and opportunities created for both racial groups in all spheres, each in its own territory or among its own people—if after a period of 50 years an approximately equal proportion of Whites and Bantu has been reached in European territory."

Many of the Commission's detailed recommendations were, however, rejected, the more important being the following:

(1) As regards the Commission's recommendation for a 10-year development programme for the Bantu Areas costing £104,000,000, the White Paper declared that "the extent and rate of development in the different fields of activity cannot be determined in advance with any degree of certainty, and the Government therefore does not deem it advisable to fix at this stage the amounts needed for the various projects." Instead, the Government would recommend to Parliament what amount should be contributed to the Native Trust Fund to begin

the process of accelerating afforestation, soil conservation, and irrigation. The White Paper expressed the conviction "that the further development of the Union's natural resources, coupled with the maintenance of a sound financial policy, will enable it to carry out at a satisfactory pace an effective programme which will convert their own areas into a prosperous homeland for the Bantu."

(2) The Commission's proposal that European enterprise should help to build up industries in the Bantu Areas was not accepted by the Government. The White Paper declared that Whites should in no circumstances be given a part to play in building up the economy of the Reserves, which would thus be left to the Bantu themselves, helped by Government funds allocated for this purpose. In this connexion it was stated that the planning, encouragement, and financial assistance required for industrial development in the Reserves should be provided by the Native Affairs Department alone.

(3) The Commission's proposal for a Development Corporation for the Bantu Areas was likewise rejected, as the Government wished to retain its control through the Native Affairs Department A special officer would be appointed in that Department, however, to assist Bantu industrialists in finding capital and to provide the necessary technical assistance.

(4) Because of the rejection of the principle of using White initiative in the economy of the Reserves, there was, in the Government's view, no room for a £25,000,000 fund to finance industrial development as proposed by the Commission Instead, the White Paper said, the financing of Bantu industries should be based chiefly on the principle of self-aid by the mobilization of Bantu capital in a Bantu Areas Investment Organization. This would be encouraged by making use of funds at the disposal of the Native Trust, from which at least £500,000 could be granted immediately for the commencement of the scheme. The Government would also provide assistance and incentives for White industrialists to set up European-owned industries near the Native Reserves—a proposal which it regarded as "of the utmost importance."

(5) Rejecting the Commission's proposal for land tenure reform in the Reserves, and for the carefully controlled sale of farmland to individual Bantus as an incentive to greater productivity and better care of the soil, the White Paper said that the Government was not prepared to abolish tribal tenure of rural land, though it accepted proposals for farming reforms in principle.

(6) On the Commission's proposal that the Native Affairs Department be greatly enlarged and reorganized, the White Paper said that the Government rejected "the idea of establishing a whole series of departments, each with its own permanent head, under one Minister ... In the case of the Native Affairs Department ... all the administrative and other activities are interwoven to such an extent that they must be carried out within a unitary organization."

(7) While agreeing with the Commission's recommendation that "the State should assist the Churches to perform their task efficiently," the White Paper said that "the Government does not see its way to subsidizing missionary work, as there are recognized denominations whose outlook is not in accordance with requirements." The idea of a special branch of the Native Affairs Department to help the Churches doing mission work in the Reserves was too ambitious, although the Government was prepared to appoint a liaison officer.

As regards other important recommendations of the Commission, the proposal for a comprehensive Health Service for the Native Reserves was noted, but the White Paper said that an inter-departmental committee must first go into the matter. The proposed reorganization and development of welfare services by the Native Affairs Department, and their eventual control by Bantu authorities, were approved in principle, though this decision would only be implemented when the Government was satisfied that the time was ripe. While sympathizing with the proposals on mining in Bantu Areas, the Government did not consider the present time appropriate for departing from the present practice.

A debate on the Tomlinson Report took place in the House of Assembly on May 14-16.

Dr. Verwoerd (Minister of Native Affairs), reiterated that the Government accepted the Report in principle but reserved the right to deal on their merits with the methods advocated in it. The crux of the Report was that the future existence of the Whites in South Africa was unpredictable if the increasing Bantu population continued to settle in European Areas. The capacity of the Bantu Areas must therefore be increased if the Whites were not to be "swamped," and those areas must become the home of the Bantu—a policy which the Government accepted, and which was the traditional policy of South Africa.

Dr. Verwoerd went on to explain the reasons for the Government's rejections of certain recommendations. As regards the Commission's proposal that £104,000,000 should be spent over 10 years, he maintained that no Government could ever budget for more than one year ahead; Britain's experience in Central Africa and elsewhere had shown that it was not possible or practicable to decide on a gigantic scheme or to decide in the beginning how much to spend on it, and it was therefore far wiser to let the matter develop and review it from year to year. He gave an assurance, however, that the country could easily afford the necessary expenditure for a policy of *apartheid* without curtailing services for the White population.

Regarding the Government's non-acceptance of the Commission's recommendation that White enterprise should be used to build up industries in the Native Areas, Dr. Verwoerd said that this proposal would lead to the establishment of vested interests for Whites in Bantu Areas, to the possible prejudice of Native rights. Moreover, such a development would promote "the partnership idea in the economic sphere, which would encourage the partnership idea in all spheres, including the political."

Mr. Strauss (Leader of the Opposition) pledged the United Party's support for "non-ideological development" of the Native Reserves, agreeing with the Government that this was one of the most important tasks facing the country. Some common basis of agreement for tackling this urgent problem should be found, and he believed that it was possible to find substantial common ground on the methods to be followed and the money to be spent, provided the Government did not insist on the Opposition accepting all the "ideological trappings of the word *apartheid*" Mr. Strauss declared: "Let us tackle the most important task first. Let us develop the Reserves agriculturally and industrially. Let us leave posterity to judge whether such development will in fact bring about territorial and economic integration."

Mr. Strydom (the Prime Minister) announced that £3,500,000 would be provided for the development of Native Reserves during the current financial year. He appealed for all-party co-operation in the development of the Reserves as a separate home for the Bantu, and the maintenance of the principle of *apartheid*.

During the debate **Mrs. Ballinger** and **Mr. Lee-Warden** (Natives Representatives) cast doubt on the Government's sincerity, whilst **Mr. Harry Oppenheimer** (U.P.) suggested that the Tomlinson Commission had under-estimated by more than half the cost of establishing industries in the Native Reserves.

Dr. Verwoerd, replying to the debate, expressed doubts about the value of the pledge of co-operation given by Mr. Strauss, as it was tied up with the Opposition's policy of integration of all races into one community. "We have no illusions," he declared, "about the difficulties which we may have to face in future in trying to arrive at a solution. No policy can bring absolute safety for the future, but there is no doubt in which circumstances South Africa is likely to have the least possible trouble. Racial integration will lead to European cities ceasing to be European cities, and ultimately to the Government's ceasing to be a White Government."

A national congress on the future of the Bantu in South Africa was held at Bloemfontein on June 28-30. It was sponsored by the South African Bureau of Racial Affairs, the Federation of Afrikaans Cultural Organizations, and the three Dutch Reformed Churches. Of the 800 delegates representing nearly 500 bodies and organizations from all parts of South Africa, the Rhodesias, and Central Africa, more than half were ministers of religion or missionaries.

The conference expressed its full support for the recommendations of the Tomlinson Report, welcomed the Government's "acceptance of the broad principles of the Report," and appealed to the delegates to enlighten the South African public on the task of implementing the policy of separate development. It appealed to the Churches to give still more attention to the problem of the relationship between Whites and Bantus, and asked them to consider the consolidation of mission work It also expressed support for the incorporation of Bantu studies and the Bantu language as full subjects in the matriculation curriculum of European schools.

The Conference was addressed by Professor Tomlinson, who summarized the conclusions of the Commission, including those rejected by the Government—e.g. the proposal for the participation of Whites in the development of the Bantu Areas, the introduction of individual Native land ownership aided by a credit system, and the recommendation that Europeans, either individually or through the State, must contribute "considerably" in capital to provide the stimulus necessary for the industrial development of the Bantu Reserves. In the latter connexion he stressed that the Commission had thoroughly investigated the possibilities for raising capital in the Bantu Areas, but had found that, initially at least, the chances were only slender. Without the stimulus which White capital could provide, therefore, the possibilities of industrial expansion on a fairly wide scale, and at the rapid pace which was an absolute necessity, were small. Reiterating his proposal that White industrial entrepreneurs should set up industries in the Bantu areas, Professor Tomlinson said that this, like the provision of capital, was an essential condition for the establishment of an industrial structure, as the Commission had found that there would not be enough suitable entrepreneurs among the Bantu for a long time to come.

A national conference of African leaders from all parts of the Union, organized by the Inter-Denominational African Ministers' Federation, was held at Bloemfontein on Oct. 4-7 to consider the Tomlinson Report. The conference declared that the Government's *apartheid* policy constituted a "serious threat to race relations in South Africa"; called upon all national organizations "to mobilize all people, irrespective of race, colour, and creed, to form a united front against *apartheid*"; appealed to the Churches to take a clear and unequivocal stand against *apartheid* "in the defence of Christian and human values now being trampled underfoot"; and rejected the Tomlinson Report in its entirety. "Implementation of the report," the resolution said, "would mean a continuation of the *status quo* ... and an aggravation of the worst evils of the present system ... denying the African the inalienable basic human rights." Though welcoming the general development of Native Reserves, the conference declared that a separate plan for development based on *apartheid*, as proposed by the Tomlinson Report, was "totally unacceptable."—(State Information Office, Pretoria - Cape Times - Die Burger, Cape Town)

A. NETHERLANDS. — Formation of New Drees Government after Prolonged Cabinet Crisis.

The longest Cabinet crisis in the parliamentary history of the Netherlands ended on Oct. 12 when Queen Juliana signed a decree appointing a new Government headed by Dr. Willem Drees, the leader of the Labour Party, who had held the premiership uninterruptedly from 1948 until his resignation on June 17 after the last general elections.

Dr. Drees' earlier attempt to form a new Coalition Government (see 14936 E) had been unsuccessful, and on July 24 it was announced that he had asked Queen Juliana to relieve him of this task because of his failure to reconcile the views of the Labour and Catholic People's parties, especially in relation to certain economic and financial questions. The Queen then asked Professor Romme, parliamentary leader of the Catholic People's Party, to try to form a new Administration, but he also returned his mandate on Aug. 1.

Next, Professor Lieftinck, Netherlands Director of the World Bank in Washington and a former Minister of Finance, was asked by the Queen on Aug. 8 to mediate between the Catholic People's and Labour parties with a view to forming a new Government. Although he investigated the position, first from the point of view of a Cabinet enjoying the support of a parliamentary majority, and then—at the Queen's request—on the basis of an "extra-parliamentary" Cabinet which would seek the support of a parliamentary majority as occasion arose, he informed the Queen on Aug. 22 that he saw no possibility of a solution to the Cabinet crisis

After Professor Romme had declined a request by Queen Juliana to make a second attempt to form a Government, the Queen appointed on Aug. 22 Professor W. F. de Gaay Fortman (Anti-Revolutionary Party) as Cabinet *informateur* After several weeks of negotiations, however, Professor de Gaay Fortman was equally unsuccessful and returned his mandate on Sept. 21.

The Queen thereupon asked Mr. J. W. A. Burger, the leader of the Labour Party in the Lower Chamber, to try to bring about the formation of a new Cabinet, and his efforts eventually succeeded in the appointment of a new Coalition Government under Dr. Drees, supported by the Labour, Catholic People's, Anti-Revolutionary, and Christian Historical parties.

The membership of the new Government was announced on Oct. 12 as follows:

*Dr. Willem Drees (Labour) ..	Premier.
*Mr. J. M. A. H. Luns (Catholic)	Foreign Affairs.
Mr. H. Hofstra (Labour) ..	Finance.
*Mr. J. G. Suurhoff (Labour) ..	Social Affairs.
*Mr. S. L. Mansholt (Labour) ..	Agriculture.
Prof. I. Samkalden (Labour) .	Justice.
Mr. A. Struycken (Catholic) ..	Home Affairs and Industrial Planning.
Miss Marga Klompe (Catholic)	Social Welfare.
*Mr. J. M. L. T. Cals (Catholic)	Education.
*Mr. H. B. J. Witte (Catholic)	Reconstruction and Housing.
*Prof. J. Zijlstra (Anti-Revolutionary)	Economic Affairs.
*Mr. J. Algera (Anti-Revolutionary)	Transport and Waterways.
*Mr. Cornelis Staf (Christian Historical)	Defence, and Realm Affairs *ad interim*.

*No change.

The new Cabinet thus consisted of 13 Ministers as against 16 in the previous Administration. [There were, however, only 15 Ministries, since the old Cabinet had two Ministers of Foreign Affairs, i.e. Dr. Beyen and Mr. Luns.] The Labour and Catholic People's parties each have five members in the new Cabinet, the Anti-Revolutionary Party two, and the Christian Historical Union one. The only important political group not represented in the new Government is the Freedom and Democracy League.

Nine of the Ministers retained the portfolios they had held in the previous Government, whilst the four new Cabinet members were Miss Klompe, Mr. Struycken, Mr. Hofstra, and Professor Samkalden.

Miss Klompe, who became the Netherlands' first woman Minister, studied mathematics and physics at Utrecht University and has been a member of the Lower Chamber since 1948. She has also been a member of the Consultative Assembly of the Council of Europe since 1949 and is the only woman member of the Common Assembly of the European Coal and Steel Community.

Mr. Struycken, a former Minister of Justice, has been Governor of the Netherlands Antilles since 1951.

Mr. Hofstra, a member of the Lower Chamber since 1945, has been manager of two workers' insurance banks; he is the Labour Party's financial expert and an advocate of a planned economy.

Professor Samkalden is a lecturer on constitutional and general law.

The Ministers who left the Government were: Professor van Oven (Justice), Dr. Beyen (Foreign Affairs), Mr. van de Kieft (Finance), and Mr. De Bruijn (Industrial Relations). Mr. Kernkamp, the former Minister for Affairs of the Realm, had died on July 18.

It was stated in the Dutch press that whilst the Ministry for Affairs of the Realm had been provisionally placed under Mr. Staf, the Minister of Defence, it was probable that it would be abolished before long in view of the fact that it was considered no longer necessary, because of the new relationship of the Netherlands with Surinam and the Netherlands Antilles, and the inclusion of Surinam and Antilles Ministers in the "Realm Cabinet" (see 14041 A; 14738 D).

Owing to the length of the Cabinet crisis, Dr. Drees, as well as eight of his Ministers and a Secretary of State, announced on Oct. 2 that they had decided to resign from the Lower House of the States-General because the period during which they could under the Constitution be Members of Parliament as well as Ministers had expired.

Cabinet Ministers and Secretaries of State in the Netherlands need not be Members of Parliament, their position automatically conferring on them the right and the duty to appear and to speak in Parliament when matters concerning their Ministry are under debate. In the place of the resigning Ministers, ten new members—selected from the respective party lists submitted at the general elections—were appointed by the President of the Central Polling Office to the Lower Chamber, in accordance with the previous distribution of seats, i.e., four Labour, three Catholic, two Anti-Revolutionary, and one Christian Historical.

It was, however, pointed out in the Dutch press that the resignation of their parliamentary seats by the Ministers concerned was of little importance because the coming expansion of the Lower Chamber to 150 members, and of the Upper Chamber to 75, would enable the Ministers to regain their seats in Parliament at an early date.—(Netherlands News Agency) **(Prev. rep. 14936 E.)**

B. SIERRA LEONE. — Constitutional Changes. - Electoral Reform.

It was announced in London on Oct. 24 that proposals for constitutional changes in Sierra Leone had been approved by the Colonial Office. The proposals, which included provision for an increase in the membership of the Legislative Council from 32 to 57, had been published by the Government of Sierra Leone in July and had later been endorsed by the Legislative Council.

The changes, which would come into effect with the approaching end of the present legislature's term of office, were as follows:

(1) The new legislature would be called the House of Representatives.

(2) In place of the president and vice-president there would be a Speaker, chosen by members from within or outside the House, and a Deputy Speaker elected from within the House, with the Governor retaining the right to address the House.

(3) The House would consist of: (*a*) four *ex-officio* members (the Chief Secretary, the Attorney-General, the Financial Secretary, and the Chief Commissioner of the Protectorate); (*b*) 14 members directly elected from the Colony; (*c*) 24 members directly elected from the Protectorate; (*d*) 12 paramount chiefs literate in English, one to be selected by each of the 12 district councils in the Protectorate; (*e*) one member elected from the Bo urban area; (*f*) two members without voting rights, nominated by the Governor to represent special interests.

The present Legislative Council, which first met in December 1951, consists of the Governor as president, a vice-president, seven *ex-officio* members, seven members directly elected from the Colony, 14 members indirectly elected from the Protectorate, and two nominated members

It was also announced that the new legislature would be elected on a revised and broadened franchise based on the recommendations of the Electoral Reform Commission, which had reported in November 1954.

The Commission, which was under the chairmanship of Mr. Bryan Keith-Lucas (a lecturer on local government at Oxford University), envisaged universal adult suffrage as the ultimate goal, and suggested that this should be reached in two stages: (*a*) until the 1961 general election the franchise should be extended to all persons in the Colony over 21 with a modest property qualification, and in the Protectorate to male taxpayers over 21 and those women over 21 who could qualify as taxpayers, property owners or literates; (*b*) for and after the general election of 1961 the franchise should be extended to all persons over 21 in both Colony and Protectorate normally resident in their electoral districts.

The proposal to introduce the above constitutional changes had earlier been criticized by sections of the Opposition in the Legislative Council, notably by the National Council of Sierra Leone, led by Dr. H. C. Bankole Bright. The opposition to the proposals largely arose from apprehension in the Colony about the increased share of representation given to the Protectorate, which covers a far greater area and is much more populous.—(Times - Manchester Guardian)

OCTOBER 27—NOVEMBER 3, 1956

A. POLAND. — New Liberalized Policy adopted by United Workers' Party. - M. Gomulka appointed First Secretary. - "Pro-Moscow" Elements dropped from Politburo. - M. Gomulka's Denunciation of Past Errors of Regime. - Emphasis on Independent Development of Polish Socialism. - Soviet Leaders' Sudden Visit to Warsaw. - Polish Resistance to Reported Soviet Demands. - "Pravda" Attack on Polish Press. - Easing of Soviet-Polish Tension. - Release of Cardinal Wyszynski. - The Poznan Trials.

The Central Committee of the Polish United Workers' (Communist) Party, at a three-day session on Oct. 19-21, took a number of important decisions which included the election of a new Politburo from which all former "Stalinist" elements were dropped, including Marshal Rokossovsky, the Minister of Defence. The new Politburo included M. Wladyslaw Gomulka, who had recently been readmitted to party membership after five years in prison on charges of "Titoism" and "nationalist deviationism," and who was unanimously elected First Secretary of the United Workers' Party in place of M. Edward Ochab. During the first day's session (Oct. 19) a dramatic intervention was made by M. Khrushchev and other leaders of the Soviet Communist Party, who flew suddenly to Warsaw and conferred for many hours with the Polish leaders.

From speeches by M. Gomulka (see below) and other political leaders, it was made clear that the Polish Government and the U.W.P. were determined to carry forward and intensify the trend towards further democratization of the country's political and economic life, and to rectify the past mistakes of the regime. In particular, it was emphasized that Poland, while continuing the policy of friendship and alliance with the U.S.S.R., was determined to pursue her own road to Socialism and to resist any Soviet or other domination in her internal affairs.

These and other developments in the Polish political situation are summarized below under cross-headings.

Central Committee Decisions. - New Politburo.

The official statement issued by the Central Committee of the U.W.P. said that discussions "on current political and economic problems and on personnel and organizational matters" had resulted in the following decisions:

(1) M. Gomulka, General Marjan Spychalski, M. Ignacy Loga-Sowinski, and M. Zenon Kliszko had been co-opted as members of the Central Committee.

(2) A new Politburo had been appointed consisting of M. Jozef Cyrankiewicz (the Prime Minister), M. Gomulka, M. Stefan Jedrichowski, M. Loga-Sowinski, M. Jerzy Morawski, M. Edward Ochab, M. Adam Rapacki (the Foreign Minister), M. Roman Zambrowski, and M. Alexander Zawadski.

(3) M. Gomulka had been unanimously elected First Secretary of the United Workers' Party.

(4) A new Secretariat of the Politburo had been appointed consisting of M. Gomulka, M. Ochab, M. Jerzy Albrecht, M. Edward Gierek, M. Witold Jarosinski, M. Wladyslaw Matwin, and M. Zambrowski.

(5) A special commission had been set up "to call to responsibility before the party those persons who in recent years controlled the activities of the security organizations."

(6) Resolutions had been adopted "on the current political and economic tasks of the party."

M. Wladyslaw Gomulka (51) was born in Polish Galicia, of a working-class family. Starting working life as a plumber, he played an active part in trade union organization and revolutionary activities, and served many terms of imprisonment during the inter-war years for illegal political agitation. During the German occupation of Poland he became General Secretary of the underground Polish Communist Party, and distinguished himself as a Resistance leader and anti-Nazi fighter. In the immediate post-war years he was one of the leading members of the Politburo and the Central Committee of the U.W.P., but from 1948 onwards was subjected to increasing attacks by M. Bierut and other political leaders for ideological "deviationism." He was expelled from the party in 1949, after the break between Yugoslavia and the Cominform, deprived of Parliamentary immunity in October 1951, and arrested on charges of "Titoism." Held in prison without trial for nearly five years, he was released in April 1956 (see page 14819) and readmitted to party membership in August (see page 15034).

Of the 11 members of the Politburo appointed in 1954, only M. Cyrankiewicz, M. Ochab, M. Zambrowski, and M. Zawadski remained; M. Boleslaw Bierut had died in March 1956 (see 14767 A), General Radkiewicz and M. Berman had been dismissed (see 14881 A, 14817 A), and M. Hilary Minc had resigned a week before the latest changes (see below). Of the new members (apart from M. Gomulka), both General Spychalski (a former Minister of Defence) and M. Kliszko (a former State Secretary) had been recently released and rehabilitated after several years' imprisonment for "Titoism" (see page 15034).

Marshal Rokossovsky, as stated above, was removed from the Politburo but remained Minister of Defence. A Pole by birth, he had lived most of his life in the Soviet Union, distinguished himself as one of Russia's leading soldiers during the Second World War, and after the war officially re-adopted Polish nationality and became Minister of Defence and a member of the Polish Government. The other outgoing members were M. Zenon Nowak, M. Mazur, M. Dworakowski, and M. Jozwiak-Witold, all of whom, like Marshal Rokossovsky himself, were members of the "pro-Moscow" group in the Politburo, as opposed to the "liberal" group led by M. Cyrankiewicz.

General Spychalski appointed Deputy Minister of Defence. - "Leave of Absence" for Marshal Rokossovsky. - Resignation of M. Hilary Minc.

Simultaneously with taking the above-mentioned decisions, the Central Committee of U.W.P. also appointed General Spychalski as Deputy Minister of Defence and concurrently head of the Central Political Bureau of the Polish Army, in place of General Kazimierz Witaszewski. On Oct. 29 Warsaw Radio announced that Marshal Rokossovsky had "gone on leave" and that General Bordzilowski, the Chief of Staff, had been appointed acting Minister of Defence. On Oct. 30 General Spychalski dismissed the Russian-born commander of the Polish Air Force, General Ivan Turkiel, and appointed Major-General Frey-Bielecki (the deputy commander) as acting commander.

It had been announced on Oct. 10 that M. Hilary Minc, a Vice-Premier and a member of the Politburo, had resigned from both positions on grounds of ill-health. M. Minc, an orthodox "Stalinist" in the economic field, had been Poland's chief economic planner during Stalin's lifetime and was responsible for the policy of intensive industrialization and for the attempts to collectivize agriculture.

The dismissal of two Deputy Ministers—M. Roman Fidelski (Engineering Industry) and M Edward Demidowski (Foreign Trade)—had been announced on Sept. 20, no reason being given nor any successors announced. M. Fidelski had taken part in the negotiations with the Poznan workers' delegation, whose complaints about low wages and illegal taxes led to the riots of June 28.

M. Gomulka's Denunciation of Past Errors of Regime.- Emphasis on "Different Roads to Socialism."

The text of a speech by M. Gomulka to the Central Committee of the U.W.P., made on Oct. 20, was broadcast by Warsaw Radio. In this speech M. Gomulka strongly denounced the past errors of the party leadership, and emphasized that the pattern of Socialism was not necessarily confined to the Soviet model but could also take other forms, as the case of Yugoslavia had shown.

M. Gomulka began his speech with a denunciation of the industrial and agricultural policy pursued during the past seven years. In the coalmining industry, for example, man-output per day had fallen by 12.4 per cent since 1949 and by 35 per cent since 1938, while in the agricultural sector it had been clearly proved that farm production by independent cultivators was far greater than on State and collective farms; e g. in 1955 independent farmers had delivered 83.9 per cent of total production compared with only 8.4 per cent by State farms and 7.9 per cent by collectives. It was essential to stop granting credits to weak and unproductive collective farms, and to realize that the construction of Socialism in the countryside was a long-term process depending on the "voluntary accession" of the individual farmer Many individual farmers had been ruined as a result of the "imbecility of agricultural policy in the past," and no pride could be taken in the "ultimate capitulation of a kulak" in the face of past policy. Moreover, the housing situation in the countryside was "catastrophic" and was growing worse year by year.

The main obstacles to Poland's economic development, M. Gomulka went on, were the impatience of the workers as a result of their poor living standards, the lack of consumer goods, and insufficient supplies of raw materials. The Poznan uprising was not due to "imperialist agents" but was a result of many years of deep discontent among the working classes. "The workers wanted to know the truth," he said, "but the party leadership was afraid of admitting its serious mistakes and errors . . . The riots were due to lies such as the juggling of pay statistics alleging that there had been a 27 per cent increase in the past six years. At Poznan the working-class gave the party a painful lesson by going into the streets and shouting 'Enough of this; it cannot go on in this way any longer!' . . . There would have been no riots if the party leadership had not concealed the truth."

M. Gomulka continued: "We are faced with the question of how it could happen that our party allowed so many perversions in the past. We shall be looking for a complete answer to this question for a long time yet, for in my opinion it embraces the problem of the ways

leading to the building of Socialism . . . What is unchangeable in Socialism is the liquidation of the exploitation of man by man. The ways to achieve this object can be different, and are dictated by various situations in time and place. The pattern of Socialism can also be different. It may be in a form such as in the Soviet Union, or as we see it in Yugoslavia, or possibly in some other forms. Only by applying the experience and achievements of various countries which are building Socialism can the best pattern of Socialism be established in given conditions . . .

" The relations between the parties and countries of the Socialist camp . . . should be based on mutual confidence and equal rights, on mutual assistance, on mutual friendly criticism, if such is necessary, and on the wise solving of controversial issues in the spirit of friendship and Socialism. Within the framework of such relations each country should have full independence and sovereignty, and the rights of each nation to sovereign self-government in an independent country should be fully and mutually respected . . . "

Turning to internal party matters, M. Gomulka stressed that the party must be "pure" and that persons who had " brought shame on its name " could no longer have a place in its ranks. He called for a committee of investigation to examine the cases of persons, now rehabilitated, who had been arrested in the past " on the instructions of the Politburo or of part of the Bureau—a practice punishable under the provisions of our criminal law . . . The results of the commission's work should finally close internal party matters connected with the activities of the ' Polish Berias.' "

" After the 20th Congress of the Soviet Communist Party," M. Gomulka continued, " people began to straighten their backs, and silent and enslaved minds to shake off the poison of mendacity. Above all, the working people wanted to know the truth, without embellishments and omissions. The people should have been told the truth, quickly and frankly, about the economic situation and the causes and sources of distortion in political life. But the party leadership failed to work out quickly a line of concrete action. Some were afraid of responsibility for the results of their policy. Others felt strongly linked to their comfortable posts. Yet others—and these were the most numerous—feared that the working-class would be unable to understand the profound essence of the truth that it demanded from its representatives. The weakening of faith among the working-class became widely apparent in the central and provincial party apparatus . . .

" Various trends are sweeping the country. But sweeping it in a most powerful way is the slogan calling for the democratization of our life, and demands for the liquidation of what we call the cult of personality. We must state, however, that the party leaders did not always manage to put themselves at the head of this sound movement and to direct it. We must tell the people that the road of democratization is the only road leading towards the construction of the best model of Socialism in our conditions. We shall not step aside from this road, and we shall defend ourselves with all means so as not to allow ourselves to be pushed away from that road . . "

As regards relations between the U.W.P. and the Soviet Communist Party, and between Poland and the U.S.S.R. generally, M. Gomulka declared : " If there are outstanding matters they should be settled calmly and amicably. This is the attitude that should govern relations between parties and States of the Socialist camp. Those who believe that anti-Soviet feelings can be kindled in Poland are deeply mistaken. We shall not allow the interests of the Polish State and the cause of building Socialism in Poland to be damaged. Polish-Soviet relations based on the principles of equality and independence will give the Polish people such deep feelings of friendship towards the Soviet Union that any attempt to sow distrust of the U S.S.R. will find no fertile soil among the Polish people."

Calling for the complete eradication of the " personality cult," M. Gomulka said . " It is necessary to combat with all our force the cult of personality and its remnants, and fight with all our might for gaining the authority to do so. I do not want to return to the black pages of the cult of personality in our country. Innocent people were sent to death, others were groundlessly imprisoned for long years. With this system we have finished once and for all."

In conclusion, M. Gomulka promised that the elections in December would be held under a new electoral law which would " allow the people to elect and not only to vote." The Seym (Parliament) would have a role of the " utmost importance " and would be " the supreme organ of the State government," exercising " supreme legislative and controlling powers."

New Liberalized Policy of United Workers' Party.

The new and more liberal " party line " approved by the Central Committee of the U.W.P. was laid down in a resolution the text of which was published on Oct. 25.

Much of the resolution recapitulated the criticisms of past policy made by M. Gomulka, and, in addition, spoke of the need to overcome the " atmosphere of disorientation and defensiveness " which had hitherto " paralysed " the party's leadership. These defects had included " lack of unanimity and consistency " in the Politburo in resolving the problems of democratization, " conservatism and pusillanimity," and " compulsive adherence to obsolete doctrine and patterns." While strong party discipline was necessary, decisions had to be accompanied by the " free exchange of views and discussion between members on party policy." It was essential, moreover, to " isolate the forces of reaction bent on exploiting democratization for their own purpose and driving a wedge between Poland and the Soviet Union "

After condemning any form of discrimination tending to promote "anti-semitism and nationalistic tendencies," the resolution called *inter alia* for (1) an increase in the power of workers' councils in factories, including association with managements in determining basic problems of production ; (2) the gradual introduction of such councils in enterprises best fitted for them ; (3) an increase in the powers of the Seym, so that it could express its opinion on all Government policy ; (4) curtailment of the Government's powers to issue executive decrees, which should be employed only in exceptional cases ; (5) restriction of planned capital investment in 1957, the resultant saving in building material to be utilized for housing ; (6) complete freedom in fixing prices ; (7) the gradual introduction of free trading in small State-run and co-operative industries ; (8) limited encouragement of small private establishments producing consumer goods ; (9) promotion of private shops and kiosks , (9) in the sphere of agriculture, assistance only to those collective farms which were soundly based and which could be strengthened further ; (11) dissolution of inefficient collective farms, and those incapable of further development ; (12) the ending of past " distortions " of agricultural policy in respect of the " middle " peasants and the so-called " kulaks."

The new liberalized programme of the U.W.P., and M. Gomulka's return to national leadership, were enthusiastically welcomed throughout Poland, thousands of messages of support being sent by factory workers, students' organizations, and committees of the armed forces, including the General Staff.

Soviet Leaders' Visit to Warsaw. - Polish Resistance to Reported Soviet Demands.

A delegation of the Central Committee of the Soviet Communist Party, comprising M. Khrushchev, M. Molotov, M. Mikoyan, and M. Kaganovich, flew to Warsaw on Oct. 19, without prior notice, for discussions with the Central Committee of the Polish United Workers' Party then beginning its three-day session. The session was immediately adjourned for talks with the Soviet leaders, those taking part on the Polish side including M. Cyrankiewicz, M. Gomulka, M. Ochab, and Marshal Rokossovsky. After a meeting lasting many hours, a communiqué was issued stating that the talks had been held " in an atmosphere of party and friendly candour," and that a delegation of the Polish Politburo would visit Moscow in the near future for further talks with the Soviet Central Committee " on problems of further strengthening political and economic co-operation between the Polish People's Republic and the Soviet Union, and the further consolidation of friendship and co-operation between the Polish United Workers' Party and the Communist Party of the Soviet Union." The Soviet leaders flew back to Moscow the same evening.

Apart from this communiqué, no official statment on the Polish-Soviet discussions was issued either in Warsaw or Moscow. It was understood, however, that the sudden arrival of the Soviet leaders in the Polish capital was prompted, firstly, by the threat to the position of Marshal Rokossovsky and the other " pro-Moscow " members of the Polish Politburo, and secondly, by the increasingly independent line taken by the United Workers' Party, as evidenced by the popular demands for democratization and for the construction of a Polish pattern of Socialism not necessarily identical with that in the U.S.S.R.

Reports from Western press correspondents in Warsaw stated that the Polish-Soviet talks had been heated and acrimonious , that M. Khrushchev had demanded the retention of Marshal Rokossovsky and the slowing-down of the democratization policy ; but that the Polish leadership had stood firm and had refused to agree to any reversal of the new policy. *The Times* commented that it was " clear that the new Polish leaders have been able to hold their ground against intense Soviet pressure, including apparently a threat of military intervention, and have succeeded in retaining full liberty of action."

"Pravda" Attack on Polish Press. - Reply by "Trybuna Ludu."

A violent attack on the Polish press, reminiscent of the attacks made on Yugoslavia at the time of her break with the Cominform, was published on Oct. 21 in *Pravda*, organ of the Soviet Communist Party.

Pravda accused " certain Polish newspapers " of publishing articles that were " shaking the very foundations of the [Socialist] regime " and " poisoning the souls of readers with the imported venom of an ideology alien to the working-class." Particular exception was taken to an article by M. Jerzy Putrament (a leading Polish journalist, and a member of the Central Committee of the U.W.P.), published in the organ of the Polish Writers' Union, in which he had said, *inter alia*, that the slogan " Proletarians of all lands, unite " had now become meaningless and should be discarded, and that Communism had been functioning in conditions of " police terror " and suppression of criticism. Expressing " amazement " that the organ of the Polish Writers' Union should contain " a frank appeal for the restoration of capitalism," *Pravda* denounced M. Putrament as a man who " could not pronounce the word 'Socialism' " and who was " openly proposing to trample underfoot the banner of proletarian internationalism and to disavow the struggle for the building of Socialism."

Trybuna Ludu, organ of the Polish United Workers' Party, published a reply in which *Pravda* was accused of using "language in which neither frank nor party nor friendly discussions are conducted," and refuting that paper's allegations against the Polish press in general and against M. Putrament in particular.

After describing the *Pravda* article as "a series of unjust and untrue formulations," *Trybuna Ludu* defended M. Putrament as a man who had fought all his life for Socialism and was "fighting for it with equal ardour in the article in question" [i.e the article attacked by *Pravda*]. "It was the distortions, errors and even crimes exposed by the 20th Congress of the Soviet Communist Party," said *Trybuna Ludu*, "that constituted a menace to Socialism . . . Polish-Soviet friendship is the cornerstone of our policy . . If today comrades in Poland criticize certain aspects of Polish-Soviet co-operation in past years, this does not mean that they are opposed to the friendship and alliance of our countries. It means that the errors which they want to see put right did harm to that friendship"

Cessation of Soviet Troop Movements in Poland. - Easing of Soviet-Polish Tension.

Though the situation was obscure at the time, and no official statements were issued either on the Polish or Russian side, it subsequently became known that Soviet tank formations had begun to move on Warsaw from their base at Lignica (Silesia) during the early stages of the crisis marked by the sudden arrival of the Soviet leaders in Warsaw. Units of the Polish Army were said to have taken up defensive positions covering the approaches to Warsaw, but no clashes occurred between the Polish and Soviet forces. It was understood that the tension had been eased as a result of telephone discussions on Oct. 23 between M. Gomulka and M. Khrushchev, who was said to have given assurances that Russian troop movements would cease and that all Soviet forces in Poland would return to their bases. It was also understood that M. Cyrankiewicz and M. Gomulka had agreed to visit Moscow at a date to be fixed. On Oct. 25 the Polish News Agency announced that all Soviet troops in Poland "have already withdrawn to their bases or are now doing so."

Addressing a huge demonstration in Warsaw on Oct. 24, estimated at 250,000 people, M. Gomulka told the crowds that he had received a communication from M. Khrushchev in which the latter had said that he saw no objection to continuing relations with Poland along the lines laid down at the recent session of the Polish Politburo. "It is a matter for our own judgment," M. Gomulka declared, "how long and how many Soviet military experts will remain in Poland. Within the next few days the Soviet Army will withdraw to their bases which they hold under international treaties, especially within the framework of the Warsaw Pact. So long as the North Atlantic Pact has bases in Germany and a new *Wehrmacht* is coming into being, the presence of the Russian Army in Germany is compatible with the security of our country."

Large anti-Russian demonstrations, mainly by students and young people, occurred on Oct. 23-24 in a number of Polish cities, including Warsaw, Cracow, Lodz, Poznan, Wroclaw (Breslau), and Szczecin (Stettin). Many of the demonstrations were directed against Marshal Rokossovsky, and also against the presence of Soviet troops in Poland generally In Warsaw a crowd of some 2,000 young people shouting anti-Soviet slogans attempted to march on the Soviet Embassy, but was dispersed by the police In his open-air speech on Oct. 24 (see above) M. Gomulka denounced all attempts to start anti-Soviet agitation, stressed that Poland wished to co-operate with the U.S.S.R. on the basis of complete equality and mutual respect and confidence, and declared that "provocateurs and reactionaries" who tried to foment discord between the two countries would not be tolerated.

Warsaw Radio stated on Oct. 25 that complete calm had been restored after disturbances "staged by hooligans" in which "provocative slogans were heard." It added. "We must understand that our unshakeable alliance with the Soviet Union is a guarantee of our Western frontiers. Everything points to the fact that the Soviet Union has understood the changes in our country and has assessed them positively."

Release of Cardinal Wyszynski.

Cardinal Wyszynski, the Roman Catholic Primate of Poland, was released on Oct. 28 and allowed to return to Warsaw to resume his ecclesiastical duties for the first time for four years. Since 1952 he had been living in a monastery near Przemysl, to which he had been banished in 1952 on charges of having "abused his authority" and of supporting "anti-State" ecclesiastics.

Negotiations for the Primate's release were begun by Roman Catholic groups with M Gomulka immediately after the latter's election as First Secretary of the U.W.P Many appeals for the Primate's release had also been made by students' and factory workers' organizations, and his liberation and return to Warsaw were enthusiastically welcomed throughout the country.

In a press interview on Oct. 30, M. Gomulka expressed his belief that a complete understanding was possible between the Government and the Roman Catholic Church, though the Government could not agree to the formation of a separate Catholic party or political organization. He claimed that Cardinal Wyszynski had given full support to the new programme of the United Workers' Party.

Foreign Reactions to the Events in Poland.

The developments in Poland were warmly welcomed in Britain, the U.S.A., and other Western countries and also in Yugoslavia, where President Tito sent "warm and hearty congratulations" to M. Gomulka on his election as First Secretary of the United Workers' Party. President Eisenhower intimated that the U.S.A. would be ready to offer economic aid to Poland if she desired it, and declared that America had a mission to "expand the areas in which free men and free governments can flourish." A spokesman of the British Foreign Office said on Oct. 22 that Britain had "always wished well to the Polish people" and would be "glad if the reforms proposed by M. Gomulka lead to greater freedom for them."

The German Federal Chancellor, Dr. Adenauer, in a speech at Dortmund on Oct. 21, said that developments were happening in Poland of which the ultimate significance could not be foreseen. No country in Europe had been so cruelly treated as Poland in the last 200 years, and he admired the unbreakable will of the Polish people and the religious basis provided by Polish Catholicism. He stressed that Germany's right to her former eastern territories now under Polish sovereignty would "never be surrendered," and expressed his conviction that an understanding on Germany's eastern frontier was possible with a free Polish Government.

A sharp reply to both President Eisenhower and Dr. Adenauer was given in a *Trybuna Ludu* editorial.

As regards President Eisenhower, who had "deemed it necessary to make statements on the situation in Poland," *Trybuna Ludu* said that "we well understand the pre-election situation in the U.S A. . . and the desire to gain votes . . We should also like to stress that President Eisenhower's position as head of a great Power does not entitle him to interfere in the affairs of smaller States . . . As regards offers of aid, we are in favour of assistance with no political strings attached . . . If anyone believes that the democratization of our internal life indicates a departure from Socialism, he is deeply mistaken . . . Our alliance and friendship with the Soviet Union . . . is and will remain the cornerstone of our policy. This matter has been settled once and for all, regardless of any election date in the United States

"The same applies to the statement by Chancellor Adenauer, who has been gracious enough to express his readiness to establish relations with a 'free Poland' . . While desiring relations with the German Federal Republic, as with all countries, it is not in the least our desire to be assisted in the development of our freedom by the conservative and capitalist forces of Western Germany. Of such 'assistance' we have had sufficient experience in the course of many centuries of our history . . . "

The Poznan Trials.

Prior to the political changes described above, the trials had opened at Poznan of a number of persons—mostly youths and young men—who had been arrested on charges of murder, robbery, looting, etc., during the Poznan riots of June 28, when 53 people were killed. Of the 154 taken into custody at the time, 22 were brought before the Voivodship Court of Poznan in three separate trials: (1) three youths charged with the "bestial murder" of a member of the security forces during the riots; (2) nine others (eight of ages between 18 to 22, and one aged 35) accused of stealing arms and taking part in attacks on the public security headquarters and other buildings; and (3) ten others, of ages ranging from 18 to 25, accused of armed assault, destruction of public property, and similar crimes.

M. Cyrankiewicz, the Prime Minister, had previously given an assurance that the trials would be conducted openly, "with scrupulous regard for the rule of law and legality" and in the presence of foreign press representatives, so that there would be no doubt of the "dignity, impartiality, and competence" of the Polish courts of law. Among foreign legal experts attending the trials were Mr. F. Elwyn Jones, Q.C., a British Labour M.P.; Professor Légal, Professor of Criminal Law in the University of Montpellier, France; M. Jules Wolff, chairman of the Belgian League for the Defence of Human Rights; and Professor Stefano Riccio, Professor of Criminal Law in the University of Naples. All the accused persons were defended by leading Polish lawyers.

First Trial (Sept. 27-Oct. 8) The three defendants in this trial—J. Foltynowicz (20), K Zurek (18) and J. Sroka (18)—were charged with having beaten and kicked to death a security policeman, Corporal Izdebny, during the riots They admitted having struck Izdebny but denied that they were responsible for his death or had committed brutalities. Witnesses for the defence said that the mob had been infuriated by rumours that Izdebny had killed a woman

and child, whilst Professor Chalasinski (a well-known psychiatrist, of Warsaw University) told the court that the rioters had "accumulated reserves of hate for the security police" which had erupted during the tense and excitable atmosphere of the riots

The prosecutor, calling for a "severe sentence commensurate with the gravity of the crime," said that the murder of Izdebny had nothing whatever to do with the justified grievances of the Poznan workers. It was necessary to make a distinction between the workers' strike and a crime such as was being tried by the court.

Counsel for the defence asked the court to be as lenient towards the accused as the Government had been towards those who were responsible for the conditions leading to the Poznan riots The excitability of the atmosphere was urged as a mitigating circumstance, and it was pointed out that the security police themselves had been guilty of crimes in the past, as had now been officially admitted.

The judge found that it had not been proved that the three defendants bore personal reponsibility for Izdebny's death, or that they had banded together with the aim of causing his death They had, however, joined in the mob attack on Izdebny and, of their own volition, had taken part in the beating of the victim for no other reason than that they were influenced by the shouts of the crowd to believe—a theory since proved wrong—that he was responsible for killing a woman and child The court had also taken into consideration the youth of the defendants and the facts that all of them were of low mental development and that one, Sroka, showed "definite sadistic tendencies and a very low moral standard." All the accused were found guilty of violent assault, Foltynowicz and Sroka being sentenced to 4½ years' imprisonment and Zurek to four years.

Second Trial (Oct 3-12) Of the nine accused (Z Urbanek, J. Pocztowy, S Jaworek, L. Wierbicki, L Piotrowski, S. Kaufmann, L. Olejniczak, J. Suwart, and J Bieganski), seven admitted stealing firearms and taking part in attacks on the security police headquarters and other public buildings, but pleaded for leniency. Nearly all of them said that they had committed the offences because of their hatred for the security police Kaufmann (20) said that he had been brutally treated, kicked and beaten by the police after his arrest, and the presiding judge ruled that the police evidence against him should be struck out because of the irregular methods used to elicit it. The prosecutor gave an assurance that such illegal methods had only been used "at the very beginning of the investigations," and said that those responsible had been called to account.

Suwart (22) broke down and wept in the dock when he said that he had taken part in the riots because his father, a veteran Communist who had spent many years in prison before the war, had been deprived of his job in 1952 and expelled from the party on false charges that he had worked for the pre-war security police This had reduced his family to poverty, had driven his mother insane and his brother to suicide, and had forced him to steal to support his mother and two young sisters, who were without any means of support. This had led to a conviction for theft in 1953.

Urbanek, Jaworek, and Wierzbicki were each sentenced to six years' imprisonment after being found guilty of stealing firearms and carbines and firing them during the riots On charges of possession of firearms, theft, and other offences, Pocztowy was given three years, Bieganski 2½ years, and Piotrowski 18 months A two-year sentence was passed on Kaufmann, who, however, had his sentence suspended for five years—i.e. he was released and placed on probation for that period. Suwart and Olejniczak were acquitted

Third Trial (Oct. 5-22) The ten defendants (J Kulas, M. Pacpomarmacki, R. Bulczynski, W. Kaczkowski, H. Zielonacki, M Joachimiak, A. Klimecki, J. Luczak, Z Majcher, Z Blaszyk) were charged with stealing arms, attacking the security police headquarters, attacking and disarming police, and destroying equipment in the Poznan radio station.

Kulas (19), a lorry-driver who said he was known to the youth of Poznan as "Eddie Polo the Italian bandit," retracted the confession he had made when arrested, declaring that it had been forced out of him by methods "similar to the Nazi S S." Though admitting that he had stolen clothes and footwear because he was poor, he denied the more serious charges brought against him, declared that he had taken part in the riots "to fight for the poor," and described his trial as a case of "the rich trying the poor"

Both Klimacki (19) and Kaczkowski (18) said that they had been brutally handled by the police, the former bursting into tears as he described the maltreatment to which he had been subjected. Kaczkowski's sister, who was present in court, also broke down and cried out "My father died fighting for Poland in 1939, my mother was killed in 1942, and now we are oppressed more than ever" The public clustered round the weeping girl to express their sympathy, causing the judge to suspend the session for a short time

The prosecutor called for heavy sentences on three of the accused (Kulas, Kaczkowski, and Zielonacki), saying their offences had been particularly serious and that none of them had shown any regret. The other eight, he suggested, should be dealt with leniently. Three of the accused were provisionally released from custody on Oct 22, when the court adjorned for a fortnight to enable more witnesses to be heard

On Oct. 23 the Prosecutor-General's Office ordered a revision of all the indictments submitted to the court on charges arising out of the Poznan riots. At the same time it asked the court to release from custody all those who were not charged with murder or robbery. Warsaw Radio announced on the following day that 94 of the detained persons had been released accordingly, but that the three men found guilty of taking part in the mob attack on the security policeman would serve their sentences.—(Polish Embassy Press Office, London - Times - Daily Telegraph - Manchester Guardian - New York Times) **(Prev. rep. Poland, Political Changes, 15033 A; 14880 A; Poznan Riots, 14967 A; Cardinal Wyszynski, 13212 A.)**

A. ARGENTINA. — Japanese Adherence to Multilateral Trade and Payments and Debt Settlement Scheme.

Under an agreement between Argentina and Japan, concluded in Buenos Aires on Sept. 9, Japan joined the multilateral trade and payments arrangements now in force between Argentina and a number of West European countries. It was also provided that Argentine commercial debts to Japan (amounting to about $60,000,000) would be repaid on similar terms to those applying to the repayment of other Argentine commercial debts—i.e. by progressively increasing annuities over a ten-year period, with an average interest rate of 3½ per cent per annum. Until such time as a permanent agreement was reached, operations between Argentina and Japan, hitherto carried out in "agreement dollars," would be conducted in transferable sterling.—(Bank of London and South America) **(Prev. rep. 15021 A.)**

B. CEYLON - SOVIET UNION. — Agreement on Diplomatic Relations and Economic Co-operation.

Discussions took place in Moscow from Aug. 28 to Sept. 1 between a Ceylonese delegation, headed by Sir Claude Corea, and a Soviet Government delegation led by Mr. Kuznetzov, First Deputy Minister for Foreign Affairs. It was announced on Sept. 3 that the two countries had agreed (*a*) to recommend to their respective Governments an exchange of ambassadors; (*b*) that trade relations between the two countries would be "reviewed to their mutual advantage"; (*c*) that a wide field existed for economic co-operation between Ceylon and the U.S.S.R. (Ceylon Government Information Department) **(Prev. rep. 15143 B.)**

C. NETHERLANDS - UNITED STATES. — Agreement on Allocation of Counterpart Funds.

An agreement between the Netherlands and U.S. Governments, announced at the end of October, provided for the use of the remaining balance of the 600,000,000 guilders counterpart fund from U.S. aid, which the U.S.A. had made available for military projects in the Netherlands. The overall allocation of the fund was given as follows: military vehicles, 175,626,000 guilders; 14 minesweepers, 76,300,000 guilders; investment in Dutch artillery works, 28,000,000 guilders, military aircraft, 116,224,000 guilders; artillery ammunition, 34,025,000 guilders; motor vehicles, trucks, etc., 48,933,900 guilders, spare parts, 112,000,000 guilders; radar, 8,891,000 guilders.—(Netherlands News Agency) **(Prev. rep. 12134 B)**

D. UNITED KINGDOM. — Royal Navy. - Earl Mountbatten promoted Admiral of the Fleet. - New Vice-Chief of Naval Staff.

The promotion of Earl Mountbatten of Burma, First Sea Lord and Chief of Naval Staff, to Admiral of the Fleet was announced on Oct. 21 by the Admiralty. Lord Mountbatten thus reached the same rank and position held by his father, who, as Prince Louis of Battenberg, was First Sea Lord at the outbreak of war in 1914.

Vice-Admiral Sir Caspar John (son of Augustus John, the painter) was appointed Vice-Chief of Naval Staff on Oct. 30 in succession to Admiral Sir William Davis, who will retire in May 1957.—(Times) **(Prev. rep. Royal Navy, 14869 A.)**

E. CEYLON. — National Planning Council.

A Bill setting up a National Planning Council was passed by the Ceylonese Parliament on Sept. 6.

The Council will consist of the Prime Minister (as chairman), the Minister of Finance (as deputy-chairman), and not more than 15 other persons appointed by the Prime Minister. It will "advise the Cabinet on the planning of agriculture, industry, commerce, education, housing, health and social services, public utilities, and all other matters pertaining to the national economy"

The Council is empowered to appoint consultative bodies or engage experts to inquire into and report on aspects of the national planning.—(Ceylon Government Information Dept.)

F. WESTERN GERMANY. — Bremen Cotton Market.

A cotton market, the only one in Europe with the exception of Liverpool, was opened in Bremen on Oct. 26 by the German Federal Minister of Economics, Professor Erhard.

(Frankfurter Allgemeine Zeitung)

A. FRANCE - WESTERN GERMANY. — Agreements on Status of the Saar and Canalization of Moselle River. - Adherence by Luxemburg. - Changes in Membership of E.C.S.C. Common Assembly.

Four agreements implementing the Adenauer-Mollet agreement on the future of the Saar, the canalization on the Moselle River, and related questions (see 14925 A), were signed by the French and West German Foreign Ministers (M. Pineau and Dr. von Brentano) in Luxemburg on Oct. 27. The Moselle canalization agreement was also signed by the Luxemburg Foreign Minister (M. Bech), whilst a separate Franco-Luxemburg agreement dealt with the question of French compensation for the consent given by Luxemburg to the canalization scheme. A sixth agreement signed by the three Foreign Ministers, as well as by the Belgian, Netherlands, and Italian Ambassadors, changed the provisions for the membership of the Common Assembly of the European Coal and Steel Community arising out of the incorporation of the Saar in the German Federal Republic.

The principal agreements were as follows.

I—Franco-German Treaty on the Saar.

Political Status and Transitional Economic Regime. The treaty provided that the Saar would be politically incorporated in the German Federal Republic on Jan 1, 1957, that a provisional economic regime would be set up for three years (i.e. until Dec 31, 1959), and that during that period French currency would remain in circulation in the Saar, and there would be no Customs frontier with France. The only change in the existing economic regime would be that during the transitional period the Saar could import capital equipment from Western Germany without Customs charges—provided, however, that such equipment would only be paid for at the end of the transitional period, would not be used for production before the end of that period, and would not produce goods which were in competition with similar French goods

Saar Coal Supplies to France. It was laid down that France would receive from the Saar 90,000,000 tons of coal during the next 25 years, of which 66,000,000 tons would be worked by her from the Lorraine side of the Warndt mines and the remaining 24,000,000 tons would be supplied by the Saar at cost price Excluding the latter supplies, one-third of the total coal production of the Saar would thus go to France. A special Franco-German organization would be set up to handle Saar coal supplies, and all expenses involved in connexion with these transactions would be borne by either side without charge to the other, except for the actual cost of the coal to be paid by France.

Special Status of France under Permanent Economic Regime. After the transitional three-year period France would be able to export freely to the Saar the same quantity of goods as in 1955, when her exports amounted to 165,000,000,000 French francs The Saar, in turn, would be able to export to France (also without Customs duties) in the same proportion—i.e. to the value of 100,000,000,000 to 110,000,000,000 francs. If French exports fell, Saar exports to France would be reduced by a similar amount.

French businesses in the Saar and Saar businesses in France would be considered as national and not as foreign concerns

Monetary Conversion. The change-over from the French currency to the West German Deutschemark would take place at a date to be determined, which would not necessarily coincide with the end of the transitional three-year economic regime and would be announced without previous notice The conversion rate for French banknotes would be the official rate of exchange, i e 83 francs =1 DM. After the operation, French banknotes to the value of 40,000,000,000 francs (£40,000,000) would be destroyed by Germany under common supervision, and would not be presented to France for exchange

Private Debts and Bank Balances. These would be honoured in full.

Personal Guarantees. A German amnesty law and corresponding French measures would guarantee the Saar population freedom from any prosecution or other penalty on the ground that they had supported the detachment of the Saar from Germany after the end of the Second World War.

Cultural Questions. The French *Lycée* in Saarbrucken would be allowed to continue functioning, and the teaching of French at other Saar schools would be guaranteed The University of Saarbrucken would cease to be a "European" institution, but a French institute would be maintained within the university.

II—Franco-German-Luxemburg Agreement on Moselle Canalization.

This agreement laid down that the Moselle River would be canalized between Thionville (Lorraine) and Coblenz (at the confluence of the Moselle and the Rhine) Two electricity stations would be constructed on the German side, with an annual output of 750,000,000 kilowatt-hours. The cost of building the stations (180,000,000 DM) would be borne by Germany, while the cost of the canal—estimated at 370,000,000 DM., or about 30,000,000,000 francs—would be divided in the proportion of two-thirds (250,000,000 DM) by France and one-third (120,000,000 DM) by the German Federal Republic It was also agreed that if this estimate were exceeded, the extra cost would be shared in the same proportions. In return for this German concession, France undertook to meet at her expense the conditions put forward by Luxemburg for her consent to the canalization scheme (see III below).

The canalization company would be a joint Franco-German undertaking Shipping dues on the canalized river would be the same as the average of those charged by the German authorities on the rivers Main and Neckar

III—Franco-Luxemburg Compensation Agreement.

In return for Luxemburg's consent to the Moselle canalization project, France released the Luxemburg Railways from certain annuities hitherto due to her She also undertook to provide certain river port installations in Luxemburg, and to supply to the Luxemburg Railways 20 electric locomotives (costing 2,000,000,000 francs) for the electrification of part of Luxemburg's railway system.

IV—Franco-German Agreement on the Alsace Canal.

France agreed to abandon her plans for a northward extension of the existing Upper Rhine Canal (the Alsace Canal), which runs between the Swiss frontier and Markolsheim, and also made certain other concessions to Western Germany to mitigate the effect of the diversion of the waters of the Upper Rhine to the existing canal, including the building of a new loop canal (see page 14925). In connexion with the latter works, it was agreed to carry out the German plan, although its cost exceeded the French plan by 16,000,000,000 francs, against this, no charges will be made by Germany for electricity supplies to France worth 700,000,000 francs per annum from stations situated in German territory.

V—Agreement on E.C.S.C. Common Assembly.

This agreement provided that, in order to maintain equality of representation between France and Western Germany in the Common Assembly of the European Coal and Steel Community, three additional members would be added to the French delegation to balance the three additional German members who would take the place of the three members hitherto representing the Saar.

In a joint statement after the signature of the agreements, M. Pineau and Dr. von Brentano declared that the day was one of "historic importance for the relations between France and Germany," and that the last outstanding questions between the two countries had now been settled.

"The agreements which have just been signed are the result of long negotiations," the statement went on. "Understanding has only been possible thanks to big concessions on both sides and because the two countries are conscious of their European responsibilities. The sacrifices to which they have agreed testify to the wish of the two Governments to open a new phase in Franco-German relations in which both nations will work in common for a better future. Henceforth there will be between them no problems other than those which arise in the normal course of friendly neighbourly relations. Both Governments regard the settlement now reached as the realization of an essential condition for the strengthening of the free world and the creation of a United Europe. They will in future pursue with still greater vigour their joint efforts towards the realization of this new Europe."

The final details of the agreements had been settled at meetings between M. Faure and Professor Hallstein (the French and German Secretaries of State for Foreign Affairs) in Paris on Sept. 12, and between Dr. Adenauer and M. Mollet in Bonn on Sept. 29.

Some of the last outstanding points were (*a*) the financial questions connected with the organization for the Warndt coal supplies to France; (*b*) the sharing of any excess cost of the canalization of the Moselle, and (*c*) the conversion rate for the forthcoming exchange of currency. The Germans had first suggested a rate of 100 francs to 1 DM. on the ground that this reflected the true purchasing power, but this proposal was subsequently dropped in favour of the official exchange rate (see above)

After the Adenauer-Mollet meeting in Bonn a communiqué was issued by both Prime Ministers announcing not only agreement on the last outstanding points in connexion with the Saar, the canalization of the Moselle River, and the Alsace Canal, but dealing also with the international situation.

The communiqué said that the Federal Chancellor and the French Prime Minister had both agreed, having regard especially to the Suez crisis, that a better co-ordination of the policy of the Western European countries was "more than ever necessary." They had also affirmed their determination to continue with the "building of Europe", had underlined the importance of active British participation; and had "noted with satisfaction the growing interest shown in this matter by the British Government and public opinion."

Both Prime Ministers had expressed their willingness to formulate jointly suggestions, to be submitted to the other interested European Governments, with a view to developing in all spheres the activities of such organizations as the Council of Europe, the O.E.E.C, and the Western European Union In particular, they had agreed to study the possibility of setting up a real Armaments Community, in conformity with the Paris Agreements.

With regard to the present negotiations on the Brussels Report on further European integration, they had expressed the wish to take up a common position on the principal matters in order to bring about a speedy drafting of the treaties for Euratom and the Common Market. Finally, because of the need to hasten the production of atomic energy in Europe, they had agreed to propose to the next conference of Foreign Ministers of the E.S.C.C. countries that three independent experts should be appointed to determine, in co-operation with M.

Spaak, the quantities of atomic energy which could be produced at the earliest possible moment in the six countries, as well as the means of implementing this plan

The Saar agreements were approved by the Saar Government on Oct. 2. An official statement said that although the agreements had not in every respect met the expectations of the Saar Government, the latter had approved them because "the financial sacrifices are borne not by the economy of the Saar but by the Federal Republic" and because they would fulfil the aim of the Saar plebiscite and bring about the political and economic union of the Saar with Germany.

The East German Government issued a statement on Oct. 8 declaring that it could not recognize the validity of any agreement on the Saar concluded between France and Western Germany, as the Saar problem was an all-German question and could only be settled with the participation of both Germnn States.—(Le Monde, Paris - Le Figaro, Paris - Frankfurter Allgemeine Zeitung - Die Welt, Hamburg) **(Prev. rep. 14925 A.)**

A. LITERATURE. — Book Selections for October.

Selected books published in Great Britain and the U.S.A. are given below:

Great Britain. Battiscombe, Georgina—"Mrs. Gladstone The Portrait of a Marriage." (Constable, 21s.).

Beaverbrook, Lord—'Men and Power, 1917-1918." (Hutchinson, 25s.)

Bullock, Alan, and Shock, Maurice—"The Liberal Tradition: Fox to Keynes" (A. and C Black, 25s.).

Crosland, C. A. R —"The Future of Socialism." (Cape, 42s.)

Durrell, Gerald—"My Family and Other Animals." (Rupert Hart-Davis, 16s.).

Freeman, Kathleen—"T'Other Miss Austen" (Macdonald, 16s.).

"From the Third Programme · A Ten-Years' Anthology." (Nonesuch Press, 21s.).

Hulme, Kathryn—"The Nun's Story." (Frederick Muller, 15s).

Jameson, Storm—"The Intruder." (Macmillan, 13s. 6d).

Maurois André—"A History of France" New and enlarged edition. Translated from the French (Cape, 25s.).

Pearson, Hesketh—"Beerbohm Tree · His Life and Laughter." (Methuen, 25s.).

Rampa, T. Lobsang—"The Third Eye" The Autobiography of a Tibetan Lama. (Secker and Warburg, 18s.)

Strang, Lord—"Home and Abroad." Diplomatic Memoirs. (André Deutsch, 21s)

United States. Horgan, Paul—"The Centuries of Santa Fé." (Dutton, New York, $5 00.).

Lewis, Grace H.—"With Love from Grace. Sinclair Lewis, 1912-1925." (Harcourt, Brace & Co., New York, $5.75)

It was announced on Oct. 18 that a 15th-century book published by William Caxton had been found in the library of the Collegiate Church of St. Mary, Warwick, where it had been housed for over 200 years without its value having been suspected. The book, *Legenda Secundum Usum Sarum*, was found by Mr. Paul Morgan (assistant librarian at Birmingham University), who described it as of national importance since it was "one of the few surviving examples of the work of England's first printer."—(Times - Ed. K.C.A.)

(Prev. rep. Book Selections, 15112 B.)

B. TRINIDAD. — New Ministry.

A new Ministry was formed in Trinidad on Oct. 28 by Dr. Eric Williams, leader of the People's National Movement which won an overall majority in the recent general elections. It was drawn exclusively from the P.N.M., portfolios being distributed as follows:

Dr. Eric Williams, Chief Minister and Minister of Finance, Planning, and Development; Mr. John O'Halloran, Industry and Commerce; Mr. Kamaluddin Mohammed, Agriculture, Lands, and Fisheries, Mr. Learie Constantine (the well-known West Indian Test cricketer), Communications, Works, and Public Utilities, Dr. Patrick Solomon, Education, and Leader of the Legislature; Dr. Winston Mahabir, Health and Social Services; Mr. G. Montado, Housing and Local Government, Mr. D. Granado, Labour.

It was explained that Dr. Williams would co-ordinate the Ministries of Industry, Agriculture, and Works, while Dr. Solomon would co-ordinate the Ministries of Health, Housing, and Labour. It was also announced that Mrs. Ada Camps-Dare, a West Indian woman doctor, had been appointed special representative of the Trinidad Government on diplomatic missions.—(Times) **(Prev. rep. Trinidad Elections, 15107 D.)**

C. CANADA. — Trade Union Movement.

At a congress on Sept. 29-30, the Canadian and Catholic Confederation of Labour decided in principle to affiliate with the unified Canadian Labour Congress, and to begin negotiations with the C.L.C. for this purpose. The C.C.C.L. has a membership of about 100,000, mainly French-Canadian workers in Quebec Province.—(Montreal Star) **(Prev. rep. 14881 A.)**

D. MIDDLE EAST. — Meeting between King Saud and King Faisal. - Riyadh Meeting of Egyptian, Syrian, and Saudi Arabian Heads of State. - Creation of Joint Egyptian-Syrian-Jordanian Military Command.

A meeting took place at the Saudi Arabian port of Dammam on Sept. 20 between King Faisal of Iraq, who was cruising in the Persian Gulf, and King Saud of Saudi Arabia, at the latter's invitation. A joint statement issued on Sept. 21 said that they had exchanged views on matters "for the good of their two countries and the Arab States generally," and had found that "their viewpoints agreed on the aims of their policies in the interests of the Arab nations now and in the future."

According to the semi-official Middle East News Agency (Cairo), the two monarchs discussed the Suez Canal problem, questions relating to oil production, and a new joint contribution to the defence of Jordan against Israel Reports in the Western Press, however, suggested that their talks were primarily concerned with means of ensuring that the Suez crisis did not interfere with the passage through the Canal of oil produced in the Persian Gulf area, on which the economies of the two countries mainly depend.

President Nasser of Egypt and President Kuwatly of Syria met King Saud at Dammam on Sept. 22, and flew to Riyadh (the capital of Saudi Arabia) on the following day to continue their discussions.

A communiqué issued at the conclusion of the talks stated that the Heads of State had reviewed, "in an atmosphere of brotherhood and solidarity," developments in the international field and in the Middle East since their previous meeting in Cairo in March, and had "adopted a single outlook" in their interpretation of events and in the conclusions reached. The conference had "studied in detail the conditions in Arab States in the light of resolutions adopted at its first meeting," and had given "a great deal of its attention to consolidating Arab security, warding off the Israeli threat, and taking such steps to complete the Arab policy drawn up in Cairo so that its implementation may continue with resolution and determination."

On the Suez question, it had been unanimously agreed that "the problem, conditions, and circumstances surrounding it were of concern to all Arab countries The conference therefore supports Egypt fully in every attitude she takes, and also backs Egypt's declared readiness to reach a peaceful settlement that would safeguard Egypt's national interests and conform with the aims of the U.N. The conference believes that the means of ensuring the interests of those concerned over navigation in the Suez Canal is to start negotiations with Egypt, the owner of the Canal, within the framework of the U.N Charter, in the spirit of the Bandung Conference resolutions, and free from pressure of any kind or intention to impose any unilateral solution" The communiqué added that the next meeting of the Arab rulers would be held in Damascus.

An agreement setting up a joint Egyptian-Jordanian-Syrian Military Command, to be headed by the Egyptian Commander-in-Chief in the event of major hostilities with Israel, was signed at Amman on Oct. 25 following talks between the Jordanian Chief of General Staff (Major-General Ali Abu Nuwar), the Egyptian C.-in-C. (Major-General Abdul Hakim Amer), and the Syrian Chief of Staff (Major-General Tewfik Nizameddin) which had opened two days earlier.

On the same date five Egyptian *Vampire* jet fighters arrived at Amman and were handed over as a gift to the Royal Jordanian Air Force, which was already equipped with a small number of aircraft of this type.

Shipments of arms and ammunition from Egypt for the strengthening of the Jordanian National Guard had earlier arrived in Jordan, according to an announcement on Sept 19 by Jordan Army Headquarters. The statement said that the shipments were in implementation of the agreement between President Nasser, King Saud, and President Kuwatly of Syria at their Cairo meeting in March (see 14793 A).

The Middle East News Agency announced on Sept. 21 that Saudi Arabia had decided to purchase from Egypt £E5,000,000 worth of Egyptian currency against payment of $15,000,000, in order to help Egypt overcome the currency difficulties arising from the blocking of her sterling balances and to facilitate the financial operations of Egyptians resident in Saudi Arabia. An earlier and similar agreement between the two countries had put $10,000,000 at Egypt's disposal.

E. FRANCE. — Renewal of British Wool Credit.

It was announced in London on Oct. 30 that a new revolving credit of £7,500,000, which could be increased temporarily to £10,000,000 during the peak of the wool-buying season, had been arranged by Lazard Brothers and Co. with the *Groupement d'Importation et de Répartition de la Laine* for financing French wool purchases in the British Commonwealth during the 1956-57 season. The amount was the same as arranged last year. Repayment is linked with the export of French wool products, as hitherto, and will be completed in December 1957.

A. RHODESIA AND NYASALAND. — British Rejection of Proposals for Semi-Dominion Status. - Lord Malvern's Criticism. - Southern Rhodesian Parliamentary Resolution. - Closer Co-operation between Federal and Territorial Governments.

Lord Malvern, Prime Minister of the Federation of Rhodesia and Nyasaland, announced in the Federal Parliament on Aug. 2 that the British Government had rejected a request, made by him during his visit to London for the Commonwealth Prime Ministers' Conference (see 14961 A), that the Federation should be granted some modified constitutional status to enable it to talk to other countries as a separate State and "not as someone else's child." He said that he was awaiting further proposals from the British Government, which would not amount to Dominion status but were likely to represent "some advance."

Reviewing the present constitutional position, Lord Malvern pointed out that it was likely that other British African territories would soon gain an international position entitling them to full membership of the Commonwealth and thus to a status higher than that of the Federation "I came to the conclusion," he added, "that the electorate of the Federation just would not stand for such a state of affairs." In 1953 he had supported Federation on the understanding that the Federal State would be able to advance constitutionally, irrespective of its component territories. On the basis of the proposals he had now made to the British Government, the Federation would have become technically independent but, in effect, would have continued on the lines of the present relationship with Britain His talks with the Secretaries for the Colonies and Commonwealth Relations had convinced him that there was no real obstacle to independence for the Federation The British attitude, said Lord Malvern, was partly due to the fact that the Federation's aspirations were seen in Britain as a step towards amalgamation, but he repudiated any suggestion that such was the intention.

On Aug. 20 the Federal Parliament approved by 22 votes to nine the action of Lord Malvern in attempting to persuade the British Government to agree to a change in the constitutional status of the Federation of Rhodesia and Nyasaland.

In his reply to the debate, Lord Malvern made it clear that he had not specifically demanded Dominion status (as some rumours circulated as a result of a leak of information in London had suggested), he had merely asked for—and obtained—a discussion of the question. He accused the British Government of wanting to retain the prerogative power in the Federation without having any of the responsibility; said that certain constitutional changes were envisaged in the Federal Constitution itself; and stressed that what he had hoped to do was provided for constitutionally

Referring to the Federation's control of its own defence force, Lord Malvern concluded. "I only hope we shall not have to use it as the North American colonies had to use theirs, because we are dealing with a stupid Government in the U.K. What I strove to do was to improve our national status It is not agreed to. All right, forget about it—we can't afford to have a row about any of these things now. Our job is to consolidate our position economically, to advance our people; and when we are strong enough we won't care, because nobody can stop us doing what we want."

Strong criticism of the Colonial Office was expressed by Lord Malvern in his presidential address on Sept. 13 to the congress of the Federal Party in Bulawayo.

Lord Malvern said that he was convinced that the whole system was wrong, and that Britain's policy in Central Africa had been a failure "by whatever standards you judge it" Asserting that colonial policy was decided by people whose qualifications and experience were "negligible," he described its underlying philosophy as varying "from misguided idealism on the one hand to outright political expediency on the other." In the field of trade unionism, for example, British policy encouraged racialism by having two separate blocks of black and white workers with conflicting interests. Lord Malvern asserted that the economic and social welfare of Africans in territories controlled by the Colonial Office was far behind that in countries not under colonial rule, and said that the Colonial Office's popularity with native Africans was due to its readiness to yield to threats and withdraw, leaving the Africans to look after themselves. "The sad fact," he concluded, "is that British colonialism is out-dated. It was very good when its people were efficiently administering tribal Africans, but it is incapable of handling politically conscious Africans who have some sort of education and who have become detribalized after contact with the European way of life."

The feeling of disappointment and bitterness which characterized Lord Malvern's speeches was also expressed by other political leaders in the Federation.

Sir Roy Welensky (the Federal Deputy Premier), speaking at Broken Hill on Oct 6, made the following observations on the question of the constitutional advance of the Federation. "Southern Rhodesia has had responsible Government for 32 years and earned the right to be considered an adult member of the Commonwealth. But this is not the basis on which the question is going to be settled. We are going to be told that the African people are against the granting of independence and therefore we cannot have it. The Gold Coast has been promised independence by March, in spite of the fact that large areas were against it. But that does not matter because it is to be an all-black State and Government, and good government is not of major consequence! Bribery and corruptive practices do not matter! What happens to the people of Ashanti and the Northern Territories in the unitary State that is to be given independence is of no consequence!"

Mr. Winston Field, leader of the Dominion Party, called on Oct. 11 for an immediate conference between the various political parties in the Federation to "thrash out" the question of Dominion status, which was one that transcended party strife. He alleged that the British Government had no intention of treating the Federation's case on its merits, but was only interested in the effect its actions would have upon the British electorate at the next general election. Mr. Field refuted the suggestion that the gaining of independence would stop the flow of capital into the Federation; on the contrary, investors would feel secure in knowing that the Government would remain in the hands of "civilized people."

A resolution adopted by the Southern Rhodesian Legislative Assembly on Aug. 9 called for the drafting of proposals for the achievement of full Dominion status, and urged joint meetings of the Federal and Territorial Governments in order to further co-operation between them. A meeting of delegations led by the heads of the Federal and the three Territorial Governments was accordingly held in Salisbury on Oct. 8 under the chairmanship of Lord Malvern. An official statement said that matters of common interest to the four Governments had been discussed, and that the meeting—which was the first attended by the heads of the four Governments since 1954—would be followed by another in the early part of 1957.

B. MOROCCO. — Abrogation of International Status of Tangier. - U.S.A. relinquishes Extraterritorial Rights.

Following a conference which opened at Fedala on Oct. 8, a declaration abrogating the international status of Tangier—now part of Morocco—was signed in the latter city on Oct. 29 by M. Balafrej, the Moroccan Foreign Minister, and representatives of France, Spain, Great Britain, the U.S.A., Italy, Belgium, the Netherlands, and Portugal, members of the International Control Commission which had governed Tangier since 1925, apart from the years 1940-45 when the city was occupied by Spain during the Second World War.

The declaration and an annexed protocol provided *inter alia* (1) that the Moroccan Government would take over on Jan 1, 1957, all property formerly administered by the international administration, (2) that existing laws would remain in force until modified or abrogated by the Moroccan Government; (3) that professional persons practising in the former Tangier International Zone could continue to do so, subject to possible investigation of their qualifications and compliance with any future Moroccan legislation; (4) that banking and financial concerns in Tangier not authorized under Moroccan legislation would be given reasonable time to conform with local regulations; (5) that Civil Servants of the former International regime would be notified by theMoroccan Government, within a period of six months, whether or not their services would be required; (6) that existing cultural institutions, scientific establishments, and hospitals would be maintained, subject to compliance with Moroccan regulations; (7) that foreign wireless, telephone, postal, and telegraph services in the former international zone would be given a reasonable time either to apply for permission to continue under Moroccan sovereignty or to wind up their affairs.

It was laid down that the existing financial, economic, and commercial regime of Tangier would remain in force for the time being until the Sultan had promulgated a new economic regime by royal charter

The extraterritorial rights formerly held by the United States in Morocco were relinquished on Oct. 7, as a result of which U.S. citizens in Morocco will no longer be tried by U.S. Consular courts but by the Moroccan courts. Other nations formerly enjoying similar rights had renounced them in 1912 after the establishment of the French protectorate, but the U.S.A. had refused to relinquish privileges it had enjoyed under treaties signed in 1787 and 1836 and confirmed at the Algeciras Conference of 1906.—(Times - Le Monde, Paris - New York Times) **(Prev. rep. Tangier, 15110 A.)**

C. UNITED NATIONS. — Economic Commission for Asia and the Far East. - New Executive Secretary.

Dr. Hammarskjold, the U.N. Secretary-General, announced on July 9 that Mr. C. V. Narasimhan had been appointed Executive Secretary of the U.N Economic Commission for Asia and the Far East (ECAFE) in succession to Dr. P. S. Lokanathan, who had resigned. Mr. Narasimhan, a member of the Indian Civil Service, was Joint Secretary of the Indian Ministry of Finance in charge of the Ministry's economic affairs department, in which capacity he was responsible for the development and co-ordination of foreign aid programmes.
(U.N. Information Centre, London) **(Prev. rep. 8757 B.)**

A. BELGIUM - WESTERN GERMANY. — Dr. Adenauer's Brussels Visit. - Belgo-German Agreements on Frontier Changes, Cultural Co-operation, and Compensation for Victims of Nazism.

The Federal German Chancellor, Dr. Adenauer, accompanied by Dr. von Brentano, the Foreign Minister, arrived in Brussels on Sept. 24 on an official visit to the Belgian Government. On the same date a number of agreements between Belgium and Western Germany were signed by M. Spaak (the Belgian Foreign Minister) and Dr. von Brentano covering (*a*) a treaty on changes in the Belgo-German frontier and related questions, (*b*) a cultural agreement; and (*c*) the settlement of war damages and indemnities for German refugees resident in Belgium who had lost their properties because of the Nazi regime.

Belgo-German Frontier Treaty.

Under this treaty, Belgium returned to German sovereignty certain areas which had been placed under Belgian military administration in 1949, while Germany agreed to several minor frontier changes in Belgium's favour.

In 1949 a six-Power Commission representing Britain, France, the U.S.A., and the three Benelux countries had recommended certain rectifications of the former German frontier in favour of Belgium, Luxemburg, and the Netherlands. After approval by the six Governments, these recommendations were accepted by the Allied Council of Foreign Ministers and provisionally put into effect by Ordinances of the Occupation Powers pending the conclusion of a peace treaty with Germany. In the case of Belgium these Ordinances provided for the transfer to her of 11¼ square miles of enclaves along the frontier, but in fact Belgium took possession of only 7⅝ square miles of territory. At the time the transfer could not be ratified, and the territory therefore remained under Belgian military administration.

In the negotiations preceding the conclusion of the present treaty, both sides agreed that the final adjustment of the Belgo-German frontier should facilitate traffic arrangements, local administration, and the Customs services, and that the inhabitants should not be required to change their nationality.

Belgium agreed to return to German sovereignty the villages of Bildchen, Leykoul, Losheim, and Hemmeres, and the forests of Freyen and Bullingen, with a total population of 648, while Germany agreed that the forests of Wahlerscheid and Losscheidergraben should pass under Belgian sovereignty The 56 inhabitants of the hamlet of Losscheidergraben were given the option of retaining their German nationality or becoming Belgian citizens.

It was also agreed that work would be undertaken jointly to divert the upper course of the River Vesdre (which supplies the Eupen Dam and the textile industry at Verviers in Belgium) so as to make it flow entirely through Belgian territory

The agreement also covered various other frontier questions in the area, including the joint use by both countries of the railway line from Raeren to Kalterherberg (which runs through Belgian and German territory), the treatment of property under sequestration, and the co-operation of Belgian and German Customs personnel to facilitate control on certain roads running along or re-crossing the frontier

Finally, Germany undertook to pay to Belgium 15,000,000 Belgian francs as compensation for investments made by the Belgian military administration in the villages returned to German sovereignty.

Compensation to Refugees.

In an exchange of letters the German Federal Government undertook to speed up the handling of compensation claims by German refugees now living in Belgium in respect of property losses suffered under the Nazi regime, and to make advance payments in urgent cases of hardship from a fund to be administered by the German Embassy in Brussels, working in conjunction with a committee representing Jewish and other victims of Nazi racial measures.

A communiqué issued on Sept 25, announcing the conclusion of the agreements, declared that the frontier treaty had adjusted the Belgo-German border to "present conditions"; that it settled all differences existing between the two countries "in the spirit of the Paris Agreements of 1954 with a view to furthering the friendly co-operation between Belgium and the German Federal Republic", and that both Governments were agreed that the frontier now laid down should be of a permanent nature [i e., that it would be the frontier to be incorporated in a peace treaty with Germany.]

The communiqué also stated that the question of European integration had constituted the main subject of the discussions between the German and Belgian Ministers The German statesmen had paid tribute to M. Spaak's initiative in his capacity of chairman of the committee which drafted the Brussels Report (see 15137 A), and both sides had expressed "the firm intention to make every effort to bring to an early conclusion the negotiations at present being conducted for the creation of a Common Market and a European Atomic Community

Dr. Adenauer and Dr. von Brentano were received by King Baudouin on Sept. 25.—(Frankfurter Allgemeine Zeitung - La Nation Belge, Brussels) **(Prev. rep. 1949 Frontier Changes, 9991 B; 9926 A.)**

B. SUDAN. — The South Sudan Mutiny. - Report of Commission of Inquiry.

The report of the Commission of Inquiry into the disturbances in the Southern Sudan in August 1955 was published in Khartoum on Oct. 19. The Commission, which consisted of one Northern and one Southern Sudanese and was presided over by Judge Tewfik Cotran (a Christian Arab), had finished its work in February last.

After a review of the background and a detailed description of the mutiny and the incidents which followed, the report gave seven causes for the disturbances. These, it said, could not be understood unless it was borne in mind that there was little in common between Northern and Southern Sudanese, that for historical reasons the Southerners regard the Northerners as their traditional enemies; that British administrative policy until 1947 had been one of separation between the two parts of the country, that for political, financial, geographical and economic reasons the Northern Sudan progressed quickly in every field, while the Southern Sudan lagged far behind, and that all these factors combined had not created in the Southern Sudanese a feeling of common citizenship with the North nor of patriotism to the Sudan as a whole, and had led to the preservation of local tribal loyalties only.

The seven immediate causes of the mutiny were given as:

(1) Distribution of a forged telegram alleged to have been sent by the then Prime Minister, Mr Ismail el-Azhari, in July 1955 ordering oppression of Southerners,

(2) Loss of confidence due to interference in political affairs by some administrators in Equatoria Province,

(3) Loss of confidence due to the farcial trial of a Southern member of Parliament,

(4) Incidents at Nzara at the end of July, when troops fired on a Southern mob looting shops,

(5) Inaction when the conspiracy was discovered, and misjudgment of the situation at Torit in the days immediately before the mutiny,

(6) Extreme disappointment and frustration of Southerners as a result of Sudanization and consequent fear of political domination by the North;

(7) Circulation of false and exaggerated rumours, and a corresponding lack of effective Government propaganda to allay fears

The courts-martial which had been set up to try mutineers ended their functions at the beginning of April, among the last cases brought before them being that of Lieutenant Rinaldo Lolya, the officer who took over command of the mutiny among soldiers of the Equatoria Corps soon after the start of the uprising, and who also negotiated the surrender of the mutineers. He was sentenced to death and was executed at Juba on April 3

It was, however, reported from Khartoum that there were still between 200 and 300 former mutineers unaccounted for in Equatoria Province, where the state of emergency remained in force. Many of these men were thought to have thrown away their arms and to have reverted to civilian life, but on several occasions small bands attacked villages or Government offices in order to obtain money or food. Amongst such incidents were an attack on a remote forestry office on March 31, when a band stole £350 after exchanging fire with the police guard, and an attack on the Sudan-Uganda border, where six people were killed in disturbances by mutineers.—(Times) **(14559 A.)**

C. UNITED KINGDOM. — Sir F. Hoyer Millar appointed Head of Foreign Office. - Sir Christopher Steel becomes Ambassador in Bonn.

It was announced on Oct. 18 (*a*) that Sir Ivone Kirkpatrick would be retiring from the post of permanent head of the Foreign Office early in 1957, on reaching the age of 60; (*b*) that Sir Frederick Hoyer Millar (56), H.M. Ambassador in Bonn, would succeed him as Permanent Under Secretary of State at the Foreign Office, and (*c*) that Sir Christopher Steel (53), U.K. permanent representative on the North Atlantic Council, would succeed Sir F. Hoyer Millar as Ambassador to the German Federal Republic.

Sir Frederick Hoyer Millar became Britain's first post-war Ambassador to Germany in 1953, having previously served as Deputy High Commissioner in Germany, British permanent representative on the NATO Council, and Minister at H.M. Embassy in Washington.—(Times) **(Prev. rep. 15011 A.)**

D. NEW ZEALAND. — Population Census.

Provisional figures of a census held on April 17 last, published in July, showed that the population of New Zealand was 2,172,340, or 233,000 (12 per cent) more than at the 1951 census. The total did not include the population of the Cook Islands, Niue Islands, Tokelau Islands, and the Trust Territory of Western Samoa, or members of the N.Z. armed forces overseas. Of the total population increase, 182,000 was in the North Island of New Zealand (which contains 69 per cent of the Dominion's population) and 50,000 in the South Island. (Directorate of N.Z. Information Services, Wellington)

(Prev. rep. 1951 Census, 12086 B.)

A. UNITED KINGDOM. — The Chancellor's Mansion House Speech. - "Progress Report" on Economic Position. - Balance of Payments, First Half of 1956.

The Chancellor of the Exchequer, Mr. Macmillan, surveyed Britain's economic situation during the last few months in the traditional speech given at the Lord Mayor's dinner to the bankers and merchants of the City of London on Oct. 9. In his "progress report" he spoke as follows:

". . . First, the Exchequer account . . . As you know, I am still engaged in securing the further economies in Government expenditure which I undertook to get in my Budget speech—the £100,000,000. Of course you will say 'Not enough' I agree But it is a funny thing. Everyone is in favour of general economies in principle. Everyone is opposed to any particular economy in practice. You would be surprised to see some of the representations made to me for expenditure on some favourite scheme—of course, as a special and exceptional case—by some of the most rigid censors of public extravagance . . But I will not be weary of well-doing. The Suez crisis has, of course, involved us in extra expenditure, of which we do not know the end. But so far the revenue and expenditure returns give me no reason to fear that the broad structure of my Budget will not be maintained.

"I next approach . monetary policy. In this, as in other fields, the appellation of 'heretic' has generally been applied to the less numerous party. However, since it is not yet clear which this may prove to be, I will tread warily. I must frankly admit that I do not believe that we can solve all our problems by the monetary instrument alone. There is in practice, if not in theory, a limit beyond which the rate for money could not be driven. Nor is it efficacious today over as wide a field as in the past. At the same time, I do believe that we have done a great deal to curtail spending and encourage saving by making money both dear and scarce. It is too soon to talk of success or failure In the fight against inflation, action is taking place on a number of sectors of the front. Over the last year and more, bank credit has been constricted rapidly and substantially Last July I had to ask the bankers to continue the pressure without relaxation I am glad to see from the level of bank advances how well they have responded. Of course, the credit squeeze is unpopular. So are the hire purchase restrictions. So is the Capital Issues control. Nobody likes them But they are necessary. As the Duke said at Waterloo: 'Hard pounding this, gentlemen; let's see who will pound longest' Our fight against inflation is 'hard pounding' in a sense of which the Duke could scarcely have been thinking.

"I now turn to National Savings This year I have given them some new weapons. Already they are making good use of them. In the first six months of this financial year, net receipts from National Savings, excluding Defence Bond redemptions, amount to £29,380,000, the best result for the half-year since 1948. The income tax exemption for the first £15 of interest on Post Office and Trustee Savings Bank deposits has given encouragement to a very valuable form of saving. In addition to these conventional arms, which we have remodelled and refurbished, we have stocked our savings arsenal with a new and less orthodox missile which we are about to launch—the Premium Savings Bond. Some respected and venerable eyebrows have been raised at this innovation. But I would ask for a little charity too . . .

"From National Savings it is natural now to turn to the market, whose primary function it is to channel savings into investment. The market has shown great resilience in difficult conditions. Steady progress has been made in providing the requirements of borrowers at home and overseas I welcome the succession of loans issued or placed in the market for the local authorities This transfer of local authority borrowing from the Exchequer to the market (and I include the mortgage market as well as the stock market) has been a marked success . . The Budget estimate of Exchequer issues for this purpose for the year was £220,000,000, and even this figure showed a reduction of £100,000,000 on the estimates actually made last year. So far, with half the year gone, the issues amount to only £54,000,000, as against £217,000,000 last year

"This part of our funding strategy is working out well. Of course, the loan operations play an important part But Exchequer funding goes wider than that Our purpose is to reduce the amount of the floating debt. Our first aim is therefore to reduce the amount of the Exchequer's requirements Our second, to meet those requirements so far as possible by sales of various forms of securities to the public. This is much healthier than to do so by floating debt borrowed from the bankers. The improvement in Tax Reserve Certificates is helping us to do this, and we confidently expect to raise large sums in National Savings as the year proceeds. So please help our savings movement Please be kind to the Premium Savings Bond. If it really be a temptation, pray yield to it

"I now come to . the balance of payments In the first half of this year we checked imports Payments were a little below the last half of 1955 and very little above the first half of 1955. On the other hand, in the first half of this year, earnings from exports were over £160,000,000 larger than in the last half of 1955 and £170,000,000 above those of the first half of 1955. It would appear that exports are expanding at the annual rate of about 6 per cent in terms of volume, and about 10 per cent in value. There has also been improvement in the balance of invisible transactions, and the terms of trade have been favourable to us. As a result, we came out in the first half-year with a current surplus. I told the House of Commons at the beginning of July that this would be over £100,000,000 It will actually be more—£144,000,000.

"Of course, the first half of the year is seasonally the best time, especially as regards the non-sterling world. The trade figures for the third quarter are as usual not so good. We do not know what the fourth quarter will bring. All the same, it is good that we have a current surplus once again, both with the sterling and the non-sterling world But we must not relax. The halt in the growth of imports is due partly to reduction in some stocks and partly to a slackening in the rate of increase of production. As production increases, so will the demand for imports. More exports will therefore be necessary to pay for them. Nor must we forget the need to finance our overseas capital commitments, both to repay past debts and to maintain our contribution to the development of the Commonwealth and our place in the oil industry. All this can only be done if our savings at home and our exports abroad continue to grow and to free real resources for investment. For although many people seem quite unconscious of so obvious a fact, it is still true that you cannot invest a deficit.

"I come now to the position of sterling in the world to-day. It was a great opportunity to have in Washington a frank discussion with my Commonwealth colleagues on all our affairs . . . There are great developments afoot in the sterling area. The pace of economic development is quickening. So we must expect some drawing down of the great accumulated reserves. They will be used to finance the ambitious plans of social and industrial progress. This is a right and wise use of reserves. But all this puts a heavy burden and responsibility upon the old country to increase its external surplus. It also requires mutual consultation and mutual adjustment of policies so that the overall balance of the sterling area's trade with the rest of the world is put on a sound footing.

"During the first six months of this year our gold and dollar reserves rose by £95,000,000. It is true that during the third quarter they fell by £20,000,000 It is also true that without the sale of a particular asset which brought us a large sum [i.e. the Trinidad Oil Company] they would have fallen still further. However, it is fair to remember that, as well as selling assets across the exchanges, we also acquire them in the normal course of business. Even if you take the oil industry by itself, our total investment will be larger at the end of this year than it was at the beginning. Of course the reserves are too low. But so long as the sterling area can be kept in balance with the non-sterling world—and we are in balance—our position is not too bad. Moreover, movements in the reserves can be misleading. Recent withdrawals reflect anxiety, not about the internal position of this country, but about the international situation. They are part of the risks of banking But we should not forget that these withdrawals reduce our liabilities also. Any international financial centre must expect such an ebb and flow of funds. In a word, I would say this . we have made progress, and we are determined to secure and strengthen the position that we have won.

"I return now to the control of inflation. Since my Budget speech the boom has been slowing down. It is still true that there are more vacant jobs than there are unemployed. But there are not so many more Personal consumption has been running at very little above last year's level. People are saving more. The business community, while continuing to carry out its plans for modernization and extension, has become a little more cautious, both as to new commitments and as to the building up of stocks. Our information on all this is not as up-to-date as we would like it to be. We are making a great effort, in co-operation with business, to improve our economic statistics. We would like a better score-board and more frequent match cards. Anyway, total demand has hardly risen above last year's level, since both home production and imports have been stable. The pull of the home market on our productive resources has been reduced. We ought to have a little spare capacity in the economy. We have not yet obtained the full benefit we expect from this in our exports.

"We must do better still with our exports. We have given a lot of thought recently as a Government to the future of our export markets in the Commonwealth, in Europe, and in the rest of the world. All these matters are under discussion, and large and ambitious ideas are abroad. Here again we want to be bold but not rash. We must seize opportunities and create them. Above all, we must have faith in ourselves. But I repeat, the shifting of our resources from production for the home market to production for export is essential and must continue.

"This brings me to a theme on which I have spoken a good deal lately. Our exports must be competitive, in price as well as in quality. Consequently our purpose has been, not only to remove the overload on our resources, but to secure stability in the price level. Since the spring there has in fact been a welcome stability in wages and prices. We are still on the plateau. Retail prices in August were in fact a little lower than in April, and there is no reason why they should rise more than a point or two in the next few months. Many industrial concerns, both nationalized industries and private firms, have in recent months declared their intention of holding prices steady. Although industrial investment has increased so much in the last two years, the rate of increase in profits is falling off, and will, I believe, continue to fall. Profit margins will be squeezed. But wages and salaries form so large a part of our costs that there is no hope of stability unless they too are kept within the bounds set by our physical growth.

"I can hardly end without a reference to the problem of Suez and the future of the Middle East. So far neither the military expenditure which we have incurred nor the degree of disturbance to shipping have had a significant effect on our economy. Nevertheless, on the outcome of this affair our life and that of all Western Europe may well depend. No British Government worthy of the name can shirk or evade these responsibilities. Her Majesty's present Ministers are, I can assure you, determined to do their duty."

Mr. Macmillan's announcement of the improvement in the U.K.'s balance of payments during the first half of 1956 was confirmed by a White Paper (Cmd. 9871), published on Oct. 10, which showed that in the first half of 1956 the U.K. had paid her way in her current transactions with the rest of the world and had a substantial current surplus. This was a big improvement on 1955, when there was only a small surplus in the first half-year and a large deficit in the second.

U.K. Balance of Payments.

The U.K. had a current surplus of £144,000,000 in the half-year, compared with one of £18,000,000 (revised figure) in the first half of 1955, and with a deficit of £107,000,000 in the second half of that year. The improvement was mainly due to an increase in export earnings of £168,000,000 while imports only rose by £36,000,000. (Between the second half of 1955 and the first half of 1956 imports fell slightly).

The improvement over a year earlier was almost entirely with the non-sterling world, with which the U.K. had a surplus of £31,000,000 :

	First half 1955 *£ million*	*First half* 1956 *£ million*	*Change* *£ million*
United Kingdom current balance with :			
Rest of sterling area ..	+112	+113	+1
Non-sterling world ..	−94	+31	+125
Total . .	+18	+144	+126

This improvement in the balance with non-sterling countries was brought about (*a*) because U K. earnings from exports to them rose by £147,000,000 (18 per cent) whereas the U.K.'s payments for imports from them rose only £51,000,000 , (*b*) because the U.K s invisible balance with them (excluding Defence Aid) improved by £53,000,000 (Defence Aid fell by £24,000,000)

The improvement in net invisible earnings was due particularly to the recovery in oil and shipping incomes. Shipping income was influenced by, and followed a course similar to, that of visible trade Net shipping receipts (i.e. the excess of receipts over payments) for the first half of 1956 were £64,000,000, compared with £52,000,000 for the second half of 1955 and £74,000,000 for the first half of the same year On the debit side, payments of royalties and taxes to the Middle East States for oil were lower in the first half of 1956 U.S Defence Aid fell (see below), but " offshore " sales and expenditure by the U.S. and Canadian Forces in the U.K. increased markedly. The net effect of all these changes in the invisible account was a recovery to a surplus of £131,000,000 in the first half of 1956, compared with one of £90,000,000 in the second half of 1955 and one of £187,000,000 in the first half of that year.

U.K. and Sterling Area Balance of Payments with Non-Sterling World.

In contrast to recent experience, the improvement in the sterling area's balance with the rest of the world was almost entirely due to this improvement in the U.K. balance. The whole sterling area's balance with the rest of the world improved from £7,000,000 in the first half of 1955 to £135,000,000 in the first half of 1956. The rest of the sterling area's balance with non-sterling countries was virtually unchanged, as shown in the following table :

	First half 1955 *£ million*	*First half* 1956 *£ million*	*Change* *£ million*
United Kingdom current balance . .	−94	+31	+125
Rest of sterling area surplus	+101	+104	+3
Total	+7	+135	+128

American Aid.

U.S. Defence Aid (net) was much lower than a year earlier £9,000,000 ($25,000,000) in the first half of 1956, compared with £33,000,000 ($94,000,000) a year earlier. On the other hand, " offshire " sales to the U.S. Government were higher by £32,000,000 ($90,000,000) in the first half 1956, compared with £16,000,000 ($46,000,000) in the first six months of 1955. —

U.K. Reserves, Overseas Sterling Holdings, and Debit in European Payments Union.

There was an overall net improvement of £118,000,000 in reserves and overseas sterling holdings and the E.P.U. debit—the reserves and overseas holdings rising by £95,000,000 and the E.P.U. debit falling by £23,000,000.

(Treasury Press Office, London - Times - Financial Times - Cmd. 9871 - Board of Trade Journal) **(Prev. rep. Balance of Payments, 14810 A ; Mr. Macmillan 15070 A ; 15046 A ; Mr. Butler's Mansion House Speech, 14453 A.)**

A. AUSTRALIA. — Cabinet Reorganization.

A reorganization of the Australian Federal Government was announced by Mr. Menzies, the Prime Minister, on Oct. 18. The changes announced were :

(*a*) Mr. Beale, the Minister for Supply, would take over in addition the Defence Production portfolio previously held by Sir Eric Harrison ;

(*b*) Mr. Townley (hitherto Minister for Air) would become Minister for Immigration, taking over this Department from Mr. Holt ;

(*c*) Mr. Osborne would be Minister for Air in place of Mr. Townley ;

(*d*) Senator N. H. Denham Henty would become Minister of Customs and Excise, in succession to Mr. Osborne ;

(*e*) Mr. Holt would become Leader of the House of Representatives and chairman of what had previously been called the Vice-President's Committee of Ministers, and would remain Minister of Labour and National Service ;

(*f*) Senator O'Sullivan would become Vice-President of the Executive Council and would continue to be Attorney-General and leader of the Senate, but would relinquish the Navy portfolio ;

(*g*) Mr. Davidson, the Postmaster-General, would in addition become Minister for the Navy ;

(*h*) Sir Philip McBride would remain in the Cabinet, but the three Service Ministers would be outside it ;

(*i*) Mr. Beale and Mr. McMahon, the Minister for Primary Industry, would enter the Cabinet ;

(*k*) Senator Paltridge, the Minister of Shipping and Transport, would in addition take over Civil Aviation, thus dealing with all transport problems connected with shipping, the Commonwealth railways, and civil aviation ;

(*l*) Responsibility for uranium, atomic energy, and the development of bauxite and certain other minerals would be transferred from the Department of Supply to the Department of National Development.

Mr. Menzies explained that Mr Holt, as the new Leader of the House of Representatives and chairman of the Vice-President's Committee of Ministers, would have to perform " extremely arduous duties," and that it would therefore be impossible for him to continue to administer both the Departments of Labour and National Service and of Immigration He also said that Mr. Townley would—as Sir Eric Harrison had done—relieve him [Mr. Menzies] of a number of matters associated with the Prime Minister's Department, e g., the Office of Education, the National University, grants to universities, and the Public Service Board.

The changes reduced the number of Ministers from 22 to 21, the membership of the Cabinet remaining at 12.

Senator Henty (53), who entered the Government for the first time, is chairman of a firm of general merchants in Launceston (Tasmania) and was elected to the Senate in 1950. (Australian News and Information Bureau - Times)

(Prev. rep. Cabinet, 15123 A ; 14649 A ; 14924 F.)

B. BURMA. — Trade Pacts with India and Japan.

A five-year trade agreement was signed between India and Burma in New Delhi on Sept. 5, providing for the purchase of 2,000,000 tons of rice by India at a cost of £70,000,000 against Indian supplies to Burma of cotton textiles, jute manufactures, sewing machines, tea, and prawns.

The agreement expressed the determination of the two Governments " to take steps to achieve as near a balance in their trade as may be practicable." There was, however, provision that this desire would be " subject to prices and quality being competitive."

Arrangements had also been made by Burma with Japan and India, similar to those completed with the U.K. (see 14956 A), providing for the import of cotton textiles and yarns against payments in raw cotton made available to Burma by the U.S. Government. The arrangement with Japan, concluded on June 18, was to the value of £3,250,000, and the arrangement with India, announced on July 15, was to the value of £1,038,000.—(Burmese Government Information Dept., Rangoon - The Hindu, Madras) **(14956 A ; 13468 C.)**

C. DENMARK. — Asylum granted to Polish Pilot.

A pilot of the Polish Air Force landed in his MIG-15 jet fighter on the island of Bornholm on Sept. 25 and asked for political asylum, which was subsequently granted him by the Danish authorities. The machine, which had taken off from an airfield near Poznan, was dismantled by Danish Air Force technicians and taken to Copenhagen for examination. Two other Polish pilots had landed with their machines on Bornholm in 1953 and had been given political asylum.

(Politiken, Copenhagen) **(13135 C ; 12913 A ; 12802 A.)**

A. INDIA-UNITED STATES. — Agreement on U.S. Supplies of Surplus Products. - U.S. Economic and Technical Assistance. - Operational Agreements.

An agreement was signed in New Delhi on Aug. 29 for the purchase by India of U.S. surplus agricultural and dairy products to the value of $360,000,000 between 1956 and 1959.

The agreement, which was concluded under the U.S. Agricultural Trade Development and Assistance Act, provided for the supply of $200,000,000 worth of wheat (3,500,000 tons), $26,400,000 worth of rice (200,000 tons), $70,000,000 worth of cotton (500,000 bales), $6,000,000 worth of tobacco (6,000,000 lbs.), and dairy products, mainly skimmed milk, to the value of $3,500,000. The total amount also included a contribution of $54,200,000 toward freight costs. Other provisions were as follows:

(1) India would not be restricted to buying from the U.S. stored surplus stock and would be free to buy in the U.S. open market. While the commodities would be sold at the above export prices, their value in the books of the U.S. Commodity Credit Corporation was about $550,000,000. [The U.S. Government therefore subsidized the Indian purchase by $190,000,000.]

(2) Payment for the imports would be made by crediting the U.S. Government account in India with rupees to the value of the dollars involved. This counterpart fund would be used in India as follows

(i) Rs.1,114,000,000 would be lent on a long-term basis to the Indian Government for economic development, of which Rs. 260,000,000 would be used for loans to private enterprise. Detailed terms of the loan would be settled in due course.

(ii) Rs.257,000,000 would be a direct grant to the Indian Government for expenditure on economic development projects.

(iii) The balance of about Rs.500,000,000 would be used by the U.S. Government for various purposes in India, including the costs of the diplomatic mission, part of the costs of building of a new Embassy, the development of new markets for U.S. agricultural commodities on a basis of mutual benefit, and the financing of international educational exchange activities.

(3) The agreement also provided that India would not reduce her normal imports of rice, wheat, and cotton from other countries.

(4) All the rice, about one-fifth of the wheat, and about 30 per cent of the cotton would be shipped by June 30, 1957. The rest would be shipped by June 30, 1959.

The agreement was the largest surplus commodity disposal transaction carried out by the U.S. Government. It was also the biggest single agreement between India and the U.S., the largest previous transaction being the wheat loan of 1951, which involved $190,000,000.

U.S. Economic and Technical Assistance.

A total of $10,000,000 was allocated as U.S. assistance to India for the fiscal year 1955-56 under the Indo-U.S. Technical Co-operation Programme. Within the framework of the main Technical Co-operation Agreement, operational agreements included the following projects:

(*a*) The establishment of a steel foundry at Chittaranjan, the development of the cultivation and marketing of citrus fruits, social welfare work, the improvement of agricultural methods and education, and a nation-wide campaign for the control of malaria were projects covered by among 12 agreements signed on March 23. U.S. contribution, $2,500,000.

(*b*) Provision for consulting services to be supplied by Trans-World Airlines to Air India International for improving efficiency. U.S contribution, $33,000 (May 8).

(*c*) Expansion and rehabilitation of Indian railways. U.S. allocation of $673,582 for the purchase abroad of 4,000 tons of steel rails (May 8).

(*d*) Allocation of $260,590 to pay for the services of a professional trades training adviser to the Indian Ministry of Labour and to provide craftsmen for an Instructors' Training Institute (May 25).

(*e*) Livestock improvement schemes. U.S. contribution, $113,100 (May 25).

(*f*) Allocations to the Calcutta Milk Scheme and the National Dairy Development Programme, to the water supply and sanitation programme, and to the fisheries programme, etc, were included among 16 agreements signed on June 29. U.S. contribution, $2,400,000.

Additional operational agreements previously concluded under the 1954-55 Technical Co-operation Programme covered:

(*a*) Research in agricultural economics, determination of soil fertility and use of fertilizers, vocational training, and the construction of 350 additional tubewells under the irrigation programme in Northern India. U.S. contribution, $750,000; Indian contribution, Rs.41,261,200. (April 19, 1955).

(*b*) Assistance to technical educational institutions, importation of livestock, ground-water exploration, flood control, and modern storage of foodgrains. U.S. contribution, $1,280,000 (April 27, 1955).

(*c*) Railway rehabilitation and expansion, industrial technical services, and maintenance of training centres for electric distribution systems. U.S. contribution, $1,400,000; Indian contribution, Rs.992,000 (April 30, 1955).

(*d*) Increase in steel supplies, minor irrigation works, technical education. U.S. contribution, $7,700,000, Indian contribution, Rs.5,540,000 (May 31, 1955).

(*e*) Social welfare, education, and expansion of marine fisheries. U.S. contribution, $522,700; Indian contribution, Rs.1,100,000 (June 21, 1955).

(*f*) Aid for 250 new Community Development blocks. U.S. contribution, $680,000 (June 30, 1955).

(*g*) Agricultural education and research, assistance to industrial research and technical service organizations, exploratory mining of lignite, assistance to medical colleges and allied institutions, and crop production and development. U.S. contribution, $1,920 000; Indian contribution, Rs.3,320,000 (June 30, 1955).

The total aid authorized by the United States under the Indo-U.S. Technical Co-operation Programme between 1951-52 and 1954-55 (including development assistance) amounted to $240,000,000.—(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London - New York Times - New York Herald Tribune) **(Prev. rep. U.S. Aid, 14742 A; 14651 A; Operational Agreements, 13526 B.)**

B. UNITED KINGDOM. — Internal Security. - The Lang Case. - Right of Appeal against Dismissal extended to Employees of Government Contractors.

Mr. Reginald Maudling, the Minister of Supply, answered questions in the House of Commons on June 11 about the Government's action in the case of Mr. J. H. A. Lang, an assistant solicitor to Imperial Chemical Industries Ltd., who had been dismissed by that company for security reasons on June 8.

Mr. Maudling said that Imperial Chemical Industries Ltd. had been informed that the Ministers responsible were not prepared to place secret contracts with them in circumstances which would enable Mr. Lang to have access to secret information disclosed in connexion with them. Any subsequent action taken in relation to Mr. Lang's employment was the responsibility of the company. The Government's decision had been confirmed after representations made by Mr. Lang, at his request, to a representative of the Ministers concerned had been exhaustively considered.

"I am not prepared, for reasons the House will appreciate," continued Mr. Maudling, "to make public the information available to H.M. Government. But I can say that H.M. Government have followed the recommendations of the Conference of Privy Councillors on Security. Mrs Lang's political associations [with the Communist Party] were one of a number of matters taken into consideration.

"When the White Paper on the Privy Councillors' Conference was published it was pointed out to Mr. Lang that, as a result, the procedure of the three advisers might be extended to people outside Government employment, and he was asked whether he would prefer to wait until it was known whether this arrangement would be put into effect and then avail himself of it. But he preferred to proceed by way of interview with a representative of the responsible Ministers.

"The policy of H M. Government in dealing with these matters is to give effect to all the recommendations of the Privy Councillors' Conference"

In reply to criticisms from Labour and Liberal Members, Mr. Maudling denied that the Government's action was a departure from precedent or from the recommendations of the Privy Councillors' Conference. Nor was it true that Mr. Lang had been informed that his wife's previous political connexions were the only matter taken into account by the Government. He reiterated that Ministers had a solemn responsibility to safeguard State secrets, and the duty to exclude from access to them people whom they did not think suitable. In such circumstances—as in this case—it was not possible to publish the information upon which a decision had been reached by Ministers.

At a press conference on June 6, Mr. Lang had alleged that he was being dismissed only because his wife had once been a Communist.

He said that he himself had been a member of the Anglo-Soviet Friendship Society for about a year. He had also been a member of the Haldane Society, and when, in 1948-49, many Socialist members had left it to form their own law society, he had remained and taken office as treasurer with the idea of countering the extreme Communist trend of that society. He had, however, severed his connexion with the Society in 1950 on account of its attitude about "germ warfare" in Korea.

The Lord Chancellor (Lord Kilmuir) announced on June 21, during a debate on the case of Mr. Lang in the House of Lords, that, as a result of discussions with the National Joint Advisory Council, the Government had decided to accept the recommendation of the Conference of Privy Councillors that contractors' employees who, as a result of a directive by a Minister, were dismissed or, in his opinion, were liable to suffer financial loss, should in future have the same right to appeal to the Three Advisers' tribunal as persons in the public service.

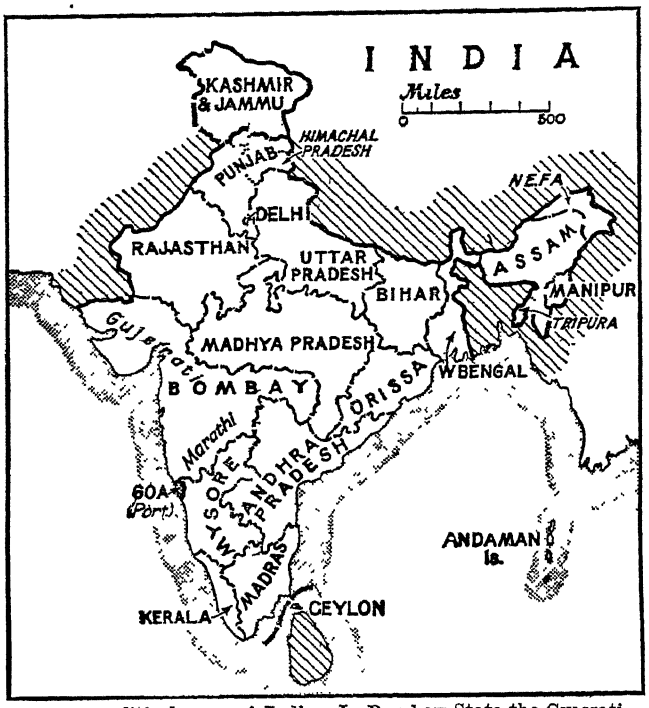
On the Lang case itself, the Lord Chancellor disclosed that Mr. Lang had been considered a bad security risk in 1951. Between then and November 1955 it had been hoped that it would be possible to ensure that his work did not bring him in contact with Government secrets, but finally the company had found that it would be impossible for a man in his position to be kept completely from them, and that was the reason for the present position.—(Times - Daily Telegraph) **(14750 A.)**

A. INDIA. — Reorganization of States in Force.

The reorganization of the Indian States under the provisions of the States Reorganization Act, the Bihar and West Bengal (Transfer of Territories) Act, and the Constitution (Seventh Amendment) Act [see below] came into force on Nov. 1, when the country was divided into 14 States and six Centrally-administered territories. The former distinction between "Class A," "Class B," and "Class C" States was ended and the institution of *Rajpramukh* abolished, all States being placed under Governors.

The 14 States of the Indian Union are: Andhra Pradesh, Assam, Bihar, Bombay, Jammu and Kashmir, Kerala, Madhya Pradesh, Madras, Mysore, Orissa, Punjab, Rajasthan, Uttar Pradesh, and West Bengal.

The six Centrally-administered areas are the Andaman and Nicobar Islands, Delhi, Himachal Pradesh, the Laccadive and Amindive Islands, Manipur, and Tripura.



The new political map of India. In Bombay State the Gujerati- and Marathi-speaking areas are shown (*Economist*)

The areas, populations, and capitals of the States are:

State	Area (sq. miles)	Population (millions)	Capital
Andhra Pradesh	110,250	32.2	Hyderabad
Assam	84,924	9.0	Shillong
Bihar	67,830*	38.9*	Patna
Bombay	188,240	47.8	Bombay
Jammu and Kashmir	92,780	4.4	Srinagar
Kerala	14.980	13.6	Trivandrum
Madhya Pradesh	171,200	26.1	Bhopal
Madras	50,170	30.0	Madras
Mysore	72,730	19.0	Bangalore
Orissa	60,140	14.6	Cuttack
Punjab	46,616	16.0	Chandigarh
Rajasthan	132,300	16.0	Jaipur
Uttar Pradesh	113,410	63.2	Lucknow
West Bengal	33,279*	26.2*	Calcutta

*Approximate figures.

The Constitution (Seventh Amendment) Act.

The Constitution (Ninth Amendment) Bill—subsequently renamed the Constitution (Seventh Amendment) Bill—providing for the necessary changes in the Indian Constitution arising from the reorganization of the States (see 14866 A), was given a first reading by the House of the People on Sept. 4 by 343 votes to nil, after it had been returned by the Joint Select Committee of both Houses.

Pandit Pant (the Home Minister) announced during the debate that the Government would introduce a number of amendments, chiefly relating to the protection of linguistic minorities, including the appointment of a Commissioner for Linguistic Minorities whose reports to Parliament would be discussed in the same way as those of the Commissioner for Scheduled Castes. He also announced that the Government proposed to introduce legislation to ensure that no-one was discriminated against in matters of employment, trade, and ownership of land and property as a result of being domiciled in a different State.

A memorandum on safeguards for minorities, which was distributed among members, stated that the Government would lay down its policy on the use of the mother tongue in secondary education in consultation with the State Governments, and would take steps to implement it. Where it was not possible to arrange affiliation of schools and colleges using a minority language to universities and other authorities within a State, the State Governments would be advised to permit affiliation to outside bodies, and to give grants-in-aid and other facilities irrespective of affiliation. The State Governments would also be advised to recognize minority languages as media for examinations for recruitment to State services.

During the third reading debate (Sept. 6) a number of amendments were adopted, the most important being as follows:

(1) The Bill was renamed the Constitution (Seventh Amendment) Bill.

(2) In accordance with a recommendation of the Joint Select Committee, a special officer for linguistic minority groups would be appointed by the President to "investigate all matters relating to the safeguards provided for linguistic minority groups," and to submit periodic reports to Parliament

(3) The President was empowered to issue directions to States to ensure that facilities for primary education in their mother tongue were provided for children belonging to linguistic minority groups.

(4) In Bombay State development boards would be set up for Marathwada, Vidarbha, the rest of Maharashtra, Saurashtra, Kutch, and the rest of Gujerat, to ensure that proper attention was given to the interests of areas which had previously formed part of other States.

Replying to the debate, Pandit Pant defended the proposal for regional councils in the Punjab against Opposition criticism, maintaining that this solution, which kept the unity of the State intact and gave every region scope to develop, was the best that could be devised He announced that special legislation setting up a corporation for Delhi would be introduced, that, as an interim measure, an advisory council for Delhi would be set up on or before Nov. 1 to advise the Home Minister; and that similar arrangements would be made for the other Union Territories of Himachal Pradesh, Manipur, and Tripura. Pandit Pant also stated that the Laccadive and Amindive Islands would be allocated one seat in the *Lok Sabha*

The Bill passed its third reading on Sept. 6 by 312 votes to nil; was given a unanimous third reading in the Council of States (*Rajya Sabha*) on Sept. 11; and subsequently received the President's assent.

Appointment of Delimitation Commission.

The Government appointed on Sept. 1 a Delimitation Commission to determine the Parliamentary and Assembly constituencies into which each new State should be divided, the number of seats to be allotted to each, and the number of seats in the *Lok Sabha* and the State Assemblies to be reserved for scheduled castes and tribes.

The commission consisted of Mr. Chandrasekhara Ayyar (a former Judge of the Supreme Court) as chairman, Mr. P. K. Kaul, and Mr. Sukumar Sen (Chief Election Commissioner).

Travancore-Cochin.

A Government resolution extending for a further six months the period of presidential rule in Travancore-Cochin was approved by the *Lok Sabha* on Sept. 1 and by the *Rajya Sabha* on Sept. 7.—(Indian High Commissioner's Office, London - The Hindu, Madras - The Statesman, Calcutta)

(Prev. rep. 15111 A.)

Corrigendum. The opening sentence of report 15111 A stating that the States Reorganization Bill had been finally passed by the *Rajya Sabha* on Sept. 11 is incorrect and should be disregarded. The Bill passed its third reading in the *Rajya Sabha* on Aug 25, as stated in the sentence following, and received Presidential assent on Aug. 31.

(Ed. K.C.A.)

B. ITALY - LIBYA. — Final Settlement of Outstanding Problems. - Italian Aid for Libyan Economic Reconstruction.

An agreement between Italy and Libya settling a number of problems outstanding since the end of the Second World War was signed in Rome on Oct. 2 by Signor Segni and M. Ben Halim, the Italian and Libyan Prime Ministers.

The agreement settled the transfer of former Italian State property when Libya formed part of the Italian Empire; regulated the status of the 42,000 Italians still living in Libya; provided for an Italian financial contribution to the economic reconstruction of Libya amounting to £L.1,000,000, payable three months after ratification of the agreement; and made provision for an Italian credit for Libyan purchases of Italian industrial products totalling £L.1,750,000, to be available in three annual instalments. The two countries also agreed to conclude in the near future a treaty of commerce and navigation and a cultural agreement, within the framework of a treaty of friendship.

Both Prime Ministers emphasized that the agreement had settled all outstanding questions between the two countries.

NOVEMBER 3—10, 1956

A. MIDDLE EAST. — Israeli Attack on Egypt after Renewal of Egyptian Commando Raids. - Capture of Sinai Peninsula and Gaza Strip. - Anglo-French Ultimatum to Israel and Egypt to withdraw Forces from Suez Canal Zone. - Egyptian Rejection. - Anglo-French Air Offensive against Egyptian Military Targets. - Allied Occupation of Port Said Area. - Cease-fire in Operation. - Emergency Resolutions of U.N. Security Council and General Assembly. - Debates in British Parliament. - Opposition Denunciation of Anglo-French Action in Canal Zone.

The tense situation in the Middle East arising out of the prolonged Arab-Israeli dispute and Colonel Nasser's seizure of the Suez Canal erupted on Oct. 29, when the Israeli Army launched an attack on Egyptian positions in the Sinai Peninsula with the avowed aim of eliminating the *Fedayeen* (Egyptian commando) bases from which frequent attacks had been made into Israeli territory.

On the following day the British and French Governments sent 12-hour ultimatums to both Israel and Egypt which (1) called upon the two countries to cease hostilities by land, sea and air immediately; (2) called upon their military forces to withdraw to a distance of ten miles east of the Suez Canal in the case of Israel and ten miles west of the Canal in the case of Egypt; and (3) requested the Egyptian Government to allow Anglo-French forces to be stationed temporarily at three points on the Canal—Port Said, Ismailia, and Suez—with the aim of separating the belligerents and ensuring the safety of shipping using the Canal. The ultimatum was accepted by Israel but rejected by Egypt, who refused to agree to the temporary stationing of British and French forces at Port Said, Ismailia, and Suez. As a result of Egypt's refusal to comply with this request, British and French air forces based on Cyprus began an offensive against Egyptian airfields and other military installations, followed a few days later by paratroop landings in the Canal Zone.

Renewal of Egyptian Fedayeen Attacks. - Mobilization in Israel. - President Eisenhower's Appeals to Mr. Ben-Gurion.

During the fortnight preceding the Israeli attack in Sinai, a number of *Fedayeen* incursions had been made into Israeli territory, causing casualties in killed and wounded. Three Israeli soldiers were killed and 27 injured, many seriously, when a military vehicle was blown up by road-mines inside Israeli territory near El Auja on Oct. 21. A week earlier two Egyptian *Fedayeen* commandos were killed and two captured near the Israeli settlement of Sde Boker, the captives admitting that they had been sent into Israel for reconnaissance purposes by the Egyptian intelligence service.

Partial mobilization was announced in Israel on Oct. 28, an official statement saying that this had been necessitated by (1) the renewal of Egyptian *Fedayeen* activities against Israel; (2) the formation of an Egyptian-Jordanian-Syrian military alliance directed against Israel and under Egyptian command (see 15166 D); (3) declarations by the rulers of Egypt, Jordan, and Syria that their avowed intention was the destruction of Israel; and (4) the mobilization of Iraqi forces on the Jordanian frontier (see 15150 A).

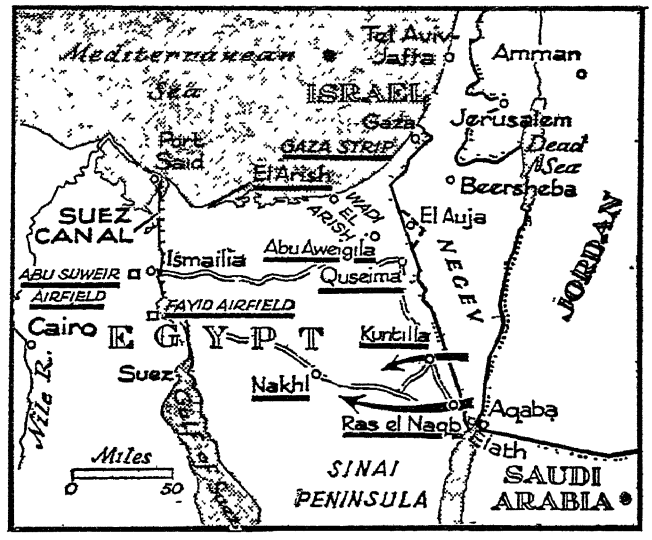
In Washington, it was announced on the same day that President Eisenhower had called for immediate talks with Britain and France on the Middle East situation, and had sent two urgent messages to Mr. Ben-Gurion expressing "grave concern" at the reports of Israeli mobilization, and asking that "no forceful initiative be taken which would endanger the peace." It was stated at the White House that reports had been received indicating that Israel's mobilization was almost completed.

Israeli Victory in Battle of Sinai. - Egyptian Evacuation of Sinai Peninsula. - Capture of Gaza.

Simultaneously with the launching of military operations by the Israeli forces, the Israeli Foreign Ministry announced that their aim was the liquidation of the *Fedayeen* bases in the Sinai peninsula from which commando units of the Egyptian Army had "spread terror in Israel by acts of indiscriminate murder, mining, and sabotage." An Israeli Army announcement said that the operation had been necessitated by "continuous Egyptian attacks on Israel's land and sea communications," aimed at "causing destruction and depriving the people of Israel of the possibility of peaceful existence."

After pointing out that the *Fedayeen* formed part of the Egyptian Army and operated under Egyptian military command, the Foreign Ministry's statement said that after some weeks of quiescence the *Fedayeen* units had again gone into action on Colonel Nasser's orders, following the ending of the Security Council's deliberations on the Suez problem. As a result, there had been 24 Israeli casualties during the preceding fortnight from *Fedayeen* attacks into Israel's territory. The statement also recapitulated the hostile actions taken by Egypt against Israel in recent years, including the blockading of the Suez Canal and the Gulf of Akaba to Israeli shipping

At the end of five days' fighting (Oct. 29 to Nov. 2) virtually the whole Sinai peninsula was under Israeli control and all Egyptian resistance had ceased, apart from "suicide squads" holding out in various areas and being mopped-up. Except for brief official communiques, no detailed information on the operations was given in Israel, where mobilization had been completed and a black-out imposed. It subsequently became clear, however, that one wing of the Israeli Army had advanced westward across the Sinai desert in the direction of the Suez Canal, while another had carried out an outflanking operation to cut off the "Gaza strip" from the Sinai peninsula.



The Sinai Peninsula, showing area of operations. (*New York Times*)

The Egyptian bases of Quesima, Kuntilla, and Nakhl (the last-named about half-way between the Israeli border and the Gulf of Suez), from all of which *Fedayeen* attacks had been launched into Israel, were captured by the Israeli Army during the first 48 hours of the campaign. The Egyptian Army fought desperately to hold Abu Aweigila (Egyptian divisional headquarters in Sinai), which only fell to the Israeli forces after a bitter two-day battle in which tanks, armoured cars, and aircraft were engaged on both sides. Meanwhile other Israeli forces, striking northward to the sea from the Aweigila area, captured El Arish and Rafa, on the coast, thereby isolating the "Gaza strip" and sealing it off from the Sinai peninsula. The town of Gaza (captured by the Egyptians eight years earlier on the day the State of Israel came into existence) surrendered with its garrison on Nov. 1, on which date the Israeli Army announced that the entire Egyptian Army in Sinai was in "full and disorderly retreat" and was being withdrawn from the peninsula on the orders of Colonel Nasser. On the following day Cyprus Radio quoted an Egyptian broadcast as saying that the Egyptian forces had been completely withdrawn from Sinai to the Suez Canal zone, where they were "awaiting the British and French forces." [The Egyptian withdrawal from Sinai was apparently ordered after the launching of the Anglo-French air offensive against Egyptian airfields—see below.]

Apart from Israeli mopping-up operations in the Sinai desert, the only operation announced after the beginning of November was the capture by Israeli paratroops of two islands at the entrance to the Gulf of Akaba (Tiran and Sharm-el-Sheikh), whose garrisons capitulated on Nov. 4-5 after offering slight resistance. Egyptian batteries on these islands had prevented Israeli shipping from sailing from the port of Elath into the Red Sea.

No official statement on the forces engaged in the Battle of Sinai was given by either side, though an Israel Army spokesman stated on Nov 1 that the Egyptian Army in Sinai had consisted of "tens of thousands of troops" grouped in two divisions, an armoured brigade group, and auxiliary units Foreign military experts believed that about half the Egyptian Army had been stationed in the Sinai peninsula During the fighting itself both the Egyptian and Israeli Commands had claimed heavy casualties inflicted on the other side and large numbers of enemy tanks, armoured vehicles, and aircraft destroyed or damaged

Egyptian military equipment abandoned during the retreat and captured by the Israelis included about 100 T-34 tanks of Russian manufacture, a number of *Sherman* tanks, an entire battery of unused 25-pdr. guns abandoned at Abu Aweigila, large numbers of vehicles and jeeps, and much miscellaneous military equipment. Reports from press correspondents said that the captured tanks and vehicles were being repaired and put into service by the Israeli Army.

The Israeli Command claimed the destruction of at least ten Egyptian planes during the campaign, including Russian-type *Mig* jet fighters, against the loss of only two *Piper Cubs* (spotter planes) on the Israeli side. It was stated that Egyptian air activity over Sinai had virtually ceased after the first two or three days The destruction of "scores" of Egyptian military vehicles in air attacks on convoys moving eastward from Ismailia was also claimed. On the other hand the Egyptian Command claimed that heavy losses had been inflicted on Israeli aircraft, armour, and convoys by the Egyptian Air Force.

Several thousand Egyptian troops were taken prisoner by the Israelis, including two generals—Major-General Yusef Abdullah Agruli, commander of the Egyptian Eighth Division, who surrendered with his staff at Khan Yunis (at the entrance to the "Gaza strip"), and Major-General Mohamed Fuad el-Digwy, the Military Governor of Sinai. In the absence of official figures, it was believed that at least 5,000 Egyptians had been captured, most of them in the triangle Rafah-El Arish-Abu Aweigila, where Egyptian resistance appeared to have been heaviest. Reports from press correspondents said that several Russian technicians—apparently training the Egyptian forces in the use of Soviet equipment—had been taken prisoner

In a despatch on Nov. 4, a *Times* correspondent with the Israeli forces in Sinai wrote:

"Thus has ended, for all practical purposes, the campaign that began dramatically [on Oct. 29] when an Israeli force was dropped by parachute into the desert west of El Nakhl. The battle moved north-westward along the whole of the Sinai border, with heavy armour and aircraft in action as the Israelis tried to open the central and coastal roads through the peninsula to the Suez Canal. This was accomplished when, first, Quesima was taken and the defences of the Abu Aweigila crossroads were encircled, and then there followed the fall of Rafa and, on Nov. 2, of El Arish.

"The heaviest fighting was around Abu Aweigila. Visiting the Abu Aweigila cross-roads, your Correspondent saw grim evidence of the battle—burnt out Israel half-tracks, scattered Egyptian positions, a still smouldering Spitfire, the debris of tents, clothes, provisions—and some hundreds of Egyptian dead . . . There were quantities of material about bearing Russian markings over old American markings—evidently former lend-lease supplies . . . Most of the El Arish garrison seems to have escaped, leaving the town to be surrendered to the Israelis by its notables. Once the coastal gap between El Arish and the sea was closed [on Nov. 2] the capture of Gaza and its 25-mile-long corridor became a matter of hours . . ."

The only naval clash between Egyptian and Israeli forces occurred on Oct. 31, when the 1,200-ton Egyptian destroyer *Ibrahim Awal* (formerly the British Hunt-class destroyer *Cottesmore*) tried to shell Haifa. No damage or casualties resulted, most of the shells falling in Haifa Bay. Attacked by Israeli warships and aircraft, the *Ibrahim Awal* began to list after being hit and hoisted the white flag. She was taken in tow by an Israeli warship, brought into Haifa, and her crew of 250 landed and made prisoners-of-war. Repairs were begun to make the warship seaworthy for the Israeli Navy.

The capture of the "Gaza strip" involved Israel in the responsibility for approximately 300,000 Arab civilians, of whom well over 200,000 were Palestinian Arab refugees who had been living in the area for the past eight years and who had been cared for by U.N. relief organizations The Israeli authorities requested these organizations to continue their relief work, a U.N. relief team leaving Beirut for Gaza on Nov. 4. Press correspondents reported that the atmosphere in the area was calm, that the town of Gaza was undamaged, that an Israeli Military Governor had been appointed, and that Egyptian policemen were maintaining order under Israeli control

It was officially announced in Tel-Aviv on Nov. 6 that Israeli casualties in the Battle of Sinai were 150 killed, 700 wounded and 20 prisoners.

Sir Anthony Eden's Announcement of Anglo-French Ultimatum to Israel and Egypt. - House of Commons Debate. - Opposition Attacks on Government Policy.

The news of the Anglo-French ultimatum to Israel and Egypt was given to the House of Commons on Oct. 30 by the Prime Minister, Sir Anthony Eden, a short time after the conclusion of discussions at Downing Street with M. Mollet and M. Pineau, the French Premier and Foreign Minister, who had flown to London earlier in the day. The Prime Minister spoke as follows:

"As the House will know, for some time past the tension on the frontiers of Israel has been increasing. The growing military strength of Egypt has given rise to renewed apprehension, which the statements and actions of the Egyptian Government have further aggravated. The establishment of a Joint Military Command between Egypt, Jordan, and Syria, the renewed raids by guerrillas, culminating in the incursion of Egyptian commandos on the night of Oct 28, had all produced a very dangerous situation.

"Five days ago news was received that the Israel Government were taking certain mobilization measures. H M Government at once instructed H.M. Ambassador at Tel-Aviv to make inquiries of the Israel Minister for Foreign Affairs and to urge restraint Meanwhile President Eisenhower called for an immediate tripartite discussion between representatives of the U K , France, and the U.S.A. A meeting was held on Oct. 28 in Washington, and a second meeting on the 29th.

"While these discussions were proceeding news was received last night that Israel forces had crossed the frontier and had penetrated deep into Egyptian territory Later, reports were received indicating that paratroops had been dropped. It appeared that the Israel spearhead was not far from the banks of the Suez Canal.

"During the last few weeks H M. Government have thought it their duty, having regard to their obligations under the Anglo-Jordan Treaty, to give assurances, both public and private, of their intention to honour these obligations. H.M. Ambassador in Tel-Aviv last night received an assurance that Israel would not attack Jordan.

"The Foreign Secretary discussed the situation with the U S. Ambassador this morning The French Prime Minister and Foreign Minister have come over to London at short notice at the invitation of H M. Government to deliberate with us on these events

"I must tell the House that very grave issues are at stake, and unless hostilities can quickly be stopped, free passage through the Canal will be jeopardized Moreover, any fighting on the banks of the Canal would endanger the ships actually on passage. The number of crews and passengers involved totals many hundreds, and the value of the ships which are likely to be on passage is about £50,000,000, excluding the value of the cargoes.

"H.M Government and the French Government have accordingly agreed that everything possible should be done to bring hostilities to an end as soon as possible Their representatives in New York have therefore been instructed to join the U S representative in seeking an immediate meeting of the Security Council. This began at 4 p m.

"In the meantime, as a result of the consultations in London to-day, the U.K. and French Governments have addressed urgent communications to Egypt and Israel In these we have called upon both sides to stop all warlike action by land, sea, and air forthwith and to withdraw their military forces to a distance of 10 miles from the Canal. Further, in order to separate the belligerents and to guarantee freedom of transit through the Canal by the ships of all nations, we have asked the Egyptian Government to agree that Anglo-French forces should move temporarily—I repeat, temporarily—into key positions at Port Said, Ismailia, and Suez The Governments of Egypt and Israel have been asked to answer this communication within 12 hours. It has been made clear to them that if at the expiration of that time one or both have not undertaken to comply with these requirements, British and French forces will intervene in whatever strength may be necessary to secure compliance"

Mr. Gaitskell (Leader of the Opposition) said that the Prime Minister had made "a statement of the utmost gravity," and that it would be unwise if they were "to plunge into any lengthy discussion or comment" until they had had an opportunity of talking over what the Prime Minister had said He continued: "I will only make a few comments which seem to me worth making in this extremely serious situation.

"We are, of course, obliged under the Tripartite Declaration to do everything we can to stop aggression, either by Israel against the Arab States or by the Arab States against Israel The Prime Minister made no reference to the Tripartite Declaration and I would like him to tell us the Government's attitude to that Declaration now. Secondly, we are bound by the U N. Charter to do everything we can to stop the conflict, and I warmly endorse those parts of his statement in which he said it was extremely important that hostilities should cease as soon as possible. I am also delighted that the matter has been referred to the U.N. and that the Security Council is now meeting to discuss it I would hope that we would at any rate now pledge our support in advance of any decisions which the Security Council may reach.

"The last part of the Prime Minister's statement is the gravest part, and on that I would not like without further consideration to make any detailed comment. But I would ask him this . we want to stop the hostilities, we want both parties to withdraw from the fighting area, but I must ask the Prime Minister under what authority and with what right he believes British and French forces are justified in armed intervention before there has been any pronouncement by the United Nations upon it."

Sir Anthony Eden replied. "Certainly the spirit of the Tripartite Declaration—and more than the spirit—operates in our minds. It is also true that Egypt's own attitude to the Tripartite Declaration has been, to say the very least, equivocal. She has made it quite clear on more than one occasion that she does not wish the Tripartite Declaration invoked on her behalf.

"As to the last part of my statement, which I fully understand is the gravest, we maintain there is nothing in the Tripartite Declaration or in the Charter which abrogates the right of a Government to take such steps as are essential to protect the lives of their citizens and vital international rights such as are here at stake."

Mr. Gaitskell then asked whether the Prime Minister would "make it plain that it is the intention of the Government, in making their proposal to the Egyptian and Israel Governments, simply to safeguard the lives of British nationals, and as soon as they are satisfied those lives are safe the forces will be withdrawn?" **Sir Anthony Eden** replied: "I used the word 'temporarily' deliberately. There are some who think we could have invoked other treaties to do what we are doing I did not want to do that. We have based this action simply on the present situation, and certainly we would not wish to keep any British troops there—and I am sure the French would not—for one moment longer than is absolutely necessary to deal with this immediate situation and the very real danger of fighting across the Canal"

Mr. Clement Davies (the Liberal leader) asked: "Do I understand the Prime Minister's view to be this—that the first desirability is the cessation of hostilities; secondly, if there is any danger to life or to shipping, that should be protected; and thirdly, any question as to who is the aggressor will be decided by the Security Council and pressure will be brought on the Security Council to deal with these matters as early as possible?"

The Prime Minister replied: "The Security Council is considering the matter now, and it would not be for me to express an opinion on what they will say. But we thought it right to express our view on the situation, and on the action we should have to take if this situation continued to develop at its present seriousness."

Mr. Shinwell (Lab) said that it was no use the Prime Minister telling them that British and French troops would only be in the Canal area temporarily. That was not the intention of the Government. The troops were going to be there a long time Israel wanted to proceed with her peaceful development. Technically she might be at fault in terms of the Tripartite Agreement and the provisions of the Charter, but had there been any other country so provoked, threatened, bullied, accused, and castigated? Hitherto, H.M. Government had been prepared to sacrifice Israel to give support to the Arab States—not so much because they wanted the support of the Arab States, but to safeguard our oil resources There was a heavy responsibility resting on the shoulders of the Government. They had brought this situation about, and they should take action which would give Israel some assurance of peace in the future.

Sir Anthony Eden replied: "I accept that there is a heavy responsibility on the shoulders of the Government . . . These decisions were arrived at after careful discussion with our French colleagues. What we hope, what we ask for, and indeed what we pray for, is that both parties to whom this appeal has been addressed will accept, because if they do we truly believe a new era can open in the Middle East."

Major Legge-Bourke (C.) recalled that in 1954 he was in considerable disagreement with the policy then outlined by the Government, but to-day he believed it was the duty of all of them, no matter what might have been their disagreements in the past, to put the most important issue first. That issue was quite simply—whether Britain stood for the preservation of the rule of law or not. He believed that what the Prime Minister had said was what he should have said, and he entirely supported it. Major Legge-Bourke added: "For Heaven's sake, let Britain speak with one voice."

Mr. Gaitskell reiterated that he did not believe any useful purpose would be served in continuing the debate at the moment, and that it was desirable that they should have time to reflect before saying anything further. He put the following two questions, however, to the Prime Minister (1) "Would the Prime Minister and the Leader of the House give an undertaking that we shall debate this matter to-morrow? (2) Would the Prime Minister also give us an assurance that until either the Security Council has reached a decision, or the House has had an opportunity of discussing this further, no further physical action will be taken by H M. Government?"

Sir Anthony Eden replied: "As regards a debate, I naturally conform to what is suggested On what I said about time, I have asked for an answer to these communications within 12 hours and it would not, therefore, be possible for me to give the undertaking the Leader of the Opposition asked for about action. The communications were made to the Governments about the same time as I rose in the House."

In reply to a further request by Mr. Gaitskell for an undertaking that no further physical action would be taken until the House had discussed the matter, the Prime Minister declared: "I am sorry I cannot give that undertaking. I must explain why. Fighting is going on at this moment in that locality—in all likelihood in the near vicinity of the Canal, perhaps at the Canal, in which we have at the moment large quantities of shipping. That is why we have thought it absolutely imperative to ask for this temporary measure to be taken now, and why we have asked for the reply by the early hours of to-morrow morning I hope they will reply to-night. Therefore, with the best will in the world, I cannot give the undertaking that we would not take action."

Mr. Sydney Silverman (Lab) supported Mr. Gaitskell's request for an undertaking by the Prime Minister not to take any action pending a full debate by the House. He added "Surely no-one in the House, whatever their views, is anxious to set the Middle East or the world afire without a few moments' pause for reflection. There are many Members with strong feelings on this matter. Mine are well known, I am sure that the interests of Israel, Egypt, the Middle East, Britain, and the world, would be better served by preserving peace in this area and in the world than by anything else that could be done"

Mr. Stanley Evans (Lab) asked for "a conditional undertaking that unless there was some special incident the Prime Minister would withhold military action until the House had had an opportunity of discussing it."

Sir Anthony Eden replied: "The difficulties are not all explicable easily. There is not only the shipping—there is also the question of stopping this fighting before it spreads more widely, and that really does affect both sides. I do not want to exaggerate too much in what I say. I want to keep the balance even. But it is fair to say, as everyone knows, that, in bombing arms, one side is well away in advance of the other. I do not say that this should weigh heavily with us. It is difficult to know what things should weigh in a situation like this. It is certainly an element in the situation which made us and the French Government come to the conclusion I announced to the House It is impossible for me to vary that Anglo-French conclusion which we agreed to."

Mr. Denis Healey (Lab.) said that there were many Members—and he was one—who had a feeling, from what the Prime Minister had said so far, that the British and the French Governments were taking the law into their own hands "Was the U.S. Government consulted when the British and French Governments took the decision which the Prime Minister has announced, and did it approve of that decision? Has the Prime Minister consulted our allies in Jordan and Iraq on the steps he proposed to take, and did they approve? Have Commonwealth Governments been consulted on this decision, and have they approved? The Commonwealth is vitally concerned, no less than we are, in the safety and security of the Canal. Finally, the British people are also vitally concerned to prevent a step being taken which might lead to general hostilities between this country and the whole of the Arab world, with a majority of the United Nations opposed to us. I cannot feel that the Prime Minister has done his duty if he has taken this step without prior consultation with the Opposition

"The step which the Prime Minister has threatened to take is a military ultimatum by two Governments against two others. If the Prime Minister is correct in suggesting that unfavourable replies may be received, and that therefore action may be taken even during the night, we may have the position to-morrow in which British tanks are shooting women and children in the streets of Port Said. If this is not the case, how do the Government propose to implement their threat to occupy the Canal? This after all is the subject we are all discussing—the question of peace and war. I think it would be both a crime and a tragedy if, at the moment when freedom and national independence are being suppressed by Russian tanks in Hungary, this Government did anything, without international support, which led to a similar impression being given to world opinion."

Sir Anthony Eden replied that the Government had been in close communication with the U S Administration and with the Security Council, to whom they had sent their proposal. They had also kept in close consultation with Commonwealth Governments. Responsibility for the decision, however, was that of the French and British Governments.

Mr. Godfrey Nicholson (C.) thought that the Government would be held very much to blame unless they took urgent and quick steps to put out the conflagration "If a house was on fire time should not be spent on discussing which fire brigade should put it out." The Prime Minister would have the support of the whole country in taking the most immediate and urgent steps to preserve peace and put out the conflagration.

Mr. John Hynd (Lab.) asserted that for a long time the Prime Minister and the Government had been determined to have some excuse for landing British troops in the Canal area The Opposition were not so simple as to believe that that was not in the Government's mind in connexion with the ultimatum. The Government should give an assurance that, in the event of the landing of British troops, and immediately there was a withdrawal of Israeli troops beyond the frontier or the situation was settled, the troops would be withdrawn from the Canal irrespective of the situation between Britain and President Nasser *vis-à-vis* the Canal.

When **Mr. Winterbottom** (Lab.) expressed the hope that the occasion would not be used to keep British troops in the Canal zone and in furtherance of the dispute between Britain and the Egyptian Government. **Sir A. Eden** indicated assent, and said he had answered the point in his earlier statement.

After the resumption of the debate the Prime Minister made a further statement to the House.

Sir Anthony Eden said: "The Tripartite Declaration in relation to Egypt has clearly to be governed by the fact that Egypt has taken as its stand that it would not accept the implications of the declaration. Besides the denunciations of the Egyptian Press and the statement by the [Egyptian] Foreign Minister that it was a 'unilateral declaration' giving rise to 'no contractual obligations and giving the Three Powers no rights to intervene,' in the agreed interpretation of the 1954 treaty Egypt has insisted specifically that we would not have the right to reactivate the base in the event of an attack on Egypt or any other Arab State by Israel The only implication of that must surely be that they did not want the Three-Power Declaration to apply to them over a conflict with Israel . . .

"Members have talked about whether British troops and other troops would be withdrawn once the present hostilities have ceased. Of course that will be so. Certainly it is the Government's intention that they would be withdrawn as soon as possible. The last thing the Government want is an enduring commitment of that kind. It is intended that their presence at key points should be merely temporary. The purpose of the intervention is to seek to separate the combatants and remove risk to free passage through the Canal, and reduce risk for those who are voyaging through the Canal. The Government hope that compliance by both sides with their appeal will enable

these objectives to be secured rapidly. Then, clearly, there will be no need for anything but token forces to make sure that what is acceptable to both sides is carried out These will be withdrawn the moment a settlement has been arrived at.

" I have been asked what guarantee could be given to Israel, if she complied with the Government's appeal, that she would not again be subject to continued threats. The answer is that I am not in a position to give such a guarantee. I devoutly wish I were, but I cannot On the other hand, the object of what we are seeking to do now is to try to bring about the immediate cessation of hostilities before the situation grows more dangerous from any point of view, owing to air activity increasing on both sides An immediate cessation of hostilities should be to everyone's interest, including Israel.

" It is on that basis we have addressed the appeal to both parties Then we think further efforts can be made to try to find a permanent settlement of this terrible problem which has haunted us for so long—relations between Israel and the Arab States. That is the object we have in mind. I admit the decision that we took with the French Government lays a heavy responsibility upon us We thought there was a fair and reasonable chance that these proposals might be accepted. If they are, they offer by far the best opportunity of preventing this from growing into a far more dangerous situation affecting the whole Middle East. The Opposition may, if they like, impugn our judgment. I hope they will not impugn our motives, because that was the decision we took and the spirit in which we took it."

Mr. Gaitskell spoke as follows · " I said earlier that we warmly welcomed the reference of this dispute to the Security Council. But I had supposed, that having been done, that we should have heard from the Prime Minister, not of independent action taken by Britain and France, but of the kind of proposals which Britain might be making in the Security Council. I had expected that we would be proposing that the Israel troops and forces should be withdrawn to the Israel frontiers. I say at once, I do not think it would have been right for us to content ourselves with that unless we had said at the Security Council something else—namely, that experience had now shown that it was not reasonable to expect the Israelis simply to return to the *status quo ante*, that their security was such that it devolved on the U N. to tackle once again this terribly difficult Arab-Israel problem.

" We have to recognize, whatever the outcome might be, that the situation in which Israel is placed is becoming impossible. Since we met this afternoon, the news has come through that the U S delegate has in fact proposed that the Israel troops should be withdrawn, not 10 miles from the Canal, but within their own frontier Will the Foreign Secretary say whether that was agreed with the United States, or what exactly is the divergence between us ?

" The difference between us here . . lies in the action announced by the Prime Minister at the end of his statement. Our first criticism is that it was taken independently by Britain and France at the very moment when this dispute was being referred to the Security Council. I cannot see any possible justification for that. Surely the right thing to have done would have been to wait for the debate in the Security Council which is taking place this afternoon."

Amidst Ministerial laughter and cries of dissent, Mr Gaitskell continued : " When Members laugh at the suggestion that we should await the outcome of a debate in the Security Council, I wonder if they realize what conclusions people who listen to them draw ? They draw the conclusion that Members who behave in that way have simply lost faith entirely in the United Nations. There is nothing in the Charter that justifies any nation appointing itself as world policeman. The great danger of the situation is that if we can do this, so can anyone else.

" My second criticism is : I cannot see any legal justification for what it is proposed to do. The Prime Minister has given a number of reasons why he felt that the Tripartite Declaration no longer applied He said that Egypt had denounced it. It is very odd he should have left it until tonight to come forward with that argument.

" The third criticism is that we are not satisfied with the degree of consultation that appears to have taken place either with the Commonwealth or the U S.A. I want to ask the Government whether other members of the Commonwealth were consulted on this, and what their reactions were. If it comes to a vote in the Security Council, can we be sure the U.S A. will side with us, or is Britain doing it off her own bat ?

" No one would accuse me of a lack of sympathy for Israel. But I am bound to say that a proposal which is intended to stop the fighting, and involves the withdrawal of the Egyptians 10 miles further within their own frontier, and the withdrawal of the Israelis 10 miles from the Canal zone—which still leaves them at some points 100 miles inside Egypt—is hardly one which I should have thought would have commended itself on equitable grounds.

" The first thing I would do, and that is what I am asking the Prime Minister to do, is to refrain from using armed force until the Security Council have finished their deliberations.

" The only other argument which the Prime Minister has put forward is that it is necessary to do this in order to protect British lives and ships in the Suez Canal Very well, but supposing the news comes through that the Israeli forces are being withdrawn towards the Israel frontier—that they are far more than 10 miles from the Suez Canal Is it still the intention of the Government, where there is clearly no danger whatever to British lives and shipping, to carry on with their ultimatum to Egypt and Israel and impose force if the ultimatum is refused ? I ask the Foreign Secretary this because I understand that in Jerusalem the Israelis have issued a statement saying that this is not intended to be more than an attempt to wipe out the bases from which these [*Fedayeen*] raids have been taking place, and that they intend to withdraw afterwards. If that is the case, how can the Prime Minister possibly justify intervening when the Israelis are no longer near the Canal at all ?

' In international law I believe there is provision, if the local authorities cannot maintain law and order, for a Government to step in and rescue their own nationals. But if that piece of international law is so interpreted as to justify armed intervention and an ultimatum of this kind announced this afternoon, I conceive that it could be used in all sorts of circumstances, and greatly to our detriment in all parts of the world. I should have thought that if this were the case, the Americans themselves would also be concerned with the safety of their nationals and shipping. Why have not they taken action of this kind ? They have been content to tell their nationals to come home They have been content to warn their shipping and personnel. I cannot see, in what has happened so far, any possible justification for the use of force which we have heard about this afternoon.

" The last thing is this—the Prime Minister has not consulted the Opposition. We have had no discussions with him. I do not blame him for that—he had very little time—but he made no attempt, if he wished to have a united country on this issue, to find out if it was possible . . . If the Prime Minister is unable to give the undertaking the Opposition want, which is a reasonable one in view of what is happening in the Security Council, then, on the ground that the Opposition do not think it right that this country should be put in grave danger of being involved in war, we shall have to divide the House."

Mr. Patrick Maitland (C.) said that this was not a case of war or peace, but of law and peace The U N. had been ineffective over and over again. There were phrases in the U.N. Charter which could be cited in support of the Government The public as a whole would be heartily relieved that at last there were Governments prepared to take some action to defend an international interest.

Mr. Christopher Mayhew (Lab.) said the Government could not escape the suspicion that the actions they had taken were not directed towards the problem of the Israeli incursion, but rather that they were fulfilling " their long-cherished desires to regain control of the Suez Canal."

Mr. Robens (Lab.) asked the Prime Minister to say whether he had been in consultation with the U.S.A., in view of a statement from the U.S State Department that they had received no prior warning of the British and French intention to move troops into the Suez area. It was " terribly important " that the House should be united when the country was " virtually going to war." The Prime Minister could avoid dividing the House if, through the Foreign Secretary, he could say that the Government would not take military action until the Security Council had met, thoroughly discussed the matter, and come to a decision Mr. Robens added

" The Prime Minister would lose nothing by postponing this decision for 48 hours, during which time the Security Council would have made its decision. I plead with him to do it. The Foreign Secretary has the opportunity to do that now, to get this country united and not have a declaration of war—because that is what this ultimatum will mean—with half this House and half the country against the action the Government has taken."

Mr. Selwyn Lloyd (Foreign Secretary), referring to complaints from the Opposition about the Government's failure to consult them before taking action, declared · " The moment the Prime Minister had finished his discussions with the French Ministers, he at once spoke to leaders of the Opposition. This idea that the Government of the day could only take action after prior agreement with the Opposition . . " [His concluding words were drowned in uproar and violent Opposition protests]

Mr. Gaitskell said that he and Mr. James Griffiths had seen the Prime Minister the same afternoon and were given copies of the Prime Minister's statement 15 minutes before the debate. This was not consultation. He had not complained about the failure on the part of the Government to consult them, but he wished to make it plain that they had not done so.

Mr. Lloyd said the Government would do what they believed to be right for the interests of the country. It was for the Opposition to do what they thought was right If the House were divided it would be the responsibility of the Opposition, and in the present serious situation that would be something which the country would not forgive.

The position as known to the Government was that Israeli forces were within a few miles of Suez. There had been an increase of air activity, and it would be commonsense to assess this as a threat to free passage through the Canal. There was a threat of conditions which required immediate action such as the Government had proposed. The proposal that the Government should give an undertaking that they would defer any action until the conclusion of the Security Council debate was an impossible and impracticable one for any Government.

" We have reserved the right," Mr. Lloyd concluded, " to take the necessary action in an emergency at the time we think fit. We have never claimed that we have acted in agreement with the U.S Government. We have certainly been in close touch with that Government throughout the controversy We have never said we have acted with their approval and authority. We believe the decision we and the French Government have had to take in our own rights is a decision in the interests of peace in that area."

The House then divided on a motion for the adjournment, the voting being 270 to 218—a Government majority of 52.

French National Assembly's Support for Anglo-French Action. - Declaration by M. Mollet.

The Anglo-French action was upheld by the French National Assembly on Oct. 30 by 368 votes to 182, the only parties opposing being the Communists and about half the Poujadist deputies. The Council of the Republic also gave its approval the same evening by 289 votes against 19.

M. Guy Mollet made the following statement:

"The aggressive policy of Egypt is known to the National Assembly. For many months military aid by the Soviet Union and its satellites has enabled Egypt to expand her armaments considerably, to the detriment of her economy and of the already miserable living standards of her population . . Recent developments have given clear evidence of Colonel Nasser's expansionist aims—the renewal of guerrilla attacks against Israel's frontiers, followed closely by the setting-up of a single military command by Egypt, Syria, and Jordan, thereby increasing the menace already weighing upon Israel

"Israeli forces crossed the frontier yesterday and are advancing towards the Suez Canal . . . We know the people of Israel—we know their resolution, the courage with which they till their difficult soil, the courage with which they maintain the independence of their country while surrounded by hostile peoples We know their attachment to the Rights of Man and to the fundamental principles of democracy. We know, finally, the repeated provocations to which Israel has had to submit from certain Arab countries. We know that these countries, acting more and more under Egyptian instigation, have openly proclaimed their intention to 'wipe Israel off the map.'

"We also know the regime of Colonel Nasser . . . We have not forgotten his repeated refusal to allow the free passage of Israeli shipping through the Suez Canal, in defiance of the United Nations Three months ago he seized the Canal in violation of international treaties. We know his intrusion into the Algerian drama . . . In view of all these facts . . . the French Government cannot see its way either to condone or to condemn Israel's action. In accordance with the U.N. Charter we have supported the U.S. demand to acquaint the Security Council with the situation I hope the Security Council's decision will be taken after an objective study of all aspects of the problem, and not only of the events of the last few hours.

"Must we, however, have sole recourse to the Security Council only? The slowness of its procedure would make such a decision unwise, apart from the fact that immediate repercussions are to be feared. The battles which are impending will be fought in the Suez Canal area, and security of transit and the free passage of shipping through the Canal are at stake Our first concern must be the restoration of peaceful conditions in the area. The fighting is not yet on a large scale . . . and resolute action can bring about a speedy ending of hostilities while assuring the regular functioning of the Canal

"This afternoon the French and British Governments addressed a solemn appeal to Israel and Egypt calling upon them to cease all operations by land, sea and air and to withdraw their forces from the Canal Zone on both sides At the same time the Egyptian Government have been requested to allow Franco-British forces to be stationed temporarily at three points on the Canal—Port Said, Ismailia, and Suez—to guarantee the free passage of shipping of all nations If, at the expiration of the time-limit, these requests are not met, the Franco-British forces will take the necessary measures to secure compliance by either side. I emphasize that the measures envisaged are temporary. They are directed neither against Egypt nor against Israel . . .

"The French and British Governments have informed the U.S Government of their preoccupations and their decisions. I have sent a personal message to President Eisenhower explaining the situation, and I hope—and all France hopes—that the Franco-British initiative will be supported by his high authority. The French Government is conscious of the gravity of the decisions taken. It is also conscious of the gravity of the consequences which the absence of these decisions would involve"

M. Mollet concluded by stressing the complete unity of views between France and Britain and the complete solidarity between the two countries. He called upon the Assembly to signify by a "massive vote" its approval of the Franco-British initiative.

The 368 votes in support of the Government comprised 99 Socialists (out of 100), 83 Independents (out of 85), 73 M.R.P. deputies (out of 74), 30 Radicals (out of 46), 21 Social Republicans, 15 U.D.S.R. deputies, all 14 Dissident Radicals, all 13 R.G.R. deputies, 11 *Paysans*, 5 Poujadists, and 4 *non-inscrits*. The 182 opposing votes included the 149 Communists and *progressistes* and 28 Poujadists, together with a few Overseas deputies. Fifteen deputies abstained from voting, including 11 Radicals (among them M. Mendès-France), whilst 18 deputies (including six of the seven Overseas Independents and seven Poujadists) did not take part in the vote.

It was understood that the Poujadists had originally decided to support the Government on national and patriotic grounds, but that M. Poujade (who is not a deptuy) had instructed them not to do so because it was "not fitting that France should fight for the Queen of England"

M. Mendès-France, the Radical leader, issued a statement on the same date calling upon the French Government to convene a meeting of the "Big Four" without delay "to prevent a conflagration in the Middle East and to save peace." Expressing the fear that "we are perhaps on the eve of general war," he said that a conflict between Israel and the Arab States could not easily be localized, and that the existing tension about the Suez Canal, now three months' old, might "set a spark to the powder."

U.N. Security Council Meeting. - Anglo-French Veto of U.S. and Soviet Resolutions. - Calling of Emergency Session of General Assembly.

The Security Council met on Oct. 30 to consider urgently an American resolution censuring Israel and demanding the immediate withdrawal of her armed forces behind the established armistice lines. The Council meeting had been called at the request of Mr. Cabot Lodge, the U.S. representative, acting on direct instructions from President Eisenhower. In spite of British requests for a postponement of the debate the U.S. delegate insisted on an immediate vote, in which Britain and France vetoed the resolution. The British and French delegates also used the veto against a similar Soviet resolution which was subsequently presented.

The text of the U.S. resolution was as follows:

"The Security Council, noting that the armed forces of Israel have penetrated deeply into Egyptian territory in violation of the armistice agreement between Egypt and Israel, and expressing its grave concern at this violation of the armistice agreement:

(1) Calls upon Israel immediately to withdraw its armed forces behind the established armistice lines.

(2) Calls upon all members . (*a*) to refrain from the use of force or threat of force in the area in any manner inconsistent with the purposes of the United Nations, (*b*) to assist the U.N. in ensuring the integrity of the armistice agreements; (*c*) to refrain from giving any military, economic or financial assistance to Israel as long as it has not complied with this resolution.

(3) Requests the Secretary-General to keep the Security Council informed on compliance with this resolution, and to make whatever recommendations he deems appropriate for the maintenance of international peace and security in the area by the implementation of this and prior resolutions."

Mr. Cabot Lodge declared that the Israeli military operations against Egypt had made it necessary for the Security Council to take urgent action, and that failure by the Council to react at this time would be "a clear avoidance of its responsibility for the maintenance of international peace and security" The U.N. had a "clear and unchallengeable responsibility for the maintenance of the armistice agreement," and the U.S. Government felt it "imperative" that the Council should act in the most prompt manner to determine that a breach of the peace had occurred, to order that the military actions started by Israel should cease immediately, and to make clear its view that the Israeli armed forces must be immediately withdrawn behind the armistice lines. "We, as members of the Council," Mr. Lodge declared, "accordingly should call upon all U.N. members to render prompt assistance in achieving a withdrawal of the Israeli forces. All members specifically should refrain from giving any assistance which might continue or prolong the hostilities. No one nation should take advantage of the situation for any selfish interests. Each of us and all members of the U.N. have a clear-cut responsibility to see that the peace and stability of the Palestine area are restored forthwith. Anything else is an invitation to disaster in this part of the world." Mr. Lodge added that the U.S. resolution, if promptly adopted, would effectively deal with the Israeli penetration of Egypt, and that if it was complied with by Israel the basis for the 12-hour "ultimatum" by Britain and France would disappear. This did not imply that the U.S.A. considered that the "ultimatum" was justifiable or in accordance with the U.N. Charter.

Mr. Sobolev (Soviet Union) asserted that Israel could not have attacked without "encouragement from those aggressive circles which are not interested in maintaining peace and are casting about for any available pretext to move their forces into the area." He alleged that the Anglo-French action was an attempt to take advantage of the situation to seize the Suez Canal and constituted aggression against Egypt. He therefore supported the U.S. resolution, declaring that the Council had the double duty of demanding that Egypt and Israel should cease hostilities and of warning Britain and France that they had no right to use the disturbances in the Middle East "for their own selfish ends."

Sir Pierson Dixon (U.K.) pointed out that in the British Government's view "the first consideration is that the fighting between Israel and Egypt must stop, and the second consideration that unless hostilities can quickly be stopped, free passage through the Canal will be jeopardized." It was with these twin purposes in mind that the French and British Governments had addressed the Israeli and Egyptian Governments and had undertaken to safeguard freedom of passage through the Canal by sending armed forces to occupy three key points temporarily.

After specially emphasizing the temporary character of the proposed action, Sir Pierson Dixon referred to allegations made in earlier debates by M. Shepilov (the Soviet Foreign Minister) that Britain and France were seeking an occasion to settle their difference with Egypt about the Suez Canal by force. "At that time we treated the allegations with the contempt which they deserved," Sir Pierson declared. "That is not our object, and it has never been our object. Mr. Sobolev insinuated something of the same kind and alleged that certain Powers had prompted the Israeli Government to take action against Egypt. The contrary is, of course, the truth.

"We have done everything in our power to lower tension in the Middle East, and if tension has increased, it is because, unhappily, neither Israel not its Arab neighbours has seen fit to listen to our advice and to that of our friends. Since this advice has not been heeded, the present explosive situation has arisen. How can we have confidence, much as we should like to, that some future injunction by the Security Council would in fact prove effective to deal in time—and time is of the essence—with a situation which is rapidly getting out of control?"

In conclusion, Sir Pierson Dixon contended that there was nothing that the Council could do in the present situation to help matters. He hoped therefore that Mr. Cabot Lodge would agree that nothing would be gained in the circumstances by pressing the U.S. resolution.

M. Brilej (Yugoslavia) supported the U.S resolution, accused Israel of contempt for the Security Council's authority, and denounced the Anglo-French move as "a unilateral application of force without authorization from the U N. and without any justification in treaty obligations." **M. Cornut-Gentille** (France) supported the arguments put forward by Sir Pierson Dixon and expressed the view that there was no point in considering the U S. resolution at the present stage.

When the U.S. resolution was put to the vote it was supported by seven members of the Council (U.S.A., U.S.S.R., Cuba, Peru, Persia, Yugoslavia, and Nationalist China) and opposed by Britain and France, with Australia and Belgium abstaining; because of the British and French veto it was therefore defeated. Mr. Sobolev then re-submitted the resolution in an amended form as suggested by Nationalist China and Persia, omitting clause (2) of the U.S. resolution [i.e. the clause calling on all U.N. members to refrain from the use or threat of force, as well as asking all countries to cut off military, economic, and financial aid to Israel until she withdrew behind the armistice lines]. Instead, the Soviet resolution, in addition to calling upon Israel immediately to withdraw her forces, called on "all the parties concerned" to cease fire immediately. Despite this change, however, the Soviet resolution was also vetoed by Britain and France, the voting being seven to two, with the U.S.A. and Belgium abstaining; the seven votes for the resolution were those of Australia, Nationalist China, Cuba, Persia, Peru, the Soviet Union, and Yugoslavia.

Mr. Lodge explained afterwards that he had abstained because he objected to the omission in the Soviet resolution of the aforementioned clauses which had formed part of the U S. resolution. **Sir Pierson Dixon** had previously explained that he would vote against the Soviet resolution for the same reason as he opposed the U S. draft—because "the sentiments of the proposals in themselves are unobjectionable, but they are not in our view appropriate to the circumstances prevailing."

During the debate the President of the Security Council received a communication from the Egyptian Government protesting against the Franco-British "ultimatum" and asking that the Council be convened immediately to consider "this Anglo-French act of aggression." The statement added: "In the meantime, and until the Security Council has taken the necessary measures, Egypt has no choice but to defend herself and safeguard her rights against such aggression."

In view of the Anglo-French veto against the U.S. and Soviet resolutions, the Security Council met again in emergency session on Oct. 31 and adopted a Yugoslav resolution calling an emergency session of the U.N. General Assembly to make recommendations on the action undertaken against Egypt.

At the beginning of the meeting **Dr. Hammarskjöld** (the U.N. Secretary-General) read a personal statement calling upon all member-nations to "honour their pledge to observe all Articles of the Charter," and stressing that the discretion and impartiality imposed on him could not degenerate into a policy of expediency. "He [the Secretary-General] must be a servant of the principles of the Charter," Dr. Hammarskjold declared, "and its aims must ultimately determine what, for him, is right and wrong. For that he must stand. Were the members to consider that another view of the duties of the Secretary-General than the one he has stated would better serve the interests of this Organization, it is their obvious right to act accordingly." [This statement was first taken to imply that Dr. Hammarskjöld intended to resign, but it was subsequently stated by U.N. officials that he had only desired to emphasize that if any member disliked the role he had played in the Palestine and Suez questions, they should make known their objections. Following Dr. Hammarskjöld's statement, however, Mr. Lodge, Mr. Sobolev, Sir Pierson Dixon, and other Council members assured him of their confidence and asked him to continue in office.

On the Yugoslav resolution Sir Pierson Dixon maintained that the proposal to call the U.N. General Assembly in emergency session was "out of order," and that the procedure adopted at the time of the Korean War for calling such sessions did not apply in the present case. His formal motion to that effect was, however, defeated by six votes (U.S.A., U.S.S.R., Peru, Cuba, Yugoslavia, and Persia) to four (Britain, France, Australia, and Belgium), with Nationalist China abstaining.

The Yugoslav resolution was then adopted by seven votes (U.S.A., U.S.S.R., Yugoslavia, Nationalist China, Cuba, Persia, and Peru) to two (Britain and France), with Australia and Belgium abstaining.

The Yugoslav resolution adopted by the Council [since the British and French veto did not apply to this decision] was as follows

"The Security Council, considering that a grave situation has been created by the action undertaken against Egypt, and taking into account the lack of unanimity of its permanent members, which has prevented it from exercising its primary responsibility for the maintenance of international peace and security in the present case,

"Decides to call an emergency special session of the General Assembly as provided in the General Assembly Resolution 377 (V) in order to make appropriate recommendations"

[The aforementioned General Assembly resolution had been adopted in 1950 for the specific purpose of enabling the Assembly to overcome the Soviet veto in the Security Council—see 11069 A.]

House of Commons Debate of October 31.

The House met again on Oct. 31 in a tense atmosphere to hear a further statement by the Prime Minister on the Middle East situation. Sir Anthony Eden gave the reasons which had led the U.K. and French Governments to oppose the U.S. resolution in the Security Council calling for an immediate cease-fire and the withdrawal of troops, and defended the action undertaken by the British and French Governments in the Canal Zone. Mr. Gaitskell, Leader of the Opposition, accused the Government of "an act of disastrous folly" which had undermined the Commonwealth, the Anglo-American alliance, and the U.N. Charter.

Sir Anthony Eden said "Yesterday morning the U.S representative at the United Nations tabled a resolution which was a condemnation of Israel as the aggressor in the events of the last few days We felt that we could not associate ourselves with this. We said so through diplomatic channels both in London and New York. The British Government did not, and do not, feel it is possible to pronounce in this way against one of the parties in the dispute for the action they have taken, regardless of the cumulative facts that went before.

"Throughout recent months, and particularly since the seizure of the Canal, the Egyptian Government has kept up a violent campaign against Israel, against this country, and against the West. The Egyptian Government has made clear over and over again its intention to destroy Israel, just as it has made plain that it would drive the Western Powers out of the Middle East That is the background to understanding what is happening. It is from the Egyptian policies that much of the present crisis has sprung. To ignore them is to shun reality. In those circumstances, is there any Member who can consider Egypt as an innocent country whom it is right to exonerate at the Security Council by condemning Israel as the aggressor?

"Moreover, the Security Council resolution simply called on the Israeli Government to withdraw within their own frontiers That seems to us, in all the circumstances that have preceded these immediate events, to be a harsh demand if it is to stand alone. It certainly could not meet the guarantees for Israel's security which were asked for by several Members during yesterday's debate.

"As for our own request to both sides to cease fire and withdraw, Israel accepted it and declared her willingness to take practical steps to carry it out. Press reports this morning that one column of Israeli troops has reached El Qusaila in an outflanking movement are, to the best of the Government's knowledge, true . . . The Press also reports that a column is well along the highway, built by Lord Allenby's forces during the First World War, which leads through the desert to Ismailia. Other columns are reported to be nearer the Canal, and some troops may be on it . . .

"In the light of these facts, can anyone say that we and the French Government should have waited for a satisfactory resolution of the Security Council authorizing definite action to stop the fighting? We have recently been to the U.N with proposals about the future of the Canal approved by 18 Powers representing more than 90 per cent of the traffic using the Canal. We received strong support for our proposals, but they were vetoed by the Soviet Government. Could we be expected to await the development of a similar procedure in the situation of much greater urgency which confronts us now in and about the Canal?

"The action we had to take was bound to be rapid I regret it had to be taken, but it was inescapable. We have no desire whatever—nor have the French Government—that the military action we shall have to take shall be more than temporary in its duration. But it is our intention that our action to protect the Canal and separate the combatants should result in a settlement which will prevent such a situation arising periodically. If we can do that we shall have performed a service not only to this country but to the users of the Canal. It is not tolerable that the greatest sea highway in the world, and one on which our Western life so largely depends, should be subject to the dangers of an explosive situation in the Middle East, which, it must be admitted, has been largely created by the Egyptian Government along familiar lines.

"We have witnessed the growth of a specific Egyptian threat to the peace of the Middle East. Everyone knows that to be true. In the actions we have now taken we are not concerned to stop Egypt but to stop war. None the less, it is the fact that there is no Middle

Eastern problem at present which could not have been settled or bettered but for the hostile and irresponsible policies of Egypt in recent years. There is no hope of a general settlement of the many outstanding problems in that area so long as Egyptian propaganda and policy continues along its present line of violence. What would the future of the Middle East have been if, while denouncing Israel, we had done nothing to check the Egyptian action? The only result would be warfare spreading through the whole area and a great increase in the strength and influence of the dictator's powers.

"In these circumstances, to have taken no action whatever would have been to betray not our interests alone but those of the free world, and, above all, of the Middle East itself. To have taken ineffective action would have been as great a betrayal as to have taken no action at all. We have taken the only action which we could clearly see effective in holding the belligerents apart, and which would give us some chance of re-establishing the peace of the area.

"In entering the Suez Canal area we are not only protecting a vital international waterway. We are also holding the only line of division possible between the combatants which is practicable for us. Even if it were fair, it would not have been possible to attempt to establish ourselves upon the armistice line itself. It is an irregular line with no facilities and no possibility of any limited force doing anything effective to control it, and would have been no assistance at all in respect of shipping in the Canal.

"I wish to say something about our relations with the United States in the matter. . . . It is an obvious truth that the safety of transit through the Canal, although clearly of concern to the U.S.A., is for them not a matter of survival as it is for us and all Europe, and many other countries. Mr. Dulles made this clear on Aug. 28, when he said that the U.S economy is not dependent on the Canal. Of course that is true. We must all accept it, and we should not complain about it But it is equally true that throughout all these months this fact has inevitably influenced the attitude of the U.S.A. to these problems, as compared to that of ourselves and the French. If anyone says that on that account we should have held up action until agreement could be reached with the U.S.A. on what to do, I can only say this would have been to ignore what everyone knows here, and in the U.S A., to have been different approaches to these vital Middle Eastern questions Of course we deplore it, but I do not think it can carry with it the corollary that in all circumstances we must secure agreement with our American ally before we can act ourselves in what we know to be in our own vital interests."

Replying to an interjection by **Mr. Philip Noel-Baker** (Lab), who asked whether the Government, in their conversations with the U.S. Government on Oct. 28-29 on the implementation of the Tripartite Declaration, had mentioned their plan, the **Prime Minister** said . "I made it quite plain that the decisions were arrived at on our responsibility and that of the French Government yesterday." When **Mr. Noel-Baker** retorted that the Prime Minister was now admitting that H.M. Government had conversations with the U.S. Government on Oct. 28 and 29 about the carrying out of the Tripartite Declaration, but had never mentioned the plan now executed, **Sir Anthony Eden** declared: "There have been a number of conversations between the U S Government and ourselves, and we have expressed our preoccupations and our reasons, dating right back to the Canal seizure, why the matter seemed to us of such overwhelming importance We have done that at all stages. Only yesterday there were talks between the Foreign Secretary and the U.S. Ambassador about action to be taken in the Security Council. . . . I repeat that the decisions taken by the French Government and ourselves were decisions which we thought it right to take at once, in the interests of our own nationals and our own shipping."

Mr. Noel-Baker asked: "Were we not bound by common obligations with the U S.A. in respect of this matter, and did we not fail to inform the U.S.A. of what we intended to do outside the Tripartite Declaration?

Sir Anthony Eden replied: "The moment the French Government and ourselves had reached the conclusions on what we should do, I authorized the dispatch of a full message to the U.S A. explaining our action before even coming down to this House. Earlier yesterday I also informed the U.S. Government of our reasons for concern, and of our anxieties whether the Security Council was the method to deal with the increasing dangers which faced us. I do not think on either of these points I have anything to repent, because it is sometimes a Government's duty to take decisions for its own country.

"I was very glad to see that Mr. Cabot Lodge, the American representative on the Security Council, said yesterday, on this very question, that it took more than one question, important though it is, to upset relations between the U S.A., Britain, and France And that is true. Throughout this period, and longer still, in the communications we have had with the U.S.A. we have done our best to make it clear why we thought that decisive action would have to be taken. While we agreed to the Security Council, we also explained that experience shows that this procedure was unlikely to be either rapid or effective.

"I conclude by repeating that our request to Egypt is still open. We are still convinced that this offer is the best opportunity there is of bringing hostilities rapidly to an end, and of preventing the conflagration from spreading widely."

Stormy scenes occurred after **Mr. Gaitskell** intervened to say: "There was at least one extraordinary omission from the Prime Minister's statement. We are still left to some extent in the dark as to what H.M. Government have done. I must ask the Prime Minister now to repair the omission from his speech and to tell us, 'yes' or 'no,' whether, on the expiry of his ultimatum, instructions were given to the British and French forces to occupy the Canal Zone. **Sir Anthony Eden** replied: "If Mr. Gaitskell will be good enough to read the statement which the French and our Government issued yesterday, he will see perfectly clearly that we made it apparent that if agreement was not reached we should consider ourselves free to take whatever action may be necessary."

Mr. Gaitskell: "Of course we all know that is true, but what the Prime Minister did not say in that statement was whether such action would be taken immediately on the expiry of the ultimatum."

Before the Prime Minister could answer, **Mr. Callaghan** (Lab.) said: "I would like to ask the Prime Minister a question that 50 million people in this country will want to know: Are British troops engaged in Egypt at this moment? Have they landed, and where are they?" Amidst loud and prolonged Opposition cries of "Answer", which prevented the Prime Minister from making himself heard, **The Speaker** called for order, after which **Sir Anthony Eden** replied: "I am not in any way prepared to give the House any details of the action which will follow the statement I clearly made yesterday—that British and French forces will intervene in whatever strength will be necessary to secure compliance."

Mr. Gaitskell: "This is really a fantastic situation. Not only Opposition members but the whole House and the whole country are waiting for an answer to this question. I ask the Prime Minister again—I do not ask him to disclose troop movements—I ask him simply to tell the House, the country, and the whole world, whether the decision has been finally taken that British and French troops shall invade the Canal Zone."

Sir A. Eden: "I made perfectly plain yesterday that if we did not receive the answer we would take military action at the expiry of the period. I am not going to give the House, and the Leader of the Opposition does not ask it, any kind of account as to what action or what those plans with our Allies might be, but I tell him—we stand by what we said, and we shall carry it out."

Mr. Gaitskell "I am at a loss to understand why the Prime Minister should be so reluctant to give this essential item of information frankly and freely to the House of Commons I can only assume that this decision has been taken, and that therefore British and French troops are at any rate on the move. If that is not so the Prime Minister ought to say so, and we can then conclude that there is still time to prevent fighting He is evidently reluctant to do that. I think Members must draw their own conclusion. All I can say is that in taking this decision, it is the view of the Opposition that the Government have committed an act of disastrous folly whose tragic consequences we shall regret for years, because it will have done irreparable harm to the prestige and reputation of our country. This action not only involves the abandonment, but a positive assault upon, the three principles which have governed British foreign policy for the last 10 years—solidarity with the Commonwealth, the Anglo-American alliance, and adherence to the U N. Charter.

"It is a remarkable and most distressing fact that Australia was unable to support us in the Security Council. Australia has said that she is still not in sufficient command of the facts to be able to make a full statement. It does not seem that all the close consultation has been so very close after all. The Canadian Government, through its Foreign Secretary, has expressed in the coldest possible language its regret at the situation which has arisen. It also made it plain to Sir Pierson Dixon [U K. representative at the U.N.] that it was not consulted in advance before this ultimatum was sent. In New Zealand the Prime Minister has said, in substantially the same words as the Canadian Foreign Minister, that he regrets the situation which has arisen and was unable to say whether or not he supports the United Kingdom. This is a tragic situation, and I cannot but feel that Conservative Members, some of whom I know to be sincerely concerned with the maintenance of this unique institution, the British Commonwealth, must feel deep anxiety at what has happened.

"The second pillar of our foreign policy I described as the Anglo-American alliance Some of us on both sides of the House have worked hard in the last 10 years to strengthen and improve that alliance, and to us at least this is a terrible situation. Of course it is true that from time to time there have been disagreements between America and Britain, but in the light of what has happened in the last 24 hours I am bound to conclude, along with the American Press, that a far greater strain has now been placed on the alliance than ever before.

"We found ourselves in the position of actually vetoing a U.S. resolution in the Security Council. If it is true, as the Prime Minister has said, that the U.S resolution contained a condemnation of Israel, why did not the Government move a different resolution which excluded that part of the U S. resolution but adopted the other part? Surely that would have been possible; and it would have been extremely likely that in these circumstances there would have been unanimous support for it. But no such action was taken, and we are bound to draw the conclusion in the light of what Sir Pierson Dixon said—that the reason why no such amended resolution was put forward by France and Britain was that it was the view of their representatives that it would serve no useful purpose at this stage, as their countries were about to take direct action to intervene. I do not think there is any doubt that the Prime Minister's flimsy explanation of why we would not support the U.S. resolution is of no value whatever. It is perfectly clear that no opportunity whatever for discussion with the U S.A. was allowed or permitted.

"But even worse is the third pillar of our foreign policy which has now been so wantonly attacked by the Government—our support for the United Nations. Indeed, it is our attack on the principles and the letter of the Charter which is the reason why our action has been

so coldly and hostilely received by both the Commonwealth and the United States. The Foreign Secretary has frequently made play with the fact that the U.N. is not much good because anything put forward is vetoed. Who was responsible for the veto this time? Only the British and French Governments. If it had not been for their action, there would have been a unanimous resolution of the Security Council. I can only describe this as a major act of sabotage against the United Nations.

"Even more serious, there is our own armed intervention. I can only say that any impartial observer must recognize that this is a clear breach of the U.N Charter. Whatever doubt there may be about the degree of aggression in the Israel invasion of Egypt, and the extent of the provocation Israel has suffered, there can be no doubt about the nature of the British and French aggression. It is clear beyond peradventure.

"The next step will be the reference of this matter to the U.N Assembly. I wonder if the Government can give us any idea of how many members of the Assembly they think they can enrol in support I very much doubt if Britain and France will have a single supporter. It is, I am afraid, only too obvious that if this matter is pressed in the U.N. Assembly, as it will be, there will almost certainly be a two-thirds majority against us The whole power of the U.N. can be invoked to stop Britain. Is that what the Prime Minister really wants? The Prime Minister has said it was necessary to take action under international law to protect British lives and property, yet the first thing we heard was not that ships were to be protected but that they had to go round the Cape. This is frankly the flimsiest possible excuse.

"In Hongkong and Singapore there have been riots and there is a substantial Chinese population. The Chinese Government could perfectly well intervene there and say it was entitled to do so under international law to protect the lives and property of its nationals. It has been set a wonderful example by the British Government. The terrible thing about what the Government has done is that it has set such an example to every potential aggressor in the world.

"There can be no doubt at all about what the view of the world as a whole is about this decision of the Government. They look on it as a transparent excuse to seize the Canal and carry out a policy of force from which they were deterred by public opinion in Britain and the world in August and September. What the Prime Minister has said about the 18-Power proposals lends further colour to that view There have been even worse stories going around. These are that the whole business was a matter of collusion between the British, French, and Israeli Governments It is also believed that the 12 hours' ultimatum was decided on precisely to prevent public opinion operating effectively to stop the action.

"What will come out of this? I cannot believe that it is in the true interests of Israel to be associated with the reoccupation of the Canal Zone. In the long run the people of Israel have somehow to live with the Arab States They are entitled to ask for security, and again and again the Opposition has asked that for them. But if they are looked upon simply as stooges of Britain and France, and as a kind of advance guard of Western imperialism, any prospect of peaceful settlement with the Arab States is gravely endangered. I appeal to the many friends I have in Israel to accept the resolution of the Security Council in so far as it calls on them to withdraw their forces within their own frontiers, and to do that forthwith.

"It is surely abundantly clear that the whole of the operation is simply another effort to dictate a policy on the Canal issue just at the point when a negotiated settlement appeared to be in sight . . . There are wider implications This reckless and foolish decision has been taken just at the moment when events in Poland and Hungary have given the free world its greatest hope and encouragement in 10 years In the battle of ideas we could legitimately feel that the ideas of democracy and liberty had won an exciting victory Now this act of the Government has done untold damage to democracy's cause throughout the world, and above all in the vital uncommitted areas of the world."

Amidst scenes of uproar, in which Conservative cheers for the Prime Minister were countered by anti-Government demonstrations from the Opposition benches, Mr. Gaitskell continued: "Conservative members may cheer their Prime Minister, jeer the Opposition, and laugh at their faith in the United Nations. Some of them may rejoice in thinking themselves back in the old days of the 19th century, but all this will not stop the wave of hatred they have stirred up. It will not rebuild the shattered fabric of Anglo-American understanding, restore the unity of the Commonwealth, or make up for the vital blow the Government has dealt the United Nations

"We as the Opposition have to consider what attitude we should adopt to the war on which the Government have so recklessly embarked. We understand the importance of the decision we have to take. We were not consulted by the Government in the matter, they did not seek our consent, and they indicated last night that the Opposition were completely free to make their own decision. I must now tell the Government and the country that we cannot support the action they have taken, and that we feel bound by every constitutional means at our disposal to oppose it. I emphasize the word 'constitutional' We shall, of course, make no attempt to dissuade anyone from carrying out the orders of the Government, but we shall seek to influence public opinion to bring every pressure to bear on the Government to withdraw from the impossible situation into which they have put us.

"As a first step to that end we shall move a vote of censure in the strongest possible terms tomorrow. We shall do this because we consider it our duty in the present crisis both to do everything in our power to save the country from the disasters we believe will follow from the course set by the Government, and to proclaim to the world loudly and clearly that there are millions and millions of British people —as we believe, the majority of the nation—who are deeply shocked by the aggressive policy of the Government and believe it both wise and right to stand by the United Nations, the Commonwealth, and the U.S alliance. We shall do this because we believe there are millions of people who think that way and have lost all faith that such policies can any longer be pursued by the present Government"

In the further debate **Viscount Hinchingbrooke** (C.) strongly supported the Government's action and expressed "profound feelings of disgust and degradation" at Mr Gaitskell's speech. "If we had not acted in this forthright way in advance of the Security Council," he declared, "Egypt and Israel would have been tearing at each other's throats today, instead of which British and French forces are placing themselves four-square across the Suez Canal to prevent these nations from engaging each other."

Mr. Arthur Henderson (Lab.) said it seemed as though the Government had completely lost faith in the U N. as an instrument for solving international problems, and that they had done something "which may destroy the moral leadership we have exercised for many years" Their action was "wrong morally and wrong legally" and they stood "condemned at the bar of world opinion"

Mr. Harold Lever (Lab), on the other hand, while expressing sympathy with the principles enunciated by Mr. Gaitskell, declared that he had drawn different conclusions. He denied that there was any legal or moral authority for the view that because Israel had crossed her own frontiers into Egypt she was an aggressor within the meaning of the Charter or of international law There was no rule of international law, good sense or morality which compelled the victim of aggression never to counter-act for its protection into the territory of an aggressive opponent The action of the Israeli Government had been dictated by the necessity for survival

He was relieved (Mr. Lever went on) that the Government had declared that, in their view, the Tripartite Declaration was not relevant to the present situation He could not see public opinion approving of British troops moving to the aid of Colonel Nasser and protecting him from the Israeli Army He also supported the Government in their use of the veto against a resolution which sought to brand Israel as an aggressor Colonel Nasser was a great force for conflagration, war, distress, and destruction in the Middle East, and he [Mr Lever] would welcome any measure which helped to bring him down. But he could not support the Government in their present military action, which was a breach of the U.N Charter

Mr. Desmond Donnelly (Lab.) said that this was "the blackest day in the history of Britain since Munich, with this difference—at that time we had a telegram of congratulations from Roosevelt" He believed that one of the reasons for the Government's action was that the Prime Minister, a genuine believer in collective security, had "become obsessed by the events of the 1930s and was still re-fighting the same battles in 1956" The Prime Minister imagined that Nasser was Hitler, but Nasser was something much less evil and much less significant—"the political barrow-boy of the Middle East"

Mr. Rawlinson (C.) said that he was glad that Israel had "grasped the nettle," and that she was fully entitled to embark on a defensive war. Commenting on Mr. Gaitskell's reference to "collusion," he asked: "What authority has Mr Gaitskell got for 'stories going round'?" When **Mr. Robens** (Lab) said that the source was an American newspaper, **Mr. Rawlinson** retorted that they were entitled to expect the Leader of the Opposition to do better than use "tittle-tattle from American commentators."

Mr. Philip Noel-Baker (Lab.), winding up for the Opposition, said it was tragic that the House should be speaking to the nation and world with a disunited voice, and that "after three months of hostile propaganda against the United Nations by Ministers and their supporters, Britain should now have challenged the whole system on which the hopes of stable peace inevitably depended." The Prime Minister had "wiped out the Tripartite Declaration with meaningless excuses" and had treated the U.S.A and President Eisenhower as though they did not exist. The proposal made to Egypt and Israel was "grotesque and unjust," since it meant that Israel had the right to keep her troops 100 miles inside Egyptian territory while Egypt had to withdraw 120 miles inside her own territory.

Britain's veto of the Security Council resolution (Mr. Noel-Baker went on) was "a declaration by ourselves that we were aggressors" and marked "a black day in British history." If Britain had voted with the U S A, Australia, and other friends, action in the Security Council would have been swift and effective The Council would have called upon Israel to withdraw. If not, the countries could have withdrawn their ambassadors, then cut communications, and, if this had not produced results, could have imposed a blockade of Israel

In conclusion, Mr. Noel-Baker appealed to the Government to cease their action, to get Israel to withdraw, and to propose in the Security Council the creation of a broad neutral zone around Israel's borders policed by the United Nations

Mr. Selwyn Lloyd, replying for the Government, pointed out that they had been trying for months and years to get more international personnel guarding the Israel-Arab frontiers, but had not succeeded He stongly denied Mr Gaitskell's allegation that the Government's action was a violation of the U.N. Charter. The effect of the Charter was that force might be lawfully used on the express authority of the United Nations or in self-defence "Self-defence undoubtedly includes a situation where the lives of the State's nationals abroad are in imminent danger. Mr. Gaitskell has suggested that armed intervention by the Chinese Government in Hongkong or Singapore

would be justified. But these sort of local disorders are not comparable to the dangers existing in the Canal Zone. It would be a travesty of the Charter to say that no intervention should take place until nationals are actually being attacked and perhaps killed. There is an imminent threat to British nationals, to British ships, and to the Canal itself, and it is to protect all these by keeping the peace that the Government were acting."

Defending Britain's action in vetoing the U.S resolution in the Security Council, Mr Lloyd declared that the effect of that resolution was to pronounce judgment at once, and to pronounce it against Israel The issue, however, was not as clear as that, and the measures proposed, if taken in isolation, were clearly insufficient to deal with the problem. He did not believe that, had the American resolution been passed, the Israeli forces would have retired without obtaining any assurance and guarantees for their future against the Egyptian threats. The Government therefore did not feel that the U S resolution was an effective way of achieving the immediate objectives, their disagreement being "on the method rather than the principle."

Mr. Gaitskell had also criticized the Government because they had not had adequate consultation with the Commonwealth. But the reason why this specific course of action could not be put to the other Commonwealth Governments was that it had only been decided shortly before the Prime Minister informed the House In an emergency, which this was, he would not have though that anyone would have denied that it was not practical to have prior agreement

Repudiating the suggestion of collusion, the Foreign Secretary said that this had been Cairo Radio's line every time there was a border incident involving Israel. He added "It is wrong to state that Israel was incited to this action by the Government There was not a prior agreement between us about it" The Israeli mobilization had given some advance warning, and the Government had urged restraint and had drawn the attention of Israel to the consequences of any attack on Jordan. When Israeli forces moved into Egypt, however, the Government felt that there could be no delay.

Reiterating that the British and French Governments intended their presence in the Canal Zone to be temporary, Mr. Lloyd said. "We shall not take advantage of it to impose our wills on other questions. When considered views are formed, I believe our action will be seen to have stopped the deterioration of the situation and to have improved the long-term prospects of a reasonable settlement."

In conclusion, Mr. Lloyd announced that Allied aircraft had begun operations against military targets in Egypt, that the operations were being strictly limited to such targets, particularly airfields; and that the civilian population had been warned to keep clear before the operation began Their aim was to obtain Egyptian compliance with the request for the cessation of hostilities, and both their extent and objectives had been limited to achieving that aim with the minimum loss of life and the minimum of destruction It was quite untrue that Cairo had been bombed [as had been alleged by the Egyptian Government]. "Our request to the Egyptian Government remains open," Mr. Lloyd concluded. "It is our hope that it will be met without the necessity for prolonged military action"

Egyptian Rejection of Anglo-French Ultimatum. - Relations broken with Britain and France. - General Mobilization and Martial Law.

The Anglo-French ultimatum was handed to the Egyptian and Israeli envoys in London and Paris on Oct. 30. Israel accepted the ultimatum on the condition that Egypt did the same, but Cairo Radio declared that the ultimatum was "unacceptable to Egypt under any circumstances" and "constitutes an attack on the rights and dignity of Egypt and a flagrant violation of the U.N. Charter."

The Cairo broadcast said that President Nasser had informed the British and French Ambassadors of Egypt's refusal to accept the ultimatum, and quoted him as saying "At a time when Egypt is defending herself against Israeli aggression, Britain and France are preparing for aggression against the victim of the attack" The President had also informed the British, French, U S, Soviet, Indian, and Yugoslav Ambassadors that "Egypt will not falter in the face of any attack and will defend her rights and honour," and had sent messages to President Eisenhower, Marshal Bulganin, President Tito, and Mr. Nehru acquainting them of the situation

On the same day (Oct 30) the Egyptian Embassy in London, on behalf of the Egyptian Government, issued a statement declaring that Israel had launched military operations in Egyptian territory "in violation of international law, the U.N. Charter, and the armistice agreement" Egypt accordingly reserved "all rights to take the measures to which she is entitled under the U.N Charter, including the right to defend herself" After accusing Israel of having misled world opinion while working out plans for a treacherous attack against Egypt," the Embassy described the Israeli military operations as "nothing but a link in the chain of aggressions extending over the last few years against the Egyptian as well as the Arab borders, the purpose of which is to create a continued state of tension and to endanger peace in the Middle East."

In a proclamation on Nov. 1, after the British and French air forces had begun operations against Egyptian airfields (see below), President Nasser ordered general mobilization, imposed martial law, and appointed himself Military Governor-General of Egypt. At the same time the Egyptian Government broke off diplomatic relations with Britain and France, whose representation in Egypt was taken over by the Swiss Government at the request of the British and French Governments. Egyptian representation in Britain and France was taken over by the Indian Government, at Egypt's request. An Egyptian spokesman at the U.N. said on the same day that Egypt considered herself "in a state of war" with Britain and France.

In a broadcast on Nov. 1, President Nasser declared that Egypt would fight "a total war from village to village" to the "last drop of blood." He accused Britain, France, and Israel of "conspiring" against Egypt and attacking her without grounds, and said that the Anglo-French ultimatum had demanded the occupation of the Suez Canal area by Anglo-French forces "at a time when navigation is continuing uninterrupted."

On the following day President Nasser announced the seizure of all property—stores, vehicles, equipment, etc.—at the British bases on the Canal, and said that it was being distributed to the Egyptian armed forces and the National Liberation Army (the para-military force organized on Home Guard lines). He claimed the value of this property as £300,000,000, but the British Foreign Secretary (Mr. Selwyn Lloyd) stated that its actual value was about £40,000,000, and that there were no guns or tanks at the bases. [The equipment taken over by Egypt consisted of vehicles, engineering and constructional equipment, and miscellaneous stores at the Base Vehicle Depot, Base Ordnance Depot, and Base Workshops at Tel-el-Kebir, and the Engineer Stores Depot and Workshops at Fanara; all these were the responsibility of Suez Contractors (Vehicles) Ltd., organized by the firms of Austins and Rootes.]

The approximately 3,000 British nationals still in Egypt included some 400 employees of the Suez civilian contractors The detention of 450 British technicians, including three of the seven general managers of the Suez Contractors' companies, was reported on Nov. 2 by the Swiss radio After hostilies had ended on Nov. 5, the British Foreign Office was informed by the Swiss Legation in Cairo that all U.K. nationals in Egypt were safe and well, and in their homes.

House of Commons Debate of November 1. - Rejection of Opposition Vote of Censure on Government.

An Opposition motion of censure against the Government was debated by the House of Commons on Nov. 1 and rejected by 324 votes to 255—a Government majority of 69. The session was marked by stormy scenes which caused the Speaker to suspend the sitting for half-the-hour—the first time a session of the House had been suspended for 20 years.

The debate began with a statement by **Mr. Head,** the Minister of Defence, who announced that the previous night bombing attacks by British aircraft had been made on four Egyptian airfields, that shore and carrier-based aircraft had carried out further attacks on other Egyptian airfields early on Nov. 1, and that H.M S. *Newfoundland* had sunk the Egyptian frigate *Domiat.*

Mr. Gaitskell asked: "Is the Minister aware that millions of British people are profoundly shocked and ashamed that British aircraft should be bombing Egypt, not in self-defence, not in collective defence, but in clear defiance of the U.N Charter? The U N. General Assembly is meeting to-day. Will he give an assurance that any decision reached by a two-thirds majority will be accepted instantly by the Government? And will he further give an assurance that pending any such decision no further military action will be taken by the Government?"

Mr. Head replied "The objects of the operations are solely aimed at one purpose—to induce the Egyptian Government to accede to the requirements put forward These operations have been restricted entirely to military targets, and the original requirement made to the Egyptian Government remains open at any time."

Mr. Silverman (Lab.) addressed the Speaker (Mr. W. S Morrison) as follows: "There is one very important practical question involved in this Some of our men may be taken prisoner by the Egyptians. If they are carrying on activities of this kind on Egyptian territory in a state of war, that is one thing, but if they are not, what is their position?"

After **The Speaker** had emphasized that it was not within his province to deal with such complex legal questions, **Mr. Gaitskell** asked the Government whether a declaration of war had been made on Egypt. **Sir Anthony Eden** replied that Government speakers would deal with all aspects of the situation in reply to the censure motion. Amidst uproar, and repeated demands by Opposition members that the Prime Minister should answer the question, the Speaker appealed unsuccessfully for calm, and, when his appeals were disregarded, suspended the sitting for half-an-hour.

After the sitting had been resumed, **Mr. James Griffiths** (Lab) moved the following motion: "That this House deplores the action of H.M. Government in resorting to armed force against Egypt in clear violation of the U N Charter, thereby affronting the convictions of a large section of the British people, dividing the Commonwealth, straining the Atlantic alliance, and gravely damaging the foundations of international order."

Mr. Griffiths said that this was for Britain "a black and tragic week." The Government, by "plunging the country into an unjustifiable and wicked war," had deeply outraged millions of people in Britain. The Prime Minister knew that his action had divided the nation more deeply and more bitterly than he (Mr. Griffiths) remembered in his lifetime. He had been present in the House when Mr. Churchill had talked of "Britain's finest hour," and he now felt deep humiliation and shame at being present at "Britain's worst hour" Mr. Gaitskell had deployed the Opposition case, which was unanswerable—that the Government's action was in violation of Britain's undertakings and pledges in the United Nations.

He (Mr. Griffiths) still believed that the greatest safeguard for Israel was embodied in the Tripartite Declaration of 1950. The Government had refused requests by the Opposition that they should enter into agreements with Israel comparable to those made with some of her Arab neighbours They had refused because they had said that the best safeguard for Israel was complete compliance with the Declaration. But now the Government had acted without consulting or even informing the U S. Government, a partner in the Declaration. Did the Declaration still stand? As a friend of Israel he said that the Government's action had been the worst thing ever done.

The Prime Minister had dealt the Commonwealth a mortal blow, and by his actions might liquidate it. How would these actions appear to the countless millions of fellow-citizens in the Commonwealth—to the millions of Moslems there and in the Colonies? It was one of the greatest indictments against the Government that it would appear to them that a powerful white country was taking armed action against a weak country of coloured people.

"For many years," Mr. Griffiths continued, "the Prime Minister has been looked upon by many people in Britain—of more than one party—as the champion of the United Nations I say to the Prime Minister that he has forfeited the trust of the millions who trusted him. He has failed to keep the faith. It has been left for the Leader of the Opposition to speak for Britain. In voting for this motion we speak for the best in Britain, and we ask the Government to get out and make way for another."

Sir Anthony Eden then moved the Government's amendment: "That this House approves of the prompt action taken by H.M. Government designed to bring hostilities between Israel and Egypt to an end and to safeguard vital international and national interests, and pledges its full support for all steps necessary to secure these ends."

The Prime Minister said: "There have been no declarations of war by us. There was also no declaration of war at any time in the Korean conflict. But the Geneva Convention applies to any state of armed conflict. We have received a formal inquiry from the International Red Cross asking us whether we will ratify the 1949 Conventions we have already signed We are replying that although certain legislation is required before we can ratify these Conventions, the British Government accept the Conventions and have every intention of applying their conditions should the occasion arise. The Egyptian and Israeli Governments have both signed and ratified the Conventions, and we shall therefore consider ourselves also entitled to receive the treatment provided by these Conventions. We are applying the provisions of the 1949 Conventions to the survivors of the Egyptian frigate. They applied in Korea although there was no declaration of war. We never admitted there was a state of war in any technical or legal sense. We are not at war with Egypt now."

Mr. Silverman (Lab.), intervening, maintained that there could be no parallel between the case of Egypt, which was a member of the U.N., and North Korea, which was not recognized by the U.N. or any nation on our side of the controversy as a State at all; therefore no question of a declaration of war could possibly have arisen. He added: "The Prime Minister has said we are not at war with Egypt. If not, what are we at with Egypt—at peace? We have delivered an ultimatum. That ultimatum contained conditions as to time. The time expired, the conditions were not accepted. It is clear in international law that in these circumstances the country which delivered the ultimatum is not entitled to carry on hostilities without a declaration of war. Since that is so, what legal justification is there for hostilities at all?"

Sir Anthony Eden, continuing after some interruptions, replied: "I wish to allay the anxiety of the House on two points I was asked. There is no declaration of war by us. Secondly, the Geneva Convention applies to any state of conflict and therefore applies in the present conditions, just as it applied in Korea. That is the position of the International Red Cross in the matter"

When **Mr. Gaitskell** asked what was the difference between war and armed conflict, the **Prime Minister** replied: "Armed conflict is a phrase I have used. There is no declaration. The important point is whether the Geneva Conventions apply to the present situation. After all the whole indignation is on: 'What about our soldiers, sailors, and airmen?' I have replied clearly that they do apply to the present situation. Therefore I have met the point raised."

Mr. Gaitskell: "Does the Prime Minister realize that we do not in the least accept his analogy of the Korean war. There was an armed attack by North Korea on South Korea, and defensive action was action taken on the unanimous decision of the Security Council. May I ask the Prime Minister to bear in mind that the treatment of prisoners in North Korea is not something which is going to commend itself to us now. Is the Prime Minister able to give an assurance, when he speaks about the status of the present situation [as] armed conflict, that any prisoners of war whom the Egyptians might capture would be treated by them as though we were in a state of war?"

Sir Anthony Eden: "The provisions of the Geneva Conventions, so far as prisoners of war are concerned, cover the present situation. We are so treating prisoners They are bound by the Geneva Conventions, and the International Red Cross is in communication with them. We are all bound—Israel, Egypt and ourselves—by the provisions of the Geneva Conventions. . . . I repeat yet again that this applies in present conditions without any declaration of war. That is the position. I say that on the best legal advice, which I have not the slightest doubt is correct."

After questioning, the Prime Minister continued: "I want to make some observations on the charges that have been made in the last few days, to reply to the invective sometimes deployed against the Government's action—action which, I repeat, we intend to be aimed at bringing hostilities to an end. In this invective there has been one notable omission To listen to some of the speeches, including that of Mr. Griffiths, one might think that the Middle East area had been securely at peace and that we and the French Government were injecting by old-fashioned imperialist methods the danger of war into an area of tranquillity.

"That ignores the whole history of the last ten years. It ignores the policies pursued by the present Government, and the Socialist Government before us, in trying to carry out responsibilities in the changed post-war conditions in an area that is vital to our interests, and also to the Commonwealth and to Europe. All these efforts have failed, and constant flurries have continued by both sides in spite of General Burns, the observers, and everything that could be done. Moreover, the Egyptians have given the world notice that they intend to encompass the destruction of Israel. For this purpose armaments are being accumulated and military conventions between Egypt and other States are being concluded.

"Immediately after the Abadan events there came an immediate reaction in Egypt—and this is how the main part of the trouble arose —the repudiation of the Anglo-Egyptian Treaty and the massacres in Cairo of which we have such a grim recollection. Just before this the Socialist Government sent large reinforcements to the Middle East, and they were right to do so. But we have the right to ask them to consider the reasons why we are sending forces there to-day to try to limit or stop hostilities The Socialist Government worked then for a new system of joint Middle East defence. We followed them in that effort. The Egyptians turned it down, but that did not prevent us seeking an agreement over the Sudan and later over the evacuation of the Suez Canal.

"If there was ever the smallest justification for a suspicion of 'British colonialism,' it surely falls to the ground in the light of these actions. What would be the fairer charge would be to say that the policy of conciliation was taken to dangerous limits, but we believe we were right to risk much to try to establish friendship and confidence and thereby build a wider area of peace.

"What then has precipitated the situation in which we consider we have been forced to intervene? The tension, in which nobody can deny that Egypt has played a leading part by acts and by propaganda in every area of the Middle East, has been increasing. I am not going to discuss the Canal negotiations to-day, but this comment in relation to the Middle East as a whole I must make. The Allied resolution was put before the Security Council embodying the 18-Power proposals which we had made much effort to get agreed. If that could have been accepted—and it would have been, but for one Power—this Canal problem itself and much of this situation, I have no doubt, would have been resolved.'

In reply to **Mr. Bevan** (Lab.) who asked how the Prime Minister connected the two matters, **Sir Anthony Eden** said: "If there had been immediate progress on that issue, I have no doubt it would have brought about a comparable relaxation in other areas of tension." After derisory remarks by several Labour Members, he added: "All I have said is to imply that if they could have carried that resolution it would, without doubt, have improved the Middle East situation I should have thought it would have been instantly obvious to anybody."

The **Prime Minister** continued: "I come back to the personal accusation that I was too much obsessed by the events of the 1930s and was, in consequence, old-fashioned. However that may be, is there not one lesson of that period which cannot be ignored? It is that you best avoid great wars by taking even physical action to stop small ones. Everyone knows that the U.N. is not yet in a position to do that. We and the French had forces available. We must face the fact that the U.N. is not yet the international equivalent of our own legal system and the rule of law.

"I admit that H.M. Government and the French Government have taken a very grave step, and it is important that the House, the country, and the world should know the objectives which we seek. This is essentially a police operation. We do not intend to stay one moment longer than is necessary. But effective action to re-establish peace will make easier an international solution to the many problems which exist in that area.

"Of course we do not delegate to ourselves any special position in that respect. On the contrary we would welcome and look for the participation of many other nations in bringing about a settlement and in upholding it. We do not seek to impose by force a solution of the Israel-Egypt dispute, or the Canal dispute, or any other dispute in that area. We do not seek to negotiate by ourselves along on any one of these disputes. The whole purpose of the Anglo-French intervention is to stop hostilities, to prevent a resumption of them, and to safeguard traffic through the Canal.

"Israel and Egypt are locked in conflict. The first and urgent task is to separate the combatants and stabilize the position. That is our purpose. If the U.N. would then be willing to take over the physical task of maintaining peace in that area, nobody would be better pleased than ourselves. Police action there must be to separate the combatants and prevent a resumption of hostilities."

The Prime Minister said that questions had been asked about the effect of the Government's action on the unity of the Commonwealth. Mr. Menzies, the Australian Prime Minister, had announced his support for Britain, and the Prime Minister of New Zealand had spoken in a similar sense and had declared that: 'The views put forward by the [U.K.] Leader of the Opposition were not the views of the New Zealand Government.'

"We have a duty, which we shall carry out," said Sir Anthony, "to restore peace and to do it as quickly as possible. We have attempted to do it in the only way in which it could possibly have been done. There was nothing in any suggestion which has been made throughout these debates which would be likely to bring an early end to hostilities except the action the Government has taken. Of course we want to go to the U.N. so far as we can. Of course we shall put our case to the Assembly today and tomorrow."

When **Mr. Robens** (Lab.) asked. "What about the decision?" the **Prime Minister** replied "I think we are entitled to judge that when we know what the decision is." **Mr. Kenneth Younger** (Lab.) asked: "Does that answer imply that, if it happens to be a decision of which the Prime Minister does not approve, he does not propose to accede to it?" **Sir Anthony Eden** replied. "We are entitled to know what we are asked to accept before we say whether we accept it or not."

After reiterating that the Government did not feel that Egypt could have called for a fulfilment of the Tripartite Declaration on her behalf "when she had so often denounced that Declaration, and had made it clear she did not want it to apply to her," Sir Anthony concluded:

"How do we envisage the future of the Middle East? Before we can answer that question we must have pacification It is a first step, an essential step; yet, important as it is, it should only be a condition for a better life in that area. The great need for the peoples of the Middle East is some form of economic improvement. It suffers from poverty as severe as any in the world. A state of war has existed in the area for the past 10 years. It has prevented the economic problems from being tackled in most areas except Iraq, which has made remarkable strides forward. Two conditions are essential. States in that area must cease to need, or feel they need, great armaments to protect themselves against each other; and the area should be sufficiently stable to encourage investment other than in the oil industry. We are convinced that if we had not taken this action, the state of war would inevitably have spread over an infinitely wider area We fully recognize the risks of the action we have taken In our full responsibility, and with full information, we believe it was the only action available to our two Governments. We stand by it, and we will see it through."

Captain Waterhouse (C.) expressed strong criticism of the U.S. attitude, declaring: "I think the U.S.A. themselves can shoulder their full share of the blame in this matter. For the last four or five years in the Middle East they have been trouble-makers rather than trouble-abaters. They have given no modicum of help to us in any of the tests we have had or any of the difficulties that have arisen. They encouraged Egypt when we were engaged in very difficult negotiations with them, condoned Persia over Abadan, and cold-shouldered the Baghdad Pact. Now we have this last series of acts by Secretary Dulles I do not know whether his thoughts were more on the expansion of oil in the Middle East or the expansion of his vote in the Middle West. Whichever it was, the result has been that we have had no support at all from the U.S.A. in these critical times."

Mr. Stanley Evans (Lab.) felt that one cause of trouble in the Middle East was Anglo-American oil rivalry. It was not realistic to expect that, in any reference to the U.N. in which British interests were concerned, Britain would get justice and fair play from the U.S. representatives. He had grave doubts about the U.N. as an impartial arbiter in international disputes. Denouncing Colonel Nasser, Mr. Evans declared. "Those who fell in the war did not die so that England should end up as a hostage to this third-rate Egyptian Hitler."

Mr. Aneurin Bevan (Lab) thought that there had never been such uneasiness in the House as now existed, or such anxiety on both sides. "There is no sense of satisfaction among the Opposition. We would much prefer that we did not have this case against the Government and that this situation had never arisen I find it hard to believe that Ministers of the experience of members of the Government could have done what they have done, or defended it so badly, unless they were in almost a distraught state of mind. I do not believe that this Government is alone in its embarrassments. It would be a great mistake for those on the Opposition side to indict the Government as though it bore exclusive responsibility for the existing state of affairs ... It would be a profound blunder if any party in the country tried to mislead the people into imagining that there is a simple solution to the problems before us.

"I have not seen from the Prime Minister in the last four or five months evidence of that sagacity and skill he should have acquired in so many years in the Foreign Office. I have been astonished at the amateurishness of his performance. There is something the matter with him. We are told that we are not in a state of war with Egypt. I have been looking up some of the precedents about this. I think I recognize some of the language in which the Prime Minister has been justifying himself."

Mr. Bevan went on to compare the ultimatum to Egypt and Israel with that given by the Germans to Belgium in August 1914 and to Norway in 1940. Amidst protests from the Government benches he declared: "We have only to substitute Egypt for Norway. It is exactly the same thing. It is the language of a bully."

Members opposite, Mr. Bevan continued, had said that the U.N. was too weak and could not be relied on. But "every gang that wanted to lynch some poor person had always pleaded that the court might not be too effective." He admitted that the institutions of the U.N. were not as effective as he would like them to be, but it was our duty to build up that strength. The Prime Minister had attempted to defend his veto at the Security Council by saying that he could not accept the condemnation of Israeli aggression. But the Government's spokesman at the Council admitted that Israel's action was aggression. The fact was that the Government's defence was confused because it had reached positions which were fundamentally indefensible.

"I do not accuse the Government of taking action independent of the United States," Mr Bevan went on "It would be a foolish thing for me to say, because I have myself been advocating independent action for some time, but rather more intelligent action. I blame them for the action itself It was the action which was wrong, not the independence. What are the Government's intentions? Do they imagine that if they overrun Egypt, that is the end of the story? Are they going to bleed Britain to death in Egypt like France is bleeding herself to death in Algeria? ... How can we hold our heads up in the counsels of the world after this? ..."

Mr. Bevan concluded It is in no sense of partisanship but with a deep sense of sorrow that I attack the Government to-night. They are not supported by the vast majority of the people of this country or the world. I beg them to retrace their steps even now. Having found that their best friends do not sustain them in this action, that their Allies are dismayed by it, that the world is shocked, it would be an act of statemanship for the Government to say 'We halt at this point, we are not going to lead mankind along this road any further.' If the Government are not able to say that, then for God's sake get out."

Mr. Butler (Lord Privy Seal) rejected Mr Bevan's accusations against the Prime Minister, saying that Sir Anthony's speech in the debate had belied Mr. Bevan's description of him as a "bully" endeavouring to cheat other nations As regards the question which had been put in the debate—whether the Government "were committing murder or waging legitimate war"—Mr. Butler gave an assurance, "after consulting the best legal experts I have been able to consult," that the laws of war applied to the situation in Egypt at the present time. The situation was governed by Article 1 of the Third Hague Convention of 1907, which said that hostilities should not be commenced without previous unequivocal warning, either in the form of a declaration of war or the use of words in the form of an ultimatum. In Oppenheim's *International War Law* it was specifically stated that failure to observe this provision did not render the war illegal, nor did it take away from the hostilities thus commenced the character of war.

"The position of the Government is this," Mr. Butler declared: "they do not regard their present action as constituting war. That corresponds broadly to the situation in Korea Nevertheless we consider that we complied fully with the spirit of Article 1 of the Third Hague Convention in warning Egypt by means of a statement of our requirements, accompanied by the additional intimation that certain points in Egyptian territory would be occupied if that requirement was not complied with."

The Opposition motion of censure was defeated by 324 votes to 255. The Government's amendment approving the policy pursued was then carried by 323 votes to 255, and the substantive motion by 320 votes to 257.

Anglo-French Air Offensive against Egyptian Airfields and Military Installations. - Destruction of Egyptian Air Force. - Landings in Canal Zone. - Allied Occupation of Port Said. - Cease-fire in Operation.

Following the rejection of the Anglo-French ultimatum, British and French air forces based on Cyprus and Malta carried out an intensive air offensive from Oct. 31 to Nov. 4 against Egyptian airfields and other military targets. This was followed by Anglo-French paratroop and commando landings in the Canal Zone on Nov. 5, as a result of which the Allied forces gained control of Port Said after heavy fighting, and also of Port Fuad, on the opposite bank of the Canal. Operations were halted as from midnight on Nov. 6-7 after both Egypt and Israel had accepted an unconditional cease-fire, and subject to the despatch of a U.N. police force to the Middle East to keep the peace between Israel and the Arab countries pending a final settlement of the political problems of the area. [The U.N. decision to raise an International Police Force for the Middle East will be given in a subsequent article on the Middle East crisis—*Ed.K.C.A.*]

Anglo-French Command established in Cyprus.

It was announced in London and Paris on Oct. 31 that General Sir Charles Keightley, formerly C.-in-C., British Land Forces in the Middle East, had been appointed C.-in-C. of the Anglo-French forces. Admiral Barjot, C.-in-C. of the French Mediterranean Fleet, was appointed as second-in-command. Subsequent announcements stated that the Allied task forces

were headed by the following officers: Naval—Vice-Admiral Durnford-Slater (U.K.), with Rear-Admiral Lancelot (France) as his deputy; Army—Lieut.-General Sir Hugh Stockwell (U.K.), with General Beaufré (France) as deputy, Air—Air-Marshal Barnett (U.K.), with General Brohon (France) as deputy.

An Allied Command Headquarters was established in Cyprus, where, by order of the Governor (Field-Marshal Sir John Harding), the radio station belonging to the Near Eastern Arab Broadcasting Service was requisitioned on Oct. 30 and put into service as a new station, the "Voice of Britain," to broadcast official announcements by the British Government in the Arabic language.

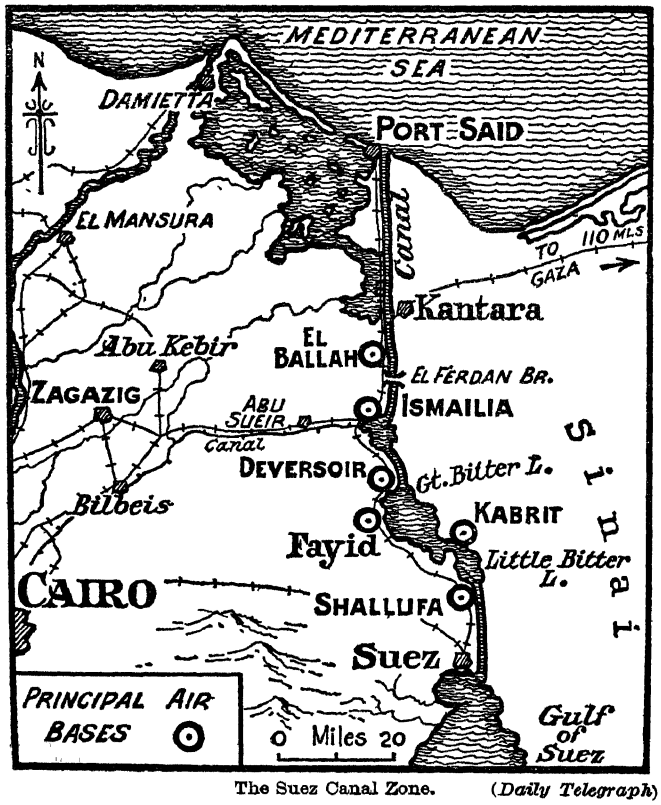
Diversion of Shipping and Air Traffic. - Ships re-routed round the Cape.

The British Admiralty warned all British vessels on Oct. 30 to avoid the Suez Canal and Egyptian and Israeli territorial waters "for the present and until further notice." As a result, all shipping—including several liners *en route* for the Canal—had to be re-routed round the Cape. [The Canal itself was closed by the sinking of Egyptian blockships during the military operations, as described below.] On the following day the British Air Ministry advised all aircraft—except those with special clearance for Cyprus—to avoid an area of 162,000 square miles in the eastern Mediterranean within a line stretching north from the Gulf of Sollum (on the North African coast) to a point 50 miles south of Crete; then eastward along a line parallel with, and 200 miles north of, the Egyptian coast; and thence northward to the limit of Turkish territorial waters.

Owing to the closing of Cairo Airport on Oct 31, B O A.C. and other airlines—U.S., French, Dutch, Belgian, etc.—had to re-route their services to Africa and the Middle and Far East B.O A.C. services to Africa were diverted *via* Tripoli and Wadi Halfa, and those to the Middle and Far East *via* Istanbul, Bahrain, and Karachi. It was at first announced that the Middle and Far Eastern services had been diverted to Beirut, but this became impossible after the Syrian Government had banned all flights over its territory after the outbreak of the crisis.

The Military Operations.

The first communiqué from Allied Forces H.Q. in Cyprus (Oct. 31) announced that "an air offensive by bomber aircraft under Allied command has been launched against military targets in Egypt." At the same time the British and French Defence Ministries announced that broadcasts and all other available means were being used to warn civilians "to keep away from all Egyptian airfields until the Egyptian Govern



The Suez Canal Zone. (*Daily Telegraph*)

ment accepts the request of the U.K. and French Governments." Throughout the entire operations these warnings were repeated at frequent intervals by the "Voice of Britain" transmitter and British and French radio stations, no military target in Egypt being attacked until ample warning had been given to the civilian population in the areas concerned.

General Keightley told press correspondents in Nicosia on Nov. 1 that his aim as Allied C.-in-C. was "to achieve only military objectives with the minimum of casualties to civilian life and property." He added: "It is indeed my aim to achieve this objective with the minimum of casualties to the Egyptian nation as a whole, both civilian and military. I shall whenever possible issue warnings to the Egyptian population which, if they heed them, will save life . . ."

Four Egyptian airfields (unnamed) were attacked by Allied planes on Oct 31, while on Nov. 1 five other airfields in the Canal Zone and the Nile Delta—Abu Sueir, Fayid, Inchass (20 miles from Cairo), Kasfareet, and Kabrit—were bombed and strafed in dawn-to-dusk low-level attacks by British and French carrier- and shore-based planes. A number of attempted interceptions was made by Egyptian fighters and anti-aircraft fire—mainly desultory—was encountered, but no Allied planes were lost As stated above, every precaution was taken to avoid civilian casualties, and Cairo communiqués that Allied planes had "carried out attacks on Cairo, Alexandria, Port Said, Ismailia, and Suez" were officially denied. On the same day (Nov. 1) the British cruiser *Newfoundland* sank the Egyptian frigate *Domiat*, which had refused to halt when called upon to do so, and which was carrying mines, the *Domiat* was sunk about 80 miles south of Suez, 69 of her crew being rescued by H M S. *Newfoundland*.

After widespread all-night raids on Egyptian airfields by R A F. *Valiant* and *Canberra* bombers, part of the Allied air effort was switched on Nov. 2 to other military targets, including a military barracks near Cairo which was left in flames after "pin-point" bombing. A small R A.F. force attacked and destroyed the transmitters of Cairo Radio, situated in the desert seven miles from the capital, the station (the "Voice of the Arabs," regularly used for anti-British and anti-Western propaganda) went off the air as a result, and transmissions were not resumed for some days.

An Allied communiqué said that photographic reconnaissance had established that about 100 Egyptian planes had been destroyed or damaged on the ground since the launching of the air offensive, of which a high proportion were MIG-15 jet fighters supplied to Egypt by Russia; in addition, a heavy toll had been taken of Soviet *Ilyushin* jet bombers, also received by Egypt from Communist sources. Cairo communiqués, on the other hand, claimed the destruction of "72 enemy planes," and also the sinking of a British warship and a troop transport.

An Egyptian blockship, apparently held in readiness by the Egyptians to sink in the Canal and block it, was attacked on Nov. 1 and believed sunk while on tow to the southern end of Lake Timseh, clear of the Canal An Allied communiqué of Nov 2, however, announced that the vessel, though damaged, had "survived the encounter" and had been "subsequently manoeuvred downstream and positioned broadside-on across the channel, here she was scuttled by the Egyptians, partially blocking the Canal."

A non-stop offensive was carried out on Nov. 3-4 in which Egyptian radar installations, coastal anti-aircraft batteries, marshalling yards, army barracks, tanks and other armoured vehicles on the roads were attacked with bombs, rocket projectiles, and cannon-fire. Military vehicles moving along the roads in the Ismailia area were shot up, the Ismailia marshalling yards bombed, an Egyptian Army barracks at Almaza attacked, and rockets and cannon-fire used to break up a concentration of tanks near the Pyramids, in which heavy losses were inflicted on Egyptian armour. The military airfield at Luxor (in Upper Egypt, 400 miles south of Cairo) was attacked by R.A F. bombers and French fighters, 18 Soviet-type *Ilyushin* bombers being destroyed on the ground. At sea, British *Seahawk* naval planes sunk three Egyptian E-boats near Alexandria and damaged a fourth. In the Gulf of Suez, a British frigate—H.M.S *Crane*—shot down an Israeli plane which was interfering with a patrol from the frigate.

An Allied communiqué of Nov. 3 said that "British and French pilots, searching the length and breadth of the country, have failed to find any but the most flimsy evidence that Egypt has any longer anything approaching an effective air force." All Egyptian airfields had been seriously damaged by high and low-level bombing and strafing, and the aircraft on them, "the majority of which had never taken off during the offensive," had been destroyed or damaged beyond repair. Loss of life had been "minimal," as the greater number of Egyptian planes wrecked on the airfields had not been manned at the time they were attacked. As the Egyptian Air Force, with one exception, had failed to establish contact with Allied planes, none of the Egyptian pilots had lost their lives. Only one Allied plane had been lost—an R A.F. *Venom* which failed to return from an attack, and which was believed to have failed to come out of a power dive

Allied Forces H.Q. announced on Nov. 4 that the Egyptian Air Force had ceased to exist, and stated that the Egyptian land forces were concentrating in the Cairo area and also near Alexandria. It was emphasized that every air attack since the start of the offensive had been preceded by photographic reconnaissance, and that "the scrupulous care exercized by the Allied air forces in selecting targets, so as to spare the Egyptian civilian population, can have no precedent in air offensive history." In many cases attacks on Egyptian armour

had not been pressed home because of the presence of civilian traffic, and as a result the Egyptians had taken advantage by deploying groups of tanks and other military vehicles in the vicinity of villages, either to escape attack or, alternatively, to bring on the attackers the odium of being responsible for civilian casualties.

It was also officially announced on the same date that air reconnaissance had shown the Suez Canal to be blocked by four ships sunk by the Egyptians at Port Said, as well as the blockship scuttled at Lake Timseh. In addition, the Egyptians had blown up the bridge at El Ferdan, south of Port Said. As a result of the blocking of the Canal, seven vessels—none of them British or French—were trapped in a subsidiary channel south of Port Said.

At dawn on Nov. 5 British and French paratroops were dropped in the Port Said area, at the northern entrance to the Suez Canal In order to avoid civilian casualties, no preliminary bombing was carried out by the Allied air forces. Later in the day three Royal Marine Commandos and supporting armour went ashore in an amphibious operation, one of the commandos being flown in by helicopters from aircraft carriers—the first time such an operation had been undertaken. Strong resistance was met both in Port Said and at Gamil Airfield outside the city, which was captured by British paratroops after hard fighting. Supporting aircraft attacked Egyptian coastal batteries, provided a fighter "umbrella" for the forces being landed, and strafed the control tower at the airfield, which was wrecked and set ablaze. Later in the day a tank action developed on a golf course outside the town. Determined opposition was encountered in Port Said from Egyptian units equipped with Soviet self-propelled guns which had been dug into houses, and heavy fighting occurred before the British forces gained control. Meanwhile French paratroops had captured Port Fuad without resistance, seized two bridges spanning the Canal backwaters, and captured the Port Said waterworks intact

In the evening of Nov 5 negotiations for the surrender of Port Said were opened by the Governor of the town and Brigadier Butler, commanding the 16th Independent Paratroop Brigade. Hostilities ceased for several hours while discussions took place on surrender terms, which were reported by the French Defence Ministry to be (1) that the Egyptian troops must hand in their arms (2) that they must regroup unarmed at places designated by the Allied Command, and (3) that they must hand over the town intact, and vital installations in good order. The Governor of Port Said at first accepted these terms, and a cease-fire was accordingly ordered. Later, however, the surrender terms were rejected—apparently on instructions from Cairo—and fighting was resumed

The capture of Port Said and Port Fuad was officially announced by Allied H.Q. on Nov. 6, on which date Sir Anthony Eden announced that a cease-fire would come into operation at midnight on Nov. 6-7, subject to unconditional acceptance of a cease-fire by Egypt and Israel, and to no further attacks being made on the Anglo-French forces in the Canal zone.

In a press statement at Nicosia on Nov. 7, made after a visit to Port Said, General Keightley announced that total Allied casualties in the operation to capture Port Said were "just over 100 killed and wounded." Before the cease-fire became effective (at 2 a.m Nov. 7) British patrols had reached a point one mile north of Kantara—i e over half-way to Ismailia and one-third of the distance down the Suez Canal from its northern entrance. There had been no fighting since the cease-fire, conditions generally in Port Said were calm, and everything was being done to restore things to normal. Some damage had been caused in the town, "but this to a large extent resulted from the stubborn fighting of the Egyptians from house to house during the day" There was no shortage of food or water, and "the French did a very good job of getting the waterworks intact quickly" The British and French fleets were standing by in the vicinity of Port Said, and were "already at work clearing the ships sunk by the Egyptians in the port and the entrance to the Canal."

In a statement on Nov 5, General Keightley said that the Anglo-French forces had faced "tough fighting" against Egyptian troops armed with tanks, recoilless guns, and mortars before the situation was brought under control. After stressing that the Egyptian defeat in the Sinai desert made it absolutely certain that the Canal Zone would have become a battlefield for a period impossible to determine, the C.-in-C. announced that the Egyptians had "sunk blockships from Port Said to Suez" and had "deliberately sunk many blockships just south of Lake Timseh." In the operations as a whole the Allied air forces had done their job "with such accuracy and selectivity that not even the pilots of the Egyptian aircraft were killed." General Keightley added: "Astonishing as it may seem, the Egyptian Air Force numbered double the Allied Air Forces during the whole of the campaign"

A British Admiralty communiqué (Nov. 6) described the contribution of the Allied navies to the operations.

It stated that over 100 ships of all types had been involved, the main naval burden having fallen on "the Anglo-French aircraft-carrier force with its accompanying close cover and escort." Over 2,000 sorties had been flown by naval aircraft, and only one British life and two naval planes lost Aircraft carriers engaged included the British carriers *Eagle, Albion, Bulwark, Ocean,* and *Theseus* and the French carrier *Arromanches*; the first three British carriers carried operational aircraft, while the *Ocean* and *Theseus* carried operational helicopters and units of the Royal Marine Commandos. The French Navy had provided the only battleship, the *Jean Bart* (35,000 tons), while the Royal Navy had provided three cruisers—the *Jamaica, Ceylon,* and *Newfoundland.* A number of Daring-class ships [super-destroyers], destroyers, frigates, landing craft, minesweepers, and submarines had also taken part in the operations.

As stated by General Keightley, the Suez Canal had been blocked by a number of vessels sunk by the Egyptians at various places. It was stated after the cease-fire that the Canal was blocked by at least eight, and possibly 12, blockships, in addition to the wrecked bridge at El-Ferdan.

U.N. General Assembly's Call for Cease-fire.

The U.N. General Assembly met in emergency session on Nov. 1 to discuss the Middle East situation, in accordance with the Security Council's decision of the previous night.

The French delegate, supported by Britain, challenged the legality of the session, contending that no formal resolution had been vetoed in the Council and that the Assembly had therefore no right to be "seized" of this item. The Assembly, however, rejected this argument by 62 votes to two (Britain and France).

During the session, which lasted nine hours, the actions of Israel, Britain, and France were condemned by the overwhelming majority of delegates, including Mr. Dulles, who introduced a resolution based on the earlier U.S. draft resolution vetoed by Britain and France in the Security Council.

Mr. Dulles spoke as follows: "I doubt whether any delegate ever spoke from this forum with as heavy a heart as I have brought here tonight. We speak on a matter of vital importance, where the U.S A finds itself unable to agree with three nations with whom it has ties, deep friendship, admiration, and respect, and two of whom constitute our oldest, most trusted, and reliable allies .. Because it seems to us that that disagreement involves principles which far transcend the immediate issue, we feel impelled to make our point of view known to the world."

After sketching the history of the Suez negotiations since the Canal Company's seizure in July, Mr. Dulles went on: "Surely, I think, we must feel that the peaceful processes which the Charter requests every member to follow had not been exhausted. Even in the case of Israel, which has a legitimate complaint due to the fact that Egypt has never complied with the 1951 resolution of the Security Council recognizing Israel's right to use of the Canal—even there, there was a better prospect because the principles adopted by the Security Council with the concurrence of Egypt called for the passage of ships and cargoes through the Canal without discrimination, and provided that the Canal could not be used or abused for the national purposes of any nation, including Egypt.

"So there seemed to be peaceful processes that were at work and which had not yet—it seemed to us at least—run their course . . . I would be the last to say that there can never be circumstances where resort to force may not be employed, and certainly there can be resort to force for defensive purposes under Article 51. It seems to us that, under the circumstances which I have described, the resort to force, the violent armed attack by three of our members upon a fourth, cannot be treated other than as a grave error inconsistent with the principles and purposes of the Charter, and one which, if persisted in, would gravely undermine our Charter and this Organization. The question then is What do we do?

"We do not, any of us, live in societies in which acts of disorder do not occur. But we all of us live in societies where, if those acts occur, something is done by constituted authority to deal with them. At the moment we are the constituted authority. And while we do not have under the Charter the power of action, we do have a power of recommendation—a power which, if it reflects the moral judgment of the world community, of world opinion, will I think be influential upon the present situation It is animated by such considerations that the United States has introduced its resolution

"If we do not act, and act promptly, and if we do not act with sufficient unanimity of opinion so that our recommendations carry a real influence, there is great danger that what is started, and what has been called a police action, may develop into something far more grave. Even if that does not happen, the apparent impotence of this Organization to deal with this situation may set a precedent which will lead other nations to attempt to take in their own hands the remedying of what they believe to be their own injustices. If that happens, the future is dark indeed."

Sir Pierson Dixon maintained that the Franco-British "emergency police action" was justified on the ground that the Soviet use of the veto had prevented the Security Council from creating a system of effective collective security, in this connexion he drew an analogy between the Anglo-French action and the U S. intervention in 1950 to defend South Korea. He also said that "if the United Nations were willing to take over the physical task of maintaining peace in the area, no one would be better pleased than the British Government" He gave a warning, however, that if the Assembly were merely to call for a cease-fire and the withdrawal of the Israeli and Anglo-French forces, the situation would "only revert to the condition of chaos which we have had to endure" in the eight years since the Palestine armistice agreements were signed.

M. Loutfi (Egypt) reiterated the allegation that Britain, France, and Israel had "agreed in advance to perpetuate this act of war," and accused the two latter countries of violating the U.N. Charter and the Constantinople Convention of 1888, which assured unrestricted use of the Suez Canal by all nations in peace or war.

Mr. Eban (Israel) reiterated that Israel had attacked in order to eliminate the bases from which Egyptian commando raids had been constantly launched into Israeli territory. He declared that the U.N. should ensure that if the frontier was designed to keep Israeli forces out of Egypt, it should also keep Egyptian forces out of Israel.

Mr. Lester Pearson (Canada) said that although approving of much of the U.S. resolution, his Government found it "inadequate to achieve the purposes we have in mind at this Assembly," and he would therefore abstain from voting He emphasized that it was essential that some provision should be made which could authorize the Secretary-General to begin making arrangements for a United Nations force large enough to keep the peace on the Arab-Israeli borders while a political settlement was being worked out He added that he would be willing to recommend Canadian participation in such a force.

Mr. Dulles (U.S.A) welcomed the Canadian suggestion for an international force in the Middle East, and asked Mr Pearson to formulate detailed proposals along the lines he had indicated.

At the end of the debate the U.S. resolution was adopted at 2 a.m. on Nov. 2 by 64 votes to five, with six abstentions and one delegation absent.

Those voting for the resolution were: Afghanistan, Albania, Argentina, Austria, Bolivia, Brazil, Bulgaria, Burma, Byelorussia, Cambodia, Ceylon. Chile, Colombia, Costa Rica, Cuba, Czechoslovakia, Denmark, Dominican Republic, Ecuador, Egypt, El Salvador, Ethiopia, Finland, Greece, Guatemala, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iraq, the Irish Republic, Italy, Jordan, Lebanon, Liberia, Libya, Mexico, Nepal, Nicaragua, Norway, Pakistan, Panama, Paraguay, Persia, Peru. the Philippines, Poland, Rumania, Saudi Arabia, Siam, Spain, Sweden, Syria, Turkey, Ukraine, the U.S.S.R., the United States, Uruguay, Venezuela, Yemen, Yugoslavia, and Nationalist China.

Those voting against were: Australia, France, Israel, New Zealand, and the United Kingdom.

The abstentions were Belgium, Canada, Laos, the Netherlands, Portugal, and South Africa, while Luxemburg was absent.

The text of the resolution was as follows:

"The General Assembly,

Noting the disregard on many occasions by parties to the Israel-Arab armistice agreements of 1948 of the terms of such agreements, and that the armed forces of Israel have penetrated deeply into Egyptian territory in violation of the general armistice agreement between Egypt and Israel;

Noting that armed forces of France and the United Kingdom are conducting military operations against Egyptian territory;

Noting that traffic through the Suez Canal is now interrupted to the serious prejudice of many nations;

Expressing its grave concern over these developments;

(1) Urges as a matter of priority that all parties now involved in hostilities in the area agree to an immediate cease-fire, and as part thereof halt the movement of military forces and arms into the area;

(2) Urges the parties to the armistice agreements promptly to withdraw all forces behind the armistice lines, to desist from raids across the armistice lines into neighbouring territory, and to observe scrupulously the provisions of the armistice agreements;

(3) Recommends that all members refrain from introducing military goods into the area of hostilities, and in general to refrain from any acts which would delay or prevent the implementation of this resolution;

(4) Urges that upon the cease-fire becoming effective, steps be taken to reopen the Suez Canal and restore freedom of navigation;

(5) Requests the Secretary-General to observe and promptly report on the compliance with this resolution to the Security Council and the General Assembly, for such further action as they may deem appropriate in accordance with the Charter;

(6) Decides to remain in emergency session pending compliance with this resolution."

Immediately after the vote Dr. Hammarskjöld appointed a three-man group of senior U.N. officials to report to him daily on how far the General Assembly's resolution was being complied with. The group consisted of Dr. Ralph J. Bunche (who negotiated the Palestine cease-fire in 1949), M. Ilya Tchernychev (an Under-Secretary in the U.N. Secretariat), and M. Constantine Stavropoulos (U.N. Legal Counsel).

House of Commons Emergency Session. - Anglo-French Conditions for Acceptance of General Assembly's Resolution.

At an emergency session of the House of Commons on Nov. 3 (a Saturday), the Prime Minister announced that the British and French Governments had informed the U.N. Secretary-General that, having given careful consideration to the General Assembly's resolution of Nov. 2, they were ready to cease military action as soon as the following three conditions were satisfied: (1) that Egypt and Israel agreed to accept a U.N. force to keep the peace; (2) that the U.N. decided to set up such a force "until an Arab-Israel peace settlement is reached and until satisfactory arrangements have been agreed in regard to the Suez Canal, both agreements to be guaranteed by the United Nations"; (3) that in the meantime, until the U.N. force was constituted, "both combatants agree to accept forthwith limited detachments of Anglo-French troops to be stationed between the combatants." The announcement was made after consultations with M. Pineau, who had flown to London in the morning of Nov. 3 accompanied by General Ely, Chairman of the French Chiefs of Staff.

Sir Anthony Eden spoke as follows I would first recall the statement I made in the House in the course of my speech on Nov. 1, when I said that the first and urgent task is to separate the combatants and to stabilize the position. That is our purpose. If the U.N. were then willing to take over the physical task of maintaining peace in the area, nobody would be better pleased than I. Since that statement was made I have had consultations in London with the French Foreign Minister. As a result, the British and French Governments are sending the following reply to the resolution of the U N. General Assembly:

'The British and French Governments have given careful consideration to the resolution passed by the General Assembly on Nov. 2. They maintain their view that police action must be carried through urgently to stop the hostilities which are now threatening the Suez Canal, to prevent a resumption of those hostilities, and to pave the way for a definite settlement of the Arab-Israel war, which threatens the legitimate interests of so many countries They would most willingly stop military action as soon as the following conditions could be satisfied . . .'

'After giving the three conditions mentioned above, Sir Anthony added: "We have been in consultation with the Governments of Australia and New Zealand. The House will understand the difficulty of timing in these consultations, but I have good reason to believe that these Governments will welcome my statement. We are also communicating the statement at once to the Governments of Canada and the United States and to the U.N. Secretary-General."

Mr. Gaitskell said: "The first paragraph of the resolution carried by 64 votes to five in the General Assembly calls on all parties involved in hostilities to agree to an immediate cease-fire and to halt the movements of military forces and arms into the area It is perfectly clear . . . that the British Government are not carrying out this recommendation. We are therefore faced with the position that our Government are defying a resolution of the U.N. Assembly carried by a majority which is larger, I believe, than any resolution carried by that Assembly before. We can only say for our part that we regard this as utterly deplorable.

"Regarding the conditions laid down by the Government, it is no part of the business of H M. Government to lay down conditions of this kind. It is their duty as loyal members—if they are loyal members—of the U.N. to accept that majority decision.

"The Canal is blocked, and all that has happened is that the intervention of H M. Government has no doubt prematurely brought the operations in the Sinai desert to a close. What H M. Government have done, undoubtedly, is to intervene against Egypt, which was clearly attacked by Israel. I do not know whether they regard that as separating the combatants or settling hostilities. What they have done is to bomb a number of civilians as well as military installations. [Ministerial protests.] What they have done is to destroy all faith in collective security. What they have done now, by refusing to accept the U N. resolution, is virtually to destroy that institution, which the Prime Minister once described as 'the hope of mankind.'

"So far as an Arab-Israel peace settlement being reached, there is, in our opinion, a strong case for a U N. force to police the armistice frontiers of the Arab States and Israel. Is it the view of H.M. Government that the U.N. police force should do that? And if they did that, what reason is there for such a police force to operate in the Canal Zone at all? Why has the Prime Minister brought in the phrase about 'satisfactory arrangements being agreed to' over the Suez Canal? Does he mean that Egypt is to be bound to accept by force the 18-Power proposals, or what does he mean by it? Why, indeed, should the settlement of the Suez Canal be brought into this matter at all? Finally, by what right is the Prime Minister now proposing that until the U.N. force is constituted, both combatants have still to accept the original ultimatum?

"All this is unquestionably in defiance of the resolution of the General Assembly. One cannot get away from that. We regard the Government's reply as the most tragic statement that has been made in this House since 1939.

"I know that passions run very high on both sides of the House in this matter. But I do beg Members to realize how terribly anxious we are about the implications of this action. No doubt it is possible and comparatively easy for British and French forces to subdue Egypt. No one ever doubted that. But do Members not reflect in their hearts that the implications of this defiance of the Assembly's resolution mean that in future the Assembly can never hope to cope with any international crisis again? Do not Members appreciate, at this time above all, when news of Russian aggression in Hungary is coming through, that it is an immense tragedy that the moral strength of this country and of the U.N., because of our action, is so gravely damaged? . . .

"I know how high passions are raised, but I do beg them [the Government] to listen to my words We represent on this issue the point of view of millions of men and women—not all Labour Party supporters, many of them of no political persuasion, and I venture to say, many of them persons who have hitherto voted Conservative. If only the Government had been prepared to accept that resolution,

much of the damage could have been repaired, but they have, unfortunately, refused. They are continuing the war against Egypt; they are continuing the bombing, the destruction, and the casualties, and all that has been put forward are niggling, haggling proposals that . . . [Mr. Gaitskell's words were drowned in loud and prolonged Ministerial cries of dissent.]

"Up to this moment, for my part, I had hoped for a change in Government policy. I had hoped originally that the Government would have accepted our first proposal to defer action. They refused. I hoped then that the pressure of world opinion upon them would make them change their minds, and I hoped finally that the passing of this resolution by such a vast majority in the U.N. Assembly would bring them to their senses. Alas, this is not so, and we can draw only one conclusion: If this country is to be rescued from the predicament into which the Government has brought it, there is only one way out—a change in the leadership of the Government. Only this can save our reputation and reopen the possibility of maintaining the U N. as a force for peace We must have a new Government and a new Prime Minister. The immediate responsibility in this matter rests on the only people who can affect the situation—Members opposite. I beg them to consider where we are being led, and the appalling international consequences of this gross error. I ask them, having done so, to do their duty."

Sir A. Eden: "It is not true that countries are not allowed to make counter-proposals or other suggestions after the General Assembly has passed a resolution. A General Assembly resolution is a recommendation to Governments, and action can only be approved by the Security Council. Therefore we are entirely within our rights in putting forward our views on the resolution. Mr. Gaitskell asked why we put in the Suez Canal. The object is to show that we should try to use this situation to deal with all the outstanding problems in the Middle East, and it would be unwise to leave any one of them unresolved. The other question Mr. Gaitskell asked was—'Why operate in the Canal Zone?' The answer is because it is in the Canal Zone that, in our judgment, the danger has lain and still lies. Mr. Gaitskell said the U.N after this would never be able to operate again. Each one of us is entitled to his judgment on that. I take exactly the opposite view. If the U.N. would take this opportunity to build up an international force and take practical action to meet a situation which cannot be met by passing resolutions, then I am sure that the future of the United Nations would be assured and peace much strengthened."

Mr. Gaitskell: "May I make one last appeal to the Prime Minister? We have a new situation now. Fighting between the Israelis and Egypt in the Sinai Desert has come to an end. The Canal is blocked. Would it not be wise, in the light of this, and of the General Assembly resolution and proposals—which we all welcome—for a U.N. police force, that instructions should now be given, in accordance with the resolution, to cease further military action? I beg the Prime Minister to understand that on his answer to this question public opinion will judge him."

Sir A. Eden: "I made plain in the debate, when we were supported by the House on a censure motion, the reasons why we were taking the action. The Government remain absolutely convinced that proceeding with this action is the best way of limiting hostilities and getting an early separation of the forces on both sides. Therefore we consider it our duty to fulfil that obligation."

After further heated exchanges between Government and Opposition supporters, the debate was wound up by **Mr. Selwyn Lloyd**, who reiterated the Anglo-French intention to separate the combatants Amidst uproar, and Opposition cries of "resign," "warmongers," and "whose finger on the trigger?" the Foreign Secretary declared: "Members opposite seem to have forgotten the history of the past ten years. We are not proposing to intervene on the side of Israel. We are intervening to separate the combatants. If the U.N. decide to constitute a force, it must also decide to remain in the area until there is a peace settlement between Israel and the Arab States. We believe that the U.N. force should stay there until satisfactory arrangements had been made in respect of the Suez Canal Certainly we should accept a settlement which conforms to the six principles unanimously agreed by the Security Council. I believe it should be possible to find such a settlement. In the meantime we intend to see that this war between these two countries is stopped. If it should come out of this situation that the United Nations equips and organizes itself so that it is in a position to act quickly in a similar situation, we will have done a good thing for the peace of the world."

The emergency session ended amidst violent anti-Government demonstrations from the Opposition benches and pro-Government demonstrations from the Government benches.

Among the leading British newspapers, the Anglo-French action in the Canal Zone was supported by *The Times*, *Daily Telegraph*, *Daily Express*, *Daily Mail*, and *Sunday Times*, but was strongly opposed by the *News Chronicle*, *Daily Herald*, *Manchester Guardian*, and *The Observer*.

Note. Further developments in the Middle Eastern situation, including international reactions to the crisis, will be described in subsequent articles. (Ed. K.C.A.)

A. POLAND - SOVIET UNION. — Agreement on Soviet Economic Assistance.

An agreement signed in Moscow on Sept.18 between Poland and the Soviet Union provided for large-scale Soviet aid to the Polish economy, as follows: (1) Poland would receive in 1956 credits totalling 100,000,000 roubles, payable partly in gold and partly through the supply by the U.S.S.R. of certain commodities essential for the Polish economy (copper, rubber, and fats); Poland would pay the two per cent annual interest on this loan in the form of deliveries of Polish goods, the deliveries to be effected between 1957 and 1960 in equal annual instalments. (2) The Soviet Government agreed to extend "for four to five years" the repayment of credits previously granted to Poland in connexion with the supply of equipment for Polish industrial projects.

Trybuna Ludu (organ of the Polish United Workers' Party) stated that that part of the Soviet credit which was to be paid out in gold would enable Poland to find the most advantageous sources of supply on the world market for goods and commodities required by her economy. It pointed out that the Polish balance of payments was strained and that the necessity to reduce Polish coal exports made it still more difficult to obtain foreign currencies, particularly free currencies. The Soviet Union's consent to the repayment of its earlier loans in Polish industrial goods, and not in gold or free currencies, was therefore of considerable help to Poland's financial situation. The article also mentioned that the total of Soviet credits granted earlier (the repayment of which had now been extended) amounted to 810,000,000 roubles.

The official announcement said that the Soviet assistance had been made available at Poland's request.
(Polish Embassy Press Office, London) **(Prev. rep. 10838 B.)**

B. PAKISTAN. — Expansion of Mr. Suhrawardy's Government. - New Ministerial Appointments.

Mr. Suhrawardy's Government was enlarged by the appointment on Sept. 17 and 26 of Mr. Zahiruddin (Awami League), who took over the portfolio of Education and Health, and of Mr. R. R. Mandal (general secretary of the East Pakistan Scheduled Castes Union), who became Minister of State for Economic Affairs.

The Official Gazette announced on July 31 that the Government had set up a Federal Reorganization Committee to examine the reorganization of the structure of the Central Government in the light of the new Constitution. Mr. G. Ahmed, a member of the Cabinet Secretariat, was appointed chairman of the committee, which included, *inter alios*, the Secretaries of the Ministries of Law, Commerce, Finance, and Defence.—(Pakistan High Commissioner's Office, London)

Corrigendum. In 15143 A, describing political developments in East Pakistan, it was stated in error that the new Ministry of Mr. Rahman Khan included a dissident United Front member. The relevant sentence in the seventh paragraph of the first column should read: "In its enlarged form it consisted of seven Awami League members, two Congress Party members, and one representative each of the United Progressive Party and the pro-Communist *Ganatantri Dal* (Democratic Party)." (Ed. K.C.A.)

C. INDIA. — Scheduled Castes. - Mass Conversion of Harijans to Buddhism.

About 200,000 men and women belonging to the Scheduled Castes, including Dr. B. R. Ambedkar (the *Harijan* leader), embraced Buddhism on Oct. 14 at a ceremony at Nagpur attended by some 300,000 people, most of them members of the Scheduled Castes. In addition to Dr. Ambedkar, other prominent personalities converted to Buddhism at the ceremony included Dr. Niyogi, a former Chief Justice of the Nagpur High Court, and Mr. Khobragade, general secretary of the Scheduled Castes Federation.

Dr. Ambedkar stated after the ceremony that he would automatically cease to be a member of the Scheduled Castes Federation. Before the elections in 1957 he intended to found a new political party, to be called the Republic Party, membership of which would be open to all.—(The Hindu, Madras) **(Prev. rep. 15069 E.)**

D. IRISH REPUBLIC. — Diplomatic Appointments.

It was announced in Dublin on Aug. 30 that Mr. F. H. Boland, Ambassador in London since 1950, had been appointed permanent representative of the Irish Republic at the United Nations.

On Aug. 31 it was announced that Mr. William Warnock, Assistant Secretary in the External Affairs Department, had been appointed Minister to the German Federal Republic *vice* Dr. T. J. Kiernan, whose appointment as Ambassador to Canada had been announced earlier in the month.
(Irish Times, Dublin) **(Prev. rep. 14119 E.)**

A. YUGOSLAVIA. — Tito-Khrushchev Discussions in Brioni and Crimea. - Reported Ideological Differences between Yugoslavia and U.S.S.R. - Soviet Criticisms of Yugoslavia in Letter to East European Communist Parties. - Discussions between Yugoslav League of Communists and Communist Parties of Poland, Hungary, Bulgaria, and Rumania.

During September and October a number of discussions, which had not been previously announced and on which no official statements were issued afterwards, took place between Yugoslav and Soviet leaders both in Yugoslavia and in the U.S.S.R. Prior to these developments, M. Mikoyan (Soviet First Deputy Premier) had visited Brioni on July 21-22 for talks with Marshal Tito and other Yugoslav leaders, including MM. Kardelj, Rankovich and Pijade, after a visit to Budapest. No communiqué was published on the Tito-Mikoyan talks, but it was commented in the foreign press that M. Mikoyan's visit to Yugoslavia had been arranged at very short notice and followed closely upon the governmental changes in Hungary which involved the resignation of M. Rakosi and his replacement by M. Erno Gero as First Secretary of the Hungarian Workers' Party.

On Sept. 19 M. Khrushchev arrived in Yugoslavia for an eight-day visit during which he had discussions with President Tito at Brioni. On Sept. 27 President Tito, accompanied by M. Rankovich and two other Yugoslav Communist leaders, flew with M. Khrushchev to the Crimea to continue the discussions, in which Marshal Bulganin and other Soviet leaders also took part. They were joined by M. Gero, who flew from Budapest to participate in the Crimea talks. On returning to Belgrade on Oct. 5, President Tito said that his visit to the Crimea, made at M. Khrushchev's invitation, had been "of a purely private character" and was "intended as a rest," but had provided an opportunity for "talks on the relations between our two countries." M. Khrushchev's earlier visit to Belgrade had also been officially described as "of a private nature for the purpose of a rest."

Although no official statement on the Brioni and Crimea talks was issued in either country, comments by the Yugoslav Foreign Ministry spokesman, M. Draskovich, and by the Yugoslav Press made it clear that the questions discussed had included a letter criticizing the Yugoslav leadership which had been sent by the Central Committee of the Soviet Communist Party to other East European Communist parties.

At a press conference on Sept. 29, M. Draskovich said that the matters discussed had included problems of "inter-State and inter-party relations" and "questions of an ideological nature." He added that "open questions and differences of view" existed between Yugoslavia and the Soviet Union, "just as there is a broad volume of agreement on a number of questions concerning international affairs and mutual relations." In reply to inquiries about the Soviet letter, M. Draskovich said that he did not know its contents as it had not been sent to Yugoslavia. In a further statement on Oct. 12, M. Draskovich described the Brioni and Crimea talks as "a friendly exchange of views," said they had not been of a kind to call for any decisions, and emphasized that they had in no way changed either the character of Yugoslav foreign policy, which remained one of "active co-existence," or the principles on which Soviet-Yugoslav relations were based.

An editorial published on Oct. 12 in *Borba* (organ of the Yugoslav League of Communists) denied that any "serious divergencies" existed between Yugoslavia and the Soviet Union, but said that it was "well known" that "in the whole development of Yugoslav-Soviet relations since their normalization there were . outstanding questions and differences of views—above all in concepts on the forces and elements of Socialism in the present world, and on views as to the methods and forms of their mutual co-operation." Referring to the Soviet letter, *Borba* stated that this had apparently expressed the opinion that the Yugoslav League of Communists was not "a purely Marxist-Leninist organization" but had certain 'Social-Democratic tendencies." It commented that the letter was not in the spirit of the declaration signed in Moscow in June on co-operation between the Yugoslav and Soviet parties.

The official Yugopress agency published on Oct. 5 a summary of the Yugoslav view on relations between Communist parties of different countries, which was believed to represent the principles laid down by President Tito in his conversations with the Soviet leaders. These were: (1) that co-operation between Communist and Socialist parties must be on a basis of complete equality; (2) that the division of the world into blocs endangered the progress towards peace which had already been achieved; (3) that there was no universal formula for the development of Socialism, and that the experience of particular countries and particular Communist and Socialist parties, though they could be useful to others, could not be imposed upon them. "For Yugoslavs," the statement concluded, "only collaboration based on these principles is acceptable, and for this reason they apply them impartially in their relations with all progressive working-class parties and movements. To wish to impose one's own opinion on others leads in the end to ideological and political stagnation."

Delegations from the Polish, Hungarian, Bulgarian, and Rumanian Communist parties visited Yugoslavia during the past three months, resulting in the formal re-establishment of relations between the Yugoslav League of Communists and the Communist parties of the "people's democracies."

Poland. A delegation from the Polish United Workers' Party visited Yugoslavia from Aug. 25-Sept. 2 for discussions with the League of Communists, and was received by President Tito. M. Mazur, secretary of the Central Committee of the Polish party, said that the purpose of the visit was to "intensify fraternal relations between the two parties" and to learn from Yugoslav achievements. A delegation from the Polish Seym visited Yugoslavia from Sept. 3-21, a return visit being paid to Warsaw by a Yugoslav parliamentary delegation in October.

Bulgaria. A delegation from the Central Committee of the Bulgarian Communist Party, led by M. Zhivkov (First Secretary), arrived in Belgrade at the end of September for discussions with M. Rankovich and other members of the Central Committee of the Yugoslav League of Communists. It was announced on Oct. 7 that it had been decided to re-establish contact between the two parties on a basis of "equality, mutual respect, and non-interference in each other's internal affairs." The Yugopress agency welcomed this decision, but commented that the talks had revealed "different viewpoints on certain important questions of theory and on the application of Socialist principles."

Hungary. A delegation from the Central Committee of the Hungarian Workers' Party, including M. Gero, M. Hegedüs (Prime Minister), and M. Kadar (secretary to the Central Committee), arrived in Belgrade on Oct. 15 for similar discussions. A communiqué issued on Oct. 23 stated that the talks had been held in a spirit of "friendship, frankness, and mutual understanding"; that the Yugoslav League of Communists had accepted an invitation to send a delegation to Hungary; and that the two parties had agreed to co-operate on "a basis of full confidence, equality, and non-interference in each other's internal affairs," which, while permitting "constructive and comradely criticism," would prevent "the repetition of past mistakes which inflicted serious harm upon the workers' movement."

Comment by the Hungarian Press and radio mentioned as factors in the improvement of relations with Yugoslavia the dismissal of M. Rakosi (who was described by Budapest Radio on Oct. 10 as "the most compromised of all Communist leaders, dead or living, in the provocative action directed against Yugoslavia"), M. Gero's earlier meeting with President Tito in the Crimea, the arrest of General Farkas, and the posthumous rehabilitation of Laszlo Rajk.

Rumania. A delegation from the Rumanian Government and the Rumanian Workers' Party, headed by the party's First Secretary, M. Gheorghiu-Dej, and the Prime Minister, M. Stoica, arrived in Belgrade on Oct. 20 for a nine-day visit, in response to an invitation extended by President Tito while in Rumania in June. A joint declaration was signed on Oct. 28 stating that the Yugoslav League of Communists and the Rumanian Workers' Party had agreed on the need for full and equal co-operation between national Communist and Socialist parties and "other workers' and progressive movements," and that they had also agreed to accept "differing forms and methods for the construction of Socialism."

The Yugoslav-Soviet discussions, the suddenness with which M. Khrushchev arrived in Belgrade and Marshal Tito left for the Crimea, and the admissions of ideological differences between the two countries, gave rise to much speculation and many conjectures in the Western press. According to one theory, it was believed possible that M. Khrushchev might have sought to obtain President Tito's support for his "de-Stalinization" policy against a group in the Soviet party leadership led by M. Molotov. It was suggested, though without any official substantiation, that this group might have been responsible for the letter to the East European Communist parties, and it was also suggested that it might have been supported by the Soviet Army leadership as a result of fears that increasing Yugoslav influence might result in the adoption of a "neutralist" foreign policy by the "people's democracies." In this connexion it was conjectured in the British, U.S. and French press that the Soviet leadership might have become alarmed at the increasingly independent line taken by some of the "people's democracies," as evidenced by the trend towards democratization in Poland following the Poznan riots and by the governmental changes in Hungary. Another question at issue was believed to be the Yugoslav Government's action in bringing to trial a number of Communists who had supported the Cominform in 1948 and had recently returned to Yugoslavia from exile.—(Tanjug Agency, Belgrade - Polish and Bulgarian Embassies, London - Hungarian Review, Budapest - Agerpres, Bucharest - Times - Manchester Guardian - New York Times - Le Monde, Paris) **(Prev. rep. 14937 A; 14954 D.)**

NOVEMBER 10—17, 1956

A. HUNGARY. — Insurrection against Communist Regime. - M. Nagy becomes Prime Minister. - Formation of All-Party Government. - Pledge of Free Elections and Democratic Freedoms. - Release of Cardinal Mindszenty. - Withdrawal from Warsaw Pact. - M. Nagy's Call for Withdrawal of Soviet Forces and Permanent Hungarian Neutrality under U.N. Guarantee. - Hungarian Democratic Government overthrown by Soviet Army. - M. Kadar forms "Puppet" Communist Government. - Soviet Armed Repression of Hungarian People's Resistance. - Mass Exodus of Refugees.

During the last week of October a nation-wide revolutionary movement against the Communist regime broke out in Hungary, leading to the formation of an all-party Government by M. Imre Nagy. In response to overwhelming popular demands, M. Nagy subsequently announced that free elections would be held; that talks would be opened with the U.S.S.R. to secure the withdrawal of Soviet troops from Hungary; that Hungary had left the Warsaw Pact; and that she intended to adopt a policy of permanent neutrality, which, M. Nagy asked, should be guaranteed by the United Nations.

Although the Soviet Government ostensibly entered into negotiations with M. Nagy's Government on the withdrawal of Soviet forces from Hungary, it suddenly moved large reinforcements of infantry, tanks, and artillery into the country and, without warning, at dawn on Nov. 4 launched a concentrated attack on Budapest and other provincial centres held by the Hungarian patriots. At the same time M. Nagy's Government was overthrown by the Soviet forces and a "puppet" regime set up at Szolnok (50 miles S.E. of Budapest) under M. Janos Kadar, who had succeeded M. Gero as First Secretary of the Hungarian Workers' (Communist) party, and who had been a member of M. Nagy's all-party government. Despite heroic resistance against overwhelming odds by the Hungarian civil population and armed forces, the Soviet Army succeeded within a few days in establishing virtual control throughout the country, apart from a few isolated centres—some in Budapest itself—still holding out. According to subsequent despatches from Hungary, over 1,000 Soviet tanks and some ten Soviet divisions had been used to crush the resistance of the Hungarian people.

The chaotic conditions in Hungary during this period, in which the situation changed almost from hour to hour, made it impossible for the outside world to obtain a detailed picture of the events while they were in progress, apart from broadcasts from Government and insurgent radio stations, eye-witness accounts by the many thousands of refugees who crossed the frontier into Austria, and despatches by press correspondents of many nationalities who were in Hungary at the time. It subsequently became clear, however, that large areas of Budapest had been devastated; that tens of thousands of Hungarians had been killed and wounded, as well as many Russian soldiers; that near-famine conditions were prevailing in the capital; and that normal life was at a standstill throughout the country. It also became clear that the Soviet intervention had been resisted by the entire working-class, as well as by the Hungarian Army; that the Soviet forces had in many cases acted with the utmost brutality in crushing the people's uprising; and that M. Kadar's "puppet" Government was completely discredited among the Hungarian people and owed its existence solely to Soviet military support.

The Hungarian insurrection, and its subsequent repression by the Soviet Army, had been preceded by the return of M. Imre Nagy to political life; the formal posthumous rehabilitation of Laszlo Rajk and other executed "Titoists", the arrest of General Mihaly Farkas, the former Defence Minister, who had been expelled from the party in July; and mass demonstrations by students, workers, and soldiers demanding political reforms, the withdrawal of Soviet troops, the release of Cardinal Mindszenty (the Roman Catholic Primate of Hungary, who had been under detention since 1948), and a new Government headed by M. Nagy.

Posthumous Rehabilitation of Laszlo Rajk. - Arrest of General Farkas. The body of Laszlo Rajk, together with the bodies of three others executed with Rajk in 1949 on charges of "treason" and "Titoism" (General Palffy, Tibor Czenye, and Andras Szalai), were given a State funeral in Budapest on Oct 6, following the posthumous rehabilitation of the executed men some months earlier Government leaders present at the ceremony declared that those responsible for "these infamous crimes"—i.e. the execution of Rajk and his colleagues—would be "called to account," particular mention being made of General Farkas. On Oct. 12 it was officially announced that Farkas had been arrested for "violating Socialist legality" and had been deprived of his military rank

M. Nagy readmitted to Hungarian Workers' Party. Budapest Radio announced on Oct. 14 that party membership had been restored to M. Imre Nagy, Prime Minister of Hungary from 1953 to April 1955, when he was expelled as a "traitor," "Trotskyist," and "Titoist." The broadcast said that an important part in M. Nagy's earlier expulsion from the party had been "played by the personal prejudices of Rakosi" [the former First Secretary of the Hungarian Workers' Party.]

Imre Nagy (60), a locksmith in his early years, served in the Austro-Hungarian Army during the First World War and was taken prisoner by the Russians. He joined the Bolshevist forces after the Russian Revolution, became a Soviet citizen in 1918, and returned to Hungary in 1919, holding a minor post in Bela Kun's Communist regime After the latter's collapse he fled to France, but subsequently returned to Hungary in the early 'twenties, being arrested and imprisoned. In 1930 he went to the U.S.S.R., where he remained throughout the Second World War. Returning to Hungary with the Soviet Army, he became Minister of Agriculture in the post-war Communist Government, was Speaker of the Hungarian Parliament from 1947-53, and in the latter year became Prime Minister in succession to M. Rakosi. On March 8. 1955, he was condemned by the Central Committee of the Party for "rightist deviationism" and, after being denounced by M. Rakosi, was deprived of the Premiership and expelled from the party on April 18, 1955. M. Nagy was "rehabilitated" in August 1956, after Rakosi's fall.

(*New York Times*)

Mass Demonstrations. - Demands for Reforms. Mass demonstrations, attended by hundreds of thousands of workers, students, and soldiers, took place on Oct. 22-23 in Budapest, Debreczen, Miskolc, Szeged, Gyor, and other cities, at which demands were made for greater democratization of the Government, the withdrawal of Soviet troops, the release of Cardinal Mindszenty, and the return of M. Nagy to political power. In Budapest, where some 200,000 demonstrators massed in the centre of the city, representatives of Hungarian universities and high schools adopted a 22-point resolution calling *inter alia* for M Nagy to be "placed at the head of the Government and the party"; for rapid progress towards democratization, changes in the party leadership, removal of Stalinists, and punishment of those guilty of past errors; for the development of Soviet-Hungarian relations on a basis of absolute equality; for the withdrawal of Soviet forces from the country; for the ending of the teaching of Russian as a compulsory language in schools; and for less time to be devoted to the teaching of Marxism-Leninism. The resolution expressed "solidarity with our Polish comrades," declaring that Poland had set "an example which our country should follow."

Heavy fighting broke out in Budapest during the night of Oct. 23-24, following the mass demonstrations of the previous 48 hours. A state of emergency was declared throughout the country, martial law, a censorship, and a curfew imposed, and all rail and air communications with the outside world cut off. At dawn on Oct. 24 it was announced that M. Nagy had taken over the Premiership from M. Hegedus, and that the Government had invoked the Warsaw Treaty and were appealing to the Soviet forces to help restore order. [It subsequently became known that M. Gero, and not M. Nagy, had been responsible for calling in Soviet troops.]

October 24. - Outbreak of Insurrection. - M. Nagy becomes Prime Minister.

3.30 a.m.—the Government banned all public meetings and called upon the armed forces to maintain order, this being the first official intimation that an insurrection had broken out; 7.13 a.m.—after an all-night meeting, the Central Committee of the Hungarian Workers' Party confirmed the appointment of M. Nagy as Prime Minister, with M. Gero remaining First Secretary of the party; 7.45 a.m.—the Government proclaimed a state of emergency; 8 a.m.—the Government invoked the Warsaw Pact and appealed to the Soviet forces to restore order; 11.09 a.m.—M. Nagy appealed to the insurgents to

lay down their arms, and promised that no action would be taken against them if they did so. This promise was repeated at intervals by Budapest radio throughout the day, and was reinforced by broadcast appeals for order by two former Presidents, M. Zoltan Tildy (the former leader of the Smallholders' Party) and M. Szakasits (the former Social Democratic leader). At 7 p.m., however, it was officially admitted that "heavy fighting" was in progress in Budapest and that "reactionary groups" were attacking Government buildings, barracks, and other places. According to reports by travellers crossing the Austrian frontier, armed groups of workers, students and even schoolboys were attacking Communist Party offices, the Karolyi military barracks, and the Budapest radio station, and had established themselves in strength on Csepel Island, an industrial area south of the city.

In his broadcast appealing to the insurgents to lay down their arms, M. Nagy promised a "broad democratization of Hungarian public life," the "construction of Socialism based on specific Hungarian characteristics." and "a basic improvement of the people's living standards." After stressing that these reforms depended on the restoration of order, he added: "Peaceful student demonstrators have been joined by hostile elements who have misguided many workers and are inciting them to actions against the people's democracy. I call on all Hungarians to be firm against these provocateurs... Our national existence and future are at stake."

October 25. - Spread of Insurrection. - M. Kadar replaces M. Gerö as First Secretary of Hungarian Workers' Party.

Despite frequent claims by Budapest Radio that the insurgents had been "liquidated," the revolt spread throughout the country and it became apparent during the day that large areas of Western Hungary were in insurgent hands. Moreover, it became clear that the bulk of the Hungarian armed forces were on the side of the insurgents and that the main strength of the revolt was being provided by the industrial workers.

Pitched battles between the insurgents and the secret police (A.V.H.) were reported from Budapest and other cities, insurgent radio stations came on the air at Pecs (the coalmining town near the Yugoslav border) and Miskolc (the second largest industrial centre, in N.E. Hungary); and "Workers' Councils" were reported to have been formed by the insurgents at these centres and also at Gyor, Magyarova, and other places in Western Hungary. Meanwhile Budapest Radio warned the population to keep indoors between 6 a.m. and 6 p.m., declared that persons breaking the curfew order would be shot at sight, and repeated its appeals to the insurgents to lay down their arms, promising them immunity from punishment if they did so.

During the morning M. Nagy announced in a broadcast (1) that a National Government would be formed "on the broadest basis" to correct "the mistakes and crimes" of the past; (2) that negotiations would be begun with the U.S.S.R., "on a basis of equality," to secure the withdrawal of Soviet forces from Hungary; (3) that the Central Committee of the party approved the formation of Workers' Councils; (4) that an amnesty would be declared for all persons laying down their arms by 10 p.m. the same evening; (5) that workers and "loyal citizens" were to "liquidate mercilessly" anyone who continued fighting after that time-limit; and (6) that the Government's programme would be aimed at creating "a sound national economy based on Socialist principles." M. Nagy admitted that there were good reasons for the popular discontent, said that the people of Budapest had been "embittered" by their bad living conditions, and declared that the Government were determined to learn from the "tragic mistakes" of the past.

It was also announced on this date that M. Janos Kadar had been appointed First Secretary of the Hungarian Workers' Party in succession to M. Erno Gero, who had been relieved of his post.

M. Kadar succeeded Laszlo Rajk as Minister of the Interior in 1948, but was arrested in 1950 on charges of "treason" and "Titoism." He was never brought to trial but was held in detention camps for several years until Stalin's death, when he was released, rehabilitated, and subsequently restored to party membership, becoming party secretary for Budapest. He had been elected to the Politburo and Central Committee on the previous day (i.e. Oct. 24), at the same meeting at which M. Nagy assumed the Premiership in place of M. Hegedüs.

October 26. - M. Nagy's Acceptance of Workers' Demands for Withdrawal of Soviet Troops from Hungary.

While fighting continued in Budapest and many provincial cities, M. Nagy received a workers' delegation from Borsod-Gomor county (Miskolc area) demanding, on behalf of the insurgents, the elimination of "mistakes" in the national economy; the withdrawal of Soviet troops from Hungary; the immediate trial of Mihaly Farkas; and greater powers for the Hungarian Parliament. The delegation stated that a general strike had been called in the area and that work would not be resumed until their demands had been met and, in particular, until the Russian forces had left Hungary.

Budapest Radio announced that M. Nagy was in agreement with the delegation's demands and had promised the formation of a new Government "representing the People's Front and corresponding to the people's will." Later in the day Budapest Radio repeated its appeals for the restoration of order, reiterated that insurgents laying down their arms would be granted an amnesty, and called for the "liquidation" of insurgent groups continuing to resist.

One of the first authoritative accounts of the events in Hungary was given on this date in a despatch by Mr. Gordon Shepherd, Special Correspondent of the *Daily Telegraph*, who was in Budapest throughout the fighting and did not leave Hungary until Nov. 5, when he crossed the Austrian frontier with other foreign press correspondents. In this despatch, carried out of Hungary by an Austrian citizen and transmitted to London, Mr. Shepherd wrote:

"This is no mere revolt of a disgruntled party junta It is no mere demonstration which has got out of hand due to trigger-happy citizens. It is an outright civil war in which 90 per cent of Hungary's anti-Communists have struggled to express their hatred for the regime and its Russian protectors The number of dead and dying is impossible to estimate. One doctor assessed it for me at more than 3,000 killed and seriously wounded But he was judging only from the state of Budapest hospitals. Every ward of these, he said, has been crammed...

"I drove slowly through the centre of the city soon after dawn to-day. It was like a front-line strongpoint in a major military campaign Tanks blocked the main Danube bridges and covered all principal cross-roads. Burnt-out lorries and cars lay on their sides in the street Broken glass glistened on the pavements and the smashed cable wires of the tram system trailed on the ground From blackened doors came that acrid war-time smell of debris mingled with spent gunfire and corpses. It was last in the air of Budapest in 1944. On that occasion the Russian troops came as 'liberators.' Now hatred against them has provided the mainspring of the uprising and the popular fury for more than 72 hours.

"From what I have seen and been told there is no doubt that the spearhead of revolt was in units of the Hungarian Regular Army itself. The Kossuth Academy, the Hungarian officers' training school, went over en bloc to the rebels Others, like the Hadik barracks, were taken by force, but after half-hearted resistance. Several military commanders are said to have shown themselves 'benevolently neutral' by taking no part, but offering the rebels free pick of their arsenal. Three independent eye-witnesses told me how they had seen Hungarian officers distributing arms to the civilian demonstrators...

"The entire armoured element of one Soviet mechanised division, numbering more than 150 tanks, is thought to have been called in with other Russian troops... It seems fair to say that in some cases the Soviet troops appeared reluctant to carry out their unpleasant job. Yet in other cases their hastiness or wilful brutality have caused needless slaughter. One of the worst massacres of the last three days happened when Russian tanks opened fire on a crowd of passive and unarmed people in Parliament Square yesterday. The total dead here alone is put at over 100. Women and children were among the dozens mown down . . The most impossible thing to convey out of the tragic Budapest scene, yet the most important, is the choking hate of the ordinary people against their present masters, and the Russians who protect them..."

October 27-28. - M. Nagy's Meeting with Russian C.-in-C. - Soviet Promise to withdraw Troops from Budapest. - Appointment of Six-Member Government Presidium. - Nagy Government accepts Insurgent Demands.

In two broadcasts in the afternoon and evening of Oct. 28, M. Nagy announced (1) that he had had talks with the Soviet C.-in-C. in Hungary, who had promised that all Russian forces would be withdrawn immediately from Budapest; (2) that negotiations would be begun with the U.S.S.R. to secure the withdrawal of Soviet forces from the whole of Hungary, (3) that the secret police (A.V.H.) had been dissolved; (4) that a new police force would be created, based on the Army and on "armed units of the workers and the youth movement"; (5) that the Communist coat-of-arms would be abolished and the former national coat-of-arms (the Kossuth emblem) restored in the national flag; (6) that March 15 (the anniversary of the Hungarian revolution of 1848, abolished as a public holiday by the Communist regime) would again become the principal Hungarian national holiday; (7) that a six-man Government Presidium had been set up as the supreme executive authority, consisting of M. Kadar, M. Antal Apro (First Deputy Premier), M. Karoly Kiss (Minister for National Planning), M. Ferenc Muennich (Minister of the Interior), M. Zoltan Szanto, and M. Nagy himself. This body (all of whom were Communists or Communist sympathizers) would hold office until the fourth congress of the Hungarian Workers' party.

M. Nagy concluded by denying that a "counter-revolution" had taken place, declaring that the uprising had been "a democratic movement which swept our whole nation in order to secure our independence, which is the only basis of a Socialist democracy."

M Nagy's announcement of the governmental and other changes was preceded by a broadcast in which he called upon all units supporting the Government to cease fire immediately, and to shoot only if attacked. He appealed to the insurgents to cease fire likewise, and promised an amnesty for all who had taken part in the fighting

Meanwhile the insurgent forces had strengthened their hold on the provinces and were reported to be in control of most of the provincial cities, including Szeged, Debreczen, Pecs, Szolnok, Miskolc, Kaposvar, Vesprzem, Szombathely, Pápa, Gyor, Magyarovar, Sopron, Hegyeshalom, Szentgotthard, and Dunafoldvar. In many of these towns, and over wide rural areas, control was being exercised by councils set up by insurgent soldiers, workers, and students. Prior to M. Nagy's broadcasts on Oct. 28, "Free Hungarian" stations at Györ and Miskolc had repeated the insurgents' demands for the withdrawal of Russian troops from Hungary, the democratization of Hungarian political life, the suppression of the secret police, and free elections and complete national independence. A manifesto by the Gyor Workers' Council said that M. Nagy was acceptable to the insurgents as Prime Minister, but that many of his Ministers were unacceptable.

Fighting had meanwhile continued in Budapest, though apparently on a somewhat reduced scale; an indication of its severity in the preceding days was given by Budapest Radio (Oct 28), which admitted that 3,500 people were lying wounded in Budapest hospitals. The position in Budapest and in Hungary generally was described in a further despatch to the *Daily Telegraph* (Oct. 28) by Mr Shepherd, who wrote as follows:

"Fighting continued in the city during the week-end [Oct. 27-28] though on a reduced and more sporadic scale. The severest actions have been on the hills of Buda, near the island of Csepel, south of the city, at an intersection of the Stalin road in the middle of the capital, and at the Maria Theresa Barracks. Here a group of students and soldiers rejected four successive orders to surrender. Soviet tanks fired at point-blank range. This afternoon the tanks resumed the bombardment.

"The Russians are using their heavy tanks purely as extermination squads. They rumble from one district to another, flattening every house where even one sniper's rifle is heard, or suspected. Moscow may restore 'order' by these means, but it will never quell the fresh waves of hate which every new action sets up. Of the dozens of moving incidents I have seen in the streets the most pathetic sight was the action of a little Hungarian boy, aged about eight or nine. He clambered into a Soviet tank and poured a little can of petrol on to its tracks in an attempt to start a blaze It is hard to think of any Communist Government reshuffle which will pacify this spirit

"Rebels in the streets of Budapest thrust into my hand slips of paper with the wavelength of 'Free Hungarian' radio stations operating allegedly in Vesprzem, Gyor, Miskolc, and Pecs. This indicates that all four regional centres are wholly or partly in rebel hands . . .

"Typical of this latest phase are a few hundred students and workmen who barricaded themselves behind stone and rubble barriers in the two main squares of Buda. As far as is known .. they had hardly any arms or food Yet they rejected surrender appeals across the barricades, even when made by friendly soldiers of the Hungarian Army. Their answer was 'We will stay here and die if necessary until the Russians agree to leave our homeland.' Later the students were dispersed. In one clash four were killed and 15 injured.

"Similar outbursts of fanatical patriotism are reported from all over the country. In the Eastern provinces a sort of peasants' guerrilla war is said to have broken out . . . At Tatabanya the colliers are reported to be on strike . . . Regional revolutionary committees have been set up in Sopron and Hegyeshalom, on the Western frontier. In all cases the main targets of hate have been the Russian troops and the political police . . ."

Other reports reaching the outside world from Hungary laid similar stress on the hatred and detestation of the population for the secret police, many members of which had been killed during the uprising. The following despatch was received in London on Oct. 28 from the Vienna Correspondent of *The Times*, who had crossed the Austrian frontier and visited the insurgent-held town of Magyarovar:

"Yesterday [Oct. 27] your Correspondent was able to cross into Hungary from the Austrian frontier town of Nickelsdorf, and go on about 10 miles to Magyarovar In Magyarovar on Friday morning [Oct. 26] some 80 people were killed and about 100 wounded when a detachment of A.V.H. (secret police) opened fire on a large unarmed crowd of demonstrators who had gone to their barracks on the outskirts of the town to tear down the red star which, for Hungarians, has become the detested symbol of Russian oppression. The people of Magyarovar took their revenge. Of the four officers of a detachment of A.V.H. about 20 strong, one was killed on the spot. The three others took refuge in a cellar of the barracks. One of the three, said to have been the commander, escaped The others were killed in the afternoon. One was lynched; the other was hanged from a plane tree in one of the main streets . . ."

The *Times* correspondent also described how he had seen the bodies of men, women, and children, including a baby of 18 months, who had been mercilessly shot down by the secret police in Magyarovar during the demonstrations.

October 29-30. - M. Nagy ends Single-Party Rule. - Promise of Free Elections. - Revival of Non-Communist Parties. - Formation of All-Party Government. - Soviet Statement on Troop Withdrawals from East European Countries.

In a broadcast on Oct. 30, M. Nagy announced the "discontinuation of the one-party system" and the formation of a National Government based on the Hungarian Workers' party, the Smallholders' party, the National Peasants' party, and the Social Democrats. Budapest Radio stated that the Hungarian Workers' party was represented by M. Nagy and M. Kadar; the Smallholders' party by M. Zoltan Tildy and M. Bela Kovacs (its former secretary-general); and the National Peasant party by M. Ferencz Erdei. [The Social Democratic member was not named, but it was subsequently announced on Nov. 3 (see page 15192, first column) that it was represented in the all-party government by Mme. Anna Kethly as Minister of State.]

M Tildy was Prime Minister of Hungary's first post-war non-Communist Government, and President of the Republic until 1948, when he was dismissed and banished. M Kovacs and M Erdei also played a prominent part in Hungarian politics in the immediate post-war years until the Communists seized power in 1948 and suppressed the former democratic parties.

M. Nagy announced in his broadcast that the new Government fully recognized the Workers' Councils and revolutionary committees set up in different parts of Hungary, called upon those bodies to support the Government, and promised the immediate release of Cardinal Mindszenty. He reiterated that the Soviet forces had agreed to withdraw unconditionally from Budapest, and ended his broadcast with the words: "Long live free and independent Hungary!" M. Nagy was followed at the microphone by M. Tildy and M. Erdei, who called for full support for the National Government, emphasized that the country's future would be decided by free and democratic elections, and called upon former party leaders in the provinces to re-form the Smallholders' party and the National Peasants' party.

On Oct. 30 and 31 Budapest Radio and the Hungarian Defence Ministry issued statements from time to time saying that the Soviet forces had begun to withdraw from Budapest, in conformity with the promise made to M. Nagy. Though the situation was obscure at the time, it subsequently became clear, however, that so far from withdrawing from Budapest, strong Soviet reinforcements of tanks and infantry had crossed the Hungarian frontiers to reinforce the troops already in the country. Rumours of a strong Soviet build-up during this period were fully confirmed when the Soviet forces suddenly launched an attack without warning at dawn on Nov. 4 (see below).

Meanwhile, the Soviet Government had issued a lengthy declaration on Oct. 30 expressing its readiness to enter into discussions with the other countries which were parties to the Warsaw Treaty for the withdrawal of Soviet forces from those countries, and referring also to the situation in Hungary. The statement said:

"It is common knowledge that Soviet units are stationed in Hungary and Rumania under the Warsaw Treaty, and in Poland under the Potsdam Four-Power Agreement and the Warsaw Treaty. With the aim of safeguarding the mutual security of the Socialist countries, the Soviet Government is ready to examine, with the other countries that are members of the Warsaw Treaty, the question of the Soviet forces stationed in those countries. In doing so, the Soviet Government bases itself on the principle that the stationing of the forces of any member-State of the Warsaw Treaty on the territory of another member-State is done . . . only with the consent of the State on whose territory and at whose request those forces have been so stationed"

With reference to the situation in Hungary, the Soviet statement said: "Developments have shown that the working people of Hungary . . . are justly raising the question of eliminating serious shortcomings in the sphere of economic development . . . and . . . bureaucratic distortions in the machinery of government. To this just and progressive movement of the working people, however, there have adhered forces of black reaction and counter-revolution which are trying to exploit the dissatisfaction of a section of the working people in order to undermine the foundations of the people's democratic system in Hungary and restore the old regime of landlords and capitalists. The Soviet Government . . . deeply deplores the fact that developments in Hungary have led to bloodshed. At the request of the Hungarian Government, the Soviet Government have agreed to the entry into Budapest of Soviet military units in order to help the Hungarian authorities to restore order in the city. Bearing in mind that the further stationing of Soviet military units in Hungary may provide a pretext for making the situation more tense, the Soviet Government have instructed its Military Command to withdraw Soviet military units from Budapest as soon as the Hungarian Government finds it necessary. At the same time, the Soviet Government is ready to enter into talks with the Hungarian People's Republic and the other parties to the Warsaw Treaty on the question of the stationing of Soviet forces in Hungary."

October 31. - Hungary leaves Warsaw Pact. - Appeal to United Nations for Neutrality Guarantee. - M. Nagy's Protest against Soviet Troop Movements. - Release of Cardinal Mindszenty.

The Hungarian Government sent a message on this date to the U.N. Secretary-General, Dr. Hammarskjöld, announcing Hungary's withdrawal from the Warsaw Treaty, appealing to the U.N. and the great Powers to guarantee Hungary's permanent neutrality, and giving notice that the Hungarian delegation would raise this matter at the forthcoming regular session of the General Assembly.

Budapest Radio announced during the day (1) that M. Nagy had seen the Soviet Ambassador, protested to him at the continuing movement of Soviet troops and armour into Hungary, and informed him that Hungary intended to leave the Warsaw Pact and pursue a policy of absolute neutrality; (2) that M. Nagy had sent a telegram to the Soviet President, Marshal Voroshilov, asking the Soviet Government to fix a date and place for negotiations on the withdrawal of Soviet forces from Hungary; and (3) that he had verbally informed all accredited diplomats in Budapest of his talks with the Soviet Ambassador. In a broadcast to the nation, M. Nagy said that the Government would demand the immediate withdrawal of Soviet forces from Hungary and the termination of Hungary's participation in the Warsaw Pact.

In conformity with M. Nagy's pledge, Cardinal Mindszenty was released from the monastery in which he had been detained under police surveillance. He returned on the same day to Budapest, where he was welcomed by great crowds.

November 1-3. - Build-up of Soviet Forces in Hungary. - M. Nagy's Protest to United Nations. - All-Party Ministry.

During the first three days of November the situation in Budapest remained relatively quiet, though extremely tense. Reports by Budapest Radio and by foreign press correspondents said that strong Russian forces were continuing to enter Hungary across the Soviet and Rumanian frontiers and were deploying in strength round the capital, which was being encircled by Soviet armour. Other Soviet tank formations were reported to be thrusting into Western Hungary, towards the Austrian frontier. On Nov. 2 the Hungarian Government ordered its armed forces to take up positions covering the Parliament building in Budapest and the approaches to the Danube bridges.

M. Nagy sent a further communication to the U.N. on the latter date drawing attention to the continued entry of strong Soviet forces into Hungary, and pointing out that they had taken control of the principal railway lines and were moving into the western part of the country. The letter reiterated Hungary's wish to leave the Warsaw Pact, to follow a policy of neutrality under U.N. guarantee, and to enter into immediate negotiations with the U.S.S.R. for the withdrawal of Soviet troops. At the same time M. Nagy protested to the Soviet Ambassador at the Russian troop movements, stating that Hungary intended to appeal to the Security Council.

A Budapest broadcast of Nov. 3 said that the all-party National Government would be headed by M. Nagy as Prime Minister, General Maleter as Defence Minister, and seven Ministers of State, including M. Janos Kadar, M. Zoltan Tildy, M. Bela Kovacs, and Mme. Anna Kethly. It was representative of all the five parties which existed in 1945 (Smallholders, National Peasants, Social Democrats, Communists, and Democrats), and was noteworthy for the inclusion of Mme. Kethly, a prominent Social Democratic leader who had been imprisoned for many years under the Communist regime. M. Muennich, whose dismissal from the previous Government had been demanded by many of the insurgent committees, was not a member of the new Government.

November 4. - Soviet Army attacks Budapest. - Overthrow of Nagy Government. - "Puppet" Communist Government set up by M. Kadar at Szolnok.

At dawn on Nov. 4 the Soviet Army, having completely encircled Budapest, launched a massive attack with tank and infantry forces to crush the national uprising. During the night of Nov. 3-4 General Maleter, the Hungarian Minister of Defence, and General Istvan Kovacs, Chief of Staff of the Hungarian Army, had been negotiating at Soviet headquarters for the withdrawal of Russian troops from Budapest, and the Soviet attack was apparently launched while these talks were still in progress. It was subsequently reported that Generals Palmeter and Kovacs had been forcibly detained by the Russians during the negotiations.

The first news of the Soviet action was given in a 6 a.m. broadcast by M. Nagy, who announced that Soviet troops had unleashed an unprovoked attack on Budapest with the aim of overthrowing the Hungarian Democratic Government, and that the Hungarian armed forces were resisting the aggression. For two hours thereafter Budapest Radio broadcast this announcement at frequent intervals in Hungarian, Russian, English, French, and German, and made repeated appeals to the United Nations to come to Hungary's assistance. At 8 a.m., after playing the Hungarian National Anthem, Budapest Radio suddenly went off the air, its last words being "Help Hungary! . . . help us! . . . help us!"

Later in the day, however, Free Hungarian radio stations in many parts of the country broadcast appeal after appeal to the outside world, calling upon "all civilized peoples" to help the Hungarian nation in its struggle for independence against Soviet aggression. The broadcasts said that the Hungarian people were fighting not only for themselves but for Europe and the whole democratic world; that men, women and children were resisting the Soviet tanks in all parts of the country; and that the entire people were prepared to give their lives for Hungary. Again and again these broadcasts asked: "What is the United Nations doing? What is the United Nations doing?"

From official information broadcast by the Government radio station, broadcasts by British and other correspondents in Budapest, and teleprinter messages sent to Vienna from the offices of *Szabad Nep* (the official Communist organ) it appeared that the Soviet Command had presented an ultimatum to M. Nagy's Government at 4 a.m. calling upon it to surrender by noon, failing which Budapest would be bombarded. This ultimatum—apparently designed to prevent M. Nagy's Government from fulfilling its promises of a free, independent, and democratic Hungary—was rejected, and M. Nagy apparently tried to get in touch with Generals Maleter and Kovacs. As stated above, they were detained by the Russians with whom they were negotiating at the time.

At noon on Nov. 4 Moscow Radio interrupted its programme to announce that a "Hungarian revolutionary workers' and peasants' government" had been formed by Janos Kadar; that it had "appealed to the Soviet Command for help in putting down the mutineers protected by the Nagy Government"; and that Soviet troops had "crushed the forces of reactionary conspiracy among the Hungarian people" and were "liquidating the counter-revolutionary gangs." The broadcast said that the Nagy Government had "disintegrated owing to the withdrawal of honest patriots from it."

As stated in the Moscow broadcast, M. Janos Kadar had defected from M. Nagy's all-party government—apparently after the Soviet ultimatum—and had set up a "puppet" government at Szolnok, headed by himself and under Soviet protection. Its membership was given by Moscow radio as: Janos Kadar, Premier; Ferencz Muennich, Deputy Premier, Armed Forces, and Security; Georgy Marosan, Minister of State; Imre Horvath, Foreign Affairs; Istvan Kossa, Finance; Antal Apro, Industry; Imre Dego, Agriculture; and Sandor Ronai, Trade. All were Communists or Communist sympathizers.

Violent fighting broke out in Budapest after the Soviet attack on the city, the Hungarian Army and great numbers of workers and students fighting desperately against Russian troops attacking the Parliament building, the Danube bridges, railway stations, and factories and strongpoints held by the patriots. Barricades were erected in the streets, and great numbers of the civilian population—including women and even children—fought the Soviet tanks with "Molotov cocktails," petrol cans, and improvised weapons. Subsequent reports by press correspondents, and by the thousands of refugees who crossed the Austrian frontier, said that the Russians had in many cases behaved with the greatest brutality and had mown down large numbers of civilians by artillery and tank fire. Particularly desperate resistance was offered by the factory-workers in the industrial areas of Budapest, while in the provinces the lightly-armed insurgent forces were similarly attempting to halt the movement of Soviet armour. A general strike, which had been in progress for some days in the areas held by the revolutionaries, spread throughout the whole of Hungary as the workers downed tools in protest against the Soviet aggression. Proclamations by the Workers' Councils in many parts of the country declared that the strike would continue until all Russian troops had left the country and democratic freedoms were restored.

November 5-10. - Hungarian People's Resistance crushed by Soviet Army. - Soviet "Hunger Blockade" of Budapest. - Soviet Deportations of Hungarian Youths.

Despite heroic resistance by the Hungarian armed forces and people, and in particular by the workers and students, the Soviet Army had succeeded by Nov. 10 in crushing the popular revolt in almost all parts of Hungary, apart from a few isolated

areas where the patriot forces were still holding out or resorting to guerrilla tactics. In Budapest, bitter fighting went on for many days in which Hungarian troops, workers' detachments, groups of students, and other civilians attempted to hold strongpoints on Csepel Island, at Buda Castle, and in other areas of the city. Outside the capital, particularly heavy fighting took place at Pecs—where, according to unconfirmed reports, the workers had destroyed the uranium mines to prevent their continued exploitation by the Russians—and at Dunapelte (a new industrial town, formerly known as Sztalinvaros, 35 miles south of Budapest), where powerful forces of Soviet tanks, artillery, and aircraft were thrown into action against steel-workers who were continuing to offer desperate resistance. On the Western frontier Soviet tanks had arrived at Gyor, Magyarovar, Hegyeshalom, and Sopron, and were preventing refugees from crossing into Austria. A few Free Hungarian radio stations remained on the air until Nov. 9, making appeal after appeal to President Eisenhower and the United Nations, and stressing repeatedly that ammunition was running low and that the situation was desperate.

The Soviet Command in Budapest issued a number of proclamations on Nov. 5-6 declaring *inter alia* that the Russian forces were in Hungary "not as conquerors but as friends" and that the sole aim of Soviet military intervention was to crush the "counter-revolutionaries" and "criminal reactionaries" and to prevent the "establishment of a Fascist dictatorship." At the same time repeated demands were made that the insurgents should cease fighting immediately and hand in their arms, under penalty of "severe punishment." An important contributory factor in the Soviet conquest of Budapest was the action of the Soviet military authorities in preventing food supplies from reaching the city, where the population was seriously short of food and large bread queues were forming.

A description of the situation in Hungary in the last stages of the people's revolt, before it was finally crushed by the Soviet Army, was given in the following despatch (Nov. 9) from Vienna by Mr. Terence Prittie, correspondent of the *Manchester Guardian*:

"Soviet brutality is contributing substantially towards the prolongation of the increasingly bitter fighting in Hungary, where the Free Hungarian forces are continuing to resist the 200,000 men of the Soviet Army and its 4,600 tanks and 2,000 aircraft for the sixth successive day. In Budapest many Free Hungarians have retreated into narrow alleys where the Russian tanks cannot follow them and are resisting all the attempts of Russian infantry to drive them out.

"The reason for the increasing bitterness of resistance which has no hope of ultimate success is the direct contravention of the rules of war by the Russians. In many parts of Hungary villagers have been shot because arms have been found on their premises, even though they had stopped fighting . . . In Budapest some Hungarian soldiers were taken, after surrendering, to Rakoczy Square, where they were shot in cold blood. The soldiers had surrendered after hearing Budapest radio broadcast the terms of an alleged amnesty for all who laid down their arms. Russian tanks have also fired several times on bread queues. This news has sent a shudder of horror through Austria . . .

"The Kadar 'quisling' Government is showing itself utterly unable to deal with the situation . . The helplessness of the regime is shown by its admission, for the first time, that the Free Forces may have been inspired by 'genuine and honourable motives' in taking up arms. Hitherto it had been calling the forces 'Fascists' and 'counter-revolutionaries.' . . . This morning Budapest radio declared . 'Never has any Government faced greater difficulties than ours. The factories and all transport services are not working. Armed bands are still fighting and looting. The population of Budapest is threatened with famine.' . . .

"Outside the capital fierce fighting is reported at Gyor, where 300 Soviet tanks are said to be taking part in the assault on the Free Hungarian stronghold. Fighting is undoubtedly going on in other parts of southern and western Hungary, but there are few authentic details . . "

Other authoritative accounts of conditions in Hungary were given on Nov. 11 by Herr Peter Strasser, a Socialist member of the Austrian Parliament and a delegate to the Council of Europe, who had been in Budapest from Nov. 3-10 and had arrived back in Austria after an adventurous journey; and on Nov. 12 by the Vienna Correspondent of *The Times*, who had returned the previous day from Budapest.

Herr Strasser laid special emphasis on three points in the Hungarian situation (1) The Hungarians had been fighting as a united people against a Soviet invasion; virtually the whole Army, the workers and peasants, and even the police were united in opposing the Soviet aggression, and there was no talk in Hungary of "Free" or "insurgent" Hungarians, as was the case in the outside world. (2) The Russians had crushed active resistance, but their occupation was inconclusive since it was opposed by the whole population. (3) The Russians had so far been unable to organize an administration commanding the loyalty of even a small part of the population

The Times Correspondent sent the following despatch to London on conditions in Budapest:

"The heavy fighting in the centre of Budapest is now over. The crowds on Lenin Boulevard [one of the main streets of Budapest] walk among the awful havoc wrought by Russian guns and mortar fire. The patriots barricaded this section of the boulevard with paving stones, tram rails, and anything else suitable they could find and turned it into a strongpoint. The Soviet commander brought tanks, mobile guns, and heavy mortars to bear upon it for more than a day, leaving a trail of ruin and desolation. The façades of houses are torn through with shell holes, and whole vertical sections of buildings have been blasted away by mortar bombs . . . Only the corpses have been removed . . .

"The repression of Budapest was carried out exclusively by armoured units, tanks supported by infantry in armoured troop-carriers, and self-propelling guns Their tactics were to neutralize resistance strongpoints with heavy concentrations of fire, leaving the rest of the city, apart from tank patrols along the main streets, much to itself Beyond the sound of distant gunfire at about 4.45 a.m., which many people took for a local engagement . . . there was nothing to indicate a major Soviet assault on Budapest on Sunday, Nov. 4, until Mr Nagy announced it over the radio . . . The surprise was all the more effective because the evening before the Russians had expressed their readiness to negotiate with the Nagy Government on the withdrawal of Soviet troops from the country, fixing 10 p.m. as the time for a meeting with the newly appointed Minister of Defence and other Hungarian emissaries. But the emissaries never returned from this meeting."

Reports reaching Vienna on Nov. 13 indicated that the Russians were deporting large numbers of young Hungarians of military age to the U.S.S.R. in sealed trains. Some of those being deported were said to have thrown messages out of the trains saying that they were being sent to Russia. Railway workers in north eastern Hungary, hearing of this, were reported to have blown up the railway lines, stopped a train, and freed some of the deportees. A British Foreign Office spokesman confirmed on Nov. 15 that deportations were in progress "on a substantial scale."

Figures of killed and wounded during the first ten days of November and the last week of October were necessarily conjectural, but the most reliable estimates stated that over 25,000 Hungarians had been killed in Budapest alone, many of them civilians taking part in the fighting, and at least 50,000 wounded. Before the Free Radio stations went off the air, they had claimed that at least 3,500 Russian troops had been killed in the fighting in Budapest

M. Kadar's Promises of Reforms. - Admission of Chaotic Conditions in Hungary. - Continuation of General Strike.

In a broadcast from Budapest Radio on Nov. 11, M. Kadar announced a number of "concessions" to the Hungarian people "in the interests of Hungary's injured national pride," including the following: (1) a promise that all political groups would be represented in a "Government of national unity based on the ideology of the people's democracy"; (2) the replacement of the Communist red star by the former national emblem in the Hungarian flag (the traditional "Kossuth emblem," abolished in 1948); (3) the restoration of the traditional uniforms in the Hungarian Army in place of the existing Soviet-type uniforms; (4) abolition of compulsory teaching of Russian in schools; (5) a "purge" of senior Communist officials; (6) confirmation of M. Nagy's promise that the secret police would be abolished. M. Kadar said that these reforms would be "undertaken immediately," and that early negotiations would be started for the withdrawal of Soviet troops from Hungary.

M. Kadar admitted that the supply position in Budapest was "serious," that many houses had been destroyed and large numbers of people were homeless, that there were no supplies of fuel or petrol in the capital, and that the provision of fuel was "one of the greatest problems." He claimed that "the weapons are silent throughout Hungary," except for "isolated armed groups still resisting, particularly at night." After blaming "the mistakes of the Rakosi regime" for the revolt which began on Oct. 24, and declaring that "the indignation of the masses was justified," M. Kadar announced that food supplies were being sent by the U.S.S.R. and the other "people's democracies," as well as by the International Red Cross and the Western countries.

In a letter to Marshal Bulganin on Nov. 5, M. Kadar had appealed for immediate assistance in "food, fuel, building materials, and medical supplies." In reply, Marshal Bulganin promised that the Soviet Government would send to Hungary 5,000 tons of grain and flour, together with other foodstuffs and supplies.

The chaotic conditions in Hungary, officially admitted by M. Kadar, were intensified by the general strike, which continued even after the Soviet Army had established its control throughout the country. On Nov. 11 (by which date the strike had lasted for 19 days) *Szabad Nep* admitted that 70 per cent of Hungary's factories were still idle. Many appeals for the resumption of work, coupled with promises of wage increases, were made by the Kadar Government, in most cases with little or no response. Reports from the Hungarian capital and other parts of the country stated that the population generally were resorting to "passive resistance" tactics, and that large numbers of civilians were wearing rosettes of the red-white-green national colours "under the noses" of the Russian troops.

Manifestos by a number of patriotic organizations were distributed in the streets of Budapest on Nov. 11-12 reiterating the demands for reforms made at earlier stages of the revolt. One such manifesto, signed by the "Workers' Councils of Budapest," expressed willingness to resume work immediately providing the Kadar Government agreed to (1) free elections, in which all parties should participate who had declared their readiness to accept "Hungary's socialist achievements"; (2) the release of M. Nagy and his colleagues, of Generals Maleter and Kovacs, and of all insurgents taken prisoner; (3) the immediate withdrawal of Soviet troops from Budapest, followed by their "orderly withdrawal from the whole of Hungary"

Similar demands were put forward in a manifesto issued on behalf of Hungarian authors, journalists, and students, as well as the entire staffs of the Hungarian broadcasting services and news agencies.

It subsequently became known that M. Nagy had taken refuge in the Yugoslav Embassy, while Cardinal Mindszenty was believed to have taken refuge in the U.S. Legation. Madame Anna Kethly, who during the early stages of the revolt had visited Vienna to make contact with Austrian Socialists, and who had been prevented by Russian troops at the frontier from returning to Budapest, subsequently flew to New York to contact U.N. headquarters. In a press statement in Budapest on Nov. 2, Cardinal Mindszenty had appealed to the U.N. and the Western Powers to support Hungary in her fight against Soviet domination, and to relieve distress. He declared that the entire Hungarian people demanded the withdrawal of the Russians, and praised the heroism shown by the insurgents.

The Refugee Exodus.

The Soviet attack, and the subsequent suppression of the people's uprising, led to a mass exodus of some 28,000 civilian refugees—many of them women, children, and aged persons—from Hungary into Austria, the great majority crossing the frontier at the Austrian border village of Nickelsdorf. Free Hungarian fighters from Gyor, Magyarovar, Hegyeshalom, Sopron, and other frontier towns, as well as Hungarian soldiers, crossed into Austria after firing their last cartridges at the Russians. Among the large numbers of child refugees brought across the frontier by their parents were many wearing labels bearing the words: "This is my child—care for him—we return to fight for freedom."

Heart-rending descriptions of the pitiful condition of the Hungarian refugees were given by the Austrian authorities, and by the many British, U.S., Swiss, Swedish, and other Red Cross officials and private individuals who went to Austria to do what they could to alleviate the distress. A picture of the conditions prevailing was given in a television relay to Britain (via the Eurovision network) direct from a refugee transit camp near Vienna. Among refugees who recounted their personal experiences were 13 young people who said that they were the sole survivors of a band of over 200 who fought the Russians in the streets of Budapest, a wounded girl who described how her 11-year-old brother and two other small boys had been killed by the Russians when they were trying to blow up a Soviet tank; and a young man, a resistance fighter from Budapest, who described how he had seen a Russian soldier deliberately machine-gun a wounded child lying in the streets, under the eyes of the child's mother.

The Office of the U.N. High Commissioner for Refugees in Geneva announced on Nov. 14 that the United States had offered to take 5,000 Hungarian refugees, Switzerland 4,000, Argentina, Australia, and the German Federal Republic 3,000 each, the United Kingdom 2,500, Italy 2,000, Sweden and the Netherlands 1,000 each, and New Zealand 500. In addition, Canada was granting immigration priority to Hungarian refugees and contributing $100,000 for relief; France had agreed to accept refugees without any limitation on their numbers; Norway had offered to take refugees who were tubercular or otherwise physically handicapped; and other countries had offered to give a home to unspecified numbers of refugee mothers and children.—(Times - Daily Telegraph - Manchester Guardian - News Chronicle - New York Times - New York Herald Tribune - Le Monde, Paris - Soviet Weekly - Neue Zürcher Zeitung) **(Prev. rep. Hungary, 15057 A.)**

Note. International and U.N. reactions to the events in Hungary will be described in subsequent issues. (Ed. K.C.A.)

A. UNITED KINGDOM. — Chester By-election.

The City of Chester by-election, caused by the appointment of Mr. Basil Nield, Q.C. (Conservative) as Recorder of Manchester, was held on Nov. 15 with the following result:

Temple, John M. (Conservative)	21,137
Carter-Jones, Lewis (Labour)	14,789
*Llewellyn, J. D. S. (Liberal)	4,942
No change. Conservative majority ..	6,348

*Forfeited deposit.

Figures at the general election were: B. Nield, 24,905, J. M. Forrester (Lab.) 13,903, J. D. S. Llewellyn (L.) 5,145—Conservative majority, 11,002.

The Conservative candidate received 51.7 per cent of the votes in the by-election (56.7 per cent at the general election), the Labour candidate 36.2 per cent (31.6 per cent), and the Liberal candidate 12.1 per cent (11.7 per cent). The Conservative proportion of the poll thus dropped by 5 per cent, the Labour proportion increased by 4.6 per cent, and the Liberal proportion increased by 0.4 per cent.

71.5 per cent of the electorate voted in the by-election, compared with 77.8 per cent at the general election. The electorate numbered 57,137, an increase of 685 since the general election.

Mr. Temple (46), a farmer, was chairman of the Chester Conservative Association prior to the by-election.

B. INDIA. — Separate Ministries of Food and Agriculture. - New Ministerial Appointments.

It was announced in New Delhi on Oct. 17 that the Indian Ministry of Food and Agriculture had been divided into separate Ministries—a Ministry of Food and a Ministry of Agriculture—with immediate effect.

The new Ministry of Food, it was stated, would be concerned with imports of foodgrains from abroad, as well as their internal procurement, the fixing of selling prices for foodgrains and their allocation to various States, the setting-up of machinery for their distribution, and all other related functions, it would also deal with sugar and vegetable oil products. All the other functions of the Ministry of Food and Agriculture would be transferred to the new Ministry of Agriculture.

A press statement issued at the same time said that the Government had always attached great importance to maintaining prices of foodgrains at a reasonable level and ensuring adequate supplies to meet the demand in different parts of the country. The increasing outlay during the period of the Second Plan carried with it the risk of a corresponding increase in the demand for foodgrains and other essential consumer goods. In order to meet this situation and prevent prices of foodgrains from increasing, it had been considered necessary to strengthen the machinery of food administration and put it under a whole-time Secretary.

It was also announced that Mr. A. P. Jain, hitherto in charge of the combined Ministry, would hold the two separate portfolios of Food and of Agriculture; that Dr. Panjabrao Deshmukh, Minister of Agriculture, would be attached to the Ministry of Agriculture; and that Mr. M. V. Krishnappa, hitherto Deputy Minister of Food and Agriculture, would be Deputy Minister of Food.—(Indian High Commissioner's Office, London) **(Prev. rep. 15130 A.)**

C. UNITED KINGDOM. — Local Authority Loans.

It was announced by the Treasury on Oct. 19 that the rate of interest charged on loans advanced to local authorities from the Local Loans Fund would be changed as follows as from Oct. 20 (previous rates shown in parentheses): (*a*) for not more than 5 years: 5¼ per cent (5¼), (*b*) for 5-15 years: 5¾ per cent (5½); (*c*) for over 15 years: 5¾ per cent (5½). These increases would only apply to future loans and were designed to keep the lending rates from the Public Works Loan Board in line with those prevailing in the market for loans to local authorities.
(Treasury Press Office) **(Prev. rep. 14821 A, page 14828.)**

D. UNITED STATES. — Increase in Bank Rate.

The Federal Reserve Banks of New York, Philadelphia, Chicago, and Richmond increased their rediscount rate on Aug. 25 from 2¾ per cent to 3 per cent, i.e. the rate which had been operative for the Federal Reserve Banks of Minneapolis and San Francisco since April 13. By Sept. 2 the six remaining Federal Reserve Banks had similarly increased the rate to 3 per cent.—(New York Times) **(Prev.rep. 14858 D; 14799 B.)**

E. ITALY - PORTUGAL. — Legations raised to Embassy Status.

It was announced on Oct. 16 that the Italian and Portuguese Governments had decided to raise their respective Legations in Lisbon and Rome to the status of Embassies.
(Giornale d'Italia, Rome)

A. JAPAN - SOVIET UNION. — Negotiations for Conclusion of Peace Treaty. - Bulganin-Hatoyama Declaration on Termination of State of War and Exchange of Ambassadors. - Protocol on Trade Relations.

At the Soviet Government's suggestion, negotiations for a peace treaty between the Soviet Union and Japan opened on June 1, 1955, but were finally suspended on Aug. 13, 1956, after the two Governments had failed to reach agreement on the future of the southern Kurile Islands, which were occupied by the U.S.S.R. in 1945. As a result of further negotiations conducted in person by the Prime Ministers of the two countries, however, a joint declaration ending the state of war between them, and re-establishing diplomatic relations, was signed in Moscow on Oct. 19, 1956. Details of the negotiations are given below.

Soviet Overtures to Japan.

Mr. Domnitsky, head of the unofficial Soviet mission in Tokio, handed an unsigned and undated document to Mr. Hatoyama (the Japanese Prime Minister) on Jan. 25, 1955, proposing discussions for the normalization of Soviet-Japanese relations. This statement recalled that a desire to restore normal relations between the two countries had been expressed by the Soviet Government on Oct. 12, 1954 (see 13855 A), by Mr. Molotov (then Soviet Foreign Minister) on Dec. 16, 1954, by Mr. Shigemitsu (the Japanese Foreign Minister) on Dec. 11, 1954, and by Mr. Hatoyama himself (see 14005 A), and suggested that negotiations should take place either in Moscow or Tokio.

After the authenticity of this document had been officially confirmed by Mr. Sobolev (head of the Soviet delegation to the U.N.), the Japanese Government decided on Feb. 4, 1955, in favour of opening negotiations. Following a protracted exchange of Notes on the venue of the meetings, it was agreed on April 25 to hold them in London.

The London Discussions—June 1955 - March 1956.

Negotiations accordingly opened on June 1, 1955, at the Soviet Embassy in London, the delegations being led respectively by Mr. Malik, the Soviet Ambassador, and Mr. Matsumoto, formerly Japanese Ambassador to Britain. The Soviet Government's proposals for a peace treaty, submitted by Mr. Malik on June 14, were described by Mr. Shigemitsu on June 16 as "almost identical" with those put forward by Mr. Gromyko at the San Francisco Peace Conference (see 11721 A), although, unlike Mr. Gromyko's proposals, they contained no reference to restrictions on Japanese rearmament. The main Soviet proposals were reported to be as follows:

(1) Japan should relinquish all claims to the Kurile Islands, South Sakhalin, the Habomai Islands, and Shikotan.

(2) Japan should undertake not to join any military alliance directed against any country which took part in the war against Japan.

(3) Only the naval vessels of countries bordering on the Sea of Japan should be allowed free passage through the Tshushima Straits (between Japan and Korea), the Tsugara Straits (between Honshu and Hokkaido), and the Soya and Nemuro Straits (dividing Hokkaido from Sakhalin and the Kuriles).

(4) Both countries would sign a mutual non-aggression pact and undertake not to interfere in each other's domestic affairs.

(5) The Soviet Union would renounce all claims to reparations

(6) The Soviet Union would support Japan's admission to the U N, provided this took place simultaneously with the entry of Communist China to the United Nations

(7) Agreements on trade and fisheries would be concluded after the signing of a peace treaty.

Mr. Matsumoto put forward on Aug. 16 the Japanese counter-proposals, which included the return to Japan of South Sakhalin, the Kuriles, the Habomais, and Shikotan, and made no provision for control over the right of entry of naval vessels into the Sea of Japan. The negotiations were temporarily broken off on Sept. 15, 1955, when Mr. Malik left to attend the U.N. General Assembly in New York and Mr. Matsumoto was recalled to Tokio to present an interim report.

Talks were resumed in London on Jan. 17, 1956, but were suspended indefinitely on March 20. Agreement had been reached on clauses dealing with the termination of the state of war; mutual respect for the U.N. Charter; renunciation of claims arising from military operations; the conclusion of a fisheries agreement after the treaty had come into effect, the means of resolving disputes over the implementation of the treaty; non-interference in each other's internal affairs, and methods of abrogating or amending pre-war treaties.

Apart from the repatriation of war prisoners (see below), the main problem at issue remained the question of former Japanese territories.

After the resumption of negotiations the Soviet Union had agreed to return the Habomais and Shikotan to Japanese sovereignty, but continued to uphold its claim to South Sakhalin and the Kuriles on the grounds (*a*) that Japan had renounced all right, claim, and title to these territories by the San Francisco Treaty (see 11681 A), and (*b*) that the Allies had agreed to their cession to the U S.S.R. at the Yalta Conference. Japan, on the other hand, maintained (*a*) that the San Francisco Treaty did not determine the ultimate ownership of South Sakhalin and the Kuriles; (*b*) that Etorofu and Kunashiri (the largest and southernmost islands of the Kurile chain) were an integral part of Japanese territory over which Japanese sovereignty had been recognised by the San Francisco Treaty, which had not defined the term "Kuriles"; and (*c*) that the Soviet Union could not claim title to these territories by virtue of a treaty which it had not signed. The Japanese Government therefore proposed that the southern Kuriles should be returned to Japan, and that the future of South Sakhalin and the northern Kuriles should be decided by a conference of the signatories of the San Francisco Treaty and the Soviet Union. In reply to a Japanese inquiry, the U S. Government had confirmed in October 1955 that neither the treaty nor the Yalta Agreement had attempted to define the Kuriles, and had suggested that a definition should be sought from the International Court.

The Repatriation Question.

At an early stage of the London talks, Mr. Matsumoto had raised the question of the return of Japanese prisoners of war still in Soviet hands, which, he maintained, was a humanitarian rather than a political problem.

In reply, Mr. Malik stated that only condemned war criminals were still held as prisoners, and insisted that the restoration of diplomatic relations was an essential condition for an amnesty. In August 1955 he submitted a list of 1,011 Japanese soldiers and 374 civilians serving sentences for war crimes, in reply to which the Japanese Government supplied a list of 11,177 missing Japanese and asked that their fate should be investigated.

Following earlier talks between representatives of the Japanese and Soviet Red Cross Societies, 1,231 Japanese nationals imprisoned for war and civil crimes had been repatriated by the U.S.S.R. between December 1953 and March 1954, and 88 more in April 1955 A further 98 were repatriated on the completion of their sentences between September 1955 and March 1956, and 62 more, including General Yamada (the former Japanese commander in Manchuria), on June 9, 1956. Negotiations on the subject were continued by Mr Malik and Mr. Nishi (the Japanese Ambassador in London) after the suspension of the London talks.

The Fisheries Agreement of May 1956.

The Soviet Government announced on March 21, 1956, that salmon-fishing off the Kamchatka coast was being "conducted on an ever-increasing scale and threatens these valuable fish with extermination." The salmon catch for both Soviet citizens and others would therefore be restricted during the spawning period (May 15 - Sept. 15) to about 25,000,000 fish in the Bering Sea, the Pacific Ocean adjoining the Kamchatka peninsula, and the Sea of Okhotsk, pending an international agreement on salmon fisheries between the U.S.S.R., Japan, Canada, and the U.S.A. This announcement aroused great concern in the Japanese fishing industry (which had caught 63,000,000 salmon in 1955), and at the Japanese Government's request negotiations for a fisheries agreement were opened in Moscow on April 29, 1956. The Japanese delegation was led by Mr. Kono, Minister of Agriculture, and the Soviet delegation by Mr. Ishkov, Minister of Fisheries.

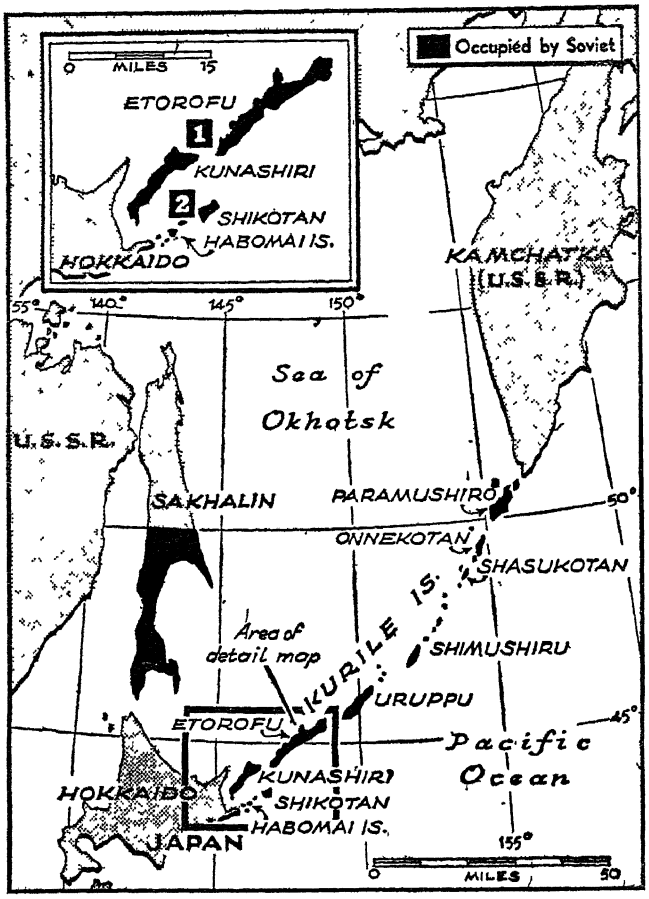
Agreement was reached on May 12 on the terms of (*a*) a 10-year fishing convention and a three-year air-sea rescue treaty, to come into effect on the conclusion of a peace treaty or an exchange of Ambassadors, and (*b*) an interim agreement governing fishing rights in the Bering Sea, the North Pacific, and the Sea of Okhotsk. When, however, the Soviet delegation proposed that the interim agreement should only come into force with the resumption of the peace treaty negotiations, Mr. Kono withdrew from the talks, and only after this Soviet proposal had been withdrawn were agreements signed on May 15. M. Kono undertook in return that the peace treaty negotiations should be resumed by July 31, 1956, either in Tokio or in Moscow.

Under the interim agreement Japanese fishermen were permitted to catch 65,000 tons of salmon annually, and both sides assumed responsibility for the enforcement of fishing regulations. The Japanese Government gave limited recognition to the Soviet mission in Tokio on June 12 as an official agency in charge of fisheries affairs.

The Moscow Talks of July - August 1956.

Negotiations for a peace treaty were resumed in Moscow on July 31, the two delegations being led respectively by the Japanese and Soviet Foreign Ministers, Mr. Shigemitsu and Mr. Shepilov. In his opening statement Mr. Shigemitsu stated that Japan had renounced her claim to South Sakhalin and the northern Kuriles, but that she could not relinquish Etorofu and Kunashiri, which had always been undisputed Japanese territory. He also appealed for a settlement of the repatriation question, in the interests of friendship between the two countries.

At the second meeting (Aug. 3) Mr. Shepilov reaffirmed the Soviet view that Etorofu and Kunashiri formed part of the Kuriles, the future of which had been decided by the Yalta Agreement and the San Francisco Treaty. In reply, Mr. Shigemitsu denied that Japan could be bound by the Yalta Agreement, to which she was not a party, and pointed out that under the Atlantic Charter and the Potsdam and Cairo Declarations



The Kuriles, showing islands whose sovereignty is in dispute between Japan and the U.S.S.R. The Soviet Government insists on the retention of Etorofu and Kunashiri, but has agreed to return the Habomai and Shikotan Islands to Japan after the conclusion of a peace treaty. (*New York Times*)

the Soviet Union had renounced territorial aggrandizement as a war aim. As both sides continued to adhere to their positions, the talks remained deadlocked, even after Mr. Shigemitsu had had a private meeting on Aug. 10 with Marshal Bulganin and Mr. Khrushchev. The talks were suspended on Aug. 13 in order that Mr. Shigemitsu and Mr. Shepilov might attend the London Conference on the Suez Canal question.

A joint statement issued after the meeting on Aug. 3 announced that 114 Japanese war criminals would shortly be released, 80 of them before the completion of their sentences. Mr. Shepilov stated that the remainder would be repatriated after the complete restoration of diplomatic relations between the Soviet Union and Japan

At a press conference in Moscow on Aug. 13, Mr. Shigemitsu said that further hesitation might lead to a rupture of the negotiations, and expressed his belief that it was advisable to conclude a treaty even on the Soviet terms. An emergency meeting of the Japanese Cabinet held on the same day, however, sent him instructions not to sign a peace treaty at the present stage. Private discussions between Mr. Shigemitsu and Mr Shepilov were continued at the Soviet Embassy in London during the Suez conference.

U.S. Note on Territorial Question.

While in London for the Suez conference, Mr. Shigemitsu asked the U.S. Secretary of State, Mr. Dulles, to ascertain the U.S. Government's views on the connexion between the territorial question and the San Francisco Treaty. The State Department accordingly defined the U.S. view in an *aide-mémoire* of September 8.

The *aide-mémoire* stated that the U.S. Government considered that the formal termination of the state of war between Japan and the Soviet Union was long overdue; that "Japan should also long since have been admitted to the U.N., for which it is fully qualified", and that "Japanese prisoners of war in Soviet hands should long since have been returned."

It continued. "The United States regards the so-called Yalta Agreement as simply a statement of common purposes by the then heads of the participating Powers, and not as a final determination by those Powers or of any legal effect in transferring territories. The San Francisco Peace Treaty (which conferred no rights upon the Soviet Union because it refused to sign) did not determine the sovereignty of the territories renounced by Japan, leaving that question, as was stated by the U.S. delegate at San Francisco, to 'international solvents other than this treaty.' It is the considered opinion of the United States that, by virtue of the San Francisco Peace Treaty, Japan does not have the right to transfer sovereignty over the territories renounced by it therein. In the opinion of the U.S.A., the signatories of the San Francisco Treaty would not be bound to accept any action of this character, and they would presumably reserve all their rights thereunder. The U.S.A. has reached the conclusion, after careful examination of the historical facts, that the islands of Etorofu and Kunashiri (along with the Habomai Islands and Shikotan, which are a part of Hokkaido) have always been part of Japan proper, and should in justice be acknowledged as under Japanese sovereignty. The U.S.A. would regard Soviet agreement to this effect as a positive contribution to the reduction of tension in the Far East."

Mr. Dulles stated on Sept. 12 that he had reminded the Japanese Government that if it concluded a treaty with another Power on terms more favourable than those of the San Francisco Treaty, the United States would be entitled under Article 26 of that treaty to claim "comparable benefits."

Termination of State of War. - Bulganin-Hatoyama Declaration.

The failure of the Moscow talks gave rise to serious divisions of opinion inside the Japanese Government and the ruling Liberal Democratic Party. Mr. Shigemitsu's recommendation in favour of accepting the Soviet terms was widely criticized, and a proposal was put forward that Mr. Hatoyama should himself visit Moscow to negotiate an interim settlement which would end the state of war and restore diplomatic relations, while leaving territorial questions for future discussion. The U.S. Ambassador in Tokio, Mr. Allison, told Mr. Shigemitsu on Sept. 10 that his Government was not opposed to such a settlement.

In a personal message on Sept. 11 to Marshal Bulganin, Mr. Hatoyama proposed that the territorial question should be temporarily shelved, and that negotiations should be resumed on the basis of a five-point plan for the ending of the state of war, the exchange of Ambassadors, the repatriation of Japanese war criminals, the renewal of the temporary fishing agreement, and Soviet support for the admission of Japan to the United Nations. Marshal Bulganin's reply (Sept. 15) accepted these terms, but did not make it clear whether the Soviet Union would be prepared to resume negotiations on territorial questions at a later date. Mr. Matsumoto accordingly left for Moscow on Sept. 20 to seek clarification on this point, and on Sept. 29 a formal agreement was reached "to continue negotiations, even after Japanese-Soviet relations are normalized, in order to conclude a peace treaty, including the territorial issue, and to establish complete peace relations."

Mr. Hatoyama's visit to Moscow was opposed by a strong section of the Liberal Democratic Party headed by the former Premier, Mr Yoshida, which contended that the proposed settlement was equivalent to abandonment of Japan's territorial claims. A meeting of Government supporters in the Diet was called on Oct. 2 to consider its proposals, but broke up in disorder without reaching a decision; the Cabinet nevertheless approved Mr. Hatoyama's mission later the same day. A man armed with a knife, who said that he wanted to "express his opinion about Mr. Hatoyama's visit to Moscow," was arrested near the Prime Minister's residence on Oct. 6, and when Mr. Hatoyama left Tokio by air on the following day protest demonstrations were staged by right-wing organizations.

When negotiations opened in Moscow on Oct. 15 it was agreed, at Marshal Bulganin's suggestion, that a joint subcommittee headed by Mr. Gromyko (the Soviet Deputy Foreign Minister) and Mr. Matsumoto should draft agreements on the five points raised in Mr. Hatoyama's letter of Sept. 11. A draft agreement on trade and navigation, submitted by Marshal Bulganin, was also referred to the sub-committee. During the next three days Mr. Kono, who had accompanied the Prime Minister, twice met Mr. Khrushchev to discuss the return of the Habomais and Shikotan, while Mr. Hatoyama also discussed territorial questions with Marshal Bulganin at a meeting on Oct. 17.

A declaration was signed in the Kremlin on Oct. 19 by Marshal Bulganin and Mr. Hatoyama terminating the state of war and re-establishing diplomatic relations between Japan

and the Soviet Union, and providing for the return of the Habomais and Shikotan on the conclusion of a peace treaty, and for the repatriation of Japanese war criminals.

The declaration was worded as follows :

" (1) The state of war between the U S.S R. and Japan ends on the day the present declaration comes into force, and peace and good-neighbourly relations are established between them.

(2) Diplomatic and consular relations between the U.S.S.R. and Japan are re-established, and the two States will exchange Ambassadors without delay. The question of the opening of Consulates in the Soviet Union and Japan will be settled through diplomatic channels

(3) The U.S S.R. and Japan confirm that they will be guided by the principles of the U.N. Charter in their mutual relations, and in particular by the following principles in Article 2 of the Charter :

(*a*) To settle their international disputes by peaceful means in such a manner as not to endanger international peace, security, and justice ;

(*b*) To refrain in their international relations from using the threat of force, or its use, against the territorial integrity or political independence of any State, or from acting in any other manner incompatible with the aims of the United Nations ,

(*c*) The U S.S.R and Japan confirm that, in accordance with Article 51 of the U.N Charter, each of the States enjoys the inalienable right of individual or collective defence ;

(*d*) The U.S S R. and Japan mutually undertake not to interfere directly or indirectly in each other's internal affairs, whether out of economic, political, or ideological motives

(4) The Soviet Union will support Japan's application for membership of the United Nations.

(5) All Japanese citizens sentenced in the Soviet Union will be freed and repatriated as soon as the joint declaration enters into force. As regards those Japanese whose fate is unknown, the U.S.S.R., at Japan's request, will continue to attempt to investigate their fate.

(6) The Soviet Union waives all claims to reparations against Japan The U.S S.R and Japan mutually waive all claims for war damages on behalf of the State, its organizations and citizens, against the other State, its organizations and citizens, which may have arisen since August 9, 1945.

(7) The Soviet Union and Japan agree to start negotiations as soon as possible for the purpose of concluding treaties or agreements with a view to placing their trade, shipping, and other business relations on a stable and friendly basis

(8) The Convention on Fishing in the Open Seas of the North-West Pacific, and the agreement between the Soviet Union and Japan on mutual co-operation in sea-rescue operations signed in Moscow on May 14, 1956, enter into force simultaneously with the present joint declaration Taking into consideration the interest of both the Soviet Union and Japan in the preservation and rational utilization of natural fishing resources and other marine biological resources, the two countries will take measures, in a spirit of co-operation, to preserve and develop the fishing resources and to regulate and limit catches in the open sea.

(9) The U.S.S R. and Japan agree to continue, after the re-establishment of diplomatic relations between them, negotiations on the conclusion of a peace treaty. In this connexion, the U S S.R., meeting the wishes of Japan and taking into account the interests of the Japanese State, agrees to hand over to Japan the Habomai and Shikotan Islands, with the reservation that the actual transfer of these islands to Japan is to take place after the conclusion of a peace treaty between the Soviet Union and Japan.

(10) The present joint declaration is subject to ratification and comes into force when instruments of ratification are exchanged. Exchange of instruments of ratification will take place as soon as possible in Tokio."

A protocol on trade relations providing for most-favoured-nation treatment was signed at the same time, with the following provisions :

" The Governments of the Soviet Union and Japan, acting in accordance with paragraph seven of the joint declaration . . . have agreed to the following .

(1) Pending the signing of the treaties or agreements envisaged in paragraph seven of the above-mentioned declaration, the contracting parties will do their best to develop trade between the two States, for which purpose each contracting party will grant to the other the following treatment :

(*a*) Most-favoured-nation treatment as regards Customs duties, formalities, and other regulations dealing with the importation of goods from, and the export of goods to, the other contracting party ;

(*b*) Most-favoured-nation treatment as regards the ships of the other contracting party in ports ; this treatment applying to the arrival, departure, and anchorage of ships, to all taxes and dues, and also to the loading and unloading of cargoes, and the purchase of fuel, water, and food.

(2) The provisions of the aforementioned paragraph will not limit the rights of each contracting party to apply any kind of prohibition or restriction for the purpose of defending interests affecting its security.

(3) The protocol will enter into force when instruments of ratification are exchanged. The instruments of ratification are to be exchanged in Tokio in the shortest possible time."

The dissident section of the Japanese Liberal Democratic Party issued a statement on Oct. 19 opposing the signing of the declaration as " a betrayal of the people's expectations," and comparing the commitments on the return of the Habomais and Shikotan to " a promissory note without time-limit." (Japanese Embassy Press Office, London - Soviet Weekly - Times - Daily Telegraph - Manchester Guardian - New York Times) **(Prev. rep. Japanese-Soviet Relations, 14005 A ; Prisoners-of-War, 13369 A.)**

A. UNITED KINGDOM. — Nationalized Gas Industry. - Report and Accounts, 1955-56.

The seventh annual report and accounts of the Gas Council and the 12 Area Boards, covering the year ended March 31, 1956, were published on Oct. 9. They showed that the gas industry as a whole earned a net surplus of £531,628 (compared with one of £2,472,553 in 1954-55), bringing the cumulative disposable surplus since Vesting Day to £11,496,872.

The net surplus was achieved after charging £20,922,000 for depreciation and £17,104,000 for interest, and after the transfer by one Area Board of £260,000 to taxation equalization reserve. Eight of the Area Boards earned surpluses together amounting to £1,552,294, but the remaining four—the Scottish, Northern, North Thames, and South-Western Boards—incurred deficits totalling £1,020,666. The largest trading surplus (£928,471) was made by the South-Eastern Board, and the largest deficit (£343,908) by the Northern Board.

Detailed information given in the report is summarized below :

Revenue. Gross revenue totalled £346,100,000 (compared with £325,800,000 in 1954-55), comprising £195,500,000 from the sale of gas, £105,700,000 from the disposal of coke and other by-products, £28,500,000 from sales and hire-purchase of appliances, and £16,400,000 from other sources.

Costs and Prices. Stressing the " considerable increases " in the gas industry's costs during 1955-56, the report stated that the 18 per cent rise in coal prices as from July 18, 1955 (see 14428 A) had cost £12,100,000 by March 31, 1956, and was expected to cost £17,800,000 in a full year, whilst wage increases had cost £5,600,000 and were expected to cost £10,600,000 in a full 12-month period Total cost increases during 1955-56 were £20,100,000, and the probable increase in a full year would be £31,700,000. Between June and September, 1955, all Area Boards had been forced to raise their prices.

Consumption. Sales of gas totalled 2,584,800,000 therms (2,572,900,000 therms in 1954-55). Industrial consumption had risen by about 30,000,000 therms (5 per cent), but domestic consumption had fallen by 28,200,000 therms in spite of an increase of 120,000 (1 0 per cent) in the number of domestic consumers.

Efficiency of Plant. During 1955-56 overall production efficiency in the industry increased from 75.7 per cent to 76 8 per cent, the latter figure comparing with an overall efficiency of 71.0 per cent in 1948 (the year of nationalization), and being equivalent to an annual saving of about 2,000,000 tons of coal.

Coke Sales. The report stated that " for the first time in many years " coal had been in good supply, enabling gasworks to increase their coke output by about 500,000 tons, to nearly 11,000,000 tons.

Capital Expenditure. This amounted to £61,000,000, compared with £55,000,000 in 1954-55. The report explained that the reduction of £3,000,000, compared with the expenditure originally planned for 1955-56, resulted from Government restrictions on hire purchase, and the consequent reduction of the amount involved. Outstanding capital commitments at March 31, 1956 totalled about £45,000,000, against £52,600,000 at March 31, 1955 and £62,500,000 at March 31, 1954. The amount approved for 1956-57 was £52,000,000, or £12,000,000 less than originally intended.

Sales of Appliances and Hire Purchase. As a result of the Government's " credit squeeze " and other financial measures, the number of gas and coke appliances sold on hire-purchase agreements fell by 37 6 per cent (from 1,101,794 in 1954-55 to 687,705 in 1955-56), though cash sales fell by only three per cent. Gross sales of appliances totalled £28,500,000 (£36,620,000 in 1954-55), of which hire-purchase sales accounted for just under £18,000,000 (£26,500,000).

Gas from Oil. Good progress had been made with the installation of plant for making gas from oil, and it was estimated that the 28 plants either in operation, or under construction, or on order would result in an annual saving of 850,000 tons of coal. In addition, agreements to purchase " tail " gases at Shellhaven and Fawley oil refineries were expected to save about 365,000 tons of coal annually.

Natural Gas. Although the Gas Council was now half-way through its 5-year programme in search of natural gas in Britain, the existence of gas in commercial quantities had not yet been proved. Meanwhile investigation was continuing into the possibility of importing liquefied natural gas from the Middle East.

Sir Harold Smith, chairman of the Gas Council, stated on Oct. 9 that he hoped, provided economic conditions did not materially change, that it would be possible to maintain stable prices for gas and coke after the present " pegging " arrangements expired on March 31, 1957. He added that although costs had risen once more since 1955-56, he expected that the gas industry would again make a small surplus in the current financial year.—(Times - Daily Telegraph - Financial Times) **(Prev. rep. 14600 A ; Prices Stabilization, 14977 A.)**

A. UNITED KINGDOM. — Mr. Nutting and Sir Edward Boyle resign from Government. - New Junior Ministers. - Conservative M.P. to sit as Independent.

Mr. Anthony Nutting, Minister of State for Foreign Affairs since 1954, in which capacity he had special responsibility for United Nations questions, resigned from the Government on Oct. 31, when he sent the following letter to Sir Anthony Eden:

"As you know, I have for some time found myself in growing disagreement with certain aspects of our foreign policy in relation to the Middle East. More especially I have advised most strongly against the decisions and actions of the Government with regard to the war now going on between Israel and Egypt For these reasons I do not honestly feel it possible for me to defend the Government's position either in Parliament or in the U.N. I therefore have no alternative but to ask you to accept my resignation . . . "

Sir Edward Boyle, Economic Secretary to the Treasury, also announced his resignation from the Government in a letter to the Prime Minister (Nov. 5) in which he said that he could not support "the recent policy of the Government in the Middle East," and felt bound to associate himself "with that body of opinion which deeply deplores what has been done."

Mr. Nutting, who had been M P for Melton (Leicestershire) since 1945, sent a letter on Nov. 14 to the chairman of the Melton Conservative Association announcing his intention of resigning his seat 'to make way for a Conservative candidate who would be able, if and when elected, to support without reservation the policies of the present Government" He emphasized that he had "advised most strongly against the recent decisions and actions of the Government in the Middle East" and "could not conscientiously defend actions which I felt . . . were in total contradiction of so much that I have stood for." The Melton Conservative Association unanimously passed a vote of confidence in the Prime Minister and the Government on Nov 16.

Sir Edward Boyle, M.P. for the Handsworth division of Birmingham, informed the Handsworth Conservative Association on Nov. 16 that he intended to sit as a back-bencher. After hearing a statement from Sir Edward, the Association expressed its disagreement with his attitude and reaffirmed its loyalty to the Prime Minister and the Government and its support for the Government's Middle East policy. At the same time it recognized the right of a Conservative member to act in accordance with his sincere convictions, expressed appreciation of Sir Edward's past services as M P. for the division; and referred to Sir Edward's intention to sit as a back-bencher "in support of the Government on all other issues"

The following junior Ministerial appointments were announced on Nov. 9 and Nov. 11:

Commander Allan Noble (48), M.P. for Chelsea, as Minister of State for Foreign Affairs in succession to Mr. Nutting. It was announced that Commander Noble would become a Privy Councillor.

Mr. Derek Walker-Smith, Q C. (46), M.P. for East Hertfordshire, as Economic Secretary to the Treasury *vice* Sir Edward Boyle.

Lord John Hope (44), M.P. for the Pentlands division of Edinburgh, as Parliamentary Under-Secretary of State, Commonwealth Relations Office, *vice* Commander Noble.

Mr. David Ormsby-Gore (38), M.P. for Oswestry, as Joint Parliamentary Under-Secretary of State, Foreign Office, *vice* Lord John Hope.

Mr. Frederick Erroll (42), M.P. for Altrincham and Sale, as Parliamentary Secretary to the Board of Trade, *vice* Mr. Walker-Smith.

Mr. Ian Harvey (42), M.P. for Harrow East, as Parliamentary Secretary to the Ministry of Supply *vice* Mr. Erroll.

[The appointment of Lord Gosford (45) as Parliamentary Secretary to the Ministry of Defence in succession to Lord Carrington had been announced on May 22, consequent on Lord Carrington's appointment as British High Commissioner in Australia—see 14876 B. Lord Gosford was a former R.A.F. station commander.]

Commander Noble, son of the late Admiral Sir Percy Noble, was a distinguished destroyer commander in the Second World War, being awarded the D.S.O. and D S C. Mr Walker-Smith, a barrister, was chairman of the Conservative 1922 Committee before his appointment in 1951 as Parliamentary Secretary to the Board of Trade, in which capacity he played an important role in carrying through the Government's Bill dealing with monopolies and restrictive trade practices. Mr. Erroll had been Parliamentary Secretary to the Ministry of Supply since April 1955, while Mr. Ormsby-Gore (son of Lord Harlech, a former Colonial Secretary) and Mr. Ian Harvey entered the Government for the first time.

Colonel Cyril Banks, Conservative M.P. for Pudsey (Yorkshire), informed his constituents on Nov. 8 of his intention to renounce the Government Whip and sit as an Independent. Colonel Banks, who had taken a special interest in Middle East affairs and had paid several visits to Egypt in the past two years, was known to have been critical of the Government's policy since the start of the Suez crisis. The Pudsey Conservative Association passed a resolution of Nov. 15 expressing full support for the Government and the Prime Minister.

B. INDIA - UNITED KINGDOM. — Termination of Sterling Balances Agreement in 1957. - Continuation of Mutual Facilities.

Mr. Macmillan, the U.K. Chancellor of the Exchequer, announced in a written parliamentary reply on Oct. 31 that the British and Indian Governments had agreed not to renew or replace, upon its expiry on June 30, 1957, the Financial Agreement regulating the release of Indian sterling balances accumulated during the Second World War. The expiry of the agreement, however, would in no way affect (*a*) India's right to draw upon her sterling balances; (*b*) the position regarding the treatment by the Government of India of remittances of savings of U.K. citizens leaving India, and of the voluntary repatriation of investments in India by U.K. residents. In this respect the Government of India would continue their present policy as laid down in its resolution of April 6, 1948.

It was reported in the British press that India had not drawn the full quota of £35,000,000 annually to which she was entitled under the Sterling Balances Agreement of 1953.

Of the £520,000,000 outstanding in 1951, it was provided that £210,000,000 would be released over the six-year period ending in 1957 and that the balance of £310,000,000 would be available as currency backing.—(Treasury Press Office, London) **(Prev. rep. 13116 B.)**

C. NEW ZEALAND. — Naval Expansion.

The New Zealand Prime Minister, Mr. Holland, announced on Oct. 12 that the Government was ordering two 30-knot anti-submarine frigates for the Royal New Zealand Navy as a further step in the naval modernization programme. The frigates, which would cost about £5,500,000 and be completed in three years, would be of the 2,200-ton *Whitby* class—designed by the Royal Navy for anti-submarine purposes, having a speed almost twice as great as the Loch-class frigates, and being "the most modern and efficient ships of their type in the world." The two new frigates would replace two of the six wartime Loch-class frigates now in service with the Royal N.Z. Navy.—(Department of External Affairs, Wellington) **(Prev. rep. 14987 E.)**

D. AUSTRALIA. — New Speaker of House of Representatives. - Death of Mr. Cameron.

Mr. John McLeay, Liberal member for South Australia, was elected Speaker of the Federal House of Representatives on Aug. 29 in succession to Mr. Archie Cameron, who had died on August 9.

Mr. Cameron (61) who started his political career in the South Australian Legislative Assembly, had been a member of the Federal House of Representatives for 22 years. He held a number of Cabinet posts, and during the Second World War was for some time a Deputy Premier in Mr. Menzies' administration. (Australian News and Information Bureau)

E. INDONESIA. — Constitutent Assembly inaugurated by President Sukarno.

The Indonesian Constituent Assembly was inaugurated by President Sukarno in Bandung on Nov. 10. In a speech to the Assembly, President Sukarno appealed to it to draw up a Constitution which would prevent the growth of a capitalist system and at the same time guarantee freedom of religion and fundamental human rights.—(Indonesian Embassy, London) **(Prev. rep. 15010 C.)**

F. YUGOSLAVIA. — Ratification of Financial Agreement with Britain.

The Yugoslav Federal Executive Council ratified on Nov. 13 the agreement with Britain, signed on March 26, 1956, concerning the interest rate on and the repayment of the loans received by Yugoslavia from the U.K. during 1949-51.
(Tanjug Agency, Belgrade) **(Prev. rep. 14803 B.)**

G. CANADA. — Further Increase in Bank Rate.

The Canadian Bank Rate was raised by another ¼ per cent. to 3½ per cent on Oct. 18, the increase being the sixth since August 1955.—(Financial Times - Montreal Star) **(Prev. rep. 15039 A.)**

A. UNITED KINGDOM. — New Session of Parliament. - The Queen's Speech. - Forthcoming Legislation.

The new session of Parliament was opened on Nov. 6 by H.M. the Queen, who announced the Government's legislative programme in the Speech from the Throne.

After announcing that she and the Duke of Edinburgh would pay State visits in 1957 to Portugal, France, and Denmark, Her Majesty continued :

" My Lords and Members of the House of Commons :—

" My Government will continue their efforts to achieve, by all possible means, a prompt and just settlement of the many problems arising from the grave situation in the Middle East To this end they will welcome the broadest measure of co-operation with the Commonwealth, with our allies in the Atlantic Alliance and in Europe, and with those international agencies of which the United Kingdom is a member.

" Fortified by the unique advances in parliamentary democracy and economic prosperity which the joint effort of the Commonwealth has already achieved, my Ministers will be concerned to further the progress and constitutional development of the territories for whose well-being they are responsible.

" A Bill will be introduced early in this session to grant independence to the Gold Coast under the name of Ghana, and it is the intention of my Ministers that independence should take effect on March 6, 1957. The Gold Coast Legislative Assembly have expressed the desire that Ghana should be an independent State within the Commonwealth.

" Orders-in-Council will be laid before you to provide for the constitution of the new British Caribbean Federation and for the inclusion of a number of elected members in the Legislature of British Guiana.

" My Ministers, while continuing to take the measures which are unhappily necessary to deal with terrorist activity in Cyprus, will spare no effort to find a solution to the problems of the island, through a new and liberal Constitution which will safeguard the rights of all communities and the essential interests of this country and our allies.

" My Government will pursue their policy of adjusting the structure of my Forces and the organization of home defence to changes in the world situation in the light of scientific and technical advances.

" It is my Government's intention to put forward during the present session proposals for reforming the composition of the House of Lords.

Members of the House of Commons :—

" Estimates for the Public Services will be laid before you in due course.

My Lords and Members of the House of Commons :—

" My Ministers will continue to seek the collaboration of employers and workers in combining full employment, rising production, and stable prices They are convinced that the wisdom and experience of my people will be a powerful aid to them in this task.

" It will be the aim of my Government to fortify the balance of payments and to extend oversea markets for our goods and services. My Ministers, while fostering the traditional and established Commonwealth preferential system, attach great importance to increasing and strengthening economic co-operation in Europe. To this end they are examining possible methods for creating in Europe an area within which restrictions on the free exchange of goods, other than foodstuffs, would be progressively removed.

" Legislation, consistent with my Government's international obligations, will be introduced to allow countervailing and anti-dumping duties to be imposed on imported goods.

" A measure will be laid before you to replace the existing emergency powers in respect of hire-purchase and hiring agreements and to regulate borrowing by hire-purchase finance companies.

" Steps will be taken to continue the lending powers of the National Film Finance Corporation and to substitute a statutory levy on exhibitors for the present voluntary levy.

" My Ministers will continue to make it their aim to promote conditions which will enable the agricultural industry to maintain its progress in increasing efficiency and to achieve the maximum economic production from our land.

" A Bill will be introduced to continue financial assistance to, and to make further provision for modernizing, certain sections of the fishing fleet.

" A measure will be laid before you to give effect to proposals arising from the recent comprehensive review of the financial and economic position and prospects of the British Transport Commission.

" My Ministers will proceed with a Bill to reorganize the electricity supply industry in England and Wales

" A measure will be introduced to provide a remedy for damage caused by subsidence resulting from coal mining.

" My Government have been reviewing the finance of local government, including the incidence of the rate burden between different classes of property. Their conclusions will in due course be announced to Parliament.

" Legislation will be laid before you to amend the laws dealing with rent control.

" Legislation will be introduced to revise Scottish housing subsidies and to facilitate the relief of congested local authority areas in Scotland.

" My Ministers will bring forward proposals to amend the law of homicide and to limit the scope of capital punishment.

" My Ministers are resolved to maintain progress in improving social and working conditions, and you will be invited to approve a Bill to amend the law about the closing hours of shops and related matters.

" Legislation will be proposed to enable increases in the pay and allowances of members of the police, fire, and probation services to be given retrospective effect.

" My Government will press on with their plans for expanding facilities for technical education They will also continue to give a high place in the building programme to new schools.

" Other measures will be laid before you in due course.

" I pray that the blessing of Almighty God may rest upon your counsels."

Among the important measures announced in the Queen's Speech were the proposals for reform of the House of Lords, and the Government's intention to introduce legislation to amend the Rent Control Acts and to limit the scope of capital punishment. In Commonwealth matters, the most important proposals were the forthcoming independence of the Gold Coast as an independent State within the Commonwealth, under the name of Ghana, and the forthcoming establishment of the British Caribbean Federation.—(Times - Daily Telegraph) **(Prev. rep. 14255 A.)**

B. WOOL. — Review of 1954-55 and 1955-56 Seasons.

A summary of the principal wool statistics for the two seasons ending June 30, 1955 and June 30, 1956 respectively is given below.

Australia. 1954-55 : Production was 1,280,000,000 lbs. greasy. Some 3,955,000 bales were sold, realizing £A352,700,000. The average price was approximately 71½d a lb.

1955-56 : Production totalled 1,480,000,000 lbs. greasy. Some 4,295,000 bales (a record number) were sold, realizing £A333,854,000, or almost £A19,000,000 less than in 1954-55, although lower average prices—at 61 46d. a lb.—were partly offset by the increased quantity sold. Japanese purchases increased but Britain remained Australia's best customer.

New Zealand. 1954-55 · Production was 455,000,000 lbs. Some 1,160,000 bales were sold, realizing £70,364,000—an average price of just over 49½d. a lb. ; 584,500 bales went to Britain, 179,400 to France, and 102,900 to Western Germany.

1955-56 : Production totalled 460,000,000 lbs. Some 1,016,555 bales of wool were sold, realizing £NZ.66,003,000, the lowest for four years. The average price fell 3½d. to 46d. per lb.

South Africa. 1954-55 Production was 295,000,000 lbs. Just over 1,000,000 bales were sold, realizing £S.A.58,833,245. Britain purchased over 55,000,000 lbs., Western Germany just over 36,500,000 lbs., and France just under 36,500,000 lbs. The Soviet Union re-entered the South African wool market, buying 8,169,000 lbs.

1955-56 : Production was 313,000,000 lbs. Just under 1,000,000 bales were sold for a total of £S.A.51,800,000, the average price realized being 43.38d a lb Of the total exports (which were 4 per cent higher than in the previous year), Britain purchased 62,805,179 lbs., France 48,622,533 lbs., Western Germany 48,434,474 lbs., and the U.S A. 25,017,491 lbs. The Soviet Union, which bought just under 13,000,000 lbs. early in the season, withdrew after South Africa had broken off diplomatic relations (see 14716 B)

Total world production in the 1955-56 season amounted to 4,800,000,000 lbs. greasy, compared with 4,500,000,000 lbs. in 1954-55. World production thus rose for the eighth season in succession after the low point reached in 1947-48.—(Australian News and Information Bureau - Reserve Bank of New Zealand - Cape Times - International Wool Secretariat, London - Bradford Chamber of Commerce Journal) **(Prev. rep. 14113 A.)**

C. INDIA. — Formation of State Trading Corporation. - State Trading in Cement.

It was announced in New Delhi on May 19 that the Government of India had set up a State trading corporation as a private limited company under the name of State Trading Corporation of India (Private) Ltd.

The objects of the Corporation will be " to organize and effect exports from and imports into India of all such goods and commodities as the Company may, from time to time, determine and purchase ; to handle the sale and transport of and general trade in such goods and commodities in India or anywhere else in the world ; and to do all such other things as are incidental or conducive to the attainment of the above objects."

The Corporation will have an authorized capital of Rs.10,000,000, of which Rs.500,000 will be subscribed immediately. All shares will be owned by the Government of India.

State trading in cement was introduced on July 1, when the Corporation was made responsible for the importation and distribution of cement through the existing selling agencies. Cement producers were directed to sell all their stocks to the Corporation at a uniform selling price of 102 Rs. 8 annas per ton.

(The Hindu, Madras - The Statesman, Calcutta)

A. JORDAN. — Dissolution of Parliament. - Resignation of Sayed el-Mufti's Government. - Caretaker Government formed by Ibrahim Hashem. - General Elections. - Victory for Nationalist Parties. - New Cabinet formed by Suliman Nabulsi. - Death of Tewfik Abdulhuda.

General elections took place in Jordan on Oct. 21 following the dissolution on June 26 of the House of Representatives because of differences between the House and Sayed el-Mufti's Government. Sayed el-Mufti himself resigned on June 30 owing to disagreements inside his Cabinet, and on July 2 a "caretaker" Government was formed by Ibrahim Hashem, the President of the Senate, to arrange for new elections.

The Lower House of the Jordanian Parliament consists of 40 members, 20 of whom are elected by Transjordan (i.e. that part of the country east of the Jordan River) and 20 by the Palestinian territories west of the Jordan. Seven seats are reserved for Christians (including one representative each for Jerusalem, Bethlehem, and Karak), two for Circassians, and two for Bedouin. The electorate numbered about 400,000, over half of whom, including refugees, were of Palestinian origin. Of the 40 seats, 37 were contested by 141 candidates, 68 of whom stood as Independents, three candidates were returned unopposed, including a Communist who was returned for Bethlehem as an Independent Christian.

The elections were fought almost entirely on international issues, the most controversial question being the Anglo-Jordanian Treaty. None of the candidates defended the treaty in its existing form, but whereas pro-Western candidates merely advocated its revision, the nationalist parties demanded its immediate abrogation, claiming that the funds which Jordan needed to maintain her economy, and which were at present provided by Britain, could be obtained from other Arab countries. [About two-thirds of Jordan's national revenues come from British payments.] The main parties contesting the elections were. (1) The Arab Constitutional Bloc, a conservative and pro-Western organization largely consisting of ex-Ministers, with 27 candidates; (2) the National Socialist party, a moderate nationalist and pro-Egyptian party, with 13 candidates; (3) the *Baath* (Renaissance) party, with 13 candidates, and the National Front—both extreme left-wing, nationalist, and pro-Egyptian parties; (4) the Moslem Brotherhood, the Arab Palestine Bloc, and the Liberation Bloc, all of which are extreme right-wing, nationalist, and anti-Western (but not pro-Nasser) organizations.

The election was described by the Amman Correspondent of *The Times* as "one of the quietest and most fairly conducted elections in the country's history." To prevent impersonation, all voters were required to carry identity cards The Army remained strictly neutral (soldiers being forbidden to vote), and stringent precautions for the maintenance of order were taken by the police

The election results, which gave the nationalist parties a clear majority, were announced on Oct. 22 as follows (distribution of seats in the previous Parliament given for comparison):

	New Parliament	Old Parliament
National Socialists	11	1
Arab Constitutional Bloc	4	9
Moslem Brotherhood	4	—
National Front	3	1
Baath Party	2	—
Arab Palestine Bloc	2	—
Liberation Party	1	1
Independents	13	27

The Government resigned on Oct. 27, and a new Cabinet, described by the *Daily Telegraph* as "the most left-wing in the history of any Arab State," was formed on Oct. 29 by Suliman Nabulsi, leader of the National Socialist party. Its membership was as follows:

Suliman Nabulsi (National Socialist), Prime Minister and Foreign Minister; Shafiq Rusheidat (Nat. Soc.), Education and Justice; Abdul Haleem el-Nimer (Nat. Soc.), Interior and Defence; Saleh Muasher (Nat. Soc.), Health and Social Welfare; Saleh el-Majali (Independent), Communications; Abdul Kader el-Saleh (National Front), Agriculture; Anwar el Khateeb (Nat. Soc.), Public Works; Naim Abdulhadi (Nat. Soc.), National Economy; Abdullah Rimawi (*Baath*), Minister of State for Foreign Affairs; Samaan Daoud (Independent), Development and Reconstruction; Salah Toukan (Independent), Finance.

Suliman Nabulsi, a former Finance Minister and Ambassador to Britain, had stated on Oct. 17 that his party's aims were to "liberate Jordan from foreign and imperialist influence," to strengthen Jordan's ties with Syria, and to strengthen the Army by increasing its numbers and supplying it with arms from the other Arab States. "We respect Colonel Nasser and consider him the saviour of Arab national interests and welfare," he said. "We have no confidence in Britain fulfilling her obligations to us while she sends arms to Israel."

Tewfik Abdulhuda (65), a former Prime Minister and a strong supporter of the British alliance, committed suicide at his home in Amman on July 1. He had been in ill-health for some time previously. A native of Palestine, he emigrated to Transjordan in 1922 and was Prime Minister at the time of the Palestine War in 1948. He subsequently held the Premiership from July 1951 to May 1953, and again from May 1954 to May 1955.—(Times - Daily Telegraph) **(Prev. rep. Cabinet, 14876 D; Parliament, 14664 D; 1954 Elections, 13853 A.)**

B. INTERNATIONAL BANK. — Recent Loans. - Bond Issue.

Recent loans by the World Bank are summarized below:

Costa Rica. $3,000,000 on Sept. 18 to the Central Bank of Costa Rica, to be re-lent for the development of agriculture and light industry. The Chemical Corn Exchange Bank of New York participated in the loan without the International Bank's guarantee to the extent of $366,000. This was the first World Bank loan to Costa Rica. Terms 4¾ per cent p.a. interest including 1 per cent commission, repayable in 7 years commencing on Oct. 1, 1958.

Austria. Two loans of $21,000,000 and $10,000,000, on Sept. 20, the first to the *Donaukraftwerke* and the second to the *Draukraftwerke*, both in conjunction with the *Verbundgesellschaft* (Austrian Electric Power Corporation), a Government-owned agency. Both loans were for electrical power expansion to meet growing industrial requirements and to provide additional power exports to neighbouring countries

The Manufacturers Trust Co. (New York) participated in the loans without the International Bank's guarantee to the extent of $449,000. Terms: 5 per cent p a including 1 per cent commission. Repayment of the first loan within 25 years commencing Jan 15, 1960, and of the second within 20 years starting Sept 1, 1959. These brought total World Bank loans to Austria for electric projects to $53,000,000.

Italy. $74,628,000 on Oct. 12 to the *Cassa per il Mezzogiorno* (the government agency for the administration of Italy's economic plan for the South) for the agricultural and industrial development of that area. Terms 5 per cent p.a interest including 1 per cent commission, repayable within 20 years beginning Sept. 1, 1959. The Bank of America participated in the loan, without the International Bank's guarantee, to the extent of $500,000.

The loan will be divided between the mainland of Southern Italy, Sicily, and Sardinia. On the mainland it will help to finance (*a*) an automobile assembly plant to be established by the Fiat Company in Naples, (*b*) a plant for the construction of bus and truck bodies in Naples, (*c*) two glass factories, one at Caserta near Naples, the other at Latina, south of Rome; (*d*) a vegetable cannery near Naples; (*e*) a hardboard factory near Avezzano, east of Rome; (*f*) a chemical fertilizer plant at Punta Fiume, on the coast between Rome and Naples, and (*g*) three hydro-electric plants, near Cassino and Salerno, with an annual capacity of 215,000,000 kwh

In Sicily, the projects to receive assistance from the loan will be (*a*) a new cement plant at Augusta with an annual output of 170,000 tons, (*b*) a plant for the production of polyethylene at Ragusa; and (*c*) a thermal power plant at Augusta which will increase generating capacity by 320,000,000 kwh. in 1958 and by 620,000,000 kwh. in 1963.

The projects in Sardinia will be: (*a*) the Flumendosa Irrigation Project, covering 123,500 acres of the Campidano di Cagliari, a plain in the S W. of the island. On completion the scheme will increase farm production by $21,000,000 p a. and the total income of the region by $30,000,000 p a. (*b*) A cement plant at Sassari.

The loan, the fourth of its kind, brought the total amount lent by the World Bank for the development of Southern Italy to $165,000,000, but this was the first time that projects in Sardinia had been included

Siam. $3,400,000 on Oct. 12 to the Port Authority of Thailand (the second loan of its kind) for the purchase of 3 dredgers and auxiliary equipment for the Port of Bangkok The First City Bank of New York participated in the loan, without the International Bank's guarantee, to the extent of $184,000. Terms · 4¾ per cent p a. interest including 1 per cent commission, repayable within 15 years

Uruguay. $25,500,000 on Oct 25 to the *Administración General de las Usinas Electricas y las Telefonos del Estado* (an autonomous government agency) for electric power development costing $58,000,000. Terms · 5 per cent p a. interest including 1 per cent commission, repayable in 25 years beginning Oct. 15, 1961.

All the loans were guaranteed by the Governments concerned.

An issue of $75,000,000 3½ per cent two-year bonds was offered by the World Bank for public sale outside the U.S.A. on Sept. 25, being subscribed by investors in 22 countries. (International Bank, Washington - New York Times)

(Prev. rep. World Bank, 15019 B.)

C. UNITED KINGDOM. — Tourist Travel Allowance.

The Treasury announced on Oct. 31 that the tourist travel allowances for the year beginning Nov. 1, 1956 would remain unchanged, but that the amount in foreign currency notes which travellers could take out of the U.K. would be increased from £25 to £100.—(Treasury Press Office, London)

(Prev. rep. 14522 B.)

NOVEMBER 17—24, 1956

A. MIDDLE EAST. — Formation of U.N. International Force for Middle East. - Cease-fire accepted by Egypt, Israel, Britain and France. - International Reactions to Middle East Crisis.

Following the emergency session of the U.N. General Assembly on Nov. 2 (see page 15186), the Assembly met again in emergency session on Nov. 3, at the request of the Egyptian Government, to consider four draft resolutions:

(1) One submitted by the U.S.A. proposing the setting-up of a committee to take measures for the immediate reopening of the Suez Canal as a secure international waterway, to prepare a plan, in consultation with Egypt, France, and the U.K., for operation and maintenance of the Canal and freedom of passage through it in accordance with the 1888 Convention and the Security Council's resolution of Oct. 13, 1956; and to put such a plan into effect.

(2) Another U.S. resolution proposing the setting-up of a five-man committee to prepare recommendations, after consultation with the parties to the Palestine armistice agreements, aiming at a settlement of the major problems outstanding between the Arab States and Israel, with a view to establishing permanent peace and stability in the area.

(3) A Canadian resolution for the setting-up of an Emergency International U.N. Force to secure and supervise the cessation of hostilities in accordance with the General Assembly's resolution of Nov. 2 (see page 15186).

(4) An Afro-Asian resolution calling for immediate compliance with the Assembly's resolution of Nov. 2, the implementation of the cease-fire, and the halting of the movement of military forces and arms into the area. This resolution was submitted jointly by Afghanistan, Burma, Ceylon, Ethiopia, India, Indonesia, Iraq, Jordan, Lebanon, Liberia, Libya, Nepal, Pakistan, Persia, Philippines, Saudi Arabia, Siam, Syria, and Yemen.

During the debate Dr. Hammarskjold read a communication from the U.K. permanent representative (Sir Pierson Dixon) which described as "quite untrue" reports which had been circulated that Anglo-French forces intended to attack Egyptian communication centres, including telephone exchanges and railway stations, where heavy civilian casualties would be inevitable. The letter pointed out that Anglo-French attacks were being switched from air to army targets, but that no attacks would be made in areas where civilian casualties would be inevitable.

M. Loutfi (Egypt) accused France and Britain of disregarding the Assembly's resolution of Nov. 2 and of continuing their "bloody and ruthless armed attack." He called on the General Assembly to take "other steps to halt aggression by Israel, France, and the U.K." and declared that Egypt was defending herself and would continue to do so. M. Loutfi was strongly supported by M. Rafik Asha (Syria) and other Arab delegates.

Mr. Cabot Lodge (U.S.A.), explaining the purpose of the resolutions proposed by the U.S.A., spoke as follows: "The instability of the armistice agreements is too well known to require comment. They have been violated repeatedly by Israel and by her Arab neighbours. The armistice, which should have led to a peaceful settlement, has instead given rise to growing provocation and increasing tension, especially since the ominous rearmament of Egypt by the Soviet Union. The abrupt seizure by Egypt of the Suez Canal Company, and the failure thus far of efforts to find a solution to this important problem, have created a situation of deep concern to many nations. The U.N. must share responsibility for what has happened. It is clear that we, the members of the U.N., have not done all that should have been done to bring about a settlement of these matters in accordance with the principles of justice and international law . . . We must try something new—something free of the technical and procedural problems—if we are to have any hope of progress toward a settlement of the major problems outstanding between the Arab States and Israel."

Mr. Schurmann (Netherlands) said that it was "negatory to try to assess or apportion the blame for the difficulties that confront us, because all of us, all members of the U.N., have to take some share in that blame." He continued: "It would be particularly unjust to single out either Israel or France and the U.K., and to reproach the one for having taken the action which it considered necessary for its self-defence and survival and the others for having stepped in where the U.N. had failed to act. What is necessary is that we should find some means of reasserting the jurisdiction of the U.N. over matters which plainly fall within its responsibilities, and that we should do so in a manner that provides not only for an immediate cease-fire but also for a just and equitable solution of the problems involved."

Referring to the Anglo-French assurances that the military action taken by them would be temporary in duration, Mr. Schurmann declared that the proposals now made by the two Governments [i.e. those announced by Sir Anthony Eden—see page 15186, first column] proved that they were sincere and prepared to act in accordance with their statements. If these proposals were accepted by Israel and Egypt, and if the U.N. force for which they called was formed and despatched to the area, then the Anglo-French intervention would cease, the U.N. would take charge of the situation, and the basis would have been laid for a final settlement of the questions which had for so long disturbed peace.

In the early hours of Nov. 4 the Assembly adopted first the Canadian resolution and then the Afro-Asian resolution—the former by 57 votes to nil, with 19 abstentions, and the latter by 59 votes to five, with 12 abstentions.

The 19 abstentions on the Canadian resolution were Albania, Australia, Austria, Bulgaria, Byelorussia, Czechoslovakia, Egypt, France, Hungary, Israel, Laos, New Zealand, Poland, Portugal, Rumania, South Africa, Ukraine, the U.S.S.R., and the United Kingdom.

The five countries opposing the Afro-Asian resolution were Australia, France, Israel, New Zealand, and the U.K., the 12 abstaining countries being Belgium, Denmark, Dominican Republic, Finland, Iceland, Laos, Luxemburg, Netherlands, Norway, Portugal, Sweden, and South Africa.

The Canadian resolution was worded as follows:

"The General Assembly, bearing in mind the urgent necessity of facilitating compliance with the resolution of Nov. 2, requests the Secretary-General as a matter of priority to submit to it within 48 hours a plan for the setting-up with the consent of the nations concerned of an Emergency International United Nations Force to secure and supervise the cessation of hostilities in accordance with the terms of the above resolution"

The Afro-Asian resolution was worded:

"The General Assembly, noting with regret that not all the parties concerned have yet agreed to comply with the provisions of its resolution of Nov. 2,

Noting the special priority given in the resolution to an immediate cease-fire and as part thereof, to the halting of the movement of military forces and arms into the area,

Noting further that the resolution urged the parties to the armistice agreements promptly to withdraw all forces behind the armistice lines, to desist from raids across the armistice lines into neighbouring territory, and to observe scrupulously the provisions of the armistice agreements;

(1) Reaffirms its resolution of Nov. 2, 1956 and once again calls upon the parties immediately to comply with the provisions of that resolution,

(2) Authorizes the Secretary-General immediately to arrange with the parties concerned for the implementation of the cease-fire and the halting of the movement of military forces and arms into the area, and, requests him to report compliance not later than 12 hours from the time of adoption of this resolution,

(3) Requests the Secretary-General, with the assistance of the Chief of Staff [General Burns] and the members of the U.N. Truce Supervision Organization, to obtain compliance of the withdrawal of all forces behind the lines;

(4) Decides to meet again immediately on receipt of the Secretary-General's report referred to in paragraph 2."

The U.N. General Assembly met again in the evening of Nov. 4 to receive a report from Dr. Hammarskjold containing detailed proposals for the setting-up of the Emergency International United Nations Force. After a brief debate the Assembly adopted (at 12.15 a.m. on Nov. 5) a resolution, submitted jointly by Canada, Colombia, and Norway, incorporating Dr. Hammarskjold's proposals and worded as follows:

"The General Assembly . . .

(1) Establishes a United Nations Command for an Emergency International Force to secure and supervise the cessation of hostilities in accordance with the terms of the Assembly's resolution of Nov. 2;

(2) Appoints the Chief of Staff of the U.N. Truce Supervision Organization, Major-General Burns, as Chief of the Command;

(3) Authorizes the Chief of the Command immediately to recruit from the Observer Corps of the Truce Supervision Organization a limited number of officers who shall be nationals of countries other than those having permanent membership in the Security Council; and further authorizes him, in consultation with the Secretary-General, to undertake the recruitment directly from various member-States, other than the permanent members of the Security Council, of the additional number of officers needed;

(4) Invites the Secretary-General to take such administrative measures as may be necessary for the prompt execution of the actions envisaged in this resolution"

The voting on the resolution was 57 to nil, with 19 abstentions—Albania, Australia, Bulgaria, Byelorussia, Czechoslovakia, Egypt, France, Hungary, Israel, Laos, New Zealand, Poland, Portugal, Rumania, Turkey, Ukraine, South Africa, the U.S.S.R., and the United Kingdom.

An important aspect of Dr. Hammarskjold's proposals incorporated in the resolution was that none of the personnel of the International Force should be drawn from the five permanent member-countries of the Security Council (i.e. Britain, France, the U.S.A., the Soviet Union, and Nationalist China). Mr. Cabot Lodge stated during the debate, however, that the U.S. Government was willing to help in "other important ways" and to provide aircraft, shipping, and other necessary supplies to facilitate the operations of the International Force. Dr. Hammarskjold announced during the debate that Colombia, Norway, and New Zealand had indicated their willingness to provide elements for the U.N. Force, while Mr. Lester Pearson announced that his Government was also ready to recommend Canadian participation.

In a further resolution, sponsored jointly by Argentina, Burma, Ceylon, Denmark, Ecuador, Ethiopia, and Sweden and adopted on Nov. 7, the General Assembly expressed approval of the guiding principles for the organization and functioning of the U.N. Force as stated in a second report by Dr. Hammarskjöld. At the same time the Assembly ordered the following steps to be taken :

(1) The Secretary-General was asked " to continue discussions with member-Governments concerning offers of participation in the U.N. Force towards the objective of its balanced composition."

(2) The Chief of Command (General Burns), in consultation with the Secretary-General, should proceed forthwith with the full organization of the Force.

(3) The basic proposals of the Secretary-General concerning the financing of the Force were provisionally approved.

(4) An Advisory Committee was set up composed of one representative each from Brazil, Canada, Ceylon, Colombia, India, Norway, and Pakistan, under the chairmanship of Dr. Hammarskjold It was requested to undertake the development of those aspects of the planning and operation of the U N. Force not already dealt with by the General Assembly, and not falling within the area of the direct responsibility of the Chief of Command

(5) The Secretary-General was authorized to issue all regulations and instructions which might be essential to the effective functioning of the U.N. Force, after consultation with the Advisory Committee, and to take all other necessary administrative and executive actions.

(6) After the fulfilment of its immediate responsibilities, the Advisory Committee would continue to assist the Secretary-General in the responsibilities falling to him under this and other relevant resolutions

(7) In the performance of its duties the Advisory Committee was empowered to request the convening of the General Assembly through the usual procedures, and to report to the Assembly " whenever matters arise which, in its opinion, are of such urgency and importance as to require their consideration by the General Assembly itself."

(8) All member-States were asked to afford any necessary assistance to the U.N. Command in the performance of its functions, including arrangements for passage to and from the area involved.

The voting on this resolution was 64 to nil, with 12 abstentions—Albania, Bulgaria, Byelorussia, Czechoslovakia, Egypt, Hungary, Israel, Poland, Rumania, South Africa, Ukraine, and the U.S.S.R.

The same night the Assembly adopted another resolution again calling upon Britain, France, and Israel to withdraw their troops from Egypt immediately. This resolution, sponsored jointly by Afghanistan, Burma, Ceylon, Ethiopia, India, Indonesia, Iraq, Jordan, Lebanon, Liberia, Libya, Nepal, Pakistan, Persia, Philippines, Saudi Arabia, Siam, Syria, and Yemen, was worded as follows :

" The General Assembly .—

Reaffirming its resolutions adopted by overwhelming majorities on Nov. 2, 3 and 4 ;

Noting in particular that the General Assembly, by its resolution of Nov. 5, has established a U.N. Command for an Emergency International Force to secure and supervise the cessation of hostilities in accordance with the terms of its resolution of Nov. 2 ;

(1) Reaffirms the above-mentioned resolutions ;

(2) Calls upon Israel once again to withdraw immediately all her forces behind the lines established by the Armistice Agreement of Feb. 24, 1949 ;

(3) Calls upon the United Kingdom and France once again to withdraw immediately all their forces from Egyptian territory, consistently with the above-mentioned resolutions ,

(4) Urges the Secretary-General to communicate the present resolution to the parties concerned, and requests him promptly to report to the General Assembly on the compliance with this resolution."

This resolution was adopted by 65 votes to one (Israel), with 10 abstentions (Australia, Belgium, France, Laos, Luxemburg, the Netherlands, New Zealand, Portugal, South Africa, and the United Kingdom).

During the preceding debate **M. Loutfi** (Egypt) strongly attacked Britain and France, comparing those responsible for the Anglo-French operations against Egypt with " the war criminals sentenced at Nuremberg." He also denounced Mr. Ben-Gurion's statement of Nov. 7 (see below), and opposed any participation of British and French technicians in the work of clearing the Suez Canal. **Mr. Cabot Lodge** (U.S A.) expressed full support for the resolution, stressing the need for the withdrawal of all foreign troops from Egypt

Sir Pierson Dixon (U.K.) welcomed the plan to create a U.N. International Force, and announced that he would support that resolution. He objected, however, to the second resolution demanding the immediate withdrawal of the Anglo-French forces, emphasizing that such a step before the arrival of the International Force would only bring about a return to the extremely dangerous situation existing before the Anglo-French intervention. As regards the clearing of the Suez Canal, Sir Pierson Dixon suggested that British and French technicians should work under the aegis of a technical organization set up by the United Nations.

M. de Guiringaud (France) spoke on similar lines, giving a formal assurance that the French forces in the Canal Zone would leave as soon as the International Force was in a position to take over its functions. On the resolution demanding the immediate withdrawal of Anglo-French forces, he expressed the French view that the questions raised by this demand should be decided by the Security Council , he therefore proposed that the Security Council should meet as soon as possible at Foreign Ministers' level **Sir Pierson Dixon** supported this proposal.

Mr. Krishna Menon (India) announced that his country was willing to contribute a battalion to the International Force, if the U.N provided air-lift facilities. He demanded that the Assembly should envisage special measures against Israel if that country resisted the evacuation of Egyptian territory occupied by it, and stressed that the resolution sought to express the view that it was not possible to think in terms of Anglo-French forces remaining on Egyptian territory " contingent upon some other element "

Mr. Lester Pearson (Canada) intervened to point out that in his view the two resolutions were " interdependent." He interpreted the resolution on the immediate withdrawal of Anglo-French and Israeli forces from Egypt as meaning " as quickly as possible " Mr. Pearson's emphasis on the inter-relation between the withdrawal of the Anglo-French forces and the arrival of the U.N Emergency Force was supported by the U.S , Brazilian, Turkish, Pakistani, and Norwegian delegates, **Mr. Cabot Lodge** stressing that the Anglo-French withdrawal should be " phased " with the arrival of the U.N. Force.

M. Kuznetsov (Soviet Union), explaining his abstention on the resolution on the International Police Force, said that this resolution constituted a " tacit acceptance " of the retention of Anglo-French and Israeli forces in Egypt pending the arrival of the International Force. He also maintained that the composition of the International Force was not in accordance with the U N Charter, which provided for the intervention of armed forces of member-countries for the maintenance or restoration of peace and international security. M Kuznetsov repeated the Soviet offer of Nov 5 [see page 15219] to place Soviet forces at the disposal of UNO for this purpose

The emergency session of the General Assembly decided on Nov. 10, by 66 votes to nil, to transfer " as a matter of priority " the question of the situation in the Middle East from its agenda to that of the Assembly's regular eleventh session, beginning on Nov. 12. There were two abstentions on procedural grounds.

During subsequent days offers of support for the U.N. Force were received from an increasing number of member-countries, and by Nov. 9 fourteen countries had offered to provide contingents for the Force—Canada, Colombia, Norway, Denmark, Pakistan, Sweden, Finland, Ceylon, India, Czechoslovakia, Rumania, New Zealand, Burma, and Yugoslavia. In addition, the U.S.A. had formally expressed its readiness to " assist in the establishment " of the Force and to help as regards air-lifts, shipping, transport, and supplies.

The Canadian offer covered a " self-contained " contingent of battalion strength with ordnance, transport, medical, and dental detachments, altogether over 1,000 strong ; it also made the aircraft-carrier H.M.C.S *Magnificent* available as a temporary mobile Canadian base (Nov. 7).

In Norway the provision of one infantry company (about 190 men) for immediate despatch to the Middle East was unanimously approved by the *Storting* on Nov. 5.

Denmark offered the immediate despatch of " one or two companies " after the Danish Parliament had unanimously agreed (Nov. 6) to place a military force at the disposal of the U.N. Command.

The Finnish offer (Nov 6) stated that voluntarily-recruited military personnel would be available, preferably for a unit consisting of troops from the Northern European countries

The Indian offer (Nov. 6) comprised a unit of " about battalion strength," subject to transport and other facilities being provided by or through the U N.

Czechoslovakia also placed one battalion at the disposal of the U.N Force (Nov 6).

The other countries, while expressing their willingness to contribute forces, had not yet specified their size.

The first contingents of the U.N. Force to arrive at Capodichino Airport, Naples—which had been made a temporary staging area with the co-operation of the Italian Government—were 51 Danish and 50 Norwegian officers and men, carried to Italy in Swiss civil aircraft on Nov. 10. They were followed by a Colombian contingent carried in U.S. aircraft.

British Acceptance of Cease-fire in Egypt. - Parliamentary Debates.

The British Foreign Secretary (Mr. Selwyn Lloyd) announced in the House of Commons on Nov. 5, that, while H.M. Government welcomed the Canadian proposal for an International Force, Franco-British operations in Egypt " with strictly limited objectives " were continuing, as neither Israel nor Egypt had so far accepted the proposal ; however, as soon as it had been accepted by these two countries and endorsed by the U.N., Britain and France would cease all military action.

Later in the debate Sir Anthony Eden announced the receipt of a signal from Port Said that a cease-fire had been ordered by the British commander, as surrender terms were being discussed with the Egyptians. Mr. Lloyd's announcement of the Franco-British attitude followed discussions the previous evening with M. Pineau and M. Bourgès-Maunoury (the French Minister of National Defence), who had flown to London.

Mr. Selwyn Lloyd said that as a result of their consultations with the French Government, H M. Government had sent a telegram to the U.N. Secretary-General " very early this morning " replying to the two resolutions of the U N General Assembly calling for a cease-fire and the setting-up of an International Force. The telegram stated that the British and French Governments had carefully studied the resolutions and warmly welcomed the idea, contained in the Canadian resolution, that an International Force should be interpolated as a " shield " between Israel and Egypt pending a Palestine settlement and a settlement of the Suez Canal question. But according to their information neither Israel nor Egypt had accepted such a proposal, nor had the plan for such a force been accepted by the General Assembly or endorsed by the Security Council. The composition and staff of such a force would be a matter for discussion.

The two Governments believed that it was necessary to introduce an International Force to prevent a continuance of hostilities between Egypt and Israel, to secure a speedy withdrawal of Israeli forces, to take the necessary measures to remove obstructions and restore traffic through the Canal, and to promote a settlement of the problems of the Canal Certain Anglo-French operations with strictly limited objectives were continuing, but as soon as the Israeli and Egyptian Governments signified acceptance of, and the U N endorsed a plan for, an International Force for these functions, Britain and France would cease all military action.

" The two Governments," Mr. Lloyd declared, ' express their firm conviction that their action was justified. To return deliberately to the system which has produced continuing deadlock and chaos in the Middle East is not only undesirable but impossible. A new constructive solution is required To that end they suggest that an early Security Council meeting at ministerial level should be called to work out an international settlement which would be likely to endure, together with the means to enforce it "

Mr. Lloyd said that this message to the Secretary-General had crossed a telegram from Dr. Hammarskjöld informing H.M. Government of the passing of the Canadian resolution and of a preliminary report from the Secretary-General on the plan to set up an Emergency International U.N. Force After reading the text of the U.N resolution [see above], the Foreign Secretary declared " The Government abstained from voting on this resolution. They fully approve the principle of an International U.N. Force. But although the steps called for in this latest resolution might be considered to be a beginning, they are not in themselves likely to achieve the purposes set out in our message to the Secretary-General. We do not know that hostilities between Israel and Egypt have ceased or that they will not be resumed. The measures to be taken under the latest resolution will not be sufficient to ensure this

" It is the policy of the Government to ensure that the Israeli forces withdraw from Egypt. We have already told the U.N that we believe it is necessary to secure the speedy withdrawal of Israeli forces ; but we cannot ensure that until we are physically in the area to keep the peace, to give the necessary guarantees, and to prevent a repetition of the events of the past few years There must also be immediate means on the spot to take the necessary measures to remove obstructions and restore navigation through the Suez Canal, and to promote a settlement of the problems of the area

" It will, of course, be a matter for the Security Council, if our proposal for an early meeting at ministerial level is accepted, to consider what part the U.K and France should play in achieving the objectives to which I have referred. Meanwhile the Government believe that the Anglo-French forces, once they are established in the area, will be the best guarantee that these purposes will be effectively and speedily achieved."

Mr. Gaitskell expressed " astonishment " that Britain had abstained from voting on the General Assembly's resolution setting up an International Force He also asked why the Government, in replying to that resolution, had suggested that the functions of an International Force were not merely to secure and supervise a cessation of hostilities, but also to secure a final settlement of the Suez Canal problem. " If the Government insist," he added, " that the purpose of the International Force must be to deal with the Canal problem, they will effectively sabotage the whole idea of that Force "

Mr. Lloyd replied · " The U.K. representative abstained because we could not vote for a proposition which excluded detachments of the forces of the permanent members of the Security Council as part of this International Force The reason for that is simple there has to be some reality about this situation. One has to consider the people who are able effectively to contribute to this force, and if Members opposite still think that a few officers—because that is all this resolution amounts to ; rather fewer than there have been in the Supervisory Truce Organization—will solve this problem, they are quite mistaken

" This resolution may be a beginning. But it will not solve this problem unless the International Force is constituted to a much greater extent than is envisaged by this resolution Mr. Gaitskell further said that we had done wrong in suggesting that the Suez Canal problem should be included in those to be settled while this International Force was there. I should have thought that he would have understood that the blockade of shipping of a certain country going through the Canal is one of the matters, a settlement of which we have tried to get out of this situation."

Mr. Gaitskell : " Are we to understand that when H.M. Government made reference, in their reply to the U.N. Secretary-General, to the settlement of the Suez Canal problem, all they had in mind was ensuring the free passage of Israel ships ? "

Mr. Lloyd " Certainly not. We had in mind all problems affecting free and open transit through the Canal, guaranteed by the 1888 Convention."

In reply to a question by **Mr. Bevan** (Lab.), **Mr. Lloyd** reaffirmed that the purposes which the Government had in mind in undertaking their action in Egypt were " to stop hostilities, prevent their resumption, and procure a settlement of the problems of the Middle East." He added that the directive to the Allied Commander had been to avoid civilian casualties—" and that is what has actually happened."

The **Prime Minister** intervened to make the following announcement : " I have had a flash signal from the C -in-C. in the Eastern Mediterranean which affects the discussion now taking place. That is why I intervene This is a flash signal which is, of course, subject to confirmation. He says : ' Governor and Military Commander of Port Said now discussing surrender terms with Brigadier Butler [commander of the parachute forces landed at Port Said] Cease-fire ordered.' "

Replying to a question by Mr Gaitskell whether it was a local or general cease-fire, Sir Anthony Eden declared that he had read out the signal as received, but did not know yet how wide or narrow was the area covered by the cease-fire.

During a further debate on Nov. 6 Sir Anthony Eden announced that, following the unconditional acceptance of a cease-fire by Egypt and Israel, and the Egyptian acceptance of an International Force, H.M. Government had ordered a cease-fire by midnight, in agreement with the French Government.

The **Prime Minister** spoke as follows " During the night we received from the U.N. Secretary-General a communication in which he informed us that both Israel and Egypt had accepted an unconditional cease-fire. With regard to the International Force, he stated his opinion that the Government of Egypt had accepted such a force. He inquired as to the attitudes of the French and British Governments about a cease-fire in the light of the Canadian resolution, and also said he was addressing the same inquiry to the Israeli Government.

" Accordingly in reply I sent the following communication to him

' The Government welcome the Secretary-General's communication, while agreeing that further clarification of certain points is necessary. If the Secretary-General can confirm that the Egyptian and Israeli Governments have accepted an unconditional cease-fire, and that the International Force to be set up will be competent to secure and supervise the attainment of the objectives set out in the operative paragraphs of the resolution passed by the General Assembly on Nov. 2, H.M. Government will agree to cease military operations.

' They wish to point out, however, that the clearing of the obstruction of the Suez Canal and its approaches, which is in no sense a military operation, is a matter of great urgency in the interests of world shipping and trade. The Franco-British force is equipped to tackle this task, and the Government propose that the technicians accompanying the force shall begin this work at once.

' Pending confirmation of the above, the Government are ordering their forces to cease fire by midnight to-night unless they are attacked. The French Government are in agreement with the terms of that reply.' "

Continuing, Sir Anthony Eden dealt with a message he had received from Marshal Bulganin in connexion with the Anglo-French action in the Middle East, and read his reply to the Soviet Prime Minister [see page 15218].

Turning to the military situation, the Prime Minister referred to the previous day's " flash message " from General Keightley on the surrender discussions at Port Said. He continued : " Four hours later a signal stated that the Egyptians had agreed to our terms ; they were laying down their arms and the Egyptian police were assisting under orders. About 1½ hours later the British commander was suddenly informed by the Governor [of Port Said] that he could not now agree to the terms and must resume hostilities. During last night Anglo-French convoys were approaching the coast fully prepared for any emergency, but under orders to cause the minimum possible casualties and damage consistent with the safety of our own troops. The landings took place successfully and on time. They appear to have been virtually unopposed, and no preliminary bombardment of any kind was ordered. Anglo-French troops proceeded to clear Port Said of scattered opposition. During this morning opposition continued and our patrols have advanced southwards from Port Said towards Kantara "

Replying to questions earlier put by Mr. Gaitskell, the Prime Minister reiterated that the Government's objective had been to put a force between the belligerents ; the Government were quite sure that until such a force was introduced, the Israeli troops would not go back for fear of further military acts by Egypt. The Government's intention was aimed at stopping not only hostilities but of preventing a resumption of them. Israeli troops were within striking distance of the Canal, which was the reason why the Canal itself offered the only line on which some neutral force could be interposed.

The Israeli Government had accepted H M. Government's requirement, and its forces remained about 10 miles from the Canal No-one who had followed the military story of recent days could have the least doubt that, had the Israeli forces wished, they could have gone very much farther forward than they did, and their acceptance of the 10-mile limit had made its contribution to dividing the combatants. The new element in the situation was that both Israeli and Egyptian forces had now ceased fire.

After welcoming the setting-up of an International Force, and saying that its composition should be a matter for discussion, the Prime Minister continued : " Mr. Gaitskell asked me why it was necessary to bring the Canal into the general settlement We had in mind that the Canal should be kept separate from the Arab-Israeli dispute. Naturally, all these questions are literally distinct one from another, but—as we said in our reply to the Secretary-General yesterday—to return to the system which has produced continuing deadlock and chaos in the Middle East is not only undesirable, but impossible. Mr. Gaitskell said ' Is it only the ships you have in mind ? ' It is a fairer way of putting the issue to say that Israel's communications form a vital part of the situation which has to be settled between Egypt and Israel. Therefore, all these elements come into the situation. Not one of them, we think, should be ignored."

Sir Anthony Eden said in conclusion : " There have been, and are no doubt still, bitter differences on the issues across the House I will lay down what I believe the action we took—with all its admitted attendant risks, and I never concealed them—has resulted in I believe it has limited the area of the conflict If Members think that is not a fair comment, I would like them to consider whether any of them, when the hostilities broke out, would have thought it possible that the other Arab countries would not all have been immediately involved in a war with Israel. I am convinced that it was only the knowledge of, and the presence of, our forces which limited the conflict in that way. The fact that the firing has now stopped, and Israel's acceptance of the 10-mile limit, has made certain, as far as it virtually can be, that the two parties shall not meanwhile re-engage in conflict. It is, I should have thought, an achievement which all of us should reckon worth while.

" I come to a more controversial—but I believe, as time passes, a more generally accepted—statement of one of the results This is that the action we took has been an essential condition for the creation, or attempted creation, of a U.N. Force to go into the Canal Zone. I ask members to look at the history of the Middle East in the post-war period and ask themselves if anything but this action would have brought the United Nations to take this step. I am absolutely sure it would not. Thus, after years of flickering war, the stage can now be set, if the U N. will put forward a Force adequate for the task, for negotiations and for a real settlement.

" As for the charge that we have broken friendships in the Commonwealth and elsewhere, I do not believe it. I believe that as we emerge from this crisis, as our motives are more understood, both the Commonwealth and our American friends will understand the reasons which motivated us in taking the course we did. As the dust settles, it may well be that out of this anxiety—acute and so widely suffered—a better opportunity will come than has ever been available before for the United Nations to prove itself a really effective international organization

" Much has been said about the effects of these events on the moral force of our country. However that may be regarded, this surely everyone has learnt that moral force alone in support of the U.N. is not effective to meet the challenges of this world ; and if, as a result of the actions we have taken, the U.N. is more ready to employ forces adequate to the duties it has to discharge, the better it will be for the peace and the future of the world."

Mr. Hugh Gaitskell said that the Opposition had heard the Prime Minister's statement " with profound relief and satisfaction," but asked whether (*a*) in accepting a cease-fire the Government were also accepting those other parts of the U.N. resolution which involved in due course the withdrawal of British forces from Egypt , (*b*) the settlement of the Suez Canal problem had been dropped from the Government's conditions ; and (*c*) arrangements would be made as speedily as possible for discussions with the Egyptian authorities about the withdrawal of the British forces and at the speediest possible clearance of the Canal.

Sir Anthony Eden pointed out that he could not make any further statement, as international discussions about the situation had been going on all day. In view of the information about the attitude of Israel and Egypt on other matters, the Government had thought that it was a " fair risk " to order the cease-fire by midnight, even if some of the questions were still under discussion. In accordance with that decision there would be no forward movement by British forces from the existing positions—" that is, no movement southwards."

Further statements about developments in the Middle East were made by Sir Anthony Eden on Nov. 7, by Mr. Head on Nov. 8, and again by Sir Anthony on Nov. 9.

The Cease-Fire. - Position in Port Said.

The **Prime Minister,** in his statement on Nov. 7, announced that since the cease-fire reports had been received that Port Said was under control, that the British troops there had taken up defensive positions, and that " the greatest efforts " were being made to clear obstructions to the harbour as quickly as possible. " I do not want to forestall what may be said at the U.N." he added, " but I wish to make it clear that we are now clearing obstructions to the Canal in the area we control. We would like to continue to clear obstructions in any other areas and would gladly do so under the authority of the United Nations."

Replying to Mr. Gaitskell, Sir Anthony said that the Government had no official intimation about the acceptance of the cease-fire by the Egyptian Government, and reports to that effect had not yet been confirmed. Meanwhile there had been some shooting in Port Said during the day, but " our position is that the cease-fire stands unless the forces are attacked. Our forces have no intention of moving forward from their present positions." After emphasizing that his statement applied equally to the French forces, the Prime Minister added that there had to be certain movements into Port Said in respect of administrative forces, but these were not forward movements " We are not going to attempt any major kind of reinforcement to enable anything further to be attempted later on," he declared. Later Sir Anthony said " Perhaps the most remarkable feature of the whole of this business has been, as far as Port Said was concerned, that the whole operation was carried out by one parachute brigade without any preliminary bombardment. Whatever the political views, as a military feat it must be unparalleled in history."

When Mr. Beswick (Lab) asked for assurances that the Government were not insisting on the inclusion of British forces in the U.N. Force, and that the Prime Minister was accepting " the spirit of the U.N. resolution " which proposed a force drawn " from uncompromised nations," Sir Anthony replied that the resolution made no mention of " uncompromised nations," and that one of the problems of the U N. was whether such a force should include the major Powers or the Powers other than the " Big Five " " I am quite clear," he added, " that our denominator of this business is whether or not an effective force can be created " Replying to Mr. Gaitskell, the Prime Minister said · " There is no question of withdrawal by the U K or our allies unless and until there is a U.N. Force to take over from us."

The Military Operations.

Mr. Head (Minister of War), in a statement about the military operations in Egypt, said that before the assault on Port Said photographic reconnaissance had shown that there were strongpoints along the sea-front with tanks and guns dug in. It was decided that 24 hours before the assault an air drop should take place to clear those strongpoints and emplacements. This task was carried out so effectively that the need for a preliminary bombardment, which would undoubtedly have caused considerable destruction and civilian casualties, was avoided The assault was carried most successfully, and organized fighting ceased during the night following the landings.

Troops were then engaged in dealing with looters, organizing public services, and administration and clearing-up. Normal life in Port Said would, it was hoped, be resumed within a few days, or sooner if the Egyptian administration co-operated.

On the day of the landings there was stubborn street fighting with Egyptian troops who resorted to sniping, and several buildings had been turned into strongpoints which had to be dealt with British troops advancing down the Canal had reached a point just north of Kantara before the cease-fire, and the French were holding Port Fuad.

Mr. Head mentioned that the previous evening the Egyptians had broken the cease-fire at El Cap, where a patrol of 35-50 men had advanced up the causeway, passed a British advanced company, (who refrained from firing) and opened fire with Bren-guns and rifles on a group of tanks , the tanks had returned the fire in self-defence, killing two Egyptians and wounding one The Egyptian patrol had then withdrawn, again passing the British advanced company—which could have wiped out the patrol but had refrained from firing because of the cease-fire.

There were two matters he wished to emphasize, Mr. Head went on. Firstly, there were considerable fixed defences with dug-in tanks facing the sea-front, and to achieve the landings and capture the town with such small casualties and with so little damage to the town and casualties to the civilian population, was a feat of considerable military skill Secondly, during all the operations by land, sea or air, British forces had exercised the greatest restraint throughout. He was sure that all Members, whatever their political views, would wish him to commend all those concerned with the operation for the way they had carried out a difficult and, in many ways, unprecedented task.

Mr. Stokes (Lab.), on behalf of the Opposition, expressed appreciation the great restraint shown by the British troops, no doubt under extreme provocation.

British Attitude to U.N. Force.

Sir Anthony Eden, in a statement on Nov 9, welcomed the Argentine resolution, for which the U.K. delegate had voted, setting up a U.N. Emergency Force He also welcomed Mr. Ben-Gurion's statement [see page 15205] on the withdrawal of Israeli forces and the intentions of the Israeli Government to co-operate with the U.N. Force.

" As soon as that force is in a position effectively to discharge its task," the Prime Minister continued, " the Government, as has been repeatedly stated, are willing to hand over to it the responsibilities which they have assumed I understand that General Burns is now in Cairo, and the U N Secretary-General has received a communication from him inquiring whether the U.K. and French Governments would agree to the entry into Port Said of some of the U N. military observers who have been ordered to proceed to Egypt in connexion with the observation of the cease-fire.

" For our part, we welcome the proposal and will give these observers all facilities. I have been in contact with the French Government and they agree with the comment I have just made. We also think it desirable that talks should begin at an early date between General Burns and the Allied Command in Egypt We are prepared for those talks to commence as soon as General Burns desires it.

"Meanwhile we are making certain alterations to the present deployment of our forces in the Eastern Mediterranean We shall retain in being the ground organization of all the R A.F squadrons previously deployed in Cyprus and Malta, but it will now be possible for many of these squadrons to fly home. In an emergency, they could be re-deployed in Cyprus and Malta in a matter of hours So far as the Army is concerned, we shall replace the assault units of paratroops and commandos with the equivalent in infantry battalions, and the former will be withdrawn from Egypt We shall also hold an additional infantry reserve in Cyprus"

Mr. Gaitskell, after welcoming Israel's acceptance of the U.N. resolution, asked the Prime Minister whether he agreed with a statement made by Mr Head the previous day that 'the whole point is that the Canal cannot and must not be solely the concern of the Egyptian Government"

Sir Anthony Eden, in reply, stressed the Government's hope that there would now be a general settlement in the Middle East—the objective which the Government had had constantly in mind. He added: "The Government have accepted the Argentine resolution [for a U N Force]. Let there be no doubt about this, and I am sure this applies to our French Allies as well—the sooner a force competent to take over in the Middle East can be created, the better we shall be pleased. There is no advantage in delay and we are certainly not going to attempt to make delays" On the Canal question, this was covered by the Argentine resolution and also by the U.S resolution

As regards the composition of the International Force, the Prime Minister reiterated that the criterion was not its size but its efficiency. This had to be worked out by the U N, and it was a matter which the Government must discuss with the U.N because it was of the first importance He saw no reason, provided goodwill were shown, why the Government should not be able to work out with the U N. what was required in the shape of that force, nor any reason why agreement should not be reached.

Sir Lionel Heald (C.) assured the Prime Minister that his statement "has greatly assured a number of us who want to support the Government, and has removed some uncertainties and ambiguities."

Replying to **Mr. de Freitas** (Lab.), the **Prime Minister** said that if the U N. Force required airfields outside Egypt he would consider letting them have airfields in Cyprus or Malta.

Mr. Philip Noel-Baker (Lab) asked (1) for an assurance that the Government would not make it a condition that there should be a British contribution to the U.N Force, and (2) whether the Government now agreed to the Secretary-General's plan for an International Force consisting of countries who were not permanent members of the Security Council?

The Prime Minister reiterated that he was not prepared for the exclusion of Britain and France from an international organization; nor did he think that any British Government could accept that. If it was proposed that the International Force should consist of small Powers as against great Powers, there was no objection in principle.

Israeli Acceptance of General Assembly Resolutions. - Mr. Ben-Gurion's Review of Sinai Campaign. - Eisenhower - Ben-Gurion Correspondence.

The Prime Minister of Israel, Mr. Ben-Gurion, stated in the *Knesset* on Nov. 7 that Israel was determined to hold the territory now in her possession as long as there was no peace settlement, and that she would not agree to the stationing of foreign troops there. In the early hours of Nov. 9, however, he announced in a broadcast that Israel was ready to withdraw her forces from the Sinai Peninsula after the entry of an international force into the Suez Canal area.

Mr. Ben-Gurion spoke as follows in his address to the *Knesset* on Nov. 7

"The glorious military operation, which lasted a week and conquered the entire Sinai Peninsula of 60,000 square kilometres, is an unprecedented feat in Jewish history and rare in the world's history. The Army did not make an effort to occupy enemy territory in Egypt proper, and limited its operation to freeing the area from northern Sinai to the tip of the Red Sea . Our forces did not attack Egypt proper, and I hope the Egyptian dictator will not compel Israelis to violate the Biblical injunction never to return to that country

"Three weeks ago I told the *Knesset* of the increased gravity of the Czech arms deal which supplied Egypt with a tremendous flow of heavy armaments It is only a week ago that our forces discovered the astonishing quantity and first-rate quality of this copious supply of Soviet arms, part of which had been despatched to the Sinai Peninsula. Neither the Egyptian dictator nor his 'peace-loving' friends in Czechoslovakia had the least doubt about the purposes of these enormous quantities of heavy arms. Certainly neither the supplier nor the recipient meant them to fall into Israeli hands On the contrary, they meant them to bring about the downfall of Israel.

"The Suez crisis has aroused the whole world, but it has not disturbed Israel to the same extent—not because Israel does not have an interest in freedom of navigation on this international waterway, but because our right of free navigation was brutally and arbitrarily violated by Egypt's ruler several years ago and continued after the Security Council's decision in 1951, which was arrogantly defied ..

"The injury inflicted and the danger posed to Israel by Egypt was not limited to the denial of our rights in the Suez Canal For Israel's economy, both the present and the future freedom of navigation on the Red Sea from Elath is no less vital than Suez Our nation's maritime trade actually commenced on the Red Sea some 3,000 years ago in the time of King Solomon, and Elath was the first Hebrew port. Up to the middle of the sixth century—that is, 1,400 years ago—Jewish independence was maintained on the island of Yotvat, south of the Gulf of Elath, which has been liberated by the Israeli Army. This is the island which is nowadays named Tiran, and which dominates passage from the Red Sea in the south to Elath in the north.

"A Greek historian of the sixth century, born in Caesarea, described Yotvat. 'There the Hebrews have lived since ancient times and govern themselves, and during the reign of Justinian in our days they were subjected to the Romans'... For centuries this island has been desolate, and only a few years ago the Egyptians occupied and garrisoned it for the purpose of interfering with Israeli shipping in the Gulf.

"The Egyptian dictator, however, did not content himself with the maritime blockade of Israel and the organization of an economic blockade against her He organized in all the Arab countries special units of murderers who crossed the borders to sow terror among workers in their fields and civilians in their homes Nasser proclaimed time and again that Egypt was in a state of war with Israel; nor did he conceal that his central purpose was to attack Israel at the first suitable opportunity and wipe her off the earth. It is no accident that among the large quantities of supplies captured by our forces in the Sinai desert, we also found copies of Hitler's *Mein Kampf*

"Since my review to the *Knesset* three weeks ago, something happened which intensified the danger and compelled us immediately to adopt special, vigorous precautionary measures. After the Jordanian elections, in which Egyptian bribery played a decisive role, a pro-Egyptian majority was elected and immediately a tripartite military alliance was concluded between Egypt, Jordan and Syria under which the armed forces of these three countries were placed under Egyptian command, with one clear goal in view—war to the death against Israel The Egyptian *Fedayeen*, who during the Suez crisis were ordered by the Egyptian dictator to suspend their murderous activities, were brought back into action as soon as it seemed to Abdul Nasser that the crisis had passed ...

'There was no room left to doubt that the noose which had been prepared for us was tightening, and it was our duty to take urgent and effective measures for self-defence. We mobilized a number of reserve battalions to guard the eastern border against attack from Jordan or Syria or both, and we mobilized a larger force of reserves, consisting especially of armour, on the southern border.

"At the beginning of our mobilization I received two messages from the President of the United States expressing concern over the mobilization of reserves In my reply to the President I reminded him of his constant efforts for peace in the region during the past year, which I supported whole-heartedly, as well as of the fact that it was the Egyptian dictator who had sabotaged these efforts. I also informed the President of the increasing gravity of the situation arising from the dictator's expansionist aims, the extent of his rearmament, his attempts to undermine the independence of the Arab countries, and, above all, his overt intention to destroy Israel, his creation of a military alliance with Jordan and Syria under Egyptian command, and the renewal of *Fedayeen* activities. I ended my reply: 'With Iraqi troops poised in great numbers on the Iraq-Jordan border, with the creation of a Joint Command by Egypt, Syria and Jordan, with the renewal of incursions into Israel by Egyptian gangs, my Government would be failing in its essential duty if it did not take all necessary measures to ensure that the declared Arab aim of eliminating Israel by force should not come about'

"That same evening a number of our units set out to put an end to the nests of murderers which were part of the Egyptian Army, and to those bases from which the murder gangs came. Into these engagements the Egyptians brought their air force, and fierce battles developed At the end of seven days the entire Egyptian force in Sinai was eliminated ... I am confident that military historians will make a thorough study of this remarkable operation, carried out by the Israeli Army in a few days, in a vast desert area against an enemy equipped and armed with the finest, most modern weapons of the Soviet bloc and elsewhere

"It is only now, after the occupation of the Gaza Strip, Abu Aweigila, El Arish, Nakhl, and the Gulf of Elath, that we have fully realized how great in quantity, how modern and excellent in quality, were the Egyptian arms and equipment. They had heavy weapons, tanks, guns, first-class communications equipment, motor transport, armoured cars, supplies immeasurably superior to anything our forces possess

"In spite of all our previous information about the flow of heavy arms which the Egyptian dictator received during the year, we had no real notion of the enormous quantities and superior quality of those arms and equipment The vast booty which fell into our hands proves beyond all doubt that Egypt's dictator squeezed dry the hungry Egyptian masses to provide his army with everything they had.

"But all this was of no avail, because there was no spirit in them. About three divisions faced Israel's Army, in addition to a number of units copiously armed and scattered throughout the length and breadth of Sinai The Egyptian troops numbered over 30,000, and heavy reinforcements arrived during the fighting—over two brigades. This great army was equipped with hundreds of Czech and British tanks and other armour, and supported by an air force equipped with *Vampire, Meteor,* and *MIG* jet planes. The Egyptian Navy also came into action.

"The first night of operations we took Kuntilla after 20 minutes of resistance, and Kusseima after 45 minutes. I know this dry description is inadequate for this extraordinary and truly heroic action, which few would believe possible. But it did not come out of the blue . in the preliminary planning we kept two principal objectives in view—to ensure speed of operation, and to minimize the number of casualties.

"I can say with deep satisfaction that both purposes were achieved more successfully than expected. Our losses were about 150 killed. Let us stand silent in glorious memory of our heroes. In deep grief and profound pride we send our love and respect to their parents." [The *Knesset* then stood in silent tribute].

In conclusion, Mr. Ben-Gurion said that there were seven principles of policy on which Israel must clarify her stand in order to bring her position "to the notice of world opinion with full moral force and unflinching determination." He enumerated these seven principles as follows :

"(1) The armistice agreement with Egypt is dead and cannot be revived. It has died because of the continuous attacks upon it by Colonel Nasser, because of his violations of its principles and purposes; by his defiance of the decisions of the U.N. Security Council, by his repeated declarations that a state of war existed between the two countries; and by his organization of murderous attacks on Israel by *Fedayeen* gangs

"(2) In consequence, the armistice line has no more validity.

"(3) Israel has no quarrel with the Egyptian people. King Farouk, followed by Nasser the dictator, brought great disaster to their people by inciting them to war against Israel. The flight of Egyptian officers and of tens of thousands of Egyptian soldiers from Sinai is unquestionable proof that they had no desire to fight Israel in the remote wilderness.

"(4) We do not wish our relations with Egypt to continue in the present anarchic state, and we are ready to enter into negotiations for a stable peace, co-operation, and good-neighbourly relations with Egypt on condition that they are direct negotiations, without prior conditions on either side and without duress from any quarter

"(5) We hope that all peace-loving nations will support our desire for such negotiations with each of the Arab States. But even if the other Arab States are not prepared to conclude a permament peace, so long as they observe the armistice agreements Israel will do so also.

"(6) On no account will Israel agree to the stationing of a foreign force, no matter how called, in her territory or in any of the areas occupied by her.

"(7) Israel will not fight against any Arab country or against Egypt unless attacked by them.

Mr. Ben-Gurion concluded : "It may be that in the future we shall have to face a difficult political struggle, perhaps something even graver. We shall not give way to the arrogance of the Arab rulers, but on the other hand we shall not humble ourselves before the powerful forces of the world when justice is not on their side."

Following a nine-hour emergency Cabinet meeting on Nov. 8, however, Mr. Ben-Gurion announced shortly after midnight (local time), in a broadcast to the nation, that Israel was ready to withdraw from Egyptian territory "as and when arrangements have been made in connexion with the entry into this area of an International Force, which is also to replace British and French forces in the Suez Canal area."

On the same day (Nov. 8) the following communication was sent by the Israeli Minister of Foreign Affairs (Mrs. Meir) to Dr. Hammarskjold :

"I thank you for your cables transmitting the two resolutions passed yesterday by the Special Session of the General Assembly I have the honour to inform you that the Government of Israel will willingly withdraw its forces from Egypt immediately upon the conclusion of satisfactory arrangements with the United Nations in connection with the Emergency International Force. At the same time, and without prejudice to this undertaking, I wish to state that while as a result of the Sinai operation we have succeeded in destroying many of the *Fedayeen* gangs and the bases from which they were planned and directed, we must repeat our urgent request to the United Nations to call upon Egypt, which has consistently maintained that it is in a state of war with Israel, to renounce that position, to abandon its policy of boycott and blockade, to cease sending murder gangs into Israel· and, in accordance with its obligations under the U N. Charter to live at peace with member-States, to enter into direct peace negotiations with Israel."

In his broadcast on Nov. 8 Mr. Ben-Gurion read the text of messages he had received from Marshal Bulganin and President Eisenhower, and of his replies, but gave no explanation of the reasons for his Government's sudden change of attitude. It was, however, generally believed that it had been brought about by the twin pressures from Moscow and Washington—the Soviet threat of armed action against Israel, as expressed in Marshal Bulganin's letter to Mr. Ben-Gurion of Nov. 5 [see page 15219], and the U.S. intimation that economic sanctions might have to be taken against Israel if she did not comply with the resolution of the U.N. General Assembly, as indicated in President Eisenhower's message [see below]. Another factor mentioned in the international Press as having been instrumental in bringing about Israel's acceptance of the U.N. resolution was said to have been a communication from the British and French Governments stating that they would not be in a position to come to Israel's help if the Russians, either directly or by means of "volunteers," intervened against the Israeli armed forces.

In his message to Mr. Ben-Gurion, which was released in Washington on Nov. 8, President Eisenhower had written as follows :

"As you know, the U N General Assembly has arranged a cease-fire to which Egypt, France, the United Kingdom, and Israel have agreed There is being dispatched to Egypt a U.N Force in accordance with pertinent resolutions of the General Assembly. That body has urged that all other foreign forces be withdrawn from Egyptian territory, and, specifically, that Israeli forces be withdrawn to the general armistice line. The resolution covering the cease-fire and withdrawal was introduced by the United States and received the overwhelming vote of the Assembly

"Statements attributed to your Government to the effect that Israel does not intend to withdraw from Egyptian territory, as requested by the United Nations, have been called to my attention. I must say frankly, that the U S A. views these reports, if true, with deep concern. Any such decision by the Government of Israel would seriously undermine the urgent efforts being made by the U.N. to restore peace in the Middle East, and could not but bring about the condemnation of Israel as a violator of the principles as well as of the directives of the United Nations.

"It is our belief that as a matter of highest priority peace should be restored and foreign troops, except for U.N. forces, withdrawn from Egypt, after which new and energetic steps should be undertaken within the framework of the U.N to solve the basic problems which have given rise to the present difficulties The U.S.A. has tabled in the General Assembly two resolutions designed to accomplish the latter purposes, and hopes that they will be acted upon favourably as soon as the present emergency has been dealt with

"I need not assure you of the deep interest which the United States has in your country, nor recall the various elements of our policy of support to Israel in so many ways It is in this context that I urge you to comply with the resolutions of the U N. General Assembly dealing with the current crisis, and to make your decisions known immediately. It would be a matter of the greatest regret to all my countrymen if Israeli policy on a matter of such grave concern to the world should in any way impair the friendly co-operation between our two countries"

Mr. Ben-Gurion's reply (Nov. 8) was worded as follows :

". . . Your statement that a U.N. Force is being dispatched to Egypt in accordance with pertinent resolutions of the General Assembly is welcomed by us We have never planned to annex the Sinai desert In view of the U N. resolutions regarding the withdrawal of foreign troops from Egypt and the creation of an International Force, we will, upon conclusion of satisfactory arrangements with the United Nations in connexion with this International Force entering the Suez Canal area, willingly withdraw our forces"

After repeating the Israeli request to the U.N. to bring about peace between Egypt and Israel, as set out in Mrs. Meier's letter to Dr Hammarskjold [see above], Mr. Ben-Gurion's letter concluded : "On behalf of my Government I express to you our gratification at your reference to the deep interest of the United States in Israel, and its policy of support for our country."

Dr. Josephthal, the secretary-general of the *Mapai* (Labour) party headed by Mr. Ben-Gurion, stated on Nov. 11 that the decision to withdraw from Sinai had been forced upon the Israeli Government by the Soviet Union, since if Israel had refused to accept the U.N. resolution "there was a very real danger that the Soviet would have bombed this country, and no-one would have come to our help."

General Yadin, Chief of Staff of the Israeli Army at the time of the signing of the armistice agreements, said in London on Nov. 13 that Israel had had "the choice of being wiped from the map of the world or of counter-attacking and attempting thereby to survive."

In support of his claim that Egypt was preparing to attack Israel, General Yadin produced copies of two documents captured in the Sinai fighting. One, signed by Major-General Ahmed Salem (Staff Officer of the Egyptian Third Division), said that the "supreme objective" was the annihilation of Israel, its wording being as follows "Every commander should prepare his troops for the unavoidable war with Israel in order to achieve our supreme objective—namely, the annihilation of Israel and its complete destruction in as little time as possible and by fighting her as brutally and cruelly as possible"

General Yadin said that the great quantity of equipment captured by the Israel Army in the Sinai Peninsula—including 100 tanks. 1,000 vehicles, 200 pieces of artillery, 100 half-tracks, and 7,000 tons of ammunition—showed that preparations were being made for an attack on Israel.

It was noted in the foreign Press that Israel's undertaking to withdraw from Egypt covered only Egyptian territory proper—i.e. the Sinai Peninsula. The "Gaza strip" had never belonged to Egypt, having been part of Palestine until its occupation by the Egyptian Army on the day the State of Israel came into existence in 1948.

By 88 votes to three the *Knesset* endorsed Mr. Ben-Gurion's statement, after it had rejected a Communist motion alleging that the attack on Egypt had "disturbed peace" and endangered Israel's security.

Communist Arms Supplies to Egypt and Syria.

Official British sources in London disclosed on Nov. 11 that within the past 12 months Egypt had received military equipment from the Soviet bloc to the value of at least £150,000,000, while Syria had received from Communist countries equipment to the value of about £20,000,000 during the same period.

Egypt. Major items of equipment received by Egypt had included at least 50 *Ilyushin* jet bombers, at least 100 *Mig* jet fighters, about 300 medium and heavy tanks, including a substantial number of T-34s, over 100 armoured troop-carriers between 400 and 500 guns of various calibres, a number of rocket launchers, and much other equipment, including mines, radar, and wireless equipment

The Egyptian Navy had received two destroyers, four minesweepers, 15-20 motor torpedo-boats, some smaller vessels, and an unestimated number of mines Delivery of at least one submarine, and probably more, from Soviet-bloc countries had been in hand before the Anglo-French intervention.

There had been heavy losses of this equipment during the recent operations in Egypt, but it was pointed out that these could be replaced from Soviet-bloc countries. There was no evidence of "volunteers" from the Soviet Union or the satellite countries going to Egypt since the beginning of the Anglo-French operations, but more than 1,000 technicians and instructors had been sent there previously from Soviet-bloc countries, some 300 Russians and Czechs, of whom a number appeared to be aircrews and mechanics, had left Egypt for the Sudan shortly after the Anglo-French intervention.

It was also pointed out in London that the *Ilyushin* bomber force had never been used by the Egyptians, and the fighters only to a very limited extent, but that most of the bombers seemed to have been flown out of Egypt Most of the Egyptian fighter force and some of the bombers had been destroyed on the ground. An Egyptian claim that only dummy aircraft had been destroyed was described as "fantastic."

The official view in London was that the presence of large quantities of Soviet arms and the large numbers of Soviet technicians in Egypt had certainly provided an opportunity for the rapid formation of Soviet units in that country

Reports from Khartoum stated that several Soviet tank- and aircrews, which had reached the Sudan from Egypt, had been flown from Khartoum on Nov. 10 to Athens and Rome for repatriation

On Nov. 10 it had been reported in Tel-Aviv that a "gigantic" secret military base had been established by the Soviet Union at several points in the Sinai Peninsula, and that one underground depot was found to contain tens of millions of dollars worth of Soviet-type equipment from Czechoslovakia.

Syria. Military equipment supplied to Syria had included at least 100 medium tanks, at least 100 armoured troop carriers, between 50 and 100 self-propelled guns, at least 100 other guns of various calibres; and large quantities of minor armaments, ammunition, radar, etc. Reports of the arrival in Syria of aircraft of Soviet design were not confirmed in London, though it was not denied that such reports might well be true.

British Reactions to Middle East Crisis.

Reactions to the crisis in Britain are described below under cross-headings.

Labour Party. The National Council of Labour (representing the Labour Party, the T.U.C., and the Co-operative movement) decided at an emergency meeting on Nov. 1 to launch a nation-wide campaign against the Government's action in Egypt under the slogan "Law—Not War." It was planned to hold mass meetings throughout the country for this purpose, beginning with a demonstration on Nov. 4 in Trafalgar Square, London.

The National Council approved a resolution saying that it was "profoundly shocked by the action of the British Government in resorting to armed force against Egypt in clear violation of the U.N. Charter," and calling on the Government "(1) to cease forthwith all military measures against Egypt; (2) to support the demands made in the U.N. for an immediate cease-fire and the withdrawal of Israeli troops to the armistice frontiers; and (3) to propose the summoning by the U.N. of a peace conference to settle the dispute between Israel and the Arab States."

The resolution also called on the British people "to bring effective pressure to bear on the Government in support of these policies through normal constitutional Parliamentary methods, and to refrain from taking industrial action as a means of influencing national policy in the present crisis."

The first protest meeting in Trafalgar Square, held on Nov 4 and addressed by Mr. Bevan, Dr. Edith Summerskill, and Mr. Anthony Greenwood, was followed by clashes between police and large numbers of demonstrators—mainly young people, and including many students—attempting to march on Downing Street, 27 persons were arrested for assaulting the police, obstruction, etc., a number of fines being imposed.

The Government's action was, however, defended by Mr. Shinwell (formerly Defence Minister in the Labour Government) in a speech at Sydney (Australia) on Nov. 13 to the Commonwealth Parliamentary Association. He declared that the Anglo-French intervention in Egypt was justified because of "the U.N. delay in taking prompt decision and action," and added: "In the absence of effective action by an international organization, no nation must be compelled to stand idly by when its interests are being jeopardized . . . I voted with my party against Sir Anthony Eden's action, but that does not necessarily mean I disagreed with everything the Government did."

Liberal Party. The Liberal Party issued a statement on Nov. 2 condemning the Government's action in Egypt; asking it to support the proposals made in the U.N. for an International Police Force for the Middle East, and urging it to press upon the U.N. the need for a negotiated peace treaty between Israel and Egypt in substitution of the armistice arrangements. It accused the Government of (1) treating the U.N. with contempt by issuing its ultimatum almost simultaneously with its reference to the Security Council; (2) ordering an attack on foreign territory without either the justification of an armed attack against Britain or the authority of the U.N.; (3) ignoring the Tripartite Declaration of 1950, (4) resorting to force without consultation with the Dominions; (5) using the veto in the Security Council to defeat a resolution calling on all States to refrain from the use of force, "thus destroying the case we have frequently made against Russia's use of the veto"; (6) undermining the U.N., disturbing Anglo-American friendship, and creating discord among Commonwealth members

Lord Russell of Liverpool, who had joined the Liberal Party in June, resigned from the party on Nov. 11 because he disagreed with its opposition to the Government's policy of intervention in the Canal Zone, which he fully supported [Lord Russell had resigned in 1954 as Assistant Judge-Advocate-General after refusing to withdraw his book about German war crimes, *The Scourge of the Swastika*.] On Nov. 11 Mr. John Creasy the author, similarly resigned from the Liberal Party, declaring that its attitude on the Suez crisis did not reflect that of the mass of Liberals in the country, and expressing his full support for Sir Anthony Eden. Mr. Creasy was Liberal candidate for Bournemouth West in 1950, polling over 9,000 votes.

The Universities. A large number of resolutions, signed by professors, students and teachers of nearly all British universities, was adopted protesting against the Government's action. On the other hand many resolutions were passed, particularly by the Conservative parties in the Universities, expressing support for the Government.

Among the resolutions criticizing the Government was one signed by 377 senior members of Oxford University (including 10 heads of colleges, 17 professors and readers, and 212 Fellows of colleges) which deplored the Government's military intervention in Egypt and expressed the view that "this action is morally wrong, endangers the solidarity of the Commonwealth, constitutes a grave strain upon the Atlantic Alliance, and is a flagrant violation of the principles of the U.N. Charter." The heads of colleges signing the resolution included Sir Maurice Bowra (Wadham), Professor K. C. Wheare (Exeter), and Mr. A. L. P. Norrington (Trinity).

On the other hand, 126 signatures—including those of five heads of colleges—were affixed to a resolution in which senior members of Oxford University expressed support for the Government in a letter sent to the Press This letter said that the "petition signed by a large number of Oxford dons, in which the Government is accused of disregarding international morality and its Middle East activities condemned . . must not be regarded as fully representative of the views of senior members of the University. . . The fact remains that . . . after the clear and repeated failures of the U.N. to act effectively in the Israeli-Egyptian dispute, a crisis was likely sooner or later to develop when one or more major Powers would feel impelled to intervene to prevent a more serious war. In their present actions the British and French Governments have chosen what seems to them the course of lesser evil, when a choice between evils was inevitable. When a fire breaks out, it must be extinguished before it spreads. It seems improper to assume . . . that these Governments are acting from unscrupulous and selfish motives or that they have no regard for the ultimate objectives of the United Nations . . . "

This letter was signed by Dr. Gilbert Murray, O.M., the eminent scholar and one of the most prominent supporters of the United Nations and the former League of Nations, as well as by the Master of Balliol (Sir D. Lindsay Keir), the Warden of Merton (Mr. G. R. G. Mure), the Warden of All Souls (Mr. John Sparrow), and the Principals of Hertford College and St. Edmund Hall.

The Churches. A statement issued on Nov. 3 from Lambeth Palace announced that a deputation representing the British Council of Churches, headed by the Archbishop of Canterbury (Dr. Fisher), had called upon the Lord Chancellor (Lord Kilmuir), representing the Prime Minister, to convey to him "the deep concern of Christian opinion in this country regarding events in the Middle East" and to urge "that every attempt should be made to secure a general cease-fire as speedily as possible"

In a debate in the House of Lords on Nov 1, when the Anglo-French action in the Middle East was approved by 82 votes to 30, the Archbishop of Canterbury had expressed his views as follows:

". . . The point to which the Christian conscience must most acutely address itself is whether or not we are standing in the spirit of the U.N. Charter. Talks about our vital interests or the vital interests

of Israel is not the main point, since under the Charter we have bound ourselves in honour not to be judges in our own cause, or to constitute ourselves sole guardians of the interests of other nations or of international order

"It is impossible to feel that we are on secure ground Most people seem to feel that we are standing on slippery ground. Christian opinion is terribly uneasy and unhappy, and even those most convinced that the Government have taken the right action would be wise to take heed, not only to the uneasiness here, but to the hostile reaction which the Government's action is receiving in all parts of the world.

"Is there anything we can do? Can we now as a nation make a new proposal? Objectively, Egypt is at present within her own borders; Israel is out of bounds; and the British and French Governments propose to be out of bounds also. The immediate task is to bring everyone back within his own rightful place, so that nobody is trespassing.

"Can we say to Israel that if she will withdraw her forces within their own bounds, France and ourselves will not intrude into Egypt? Can we say to Israel that the whole world is demanding that, both of her and of ourselves, and that therefore we are willing to do so? With that standstill arrangement we can surely say that the statesmen of the world will see that Israel will not suffer for her obedience, and no longer have to live under continuous threats."

The following statement was issued on Nov. 5 by the Archbishop of York, Dr. Ramsey. "Many people are eager that the Christian Church in this country should give a lead in the present time of international strain. Some assume the lead should take the form of a denunciation of the policy of the Government In my judgment the necessary lead cannot rightly take that form, since the policy of the Government, no less than the policy of the Opposition, can be supported with Christian conviction. Honest conviction dictates the Opposition's policy of conformity to the letter of U.N.O.'s decisions, but an equally honest conviction inspires the Government's belief that by its urgent action to stop war between Egypt and Israel it is making it possible for U.N.O. to take effective action itself The first duty of Christian people is to stand firmly for patience, charity, and rational discussion against hysterical passion and the loathsome imputation of motives which are poisoning the minds of many people"

Sir Winston Churchill's Support for Government. Sir Winston Churchill sent the following letter on Nov. 3 to the chairman of the Conservative Party in his constituency (Woodford) expressing his support for the Government's action

"The British connexion with the Middle East is a long and honourable one. Many of the States there owe their origin and independence to us. In peace we have assisted them in many ways—financially, technically, and with our advisers in every sphere. In war we have defended them at great cost. Above all, we have endeavoured to confer on them the benefits of justice and freedom from internecine wars. In the last few years the U S A., France, and we ourselves have been principlally concerned with keeping the peace between Israel and her neighbours.

"In spite of all our endeavours, the frontiers of Israel have flickered with murder and armed raids Egypt, the principal instigator of these incidents, had openly rejected and derided the Tripartite Declaration by which we, the French, and the Americans sought to impose restraint The last few days have brought events to a head. Israel, under the gravest provocation, erupted against Egypt. In this country we had the choice of taking decisive action or admitting once and for all our inability to put an end to strife

"Unfortunately, recent months have shown us that at present it is not possible to hope in this area for American co-operation on the scale and with the promptness necessary to control events. H.M. Government and the Government of France have reacted with speed. I regret profoundly that the Egyptian reaction has forced the present course on us. But I do not doubt that we can shortly lead our course to a just and victorious conclusion.

"We intend to restore peace and order to the Middle East, and I am convinced that we shall achieve our aim. The American alliance remains the keystone of our policy. I am confident that our American friends will come to realize that, not for the first time, we have acted independently for the common good World peace, the Middle East, and our national interest will surely benefit in the long run from the Government's resolute action. They deserve our support."

Resignations from Observer Trust. *The Observer* (the well-known Sunday newspaper, which had taken a strong anti-Government line on the Middle East crisis) announced on Nov 11 that Marshal of the R.A.F., Viscount Portal of Hungerford, Sir Keith Murray, and Mr. Arthur Mann were resigning from The Observer Trust (see 15154 A) It was stated that Lord Portal had resigned because of "fundamental disagreement" with an expression of editorial policy contained in the issue of Nov. 4; that Sir Keith Murray felt that the *Observer's* leading article on that date was "intemperate," and was retiring from the Trust at the end of the year; and that Mr Arthur Mann had resigned because he felt that "the style of our leading article was not in keeping with the kind of journalism that he himself had stood for and that *The Observer* had hitherto upheld."

The Conservative Central Office stated on Nov. 10 that over 1,000 telegrams containing resolutions of support for the Government's action in the Middle East had been received by the Prime Minister, whereas telegrams disagreeing with the Government had numbered seven only.

Commonwealth Reactions.

While the British Government's policy was supported by Australia and New Zealand, a critical attitude was adopted in Canada, the South African Government remained non-committal, and the Anglo-French action was strongly denounced in India, Pakistan and Ceylon.

Australian Support for Britain. - Mr. Menzies' Speech.

The Prime Minister, Mr. Menzies, defended the action taken by Britain and France in a speech on Nov. 1 to the Federal House of Representatives. Extracts are given below:

"... There can be little doubt that around the Israeli frontiers the faults have by no means been all on one side The plain fact is that Israel exists in a state of international tension Egypt claimed months ago to be at war with Israel and has, in fact, used that as her justification for her exclusion of Israeli ships from the Canal. Following upon his recent coup in respect of the Suez Canal, the Egyptian President has increasingly felt that he can defy the great and interested nations. It is well known that he has established military contacts with Syria and has been actively developing his own position by propaganda in the States east of Jordan. It is not my intention at the present time to examine whether the Israeli invasion of Egypt falls within either the letter or the spirit of the relevant agreements, but it seems to be only just to point out that the geographical and political situation of Israel is such as to give the Israeli people the greatest feeling of apprehension . ."

After recapitulating the resolutions presented in the Security Council, Mr. Menzies continued "The disability attending the Security Council's deliberations is not so much that there were vetoes, since these are to be expected in cases where international tension is high and where the permanent members do not find themselves all on one side But it is, in our opinion, a great misfortune that differences of view should have occurred between Britain and France on the one hand and the U.S A on the other ... We have, in these circumstances, heard with pleasure the statement made this morning by President Eisenhower [see "American Reactions" below]. True, in that statement he has maintained the American view that force in the Middle East is both unwise and improper, but he went on to say that that was in no way to minimize American friendship for Britain and France, and American determination to maintain that friendship He added, no doubt with lively recollection of the events in August and September, that Britain and France have been subject to repeated provocation ...

"I now proceed to say something about the two questions which will present themselves to the minds of members in relation to the actions of Britain and France.

"First, is the United Kingdom at fault in not having engaged in a pre-consultation with the other Commonwealth countries? Our answer to this question is that she was not at fault at all. The circumstances were those of great emergency Hostile armed forces were rapidly approaching each other and extensive combat was imminent In that combat, vital interests in the passage of the Canal were quite likely to suffer the most serious damage . . There was literally no time to be lost if action was to be taken to keep the combatants out of the Canal area and afford it proper protection. Effective consultation—and I say 'effective' because a mere form of consultation would have been quite useless—would plainly have occupied considerable time, and the urgent position might have fallen into irretrievable disaster In our opinion, therefore, Britain, whose Canal and other Middle East economic interests are so vast, was correct in proceeding upon her own judgment and accepting her own responsibility We are not living in an academic world The normal processes of consultation should always be followed wherever possible, but there are instances, like the present one, in which events move too fast for normal processes.

"The second great question that arises is the propriety of the action taken by Britain and France. Upon this point, the Government of Australia believes that the action was proper It had already been demonstrated in the case of the Israeli ships that a resolution passed by the Security Council condemning Egypt can be set at naught in the absence of strong executive action ... It was quite clear that the procedures of the Security Council were such that, even assuming that some resolution could be carried, the Canal would have been involved in war long before any U.N action could become effective. Britain and France, therefore, decided that they would, so to speak, 'hold the pass.' Their purpose, as they plainly state, was to have the Israeli and Egyptian forces withdrawn from the Canal for a distance of 10 miles on either side so that the operation of the Canal would not be menaced. Their action was a police action taken in a state of great emergency and was, in fact, calculated to keep the combatants apart and to enable counsels of moderation thereafter to prevail ...

"I could perhaps sum the matter up by saying that the Anglo-French action represents an emergency measure by two of the great democratic Powers. Their object is not to make war, but to prevent war by separating two belligerents They are not seeking territorial advantage or subjugation of peoples, but are aiming to assure to the whole world the treaty rights of continued free access to the international waterway by protecting its installations, the ships that use them, and the people who travel in those ships They are not seeking to impose an arbitrary settlement in the Egypt-Israel dispute, but to discharge a limited function which will enable a settlement to be reached. They have made it clear that they are not seeking to maintain forces permanently in Egypt, but will withdraw them as

soon as the immediate purpose has been achieved. They are not seeking to usurp the right of the Security Council to attempt to settle the Egypt-Israel dispute but are determined to ensure that, when choosing a method of settlement, the Security Council will not have to face the fact of the prior destruction or dislocation of the Suez Canal. Above all, there is no desire to involve or confuse a settlement of the dispute about the operation of the Suez Canal with other Middle East disputes, but to prevent that involvement."

New Zealand Support for Britain. - Statement by Mr. Holland.

The Prime Minister, Mr. Holland, issued the following statement on Nov. 1 after a meeting of the N.Z. Cabinet.:

"While several features of the present situation are disturbing, I have full confidence in the U.K. intentions in moving forces into the Canal Zone. The U.K. Government has given an undertaking that its operations are designed solely to protect the Canal and to halt fighting between Israeli and Egyptian forces, and that this emergency police action is intended to be of limited duration. It is nevertheless a matter of grave concern that a situation should have arisen in which there are serious differences of viewpoint between the U K and one of her principal allies, the U S.A. The New Zealand Government will continue to give the closest attention to developments and is prepared to make whatever contribution it can, through the U N. or in other directions, to secure a lasting solution of Middle East problems—an objective towards which the Commonwealth and the U.S.A have been working in close unity for many years"

Replying to questions at a press conference, Mr. Holland said that New Zealand had not been consulted by the U.K. before the Anglo-French ultimatum to Egypt and Israel was issued He added that the views put forward by Mr. Gaitskell, the Leader of the Opposition in Britain, were "not the views of the New Zealand Government."

Attitude of Canadian Government. - Statements by Mr. Lester Pearson and Mr. St. Laurent.

The Minister for External Affairs, Mr. Lester Pearson, made a press statement on Oct. 31 expressing "regret" that Britain and France had found it necessary to deliver an ultimatum backed by force at a time when the Security Council was considering the Middle East situation. He added that Canada had not been consulted by Britain and France before taking their action.

The Prime Minister, Mr. St. Laurent, said in a speech on Nov. 4:

"Because we believe that a permanent settlement of Israel's relations with its neighbours and of the future of the Suez Canal should be reached by peaceful negotiations under the aegis of the U N., the Canadian Government regrets that Israel used force against Egypt, although we recognize that Israel has been subject to grave threats and provocations during the last few years. Though we recognize the vital importance of the Canal to the economic life and international responsibilities of the U.K. and France, we could not but regret also that, at a time when the Security Council was seized of the matter, the U.K. and France felt it necessary to intervene with forces on their own responsibility"

It was announced in Ottawa on Oct. 31 that the Canadian Government had suspended the export of 24 *Sabre* jet planes to Israel (see 15144 C), and that no arms would be sent either to Israel or to Egypt.

South Africa.

No statement was issued by the Union Government, but Mr. Louw (Minister of External Affairs) said on Oct. 31 that South Africa had been neither officially informed nor consulted before the Anglo-French ultimatum was issued.

India. - Mr. Nehru's Denunciation of Anglo-French Action.

The following official statement was issued in New Delhi on Oct. 31:

"The Government of India have learned with profound concern of the Israel aggression on Egyptian territory, and the subsequent ultimatum delivered by the U.K. and France to the Egyptian Government, which was to be followed by an Anglo-French invasion of Egyptian territory. They consider this a flagrant violation of the U.N. Charter and opposed to all the principles laid down by the Bandung conference. This aggression is bound to have far-reaching consequences in Asia and Africa, and may even lead to war on an extended scale The Government of India are conveying their views to the Governments concerned, and earnestly trust that, even at this late hour, this aggression will be halted and foreign troops withdrawn from Egyptian territory. They hope that the world community as represented in the U.N. will take effective action to this end."

In addition, the following message was sent by the Prime Minister, Mr. Nehru, to the U.N. Secretary-General:

"We have been profoundly shocked by recent developments in the Middle East and, more particularly, by the Anglo-French invasion of Egypt after their rejection of the Security Council resolution moved by the United States. It is clear that Israel has committed large-scale aggression against Egypt. Instead of trying to stop this aggression, the U K and France are themselves invading Egyptian territory. This is not only an affront to the Security Council and a violation of the U.N. Charter, but also likely to lead to the gravest possible consequences all over the world. Egypt, which has suffered from Israel aggression, has in addition to suffer grievously by the Anglo-French invasion of her territory. The argument that this invasion is meant to protect the Canal and to ensure free traffic has no force, as the first result of this invasion is for this traffic to cease. In view of the disastrous consequences of the invasion of Egyptian territory, I earnestly trust that the U.N. will take strong steps in this matter to prevent the world plunging into war, and demand the immediate withdrawal of all foreign troops from Egypt. The procedures of the U.N. must be swifter than those of invasion and aggression In sending you this message I am not only reflecting the unanimous views of my Government and people but also, I am sure, of a large number of other peoples."

In a speech at Hyderabad on the same day (Nov. 1) Mr. Nehru described the Anglo-French action in Egypt as "naked aggression" which would not be tolerated by "the self-respecting and independent nations of Asia and Africa." After declaring that India's sympathies were entirely with Egypt, he went on: "There has been the sudden invasion of Egypt by Israel in breach of an armistice and of the U N. Charter. In these disputes our sympathies have been for the Arab nations. They have had a raw deal and this must be remedied. But we have no enmity towards Israel. I am not thinking of Israel being wiped out. The fact remains that is is a case of clear and naked aggression on Egypt by Israel. Every member of the U.N. should try to stop it and resist it. But Britain and France issued an ultimatum to Egypt.... The Suez Canal was functioning properly. If there was any danger to the Canal it was from Israel, which advanced 90 miles inside Egypt. Britain has been a force for peace in the past two years, and because of this my sorrow and distress is all the greater for the amazing adventure which Britain and France have entered into."

During a day of intensive political activity in New Delhi, Mr. Nehru had two meetings with the U K. High Commissioner (Mr. Malcolm Macdonald) and also saw the U.S., Soviet and Egyptian Ambassadors and the French Chargé d'Affaires. A message expressing India's full support for Egypt was sent by Mr. Nehru to President Nasser on Oct 31.

Pakistan. - Mr. Suhrawardy's Denunciation of Anglo-French Action. - Anti-British and Anti-French Demonstrations.

Mr. Suhrawardy, the Prime Minister of Pakistan, issued the following statement on Nov. 3:

"Ever since the invasion of Egyptian territory by Israel and the subsequent action of Britain and France, feelings in this country have been understandably running high. The Security Council resolution sponsored by the U.S A., aimed at bringing about a cessation of hostilities and the removal of all foreign troops from Egyptian soil, has been vetoed by Britain and France; and there has been bombing of military targets in Egypt by British and French aircraft as a prelude to landing British and French forces to occupy Suez in defiance of the U.N These developments have created a very grave situation. Not only have these events incited and helped Israel in her aggressive designs on Egyptian territory, but the violation by these two Powers of Egyptian sovereignty by the use of force, in disregard of the appeals of the other members of the U.N., has shocked world opinion and placed the very concept of the World Organization in jeopardy. . . .

"What is happening in Egypt today constitutes a threat to the entire Moslem world. The Government of Pakistan unreservedly condemns this aggressive action. They will continue to endeavour, by every means within their power, to bring about an early peaceful settlement of this conflict. With that end in view, I personally have been in almost constant touch with the principal Powers concerned. At our instance, a meeting of the Prime Ministers and Foreign Ministers of Turkey, Persia, Iraq and Pakistan will shortly take place in Teheran. . . .

"During the last two or three days public opinion in Pakistan has been gravely perturbed. Demonstrations have taken place in Karachi, Dacca, Lahore, Peshawar, and elsewhere in the country. While on the whole these demonstrations have been peaceful, there have also been ugly incidents. I earnestly ask our people to remain calm and refrain from violence. . . On occasions such as this certain elements are inclined to take advantage of the situation and resort to lawlessness. We must not allow such elements to exploit this situation for their own nefarious ends. . . ."

As mentioned by Mr. Suhrawardy, anti-British and anti-French demonstrations broke out in a number of cities in protest against the Anglo-French action in Egypt. On Nov. 3 crowds of demonstrators set fire to the premises of the British Information Service in Karachi, which was completely destroyed with all its books and equipment, and smashed the windows of the French Consulate in Dacca. On the following day some 10,000 students demonstrating against Britain and France tried to storm the office of the U.K. High Commissioner in Karachi, the police using lathis and tear-gas to disperse the rioters. A number of students were injured, as well as several policemen.

Ceylon. - Statement by Mr. Bandaranaike.

The Prime Minister of Ceylon, Mr. Bandaranaike, issued the following statement at a press conference on Nov. 1:

"The invasion of Egyptian territory by Israel, followed by British and French military action against Egypt, has created a very grave international situation. World opinion has already expressed itself in no uncertain terms at the U.N. I am addressing to the President of the U.S A., to the Prime Ministers of Britain and France, and to

the United Nations, an urgent appeal that British and French troops should, even at this late stage, be withdrawn from Egyptian territory before the situation worsens "

Asked whether he felt that Israel's invasion of Egypt was "inspired," Mr. Bandaranaike said: "It seems a strange coincidence that Israel should have taken this action and that Britain and France should have got the opportunity from it to do what they had been wanting to do all the time—take control of the Canal." He added that nothing would be done by his Government to infringe Ceylon's neutrality.

American Reactions. - President Eisenhower's Broadcast.

The Anglo-French ultimatum to Egypt, the subsequent military operations, and the Anglo-French veto of the U.S. resolution in the Security Council caused widespread dismay, bewilderment, and anger in official circles in Washington and in the U.S. Press. Many allegations were made in the U.S. Press and radio accusing Britain, France, and Israel of collusion, and the view was widely expressed that these developments had placed a severe strain on the NATO alliance and created bitterness and dissension among the Western allies. Particular exception was taken to the fact that the Anglo-French ultimatum to Egypt and Israel had been sent off without any prior notification to the U.S. Government or to President Eisenhower, as confirmed by the President's press secretary on Oct. 30 and by the President himself in a broadcast on the following day (see below).

The following statement was issued from the White House on Oct. 30, after a meeting between President Eisenhower, Mr. Dulles, and Admiral Radford, chairman of the U.S. Joint Chiefs of Staff:

"At this meeting the President recalled that the U S A., under this and prior Administrations, has pledged itself to assist the victim of any aggression in the Middle East. We shall honour our pledge The U.S.A. is in consultation with the British and French Governments, parties with us to the Tripartite Declaration of 1950, and it plans, as contemplated by that declaration, that the situation shall be taken to the U.N. Security Council."

During the evening President Eisenhower sent urgent personal messages to Sir Anthony Eden and M. Mollet which, it was understood, urged them to exercise restraint in the Middle East crisis and not to resort to force. Meanwhile Mr. Dulles had seen the French Ambassador (M. Alphand) and the British Chargé d'Affaires (Mr. Coulston) at the State Department; although no official statement was issued, it was reported by press correspondents that the Secretary of State had expressed "extreme displeasure" at the Anglo-French action.

The following nation-wide broadcast on the Middle East crisis was made by President Eisenhower on Oct. 31, in the course of which the President described the Anglo-French action as an "error":

"The Middle East was, as we all know, an area long subject to colonial rule. This rule ended after World War II, when all countries there won full independence. Out of the Palestinian mandated territory was born the new State of Israel. These historic changes could not, however, instantly banish animosities born of the ages. Israel and her Arab neighbours soon found themselves at war with one another. And the Arab nations showed continuing anger toward their former colonial rulers, notably France and Britain

"The United States, through the years since the close of World War II, has laboured tirelessly to bring peace and stability to this area. We have considered it a basic matter of U.S. policy to support the State of Israel and at the same time to strengthen our bonds both with Israel and with the Arab countries. But unfortunately, through all these years, passion in the area threatened to prevail over peaceful purpose, and in one form or another there has been almost continuous fighting.

"This situation was recently aggravated by Egyptian policy, including rearmament with Communist weapons. We felt this to be a misguided policy on the part of the Egyptian Government. Israel, at the same time, felt increasing anxiety for her safety. And Britain and France feared more and more that Egyptian policies threatened their lifeline of the Suez Canal.

"These matters came to a crisis on July 26 of this year when the Egyptian Government seized the Suez Canal Company. For 90 years, ever since the inauguration of the Canal, that company had operated the Canal, largely under British and French technical supervision. There were some among our Allies who urged an immediate reaction to this event by use of force. We insistently urged otherwise, and our wish prevailed, through a long succession of conferences and negotiations, for weeks—even months—with participation by the United Nations. There in the U.N., only a short while ago, it seemed that an acceptable accord was within our reach on the basis of agreed principles But the relations of Egypt with both Israel and France kept worsening to a point at which first Israel, and then France and Britain, determined that, in their judgment, there could be no protection of their vital interests without resort to force.

"Upon this decision events followed swiftly. On Oct. 28 the Israeli Government ordered mobilization. On Oct. 29 their armed forces penetrated deeply into Egypt and to the vicinity of the Suez Canal—nearly 100 miles away. On Oct 30 the British and French Governments delivered a 12-hour ultimatum to Israel and Egypt, now followed up by armed attack against Egypt. The United States was not consulted in any way about any phase of these actions. Nor were we informed of them in advance.

"As it is the manifest right of any of those nations to take such decisions and actions, it is likewise our right, if our judgment so dictates, to dissent. We believe these actions to have been taken in error, for we do not accept the use of force as a wise or proper instrument for the settlement of international disputes. To say this, in this particular instance, is in no way to minimize our friendship with these nations, nor our determination to maintain those friendships

"We are fully aware of the grave anxieties of Israel, Britain, and France. We know that they have been subjected to grave and repeated provocations. The present fact nonetheless seems clear. The action taken can scarcely be reconciled with the principles and purposes of the U.N., to which we have all subscribed. And, beyond this, we are forced to doubt that resort to force and war will for long serve the permanent interests of the attacking nations.

"Now we must look to the future In the circumstances I have described, there will be no U.S. involvement in these hostilities. I have no plan to call Congress in special session . . At the same time it is—and will remain—the dedicated purpose of our Government to do all in its power to localize the fighting and to end the conflict.

"We took our first measure in this action yesterday. We went to the U.N. with a request that the forces of Israel return to their own lines and that hostilities in the area be brought to a close. This proposal was not adopted because it was vetoed by Britain and France It is our hope and intent that this matter will be brought before the U N. General Assembly There, with no veto operating, the opinion of the world can be brought to bear in our quest for a just end to this tormenting problem In the past the U.N. has proved able to find a way to end bloodshed We believe it can and will do so again.

"As I review the march of world events in recent years, I am ever more deeply convinced that the U N. represents the soundest hope for peace in the world For this very reason I believe that the processes of the U N need further to be developed and strengthened. I speak particularly of increasing its ability to secure justice under international law. In all the recent troubles in the Middle East there have been injustices suffered by all nations involved. But I do not believe that another instrument of injustice—war—is a remedy for these wrongs.

"There can be no peace without law. And there can be no law if we work to invoke one code of international conduct for those who oppose, and another for our friends. The society of nations has been slow in developing means to apply this truth. But the passionate longing for peace on the part of all peoples of the earth compels us to speed our search for new and more effective instruments of justice. The peace we seek and need means much more than mere absence of war. It means the acceptance of law and the fostering of justice in all the world. To our principles guiding us in this quest we must stand fast. In so doing, we can honour the hopes of all men for a world in which peace will truly and justly reign."

The Washington Correspondent of *The Times*, in despatches on Oct. 31 and Nov. 1, said that President Eisenhower's "restrained declaration" was "hardly reflected in the bitter denunciation and anger vented by most American commentators on Britain and France for intervening in the hostilities." The Correspondent referred *inter alia* to "open allegations of collusion with Israel"; to "hot resentment felt at the lack of advance information of the Anglo-French ultimatum"; to the "severe strain" which the crisis had placed on Anglo-American relations; and to the charges of "trickery," "deceit," and "imperialism" which were being "hurled by radio and television" against Britain and France.

Mr. James B. Reston, head of the Washington Bureau of the *New York Times*, said in a despatch to that paper on Oct. 31:

"There was no attempt in official quarters to conceal the disappointment of the U.S. Government in the sudden—and what is felt here [in Washington] to be the provocative—action of the British and French Governments. . . . So sharp were the feelings here on this question that officials of the U.S. Government lent some credence to reports that the Israeli Government not only had informed the French and British in advance of the plan to invade Egypt, but that the Israeli officials were encouraged to believe that they would have the support of France and perhaps even of Britain if they did move . . . Consequently the capital was full to-night of charges of 'collusion' between Israel and France, and to a lesser extent between Israel and Britain."

It was announced in Washington on Nov. 2 that the U.S. Government had halted all shipments to arms to Egypt and Israel, in conformity with the U.N. resolution calling upon all members to "refrain from introducing military goods into the area of hostilities."

Reactions in the Middle East.

Reactions in the countries of the Middle East are summarized below:

Jordan. - Mobilization and State of Emergency. - Relations broken with France. - Boycott of French Goods.

The Jordanian Government proclaimed a state of emergency on Oct. 31, imposed a censorship, and announced a general mobilization of the armed forces. On the following day the Government presented Notes to the British and French Ambassadors in Amman protesting against the Anglo-French "aggressive attack" against Egypt, and announced that British aircraft would not be allowed to use the two R.A.F. bases in Jordan for operations against Egypt.

Diplomatic relations with France were broken off on Nov. 1, and an economic boycott imposed two days later on all goods from France or French colonial territories. French cultural and educational institutions in Amman were placed under Government control on Nov. 10. [The French Consulate in Amman had been sacked and burned out on Oct. 28 by mobs protesting against the arrest of five Algerian nationalist leaders.]

A royal decree issued on Nov. 11 provided for the formation of a "resistance force" for young men aged 18 and over who volunteered "to fight aggression or invasion." The force was placed under the command of the Jordanian Army.

The British War Office announced on Nov. 8 that "in view of the possibility of disturbances resulting from the present situation in the Middle East," it had been agreed with the Jordanian authorities that British Army personnel in Jordan would "temporarily discontinue their technical and advisory duties." [According to a written answer in the House of Commons on Oct. 24, there were 12 British officers serving with the Jordanian Army, formerly the Arab Legion.]

The Iraq Petroleum Company's pipeline was blown up at Irbid (northern Jordan) on Nov. 12 by unknown persons, an official inquiry being instituted. The pipeline runs from Kirkuk (Iraq) to Haifa (Israel), but had been unused since 1948, when Iraq stopped the flow of oil to Israel.

Syria. - Mobilization and State of Emergency. - Relations broken with Britain and France - Demolition of Oil Pipelines.

Following a general mobilization and the proclamation of a state of emergency on Nov. 1, the Syrian Embassy in Washington informed the U.S. Government on the following day that Syria was placing her armed forces under the command of the Egyptian C.-in-C. "in implementation of the Egyptian-Syrian defence pact." Diplomatic relations were broken off with Britain and France on Nov. 2.

The Iraq Petroleum Company announced on Nov. 3 that the pumping of crude oil through Syria had been suspended as a result of the blowing-up of the company's three pumping stations in that country. A spokesman of the I.P.C. said that extensive damage had been done to all three stations—one just inside the Syrian-Iraqi border, the second some way east of Palmyra, and the third between Palmyra and Homs. [The pipelines affected run from the Iraqi oilfields to the Mediterranean ports of Tripoli and Banias, and carry 25,000,000 tons of oil a year.]

The British Foreign Office stated on Nov. 5 that, according to information available, the pipelines had been blown up by units of the Syrian Army. H.M. Government held the Syrian Government "directly responsible for these acts of sabotage" and had called upon it to take immediate action to repair the damage and ensure the continued operation of the pipeline.

The Syrian Minister of Public Works denied on Nov. 6 that the Syrian Army had been responsible for the demolitions, and said that the necessary measures would be taken to repair the damaged stations.

Iraq. - Martial Law. - Iraqi Forces moved into Jordan. - Relations broken with France. - Demand for "Liquidation" of Israel.

The Iraqi Foreign Minister informed the British, French, and U.S. Ambassadors on Oct. 30 of his Government's "deep concern" at Israel's attack on Egypt. Martial law was imposed on the following day, the decree speaking of Iraq's intention to "extend military assistance to Jordan." A Baghdad announcement of Nov. 4 stated that Iraqi troops had entered Jordan in response to a request by King Hussein, but no further information was given owing to the censorship both in Iraq and Jordan.

On Nov. 9 the Iraqi Government broke off diplomatic relations with France, and announced that it would not take part in any further meetings of the Baghdad Pact Council if Britain attended. On Nov. 13 a Note was handed to all diplomatic representatives in Baghdad declaring that the only solution of the Middle East problem, in the opinion of the Iraqi Government, was the liquidation of Israel as a State, the return of its inhabitants to "their former homes," and the re-entry of the Palestine Arab refugees. The statement said that Iraq intended to call on the United Nations to take such action.

Saudi Arabia. - Relations broken with Britain and France. - Ban on Flow of Oil to Bahrein Refinery.

Saudi Arabia broke off diplomatic relations with Britain and France on Nov. 6 because of their "armed aggression" against Egypt. At the same time the Saudi Arabian Government cut off the flow of oil through the pipeline from Saudi Arabia to the Bahrein refinery, and banned British and French tankers from using Saudi ports.

Officials of the Arabian-American Oil Company (Aramco) said in Washington on Nov. 3 that reports had been received from the Middle East indicating that its oil pipeline from Saudi Arabia to the Mediterranean had been blown up at several points. The pipeline runs from the Saudi Arabian oilfields near the Persian Gulf through Saudi Arabia, Jordan, and Syria to the Mediterranean coast in Lebanon. It is over 1,000 miles long and normally carries 315,000 barrels of oil a day.

Persian Gulf Sheikhdoms.

Gangs of rioters in Bahrein burned down several buildings on Nov. 5, attacked a Government office, and attempted to set fire to a Roman Catholic Church. A curfew was imposed, police action taken against the rioters, and order restored after the arrest of four leaders of a "Committee of National Union," the body fomenting the disturbances. The Ruler of Bahrein announced that the organization had been dissolved, emphasizing that it had persistently obstructed Government efforts at reform and had threatened people accepting membership of Government committees.

Demonstrations against Britain and France in Kuwait led to a ban on meetings, demonstrations, or strikes.

U.S. Nationals evacuated from Middle East. - British Nationals evacuated from Jordan.

American nationals in the Middle East countries (about 5,000 in all) were instructed on Oct. 29 to leave Egypt, Syria, Jordan, and Israel unless there were compelling reaons why they should remain. During succeeding days U.S. civil and military planes organized an airlift of U.S. citizens from Cairo, Alexandria, Tel-Aviv, Amman, and other cities. British subjects in Jordan were also advised by H.M. Government to leave the country "until conditions improve."

Soviet Reactions. - Moscow Demonstrations against Britain, France and Israel. - Threat of Soviet "Volunteers" to aid Egypt.

The Anglo-French intervention in Egypt was bitterly attacked by the Soviet press and radio and in Soviet official circles, being described by Mr. Shepilov (at a Belgian Embassy reception on Nov. 1) as an "act of gangsterism." The Soviet Government announced on the same day that it would call for a conference of the "Bandung Powers" to demand the withdrawal of British, French and Israeli forces from Egypt.

On Nov 2 the Soviet Government sent Notes to Britain and France accusing them of establishing a "naval blockade" in Eastern Mediterranean and Egyptian waters, of closing the Red Sea and parts of the Mediterranean to shipping, and of contravening the 1888 Convention providing for free navigation on the Suez Canal. The Notes added that Britain and France bore the full responsibility for "acts of aggression affecting not only Egypt but also other States."

Several thousand persons—most of whom appeared to be students and factory workers—demonstrated on Nov. 5-6 outside the British, French and Israeli Embassies in Moscow, shouting slogans such as "Hands off our Egyptian brothers" and "Get out of Egypt." Petitions demanding the immediate withdrawal of Anglo-French and Israeli forces from Egyptian territory were handed in at the British and French Embassies. One group of demonstrators pushed their way into the British Embassy in an attempt to see the Ambassador, Sir William Hayter, who subsequently made a strong protest to the Soviet Government at this violation of diplomatic immunity. The demonstrations—the first of their kind in Moscow—were apparently organized with official approval.

The official Tass Agency issued a statement on Nov. 10 saying that many Soviet citizens, including "great numbers of pilots, tank personnel, artillerymen, and officers who took part in the Great Patriotic War" [i.e. the Second World War] had "asked to be allowed to go to Egypt as volunteers so as to fight together with the Egyptian people to throw out the aggressors from Egypt." After declaring that "the Soviet people will not stand passively by at the spectacle of international banditry," Tass quoted "leading Soviet circles" as saying that "if Britain, France, and Israel, contrary to U.N. decisions, do not withdraw their troops from Egyptian territory

. . . and delay the implementation of the [U.N.] decisions . . . the U.S.S.R. will raise no obstacles to the departure of Soviet volunteers who wish to take part in the struggle of the Egyptian people for their independence."

The Egyptian Ambassador in Moscow stated on Nov. 12 (at a Swedish Embassy reception) that over 50,000 Soviet reservists had volunteered for service in Egypt; he also told press correspondents that 250,000 volunteers had been offered by Communist China and 50,000 by Indonesia. On Nov. 15, however, the Syrian Minister in Bonn (Dr. Istuani) issued a press statement saying that there were no Soviet volunteers in the Middle East; that the Egyptian Government had decided that foreign volunteers were no longer required because the cease-fire was in force; and that the question of volunteers had thus become "irrelevant." Dr. Istuani said that he spoke on behalf of all Arab Governments having diplomatic missions in Bonn (Egypt, Syria, Jordan, Iraq, and Yemen).

Chinese Communist Support for Egypt.

The Chinese Communist Government issued a statement on Nov. 8 declaring that it could "not stand idly by while Egyptian sovereignty and territory are subjected to encroachment," and promising Egypt "all effective measures within our ability, including material aid." In addition to attacking Britain and France, the statement also accused the United States of "taking advantage of the Anglo-French aggression to establish its own control over Egypt," and declared that the U.S.A., Britain and France wanted an international force in the Canal Zone "to realize their vile scheme of depriving Egypt of her sacred sovereignty over the Suez Canal."

Despatches from Peking said that registration offices were being opened for Chinese "volunteers" who wished to fight for Egypt, in this connexion the Egyptian Ambassador in Peking, like the Ambassador in Moscow, said that 250,000 Chinese "volunteers" had offered their services Mr. Chou En-lai (the Chinese Premier) sent a message to President Nasser on Nov. 12 congratulating him on Egypt's resistance to Anglo-French "gunboat policy," and offering a gift of 20,000,000 Swiss francs (about £1,600,000) to Egypt.

Indonesian Demonstrations against Britain and France. - Attacks on British and French Embassies.

Tens of thousands of persons, including large numbers of students, took part in a mass meeting in Jakarta on Nov. 7 to protest against the Anglo-French intervention in Egypt. Placards were carried bearing the words "Death to Eden and Mollet," effigies of Sir Anthony Eden were burned, and resolutions were conveyed to the Indonesian Prime Minister (Dr. Sastroamidjojo) and the Foreign Minister (Mr. Abdulgani) denouncing the actions of Britain, France, and Israel.

After the meeting, mobs of young demonstrators attacked the British and French Embassies, smashed the windows, and tore down the British and French flags. Other demonstrators sacked the offices of the British Information Service in Jakarta, smashed furniture, and tried to set fire to the premises. Dr. Sastroamidjojo subsequently apologized to the British and French Ambassadors for these incidents.

Egypt breaks off Relations with Australia.

Egypt announced on Nov. 6 that she had broken off diplomatic relations with Australia. It was announced in Ottawa on the following day that Canada had agreed to protect Australian interests in Egypt.

Switzerland, which had already agreed to act as protecting Power for British and French interests in Egypt, announced on Nov. 4 that she would also protect the interests of both countries in Syria and French interests in Jordan —(Times - Daily Telegraph - Manchester Guardian - News Chronicle - Daily Herald - Observer - Sunday Times - New York Times - New York Herald Tribune - Le Monde, Paris - United Nations Information Centre, London - Australian News and Information Bureau - New Zealand Directorate of Information - Indian and Pakistan High Commissioners' Offices, London)

(Prev. rep. Middle East, 15173 A.)

A. UNITED STATES. — Mr. Dulles' Illness.

Mr. Dulles (68), the U.S. Secretary of State, was taken suddenly ill during the night of Nov. 2-3 and underwent an emergency intestinal operation at the Walter Reed Army Hospital in Washington on Nov. 3, when it was found that the colon (the large intestine) was perforated. On the following day it was announced that medical examination of that part of the colon which had been removed had revealed a cancerous condition (*adenocarcinoma*), although it was emphasized that there was "no evidence whatsoever" that the malignancy had spread to any other organ.

Mr. Herbert Hoover jr., the Under-Secretary of State, was placed in charge of the State Department as acting Secretary during the illness of Mr. Dulles.

(New York Times - New York Herald Tribune)

B. NOBEL PRIZES. — Awards for 1956.

The Nobel Prize awards for 1956 were announced during October and November as follows:

Literature. The Literature Prize was awarded to Juan Ramón Jimenez (74), the eminent Spanish poet, for his "lyrical poetry which in the Spanish language sets an example of high spiritual quality and artistic purity" The last occasion on which the Nobel Prize for Literature had been awarded to a Spaniard was in 1922, when the recipient was the dramatist Jacinto Benevente

Señor Jiménez, regarded as the leading contemporay Spanish poet, left Madrid during the Civil War and has since lived in voluntary exile in Puerto Rico He is the author of some 40 books, nearly all in verse, and is famous in Spanish letters for his odes to his donkey, "Platero"

Medicine. The Prize for Medicine and Physiology was awarded jointly to three heart specialists—two American and one German—for their discoveries of new techniques in the diagnosis and treatment of heart disease The recipients were Dr. Andre F Cournand (61), Professor of Medicine at Columbia University, New York; Dr. Dickinson W. Richards, also of Columbia, and Dr. Werner Forssmann (52), of Bad Kreuznach, Western Germany.

Dr. Forssmann, at great risk to his own life, pioneered a technique of getting information about the heart by an operation which he performed on himself in 1929 He opened an artery in his arm, inserted a catheter (thin tube) which he pushed up and beyond his shoulder until it entered the right chamber of the heart, and then had the results photographed by X-rays In subsequent years he performed many other dangerous experiments on himself, obtaining data as a result of which Drs Cournand and Richards developed new techniques which have been used with great success in the treatment of congenital heart disease

The official citation said that Drs Forssmann, Cournand and Richards had been honoured for "discoveries concerning heart catheterization and pathological changes in the circulatory system," and that their investigations have meant that "diagnosis can now be made earlier and with greater certainty than before"

Chemistry. The Prize for Chemistry was awarded jointly to a British and a Russian scientist—Professor Sir Cyril Hinshelwood, president of the Royal Society and Dr Lee's Professor of Chemistry at Oxford, and Professor Nikolai Semenov, Director of the Institute of Chemical Physics of the Soviet Academy of Sciences Dr. Semenov was the first Soviet citizen to be awarded a Nobel Prize.

Professors Hinshelwood and Semenov, working independently but on parallel lines, have made important discoveries in the field of chemical kinetics (the study of the rates at which chain reactions proceed), and the results of their work have had important practical applications in the plastics industry and in the production of more efficient automobile engines. In spite of the "Iron Curtain," the two scientists have been in close personal touch for the past 25 years.

Physics. The Prize for Physics was awarded jointly to three American scientists engaged on research work in telephonics at the Bell Laboratories—Dr William Shockley, Dr. Walter H Brattain, and Dr. John Bardeen. They were honoured for their invention and development of the transistor—a tiny but highly efficient substitute for the vacuum tube in electronics

The transistor (or transfer-resister) has proved itself highly efficient as a detector and amplifier in telephonics, and as a regulator and timer of electrical-current flow. As compared with the vacuum tube, it is about one-thousandth as large, one-hundreth as heavy, and requires only one-tenth the amount of electrical power for its operation.

Peace Prize. For the second successive year, no award was made of the Nobel Peace Prize.

The Literature Prize is awarded by the Royal Swedish Academy of Literature; the Medicine and Physiology Prize by the Royal Carolinian Medico-Surgical Institute of Stockholm; the Chemistry and Physics Prizes by the Royal Swedish Academy of Science; and the Peace Prize by the Norwegian Parliament. The value of the Nobel Prizes for 1956 is £13,000 to £14,000 each.—(Svenska Dagbladet, Stockholm - Aftenposten, Oslo - Times - Manchester Guardian - New York Times)

(Prev. rep. Nobel Prizes, 14509 D.)

C. FRANCE. — Memorial to Unknown Jewish Martyr.

A memorial to the Unknown Jewish Martyr, commemorating the 6,000,000 Jews who were exterminated by the Nazis during the Second World War, was unveiled in Paris on Oct. 30 in the presence of M. Le Troquer, President of the French National Assembly (deputizing for President Coty), other French dignitaries, and delegates from 24 countries. The project for such a memorial had been launched in 1952 with the support of prominent personalities in many countries, including Queen Elisabeth of the Belgians, Sir Winston Churchill, M. Vincent Aurol (then President of France), and Mrs. Eleanor Roosevelt, widow of the late President Franklin D. Roosevelt.

(Le Monde, Paris)

D. SOVIET UNION. — Further Nuclear Test.

The Tass Agency announced on Nov. 17 that a successful nuclear test had been carried out on that date "at a great height over Soviet territory." No further details were given.

(Manchester Guardian) **(Prev. rep. 15124 A.)**

A. COLOMBO POWERS. — Prime Ministers' Conference on Middle East and Hungarian Situations. - Denunciation of Anglo-French Action in Egypt and Soviet Action in Hungary.

At the suggestion of the Indonesian Prime Minister, the Prime Ministers of four of the five Colombo Powers met in Delhi on Nov. 12-14, the meeting being attended by Mr. Nehru (India), U Ba Swe (Burma), Mr. Bandaranaike (Ceylon), and Dr. Sastroamidjojo (Indonesia). The Prime Minister of Pakistan (Mr. Suhrawardy) did not participate, explaining beforehand that he was flying to Teheran to attend a conference of "Baghdad Pact" Premiers on the Middle East situation.

The following joint statement was issued on Nov. 14 at the end of the conference:

"(1) . . . This meeting of Prime Ministers was convened more especially to consider the grave situation that had arisen on account of the Israeli attack on Egypt and the military operations by the U.K. and France against Egypt The Prime Ministers considered also the situation in Hungary and the grave developments in the international situation which threaten the peace of the world Each of them individually had already given expression to his concern at these developments, and had expressed his strong disapproval and distress at the aggression of and intervention by Great Powers against weaker countries. .

"(2) The Prime Ministers note with satisfaction the impressive expression of world opinion both within and outside the United Nations against the aggression on Egypt They welcome the resolution of the U.N. General Assembly adopted on Nov. 2, 1956, and reaffirmed and reinforced by its resolutions of Nov. 4 and 7, directing the cessation of hostilities and the withdrawal of the forces of Israel, the United Kingdom, and France from the territory of Egypt They note also with satisfaction that these resolutions have largely resulted in a cease-fire in the area of hostilities and in assurances being given on behalf of the Governments of the United Kingdom, France and Israel that their armed forces will be withdrawn from Egypt.

"(3) The Prime Ministers, however, regret that these armed forces have not yet been withdrawn and that various conditions have been laid down by the Governments of the aggressor countries which, according to them, should be fulfilled prior to withdrawal The Prime Ministers strongly disapprove of any such conditions being laid down, and consider such reservations as contrary to the directions of the U.N General Assembly. They are of opinion that the Assembly's resolutions should be implemented in their entirety forthwith, and all foreign forces withdrawn from Egyptian territory.

"(4) The Prime Ministers welcome the creation of an International United Nations Force. This force should be a temporary one and its functions should be strictly confined to the directions laid down in the General Assembly's resolution Any delay in the implementation of this resolution and in the withdrawal of foreign forces will lead to further complications and an aggravation of the present serious situation. There can be no approach to normality and no consideration of any other problems so long as foreign forces have not been completely withdrawn from Egypt

"(5) The Prime Ministers have watched with deep distress the tragic events in Hungary. The large-scale violence used on all sides has resulted in the killing of thousands of people and has brought misery and destruction to that country. They regret that the Soviet forces, which had been withdrawn in accordance with the policy laid down in the statement issued by the Government of the U.S.S.R. on Oct 30, were reintroduced into Budapest a few days later The Prime Ministers consider it the inalienable right of every country to shape its own destiny for itself, free from all external pressures They are of opinion that the Soviet forces should be withdrawn from Hungary speedily and that the Hungarian people should be left free to decide their own future without external intervention from any quarter.

"(6) The Prime Ministers have watched with great interest and appreciation the new forces towards democratization in the countries of Eastern Europe. They welcome the peaceful changes brought about in Poland. Unfortunately the process of change in Hungary was accompanied by violence which not only led to misery and destruction but also impeded that process

"(7) The Prime Ministers commend the U.N. resolution appealing for immediate aid to Hungary for the relief of distress. The need for such relief in Egypt is equally urgent. They are recommending to their Governments to give such assistance as is possible in both these areas . . .

"(8) While the Prime Ministers welcome the slight improvement in the international situation, they are conscious of grave dangers and the ever-present possibility of conflict breaking out again. There is evidence of armed forces being marshalled and the spirit of war being encouraged The immediate issue is the avoidance of a World War, which would be a crime against humanity. They earnestly urge that no step should be taken by any country which could add to the tension and to the possibility of conflict

"(9) Recent events have demonstrated . . that powerful nations can still commit aggression on weaker countries and attempt to impose their will upon them . . . There are other examples also in Colonial countries where the peoples' will to freedom is sought to be crushed by armed force. In Algeria the struggle for freedom continues in spite of repression. Recently a number of Algerian leaders were arrested by the French authorities as they were travelling by air as guests of the Sultan of Morocco to consider possibilities of a settlement This has shown to what extraordinary lengths a great Power can go in its attempt to suppress the urge to freedom.

"(10) In the course of the past year many developments had taken place which indicated a relaxation of the fears and tensions that afflict the world. The Prime Ministers had hoped that the co-operative spirit of Bandung and the Five Principles of peaceful co-existence would help in removing these fears and tensions. It has therefore come as a great shock to them that aggression can be committed and ruthless suppression take place in spite of the widespread desire of the peoples for peace and freedom. Neither peace nor freedom can come if strong nations, trusting to their armed power, seek to compel weaker countries to obey their will. This reversal of a historic process has particular significance for the countries of Asia and Africa, who have no great military strength and who have to rely on the justice of their cause and the determination of their peoples.

"(11) Many of the countries of Asia and Africa have recently become independent and emerged from a colonial or semi-colonial status, while others are struggling to attain freedom. To all these countries a revival of the spirit and methods of Colonialism is a matter of great concern. Intervention in the affairs of another State, though meant to protect special interests, is sometimes justified on the plea of international co-operation. The Prime Ministers are opposed to any such intervention and are determined to resist any resurgence of Colonialism whatever form it may take. They have every confidence that the United Nations will support the cause of freedom and oppose every attempt to revive or continue Colonialism.

"(12) The Prime Ministers are firmly of opinion that world peace can only be assured on the basis of freedom and disarmament. Military pacts and alliances, in particular those intended to serve the interests of great Powers, encourage fear and a race in armaments. Recent history has shown that such pacts, instead of bringing security to any region, have brought apprehension, trouble and conflict. The Prime Ministers earnestly trust that this policy of military pacts and of stationing troops of one country in the territory of another will be abandoned The real and urgent need is that the under-developed countries of the world should be helped to progress and to raise the standard of living of their peoples

"(13) The Prime Ministers recall the final communiqué of the Asian-African Conference held in Bandung in April 1955, and the ten principles embodied therein to enable nations to live together in peace as good neighbours and to develop friendly co-operation with each other. They are convinced that the only way to peace is through the practice of the Bandung principles. They reaffirm their adherence to these principles, which embody the Five Principles of *Panch Sila*.

"(14) The Prime Ministers consider that every effort should be made to support and strengthen the United Nations in its task of preserving peace. They welcome the continued close collaboration between the nations of the Asian-African group at the U.N. Recent events have cast the shadow of war over the world The Prime Ministers hope that the situation will improve, but in any event grave dislocations have already taken place and are likely to continue for some time in the economic sphere and in trade, shipping and supplies. It is desirable that there should be joint and co-operative action in this matter among the Colombo countries, and that any machinery necessary for joint consultation should be set up.

"(16) While much has happened recently which the Prime Ministers deplore, the dangers and difficulties confronting the world are too great to be dealt with merely by disapproval or condemnation. It is in an earnest attempt to help the cause of peace and freedom at this critical juncture in history that they have met together. It is in this spirit that they wish to appeal to the leaders and peoples of other countries—who, they feel sure, must be equally anxious to preserve peace and freedom—to co-operate in removing the spectre of war and the impediments that have come in the way of peace and friendly relations between nations."

The Prime Minister of Indonesia, Dr. Sastroamidjojo arrived in Karachi on Nov. 15 for discussions with Mr. Suhrawardy, at the latter's invitation.—(Indian and Ceylonese High Commissioners' Offices, London - Indonesian Embassy, London) **(Prev. rep. Middle East, 15201 A; 15173 A; Hungarian Situation, 15189 A.)**

B. ITALY. — Supply of U.S. Surplus Agricultural Products. - Italo-American Agreement.

An agreement for the supply of U.S. surplus agricultural products to Italy was signed in Rome on Oct 20 by Signor Martino, the Italian Foreign Minister, and Mrs. Clare Luce, the U.S. Ambassador. The agreement, covering supplies worth $60,800,000, provided for U.S. shipments of cotton ($29,400,000), vegetable oils ($20,000,000), wheat ($7,000,000), and tobacco ($2,000,000), with a further $2,000,000 allocated to freight costs.

It was stipulated that payment would be made in Italian lire, but that the equivalent of $45,600,000 would be made available by the U.S.A. to Italy out of the counterpart fund as a 40-year loan to help finance Italy's economic development programme. Moreover, lire to the value of another $5,000,000 would be used as an additional loan to finance Italian exports to countries in the Middle East and Far East receiving U.S. aid.

A. UNITED KINGDOM. — Sir Anthony Eden's and Mr. Gaitskell's Broadcasts on Middle East Crisis. - The Prime Minister's Guildhall Speech.

Broadcasts on the Middle East crisis were made by the Prime Minister on Nov. 3 and by the Leader of the Opposition on Nov. 4, the texts being given below :

Broadcast by Sir Anthony Eden.

" For 10 years there has been fighting, trouble and turmoil in the Middle East. Ever since the armistice of 1949 between Israel and Egypt, Egypt has been insisting that she is still at war with Israel. Again and again the United Nations has tried to bring a settlement and peace, but without result. All the time this country has worked tirelessly for agreement, and we have tried to prove our desire for friendship with Egypt. We withdrew from the Canal Zone We made an agreement about the Sudan. We have certainly gone to the limit in our efforts for friendship, and all these friendly approaches have failed."

Sir Anthony went on to quote from two statements by the Egyptian Government in which it had clearly proclaimed its intention to exterminate Israel and to drive Britain out of the Middle East The first statement declared " There will be no stability until this small but vile State is stifled." The second statement said . " We must not lose sight of our goal to fight the British serpent and expel it utterly from our lands "

The Prime Minister continued " Lands, of course, means the whole of the Middle East. It was the Egyptian threat, openly and publicly proclaimed. Deeds speak louder than words. We have seen the purchase of arms from behind the Iron Curtain. In early August, when Nasser seized the Canal, Mr Gaitskell called the threat to Israel ' clear notice of aggression to come.' He went on to say . ' This is all very familiar. It is exactly the same as we encountered from Mussolini and Hitler before the war ' Strong words, but justified

" Then a few days ago came the entry of Israeli troops into Egypt In the judgment of the Government this was a situation likely to lead to a widespread flare-up in the Middle East, and likely to endanger widespread British and international interests It was not possible to go on arguing who was the aggressor. But that was not the real issue for us If you see a fire, the first question is not how it started but how to put it out. In the depths of our conviction we decided that here was the beginning of a forest fire of immense danger to peace. We decided that we must act, and act quickly. What we did was to take police action at once—action to stop the fighting and to separate the armies We acted swiftly and reported to the Security Council I believe that before long it will become apparent to everybody that we acted rightly and wisely

" Our friends inside the Commonwealth and outside could not in the very nature of things be consulted in time You just cannot have immediate action and extensive consultation as well But our friends are coming—as Australia and New Zealand have already done, and I believe that Canada and the United States will soon come—to see that we acted with courage and speed to deal with a situation which just could not wait We cannot allow the conflict in the Middle East to spread Our survival as a nation depends on oil. Nearly three-quarters of our oil comes from that part of the world. Chaos in the Middle East would permanently lower the standard of life in this country, in Europe, and in many poorer countries in the world.

" All my life I have been a man of peace—working for peace, striving for peace, negotiating for peace. I have been a League of Nations man and a United Nations man I am still the same man, with the same convictions and the same devotion to peace. I could not be other, even if I wished But I am utterly convinced that the action we have taken is right. Over the years I have seen, as many of you have, the mood of ' peace at any price ' Many of you will remember that mood in our own country, and how we paid for it.

" There are times for courage, times for action, and this is one of them in the interests of peace I do hope we have learned our lesson. Our passionate love of peace, our intense loathing of war, has often held us back from using force, even when we knew—in our heads if not in our hearts—that its use was in the interests of peace. I believe with all my heart and my head that this is a time for action, effective and swift. Yes, even by the use of some force to prevent the forest fire from spreading, to prevent the horror and devastation of a larger war. The Government knew this action would shock and hurt some people . . . I think it is better to destroy machines on the ground than let them destroy people from the air It was our duty to act and act swiftly, if by such action we were to secure peace."

" The Government has learned that the Israel forces have captured the Egyptian Army in Sinai. It has also learned that the U N. Truce Organization is trying to arrange contact between the two sides to establish terms of surrender. We hope this organization will be able to arrange for the return of all captured Egyptians to Egypt. It seems that Israel has succeeded in destroying the bases in Sinai and Gaza at which Egyptian Commandos were trained for attacks on Israel. Once British and French forces have occupied key positions on the Canal, the British Government will ensure that the Israeli forces will withdraw from Egyptian territory. I believe this is their intention. But they will not do so unless we are there to keep the peace and to give the necessary guarantees.

" First and foremost, we want to stop the fighting, separate the armies, and make sure there is no more fighting. We have stepped in because the United Nations could not do so in time. If the U.N. will take over this police action, we shall welcome it. Indeed, we have proposed that course to them. Police action aims not only to end the fighting but to bring lasting peace to the area. Until the United Nations is ready to take over, we and France must be ready to go on with the job until the job is done. Let us hope the outcome will be not only peace in the Middle East, but a strengthened United Nations —one with power to act as well as to talk, a real force for peace in the world."

Mr. Gaitskell's Broadcast.

' It has been a tragic, terrible week Indeed, a tragic and terrible day with the news coming in about Hungary. It has been, I think, by far the worst week for the world and for our country since 1939.

" Last Monday evening came the news of the Israeli attack on Egypt. Israel had been threatened and provoked She was entitled to better guarantees of her security But there is no denying that the large-scale invasion of Egypt was an act of aggression The Prime Minister says we could not afford to wait. We had to act, he said, immediately on our own before the Security Council could decide or do anything. Yet what are the facts ? By Tuesday evening, even before the 12-hour ultimatum to Egypt had expired, the Council had met, reached a clear decision, and been blocked by the Prime Minister's own veto There was no lack of speed here The trouble was obstruction—obstruction by Britain

" What should have been done ? If only we had supported that resolution and followed it up by proposing that a United Nations police force should see that the resolution was carried out ! We could have offered to be part of the police force ourselves. This would not have been intervening on one side or the other. We should have been acting on behalf of the U.N., with their full authority and with world opinion behind us. But this is not what happened. Having rejected the U N resolution, we carried out our threats We went to war with Egypt. Make no mistake about this—it is war. We are doing all this alone except for France, opposed by the world and in defiance of the world. It is not a police action

" The Prime Minister says it was done to safeguard the Canal and free passage through it. What has happened to the Canal ? It is blocked because of what we have done. The real reason for going to war with Egypt was different I have seen the text of the first broadcast of the Allied Command to the Egyptians This is what it said, in Arabic of course : ' Oh, Egyptians, why has this befallen you ? First because Abdul Nasser went mad and seized the Suez Canal.' The broadcast was right. It was this which really induced the Prime Minister to decide on invasion.

" The U.N. Assembly, messages pouring in from everywhere, confirm the general opinion that Britain and France used the attack on Egypt by Israel as a barefaced excuse to seize the Canal. We have violated the U.N. Charter In doing so we have betrayed all that Britain has stood for in world affairs. To-day we stand as the aggressors. What are the consequences ? A deep division in the Commonwealth Only Australia and New Zealand support us

" I cannot but feel, hearing to-day's heartbreaking news from Hungary, how tragic it is that at the very moment when the whole world should be united in denouncing this flagrant, ruthless, savage aggression by Russia against a liberty-loving people, we by our criminal folly should have lost the moral leadership of which we were once so proud.

" Many of you will be saying, I am sure, ' What can we do about it ? '—many of you who feel just as strongly as I do how terribly wrong this whole policy has been, and how terribly dangerous in the long run to our own security. I do not think there is any doubt as to what the policy should be now. We should surely, without qualification, argument or conditions, accept the resolution of the U.N. Assembly calling for an immediate cease-fire Egypt has already said that she accepts this resolution. There is reason to believe that Israel will accept the cease-fire also. Why should not Britain and France do likewise ?

" We should do something else. We should also give full support to the new resolution, on which we abstained, for a United Nations Force to police the Arab-Israel borders until a proper peace settlement has been reached. But make no mistake : this means abandoning the idea which has been at the root of this policy, the idea of trying to solve the Suez Canal problem by force. It means going back to negotiating a settlement of this issue.

" I do not believe the present Prime Minister can carry out this policy. I bear him no ill-will. We have been personally quite friendly, but his policy this last week has been disastrous, and he is utterly discredited in the world. Only one thing now can save the reputation and the honour of our country Parliament must repudiate the Government's policy. The Prime Minister must resign.

" The Labour Party cannot alone achieve this We are a minority in the House of Commons. So the responsibility rests with those Conservatives who, like us, are shocked and troubled by what is happening, and who want a change I appeal to them especially. Theirs is a difficult decision, and I want to say to them that our purpose, too, in this matter rises above party I give them indeed this pledge. We undertake to support a new Prime Minister in halting the invasion of Egypt, in ordering the cease-fire, and complying with the decisions and recommendations of the United Nations. In that way only can the deep divisions in the country on this matter be closed I appeal to those who can bring this about to act now and save the reputation of our country and the future peace of the world."

The Prime Minister's Guildhall Speech.

Sir Anthony Eden spoke of both the Middle East and the Hungarian situations in his Guildhall speech of Nov. 9, at the traditional banquet given to the Prime Minister by the new Lord Mayor of London, Sir Cullum Welch.

"There is in the minds of free men, the world over, shock and horror at the tragic spectacle of what has happened in Hungary," the Prime Minister declared. "We are seeing the liberty and national existence of a heroic people stamped out by ruthless repression The world has stood powerlessly by, unable to help except with such medical supplies as it may be possible to distribute. We must face the fact that so long as such things can happen, the United Nations is very far from becoming the world order we would wish it to be

"There has now been a generous and helpful proposal from the Swiss Government [see 15216 B] for a meeting of a number of Heads of Governments. Clearly the response to this must depend on others besides myself. But for my part, as one of those invited, I say I am prepared to go anywhere and meet anybody to help in a situation of such danger in Europe and the Middle East"

The Prime Minister went on to recall his Guildhall speech of 1955 [see 14519 A], speaking as follows. "I know you will forgive me if I remind you of some of the words I then used I said, in speaking of the Middle East: 'Beneath the volcanic crust of the smouldering dangers lies a deeper peril still. The hostility between Israel and her Arab neighbours is unreconciled Time has proved no healer' I gave a warning of the new danger of the influx of arms from behind the Iron Curtain. These words were true then How much deeper meaning have they since acquired! I urged a search for common ground. I said that we had only one desire, to find a means which would enable the two peoples to dwell side by side My words on that occasion did not pass without some criticism. . And lately I have been even more vigorously belaboured. But long experience has taught me that to be criticized is not always to be wrong

"We all know what has happened since last year Tension in the Middle East has grown Arab has attacked Jew, Jew, Arab. Passion, hatred, murder—we have seen them all. We have seen violent evidence of the smouldering dangers which lie beneath the volcanic crust. And no-one can deny that upon the shoulders of Egypt and her ruler rests much of the responsibility.

"The Egyptian Government again and again has proclaimed its intention to crush Israel. By threats and propaganda it has poured out its hostility to Britain and to the West. Armed with weapons from behind the Iron Curtain, Egypt has clearly been preparing for the day when her deeds would match her words And then, two months ago, she seized the Suez Canal. This, briefly, was the background of the events which led to the outbreak of hostilities on a major scale between Egypt and Israel.

"It is not for us at this moment to name an aggressor. What on that day seemed virtually certain was that the whole of the Middle East would be set alight, and who can say where the fire would have stopped? These are matters which no-one can determine with absolute certainty. What is beyond dispute is that these events presented a mortal danger to British and international interests and to the peace of the world.

"In these circumstances the British and French Governments decided on a swift and decisive intervention. We alone of all the nations had forces in the area prepared for instant action in such an emergency. It rested upon our two Governments to take a decision. We did so together If there had been a general conflict, sooner or later this country would have been involved That was the prospect before us, and the Government's conclusion was reached with a solemn sense of the burden of our responsibility.

"We had two choices. We could have referred the matter to the Security Council and awaited the outcome, or we could have intervened as we did Had we contented ourselves with a reference to the Security Council, does anyone think that any more positive action would have been taken than has been taken over all these years in the Middle East before? Has not the Security Council on no less than 200 occasions discussed the Palestine problem? Is not the heart-rending struggle in Hungary yet another tragic and humiliating example of an incapacity to do more than express the horror and indignation which the world is feeling?

"And while discussions were proceeding, the war in the Middle East would have continued to flame, with consequences no man can foretell. H.M. Government were faced with harsh alternatives There was grave peril in any decision, but to do nothing would have been the worst of all. A decision was taken to act swiftly, to send a police force to end the fighting and pave the way for a new settlement of the problems of the area.

"I know that many had heavy hearts when they learned that Britain and France had taken independent action. But we did what the United Nations without a police force could not do in the time. After a lifetime spent in foreign affairs, I am sincerely and deeply convinced that if we had not acted, the whole Middle East would be in flames to-day.

"I recall that when the United Nations was set up, it was intended that the Security Council should have military forces at its disposal This was in the days of high hopes just after the war. That conception foundered because of the deep divide which has cleft the world in two. The Prime Minister of Australia, Mr. Menzies, a true friend, has truly said that the purpose of the U.N. is not to make great Powers impotent and small Powers truculent, but to reconcile the strength of great nations with the strength of an international organization.

"If the great Powers are unwilling or unable to preserve the peace, as it formerly fell to them to do, then the United Nations must be able to take their place. It must at least be endowed with the strength to protect the peace and uphold the law. If the result of our action in the Middle East is to bring the world face to face at last with that reality, we shall not have acted in vain.

"For the present there are certain events of which we can take account The fighting has ceased—that was our first purpose The principle of a U.N. Force has been approved, it is now being translated into a reality. If, as seems possible, the outcome is a new and stronger United Nations, capable of enforcing as well as resolving, the gain to the world will be beyond price

"Whatever our differences, we can all unite to pay a tribute to the three Services and to those of our French ally for the way in which they have carried out the operations in the Middle East. The most remarkable feature about our military action has been that an organization designed for destruction has been used to destroy weapons, not men. It is almost unique in history to use armed forces in the controlled way employed in this operation. The highest credit is due to General Keightley and to all ranks who served under him.

"The Services have loyally accepted and brilliantly executed orders which were designed to cause the minimum loss of life and the minimum damage to civilian property They have had to forgo the opportunity to exploit one of the most brilliant technical operations of modern times. All the more honour to them. In this great City of London we salute and thank them.

"Let me conclude with this reflection To-day there is a truce over the whole of that area. World statesmanship now has the chance to use this truce to make a firm and lasting peace, to settle the problems of these lands. We must pray that the opportunity will not be lost We will play our part constructively, fearlessly, and in good faith"

In a speech on Nov. 17 to a national rally of young Conservatives in London, Sir Anthony Eden declared that "we make no apology and will never make one for the action which we and our French allies took together." He maintained that the Anglo-French intervention in Egypt, however drastic and unpopular it might have been, had in fact limited the conflict, extinguished it, and given the world a chance to work for a solution of Middle East problems on a basis of reality. The Prime Minister also denounced the "nauseating hypocrisy" of the Soviet Government in condemning the Anglo-French action in Egypt while it was itself engaged in enslaving the Hungarian people and destroying their liberties.

"I repeat," Sir Anthony declared, "that we make no apology. Still less do we accept comparison with those who have slaughtered God knows how many thousands of the brave and unhappy people of Hungary. Now that the Press Correspondents who were covering events in Budapest have reached Vienna, the story of the Hungarian people's incredible gallantry has been told to the world, and the Soviet attack has been exposed for what it is—a brutal onslaught on a people whose only wish was to be free Compare that with our action Every conceivable precaution was taken by our forces to avoid bloodshed We welcome United Nations observers among us. They are there now. . But U.N. observers have not been allowed on Hungarian soil, let alone a United Nations force. If they were, those long trains with their tragic loads would not go rumbling eastwards. ."

It was announced from Downing Street on Nov. 19 that the Prime Minister was suffering from severe overstrain and had cancelled his immediate public engagements, and that Mr. R. A. Butler would preside over the Cabinet in the Prime Minister's absence. On the advice of his doctors, Sir Anthony Eden left England on Nov. 23 for a three weeks' holiday in Jamaica for complete rest and recuperation, accompanied by Lady Eden. (Times - Daily Telegraph) **(Prev. rep. Middle East, 15201A; 15173 A; Hungary, 15189 A; Guildhall Speech (1955), 14519 A.)**

A. NORWAY. — Lifting of Ban on Jesuit Order.

The Norwegian *Storting*, by 111 votes to 31, decided in the first week of November to repeal a provision in the Norwegian Constitution (dating from 1814) under which the Jesuit Order had been banned in Norway.

During a protracted debate, opponents of repeal argued that Jesuits more than any one else believed that "the ends justify the means," and alleged that the Jesuit Order had always opposed freedom of thought On the other hand, those supporting the lifting of the ban pointed out that, apart from Switzerland, Norway was the only country in which such a ban was still maintained. The Minister of Justice, Hr. Haugland, expressed the view that maintenance of the ban "accorded ill with the ideas of liberty now current in the world."

The opponents of repeal included the deputies of the Christian People's Party, as well as the former leader of the Conservatives, Hr. C. J. Hambro.—(Norwegian Embassy Press Office, London) **(Prev. rep. Switzerland, Repeal of Ban, 14312 B.)**

B. BULGARIA - INDONESIA.—Diplomatic Relations.

Bulgaria and Indonesia established diplomatic relations during October and agreed to set up diplomatic missions in Sofia and Jakarta. (Bulgarian Legation, London)

A. UNITED KINGDOM. — Further Reductions in Government Expenditure. - Estimates of Additional Defence Expenditure on Suez Operations.

The Chancellor of the Exchequer, Mr. Harold Macmillan, informed the House of Commons on Oct. 25 of further reductions in Government expenditure amounting to £17,250.000, bringing total savings during the current financial year to £93,250,000 towards the target of £100,000,000. Of the £17,250,000 saved, £9,000,000 was on the Defence programme and £8,250,000 on the Civil Estimates.

In his statement Mr. Macmillan announced:

(1) As from Dec. 1, the method of charging for National Health Service prescriptions (the cost of which was at present running at nearly 5s an item) would be altered to 1s. per item instead of 1s per form—a saving of £750,000 this year and £5,000,000 in a full year. Existing arrangements for refunds would be continued.

(2) A seasonal increase in the retail price of milk from 7½d. to 8d a pint would be made, as from Jan. 1, 1957, for the remainder of the winter—a net saving this year of £4,500,000 after taking into account the increased cost of school and welfare milk, for which the charge would remain unchanged.

The Chancellor concluded his statement by reminding the House that on the one hand all these decisons on Government expenditure ignored additional necessary expenditure not provided for in the original Estimates, and on the other did not take credit for underspending during the year, apart from the cuts deliberately planned. As regards additional expenditure, Civil Supplementary Estimates had been presented in July amounting to £15,000,000, excluding Post Office expenditure to be covered by self-balancing revenue. On defence. additional expenditure would be incurred by the Services in connexion with the Suez crisis, but it was not yet possible to estimate the amount involved.

Fuller details of the proposed economies were given in a statement circulated by Mr.Macmillan on the same date, some of the principal items being as follows:

Royal Navy. £1,725.000 from revision of the programme for refitting ships; and £75,000 from the review of major works at home and abroad.

Army. £2,550,000 from manpower reductions and adjustments; and £750,000 from reductions in stores purchases and certain works services.

R.A.F. £2,420,000 from manpower reductions and adjustments, and £1,480,000 from reductions in equipment and supplies.

Defence Expenditure by Civil Departments. £250,000 from reduced expenditure on equipment, railways and ports.

Commonwealth and Foreign Offices. £2,000,000, mainly through the reduction of loans to the Governments of Jordan and Kenya, and cuts on miscellaneous services.

National Health Service (in addition to the increased prescription charge): £500,000 from the run-down of hospital stocks.

Miscellaneous. £250,000 from the reduction of travelling expenditure and subsistence allowances.

Agricultural and Food Services. £5,190,000 from the seasonal increase in retail milk prices.

In reply to Opposition allegations that the proposed increases would chiefly hit old-age pensioners, Mr. Macmillan stressed that the existing arrangements for reimbursement of prescription charges for all war pensioners requiring treatment for their disabilities, all persons in receipt of National Assistance, and all old-age pensioners who could not meet the charges without hardship, would be continued.

The last annual report of the National Assistance Board showed that over £300,000 was refunded to pensioners, etc, for prescription charges. According to latest figures, the total cost of prescriptions was £59,000,000 a year and the revenue from the 1s. charge at present made was only £7,600,000. Average cost of each item was 5s.

The British Medical Association issued a statement on Oct. 26 declaring that whilst it recognized the need to reduce total expenditure on drugs, the new charges discriminated unfairly between different classes of patients. Sufferers from diabetes, varicose ulcers, and certain types of cancer, for example, continuously required drugs in several forms in addition to other medical supplies.

Economic Effects of Suez Operations.

Both Mr. Maudling (the Minister of Supply) and Mr. Macmillan made statements on the effects of the Middle East events on the British economy, in reply to an Opposition amendment moved during the debate on the Address in the House of Commons on Nov. 12.

The amendment regretted, "in view of the serious economic problems facing the country, which have been aggravated by the effects of the Government's policy in the Middle East," that the Speech from the Throne "gives no indication that Ministers intend to pursue policies to deal with the situation."

Mr. Harold Wilson (Lab.), moving the amendment, contended that the cost of the Suez crisis must have been big enough to upset the whole basis of the Budget presented last April, and that the Chancellor's £100,000,000 economy programme had turned out to be "an entire illusion."

Mr. Maudling, in reply, stated that the estimated cost of the Government's intervention in Egypt in the current financial year would be between £35,000,000 and £45,000,000 This figure, though large, was not big enough—particularly in the light of the present level of savings—to upset the disinflationary balance of the April Budget He conceded that the present situation in the Middle East would have an adverse effect on Britain's dollar reserves as she would have to pay dollars for oil and would also lose some oil revenues, though it would not be possible at present to give an accurate assessment of what that cost would be

Mr. Macmillan said that apart from the £35,000,000 to £50,000,000 additional expenditure on military arrangements arising out of President Nasser's seizure of the Canal and of subsequent events, he could see no reason why his estimated Budget surplus of £460,000,000 should not be largely realized In the first seven months of this year the Government had made real progress towards holding inflation and maintaining employment, with the result that "the position of the mass of the people has been better almost than ever before in living memory." The Suez trouble, however, and the resulting world uncertainty, had caused a loss on sterling in August, September, and October totalling $328,000,000 This, the Chancellor indicated, had nothing to do with the events of the past fortnight but reflected that the world thought Britain was faced with a serious new threat

After debate, the Opposition amendment was defeated by 321 votes to 259.—(Treasury Press Office - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14977 A.)**

B. SWITZERLAND. — Swiss Government's Call for Five-Power "Summit" Talks.

It was officially announced in Berne on Nov. 6 that the Swiss Federal Council had decided to send telegrams to President Eisenhower and the Prime Ministers of France, Britain, India, and the Soviet Union calling for an immediate Five-Power Conference to preserve world peace. The telegram to the Heads of Governments was worded as follows:

"The threat of a third world war with all its tragic consequences is weighing on mankind Peace can and must be saved The Swiss Federal Council therefore urgently appeals to the four Heads of Government who met in Geneva in July, 1955—that is, those of France, the United Kingdom, the Soviet Union, and the United States—to hold a conference without delay They might be joined by the head of the Government of India as the representative of the Bandung Powers. This conference could be held on Swiss territory. The Federal Council offers its good offices for organizing it"

The Swiss invitation was accepted by the Soviet Union and welcomed by India, but was declined by the U.S.A., Britain, and France.

Soviet Union. Marshal Bulganin sent the following reply on Nov. 11: "The Soviet Government, convinced of the need for settling all disputed issues peacefully, and of the benefit to the cause of peace which may be derived from direct talks between the heads of various Powers, takes a favourable attitude towards Switzerland's proposal for .. a conference of the Heads of Government of the United States, France, the United Kingdom, the Soviet Union, and India, and expresses its readiness to take part in this conference."

U.S A. President Eisenhower's reply (on Nov. 10) was as follows: "The Federal Council's suggestion for a meeting in Switzerland of the five chiefs of Government has received urgent and sympathetic consideration here. I appreciate the sincerity of the Swiss proposal and share the concern for the preservation of peace which inspired it. However, the United Nations is actively seized with the various problems posing as a threat to world peace, and I believe that the interests of all will be best served by carrying these initiatives to a successful conclusion"

Britain. Sir Anthony Eden's reply, issued on Nov 15 from Downing Street, read "I thank you for your message proposing a conference of the five Heads of Government I recognize the desire of the Swiss Government to help in improving the present international situation, and I am grateful for your offer to make available facilities for a conference I said in a speech on Nov. 9 [see page 15215], with reference to your generous proposal, that I was prepared to go anywhere and meet anybody if that would help A meeting such as you have suggested could, however, only be fruitful if all concerned agree that the moment is ripe for it. It seems that this is not so and in these circumstances we must, I think, recognize that a meeting could not be expected to be fruitful"

France. M. Mollet's reply [the text was not published] was reported to be on similar lines, expressing the view that a "summit" conference was not a practical possibility at present.

It was announced in New Delhi on Nov. 7 that Mr. Nehru had replied to the Swiss Government, welcomed its proposal, but pointed out that if the conference was to yield useful results Britain, France, the U.S.A., and the Soviet Union must first express their willingness to participate.—(Neue Zurcher Zeitung - New York Times - Times - Manchester Guardian - Le Monde, Paris - Indian High Commissioner's Office, London)

C. NETHERLANDS. — Bank Rate increased.

The Netherlands Bank Rate was raised on Oct. 22 from 3¼ to 3¾ per cent—the third increase since February last. The rate had previously been increased from 3 per cent to 3¼ per cent on Aug. 24.—(Netherlands News Agency) **(Prev. rep. 14716 D.)**

A. SOVIET UNION - UNITED STATES - UNITED KINGDOM - FRANCE - ISRAEL. — Marshal Bulganin's Messages to President Eisenhower, Sir Anthony Eden, M. Mollet, and Mr. Ben-Gurion on Middle East Situation. - Replies by Western and Israeli Leaders. - U.S. Rejection of Soviet Proposal for Joint Soviet-American Action in Egypt. - President Eisenhower's Message to Marshal Bulganin on Hungarian Situation.

During the first ten days of November a number of messages were sent by Marshal Bulganin to President Eisenhower and the Prime Ministers of Great Britain, France, and Israel on the Middle East situation. These messages, and the replies thereto, are given below, together with the text of a letter sent by President Eisenhower to Marshal Bulganin on the Hungarian situation.

Marshal Bulganin to President Eisenhower.

In this letter (Nov. 5) Marshal Bulganin proposed that Soviet and U.S. naval and air forces should co-operate, with other U.N. members, in taking decisive "measures" to check Anglo-French "aggression" in Egypt and restore peace in the Middle East. It was worded as follows:

"In this troubled and responsible moment for the cause of peace, I approach you on behalf of the Soviet Government. A whole week has passed since the armed forces of Britain, France and Israel attacked Egypt . . . Inhuman bombardment by the British and French Air Forces of Egyptian airfields, ports, installations, towns and inhabited localities is taking place. Anglo-French troops have landed on Egyptian territory . . . An aggressive war against Egypt and the Arab people is unfolding before the eyes of the whole world.

"The situation in Egypt calls for immediate and resolute action on the part of the United Nations. If such action is not undertaken, the U.N. would lose its prestige in the eyes of mankind and would disintegrate.

"The Soviet Union and the U.S.A. are permanent members of the Security Council and the two great Powers which possess all modern types of arms, including atomic and hydrogen weapons. We bear particular responsibility for stopping war and re-establishing peace and tranquillity in the Middle East. We are convinced that if the Governments of the U.S.S.R. and the U.S.A. would firmly declare their will to ensure peace and oppose aggression, the aggression will be ended and war will cease.

"At this menacing hour when the loftiest moral principles and the foundations and aims of the U.N are being put to the test, the Soviet Government approaches the U.S Government with a proposal of close co-operation in order to put an end to aggression and stop further bloodshed. The U S.A. has a strong navy in the Mediterranean. The Soviet Union also has a strong navy and a powerful air force. The joint and immediate use of these means by the U.S A. and the Soviet Union, backed by a U.N. decision, would be a sure guarantee of ending the aggression against the Egyptian people and the peoples of the Arab East

"The Soviet Government calls upon the U.S. Government to join their forces in the United Nations for the adoption of decisive measures to put an end to the aggression . . . Such joint steps by the U.S A. and the Soviet Union would not threaten the interests of Britain and France The peoples of Britain and France do not want war. Like our peoples, they desire to maintain peace.

"Many other States, besides Britain and France, are interested in immediate pacification and in the resumption of the normal functioning of the Suez Canal, which has been interrupted by the military operations The aggression against Egypt has been committed, not for the sake of free navigation on the Canal, which was safeguarded, but as a robbers' war launched with the aim of restoring colonial rule in the East, which had been overthrown by the people. If this war is not stopped, it contains the danger of turning into a third world war.

"If the Soviet Union and the U.S A. support the victim of aggression, other member-States of the United Nations will join us in these efforts Thereby the authority of the United Nations will be considerably enhanced and peace will be restored and strengthened

"The Soviet Government is ready to enter into immediate negotiations with the U S. Government on the practical realization of the above-mentioned proposals, so that effective action in the interests of peace can be taken At this tense moment of history, when the fate of the whole of the Arab East and also of the world is being decided, I expect a positive reply from you"

In reply, the White House published on Nov. 5 (*a*) a statement on Marshal Bulganin's letter, which, it was pointed out, had been released in Moscow before it was received in Washington; and (*b*) a letter from President Eisenhower to Marshal Bulganin, sent on Nov. 4, dealing with the Hungarian situation.

White House Statement.

This statement described Marshal Bulganin's proposal for joint Soviet-U.S. military action in the Middle East as an "unthinkable suggestion" and as "an obvious attempt to divert world opinion from the Hungarian tragedy." It pointed out *inter alia* that the U.N. had already called for a cease-fire and the withdrawal of foreign forces from Egypt, and that the Soviet Union was at that very moment "brutally suppressing the human rights of the Hungarian people" and defying U.N. resolutions to withdraw her forces from Hungary. The text was as follows.

"The President has received a letter from Chairman Bulganin which had been previously released to the Press in Moscow. This letter—in an obvious attempt to divert world attention from the Hungarian tragedy—makes the unthinkable suggestion that the United States should join with the Soviet Union in a bipartite employment of their military forces to stop the fighting in Egypt

"The Middle East question—in which there has been much provocation on all sides—is now before the United Nations. That world body has called for a cease-fire, a withdrawal of foreign armed forces, and the entry of a U.N. Force to stabilize the situation pending a settlement

"In this connexion, it is to be regretted that the Soviet Union did not vote in favour of the organization of the U.N. Force. All parties concerned should accept these U.N. resolutions promptly and in good faith.

"Neither Soviet nor any other military forces should now enter the Middle East area, except under U N mandate. Any such action would be directly contrary to the resolution of the United Nations, which has called for the withdrawal of those foreign forces which are now in Egypt. The introduction of new forces under these circumstances would violate the U.N Charter, and it would be the duty of all U.N. members, including the United States, to oppose any such effort.

"While we are vitally concerned with the situation in Egypt, we are equally concerned with the situation in Hungary Soviet forces are at this very moment brutally repressing the human rights of the Hungarian people. Only last night the General Assembly, in emergency session, adopted a resolution calling on the Soviet Union to cease immediately its military operations against the Hungarian people and to withdraw its forces from that country.

"The Soviet Union voted against this resolution, just as it had vetoed an earlier resolution in the Security Council. The Soviet Union is, therefore, at this moment in defiance of a decision of the United Nations, taken to secure peace and justice in the world.

"Under these circumstances, it is clear that the first and most important step that should be taken to ensure world peace and security is for the Soviet Union to observe the U.N. resolution to cease its military repression of the Hungarian people and withdraw its troops. Only then would it be seemly for the Soviet Union to suggest further steps that can be taken toward world peace.

"Since Chairman Bulganin has already released his letter to the President, it is proper to release a letter written by the President yesterday to the Chairman about the situation in Hungary."

President Eisenhower to Marshal Bulganin.

The U.S. President wrote

"I have noted with profound distress the reports which have reached me from Hungary. The declaration of the Soviet Government of Oct. 30, 1956, which re-stated the policy of non-intervention in the internal affairs of other States, was generally understood as promising the early withdrawal of Soviet forces from Hungary. Indeed, in that statement the Soviet Union said that it considered the further presence of Soviet Army units in Hungary 'can serve as a cause for an even greater deterioration of the situation.' This pronouncement was regarded by the U S. Government and myself as an act of high statesmanship. It was followed by the express request of the Hungarian Government for the withdrawal of Soviet forces.

"Consequently, we have been inexpressibly shocked by the apparent reversal of this policy. It is especially shocking that this renewed application of force against the Hungarian Government and people took place while negotiations were going on between your representatives and those of the Hungarian Government for the withdrawal of Soviet forces.

"As you know, the Security Council has been engaged in an emergency examination of this problem. As late as yesterday afternoon the Council was led to believe by your representative that the negotiations then in progress in Budapest were leading to agreement which would result in the withdrawal of Soviet forces from Hungary, as requested by the Government of that country. It was on that basis that the Security Council recessed its consideration of this matter.

"I urge in the name of humanity and in the cause of peace that the Soviet Union take action to withdraw Soviet forces from Hungary immediately, and to permit the Hungarian people to enjoy and exercise the human rights and fundamental freedoms affirmed for all peoples in the U N. Charter.

"The U.N. General Assembly is meeting in emergency session this afternoon to consider this tragic situation. It is my hope that your representative will be in a position to announce that the Soviet Union is preparing to withdraw its forces from Hungary and to allow the Hungarian people to enjoy the right to a Government of their own choice."

Marshal Bulganin's Reply to President Eisenhower.

The following reply to President Eisenhower's letter was sent by Marshal Bulganin on Nov. 7:

"The question of the withdrawal of Soviet troops from Hungary comes completely and entirely within the competence of the Hungarian and Soviet Governments The programme of the Revolutionary Workers' and Peasants' Government of Hungary [i.e the Kadar regime] . . . gives complete information on any questions that may interest you.

"As to the Soviet Government's statement of Oct. 30, 1956, which was mentioned in your letter, there is absolutely no reason to doubt that the Soviet Government's policy has been and will be guided by the principles outlined in that declaration."

Marshal Bulganin to Sir Anthony Eden.

In a strongly worded letter to the British Prime Minister (Nov. 5) Marshal Bulganin called for the immediate cessation of Anglo-French "aggression" against Egypt, and asked what Britain and France would say if they were attacked by "rocket weapons." The text was as follows:

"The Soviet Government considers it necessary to draw your attention to the aggressive war which is being waged by Britain and France against Egypt, which has the most dangerous consequences for the cause of general peace.

"The special session of the General Assembly adopted a resolution for the immediate cessation of hostilities and the withdrawal of foreign troops from Egyptian territory. Ignoring this, Britain, France and Israel are intensifying their military actions, continuing their barbaric bombardment of Egyptian towns and villages, and landing troops on Egyptian territory The British Government, together with France and Israel, have thus embarked on a path of unprovoked aggression against Egypt.

"The reasons given by Britain to justify the aggression are completely unacceptable. The British Government declared that it had intervened in the Israeli-Egyptian conflict to prevent the Suez Canal zone from becoming a theatre of hostilities. With the Anglo-French intervention, the Suez Canal zone has become a theatre of war Traffic on the Canal has been disturbed, bringing harm to the interests of States using the Canal.

"The aggression against Egypt cannot be justified by the special interests of France and Britain in navigation on the Canal The Governments of Britain and France cannot usurp the right of decision in matters concerning freedom of navigation on the Canal, because there are also other interested Powers. These Powers condemn the aggressive actions of Britain and France and demand that peace and order should be preserved in the Middle East. It is well known that freedom of navigation on the Canal has been fully ensured by Egypt. The problem of the Suez Canal was merely a pretext for Anglo-French aggression, the aims of which are more far-reaching than appears

"It cannot be concealed that an aggressive war is being waged against the Arab peoples, against the national independence of the States of the Near and Middle East, for the purpose of restoring the regime of colonial slavery rejected by those peoples. Nothing can justify the fact that the armed forces of Britain and France—two great Powers, both permanent members of the Security Council—have attacked a country which only recently gained its independence and which does not have sufficient means for its defence.

"In what position would Britain have found herself if she had been attacked by more powerful States possessing every kind of modern destructive weapon? There are countries which need not have sent a navy or air force to the coasts of Britain but could have used other means, such as rocket techniques If rocket weapons had been used against Britain and France, they would probably have called it a barbarous action. Yet in what way does the inhuman attack made by the armed forces of Britain and France on Egypt differ from this? . .

"We maintain that the British Government must . . . put an end to the war in Egypt We call upon you, upon Parliament, upon the Labour Party, upon the trade unions and the people of Britain—stop aggression, stop the bloodshed. War may spread to other countries and become a third world war

"The Soviet Government has approached the United States with a proposal to use naval and air forces, together with other U.N. members, to stop the war in Egypt and to restrain aggression. We are fully determined to crush the aggressors and restore peace in the East through the use of force We hope at this critical moment you will display due prudence and draw the corresponding conclusions from this."

Sir Anthony Eden to Marshal Bulganin.

Sir Anthony Eden's reply to this letter was read by him to the House of Commons on Nov. 6, the text being as follows:

"I have received with deep regret your message of yesterday. The language which you used in it made me think at first that I could only instruct H M. Ambassador [in Moscow] to return it as entirely unacceptable But the moment is so grave that I feel I must try to answer you with those counsels of reason with which you and I have in the past been able to discuss issues vital for the whole world

"H.M. Government have repeatedly said that the essential aim of the action taken by the British and French Governments was to stop the fighting between Israel and Egypt and to separate the combatants. This aim has now been virtually achieved. As regards the future, you know that the Canadian Government have proposed the establishment of an Emergency International United Nations Force in the area The General Assembly has taken the first steps to organize such a force. H.M. Government fully approve the principle of an International U.N Force Indeed, we suggested this ourselves . .

"If your Government will support proposals for an International Force whose functions will be to prevent the resumption of hostilities between Israel and Egypt, to secure the withdrawal of the Israeli forces, to take the necessary measures to remove obstructions and restore traffic through the Suez Canal, and to promote a settlement of the problems of the area, you will be making a contribution to peace which we would welcome

"Our aim is to find a peaceful solution. not to engage in argument with you. But I cannot leave unanswered the baseless accusations in your message. You accuse us of waging war against the national independence of the countries of the Middle East. We have already proved the absurdity of this charge by declaring our willingness that the United Nations should take over the physical task of maintaining peace in the area.

"You accuse us of barbaric bombardment of Egyptian towns and villages. Our attacks on airfields and other military targets have been conducted with the most scrupulous care in order to cause the least possible loss of life. Some casualties there must have been. We deeply regret them When all fighting has ceased it will be possible to establish the true figure We believe they will prove to be small. They will in any event be in no way comparable with the casualties which have been and are still being inflicted by the Soviet forces in Hungary.

"The world knows that in the past three days Soviet forces in Hungary have been ruthlessly crushing the heroic resistance of a truly national movement for independence—a movement which, by declaring its neutrality, proved that it offered no threat to the security of the Soviet Union.

"At such a time it ill becomes the Soviet Government to speak of the actions of H M. Government as barbaric The United Nations have called on your Government to desist from all armed attack on the people of Hungary, to withdraw its forces from Hungarian territory, and to accept United Nations observers in Hungary. The world will judge from your reply the sincerity of the words which you have thought fit to use about H M Government"

Marshal Bulganin to M. Mollet.

The Soviet Prime Minister's letter to the French Prime Minister (issued on Nov. 5) was similar to that to Sir Anthony Eden. The text was as follows:

"I deem it my duty to address you concerning the situation which has arisen in connexion with the Franco-British aggression in Egypt. I must state with all frankness that the war against the Egyptian state, launched by France and Britain with Israel as their tool, may have extremely dangerous consequences for general peace

"An overwhelming majority of U.N. member-states, at the special session of the General Assembly, supported the immediate cessation of military operations and the withdrawal of foreign troops from Egyptian territory. Nevertheless, military operations in Egypt are being extended. Egyptian towns and villages are being subjected to barbarous bombing. French and British troops have landed on Egyptian territory. The blood of innocent people is being shed. By acting in this manner the Government of France, jointly with the Governments of Britain and Israel, entered the path of unprovoked aggression against Egypt . . . It is obvious that what is involved is not freedom of navigation on the Suez Canal, which was safeguarded by Egypt and which has now been interrupted by the armed operations of France and Britain, but by the wish of the colonizers to reimpose the yoke of colonial slavery upon the peoples of the Arab East fighting for their national independence and freedom.

"During our meeting in Moscow last May we spoke of the fact that in your actions you are inspired by Socialist ideals. But what has the bandit-like attack against Egypt, which looks like an open colonial war, to do with Socialism? How can one reconcile Socialist ideals with the treacherous attack by France against a country which had only recently achieved its independence and which is not sufficiently armed to defend itself?

"We are deeply convinced that the colonial war against Egypt runs counter to the fundamental interests of the French people, who, just as fervently as the peoples of Britain and of the Soviet Union, desire to preserve peace and to develop economic and cultural co-operation with other peoples What would be the position of France if she were attacked by other States having at their disposal modern and terrible means of destruction?

"In the interests of preserving peace, we appeal to you, to the Parliament, to the Socialist Party, to the trade unions, to the entire French people—put an end to armed aggression, stop the bloodshed

"One cannot help but see that the war in Egypt may spread to other countries and develop into a third world war. I consider it my duty to inform you that the Soviet Government has already addressed the United Nations and the President of the United States with a proposal to use naval and air forces, jointly with other members of the U.N., to stop the war in Egypt and curb aggression. The Soviet Government is fully determined to apply force in order to crush the aggressors and restore peace in the East.

"There is still time to use prudence and to prevent the bellicose forces from gaining the upper hand. We hope that at this decisive moment the French Government will show soberness in the evaluation of the situation which has arisen, and will draw the appropriate conclusions from it"

M. Guy Mollet to Marshal Bulganin.

The French Prime Minister replied as follows to Marshal Bulganin on Nov. 8:

"I am no less conscious than yourself of the grave risks involved in recourse to force in the modern world. I also share your desire that the entire world should be at peace. I doubt, however, whether in present circumstances this can be achieved by menaces and by references to the possibilities of long-range weapons [a reference to Marshal Bulganin's "rockets" threat.] I also doubt whether the Soviet Government has any authority to speak of the shedding of 'innocent blood' when it is itself shedding rivers of blood in Hungary.

" The operations we have been forced to undertake, the limited character of which you do not seem able to appreciate, are not operations of war against Egypt. They are designed solely to remedy certain aspects of the state of permanent insecurity which has been established in the Middle East—a state of affairs largely brought about by the encouragement given by certain Governments, including your own, to the Egyptian Government It is perfectly clear that for many months the Egyptian Government has done everything in its power to promote insecurity in that region. In spite of protracted negotiations designed to reach a satisfactory solution of the Suez question, the Egyptian Government has rejected any acceptable arrangement. It is certain that if the U.S.S.R. had exerted a moderating influence in Cairo, corresponding to the policy of peace and *detente* which it professes to uphold, the situation to-day would have been very different

" If the U S.S.R. has any real respect for the authority of the United Nations, it can show it by taking action, in conformity with the General Assembly's resolution, to bring to an end the operations it has launched in Hungary in violation of the laws of humanity, of justice, and of human rights.

" With regard to the Middle East, the position of France is as follows We are ready to accept a definite cease-fire if it is accepted also by Egypt and Israel, and if the International Force, the creation of which has been decided upon by the United Nations, is able to carry out the tasks assigned to it by the General Assembly's resolution of November 2

" We desire also that the Security Council should meet at Ministerial level to ensure the observance of the cease-fire and to regulate the problems of the Middle East "

Marshal Bulganin to Mr. David Ben-Gurion.

In a threatening letter to the Prime Minister of Israel (Nov. 5) Marshal Bulganin alleged that Israel had acted as a " tool " of Britain and France, announced the recall of the Soviet Ambassador in Tel-Aviv, and said *inter alia* that the continued existence of Israel as a State had been " placed in jeopardy." The text was as follows :

" The Soviet Government has already expressed its condemnation of the armed aggression by Israel, as well as by Britain and France, against Egypt, which was a direct and open violation of the Charter and principles of the United Nations.

" The overwhelming majority of the nations of the world, at the special session of the General Assembly, also condemned the aggression against Egypt and called upon Israel, Britain, and France to cease military operations forthwith and withdraw the invading troops from Egyptian territory.

" All peace-loving mankind indignantly brands the criminal actions of the aggressors who have attacked the territorial integrity, sovereignty, and independence of the Egyptian State Disregarding this, the Government of Israel, acting as a tool of foreign imperialist powers, continues the foolhardy adventure, challenging all the peoples of the East who are struggling against colonialism for their freedom and independence

" Such actions by the Government of Israel plainly show how much all the false assurances of Israel's love of peace and its desire to co-exist peacefully with the neighbouring Arab States were worth. By these assurances the Government of Israel was in fact merely striving to lull the vigilance of other nations while preparing a treacherous attack against its neighbours.

" Carrying out the will of other people, acting according to instructions from abroad, the Government of Israel is toying with the fate of peace and with the fate of its own people, in a criminal and irresponsible manner It is sowing such hatred for the State of Israel among the peoples of the East as cannot but affect the future of Israel, and which will place in jeopardy the very existence of Israel as a State.

" We appeal to the Government of Israel to come to its senses before it is too late and to halt its military operations against Egypt. We appeal to you, to the Parliament, to the working-people of Israel, to the entire people of Israel : Stop the aggression, halt the bloodshed, withdraw your troops from Egyptian territory

" In view of the situation which has arisen, the Soviet Government has decided to advise its Ambassador in Tel-Aviv to leave Israel and return immediately to Moscow. We hope that the Government of Israel will duly understand and appreciate our warning."

Mr. Ben-Gurion to Marshal Bulganin.

The Prime Minister of Israel replied to this letter as follows :

" I have received your Note and have read it carefully, and I must point out that some of your arguments are based on incomplete and incorrect information that you have received.

" More than two years ago the ruler of Egypt organized a special force, under the name of *Fedayeen*, whose purpose was to penetrate surreptitiously within the boundaries of our country, and to murder our citizens working in the fields, travelling along the roads, and dwelling in their homes At the beginning, these groups operated only from areas occupied by Egypt, such as the Gaza Strip. Lately he [Colonel Nasser] has organized such groups of murderers in Jordan, Lebanon, and Syria, and the lives of our farmers along the borders are subject daily to their murderous onslaught. During the Suez crisis, the activity of these groups ceased. Three weeks ago, however, their activity was intensified.

" In an order dated Feb 15, 1956, by the Commander of the Third Egyptian Division in Sinai, Major-General Ahmed Salem—a photostatic copy of which is enclosed herewith—it is written *inter alia* : ' Every commander is to prepare himself and his subordinates for the unavoidable war with Israel for the purpose of fulfilling our exalted aim—namely the annihilation of Israel and her extermination in the shortest possible time and by fighting her as brutally and cruelly as possible.'

" The ruler of Egypt, in contravention of the U.N. Charter, organized an economic boycott against Israel. He established a blockade against our freedom of the navigation in the Suez Canal and the Straits of Elath [Straits of Tiran], and for five years violated a decision of the Security Council concerning freedom of passage of Israeli shipping in the Suez Canal. After the Security Council, on 13 October this year, again forbade discrimination with regard to freedom of navigation on the Suez Canal, Egypt's ruler announced that discrimination against Israel would be continued

" About two weeks ago the Egyptian ruler concluded a military pact with Jordan and Syria against Israel. Therefore the action that we carried out at the end of October was necessitated by self-defence, and was not an action dictated by foreign wishes as you allege. In response to the appeal of the special U.N. Assembly of the United Nations, we ceased fire, and for several days past there has been no armed conflict between us and Egypt.

" Yesterday I stated in the *Knesset* [Parliament], in the name of the Government of Israel, that we are willing to enter immediately into direct negotiations with Egypt to achieve a stable peace without any prior conditions and without any compulsion. We hope that all peace-loving States, and especially those that maintain friendly relations with Egypt, will use their influence in Egypt to bring about peace talks without further delay.

" I am constrained, in conclusion, to express my surprise and sorrow at the threat against Israel's existence contained in your Note. Our foreign policy is dictated by our essential needs and by our yearning for peace. It is not and will not be decided by any foreign factor As a sovereign State we decide our path ourselves, and we join with all other peace-loving peoples of the world in striving for relations of peace and justice in our area and throughout the entire world."

Soviet Proposal for Armed U.S. and Soviet Intervention in Egypt against Anglo-French " Aggression." - Rejection by Security Council.

The Soviet delegation at the U.N. presented a resolution in the Security Council on Nov. 5 proposing (*a*) that Britain, France, and Israel should " immediately, and not later than 12 hours after the adoption of this resolution, cease all military operations against Egypt and withdraw their troops from Egyptian territory within three days " ; (*b*) that the U.S.A., the Soviet Union, and other U.N. members having at their disposal " powerful air and naval forces " should " give armed and other aid to the victim of aggression—the Republic of Egypt—by sending naval and air forces, military units, volunteers, military equipment, and other types of aid," unless Britain, France and Israel complied with the resolution " by a fixed date." The resolution said that such action should be taken in conformity with Article 42 of the U.N. Charter, and added that the Soviet Government was " ready to make its contribution toward the task of curbing aggression and re-establishing peace by sending to Egypt the air and naval forces needed for that purpose."

The Security Council, meeting on the same day, refused to put the resolution on its agenda, the voting being four against (the U.S.A., Britain, France, Australia) and three in favour (U.S.S.R., Yugoslavia, Persia), with four abstentions—Belgium, Nationalist China, Cuba, and Peru. Mr. Cabot Lodge (U.S.A.) said that the Soviet proposal would " turn Egypt into a still larger battlefield," adding that the U.S.S.R. had set a " new record of cynicism and disregard of the values of international morality " by presenting such proposals at a time when its own troops were carrying out " butchery " in Budapest.

President Eisenhower on U.S. Opposition to Soviet " Volunteers " in Egypt.

At a press conference at the White House on Nov. 14, Mr. Robert E. Clark (of the International News Service) recalled that President Eisenhower had said that it would be the duty of all U.N. members, including the United States, to oppose " the introduction of any new forces in the Middle East," and asked the President whether this would " apply to intervention on the side of Egypt by so-called volunteers from the Soviet Union or Communist China." In reply, President Eisenhower said that " it would be the duty of the United Nations, including the United States, to oppose such an effort." (New York Times - New York Herald Tribune - Times - Manchester Guardian - Le Monde, Paris - Soviet Weekly) **(Prev. rep. Middle East, 15201 A ; 15173 A ; Hungarian Situation, 15189 A.)**

A. INDIA. — Mr. Nehru's Visits to Western Germany, France, Ireland, and Saudi Arabia. - Indo-Arabian Statement on Suez Canal. - Increased German Technical Aid for Indian Economic Development.

In response to an invitation extended during King Saud's visit to India in 1955 (see 14641 A) Mr. Nehru paid an official visit to Saudi Arabia from Sept. 24-28, during which he had informal talks with King Saud at Riyadh.

A statement issued on Sept. 28 said King Saud and Mr. Nehru had discussed recent international developments and the promotion of friendship and co-operation between their two countries, and had reaffirmed their adherence to the declaration issued by the Bandung Conference (see 14181 A). "Both Saudi Arabia and India," the statement continued, "are deeply interested in a peaceful settlement of the dispute relating to the Suez Canal, a waterway of vital importance to their own economic well-being as also to that of many other countries. There can be no settlement of the dispute by methods of conflict or by denial of the sovereign rights of Egypt over the Canal. The right of all countries to free navigation through the Canal on payment of reasonable dues has been accepted. H M the King and the Prime Minister are convinced that, in spite of difficulties and tension that have arisen over this question, it is possible to reach a negotiated settlement between the parties concerned without any derogation from Egyptian sovereignty, and which would maintain the interests of other countries in the unrestricted use of the Canal as an open waterway. They share the hope that there will be no recourse to political and economic pressure in dealing with this matter, as such pressure would only retard a peaceful settlement, apart from having other undesirable and far-reaching consequences."

Prior to visiting Saudi Arabia, Mr. Nehru had visited Yugoslavia for discussions with Presidents Tito and Nasser (see 15008 A) during his return journey from the London Conference of Commonwealth Prime Ministers. In addition, he also visited Western Germany, France, and the Irish Republic before returning from the London conference.

During his visit to Bonn (July 13-16) Mr. Nehru had talks with Dr. Adenauer and other West German leaders, including Herr von Brentano (Foreign Minister), Dr. Blucher (Vice-Premier), and Professor Erhard (Minister for Economic Affairs). Before leaving for Paris he visited Hamburg to receive honorary doctorates.

A joint communiqué issued in Bonn (July 16) announced *inter alia* that the German Federal Republic would increase its technical assistance for Indian economic development and would also increase the number of scholarships for Indian students studying at German technical colleges. After stating that Dr. Adenauer and Mr. Nehru had had "detailed, frank and friendly" discussions on "political questions of mutual interest," the communiqué continued:

"Both heads of Government emphasized their belief in a democracy based on the principles of personal freedom and the rule of law . . . There was agreement that respect for national sovereignty and independence, territorial integrity, and non-intervention in the internal affairs of other States form the basis for friendship and peaceful collaboration between all peoples

"The heads of Government discussed the general international situation, with special attention to existing tensions and to measures which could be taken to bring about a progressive improvement They confidently hope that present developments are leading toward a reduction of these tensions They agreed that a comprehensive disarmament agreement, based on suitable inspection and control measures, is of the greatest importance for securing world peace and the economic and social progress of all countries.

"The two heads of Government discussed the German question in connexion with the general world situation The Indian Prime Minister expressed his understanding and sympathy for the wish of the German people for the peaceful restoration of their national unity, which would materially contribute to an improvement of the European and general international situation

"The German side emphasized the Federal Republic's great interest in the economic development of India. The two Heads of Government noted with satisfaction that for several years German industry has to a considerable extent been called upon in the realization of the great Indian development projects, and that it is ready to continue to co-operate in future. The Federal Government has absolute confidence in the economic future of India and is ready to make available for the realization of Indian economic plans the technical experience available in the Federal Republic. It will, as far as the Government of India desires it, increase its co-operation.

"The Federal Government is convinced that the collaboration of German and Indian scientists, experts, and technicians . . . serves not only the Indian economy and the strengthening of relations between the two countries, but also human relationships and mutual understanding between the two peoples The two Heads of Government agreed that a technological teaching institution is to be set up in India, for which the Federal Government will make available teaching staff and equipment. The Federal Government will further endow scholarships for a greater number of Indian students to study at German technical colleges."

Disappointment was expressed in Western Germany at the non-committal attitude shown by Mr. Nehru on the question of German reunification.

At a press conference in Bonn on July 14, Mr Nehru declined to answer a question whether India would offer her good offices with the four great Powers to bring about German unity if such a request was made by the German Federal Government, he said that the question was "hypothetical" and that he saw "no reason why India or I should be approached in this way." He recognized the desire of the German people for unity as a natural one, but added "The question is, how it can be obtained. All I can say is that it should be obtained by peaceful methods and peaceful negotiations" Asked whether India intended to recognize the East German Government, Mr. Nehru said that, though there were some trade contracts, there was no diplomatic contact at present: he did not know what future developments would be, and he could not commit his Government.

During his visit to Paris (July 17-18) Mr. Nehru had discussions with President Coty, M. Mollet, and M. Pineau on Algeria, disarmament, and East-West relations. At a press conference Mr. Nehru stressed that there were no outstanding problems between India and France, and that "on many matters our viewpoints are very similar and there is a good deal of agreement."

While in Dublin from July 7-10 Mr. Nehru had discussions with Mr. Costello and other members of the Irish Government, and received an honorary degree from the University of Ireland.—(Indian High Commissioner's Office, London - Frankfurter Allgemeine Zeitung - Le Monde, Paris - Irish Times, Dublin) **(Prev. rep. Mr. Nehru, 15008 A; King Saud's Visit to India, 14641 A.)**

B. AUSTRALIA. — Tasmanian Elections.

Elections to the Tasmanian House of Assembly took place on Oct. 13. The dissolution of the previous Assembly had followed the defeat of Mr. Cosgrove's Government on an Opposition censure motion after the former Minister for Housing, Mr. Bramich, had resigned from the Labour Party and joined the Liberal Opposition, thus giving the Liberals 16 seats against 14 for Labour.

The election resulted in a tie, both the Labour and Liberal parties returning 15 members. Under Tasmanian constitutional law, however, the Labour Party retained the right to form a Government because it secured an overall majority of the primary votes. Mr Cosgrove accordingly remained State Premier, but two of his Ministers—Mr. Madden (Treasurer and Minister for Transport) and Mr. Hand (Minister for Forests)—were defeated in the election.

When the new House of Assembly met for the first time on Oct. 29 it elected Mr. Kevin Lyons (Liberal) as its Speaker. Mr Lyons (33) is the son of the late Mr. Joseph Lyons, formerly Prime Minister of Australia.—(Australian News and Information Bureau) **(Prev. rep. 14151 D.)**

C. SOVIET UNION. — Mr. Molotov appointed Minister of State Control.

It was announced in Moscow on Nov. 21 that Mr. Molotov, First Deputy Prime Minister and formerly Foreign Minister, had been appointed Minister of State Control in succession to Mr. V. G. Zhavoronkov.

The Ministry of State Control supervises and controls the work of other Ministries, administrative organs, and State property, ensuring that Government decrees and instructions are implemented. Its functions include control of the economic and financial activities of State, co-operative, and public organizations and enterprises and of the expenditure of financial and material resources allocated to State organizations. It also submits to the Government questions of general economic importance emerging from audits and revisions.

The organizational apparatus of the Ministry parallels that of the State Administration, its controllers having the right to examine all administrative records and to carry out audits The Ministry may also issue reprimands, levy fines of up to three months' salary, and order the removal of personnel considered to have offended against Government regulations.

The post was held by Stalin from 1919-22. A more recent holder was Mr. Merkulov, who was arrested and executed in December 1953 as an accomplice of Beria

The appointment of Mr. Molotov as head of the Ministry of State Control, while retaining his First Deputy Premiership, was regarded by foreign correspondents in Moscow as significant inasmuch as Mr. Molotov was believed to be one of the leaders of the "Stalinist" group in the Kremlin.—(Times - Manchester Guardian - Le Monde, Paris) **(Prev. rep. Council of Ministers, 15083 B; Mr. Molotov, 14900 B.)**

NOVEMBER 24—DECEMBER 1, 1956

A. HUNGARY. — Security Council Meeting on Hungarian Situation. - Soviet Veto of U.S. Resolution. - Emergency Sessions of General Assembly. - Adoption of Resolutions for Withdrawal of Soviet Troops, Entry of U.N. Observers, and Free Elections under U.N. Auspices. - Non-compliance by Soviet Government and Kadar Regime. - International Reactions to Events in Hungary. - Large-scale Resignations from Communist Parties in Western Countries. - 100,000 Hungarian Refugees enter Austria. - National and International Relief Aid.

At the urgent request of the U.S., British and French delegates, the U.N. Security Council met in emergency session on Oct. 28 to consider "the situation created by the action of foreign [i.e. Soviet] military forces in Hungary in violently repressing the rights of the Hungarian people, which are secured by the treaty of peace to which the Governments of Hungary and of the Allied and Associated Powers are parties."

The request was made under Article 34 of the U N Charter, which authorizes the Security Council to "investigate any dispute or situation which might lead to international friction, in order to determine whether the continuance of the dispute or situation is likely to endanger the maintenance of international peace and security"

The Hungarian Peace Treaty (see 8512 B) lays down in Article 2 that the Hungarian Government has the obligation to take "all measures necessary to secure to all persons under Hungarian jurisdiction, without distinction of race, sex, language, or religion, the enjoyment of human rights and fundamental freedoms, including freedom of expression, press and publication, religious worship, political opinion, and public meeting."

The Allied and Associated Powers signing the Hungarian Peace Treaty were the Soviet Union, the United States, Great Britain, France, Australia, Canada, India, New Zealand, South Africa, Czechoslovakia, Yugoslavia, Byelorussia, and the Ukraine.

Despite strong Soviet protests, the Security Council decided on Oct. 28 to hold an emergency debate on Hungary; the only dissenting vote was cast by the Soviet delegate, while Yugoslavia abstained. The President of the Security Council (M. Cornut-Gentille, of France, who held that post during October) received letters from the Italian, Turkish, and Argentine Governments associating themselves with the three Western Powers, while the Spanish Government sent a separate communication to the U.N. Secretary-General (Dr. Hammarskjold) protesting against "the bloody intervention of Soviet troops in the internal affairs of Hungary."

Mr. Sobolev (U S.S.R.) bitterly attacked the U S.A., France and Britain for "interference in the internal affairs of Hungary," accusing the Western Powers of inciting "the armed uprising of a reactionary underground against the legitimate Hungarian Government" and of making "an unprecedented attempt to afford U.N protection to reactionary elements in Hungary which have come out against the democratic achievements of the Hungarian working people." Declaring that support of the "reactionary undergrounds" in Eastern Europe had long been "a major principle of the ruling circles in the U.S.A.," Mr Sobolev accused the U.S. Congress of having appropriated many millions of dollars to support "subversive elements" who were trying to "overthrow legitimate governments" and supplant them by "reactionary regimes" He described the events in Hungary as "an uprising of criminal fascist elements against the legitimate Hungarian Government"; maintained that the Hungarian Government's action in asking for help from the U.S S.R. to suppress these "fascist elements" was entirely within its own jurisdiction; and asserted that the U.N. could "in no circumstances" intervene in what was a "purely internal matter"

Sir Pierson Dixon (U.K.) said that foreign forces were at that moment engaged in repressing the rights of the Hungarian people guaranteed under the Peace Treaty, that Hungarian men, women and children were being killed and wounded, and that the situation required "immediate consideration in the world forum of the United Nations." **Mr. Cabot Lodge** (U.S A.), speaking in support, declared that the U.N. could not remain indifferent to the fate of Hungary.

Mr. Brilej (Yugoslavia) said that his Government were watching events in Hungary with grave concern, but were confident that the Hungarian Government could handle the situation and restore normal conditions A debate on Hungary in the Security Council might only aggravate the situation, and Yugoslavia would normally have opposed it As, however, his Government were opposed to the use of foreign troops on the territory of other countries, he would abstain from voting.

The Security Council—which, together with the General Assembly, was then urgently considering the situation in Egypt—received a message on Nov. 1 from Mr. Imre Nagy, the Hungarian Prime Minister, drawing attention to the continued entry of Soviet troops into Hungary, and stating that his Government had urgently demanded the withdrawal of Soviet forces. On the following day Mr. Nagy sent another letter to Dr. Hammarskjold asking the Security Council to instruct the Soviet and Hungarian Governments to begin immediate discussions on the withdrawal of Soviet forces.

Security Council Meeting. - Soviet Veto of U.S. Resolution for Withdrawal of Soviet Troops.

In the morning of Nov. 4 the Security Council met in specia emergency session to discuss a resolution, tabled by Mr. Cabot Lodge (U.S A.), which (1) called upon the Soviet Union to desist immediately from its military action in Hungary and to withdraw its troops without delay from Hungarian territory; (2) reaffirmed the right of the Hungarian people to a Government "responsive to their national aspirations"; (3) requested Dr. Hammarskjold to explore the needs of the Hungarian people for food, medicine, and other supplies, and (4) asked all U.N. members and humanitarian organizations to co-operate in making such supplies available.

The resolution was adopted by nine votes to one (the U.S.S.R.) with Yugoslavia abstaining, and was thus blocked by the Soviet veto—the 79th cast by the U.S.S.R. in the Security Council. Mr. Lodge then moved that the special emergency session of the General Assembly (already discussing the Middle East situation) should meet later the same day to consider the Hungarian situation, and this was adopted by 10 votes (including Yugoslavia) to one (U.S.S.R.).

Emergency Session of General Assembly. - Adoption of Resolutions for Withdrawal of Soviet Forces from Hungary, Free Elections, and Entry of U.N. Observers.

The General Assembly accordingly met in emergency session during the afternoon of Nov. 4, and, after debate, adopted a U.S. resolution—by 50 votes against eight, with 15 abstentions—worded as follows:

"The General Assembly —

"Considering that the United Nations is based on the principle of the sovereign equality of all its members;

"Recalling that the enjoyment of human rights and fundamental freedoms in Hungary was specifically guaranteed by the Peace Treaty signed at Paris on Feb. 10, 1947, and that the general principle of these rights and freedoms is affirmed for all peoples in the U.N. Charter,

"Convinced that recent events in Hungary manifest clearly the desire of the Hungarian people to exercise and to enjoy their fundamental rights, freedoms and independence;

"Condemning the use of Soviet military forces to suppress the efforts of the Hungarian people to reassert their rights,

"Noting moreover the declaration by the Soviet Government of Oct 30, 1956, of its avowed policy of non-intervention in the internal affairs of other States;

"Noting the communication of Nov. 1, 1956, of the Government of Hungary to the Secretary-General regarding demands made by that Government to the Government of the U.S S.R for the instant and immediate withdrawal of Soviet forces;

"Noting further the communication of Nov. 2, 1956, from the Government of Hungary to the Secretary-General asking the Security Council to instruct the Soviet and Hungarian Governments to start negotiations immediately on the withdrawal of Soviet forces;

"Noting that the intervention of Soviet military forces in Hungary has resulted in grave loss of life and widespread bloodshed among the Hungarian people, and taking note of the radio appeal of Prime Minister Imre Nagy of Nov. 4, 1956;

(1) Calls upon the U.S S.R. to desist forthwith from all armed attack on the people of Hungary and from armed intervention in the internal affairs of Hungary,

(2) Calls upon the U.S.S.R. to cease the introduction of additional armed forces into Hungary, and to withdraw all its forces without delay from Hungarian territory;

(3) Affirms the right of the Hungarian people to a Government responsive to its national aspirations and dedicated to its independence and well-being;

(4) Requests the Secretary-General to investigate the situation caused by foreign intervention in Hungary; to observe this situation directly through representatives named by him, to report thereon to the General Assembly at the earliest moment; and, as soon as possible, to suggest methods to bring an end to the foreign intervention in Hungary;

(5) Calls upon the Governments of Hungary and the U S.S.R. to permit observers designated by the Secretary-General to enter the territory of Hungary, to travel freely therein, and to report their findings to the Secretary-General,

(6) Calls upon all Members of the United Nations to co-operate with the Secretary-General and his representatives in the execution of their functions;

(7) Requests the Secretary-General, in consultation with the specialized agencies, to enquire on an urgent basis into the needs of the Hungarian people for food, medicine, and other supplies, and to report to the General Assembly as soon as possible;

(8) Requests all U N. Members, and invites national and international humanitarian organizations, to co-operate in making available such supplies as may be required by the Hungarian people."

The eight opposing votes were cast by the Communist countries, while the 15 abstentions included India, all the Arab nations, and other countries of the Afro-Asian bloc.

Mr. Cabot Lodge spoke as follows in presenting the U.S. resolution: "At dawn this morning Soviet troops in Hungary opened fire in Budapest and throughout the country . . . Prime Minister Nagy has appealed to the United Nations for help After several days of ominous reports, the situation in Hungary has become all too clear. What is revealed is a sickening picture of duplicity and double-dealing.

"While this wholesale brutality was being perpetrated by the Soviet Government, the Soviet representative here in this hall was praising peace and non-aggression and raising his hands in horror against bloodshed in the Middle East. All of us who are striving with every fibre of our being for peace in the Middle East can never forget this unutterable cynicism.

"For the last few days Soviet troop movements in Hungary have been reported. These reports have been accompanied by Soviet assurances to the U.N. and to the Hungarian Government that their troops in Hungary had not and would not be reinforced. On Oct. 29 the Czechoslovak Communist Party sent a message to the Hungarian Communists—it will be recalled that Nagy himself is a Communist who has sought to lead his country to freedom from Soviet enslavement—in which it expressed its support for Nagy's efforts to 'achieve progress' and 'deepen Socialist democracy.'

'That is what they were saying on Oct 28 and 29 What could have changed the situation in so short a time? The desire of Prime Minister Nagy to govern Hungary for the Hungarians? Does the Soviet Union fear this? The reinforcement of Soviet troops in Hungary during these fateful days shows that it does.

"Prime Minister Nagy and other members of his Government are now under arrest. General Maleter, the Minister of Defence and heroic defender of the Maria Theresa barracks against Soviet assault, who only yesterday was engaged in negotiations with Soviet military representatives for troop withdrawals, is also under arrest. A Soviet ultimatum was issued calling for the capitulation of Budapest by noon, and threatening the bombing of the city if it did not capitulate.

"Cardinal Mindszenty has sought refuge in the U S. Legation in Budapest. I think it appropriate to quote a broadcast made only yesterday by Cardinal Mindszenty on Radio Budapest. " . We Hungarians want to live and act as the standard-bearers of the peace of European nations, a peace not artificially proclaimed but one based on true friendship between the nations We, the small nations, desire to live in friendship and mutual respect with the great United States and the mighty Russian Empire alike; in good neighbourly relations with Prague. Bucharest, Warsaw, and Belgrade. In this respect I must mention that every Hungarian has taken Austria to his heart for its brotherly understanding in our present suffering"

"That," Mr. Lodge added, "is what could, in all solemn truth, be called the spirit of peaceful co-existence, as uttered by Cardinal Mindszenty, in the best sense of the word—if Soviet hypocrisy had not robbed that phrase of all honest meaning.

Mr. Lodge continued. "A small group of Soviet men announced their own formation as a government at the moment that Soviet troops began their attack. We have seen no passage of governmental authority from one Hungarian Government to another, but the creation of a puppet clique and the overthrow of a liberal Socialist Government responsive to popular will in its desire to see these troops go Two hours after the attack began, the puppet group appealed to the Soviet Union to come to its assistance. It cannot be maintained, therefore, that the Soviet action is undertaken in response to any request for assistance. The 'assistance,' and I put that word in quotes, arrived long before the call

"We must take drastic and decisive action in this Assembly to answer the appeal of the Hungarian Government . . . We cannot stand idly by while the Hungarians are dragged bodily back into servitude even as they were re-emerging to independence and freedom. The principles set forth in the U.N. Charter are at stake . . If we fail to act, it will constitute a base betrayal of the people of Hungary who have appealed to us for aid."

Mr. Sobolev (U S S R.), after saying that Mr. Cabot Lodge had given "an entirely fallacious account of events," spoke as follows "Counter-revolutionary elements, taking advantage of the mistakes of the past and assuming the mask of freedom, attempted to delude the workers and drag them in their wake. They took up arms against the legitimate Government of Hungary and succeeded in deluding the workers by mendacious propaganda.

"The actions of the reactionary forces in Hungary were the result of long-standing subversive activities by the Western Powers, primarily the United States, against the people's democratic regime in Hungary. The U.S A. has adopted as one of its guiding principles a policy of gross intervention in the domestic affairs of the people's democracies and of inciting and financing counter-revolutionary elements, in order that they can carry out subversive activities against the Soviet Union and the people's democracies The actions of the reactionary forces in Hungary are the result of long-standing preparation by the imperialist countries With funds supplied by the imperialists, a slanderous campaign was launched and the reactionary underground was helped and encouraged in every way . . . Imre Nagy has shown himself the accomplice of the reactionary forces. .

"By foisting upon the General Assembly the discussion of the so-called Hungarian question, in violation of the U N Charter, the the United States, United Kingdom, and France are seeking to divert the attention of public opinion from the merciless suppression of peoples who are seeking democratic freedoms and independence in Algeria, Malaya, Cyprus, and other parts of Asia and Africa. Finally, the raising of the issue of the so-called situation in Hungary is designed as a smoke-screen behind which the armed aggression of France and Britain against Egypt could be concealed . . ."

Mr. Sobolev ended with an assurance that, after "establishing peace and order in Hungary," the Soviet and Hungarian Governments, together with the other participants in the Warsaw Pact, would enter into negotiations "with a view to discussing the question of the presence of Soviet troops in Hungary"

Among other speakers, **Mr. Lester Pearson** (Canada) said that the United Nations had "witnessed in Hungary one of the greatest betrayals in history." By its armed intervention and its "shameless disregard of its obligations under the Charter," the Soviet Union had not only killed Hungarians but had betrayed the principles and ideals of the United Nations.

"We have heard a great deal in recent days from the Soviet representative," Mr. Pearson added, "about the iniquities of aggression, the unpardonable sin of force by big countries against small countries. There is no need for me to dwell on the hypocrisy of Soviet concern for one small nation when its own tanks and bombers are compelling an even smaller nation, which has briefly but gloriously raised its head, to put on the chains again

"The Soviet representative made a parallel between the situation in Egypt and the situation in Hungary. I would reply that there is no parallel between the intentions of free democratic nations, with a long history of respect for the rights of other nations, with those of a dictatorial regime which has not shown the slightest understanding of international collaboration or consideration for the rights of others.

"The United Kingdom and France have stated firmly and publicly that they are prepared to hand over [in Egypt] to a United Nations force—a force we are now trying to organize. It is quite true that there remain differences between the British and French on the one hand, and a majority of the Assembly on the other, on the conditions in which this transfer can take place Nevertheless a transfer has been accepted as necessary and desirable, and a promise has been given that it will take place.

"Yesterday my Government proposed the intervention of a U N. Force for peaceful purposes in the Middle East. That proposal secured the overwhelming majority of this Assembly. No single vote was cast against it. Why should we not establish a U N mission or U.N. supervisory machinery of an appropriate kind for the situation in Hungary? . "

Second Emergency Session of General Assembly.

The General Assembly held a second emergency session on Hungary on Nov. 8-9, when three resolutions were presented: one submitted jointly by Italy, the Irish Republic, Pakistan, Cuba, and Peru; a second presented by the United States; and a third moved by Austria. Their provisions were as follows:

Five-Power Resolution.

"The General Assembly —

"Noting with deep concern that the provisions of its resolution of Nov. 4 have not yet been carried out, and that the violent repression by Soviet forces of the efforts of the Hungarian people to achieve freedom and independence continues,

"Considering that the events in Hungary clearly manifest the desire of the Hungarian people to exercise and enjoy fully their fundamental rights, freedom, and independence,

"Considering that foreign intervention in Hungary is an intolerable attempt to deny to the Hungarian people the exercise and enjoyment of such rights, freedom and independence, and in particular to deny to the Hungarian people the right to a government freely elected and representing its national aspirations;

"Considering that the repression undertaken by the Soviet forces in Hungary constitutes a violation of the U.N. Charter, of the Hungarian Peace Treaty, and of the Convention on Genocide,

"Considering that the immediate withdrawal of the Soviet forces from Hungarian territory is necessary;

(1) Calls again upon the U.S.S.R. to withdraw its forces from Hungary without any further delay;

(2) Considers that free elections should be held in Hungary under United Nations auspices, as soon as law and order have been restored, to enable the people of Hungary to determine for themselves the form of Government they wish to establish in their country,

(3) Reaffirms its request to the Secretary-General to continue to investigate, through representatives named by him, the situation caused by foreign intervention in Hungary, and to report at the earliest possible moment to the General Assembly;

(4) Requests the Secretary-General to report in the shortest possible time to the General Assembly on compliance."

U.S. Resolution.

"The General Assembly .—

"(A) Considering that the military authorities of the U S S.R. are interfering in the transportation and distribution of food and medical supplies urgently needed by the civilian population in Hungary;

(1) Calls upon the U.S.S.R. to cease immediately actions against the Hungarian population which are in violation of the principles of international law, justice, and morality;

(2) Calls upon the Hungarian authorities to facilitate, and the U.S.S.R. not to interfere with, the receipt and distribution of food and medical supplies to the Hungarian people, and to co-operate

fully with the U.N. and its specialized agencies, and other international organizations, such as the International Red Cross, to provide humanitarian assistance to the people of Hungary,

(3) Urges the U.S S.R. and the Hungarian authorities to co-operate fully with the Secretary-General and his duly appointed representatives for the carrying-out of the tasks referred to above.

" (B) Considering that, as a result of the harsh and repressive action of the Soviet armed forces, increasingly large numbers of refugees are being obliged to leave Hungary and seek asylum in neighbouring countries,

(1) Requests the Secretary-General to call upon the U.N. High Commissioner for Refugees to consult with other appropriate international agencies and interested Governments with a view to making speedy and effective arrangements for emergency assistance to refugees from Hungary;

(2) Urges member-States to make special contributions for this purpose."

Austrian Resolution.

" The General Assembly .—

" Considering the extreme suffering to which the Hungarian people is subjected;

" Urgently wishing to eliminate this suffering;

" Convinced that these humanitarian duties can be fulfilled most effectively through the international co-operation stipulated in the U.N. Charter;

" Resolves to undertake on a large scale immediate aid for the affected territories by furnishing medical supplies, foodstuffs, and clothing;

" Calls upon all member-States to participate to the greatest extent possible in this relief action;

" Requests the Secretary-General to undertake immediately the necessary measures,

" Urgently appeals to all countries concerned to give full assistance to the Secretary-General in the implementation of this task, to let all relief supplies pass without hindrance, and to give the persons and organizations entrusted with the implementation of this relief action free access to the affected areas."

During the Assembly's second emergency session the Soviet action in Hungary was denounced by delegates of over 30 countries, including some of the Asian nations—Burma, Siam, Laos, the Philippines, and Nationalist China. The great majority of the Afro-Asian countries, however—including India and all the Arab States—made no condemnation of the Soviet repression in Hungary. The only direct support for the Soviet Union came from the other countries of the Communist bloc, though reservations were made by Poland and, in particular, by Yugoslavia.

Mr. Michalowski (Poland) said that his country supported the right of all nations to solve their own problems and have governments of their own choosing He believed, however, that the U.N. should not interfere in the settlement of the Hungarian situation by direct negotiations between the Soviet and Hungarian Governments. Although Poland had voted against the U S. resolution of Nov. 4, she would have supported certain parts of it had it been put to a paragraph-by-paragraph vote

Mr. Brilej (Yugoslavia) said that " the less interference there is in Hungary's internal affairs, from whatever source, the better it will be for the Hungarian people and for the peace of the world." Referring to the " involvement of Soviet troops in the internal affairs of Hungary," he declared · " There can be no doubt where my Government stands We have always opposed the intervention of foreign armed forces in the internal affairs of any country . . . We hope . . . that the Soviet troops will be withdrawn." Like the Polish delegate, he would have supported parts of the U.S resolution had it been voted upon paragraph by paragraph.

Dr. Janos Szabo (Hungary) protested " on behalf of his Government " [i.e. the Kadar regime] at the Assembly's decision on Hungary, as the situation there was solely an " internal matter." He said that Mr. Nagy's appeal to the United Nations and the Secretary-General had been " declared invalid by the new Government headed by Premier Kadar and therefore cannot be considered official."

Dr. Nuñez-Portuondo (Cuba) said that the Assembly had witnessed " a spectacle that cannot be described in any language—a man comes to the rostrum to give his blessing to the murder of thousands of his fellow-countrymen." The massacre of tens of thousands of Hungarians by Soviet troops was a flagrant violation of the United Nations Convention on Genocide, to which the U S S R. was a signatory with 53 other countries " The action taken by the Soviet Army," the Cuban delegate declared, " was directed not only against Hungarian troops but against doctors, nurses, and other civilians . . Soviet barbarism has no parallel in modern times " Among other Latin American delegates, **Señor Olivieri** (Argentina) said that his Government would propose that all U.N. members should break off diplomatic relations with the U S S.R. if it continued to defy the General Assembly's resolution of Nov 4.

Mr. Frederick Boland (Irish Republic) said that any mention by Soviet spokesmen in future of " self-determination " or " national independence " or " anti-colonialism " would evoke only one word in reply—Hungary.

Dr. Tsiang (Nationalist China) deplored the fact that 15 Asian and African nations had refused to condemn Soviet aggression in Hungary, though condemning Anglo-French aggression in Egypt. He asked whether those countries believed that the principles of the U.N. Charter " apply only to Asia and Africa."

Sir Pierson Dixon (U.K.) refuted the suggestion that the Soviet action in Hungary had been prompted by the disruption of peace in the Middle East, declaring in this connexion " In Hungary, the situation which has come into being stems from Hungary's incorporation into the Soviet Empire after the Second World War In the Middle East, the problems of these last weeks stem from the ambitions of the Soviet Union to extend its influence in that area also. These Russian ambitions go back a long time—back to the days of the Tsarist regime."

Mr. Cabot Lodge (U S.A) said that the world had witnessed the " sickening spectacle " of the Hungarian people fighting for their liberty " with small arms, pitchforks and bare hands against massive formations of Soviet tanks," and the " revolting sight of Soviet tanks firing at a literally unarmed population." In particular, he denounced the " hideous callousness " of the Soviet forces in interfering with food and medical aid for the Hungarian civilian population, preventing the carrying-out of legitimate Red Cross activities, setting hospitals ablaze, and attacking Red Cross units engaged on errands of mercy. He called upon the Assembly to demand that the U.S.S.R. should immediately cease its repression of the Hungarian people, withdraw its troops without delay, and allow food and medical supplies to be sent into Hungary without interference.

Mr. Kuznetsov (U S.S R) delivered a violent attack on America, Britain, France, and " those countries which do the dirty work of the United States " He described the Assembly's debate on Hungary as " interference in the internal affairs of a sovereign State " and therefore " illegal " ; said that the " fascists and reactionaries " in Hungary had failed to overcome the " progressive forces " ; and accused the Western Powers of desiring to restore in Hungary the " former regime of landlords and capitalists." Mr. Kuznetsov denounced the U.S. resolution as a " manoeuvre " which was aimed at " diverting world attention from the aggression by Britain, France and Israel against Egypt, abetted by the U.S.A." He also attacked the five-Power resolution on the ground that it " denied the right of the Hungarian people to hold free elections without outside interference "

Mr. Krishna Menon (India) similarly opposed the holding of elections in Hungary under U N. auspices, declaring that " we cannot say that a sovereign member of this Assembly can be called upon to submit its elections to the United Nations without its agreement." Moreover, the Indian delegation could " not subscribe to any phraseology or proposals before the Assembly which disregard the sovereignty of States represented here " He added that the Indian Government had been " informed that Soviet troops are to be withdrawn from Budapest in agreement with the Hungarian Government as soon as order is restored."

All three resolutions were adopted by the Assembly on Nov. 9—the five-Power resolution by 48 votes against 11, with 16 abstentions; the U.S. resolution by 53 votes against 9, with 13 abstentions; and the Austrian resolution by 68 votes to nil, with 7 abstentions.

The 11 countries voting against the five-Power resolution comprised the nine Communist-bloc countries (Albania, Bulgaria, Byelorussia, Czechoslovakia, Hungary, Poland, Rumania, Ukraine, and U S S.R), together with India and Yugoslavia The 16 abstaining countries comprised 13 from the Afro-Asian bloc (Afghanistan, Burma, Cambodia, Ceylon, Egypt, Indonesia, Jordan, Lebanon, Libya, Nepal, Saudi Arabia, Syria, and Yemen), together with Austria, Finland, and Haiti.

The opposing votes on the U.S. resolution were cast by the above-mentioned nine countries of the Communist bloc. The 13 abstentions comprised 12 countries of the Afro-Asian bloc (Afghanistan, Burma, Cambodia, Ceylon, Egypt, India, Indonesia, Jordan, Lebanon, Saudi Arabia, Syria, and Yemen), together with Yugoslavia.

The seven countries abstaining on the Austrian resolution were Albania, Byelorussia, Bulgaria, Czechoslovakia, Rumania, Ukraine, and U.S.S.R —all of the Communist bloc.

On Nov. 10 the emergency session agreed that both the Hungarian and Middle East questions should be transferred as " matters of priority " to the agenda of the regular (eleventh) session of the General Assembly, which opened in New York the same day.

Kadar Government's Refusal to permit U.N. Observers to enter Hungary. - Investigating Group set up by U.N. Secretary-General.

On Nov. 11 Dr. Hammarskjöld released the texts of (1) a message sent by him to Mr. Kadar's Government on Nov. 8 in connexion with the resolution of Nov. 4 adopted by the General Assembly; (2) an *aide-mémoire* sent by him to the Hungarian Government on Nov. 10; and (3) a message sent by him to the Soviet Government on the same date.

Message to Hungarian Government. In his communication of Nov. 8, the U.N. Secretary-General asked the Kadar Government whether, in conformity with the General Assembly's resolution of Nov. 4, it was willing " to permit observers designated by me to enter the territory of Hungary for the purpose prescribed [in the

resolution], to travel freely within Hungary, and to report to me on their findings." After requesting an early reply, Dr. Hammarskjold announced (1) that he intended "to proceed with the selection of observers on the assumption that the Government of Hungary will meet the request of the General Assembly"; and (2) that he would also take steps "to investigate the situation caused by foreign intervention in Hungary," as the General Assembly had requested him to do.

Aide-Memoire to Hungarian Government. In his *aide-memoire* of Nov. 10, Dr. Hammarskjold noted with disappointment that he had received no reply from the Hungarian Government, "although the situation is one of urgency." He asked for a reply "without further delay."

Message to Soviet Government. Apart from his two messages to the Hungarian Government, the Secretary-General also asked the Soviet Government, in conformity with the General Assembly's resolutions of Nov. 4 and Nov. 9, "to support my demand to the Government of Hungary for permission for observers to enter the territory of Hungary, travel freely therein, and report their findings to me." Dr Hammarskjöld said that he felt entitled "to count on the assistance of the Government of the U.S.S.R." in this matter.

In a message to the Secretary-General on Nov. 12, the Kadar Government refused to allow U.N. observers to enter Hungary on the grounds (1) that "the situation in Hungary falls exclusively within the internal legal competence of the Hungarian State"; and (2) that the General Assembly's resolutions "constitute an interference in Hungarian internal affairs." It agreed, however, to "facilitate by every means the receipt of food and medicine sent for the Hungarian people," and expressed its willingness to co-operate with the United Nations and the International Red Cross in relief work.

The Soviet delegation at the U.N. also sent a message to the Secretary-General saying that the despatch of U.N. observers to Hungary was "a matter falling exclusively within the jurisdiction of the Government of the Hungarian People's Republic."

The Hungarian Note said that "in past weeks mass demonstrations took place in Hungary, the democratic and patriotic demands of which have been accepted by the Revolutionary Workers' and Peasants' Government [i.e. the Kadar regime] as its own." It continued: "The participants in these demonstrations included organized Fascist elements and, later, ordinary criminals who escaped from prison. These persons gradually took the lead and murdered hundreds of progressive-minded people . . . In the serious situation that arose the Revolutionary Workers' and Peasants' Government could restore law and order only by requesting the aid of Soviet troops. After the complete restoration of order, the Hungarian Government will begin negotiations with the Soviet Government for the withdrawal of these troops from Hungary."

The Note went on to say (1) that the Hungarian and Soviet Governments were "exclusively competent" to negotiate on the withdrawal of Soviet troops, "which are here only for the purpose of restoring law and order and which do not take any measures against the population contrary to international law and the principles of humanity"; (2) that as the Soviet troops were in Hungary "at the request of the Hungarian Government," the despatch of U.N. observers to Hungary was "not warranted"; (3) that the holding of elections in Hungary was "entirely within the competence of the Hungarian authorities."

On Nov. 13, however, the Hungarian Government sent a second message to Dr. Hammarskjold saying that it "valued very highly" the offer of U.N. relief aid, and offering "to conduct talks on the best means of providing the assistance required, as well as how representatives appointed by the Secretary-General may participate in organizing assistance on the spot." In reply (Nov. 14), Dr. Hammarskjold informed the Hungarian Government of his satisfaction at its willingness to co-operate with U.N. agencies "for the humanitarian ends to which these [U.N.] resolutions are directed," but expressed disappointment at its refusal to allow U.N. observers to enter Hungary. He asked the Hungarian Government "to reconsider its decision in the light of the opposite view so widely expressed in the General Assembly and reflected in the vote," and to "co-operate in the clarification of a situation which has given rise to such concern in the General Assembly."

Dr. Hammarskjöld received a further message from the Hungarian Government on Nov. 16 stating that "representatives of the Hungarian People's Republic would be glad to meet you in Rome . . . to discuss the aid to Hungary proposed by you and to exchange views on the U.N. resolutions concerning Hungary." The Secretary-General had previously expressed his willingness to go personally to Budapest for discussions with the Hungarian Government.

It was announced at U.N. Headquarters on Nov. 16 that the Secretary-General had set up a three-man committee "to investigate the situation caused by foreign intervention in Hungary" and to report to the General Assembly. It consisted of Dr. Alberto Lleras (Colombia), formerly Secretary-General of the Organization of American States; Judge Oscar Gundersen, of the Norwegian Supreme Court; and Mr. Arthur Lall, of India.

International Reactions to Events in Hungary.

The suppression of the Hungarian people's uprising by the Soviet Army evoked intense indignation throughout the entire Western world and led to mass resignations from the Communist parties in Britain, France, Italy, and other countries. The Soviet action in Hungary was also denounced in a number of Asian countries, notably in Turkey, Pakistan, and Indonesia. International reactions are summarized below under cross-headings.

Great Britain.

A statement issued on Oct. 28 from 10, Downing Street, said that H.M. Government had followed "with sympathy and admiration the struggle of the Hungarian people for their rights and freedom," and was making an immediate donation of £25,000 to the International Red Cross to help relieve the suffering and distress in Hungary.

Labour Party. A deputation from the National Council of Labour, headed by Mr. Gaitskell and including Mr Morgan Phillips (secretary of the Labour Party) and Sir Vincent Tewson (general secretary of the T.U.C.), called at the Soviet Embassy on Nov. 9 and presented to the Ambassador (Mr. Malik) a statement calling upon the Soviet Government "instantly to abandon its policy of aggression and bloodshed in Hungary."

After declaring that the events in Hungary "mark a return to the worst practices of the Stalinist period," the statement added: "As a pretext for brutal repression, the Soviet Government has cited the need to subdue 'Fascists' and 'landlords' But the unity and gallantry displayed by the Hungarian people in the face of overwhelming odds, the leading part played in their struggle for freedom by students and workers, and the pathetic evidence of the refugees streaming across the Austrian borders, makes nonsense of this odious pretence . . ."

Mr. Malik, in reply, said that the Labour Party had "misinterpreted" the events in Hungary, which had been caused by "fascists" and "reactionaries" Mr. Gaitskell later described the Ambassador's remarks as "an obvious piece of Soviet propaganda."

Liberal Party. The Liberal Party Committee, meeting on Nov 6, expressed its "horror at the Russian military action in Hungary" and its "contempt for the hypocrisy of the letter sent by Marshal Bulganin" to the Prime Minister [see page 15218]. It urged the Government to call for immediate diplomatic and economic sanctions against the Soviet Union unless she obeyed the U.N. resolutions calling on her to cease the repression of the Hungarian people and to withdraw her troops from Hungary immediately.

Trade Unions. The T.U.C. launched a "Help for Hungarian Workers" Fund on Oct. 30, and appealed for support to all affiliated unions, trade councils, and individual members A sum of £10,000 was voted by the General Council as a first contribution to the Fund, and considerable sums—including £1,000 from the National Union of Railwaymen—were donated by individual unions.

The executive of the National Union of Mineworkers, by an overwhelming majority, passed a resolution on Nov. 22 condemning "the cruel and criminal aggression" carried out in Hungary by the Soviet Government A letter was sent to the Soviet miners' union emphasizing that the Soviet action had rendered "confidence between our two unions very much less likely than might have been the case but for the terrible events in Hungary, where the workers have risen against their oppressors." The letter paid tribute to the heroic resistance of the Hungarian coal-miners and uranium-miners in fighting for their liberty against Soviet tanks and guns, and denounced the "brutal slaughter" by Soviet troops of men and women who desired only to be free.

Similar resolutions expressing support for the Hungarian workers and abhorrence at the Soviet brutalities were passed by many other unions. The Liverpool dockers refused to unload the Russian cargo ship *Ryazan*, which was forced to return to Riga with her cargo of rubber

The Nottinghamshire area council of the N.U.M (representing 47,000 miners in 40 pits) decided on Nov. 17 that Communists would no longer be eligible for full-time union posts, including those of president, general secretary, and financial secretary. The area secretary said that this action had been taken because "men who are prepared to support Soviet atrocities in Hungary are not fit to hold key positions in industry." On the previous day the Lancashire, Cheshire, and Westmorland branch of the Fire Brigades Union had decided that no past or present member of the Communist party should hold office in the union.

The T.U.C. General Council decided on Nov. 28 to advise its 190 affiliated unions to abandon any plans they might have made for members to visit the Soviet Union.

Resignations from Communist Party and "Daily Worker" Staff. A number of prominent British Communists resigned from the party in protest against the Soviet action in Hungary, among them many leading officials of the Electrical Trades Union (E.T.U.) and the Fire Brigades Union (F.B.U.)—two unions in which Communist influence had been particularly strong

The resignations included those of Mr. John Horner, general secretary of the F.B.U. and a party member of many years' standing, Mr. Alex Moffat, a party member for 32 years and brother of Mr. Abe Moffat, the Communist president of the Scottish area of the N.U.M.; Mr. Leslie Cannon, chief education officer of the E.T.U.; Mr. A. A.

Wallis, secretary of the East and West Ridings area of the E.T.U.; Mr. Jack Grahl, assistant secretary of the F.B.U , Mr. Leo Keely, North Midlands area officer of the F.B.U.; Mr. R. Gunter, Mr. T. Parry, and Mr. C. Sampson, members of the F.B U. executive; Mr. Kilburn, Birmingham district secretary of the F.B.U , and Mr. E. Thompson and Mr J. Saville, lecturers at the Universities of Leeds and Hull respectively. Mr. Thompson and Mr. Saville had been joint editors of *The Reasoner*, an unofficial Communist publication which had been suspended by the Communist party after three issues.

Mr Horner, in his letter of resignation to Mr John Gollan (secretary of the Communist Party), recalled that he had visited Hungary twice in recent years and said that he felt responsible "for propagating and advancing policies which have led to this latest tragedy." Mr. Alex Moffat said that he had found himself "so much in conflict with the policy, attitude, and tactics of the leadership that I find it impossible to continue membership of the party." Mr. Wallis said that the "brutal" Russian actions in Hungary made it impossible for him to remain a party member, Mr. Cannon, Mr Grahl, and Mr. Keely issued a joint statement urging the dissolution of the Communist party and declaring that the only way to Socialism in Britain was through the Labour Party, and Mr. Thompson and Mr. Saville issued a joint statement saying that they had resigned because the Communist party had suspended *The Reasoner* because of an editorial article condemning the Soviet action in Hungary.

Several members of the staff of the *Daily Worker* also resigned from the Communist Party and severed their connexion with the paper in protest at its attitude to Hungary. [The *Daily Worker*, following the "Moscow line," had attributed responsibility for the events in Hungary to "counter-revolutionaries," "fascists" "reactionaries," etc.] They included the paper's cartoonist, "Gabriel" (Mr. J. Friel), and its film critic, Mr. Patrick Goldring.

Mr. Peter Fryer, special correspondent of the *Daily Worker* in Budapest, also resigned from the paper (but not from the Communist party) after it had refused to publish his dispatches from the Hungarian capital Before Mr. Fryer was sent to Hungary, the editor of the *Daily Worker* (Mr J. R. Campbell) had written an article saying that the paper was interested only in facts and was therefore sending Mr Fryer, an "experienced and skilled reporter" with special qualifications, "to cover the Hungarian story" The following letter—the text of which was published in the *Manchester Guardian*—was sent to Mr. Campbell by Mr. Fryer on Nov 5:

"As special correspondent of the *Daily Worker* in Budapest I filed three dispatches to my paper. Two of them . . . were not used The other . . . was severely cut. The editor would not even allow the staff of the paper to read the story I sent on arrival in Vienna from Budapest For almost nine years I was proud to work for the *Daily Worker*. But no journalist can continue to work for a newspaper which sends him on a major foreign assignment and refuses to use what he writes. I am therefore compelled to resign from the *Daily Worker* and to seek other means of putting the truth about events in Hungary before British Communists and Socialists.

"This was my fourth visit to Hungary since 1949. I spent over a fortnight there and I am convinced that Soviet intervention was both criminal and unnecessary . . Nor did the Soviet troops which entered Budapest fight Fascists; they fought workers, soldiers, and students and they could find no Hungarians to fight alongside them . . . No honest Communist can now ignore the truth about Hungary The Hungarian people were the victims of tyranny and oppression masquerading as Socialism. A corrupted Communist party, swollen by an influx of careerists; a highly paid secret police which jailed, tortured, and murdered dissenters, a State machine warped by bureaucracy: these were the means by which the worst features of Soviet society were imposed on Hungary. Yet the whole police dictatorship was so rotten and so universally detested that it collapsed like a house of cards the instant the people rose to their feet. Most of the revolutionaries—Communists and non-Communists—hoped to win an independent, democratic, and genuinely Socialist Hungary But their hopes were crushed by Soviet intervention.

"In Vienna I was offered £1,000 on behalf of an American newspaper chain if I would write for them on Hungary as a renegade. I answered that I had no intention of resigning from the Communist party. I will fight inside the party for a return to Socialist principles, for political honesty, and for real international solidarity. These imply as outspoken a condemnation of crimes committed by those who call themselves Communists as of crimes committed by imperialism . . . "

The executive committee of the British Communist Party decided on Nov. 10-11 to convene a special congress in 1957 to discuss "tendencies" which could "weaken the party's organizational principles." Mr. Gollan, after an apologia for the Soviet action in Hungary, appealed for "unity" and "discipline" among party members, admitting that there were "acute differences" over the events in Hungary The party's Political Committee issued a statement on Nov. 15 denouncing "fascist and counter-revolutionary elements inside and outside Hungary," claiming that the "great majority" of party members were "standing firm," and declaring that "those who have resigned are profoundly mistaken . . . and . . . will deeply regret that they took this step."

On Nov. 29 the Communist party suspended Mr Peter Fryer from party membership for three months "for publishing attacks on the Communist party in the capitalist Press." It also threatened to take "further action" against Mr. Fryer if he "should resort to the capitalist Press or a capitalist publication to carry forward his attacks on the party."

Student Demonstrations. Strong support for the Hungarian people was expressed by the student bodies of all British universities, several large-scale anti-Communist demonstrations taking place in London. A petition signed by 27,000 members of the London University Students' Union, protesting at the Soviet military action in Hungary and calling for the immediate withdrawal of Soviet troops, was presented at the Soviet Embassy on Nov. 9; mounted police were called in to prevent students from breaking into the building. On Nov. 11, after a meeting in Hyde Park at which students from London, Leeds and Nottingham Universities passed resolutions condemning "Russian atrocities and treachery" in Hungary, large crowds of student demonstrators smashed the windows of the Communist Party headquarters in King Street, shouting slogans such as "Down with Communism," "Burn the *Daily Worker*," and "Freedom for Hungary"

The Communist Club at Oxford University dissolved itself on Nov. 9, declaring that the Communist Party was "completely discredited" and that "the sooner it gets out of British politics the better."

Archbishop of Canterbury's Denunciation of Soviet Government. Speaking at a mass meeting at the Albert Hall (London) on Nov. 28 in support of Hungary, the Archbishop of Canterbury (Dr. Fisher) denounced the present leaders of the U.S.S.R. as "the instruments and slaves of the Devil" and described the Soviet Government as "the universal enemy of mankind." "We stand amazed," Dr. Fisher declared, "before an act altogether evil . . . Because the rulers of Russia have expelled God from their belief, they are able in this day and age to violate and outrage not only all the laws of God but all the hopes and aspirations of the human spirit. Having left themselves nothing to worship but themselves, they have become to a unique degree the instruments and slaves of the Devil. . In this day of Hungary's crucifixion we can see through the darkness signs to sustain our faith. Hungary's sufferings even now are not in vain. The Soviet Government is known throughout the world as never before to be the universal enemy of mankind . . "

United States.

In his broadcast of Oct. 31 in which he criticized the Anglo-French intervention in Egypt (see page 15210), President Eisenhower also referred to the situation in Hungary as follows:

"After World War II the Soviet Union used military force to impose on the nations of Eastern Europe governments of Soviet choice—servants of Moscow It has been consistent U.S. policy to seek to end this situation. We have sought to fulfil the wartime pledge that these countries should once again know sovereignty and self-government.

"We could not, of course, carry out this policy by resort to force. This would have been contrary both to the best interests of the East European peoples and to the principles of the United Nations. But we did help to keep alive the hope of these peoples for freedom . . .

"Recently, the will of these peoples for national independence has become more and more insistent A few days ago the people of Poland, with their proud and deathless devotion to freedom, moved to secure a peaceful transition to a new Government. This Government, it seems, will strive genuinely to serve the Polish people. More recently, all the world has been watching dramatic events in Hungary, where this brave people, as so often in the past, have offered their very lives for independence from foreign masters.

"We cannot yet know if these avowed purposes will be truly carried out But two things are clear. First, the fervour and sacrifice of the peoples of these countries, in the name of freedom, have brought real promise that the light of liberty will soon shine again in the darkness Second, if the Soviet Union indeed faithfully acts upon its announced intention [i.e. to withdraw its troops] the world will witness the greatest forward stride toward justice, trust and understanding among nations in our generation . . .

"Only yesterday, the Soviet Union issued an important statement on its relations with the countries of Eastern Europe [see page 15191, second column]. This statement recognized the need for a review of Soviet policies, and the amendment of these policies to meet the demands of the people for greater national independence and personal freedom. The Soviet Union declared its readiness to consider the withdrawal of Soviet advisers who have been the effective ruling force in Soviet-occupied countries; and also to consider the withdrawal of Soviet forces from Poland, Hungary, and Rumania.

"The U.S A. has made clear its readiness to assist economically the new and independent governments of these countries. We have already been in contact with the new Polish Government on this matter. We have also publicly declared that we do not demand of these governments their adoption of any particular form of society as a condition for economic assistance. Our one concern is that they should be free—for their sake, and for freedom's sake.

"We have also—with respect to the Soviet Union—sought to remove any false fears that we would look upon new governments in these Eastern European countries as potential military allies. We have no such ulterior purpose. We see these people as friends, and we wish simply that they should be friends who are free."

The President's broadcast was made four days before the Soviet attack on Budapest and the subsequent suppression of the Hungarian freedom movement. In a statement on Nov. 8, President Eisenhower denounced "the brutal purge of liberty conducted by imperialist Communism"; declared that the heroic struggle of the Hungarian people to win liberty for themselves and their children would be "long and sorrowfully

remembered" by all Americans; and announced that 5,000 Hungarian refugees would be admitted to the U.S.A. as an "extraordinary measure" without regard to existing immigration legislation. The President had previously offered $20,000,000 worth of food and medical supplies to relieve suffering in Hungary.

Demonstrations in support of Hungary included a mass meeting at Madison Square Garden (New York) on Nov. 8, attended by 10,000 people and addressed by Miss Anna Kethly (the Hungarian Socialist leader, and a member of M. Nagy's Government before its overthrow) and Governor Averell Harriman. Messages of support were sent by President Eisenhower, ex-President Hoover, and Mayor Wagner of New York.

Western Europe.

Reactions in the Western European countries are summarized below:

France. After a ceremony on Nov. 7 at the Arc de Triomphe in Paris, where 10,000 people paid homage to the victims of Soviet tyranny in Hungary, great crowds of demonstrators attacked the headquarters of the French Communist Party, broke into the building, set fire to the premises, and hurled furniture, office equipment, and documents into the street. Order was eventually restored by the police, and the flames put out by the fire brigade Student demonstrators also attacked the offices of *Humanité* (the Communist organ), smashed the windows, but were prevented by the police from breaking into the building.

Further disturbances occurred on the following day, when an attempted Communist demonstration near the Place de la République was broken up by counter-demonstrators Many people were injured in fierce street fighting (two subsequently dying from their injuries), the police using batons and tear-gas to restore order.

In the Provinces, Communist party offices were sacked in Marseilles, Strasbourg, Alençon, and other centres; 50 people were injured in a pitched battle at Nice between Communists and anti-Communists; and local Communist leaders at Bastia (Corsica) were besieged for hours in their headquarters before being rescued by the police from hostile crowds. Mass resignations from the French Communist Party were reported in many parts of the country.

The Soviet repression in Hungary was denounced by many writers, artists, professors, and other intellectuals, a number of whom had maintained friendly relations with the Communist Party in the past. They included M. Jean-Paul Sartre, the existentialist philosopher, who announced that he was breaking off all relations with Soviet writers and with French Communists in protest against Soviet brutalities in Hungary. M. Sartre also resigned from the Franco-Soviet Friendship Society, describing the present Soviet Government as "going further than Stalinism after having denounced it."

Amidst constant interruptions and jeers from the Communist deputies, the President of the French National Assembly (M. Le Troquer) paid tribute on Nov. 6 to "the Hungarian workers, peasants, students and patriots who died in defence of liberty" At the request of M. Le Troquer, all deputies (except the Communists) stood in silence for one minute as a tribute to those who had fallen. Violent altercations between Communist and anti-Communist deputies later led to the suspension of the sitting.

Italy. As in France and Britain, large numbers of Communists resigned from the party in protest against the Soviet action in Hungary. Anti-Communist demonstrations took place in many Italian cities, all Communist offices in Rome and other centres being guarded by strong forces of police to prevent incidents On Nov. 11 a bomb was thrown into the garden of the Soviet Embassy in Rome, causing no casualties and no damage apart from broken windows.

The Italian Chamber of Deputies, like the French National Assembly, observed a one-minute silence on Nov. 6 in memory of the Hungarian patriots—the Communists remaining seated. Signor Nenni, the leader of the Left-wing Socialists, paid tribute with other members of his party, having previously issued a statement denouncing the Soviet repression in Hungary and referring to the "deep disagreement" between himself and the Italian Communist Party on this issue. Signor Nenni (who had collaborated closely with the Communists for many years) had earlier announced that he was giving his Stalin Prize, amounting to 16,000,000 lire (£9,600), to Hungarian refugee families

Switzerland. The Swiss Federal Council issued the following statement after an emergency session on Nov. 4 "The Federal Council has been shocked by the events in Hungary. It knows it is representing the sentiments of the Swiss people when it expresses sadness at the suppression of the independence, liberty, and self-determination of the Hungarian people These events show that those principles of international law and international morality which have been recognized by the U.N. Charter and other inter-State treaties are being violated, and that right is once more being suppressed by might . ."

Nation-wide anger and indignation at the Soviet brutalities in Hungary, and in particular at the deportations, was expressed in a three-minute silence observed throughout Switzerland on Nov. 20. Earlier, large protest demonstrations took place in many Swiss cities on Nov. 5-7, thousands of signatures were affixed to petitions calling for the breaking-off of diplomatic relations with the U.S.S.R.; and the University of Zürich severed all cultural and scientific contacts with Soviet academic institutions on Nov. 8. The Swiss Trade Union Federation, on Oct. 30, rejected an invitation by the All-Union Council of Soviet Trade Unions proposing the visit of a Swiss trade union delegation to the Soviet Union. In its reply, the Swiss Federation said that "the bloody intervention by Soviet troops against the Hungarian people fighting for their liberty and human dignity has unmasked the true nature of the hypocritical Soviet statements on 'peaceful co-existence'"

Hundreds of demonstrators broke into the grounds of the Soviet Embassy in Berne on Nov. 5, burned the Soviet flag, and hoisted the Hungarian flag The police used tear-gas to restore order

Leading members of the Swiss Communist Party (the Party of Labour) resigned from the party in protest at its support for Soviet intervention in Hungary They included the former president of the Communist youth organization, and several Communist members of the Cantonal Assemblies of Zurich and Basle.

Western Germany. Mass demonstrations in support of the Hungarian people were held on Nov. 5-6 in Bonn, Hamburg, Cologne, and other West German cities, and also in West Berlin. Flags were flown at half-mast on all Government buildings in honour of the Hungarian patriots, and the 6,000,000 members of the West German Trade Union Federation observed a three-minute silence The Soviet Embassy in Bonn was stoned by student demonstrators

In West Berlin over 100,000 people—many from the Soviet sector of the city—demonstrated before the City Hall on Nov 5 in support of Hungary Some 3,000 Berlin students marched to the Soviet war memorial in the British sector of the city, broke through police cordons, and laid a wreath in the Hungarian national colours. The Communist authorities in East Berlin sent strong reinforcements of "People's Police" to the border between the eastern and western sectors of the city, but no incidents occurred

Netherlands. A three-minute silence was observed throughout the Netherlands on Nov 8, all work in offices, shops and factories being stopped and all transport coming to a standstill. All parties in the States-General—except the Communists—expressed their abhorrence of the Soviet Government's action in Hungary. Among nation-wide manifestations of support for the Hungarian people, some 60,000 Roman Catholics marched in silent prayer through Amsterdam, the dockers at Rotterdam refused to unload Soviet ships in the harbour; and angry crowds stoned the Soviet Embassy in The Hague and the Soviet commercial mission in Amsterdam. Other demonstrators wrecked the offices of the Dutch Communist newspaper.

Belgium. The Foreign Minister (M. Spaak) sent a letter to Mr. Shepilov on Nov. 7 emphasizing that the Belgian people were deeply moved by the fate of the Hungarian people, and calling upon the Soviet Government to end its intervention in Hungary and permit the Hungarian people to choose their own regime Anti-Russian demonstrations occurred in different parts of Belgium, a nation-wide five-minute silence being observed on Nov 7 in memory of the Hungarian freedom fighters

Luxemburg. Some 2,000 students forced their way into the Soviet Embassy in Luxemburg on Nov. 6 and broke up a party celebrating the 39th anniversary of the Russian Revolution. While the Soviet Ambassador fled to the cellar and locked himself in, the demonstrators set fire to the premises with torches, smashed furniture, threw it out of the windows, and burned it in the garden outside Many students were injured in clashes with the police before order was restored.

Scandinavian Countries. Mass protest demonstrations took place during the first week of November outside the Soviet Embassies in Oslo, Stockholm, and Copenhagen, leading to several clashes with the police A home-made bomb was thrown at the Soviet Embassy in Copenhagen, causing no damage or casualties.

Iceland. Hundreds of student demonstrators stoned the Soviet Legation in Reykjavik on Nov. 8 and tore down the Red Flag. Soviet officials who tried to argue with the crowds were pelted with mud.

Portugal. Large crowds demonstrated against the Soviet Union in Lisbon, Oporto, and other Portuguese cities The Portuguese Government expressed its condemnation of Soviet aggression in Hungary, while the Cardinal Patriarch of Lisbon appealed for prayers for the Hungarian people.

Other Countries.

Reactions in other countries are summarized below.

Turkey. The Soviet action in Hungary was strongly condemned by the Turkish Press, the following extract from *Cumhuriyet* (one of Turkey's leading newspapers) being typical of many press comments: "The bloody tragedy that has been enacted on Hungarian soil has finally revealed the true face of the Soviet Union—a face which up to now has been masked by the Russian claim to be the protector of small nations . . . The Budapest events prove that the people who condemned Stalin's tyranny possess the ability to apply the same principles with even greater thoroughness and cruelty"

Pakistan. Sympathy with the Hungarian people was also expressed by the Pakistani press and by leading personalities The Prime Minister, Mr. Suhrawardy, appealed to Marshal Bulganin on Nov. 5 to desist from the use of force in Hungary and to allow the Hungarian people to "decide for themselves, without coercion, the form of government they wish to establish in their country."

Pakistan was a co-sponsor (with Italy, the Irish Republic, Peru, and Cuba) of the resolution, adopted by the special emergency session of the General Assembly, calling for the immediate withdrawal of Soviet troops from Hungary, the entry of U.N. observers, and the holding of free elections under U.N. auspices [see above].

Indonesia. The Indonesian Government issued a statement on Nov. 9 which (1) regretted the "involvement of Russian troops" in Hungary; (2) declared that the presence of Soviet forces in Hungary was not in accordance with the spirit and principles of the Bandung Conference, (3) pointed out that the Hungarian people were unable in present circumstances to choose their form of government freely; and (4) expressed the 'earnest hope" that "every opportunity may be given to the people of Hungary to determine the nature and structure of their own national Government"

Indonesian political leaders of all parties denounced the Soviet aggression in Hungary in as strong terms as those used to condemn the Anglo-French intervention in Egypt. Mr. Natsir, chairman of the Masjumi (Moslem) party, declared that Indonesia must stand firmly behind Hungary if she wished to pursue a truly independent foreign policy; Mr. Sutomo, chairman of the Indonesian People's Party, and a leader of the Indonesian national struggle for independence, accused Russia of committing aggression against Hungary and violating the U.N. Charter, and Mr Hamid Alfagri, a leader of the P.S I. (Socialist Party), said that Soviet Communism had "clearly shown its colonial characteristics"

Soviet Union. Denunciations of the Hungarian freedom fighters as "counter-revolutionaries," "reactionaries" and "fascists" were accompanied by bitter attacks on America, Britain and France in the Soviet press and radio Moscow broadcasts accused the intelligence services of the Western Powers, and particularly of the U.S A., of being behind the "revolt against the Hungarian People's Government," and denounced the U S. Congress and Radio Free Europe for inciting "subversive activities against the Socialist countries."

Diplomatic representatives of all the NATO Powers and of Israel walked out of a Kremlin reception on Nov. 17 after Mr. Khrushchev had violently attacked the Western Powers and Israel They also walked out of a Polish Embassy reception on Nov. 18 when Mr Khrushchev spoke in similar terms In the course of his remarks Mr. Khrushchev denounced the "piratical attacks" against Egypt by Britain and France and "their puppet Israel", said that "fascist bands" were making "furious attacks on Communists and other progressives" in France, Italy, and other Western countries; and declared that the "counter-revolution" in Hungary had been "shattered." Addressing the Western representatives directly as "the capitalists and their representatives," Mr. Khrushchev said: "It does not depend on you whether we continue to exist If you do not like us, do not accept our invitations and do not invite us to visit you. History is on our side whether you like it or not—we will bury you." Press correspondents reported that President Voroshilov, Mr. Mikoyan, and other Soviet leaders present had been greatly embarrassed at Mr Khrushchev's outbursts and had unsuccessfully tried to restrain him

Communist China. The official Chinese Communist organ supported the Soviet action in Hungary as "entirely just," declaring that Soviet troops had entered Hungary "to restore order at the request of the Hungarian Government and in accordance with the genuine desire of the Hungarian people."

Czechoslovakia. A similar pro-Moscow line was followed in Czechoslovakia, where declarations of support for the Kadar regime in Hungary were accompanied by fulsome adulations of the Soviet Union in *Rude Pravo* (the Communist organ) and by Prague Radio. In a speech in Prague on Nov. 7, the Prime Minister (Mr. Siroky) pledged "eternal and indestructible friendship" for the Soviet Union, threatened that an "iron fist" would be used against anyone attempting to create disorders in Czechoslovakia, and declared that the Czechoslovak people had "fury in their hearts" at the "criminal attack" by Britain, France and Israel against Egypt.

A joint declaration was issued on Nov. 16 by the Czechoslovak and Hungarian Governments declaring that the United Nations had no right to intervene in the Hungarian situation, which was solely an internal matter. It supported the Soviet Government's action in sending troops to Hungary to put down a "revolt" aimed at the "restoration of capitalism," and asserted that these troops had been called in by the Hungarian Government in the "exercise of its sovereignty and by virtue of international law." The statement followed a brief visit to Budapest on Nov. 15 by a Czechoslovak Government delegation led by Mr. Siroky.

Poland. The Central Committee of the United Workers' Party issued a cautiously-worded statement on Nov. 2 [i e. before the final Soviet attack on Budapest] saying that the Polish people were following "with tremendous tension the tragic course of Hungarian events" After referring to the "errors" of the Hungarian Communist leadership in the past, the statement said that the decision to call in Soviet troops had resulted in "tragic consequences" and "fratricidal strife." It went on to refer to "reactionary elements" who were "more and more gaining the upper hand"] in Hungary, and expressed confidence that "the working masses of Hungary will succeed in repelling the forces of reaction."

Press correspondents in Warsaw reported that the Soviet attack on Budapest and the suppression of the Hungarian freedom movement had come as a great shock to Polish opinion, and that there was nation-wide sympathy for the Hungarian people and detestation of the Soviet action. *Trybuna Ludu* wrote that "events in Hungary have shaken the conscience of every honest man in Poland."

Yugoslavia. In a speech on Nov. 11 at Pula (Pola), President Tito spoke of the Hungarian situation and at the same time disclosed the existence of sharp divisions in the Soviet leadership between Stalinists and anti-Stalinists. [This speech will be summarized in a subsequent issue.—*Ed. K.C.A.*].

India. The attitude of the Indian Government in denouncing the Anglo-French intervention in Egypt while abstaining in the U.N General Assembly from condemning Soviet aggression in Hungary was strongly criticized in many leading Indian newspapers Particular criticism was directed against Mr. Krishna Menon, combined with demands for his recall or dismissal. [These developments will be described in subsequent issues, together with statements by Mr. Nehru on his Government's attitude toward the Middle East and Hungarian situations.—*Ed. K.C A.*].

Mass Exodus of Hungarian Refugees.

The number of Hungarian refugees crossing the frontier into Austria, which had totalled about 30,000 by mid-November, increased greatly during the last fortnight of that month and by Dec. 1 had amounted to over 100,000—more than one per cent of Hungary's total population. Despite Soviet military control of the Western frontier, tens of thousands of refugees succeeded in crossing into Austria at great risk to their lives, and in many cases after narrowly avoiding capture by Russian patrols. They included large numbers of young persons who fled the country to avoid the mass deportations to Russia, and many mothers and young children. The great majority of the refugees arrived in an exhausted condition, possessing only the clothes they were wearing. Many of them had entered Austria after swimming across a canal on the frontier—in some cases under fire from Russian troops—while others crossed the border through woods and fields and by unfrequented paths.

Many refugees, however, were intercepted by Russian patrols before they could cross the frontier, a number being shot dead by Soviet soldiers. It was officially announced in Vienna on Nov. 23 that a Soviet soldier who crossed the Austrian border in an attempt to seize an 18-year-old Hungarian refugee girl had been shot dead by an Austrian frontier guard, and two other Soviet soldiers arrested. A sharp protest at the violation of Austrian territory was made by Austria to the Soviet Government.

As announced on Nov. 14 by the Office of the U.N. High Commissioner for Refugees (see page 15194, first column), a total of 25,000 refugees had been offered asylum in the U.S.A. (5,000), Switzerland (4,000), Argentina (3,000), Australia (3,000), Western Germany (3,000), the United Kingdom (2,500), Italy (2,000), the Netherlands (1,000), Sweden (1,000), and New Zealand (1,000), in addition to offers from France (without limit), Canada, and Norway. On Nov. 22, however, the Austrian State Secretary (Dr. Kreisky) emphasized that the refugee situation had become "catastrophic," that refugees were continuing to pour into Austria, and that the Austrian Government were facing the gravest difficulties in accommodating them in transit camps and providing food, clothing, and medicine. He appealed to the U.N. and the Western countries for rapid help and "quick action to provide a solution in a matter of hours," stressing that Austria did not possess the facilities for coping with the flood of refugees.

Dr. Kreisky's plea was reinforced by the Director of the Inter-Governmental Committee for European Migration (ICEM), Mr. Harold Tittmann, who described the situation on the Austro-Hungarian border as "tragic" and who added: "They [the refugees] crossed the border in appalling conditions; many are wounded owing to Soviet shooting, all are hungry and soaked to the skin, and the temperature is below freezing-point."

Although thousands of refugees had left Austria by rail and air for countries which had offered them asylum, some 60,000 were still in Austrian reception centres by the end of November, their number being continually increased by further groups crossing the frontier. The U N Secretary-General, Dr Hammarskjold, issued an appeal on Nov. 29 to all countries, whether U.N. members or not, to provide financial assistance for the Hungarian refugee problem, which had become "of the utmost urgency." Previously (Nov. 13), at a meeting in Geneva, representatives of 22 voluntary associations, international organizations, and governmental and inter-governmental bodies had agreed that the extensive but hitherto disparate efforts for the relief of Hungarian refugees should be co-ordinated by the Office of the U.N. High Commissioner for Refugees.

Apart from aid rendered by the International Red Cross and other international bodies, extensive aid for the refugees was provided by the Governments, Red Cross societies, and voluntary organizations of a large number of Western countries, including Switzerland, Great Britain, France, Italy, Belgium, the Netherlands, Western Germany, Norway, Sweden, Denmark, the Irish Republic, and the United States.

In Britain, a Hungarian National Relief Fund set up by the Lord Mayor of London (Sir Cullum Welch) on Nov. 9 had raised over £1,000,000 by the beginning of December, contributions in large and small amounts being made by all sections of the population. Among the contributors were H M. the Queen, other members of the Royal family, and Sir Winston Churchill, who donated £1,000. Relief funds were also instituted by the British Red Cross (£245,000

raised by Dec 1), the United Nations Association. the Save the Children Fund, the Oxford Committee for Famine Relief, the Churches, and the trade unions (miners, railwaymen, etc.). Complementary with the National Relief Fund. relief funds were instituted by the Mayors and Lord Mayors of towns and cities throughout the country and by urban and rural district councils, extending to the smallest villages; by the end of November amounts raised by Lord Mayors' and Lord Provosts' Funds in the leading cities included £18,500 in Liverpool, £12,000 in Glasgow. £12,000 in Leeds, £10,600 in Edinburgh, and £9,000 in Manchester. Schools throughout the country collected money, clothing, and toys for the Hungarian refugee children, while Dr. Barnardo's Homes, the Church of England Children's Society, and other charitable organizations offered to take homeless child refugees.

With the concurrence of H M Government, the British Red Cross Church organizations, and the U.N. High Commissioner's Office for Refugees, a British Council for Aid to Refugees was set up to co-ordinate all aspects of British aid to refugees; *inter alia*, it was agreed that temporary hostel accommodation would be provided by the London County Council; that the W V S would co-ordinate the collection of clothing throughout the country; that the B.C.A R. would have primary responsibility for the reception and welfare of refugees, and for finding them employment; and that appeals for funds would be directed as far as possible into three main channels—the Lord Mayor of London's Fund, the U N.A. campaign, and Church appeals. H.M Government announced on Nov. 21 that it was making an immediate contribution of £20,000 to the Austrian Government's Refugee Fund and of £30,000 to funds for refugee relief set up by the U N. Secretary-General. Together with £50,000 already granted to the Red Cross for aid to Hungary, and £10,000 to the B C A R, the Government had thus contributed £110,000 to Hungarian relief.

National relief committees for assistance to the Hungarian refugees, similar to that in Britain. were set up in many other countries, supplemented by large-scale assistance from the national Red Cross societies and voluntary organizations. The British, Belgian, Netherlands, Swiss, Swedish, and West German Governments sent special trains to Vienna to take thousands of refugees to those countries. while the British Red Cross organized a regular air-lift of three planes a day (beginning on Nov. 18) to fly refugees to Britain.

The New Zealand Government announced on Nov. 23 that, in addition to £10,000 already contributed, it would give a further £30,000 for refugee relief, to be divided between the Office of the U.N. High Commissioner for Refugees, the Inter-Governmental Committee for European Migration, and the special fund for relief inside Hungary set up by the U N. Secretary-General. Moreover, a special grant of £25,000 would be made, additional to the normal New Zealand contribution to the High Commissioner's 1957 programme.

President Eisenhower announced on Dec. 1 that 21,500 Hungarian refugees would be admitted to the U.S.A. instead of 5,000 as originally planned, and that Congress would be asked to give all the refugees permanent residence status so as to allow them to remain in the United States. On Nov. 23 the British Government had announced that it would waive the limit of 2,500 refugees entering the United Kingdom, and that "plans are being worked out on an emergency basis to accommodate large numbers of refugees . . . and steps being taken to provide for them temporarily until proper arrangements can be made for their disposal." Among aid rendered by other countries, the Netherlands agreed to take 5,000 refugees, instead of 1,000 as earlier announced; Denmark offered to accept 1,200; and Norway offered to take 2,000 refugees, who were temporarily accommodated in a large hostel near Linz (Austria) bought by the Norwegian Government. The U S. and Canadian Governments organized air-lifts to bring refugees to North America, a similar air-lift being set up by the British Red Cross as stated above. As a result of the British Government's action in waiving the previous limit of 2,500, a total of over 6,000 Hungarian refugees had been admitted to the United Kingdom by the beginning of December. Many homeless mothers and children were offered accommodation by British families, while a number of refugees were temporarily housed at Donington Hall, an unused 80-room mansion in Leicestershire.

On Oct. 28 the Hungarian Red Cross had sent an urgent message to the International Red Cross in Geneva appealing for immediate aid in foodstuffs in medical supplies for "between 10,000 and 50,000 people" in Hungary. In response to this appeal, large quantities of relief supplies—blood plasma, penicillin and other anti-biotics, drugs, bandages, tinned foods, condensed milk, special food for infants, etc.—were sent from Britain, France, Italy, Switzerland, Western Germany, Belgium, the Netherlands, Denmark, Norway, Sweden, and other countries by road, rail and air to Vienna, from where they were partly sent by road and partly flown to Budapest by air-lifts organized by the International Red Cross with the co-operation of the Hungarian Government. Poland, Yugoslavia and Eastern Germany also sent food and medical supplies to Hungary.

Despite the desperate plight of the Hungarian population and the urgent need for food and medical aid, the Soviet Army prevented the entry and distribution of relief supplies for about a week after its final assault on Budapest. This inhuman action was strongly denounced in the Western countries and at the United Nations, notably by Mr. Cabot Lodge in the General Assembly's emergency session of Nov. 8-9 (see page 15233, second column).

An agreement was signed in Geneva on Nov. 18 between the Kadar Government, the International Red Cross, and the Hungarian Red Cross whereby all relief offered to Hungary by Governments, national Red Cross societies, U.N. agencies, and private bodies was channelled through the International Red Cross, which was made responsible for distribution in Hungary "without distinction." The Hungarian Government undertook to provide all necessary facilities and to ensure the safety of I.R.C. personnel distributing supplies in Hungary. This was the first time since the war that the International Red Cross had been permitted to carry out its humantarian activities in any Communist country.—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - United Nations Information Centre, London - Le Monde, Paris - Neue Zürcher Zeitung - Netherlands News Agency - Berlingske Tidende, Copenhagen - Norwegian Embassy, London - Turkish Embassy, London - Indonesian Embassy, London - Polish Embassy, London - Australian, New Zealand, and Pakistan High Commissioners' Offices, London)

A. INDIA. — Cabinet. - Mr. Desai's Appointment. - Resignation of Mr. Shastri. - The Ariyalur and Mahbubnagar Train Disasters.

It was announced on Nov. 14 that Mr. Morarji Desai, Chief Minister of Bombay State before the recent reorganization of States, had been appointed a member of the Indian Cabinet and would take over the Ministries of Heavy Industries and of Commerce and Consumer Industries from Pandit Pant and Sardar Swaran Singh respectively. Mr. Desai is not a member of the Union Parliament but, under the Indian Constitution, he can be a Minister for a six-month period without being a member, and can participate in the proceedings of both Houses without, however, being able to vote.

Mr. Lal Bahadur Shastri, the Indian Railway Minister, resigned on Nov. 26 because of a serious train disaster which had occurred near Ariyalur (Madras) on Nov. 23, when the Tuticorin express plunged from a bridge which was believed to have been weakened by floods, causing the deaths of 137 people and injuries to another 108. A similar disaster had occurred nearly three months earlier (Sept. 2), when two coaches of a train from Secunderabad to Dronachalam fell into a swollen stream near Mahbubnagar (60 miles from Hyderabad City) after a bridge which had been weakened by floods had collapsed as the engine passed over it, 112 people were killed and 22 injured. This had been the second accident of its kind in the Hyderabad area, following one in 1954 near Jangaon (about 100 miles from Hyderabad) in which 139 persons were killed when a train plunged into a flooded river after the collapse of a bridge. B. NORWAY. — The Fridtjof Nansen Institute.

The establishment of a Fridtjof Nansen Institute for Humanist and Social Research was announced in Oslo on Oct. 10, the anniversary of the birth of the famous Norwegian explorer, scientist, humanist, and statesman. The creation of the Institute was made possible by a gift of £20,000 from *Norsk Hydro*, the Norwegian chemical concern. It was stated that the Institute would carry out research in the field of human relations, particularly into the problems of working life, and also in the field of international relations, with particular reference to the problems of small nations.

(Norwegian Embassy Press Office, London)

C. UNITED KINGDOM. — Arms Exports to Egypt and Israel, 1951-1956.

The President of the Board of Trade (Mr. Thorneycroft), in a written parliamentary reply, gave the following details on Nov. 23 of military and certain other goods exported by Britain to Egypt and Israel between January 1951 and June 1956: (*a*) explosives (including industrial explosives)—£1,171,000 to Egypt, £444,000 to Israel; (*b*) arms, ammunition, and military stores—£3,193,000 to Egypt, £1,443,000 to Israel; (*c*) aircraft and parts (including civil aircraft—£4,689,000 to Egypt, £1,372,000 to Israel. (Daily Telegraph)

A. AUSTRALIA - UNITED KINGDOM. — Principles of New Trade Agreement.

A joint statement issued in London on Nov. 12 by Mr. Peter Thorneycroft (President of the Board of Trade) and Mr. McEwen (Australian Minister for Trade) announced that the British and Australian Governments had signed the heads of a new five-year trade agreement which would replace the Ottawa Agreement of 1932, and whose final text would be drawn up early in January 1957. The new agreement was the outcome of prolonged negotiations which had commenced last June during the Commonwealth Prime Ministers' Conference in London (see 14961 A.).

The principal points covered by the heads of agreement and its four annexes were as follows :

(1) Both Governments would immediately act "in conformity with the intention of the heads of agreement."

(2) The U K would maintain the duty-free entry of Australian goods which were at present free of duty, except in cases where there was no active Australian trade interest

(3) The U.K. would maintain the existing guaranteed margins of preference for Australian exports of butter, cheese, fruit, eggs, canned meat and milk, honey, leather, tallow, zinc, barley, wheat, flour, eucalyptus oil, copra, sugar, light wines, coconut oil, currants, jam, etc

(4) As regards other Australian goods, the U.K. would consult Australia about any proposals to reduce margins of preference on goods where there was an active Australian trade interest

(5) The provisions of the 1932 Agreement in respect of U.K meat imports from Australia would not be affected.

(6) The Australian and British Governments expressed the "desire and expectation" that sales of Australian wheat and flour in Britain (made on commercial terms between representatives of U.K. flour-millers and the Australian Wheat Board) should amount to 750,000 tons per annum. Both Governments agreed to consult each other if British purchases fell below that figure, and an inter-governmental committee would be set up in London "to consider the reasons for the shortfall and the possible solutions" If deadlock resulted, either Government might call for a re-negotiation of the terms of the new agreement.

(7) Australia would maintain the existing tariff preferences on the Australian market for British goods, but would reduce the margins of preference to a minimum of 7½ per cent on capital goods and a minimum of 10 per cent on most other goods.

The list of capital goods included, *inter alia*, iron and steel; aluminium and nickel, tinplate, non-ferrous alloys, agricultural and other machinery, machine tools, ball- and roller-bearings, metal-working lathes, sewing-machines, road-making and cement-making machinery; cranes, conveyors; tractors, locomotives, internal combustion engines, steam turbines; certain electrical and power-station equipment; dyestuffs, cement; insecticides and disinfectants, certain drugs and chemicals; plastic moulding materials; packing materials; cotton, rayon and artificial silk yarns; sewing cottons; and ships

[The former preference rate on capital goods from Britain was 12½ per cent On other goods it varied from 10-17½ per cent, although on some items it was as high as 27½ per cent]

(8) Any decision on the alteration of Customs preferences that would normally apply would remain with the Australian Government, but the U K. Government would be given full opportunity to express their views in each case. [Mr McEwen explained that a preference normally applying could be suspended by Australia if the goods in question were not commercially available from U.K. production.]

(9) Australia would continue tariff policies that would ensure that : (*a*) protection by tariffs would be afforded only to industries which were reasonably assured of sound opportunities for success on the basis of the relative cost of economical and efficient production; (*b*) the Customs tariff would be based on the principle that protective duties would not exceed a level that would give U K producers full opportunity of reasonable competition, provided that in the application of this principle special consideration might be given to industries not fully established, and to industries essential for defence purposes, (*c*) subject to certain international obligations, no new protective duty would be imposed and no existing protective duty increased on U K. goods to an amount in excess of the recommendations of the Tariff Board; (*d*) U.K. producers would be entitled to full rights of hearing before the Tariff Board

(10) Australia agreed to maintain all existing preferences in respect of imports from British Colonial territories pending further discussions in 1957 between the two Governments, in consultation with the territories concerned. Conversely, the U.K. would invite the Colonial Governments to maintain for the time being the preferential tariffs at present applying to imports from Australia.

(11) Close consultation would take place between the two Governments on other matters affecting their mutual trade, such as agricultural production, marketing and import policies, subsidized imports, the disposal of surpluses, restrictive practices, and transport and communications.

(12) Both Governments agreed to introduce legislation as soon as possible enabling them to impose anti-dumping or countervailing duties against "dumped" or subsidized exports from third countries

In a press statement on the same date, Mr. McEwen said that while Australia still accepted the principle of Imperial preference, the pattern of trade between the two countries had changed so much in the last 25 years that Britain now derived greater benefits from the 1932 Agreement than Australia.

Allowing for price changes (Mr McEwen continued) Australian imports from the U.K. were almost 100 per cent higher post-war than pre-war, while Australian exports to the U.K. had declined by 20 per cent. In addition, Australia had been faced with balance-of-payments problems which had finally forced her to negotiate both for reductions in the preferential tariff granted on British goods (which would enable her to obtain new or improved markets for Australian exports in other countries) and for increases in the sales of Australian foodstuffs to Britain. By the new arrangement on tariffs Australia had gained "more freedom and flexibility in the costs field and in negotiations for trade expansion in other markets," while the wheat arrangements constituted a "new and valuable base" for Australian wheat exports.

[According to statistics published in the British press, Australian wheat sales to the U.K. had fallen from an average of 2,000,000 tons before the Second World War to one of 650,000 tons in the post-war period The overall trade figures show that whilst in 1938 Australian exports to Britain totalled £71,800,000, and British exports to Australia £38,900,000, the comparable figures in 1955 were £265,000,000 for Australian exports to Britain and £286,000,000 for British exports to Australia]

It was pointed out in the British press that the new agreement favoured Australian rather than British trade and would expose many British industries—notably motor manufacturing—to sharper competition on the Australian market. On the other hand, 90 per cent of British exports to Australia would still enjoy preference, although at reduced rates.

B. ISRAEL. — Municipal Council for Gaza.

A new municipal council for Gaza, consisting of a mayor and six councillors, was appointed on Nov. 26 by the Israeli Military Governor of Gaza, Colonel Gaon, who had been appointed to that post after the capture of the "Gaza strip" during the Sinai campaign. The new mayor, an Arab, had served as mayor of Gaza for 15 years before 1951.

In a speech at the ceremony, and in a subsequent press statement, Colonel Gaon said that conditions in the Gaza area had become normal to such an extent that local government could again operate; that the U.N. Relief and Works Agency (UNRWA) had resumed its work of caring for the approximately 210,000 Arab refugees in the "Gaza strip"; and that food supplies, including quantities of flour, were also being distributed by the Israeli authorities.—(Manchester Guardian) **(Prev. rep. 15173 A.)**

C. BRAZIL. — Freeing of German Pre-war Assets.

Under a decree signed by President Kubitschek in September, all German pre-war assets and rights which had been taken over by Brazil during the Second World War were restored to their owners. Deliveries will be made according to instructions by a private German consortium which had negotiated the agreement with the Brazilian Government, and which had deposited with the *Banco do Brasil* an amount corresponding to the claims for Brazilian war damages still outstanding. Assets and rights which had already been liquidated or incorporated into the Brazilian economy were excluded from the releases, as well as assets belonging to persons who had been condemned for crimes against Brazil's national security.
(Bank of London and South America)

D. ASIA. — Formation of Seven-Nation Asian Legal Consultative Committee.

It was announced on Nov. 15 in the capitals of the seven countries concerned that the Governments of Burma, Ceylon, India, Indonesia, Iraq, Japan, and Syria had set up an Asian Legal Consultative Committee, to which other Asian Governments might adhere. The committee, whose secretariat will be in New Delhi for the time being, will examine legal matters of common interest and make necessary recommendations.
(Indian High Commissioner's Office, London)

E. ARGENTINA. — New Minister of Labour.

Dr. Horacio Aguirre Legarreta was appointed Minister of Labour in General Aramburu's Government on Sept. 25 in succession to Dr. Migone, who had resigned on the grounds of excessive work and ill-health. Dr. Migone had been criticized by both employers and workers in his attempts to find an acceptable solution to current wage and labour questions.
(New York Times) **(Prev. rep. 14967 A.)**

A. BAGHDAD PACT. — Four-Power Discussions on Middle East Crisis. - Mr. Suhrawardy's Call for Moslem Unity against External Subversion. - Turkish Warning on Soviet Penetration of Syria. - Turkish Minister recalled from Israel. - U.S. Support for Baghdad Pact.

The situation in the Middle East was discussed on Nov. 7 at a meeting in Teheran of the Prime Ministers of four of the five member-countries of the Baghdad Pact—General Nuri-es-Said (Iraq), Mr. Suhrawardy (Pakistan), Mr. Hussein Ala (Persia), and Mr. Adnan Menderes (Turkey). Britain, the fifth member-country, was not invited. The meeting had been called on the initiative of the Shah of Persia and the President of Pakistan during the latter's State visit to Teheran (see below).

The following communiqué was issued at the conclusion of the four-Power discussions :

" (1) As a result of the negotiations between H.M. the Shah and the Pakistani President, the Imperial [Persian] Government invited the Premiers and Foreign Ministers of Pakistan, Turkey, and Iraq to visit Teheran to consider the situation created by (*a*) Israeli aggression against Egypt and the occupation of Egyptian territory by Israel, and (*b*) military intervention by Britain and France in Egypt.

" (2) The Premiers of Persia, Turkey, Pakistan and Iraq considered the critical situation created in this zone and unanimously reached the following decisions

(*a*) They condemned the Israeli act of aggression against Egypt, and deemed it necessary for the Israeli forces to return immediately to the cease-fire line and for all Egyptian prisoners to be repatriated

(*b*) On the basis of the U.N. recommendations concerning the regrettable armed intervention of the British and French forces . . they decided to ask the British and French Governments to end hostilities immediately, to withdraw their forces from Egypt, and to respect fully the sovereignty, independence and territorial integrity of Egypt.

(*c*) To ensure a permanent peace in this zone, the four Governments stated that the Israeli-Arab dispute must be settled immediately on the basis of the 1947 resolution of the United Nations.

(*d*) The four Governments . . state that the Suez Canal problem must be settled under the auspices of the U.N. by negotiations with Egypt. Freedom of navigation through the Canal must be safeguarded, fully respecting Egyptian sovereignty.

" (3) The four Governments were pleased that the British Ambassador in Teheran had stated that the joint action by the four Governments and the British Government on Nov. 5 [see below] affected the decision for a cease-fire order at midnight on Nov. 6. They welcomed this decision and expressed the hope that there would be no delay in the implementation of the U.N. resolution for the establishment of an International Force.

" (4) The four Governments appreciated the prompt action of America in the U.N. for safeguarding peace and supporting U.N. principles.

" (5) They confirmed their promise to respect the principles of the U.N. Charter, and declared that aggression, in whatever manner, is resented by them. The independence and sovereignty of all nations must be respected and safeguarded

" (6) The four Governments were informed of the efforts made jointly or individually by them to safeguard peace. Emphasizing that their alliance has no aggressive nature, they reiterated their desire to strive for the peace and security of this zone. They expressed their distaste for the false statements made by some circles for the purpose of hampering peace and security in this zone."

A statement issued by the British Foreign Office on Nov. 8, with regard to approaches made by the other Baghdad Pact members, said that H.M. Government had "listened with close attention to the friendly and constructive advice offered," and that the proposals put forward " are consonant with H.M. Government's views." It added . " As regards a settlement of the Palestine problem, H.M. Government's views are well known, and were stated by the Prime Minister in his Guildhall speech on Nov. 9, 1955."

In a press statement on his return to Karachi, Mr. Suhrawardy disclosed on Nov. 10 that before the issue of the joint communiqué, and as a result of " preliminary and urgent discussions " between the four Baghdad Pact countries, a joint approach had been made to H.M. Government on Nov. 5, " which, we have been told, influenced the decision for a cease-fire at midnight the following day."

Mr Suhrawardy added : " The four Powers, since the issue of the joint communiqué, have urgently represented to H.M. Government that only by prompt action to implement the conclusions mentioned in the communiqué would it be possible to prevent the conflagration from spreading and to restore peace and stability in the Middle East. We await anxiously, but with confidence, a quick acceptance by H.M. Government of the proposals. I must, however, emphasize that we do not wish to see a situation created in this area of which Israel could take advantage to the detriment of Egypt's interests. It is for this reason that Pakistan was among the first to offer to contribute to the International Police Force

" We have taken the opportunity, while at Teheran, to re-emphasize the essentially defensive and non-aggressive nature of the alliance [i.e. the Baghdad Pact]. I must point out that whatever action H.M. Government thought fit to take was not taken in her capacity as a member of the Baghdad Pact. On the contrary, the other members of the Pact, realizing their duty to safeguard the peace and stability of the region and to uphold the principles of the U.N. Charter, have throughout, individually and collectively, done their very best to prevent hostilities from spreading and to bring the conflict to a speedy end . . . "

Asked by press correspondents whether Pakistan's relations with the Commonwealth had been affected by the Anglo-French intervention in Egypt, Mr Suhrawardy replied : " Pakistan is fully in the Commonwealth."

At the request of Mr. Menderes, the British and U.S. Ambassadors in Ankara (Sir James Bowker and Mr. Fletcher Warren) met him in Istanbul on Nov. 10 to discuss the Teheran meeting, as well as economic problems. It was reported in the press that Mr. Menderes had emphasized to Sir James Bowker that the fact that Britain had not been invited to the Teheran meeting was only " a temporary expedient." M. Nuri Birgi, Secretary-General of the Turkish Foreign Ministry, declared on the same day that the Teheran meeting had " saved the unity of the Baghdad Pact."

The Prime Ministers of Iraq, Pakistan, Persia, and Turkey, together with the President of Pakistan (General Iskander Mirza), met again in Baghdad on Nov. 19 to review further developments in the Middle East crisis. The talks were temporarily adjourned on Nov. 21, when President Mirza flew to Riyadh (Saudi Arabia) to meet King Saud, while Mr. Suhrawardy flew to Beirut for talks with President Chamoun of the Lebanon. The Baghdad discussions were resumed on Nov. 22, following President Mirza's and Mr. Suhrawardy's return to Iraq, and ended in the early morning of Nov. 23 after King Faisal of Iraq had also taken part in the discussions. The following communiqué was issued :

" (1) The meeting . . was held for the following reasons

(*a*) To discuss the gravity of the situation in the Middle East and . . . to harmonize the foreign policies of the four countries in order to preserve the peace and security of the Middle East area.

(*b*) To review the progress achieved in the application of the recommendations contained in the joint communiqué published at the conclusion of the Teheran talks.

" (2) The representatives of the four nations . . reiterated their belief that the recommendations contained in the Teheran communiqué were the only means to solve Middle East problems in a just, honourable, peaceful, and lasting manner

" (3) They drew attention to the similarity between their views and those expressed in the communiqué published in Beirut on Nov 16, after the end of the conference between the Heads of State of Arab countries [see page 15236].

" (4) They scrutinized with anxiety and a sense of vigilance the destructive activities taking place in the Middle East, and decided to take all necessary measures to counteract this dangerous situation in accordance with the U.N. Charter.

" (5) They . . . expressed their firm belief in the necessity for continued discussions and sustained co-operation."

Mr. Suhrawardy's Warning against External Subversion.

The seriousness of the subversive activities being carried out by foreign Powers [i.e. the Soviet Union] in certain Middle East countries, to which the communiqué referred, was emphasized by Mr. Suhrawardy in a press statement on his return to Karachi (Nov. 23).

Referring to his visits to Teheran, Baghdad, and Beirut, Mr. Suhrawardy said : " There is every reason to think that my mission will prove successful, and that the Moslem nations will work in unison to secure peace and stability in the Moslem world and save it from internal subversion and external aggression. These meetings have proved so successful that I hope others will be held from time to time to evaluate the results of our co-operative efforts, and to take steps to meet the dangers and conspiracies designed to enslave us. It is only by close co-ordination and co-operation that we can successfully avert the danger to the independence of ourselves and other Moslem countries.

" Although the chances of a major conflict seem to have receded—at least for the present—with the timely arrival of the U.N. Force in Egypt, the situation in the Middle East does not warrant complacency. It is encouraging to find that the British have begun to fulfil their promise to withdraw their forces from Egypt. We hope that when they are replaced by the U.N. Force, the Palestine problem and the problem of the Suez Canal will be successfully solved . . .

" The Palestinian problem must be settled soon. If the great Powers really desire such a consummation and do not keep alive this problem—which, I am sure, they must realize is a danger to the peace of the world—there is no reason why the smaller States immediately concerned with these issues should not be able to settle the matter among themselves or accept the verdict of the United Nations.

"The Suez Canal must be cleared as soon as possible and the U.N. must see to it that all hindrances and obstructions are removed. We are beginning to feel the results of its closure, and our economy will be seriously disturbed if the Canal is not cleared soon. Our entire economic policy may well have to be reorientated to meet the new situation. Indeed, there are many countries who, with us, wonder what requirements of military strategy or tactics necessitated the sinking of so many ships in the Canal, thereby adversely affecting the lifeline of so many countries who depend upon it for their trade and their essential supplies

"I feel that I must take my countrymen into my confidence and sound a note of warning and caution against the activities of certain interested Powers who, having failed to disrupt our unity, are trying to destroy us from within Taking advantage of the noble sentiments and emotions aroused in support of a Moslem country [i.e. Egypt], they are attempting to create disorder and confusion in the Middle East and are seriously threatening its security and stability.

'I would have tried—and indeed for a long time I have tried—to avoid this unpleasant subject, but the danger is growing. It is getting nearer and nearer, and it is too real for us to close our eyes to it Money is being lavishly distributed to forces of disruption, offensive weapons of war are being supplied in large quantities to countries incapable of using them; subversive activities by paid enemy agents are playing upon the sentiments of innocent youths, bombs, explosives and arms are being supplied to saboteurs taking advantage of diplomatic immunities, persons are hired to destroy, kill and assassinate; demonstrations are being engineered with violence and disorder, and innocent lives sacrificed; and a new technique of subversion and terrorization is being evolved by external Powers to produce fear and chaos, to overthrow existing regimes, and to replace them by puppets

"I think it is necessary to appraise my countrymen of these trends and happenings, and to caution them against falling a prey to the activities of these enemy agents, many of whom are parading as patriotic citizens. I appeal to our people not to be carried away by their unrestrained emotions If they do so, they will find themselves in a trap ingeniously laid by Powers anxious to see Pakistan weakened, isolated, and friendless, and liable to be enslaved if not eliminated altogether."

Mr. Suhrawardy also said that "paid enemy agents" in the country were attacking the Baghdad Pact because they wanted Pakistan to be isolated and weak, they were also taking the line that Britain should be expelled from the Pact, as they wanted to take advantage of the situation in the Middle East. He added that the Lebanon was also being subjected to "lots of pressure from within and without." and deserved help.

In conclusion he declared. "Let me reiterate my policy. I shall never allow Pakistan to be weakened and isolated I shall continue to seek new friends and endeavour to establish cordial relationships with all. I shall make no enemies, but neither shall I give up the just claims of our country. Nor shall I betray our friends and allies in the hour of their need . . ."

Turkish Minister recalled from Israel. - Turkish Warning on Soviet Penetration of Syria.

It was announced in Ankara and Jerusalem on Nov. 26 that the Turkish Minister to Israel (Mr. Istinyeli) had been recalled. Reports from Jerusalem said that Mr. Istinyeli had explained to the Israeli Foreign Ministry that the move was intended to strengthen the Baghdad Pact, which was not directed against Israel; that Turkey did not intend to hamper friendly relations or impede trade with Israel, and that the Turkish Legation in Tel-Aviv would continue to work under the Counsellor as Chargé d'Affaires. The official Turkish announcement said that Mr. Istinyeli would not return to Israel "until the Palestine question has been finally settled with justice."

A semi-official statement broadcast by Ankara Radio on the same date outlined Turkish policy on this matter, and also drew attention to the danger of Communist infiltration in the Middle East countries, particularly in Syria and Egypt.

The statement explained that the Teheran and Baghdad meetings had not been held under the auspices of the Baghdad Pact, but had been simply meetings between four members of the Pact to discuss matters of local interest. This was the reason why Britain had not taken part in those meetings, and her non-attendance should not be considered as a weakening of the Pact any more than the holding of private consultations between some members of NATO would be considered a reflection on the solidarity of NATO itself

Turning to the present unrest in the Middle East, which had been caused by Communist penetration in Syria and Egypt, the statement accused those two countries of fomenting trouble among their neighbours, as proved by recent incidents in the Lebanon In Syria, Communist influence and Soviet armaments were creating a situation fraught with dangers to peace in the whole Middle East, and Turkey, Persia, Pakistan, and Iraq, as well as some other Arab countries, were fully alive to this danger.

Amongst information about Communist infiltration in the Middle East, particularly in Syria and Egypt, and attempts to establish pro-Communist regimés in Syria, Lebanon, and Jordan, it was reported in the Turkish Press that 501 Soviet ships aggregating 2,330,000 tons had passed through the Dardanelles in 1955, and 504 Soviet ships aggregating 2,714,000 tons during the first eight months of 1956.

As stated above, the decision to call the Teheran meeting of the four Baghdad Pact Powers had been taken by the Shah of Persia and President Mirza of Pakistan during a visit by the Pakistani President to Persia from Nov. 4-10. In the course of this visit President Mirza and Mr. Firoz Khan Noon (Foreign Minister of Pakistan) had discussions with the Shah and Persian Ministers, while the Pakistani President also addressed the Majlis and visited the holy city of Meshed. President Mirza had earlier paid an official visit to Turkey from July 15-29.

American Support for Baghdad Pact.

The U.S. State Department, with the approval of President Eisenhower, announced on Nov. 29 that it would view "with the utmost gravity" any threat to the territorial integrity or political independence of Turkey, Pakistan, Iraq, and Persia, and reaffirmed the U.S. Government's support "for the collective efforts of these nations to maintain their independence." The statement was regarded in the U.S. press as a warning to the Soviet Union following the reports of increasing Soviet infiltration in the Middle East, and particularly in Syria.—(Pakistan High Commissioner's Office, London - Turkish Embassy, London - Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune) **(Prev. rep. 15201 A; Baghdad Pact, 14873 A.)**

A. UNITED KINGDOM.—Resignation of Mr. Stanley Evans, M.P. - Denunciation of U.S. Policy in Middle East.

Mr. Stanley Evans, Labour M.P. for Wednesbury (Staffordshire), announced his resignation on Nov. 20 in compliance with the wishes of the Wednesbury Divisional Labour Party, which had objected to his abstention on the Opposition's vote of censure on Nov. 1 (see pp. 15181-83) and to his speech during the debate. Mr. Evans issued the following statement:

". . . My attitude on the Suez question has caused offence to the Wednesbury Labour Party, who demand that I surrender my seat in the House and resign from the Labour Party . . . I propose to comply . . It ill accords with the strength of the nation that an M.P., in order to survive, has to set loyalty to his party before his own conscience and what he considers to be the well-being of the country.

"My speech and abstention on Nov. 1 came as no bolt from the blue to the constituency party. Explaining my views at Wednesbury on Sept. 8, I said · 'Britain is faced with a challenge in the Middle East potentially no less mortal to her standard of living and status as an industrial nation than that in the Europe of 1938. In these circumstances she can no longer act in accordance with her own peaceful principles, but only in accord with what experience of dictators has taught her to expect.'

"I also made my position clear at meetings of the Parliamentary Labour party before the debate in the House. To the credit of the Parliamentary party, it was accepted that I could not vote for the censure motion. and that under the party's Standing Orders I was entitled to abstain. There has never been any question of action being taken against me at Westminster

"Beyond all this, however, is the larger issue. Military operations having been started by a freely elected Government of the people, backed by a substantial Parliamentary majority, it seemed to me to be against the best interests of the British people to divide the House of Commons while fighting was still in progress—particularly as everyone knew that hostilities would be merely a matter of days, and that there would be plenty of time for argument when the guns stopped firing The knowledge that British parachutists and commandos were due to go about their business at any minute reinforced my conviction that this was the moment to unite the nation, not to divide it on party political lines . . .

"I do not wonder that the British and French Governments finally lost their temper The perfidy of Mr. Dulles over Suez has made Machiavelli look like a saint. When events in Guatemala were held by the Pentagon to threaten the Panama Canal, America's life-line, Mr. Dulles did not summon a conference of 22 nations, urge caution, or refer the matter to U N O. Lethal weapons in the shape of guns, planes, bombs and bullets were his instruments of persuasion, and a revolt which had nothing to do with the United States was pulverized overnight. The United Nations, the 'hope of the people,' was left to think what it liked.

"I saw Suez as a bid to strengthen Britain's friends in the Middle East, and to wrest a little elbow-room within the Anglo-American partnership. I am afraid that the bid has failed. All that can be hoped for now is that the Americans will grant us the same benevolent twilight that the Romans accorded the Athenians. . .

"As it is, the outlook for Britain, France and Israel could hardly be more bleak. The Egyptian dictator, militarily deflated by Israel, is now stronger than ever and all that has been achieved in Egypt is a very uneasy armistice. We have agreed to get out of Egypt without waiting for a settlement, and the terms for a settlement of the Suez and Palestine problems have not even been discussed—all because of an artificially engendered hysteria which at no time found an echo in the hearts and minds of the people.

"For this calamitous state of affairs the Shadow Cabinet and the leader-writers of the *Manchester Guardian*, *The Observer*, and *The Economist* bear a heavy burden of responsibility . . ."

Mr. Evans also announced his resignation from the Labour Party.—(Times - Daily Telegraph - Daily Herald) **(15198 A.)**

A. CHINA. — Eighth Communist Party Congress. - The Second Five-Year Plan.

The eighth national congress of the Chinese Communist Party—the first held since 1945—met in Peking from Sept. 15-27. Its main decisions were the election of a new Central Committee, the adoption of a revised party constitution, and the approval of the Government's proposals for the Second Five-Year Plan. Statements were also made by Government and party leaders on foreign policy, industrial development, the armed forces, legal reforms, and other matters, as summarized below.

President Mao Tse-tung, in his opening speech as party chairman, claimed that the " triumph of the revolution " since the last congress had proved the political maturity of the party, which was now " more united and consolidated than at any time in the past " Although there were over 10,000,000 party members, they constituted only a very small minority of the population, and it was therefore necessary to " strengthen unity among all our nationalities, democratic classes, democratic parties, and people's organizations, and to consolidate and expand a people's democratic united front."

Turning to the international situation, Mao Tse-tung said that the recent relaxation of tension had made the situation inside China more favourable to peaceful constructive work. He continued : " To achieve lasting peace in the world we must develop our friendship and co-operation with fraternal countries in the camp of Socialism and strengthen our solidarity with all peace-loving countries. We must endeavour to establish normal diplomatic relations on a basis of mutual respect for territorial integrity and sovereignty, equality, and mutual benefit with all countries willing to live peacefully together with us We must give active support to national independence and liberation movements in Asia, Africa, and Latin America . . We firmly support the entirely lawful action of the Egyptian Government in taking over the Suez Canal Company, and resolutely oppose any attempt to encroach upon the sovereignty of Egypt and to start armed intervention against that country."

Mao Tse-tung went on to criticize the " bureaucratic and sectarian " outlook of many party members, and referred to the criticisms made at the 20th Congress of the Soviet Communist Party as an example to be followed. " In transforming China from a backward agricultural country into an advanced industrialized one," he added, " we are confronted with many heavy tasks, and our experience is far from being sufficient So we must be good at studying , good at learning from the Soviet Union, from the people's democracies, from fraternal parties in other parts of the world, as well as from peoples the world over. We must never adopt the conceited attitude of great-nation chauvinism and become arrogant and complacent because of the victory of the revolution and some successes in the construction of the country . . . Humility helps one to progress, whereas conceit makes one blind . . . "

Liu Shao-chi (chairman of the standing committee of the National People's Congress) presented the Central Committee's political report. This stated that the occupation of Formosa by " American imperialists " was the greatest threat to China's security ; that China was willing to negotiate on this issue ; and that she would use force only if there was no longer any possibility of peaceful negotiation, or if such negotiation had failed. After attacking the U.S.A., Britain, and France, he reiterated that unity between China and the Soviet Union was " unbreakable."

Reviewing the First Five-Year Plan, Liu Shao-chi reported that by 1957 China would produce over 60 per cent of the machinery and equipment needed for her economic development, and that 110,000,000 peasant households had been organized into 1,000,000 producer co-operatives of varying sizes. Industrialization would require three Five-Year Plans, or even longer, but the transition to Socialism would be completed during the second plan. Most capitalist industries and commerce were now jointly owned, and small traders and fishermen were organized in co-operatives. The majority of former capitalists, with a few exceptions, had accepted the transformation to Socialism, and it was possible for them to be " remoulded into working people worthy of the name "

Teng Hsiao-ping (a Vice-Premier, and chief secretary of the party) presented a revised party constitution. Recalling that in 1949 it had been decided, at Mao Tse-tung's suggestion, to prohibit public celebrations of party leaders' birthdays or the naming of towns, streets, or factories after them, he emphasized that " love and support for leaders . . has nothing in common with the worship of any individual." Under the new constitution, he went on, party members would have the right to reserve their opinions, to criticize any party organization or official at party meetings, to be present when their own work was discussed, and to send their views to higher bodies, including the Central Committee. " If the truth turns out in the end to be on the side of the minority," he added, " then the protection of the minority's rights will help the party to discover the truth." Delegates to the National Congress would be elected for five years, and would meet at least once a year, while provincial congresses would meet three times and municipal congresses four times a year.

Marshal Peng Teh-huai (Defence Minister) stated that 5,000,000 men had been demobilized from the Army since 1949, which meant that, counting newly conscripted men, its strength was 2,700,000 lower than in that year. As a result, military expenditure had been reduced from 48 per cent of national expenditure in 1951 to 19 9 per cent. China supported the Soviet Union's disarmament proposals, and, if agreement was reached on that basis, was willing to reduce her forces still further. The chief tasks of the armed forces were to defend China and to be " prepared to liberate Formosa at any time."

Marshal Peng announced that the armed forces, which in the past had been essentially made up of infantry, were now divided into five separate commands—the Army, Navy, Air Force, Anti-aircraft, and Public Security Forces. The Army itself was divided into infantry, artillery, armoured troops, engineers, a railway corps, a signal corps, and an anti-chemical-warfare corps. Party committees would continue to exercise collective leadership over the Army's work, and officers were required to accept the criticisms of lower officers and soldiers.

Tung Pi-wu (President of the Supreme Court) emphasized the need for a new legal system, including a new criminal code, civil code, law of procedure, labour laws, and laws on land utilization. Since the revolution China had had a " people's democratic legal system," which had served the needs of the time but had not always been observed. One reason for this, he suggested, was that hatred of the old legal system had created a " psychology of contempt " for all legal systems, and this contempt had been increased by mass revolutionary movements in the past, which had given rise to an indiscriminate disregard for the law. To eliminate this tendency it was necessary to formulate the laws clearly, and for Government officials and party members to set an example of obedience to them. Drafts of the criminal code and the code of criminal procedure would soon be completed, and would be submitted to the public for consideration.

General Lo Jui-ching (Minister of Public Security) denounced the use of torture or disguised torture to extract confessions, which—he admitted—had sometimes been practised, although officially forbidden Stressing the continuing need for vigilance, he said that although the " period of intense class struggle " was past, special agents were still being sent into China and had committed a number of assassinations in recent weeks In dealing with counter-revolutionaries, the basic principle must be " punish few and reform many."

Chen Yun (a Vice-Premier and economic expert) gave details of the Government's proposals for the establishment of a free market within the framework of a planned economy Grain, cloth, and other essential consumer goods would continue to be purchased and marketed only by the State, but the free market would include a little over one-quarter of the total value of retail consumer goods Temporary price increases would be necessary if the quality and variety of goods were to be increased and production of new lines encouraged, although this should not give rise to any apprehension.

Admitting serious economic shortcomings, Chen Yun said that rigid adherence to the system of supply of raw materials by the Government, which contracted to buy the finished goods, had resulted in indifference to quality in some factories, whilst the handling of goods by State wholesale organizations had caused a piling-up of goods in some areas and shortages in others In addition, State control of the market, which had restricted private merchants from buying raw materials, had led to a monopoly by State organs and to lack of competition, with the result that some agricultural products and subsidiary goods had not been produced in sufficient quantities because the retail price was too low.

To correct these mistakes, which were due to lack of experience, the following measures would be adopted :

(1) Factories would purchase their own raw materials and sell their own commodities, except in the case of products essential to the national economy and in which there was no great variety, such as cotton yarn, cloth, and sugar Shops would be encouraged to buy direct from factories, in order to ensure a variety in grades and quality.

(2) The production and management of a large part of industry, handicrafts, agriculture, and commerce would be decentralized. Small factories should no longer be merged into larger organizations ; very large co-operatives should be turned into small group co-operatives ; and small traders should continue to manage their own businesses within the co-operative group. Former private wholesalers should be employed to establish wholesale stores for different trades, and the Ministry of Foreign Trade should organize former private importers to form State import companies Members of large agricultural co-operatives should be allowed to have more land for themselves on which to grow fodder and subsidiary products.

(3) Methods of market management originally designed to prevent speculation in basic goods should be maintained, but State and co-operative stores should purchase some consumer goods freely to avoid keeping down production because of too low prices.

(4) Price policy must be determined in the interest of raising production.

(5) Factories should fix their own plans according to market requirements, and not be restricted by State plan targets.

General Chang Kuo-hua, the Tibetan delegate, advocated a cautious policy of gradual reforms in Tibet, in view of the gulf created between the Tibetan and Chinese peoples by the oppressive policies of China's ruling classes in the past. He emphasized that the very great influence of religion in the life of the Tibetan people must be recognized.

Mme. Tsai Chang (first secretary of the women's affairs section of the Central Committee) urged the party to give its full support to birth control, which would benefit women's health, child care, home life, and national prosperity.

Marshal Chen Yi (a Vice-Premier), dealing with foreign policy, said that "attempts by certain countries to pretend that Formosa was a separate country with an independent existence" constituted "an encroachment on Chinese sovereignty," which the Chinese people were determined to oppose. China, however, was prepared to hold a conference with the U.S.A., at Foreign Ministers' level, to discuss the situation in the Formosa area. Marshal Chen emphasized that China's policy of co-existence excluded nobody, that revolution in China was "not for export," and that China would never launch aggression against other countries or interfere in their internal affairs.

New Central Committee. - Party Membership.

The congress elected a new Central Committee, adopted the revised party constitution, and approved the proposals for the Second Five-Year Plan. The new Central Committee consisted of 97 full and 73 alternate members, as against 41 full and 30 alternate members previously. At its first meeting (Sept. 28) Mao Tse-tung was re-elected chairman, Liu Shao-chi, Chou En-lai, Marshal Chu Teh, and Chen Yun vice-chairmen, and Teng Hsiao-ping secretary-general.

The party's membership was stated to be 10,734,385, or 1.74 per cent of the population, in addition to 20,000,000 members of the Communist Youth Alliance. The total included 1,500,000 workers, 1,250,000 intellectuals, 5,360,000 small peasants, 2,050,000 "middle peasants," and 550,000 persons from other sections of the population. About 10 per cent of party members were women

The Second Five-Year Plan.

Details of the Government's proposals for the Second Five-Year Plan (1958-62) are given below.

Heavy Industry. The Prime Minister, Chou En-lai, stated in his report to the congress that investment in capital construction would increase from 35 per cent of the overall national revenue to about 40 per cent Because of the increase in revenue expected under the plan, the actual amount invested would be twice that spent on the First Five-Year Plan. [The 1952-57 investment target was about £10,000,000,000]

The value of industrial production in 1962 would be double that originally planned for 1957, which had already been surpassed Priority would be given to heavy industry, and the steel-production target for 1962 would be 10,500,000 to 12,000,000 metric tons [The original 1957 target, 4,100,000 tons, had already been surpassed and had been raised to 5,500,000 tons] Special attention would be given to the machine-building and metallurgical industries, and when the plan was completed 70 per cent of all machinery and equipment needed for construction would be made in China The largest increase envisaged was in metal-cutting machine tools, production of which would increase six-fold

Other 1962 targets for industrial production included the following . aluminium, 100,000-120,000 metric tons , metallurgical equipment, 30,000-40,000 tons ; machine-tools, 60,000-65,000 units , cement, 12,500,000-14,500,000 metric tons (1955 production, 4,500,000 tons).

Light Industry. Capital investment in light industries would also be increased to meet expanding consumption, and the amount of retail consumer goods available in both town and countryside would increase by 50 per cent over the 1957 targets The 1962 targets for light industry included . cotton-piece goods, 235,000,000-260,000,000 bolts (1957 target, 163,721,000 bolts) ; cotton yarn, 8,000,000-9,000,000 bales , salt, 10,000,000-11,000,000 tons ; edible vegetable oils, 3,100,000-3,200,000 tons , sugar, 2,420,000-2,500,000 tons.

Power. The 1962 target for electrical power output was 40,000,000,000-43,000,000,000 Kw -hours, as compared with the 1955 figure of 12,100,000,000 Kw.-hours and the 1957 target of 18,000,000,000 Kw.-hours. The plan envisaged the ultimate use of atomic energy and automation.

Mining. Coal production for 1962 would be 190,000,000-210,000,000 metric tons (1957 target, 120,000,000 tons), and crude oil production 5,000,000-6,000,000 tons (1957 target, 2,010,000 tons).

Agriculture. Grain production for 1962 would be 250,000,000 tons (1957 target, 193,000,000 tons), raw cotton output 2,400,000 tons (1957 target, 1,653,000 tons), and soya-bean production 12,900,000 tons (1957 target 11,220,000 tons). Output of chemical fertilizers would be increased from the 1957 target of 573,000 tons to over 3,000,000 tons.

Communications. The plan provided for the construction of about 5,000 miles of new railways and 10,000 miles of trunk roads.

Living Standards. It was claimed that the plan, if fulfilled, would enable workers, employees, and peasants to increase their average earnings by 25 to 30 per cent.

Education. To meet the need for skilled workers, technicians, and other specialists, about 500,000 students would graduate during 1958-62. The total enrolment in higher educational institutes would reach 850,000 in 1962, or about twice the figure planned for 1957.

Concessions to Private Enterprise.

Chen Yun stated in the National People's Congress on June 18 that the minimum interest paid to former owners of private enterprises now under joint private and public ownership would be raised from 1 to 5 per cent. The State Council announced on July 21 that all investments in private enterprises would be repaid before their transfer to joint ownership.

Artistic and Scientific Policy.

Lu Ting-yi (head of the Communist Party's propaganda department), addressing a meeting of writers, artists, and scientists in Peking on June 14, stated that the party advocated "freedom of independent thinking in literature, art, and scientific research, freedom of debate, freedom of creative work, and freedom to criticize," as academic development would stagnate in the absence of free discussion.

Ideological problems, he stated, could not be solved by administrative orders but only through open debate, and therefore the party's policy was to "let flowers of all seasons blossom together and let diverse schools of thought contend" He denounced in particular the practice of attaching "class labels" to scientific theories, declaring that it was wrong to describe the Mendel-Morgan theory of heredity as "capitalist" and Pavlov's and Michurin's theories as "socialist" "Natural sciences have no class character," he added. "They have their own laws of development. Their relation with social systems is only that under bad social systems these sciences develop slowly, and under better social systems they can develop quickly." Similarly, in philosophy there should be freedom to propagate both idealist and materialist systems of thought , and in literature and art, although "Socialist realism" was the best method of creation, it should not be regarded as the only one.

Lu Ting-yi's attack on "class labels" in scientific studies referred to Professor Lysenko's methods of controversy, which had recently been criticized in the Soviet Union.—(Times - Daily Telegraph - Manchester Guardian - New York Times - Le Monde, Paris - The Economist) **(Prev. rep. 14817 A; First Five-Year Plan, 14403 A.)**

A. UNITED KINGDOM. — Coal Industry. - Production and Developments, Third Quarter of 1956.

The following table shows the average weekly rates of coal production and consumption, and of manpower, output, and absenteeism in the third quarter of 1956 :

	Saleable Mined Coal Produced Tons	Plus Opencast Tons	Total Production Tons	Inland Consumption Tons	Overseas Shipments & Bunkers Tons
July	3,509,900	270,300	3,780,200	3,598,500	195,250
August	3,188,640	191,620	3,380,260	3,265,000	164,000
September	4,016,000	231,800	4,247,800	3,830,250	179,250
3rd Quarter	3,571,513	231,243	3,802,753	3,654,583	179,500

	Wage-earners on colliery books		No. of shifts worked per wage-earner	Output per manshift		Percentage of absenteeism
	Total	at coal-face		at coal-face Tons	overall Tons	
July	702,375	286,050	4.05	3.434	1.230	12.32
August	702,320	285,460	4.04	3.128	1.146	12.78
September	702,900	285,125	4.72	3.256	1.208	12.96
3rd Quarter	702,532	285,545	4.26	3 273	1.194	12.69

Other recent developments in the coalmining industry are summarized below :

Opencast Mining Compensation. Mr. Aubrey Jones, Minister of Fuel and Power, stated in a written reply on Nov. 1 that in view of the necessity of maintaining opencast coal production at a high level for at least 10 years, the Government had decided to increase the compensation paid to owners and occupiers of requisitioned land as follows (1) rental compensation paid to occupiers would, in general, be increased by 300 p.c. ; (2) rehabilitation allowances equal to three years' rental compensation would be paid to owners on derequisitioning of their land; (3) the rehabilitation allowances paid to landowners on derequisitioning to cover loss of full beneficial use of the land, on condition that the benefit was passed to the occupiers, would in future be paid in every case, instead of in some cases only as hitherto. In general, compensation would be the equivalent of one year's rental compensation, but in certain cases it might be increased to two years' rental compensation.

Underground Coal Gasification. The National Coal Board announced on Oct. 3 that an executive had been set up to supervise the planning and construction of a pilot plant for underground coal gasification (see 15059 A). Mr. J. Norval would be full-time chairman of the executive, and its five part-time members would include Dr Bronowski, director of the N.C.B 's research establishment.

Reconstruction of Scottish Pits. The N.C.B. further announced on Oct. 22 that, following the setting-up of a reconstruction department at headquarters (see 15059 A), a reconstruction department for the Scottish Division would be established on Nov. 1

Mr. Aubrey Jones made an Order on Oct. 5 fixing Jan. 1, 1957 as the date when the Mines and Quarries Act (see 14269 A) would come into operation.—(Times - Daily Telegraph) **(Prev. rep. 15059 A.)**

B. ETHIOPIA. — Expulsion of Egyptian Military Attaché.

The Egyptian Military, Naval, and Air Attaché in Addis Ababa, Lieut.-Colonel Hilmy, was ordered by the Ethiopian Government on Nov. 26 to leave the country. No reason was given for the expulsion of Lieutenant-Colonel Hilmy, who had been in Addis Ababa for about three years. (Times)

A. UNITED KINGDOM. — Civil Aviation. - Reports of British European Airways and British Overseas Airways Corporations for 1955-56. - B.E.A. to share in Irish Services.

The reports and accounts of the British European Airways and British Overseas Airways Corporations for the financial year ended March 31, 1956 were published on Aug. 22 and Aug. 31 respectively. They showed that whilst B.E.A. increased its net profit more than nine-fold as compared with 1954-55, the net profit earned by B.O.A.C. in 1955-56 was less than half the 1954-55 figure. The reports are summarized below.

British European Airways Corporation.

Gross revenue on operating account totalled £21,599,494 (compared with £17,141,314 in 1954-55), and operating expenditure £20,500,620 (£16,589,000), resulting in a gross profit on operations of £1,098,874 (£552,314). B.E.A.'s share of the profits of associated companies amounted to £70,656, and profit on depreciation account to £56,274. After adding these, and deducting salaries of the chairman and Board members (£11,087) and a loss on helicopter experimental operations account (£13,148), the gross profit for the year amounted to £1,201,569. Interest on capital and other financial charges totalled £597,955, making a net profit of £603,614, compared with £63,039 in 1954-55.

The net profit earned in 1955-56 wiped out the accumulated deficiency of £539,086 brought forward from 1954-55 (representing the excess of past losses over Exchequer grants) and enabled a credit balance of £64,528 to be carried forward.

The report gave the following detailed information:

Traffic Revenue. This amounted to £20,852,031 (£16,594,461 in 1954-55), made up as follows: passengers £17,870,636 (£14,203,085), mail £1,554,241 (£1,249,727), freight £1,290,669 (£1,047,232); charters £136,485 (£94,417). Of the total revenue from scheduled services, £16,205,299 (77.7 per cent) was contributed by the international services and £4,646,732 (22.3 per cent) by the domestic services.

The average revenue rate for all services increased from 62.6d. per load ton-mile in 1954-55 to 63 6d. in 1955-56.

Operating Expenditure. The report explained that the increase over 1954-55 reflected substantially higher aircraft standing charges, increased flying costs, exceptional charges for *Elizabethan* fatigue testing and modification, higher payroll expenditure, and the continued inflationary trend at home and on the Continent.

Traffic. Traffic on B.E.A. international routes increased by 23 per cent to 59,030,392 load ton-miles, and on domestic services by 24 per cent to 19,640,072 load ton-miles.

The total number of passengers carried increased by 18 per cent to 2,244,747 and the number carried on domestic services by 20 per cent to 1,029,488, this being the first year in which these totals exceeded the 2,000,000 and 1,000,000 marks respectively. Revenue passenger-miles increased from 577,077,730 to 708,769,182, and the passenger load factor from 68.4 per cent to the record figure of 69.4 per cent. The largest percentage increases in passenger mileage on international routes were recorded for the Provincial-Continental routes (86), Scandinavian services (41), Iberian routes (39) and Austro-Swiss and Milan services (32). A 5 per cent decrease on the London-Paris route was attributed to a strike of French air traffic control workers. In domestic services, the largest percentage increases were shown on the London-Scottish route (36 per cent) and the London-Belfast route (24 per cent).

As the result of an intensified freight drive, cargo carried during 1955-56 increased by 24.9 per cent to 18,586 tons, and freight ton-miles by 31 8 per cent to 7,547,708. Cargo carried by B.E A 's international services increased by 29 per cent, against an average increase for other principal European operators of 17 per cent. Although 73 per cent of all B.E.A. freight traffic was carried on passenger services, and the Corporation would continue to aim at carrying as much freight as possible by passenger aircraft, the all-cargo services would still be developed to deal especially with bulky loads.

Mail carried increased during the year by 13.4 per cent to 7,895 tons, and mail ton-miles by 24.9 per cent to 3,745,538.

Load Factor and Costs. The revenue load factor decreased from 64.7 per cent in 1954-55 to 63 2 per cent in 1955-56, the report explaining that although both mail and freight had increased considerably during the year, they had not kept pace with the additional cargo space made available by the extra frequencies operated by the larger aircraft. The "break even" load factor (i e. the load factor required to cover expenditure), however, had decreased from 64.5 to 61.4 per cent, and the profit margin had therefore increased from 0.2 per cent to 1.8 per cent

Fares Policy. The report stated that whereas the cost-of-living index had risen by about 30 per cent since 1950-51, B.E.A. fares had actually been reduced by an average of 6.9 per cent, and now stood at an average for all routes of 5 945d a passenger-mile More cheap night services had been provided by *Viscounts* on international routes, thus bringing air transport to a wider public and increasing aircraft utilization. More such services would be introduced during 1956-57, and fare inducements would also be introduced to encourage mid-week travel in order to reduce week-end congestion.

On domestic routes, the policy of holding down fares had led to a major development of traffic, but in spite of a good load factor these routes did not yet show a profit on total costs, including their share of overheads; it might therefore be necessary to raise domestic fares somewhat.

Route Mileage. During 1955-56 route mileage increased from 21,190 miles to 25,367 miles.

Aircraft Fleet. Fixed-wing aircraft in service at March 31, 1956 numbered 101, comprising 28 *Viscounts*, 19 *Elizabethans*, 38 *Pionairs*, 6 *Islanders*, 2 *Herons*, and 8 *Pionair-Leopard* freighters Because of a serious shortage of aircraft, a special effort had been made to step up aircraft utilization, and utilization of *Viscounts* and *Elizabethans* had increased by 18.3 per cent and 32.5 per cent respectively since 1953-54.

Helicopter Experimental Unit. During the year the B.E A. helicopter experimental unit flew a total of 1,554 hours, a 46 per cent increase on 1954-55. The London Airport-Eastleigh (Southampton) service ended in May 1955 and the London Airport - South Bank (Waterloo) service on May 31, 1956. A new scheduled passenger service linking Nottingham, Leicester, and Birmingham was opened on July 2, 1956.

Staff. At March 31, 1956 B E A staff totalled 10,072, compared with 9,117 at March 31, 1955. Productivity (measured in terms of capacity-ton-miles produced per employee) increased by 20.2 per cent.

Future Plans. The report stated that in view of the probable doubling of B.E.A. traffic in the next five years, the Corporation was negotiating orders for 24 *Viscount V802* 58-seaters, 14 *Viscount V806's* (capable of 350 m p.h. on service), and 20 *Vanguard V951's*, whilst it was also negotiating options for 7 *Viscount V810's* and 12 *Viscount V840's* (the latter able to average 400 m p.h.). The first *Viscount 802's* would be in service in the autumn of 1956, and the whole batch would be delivered by the summer of 1957. The *V806's* would begin to come into service later in 1957, and if the options were taken up *V810's* and *V840's* would come into service in 1958 and 1959 After these, the 96-seater *Vanguards*, with a service speed of 425 m p.h., would be delivered from 1960 onwards and would "usher in a new era of B.E A turbine-engined aircraft." The Corporation believed that this aircraft fleet, as well as giving adequate productive capacity, would "meet the main competitive, economic, and operational problems of B.E A.'s network into the early 1960's."

The publication of the report followed closely on the tenth anniversary of B.E.A.'s formation on Aug. 1, 1946. The report pointed out that during the decade it had "grown from a modest operation with a small fleet of ex-R.A.F. *Dakotas* to one of the world's great airlines," having carried over 12,000,000 passengers and flown nearly 4,000,000,000 passenger-miles. Comparing 1955-56 with 1947-48, the first full financial year of operation, revenue had risen fourfold and volume of traffic fivefold, while the unit cost of production had been halved.

British Overseas Airways Corporation.

Operational revenue amounted to £42,706,852 (compared with £36,860,199 in 1954-55) and operational expenditure to £41,264,980 (£37,727,099), resulting in a gross profit on operating account of £1,446,602 (£1,139,100). After adjusting for the results of ancillary and subsidiary undertakings, and deducting board members' and auditors' fees, the net profit (before remuneration of capital) totalled £1,295,525, compared with £1,362,180 in 1954-55. After deducting £1,177,794 for interest, the net surplus amounted to £117,731, against £261,687 in 1954-55.

The addition to the net profit, a surplus of £412,124 on the disposal of stores, etc., and of £350,000 brought in from the Taxation Equalization Account enabled B.O.A.C. to wipe out the deficit of £861,974 brought forward from previous years and, for the first time in its history, to carry forward a small credit balance of £13,881.

The report stressed that the disruption of B O.A.C.'s plans for substantial re-equipment with *Comets* had again seriously affected the revenue-earning ability of its services Although with the available fleet and with aircraft chartered from other operators the Corporation had succeeded in providing 21 per cent more capacity than in 1954-55, this percentage was nine per cent less than had been planned for 1955-56 with the *Comets* in service. Moreover, the only aircraft available for immediate delivery as substitutes for the *Comets* were no match in passenger appeal for the more modern aircraft owned by competing airlines. It was therefore the more creditable that the number of passengers carried by the Corporation should have increased by 32 per cent over 1954-55.

Detailed information given in the report is summarized below:

Revenue. Passenger revenue on scheduled services rose from £22,900,117 in 1954-55 to £27,306,419, freight revenue from £3,453,042 to £3,796,000, and revenue from mails from £8,800,730 to £9,482,436. Passenger revenue from non-scheduled services increased from £705,099 to £1,017,813

Traffic. The number of passengers carried rose from 291,136 in 1954-55 to 385,778; 53 per cent of the total were tourist class passengers, compared with 45 per cent in 1954-55. The passenger load factor rose from 61.6 per cent to 62.2 per cent.

Cargo carried rose from 6,000 tons to 7,050 tons, and mail from 3,407 tons to 3,815 tons.

Capacity-Ton-Miles and Load Factor. The capacity provided by the Corporation rose from 214,924,282 capacity-ton-miles in 1954-55 to 260,286,387 in 1955-56. The volume of traffic (all services, scheduled and non-scheduled) rose from 139,000,648 ton-miles in 1954-55 to 163,681,577, but the overall load factor fell from 63.7 per cent to 61 per cent.

Costs. Operating costs fell from 39.9d per capacity-ton-mile in 1954-55 to 38.0d., considerably below any figure achieved since the Corporation's formation. Operating costs per revenue-mile, however, increased from 22s. 8d. to 22s 11d.

Staff. The Corporation's staff at March 31, 1956, numbered 18,411 (14,352 at home and 4,059 overseas), compared with 17,062 a year earlier.

Fleet. The Corporation's revenue-earning fleet at March 31, 1956, numbered 57 aircraft (21 *Argonauts*, 16 *Constellations*, 16 *Stratocruisers*, and 4 *Yorks*), compared with 47 at March 31, 1955. At the end of the year it had either placed or was negotiating orders for 15 Bristol *Britannia 102s* (of which four had already been delivered), 7 *Britannia 302s*, 11 *Britannia 312s*, 20 De Havilland *Comets*, 10 Douglas *DC7s*, and 14 Vickers *Viscounts* The remainder of the *Britannia 102s* were promised for delivery by March 1957, but the Corporation were considering replacing the order for the *Britannia 302s* by one for an additional seven of the longer-range *312* version.

Relations with Associated Companies and Independent Operators. In furtherance of the Corporation's policy of encouraging the development of strong local companies in the Middle East, a new organization—Associated British Airlines Ltd.—had been registered as a holding company for its investments in Aden Airways Ltd., Arab Airways (Jerusalem) Ltd., British International Air Lines Ltd., Gulf Aviation Ltd., and Middle East Airlines Ltd. British European Airways and Hunting-Clan Air Holdings Ltd. had also acquired shares in the new holding company, whose formation would facilitate the co-ordination of British aviation interests in the Middle East.

Future Prospects. Mr. Gerard d'Erlanger, the Corporation's chairman, in a note on the prospects for 1956-57, stressed that the heavy expenditure involved in the introduction of the *Britannias* and *Douglas DC7's* would not be accompanied during the year by a compensatory increase in revenue, since neither aircraft would be in flying service for more than two or three months in 1956-57. The expenditure, moreover, would be increased by the fact that the *Proteus* engines powering the *Britannias* would initially have a very low overhaul life, necessitating the engagement and training of considerably more maintenance staff than would be needed later on. "The prospect of immediate future operations," continued Mr. d'Erlanger, "is that B O A.C. will be operating no less than five different types (*Britannias, Stratocruisers, DC7s, Argonauts*, and *Constellations*) The complications arising from this situation, together with the inevitable waste of resources and manpower, are bound to have a continuing adverse effect on the economics of the Corporation until such time as this complex can be resolved. In the years immediately after 1956-57 we face the future with good prospects The long-range *Britannias* should be in service late in 1957 and the *Comet IVs* a couple of years later. With these British aircraft the Corporation should have two outstanding types in operation ahead of other international airlines"

Mr. Harold Watkinson, the Minister of Transport and Civil Aviation, announced in a written parliamentary reply on Oct. 24 that, as an exceptional measure to bridge the gap until a new type of British airliner was produced, the Government had agreed to the purchase by B.O.A.C. of 15 *Boeing 707* jet aircraft, to be powered by Rolls-Royce *Conway* engines. The cost of the aircraft and initial spares would be about £55,000,000, including £35,000,000 to be paid in dollars. To enable the Corporation to meet the expenditure involved, the Government intended to increase its borrowing powers [see below]

Mr. Watkinson explained that the Corporation was urgently discussing with the de Havilland Aircraft Company details of a new airliner to meet its special requirements, but this aircraft could not be available by 1959-60, when *Boeing 707's* would already be in service with foreign airlines on the North Atlantic routes. The purchase was therefore necessary to enable B.O.A.C. to maintain its competitive position on that route.

The Aeronautical Correspondent of *The Times* stated on Oct. 24 that, of the three versions of the *Boeing 707* in existence, that to be supplied to B.O.A.C. would be the largest and longest-ranged, the *707-320 Intercontinental*. It would be able to carry up to 170 passengers at a cruising speed of 550-600 m.p.h. and, it was claimed, would fly non-stop from New York to London and from Chicago to Paris in five and seven hours respectively, from London to Johannesburg non-stop in under 11 hours, and from London to Sydney *via* Cairo and Calcutta in just over 21 hours

A spokesman for the de Havilland Company said on the same day that the new aircraft planned, at present known as the *DH 118*, would have a cruising speed of 550 m.p.h. and a range comparable with that of any large U.S. airliner. It would, however, be somewhat smaller in passenger capacity, and in consequence would be considerably more flexible and more suitable for most world air routes. If the de Havilland Company were given an immediate "go ahead," the aircraft could be ready for service early in 1962.

It was announced on Aug. 31 that, after protracted negotiations since 1953, agreement had been reached between the British and Irish Governments for a revision of the arrangement by which *Aer Lingus* had had a monopoly of air routes between the two countries since 1946.

Under the new arrangement (1) B.E.A. acquired the right to operate, equally with *Aer Lingus*, on the London-Dublin, Manchester-Liverpool-Dublin, and Birmingham-Dublin routes; (2) *Aer Lingus* retained a monopoly of certain existing routes, including the Dublin-Glasgow, Dublin-Edinburgh, Dublin-Isle of Man, and Dublin-Jersey services, (3) *Aer Lingus* acquired the right to operate new services from Dublin *via* Manchester to Brussels, Frankfurt, Düsseldorf, Amsterdam, Zurich, and Rome, (4) routes were provided for several new services, two of these—Newcastle-Dublin and Haverfordwest-Dublin—being reserved for British companies, (5) B E A.'s capital investment in *Aer Lingus* was reduced from 40 per cent to 10 per cent, the difference to be paid for at par by the Irish holding company, *Aer Rianta*, over an agreed period; (6) B.O.A.C. retained the right to operate its North Atlantic services *via* Shannon Airport, as hitherto.

B.E.A. explained on the same day that it would not open its services on the Irish routes until April 1957, and that it intended, gradually and as traffic increased, to build up its services to an equality with *Aer Lingus*.

The Air Corporations Bill, increasing the respective borrowing powers of B.O.A.C. and B.E.A.C. from £80,000,000 to £160,000,000 and from £35,000,000 to £60,000,000, was given unopposed second and third readings in the House of Commons on Nov. 22-23.—(B.E.A. and B.O.A.C. Reports and Accounts - Times - Daily Telegraph - Manchester Guardian - Irish Times, Dublin) **(Prev. rep. B.E.A. Report for 1954-55, 14631 A; B.O.A.C. Report, 14558 A; Aer Lingus Agreement, 7863 B.)**

A. CANADA. — Equal Pay for Women Workers covered by Federal Labour Legislation.

The Female Employees Equal Pay Act, which had been passed by the Canadian Parliament in July, came into effect on Oct. 1, 1956. It provided that female employees coming under Federal labour laws who performed work identical, or substantially identical, to that performed by male employees would be paid on the same basis. The 72,000 women workers benefiting from the new legislation included those employed by the railways, in navigation and shipping, and in telegraphic communications, airlines, broadcasting, banking, and other activities of an inter-provincial or international nature.
(Montreal Star)

B. TURKEY. — Cabinet Changes.

Mr. Çavusoglu, the Minister of Public Works, resigned in October through ill-health and was succeeded by Mr. Ethem Menderes, who remained acting Foreign Minister but relinquished the portfolio of the Interior. The Minister of Justice, Mr. Gokturk, was appointed acting Minister of the Interior. On Nov. 27 the Minister of Economy and Commerce, Mr. Mandalinci, also resigned and was succeeded by Mr. Abdullah Akar.

Mr. Ökmen, the Minister of Finance, had resigned in August, the Finance portfolio being taken over *ad interim* by the Prime Minister, Mr. Adnan Menderes. (Turkish Embassy, London)
(Prev. rep. 14926 B.)

C. BURMA - SIAM. — Friendship Treaty.

A treaty of "perpetual peace and everlasting friendship" between Burma and Siam was signed on Oct. 15 at Bangkok by the Siamese Foreign Minister, Prince Wan Waithayakon, and the Burmese Ambassador. It provided *inter alia* that nationals of either country would enjoy in the other reciprocal rights of residence, of engaging in professions, trade, and industry, and of acquiring property. Both countries agreed to conclude as soon as practicable treaties of commerce and navigation, consular rights and privileges, cultural relations, and extradition. (Burmese Government Information Department)

D. NETHERLANDS. — Dismissal of Court Officials.

It was announced in The Hague on Nov. 23 that three members of the Royal Household had been released by Queen Juliana from their duties—Baron van Heekeren van Molecaten (formerly head of the Secretariat), Dr. J. G. van Maasdijk (a Court chamberlain), and Miss Martine de Jong (formerly private secretary to the Queen). Changes in the Dutch Court had been foreshadowed a fortnight earlier by the Prime Minister, Dr. Drees, following the recent investigation into the position of Miss Greet Hofmans, the faith-healer, with whom the Queen had earlier broken off relations.
(Algemeen Handelsblad, Amsterdam) **(15055 A; 14975 B.)**

A. MIDDLE EAST. — Beirut Conference of Arab Heads of State.

A conference of Arab heads of State and their Ministers was held at Beirut from Nov. 13-15 on the initiative of President Chamoun of the Lebanon. Those present (in addition to President Chamoun) included King Feisal of Iraq; King Hussein of Jordan; King Saud of Saudi Arabia; President Kuwatly of Syria; the Crown Prince of Yemen; the Prime Ministers of Jordan, Syria, the Lebanon, and Libya (respectively M. Nabulsi, M. Sabri Assali, M. Yaffi, and Mustafa ben-Halim); and the Egyptian Ambassador in Beirut (M. Ghalib), representing President Nasser.

A statement issued on Nov 15 said the participants were unanimously agreed on the need to apply the U.N resolutions on the Middle East, and had demanded "the immediate and unconditional withdrawal" of the Anglo-French forces in Egypt, as well as the withdrawal of the Israeli forces to the armistice lines. If, however, Britain, France, and Israel adopted an attitude which led to a resumption of hostilities against Egypt, they would be held jointly responsible for "collaborating to continue their aggression." In that event all the Arab States represented at the conference would 'immediately take effective measures of legitimate defence" in accordance with Article 41 of the U.N Charter and Article 2 of the Joint Arab Defence Treaty.

The communiqué went on to say that the Suez Canal question should be solved separately by negotiation in a manner which complied with the requirements of Egypt's sovereignty and dignity, within the framework of the United Nations, and on the basis of the 1888 Convention and of the Security Council's resolutions of Oct. 13, 1956. The statement also expressed the support of the Arab leaders for the demands of the Algerian people in their "struggle for the realization of their national aspirations to independence and sovereignty"

[Article 2 of the Joint Arab Defence Treaty lays down that aggression against any one of the signatories would be considered as aggression against all participating countries, which would undertake to employ all means, including armed force, to repulse it.]

It was reported in the British press that President Kuwatly of Syria had unsuccessfully tried to persuade the Lebanon to break off diplomatic relations with Britain and France. President Chamoun was understood to have been supported in his opposition by King Feisal of Iraq and King Saud, who had been gravely concerned by the threat to their countries' oil interests through Syria's action in blowing up the pipelines from Iraq, as well as by the closing of the Suez Canal.—(Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris)

(Prev. rep. Middle East Crisis, 15201 A.)

B. UNITED KINGDOM. — Retail and Wholesale Prices, April-October 1956.

The movement of the retail prices index for "all items" for each month from April to October, taking the level of prices at Jan. 17, 1956 as 100, was as follows: at April 17 and May 15 the figure was 103, at June 12, July 17, Aug. 14 and Sept. 18 it remained stable at 102, whilst at Oct. 16 it rose again to 103.

The Ministry of Labour explained that the increase between Sept. 18 and Oct. 16 was due mainly to higher prices for bread, and to certain increases in rents and rates and in the average price of beer

The Board of Trade Basic Materials index for the same period (June 30, 1949=100) was 155.2 (revised) in April and 155.8 in May. In June it fell to 155.4, fell again in July to 154.7, rose in August and September to 155.8 and 156.6 respectively, but fell to 155.5 in October.—(Board of Trade Journal - Ministry of Labour Gazette) **(Prev. rep. 14923 A.)**

C. CANADA. — Expulsion of Soviet Diplomat.

The Canadian External Affairs Department disclosed on Sept. 24 that the Canadian Government had asked on July 12 for the withdrawal of Mr. G. F. Popov, Second Secretary at the Soviet Embassy in Ottawa, on the grounds that he had "engaged in activities incompatible with his continued presence in Canada." Mr. Popov had left Canada on Aug. 12.

The Canadian press reported that the reason for the Canadian request was that Mr. Popov had tried to obtain from a civilian employee of the Royal Canadian Air Force (Mr. J. S. Staples) information regarding the top-secret CF-105 jet fighter now nearing completion, and that Mr. Staples had reported the matter to the authorities.—(Montreal Star)

D. INDIA. — New Army Chief of Staff.

It was announced in New Delhi on Nov. 24 that Lieut.-general K. S. Thimayya, G.O.C.-in-C., Eastern Command, had been appointed Chief of Army Staff (with the rank of full general) and would succeed General Srinagesh on the latter's retirement in May, 1957.—(The Statesman, Calcutta)

(Prev. rep. 14050 B.)

E. RHODESIA AND NYASALAND FEDERATION. — Resignation of Lord Malvern. - Sir Roy Welensky becomes Prime Minister. - New Cabinet.

Lord Malvern announced on Oct. 31 his resignation as Prime Minister of the Federation of Rhodesia and Nyasaland, but stated that he would retain his seat in the Federal Assembly. His 23 years of unbroken office as Prime Minister, first of Southern Rhodesia (1933 to 1953) and then of the Federation, had never been equalled by any other Commonwealth Prime Minister.

Giving the reasons for his resignation, Lord Malvern said in a press statement "When the Governor-General appointed me interim Federal Prime Minister and Sir Roy Welensky and Sir Malcolm Barrow as interim Ministers, I informed my colleagues that I was prepared to carry on as Prime Minister for two years [see 13133 A]. When I was in London towards the end of that period my early retirement was discussed in Southern Rhodesia, and it seemed that if I retired then there would have been some political repercussions which were highly undesirable at that time At a Rhodesia and Nyasaland Club dinner in London I announced that I was not retiring then and so long as I was in office I should decide the right time to retire—when I considered it in the best interests of the Federation. I consider that time has now arrived, and therefore I have placed my resignation in the hands of the Acting Governor-General (Sir Robert Tredgold), to take effect from Nov 1 as soon as my successor is appointed The main reason why I think it is in the country's best interests is because it would enable the new Prime Minister, as leader of the Federal Party, to have adequate time to make his arrangements to win the next general election, which must take place before the end of 1958 "

Sir Roy Welensky, the Federal Minister of Transport and Communications, was appointed Prime Minister on Nov. 1. The new Cabinet was sworn in on the same day, distribution of portfolios being as follows.

Sir Roy Welensky	Prime Minister, External Affairs, and Defence.
Sir Malcolm Barrow .	Home Affairs and Power.
Mr. D. Macintyre	Finance and Posts.
Mr. J. M. Caldicott ..	Agriculture, Health, and Public Service.
Mr. J. M. Greenfield ..	Law and Education.
Mr. F. S. Owen . ..	Commerce and Industry.
Mr. W. H. Eastwood .	Transport and Works.

Sir Roy Welensky also announced the creation of two new posts of Parliamentary Secretaries who would, in effect, be "Under Ministers"—Mr. B. D. Goldberg in the Ministry of Home Affairs, who would deal with immigration problems; and Mr. G. W. R. L'Ange in the Ministry of Transport and Works, who would specialize in such matters as buildings and costs. In addition, Sir Roy announced that the new Secretary for Defence would be Mr. T. G. Gisborne (previously Secretary for Defence and External Affairs), and that the Department of External Affairs would be reorganized and combined with the Cabinet Office under a Permanent Secretary.

Sir Roy Welensky (49), the son of a Polish immigrant of half-Jewish origin and of an Afrikaans mother, worked as a young man as a mine storekeeper, hotel barman, and engine-driver. He took an early interest in trade union work, being elected in 1933 chairman of the Broken Hill branch of the Rhodesia Railway Workers' Union and a member of the National Council of Railwaymen In 1938 he was elected to the Northern Rhodesian Legislative Council as member for Broken Hill, became a member of the Colony's Executive Council in 1940, served as Director of Manpower during the Second World War; and in 1947 became leader of the unofficial Members in the Legislative Council He was knighted in June 1953 and became Minister of Transport and Communications after the formation of the Federation in September 1953.

Sir Malcolm Barrow, the only Minister from Nyasaland, had formerly been Minister of Power, Commerce, and Industry; Mr. Owen was Minister of Home Affairs, and Mr Macintyre had been Minister of Finance The Public Service portfolio, now given to Mr. Caldicott, had previously been under the care of the Prime Minister. Mr Eastwood was the only new member of the Cabinet.

Mr. Eastwood (65), who was born in London and settled in Southern Rhodesia in 1922, is M.P. for Bulawayo Suburbs. During the Second World War he was Director of Supplies, Rhodesia Air Training Group. He left the United Party in 1947 to join the Rhodesia Labour Party, to which he belonged until the 1953 election, when he was returned for the Federal Party.

It was announced on Nov. 3 that Mr. Greenfield would succeed Sir Roy Welensky as Leader of the House in the Federal Assembly.

In a message to the new Federal Prime Minister, Mr. Garfield Todd (Prime Minister of Southern Rhodesia) declared that Sir Roy Welensky could "count upon the support of Southern Rhodesia and its Government."—(Federal Information Department, Salisbury - Times) **(Prev. rep. Cabinet, 14549 C; Constitutional Question, 15167 A.)**

DECEMBER 1—8, 1956

A. UNITED STATES. — The Presidential and Congressional Elections. - Re-election of President Eisenhower. - Democratic Majorities in Senate and House of Representatives.

General Dwight D. Eisenhower was re-elected President of the United States in the presidential election held on Nov. 6, winning 41 States with a combined total of 457 votes in the Electoral College, whereas Mr. Adlai Stevenson won only seven States with a combined electoral vote of 74. President Eisenhower became the first Republican since 1900 to win the presidential election twice in succession—the last Republican President to do so being William McKinley, in 1896 and 1900.

Although losing the presidential elections, the Democrats retained control of the Senate and increased their majority in the House of Representatives, and will thus control the new (85th) Congress which meets on Jan. 3, 1957.

The Presidential Election.

The 41 States won by President Eisenhower and the seven won by Mr. Stevenson were as follows:

For Eisenhower: Arizona, California, Colorado, Connecticut, Delaware, Florida, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming.

For Stevenson: Alabama, Arkansas, Georgia, Mississippi, Missouri, North Carolina, South Carolina.

The Electoral College consists of 531 members, each State having as many electoral votes as it has members of the U.S. Senate and the House of Representatives.

Since each of the 48 States is represented by two Senators, the variations in their electoral vote spring from differences in their membership of the House of Representatives, which is proportionate to the population of each State. For example, Nevada—the least populated State—has three electoral votes (one for its Representative and two for its Senators), while New York, the most populous State, has 45 electoral votes (43 for its Representatives and two for its Senators). In addition to New York, which has the largest number of electoral votes, other "pivotal" States which can swing a close election are Pennsylvania and California (each with 32 electoral votes), Illinois (with 27), Ohio (with 25), Michigan (with 20), and Massachusetts and New Jersey (16 each).

The Presidential candidate obtaining the highest number of votes ("plurality") in each State is considered as the choice of the entire State, and, as a result, gets the State's entire block of votes in the Electoral College. To win an election, a candidate must obtain at least 266 votes in the Electoral College—i.e. a simple majority of the total of 531.

The popular votes (i.e. the total of votes polled) for President Eisenhower and Mr. Stevenson, together with the number of votes obtained by them in the Electoral College, is set forth below, comparison being given with the 1952 election:

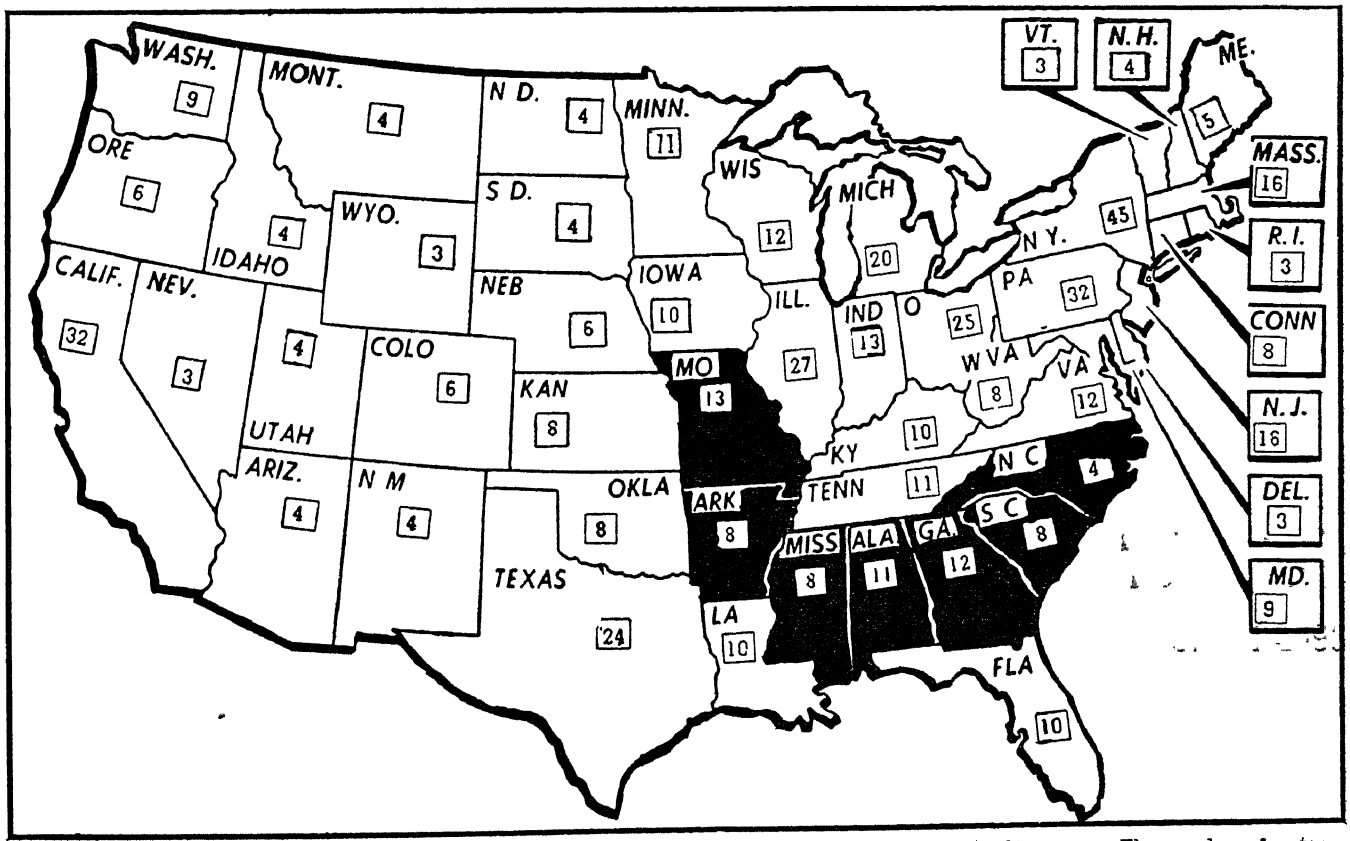
	Popular Vote		Electoral Vote	
	1956*	1952	1956	1952
Eisenhower	34,803,159	33,927,549	457	442
Stevenson	25,511,717	27,311,316	74	89

*Virtually complete figures, covering over 98 per cent of all electoral districts. Definitive figures will be given when published in Washington. (*Ed. K C.A.*).

As shown above, President Eisenhower polled nearly 1,000,000 more votes than in 1952, whilst Mr. Stevenson's vote fell by nearly 2,000,000. President Eisenhower's proportion of the total votes rose from 55.4 per cent in 1952 to 58 per cent in 1956, whereas Mr. Stevenson's fell from 46.6 per cent to 42 per cent. General Eisenhower's majority of over 9,000,000 votes had been exceeded only by President Franklin D. Roosevelt's majority of 10,797,000 in 1936, while his electoral vote of 457 had been exceeded only by President Roosevelt's record of 523 in the same election.

The difference between the Eisenhower and Roosevelt victories, however, was that the Democrats obtained large majorities in both Houses of Congress in 1936, whereas in 1956 the Republicans, though winning the Presidential election, failed to win control of either House in the Congressional elections. This was the first time a successful Presidential candidate had failed to carry at least one House with him since 1848, when General Zachary Taylor was elected President for the Whig Party but the Democrats captured both Houses of Congress

Mr. Stevenson retained his majority in six of the nine Southern States won by him in 1952 (Alabama, Arkansas, Georgia, Mississippi, North Carolina, and South Carolina), but lost the other three—Kentucky, Louisiana, and West Virginia—to the Republicans. On the other hand, Missouri, which returned a majority for President Eisenhower in 1952, was won by Mr. Stevenson in 1956. On balance, therefore, the Democrats lost two States as compared with the last presidential election.



White areas indicate the States won by President Eisenhower; black areas, those won by Mr. Stevenson. The number of votes possessed by each State in the Electoral College is also shown. (*New York Herald Tribune*)

The Electoral College votes since 1928 have been as follows (R., Republican; D., Democrat):

1956	Eisenhower (R.)	457	1940	Roosevelt (D.)	449
	Stevenson (D.)	74		Willkie (R.)	82
1952	Eisenhower (R.)	442	1936	Roosevelt (D.)	523
	Stevenson (D.)	89		Landon (R.)	8
1948	Truman (D.)	303	1932	Roosevelt (D.)	472
	Dewey (R.)	189		Hoover (R.)	59
	Thurmond ("Dixiecrat")	39	1928	Hoover (R.)	444
				Smith (D.)	87
1944	Roosevelt (D.)	432			
	Dewey (R.)	99			

The Senatorial Elections.

The elections—for one-third of the Senate's membership, plus vacancies caused by deaths or resignations—resulted in the Democrats maintaining their overall majority of two, as in the former Senate. There was thus no change in the political composition of the Senate, which remained as follows:

	New Senate	Old Senate
Democrats ..	49	49
Republicans ..	47	47

The Republicans gained four seats from the Democrats, who, in turn, gained four seats from the Republicans.

The four Republican gains were (i) in New York, where Mr. Jacob K. Javits (the State Attorney-General) defeated Mr. Robert F. Wagner (Mayor of New York City) for the seat previously held by Senator Herbert H. Lehman (78), who had retired from political life after having been for many years one of the leading Democratic Senators, (ii) in West Virginia, where Mr. Chapman Revercomb defeated Governor C. Marland for the seat left vacant by the death of Senator Harley M Kilgore; (iii) and (iv) in Kentucky, where the Republican candidates won both Senate seats—Mr. John Sherman Cooper (a former Ambassador to India, and well known as a "liberal" Republican) defeating Mr Lawrence W. Wetherby for the seat left vacant by the death of Senator Alben W. Barkley; and Mr. Thurston B Morton (a former Assistant Secretary of State) unseating Senator Earle C. Clements.

The four Democratic gains were (i) in Ohio, where Mr. Frank J. Lausche (the former State Governor) defeated Senator George H. Bender; (ii) in Idaho, where Mr. Frank Church beat Senator Herman Welker, a leading right-wing Republican; (iii) in Pennsylvania, where Mr. Joseph S. Clark jr. unseated Senator James H. Duff, and (iv) in Colorado, where Mr. John Carroll defeated Mr. Dan Thornton for the seat left vacant by the retirement of Senator Eugene D. Millikin.

In all, there were nine new members of the Senate as a result of the elections—the four Democrats and four Republicans mentioned above, and Mr Herman Talmadge, the former Governor of Georgia, who was elected as a Democratic Senator for that State.

Among leading Democratic Senators re-elected were James D. Fulbright (Arkansas), Warren G. Magnuson (Washington), and Wayne Morse (Oregon), the last-named defeating Mr. Douglas Mackay, who had resigned as Secretary of the Interior to contest the Senatorial elections in Oregon (see 14896 B). Incumbent Democratic Senators (i e those whose terms had not expired, and who will thus sit in the 85th Congress) include John J. Sparkman (Alabama), John L. McClellan (Arizona), A. J. Ellender (Louisiana), John F. Kennedy (Massachusetts), Hubert Humphrey (Minnesota), Stuart Symington (Missouri), Clinton Anderson (New Mexico), Estes Kefauver, the Democratic Vice-Presidential candidate (Tennessee), and Lyndon Johnson (Texas).

Leading Republican Senators re-elected included Everett Dirksen (Illinois), Homer Capehart (Indiana), Burke B Hickenlooper (Iowa), and Alexander Wiley (Wisconsin) Incumbent Republican Senators include William F. Knowland, the Republican leader in the Senate (California), Henry Dworshak (Idaho), William E. Jenner (Indiana), Margaret Chase Smith, the only woman Senator (Maine), Leverett Saltonstall (Massachusetts), Styles Bridges (New Hampshire), William Langer (North Dakota), John W. Bricker (Ohio), Karl Mundt (South Dakota), and Joseph McCarthy (Wisconsin).

The composition of the Senate since 1928 has been as follows:

	Democrats	Republicans	Others
1928	39	56	1
1930 . ..	47	48	1
1932	59	36	1
1934	69	25	2
1936	75	18	3
1938	69	23	4
1940	66	27	3
1942	57	38	1
1944	57	38	1
1946	46	50	—
1948	54	42	—
1950	49	47	—
1952	47	48	1
1954	49	47	—
1956	49	47	—

Elections to House of Representatives.

In the elections to the House of Representatives (in which all 435 seats were contested) the Democrats made three gains from the Republicans, thereby increasing their majority in the House to 35, as shown:

	New House	Old House
Democrats ..	235	232
Republicans ..	200	203

The membership of the House since 1928 has been:

	Democrats	Republicans	Others
1928	164	270	1
1930	214	220	1
1932 . . .	313	117	5
1934	322	103	10
1936 . .	333	89	13
1938	262	169	4
1940 . ..	267	162	6
1942	222	209	4
1944	243	190	2
1946 . ..	188	246	1
1948 . .	263	171	1
1950	235	199	1
1952	213	221	1
1954	232	203	—
1956	235	200	—

Gubernatorial Elections.

Thirty of the 48 State Governorships were up for election, of which 16 had been held by the Republicans and 14 by the Democrats. The Democrats won 15 Gubernatorial contests and the Republicans 14, with one result outstanding—Rhode Island, where counting of Servicemen's postal ballots had not been completed by the beginning of December. Excluding Rhode Island (which had a Democratic Governor prior to the elections) the Democrats hold 28 State Governorships and the Republicans 19, whereas before the elections the Democrats held 27 Governorships and the Republicans 21. The Democrats gained five State Governorships from the Republicans (in Massachusetts, Iowa, Kansas, Oregon, and Washington), while the Republicans gained three from the Democrats (in Ohio, New Mexico, and West Virginia).

In Ohio, the Republican candidate—Mr. C. William O'Neill, the State Attorney-General—was returned in place of ex-Governor Frank J. Lausche (Democrat), who had been elected to the Senate as stated above. The unsuccessful Democratic candidate was Mr. Michael J. DiSalle, who directed Federal price controls during the Korean war. In Massachusetts, the Democratic candidate—Mr. Foster Furcolo, a former member of the House of Representatives—was elected in succession to Governor Christian A. Herter (Republican) who did not stand for re-election. Iowa and Kansas elected Democratic Governors for the first time for 20 years, while West Virginia elected a Republican Governor for the first time for 28 years.

In accordance with custom, the elections in Maine (for a State Governor and three members of the House of Representatives) were held nearly a month in advance of the rest of the country. The Maine elections (Sept. 10) resulted in two Republicans and one Democrat being returned to the House of Representatives, and in the re-election of Mr. Edmund Muskie (Democrat) as State Governor.

The electoral campaign was vigorously conducted by both parties, extensive nation-wide "barnstorming" tours being made by Mr. Adlai Stevenson and Senator Kefauver, the Democratic presidential and vice-presidential candidates, and by Vice-President Nixon for the Republicans. President Eisenhower, who was stated by his doctors on Oct. 28 to be in excellent health, confined his campaign tours to the Middle West and the Pacific coast, in addition to delivering a number of radio and television broadcasts. The final stages of the campaign, however, were completely overshadowed by the crisis in the Middle East and the uprising in Hungary.

Apart from the differences between the two parties—largely on internal issues—as set out in the party programmes (see 15089 A, 15073 A), Mr. Stevenson made a special issue of nuclear weapon tests. In a speech on Oct 15, and a number of subsequent speeches, Mr. Stevenson accused the Republican Administration of lack of imaginative leadership in removing the threat of atomic destruction, and pledged himself, if elected President, to open negotiations with the U S.S R and Britain for the immediate suspension of tests of hydrogen bombs and other nuclear weapons. Mr. Stevenson's charges against the Administration were refuted in a statement issued from the White House on Oct. 23.

In conceding the presidential election to President Eisenhower, Mr. Stevenson sent a telegram to the President offering his "warm congratulations" and wishing him "success in the years that lie ahead." Mr. Stevenson announced on Dec. 4 that he would not be a candidate at any subsequent presidential election.—(New York Times - New York Herald Tribune)

A. UNITED KINGDOM. — Large Fall in Gold and Dollar Reserves. - Mr. Macmillan's Announcement of Steps to maintain the Pound. - Increase in Petrol Duty.

The Treasury announced on Dec. 4 that the sterling area's gold and dollar reserves had fallen by $279,000,000 during November, after taking into account (*a*) $4,000,000 received in U.S. defence aid, (*b*) $28,000,000 paid to the E.P.U. in respect of the October settlement, and (*c*) $3,000,000 paid to the creditors of E.P U. in bilateral settlements. As a result, the sterling area's gold and dollar reserves stood at $1,965,000 000 on Nov. 30, 1956.

The fall in the reserves during November followed one of $84,000,000 during October after taking into account (*a*) $7,000,000 received in U.S. defence aid, (*b*) $25,000,000 paid to the E.P.U in respect of the September settlement, and (*c*) $3,000,000 paid to the creditors of the E.P.U. in bilateral settlements. As a result, the sterling area's gold and dollar reserves had stood at $2,244,000,000 on Oct. 31.

Provisional figures for the E P.U. October settlement showed that the U.K had a deficit of £13,000,000, while provisional figures for the November settlement showed a U K deficit of £24,000,000. The October deficit was settled in November, whilst the November deficit will be settled in December—in both cases as to three-quarters in gold or dollars and as to one-quarter by an increase in the U.K. debt to the European Payments Union

In announcing the November fall in the gold and dollar reserves to the House of Commons on Dec. 4, the Chancellor of the Exchequer (Mr. Macmillan) spoke on the causes of the fall, stressed the Government's determination to maintain the pound sterling at its present parity, and announced measures which H.M. Government had decided to take, both externally and internally, to deal with the situation. These measures were: (*a*) an approach to the International Monetary Fund with a view to drawing, if necessary, on part of the U.K. quota; (*b*) the possible use, if necessary, of the Government-owned dollar securities in U.S. industrial and commercial undertakings as collateral for a loan, and the partial sale of the Government's holdings of short-term U.S. Government securities, (*c*) applications to the U.S.A. and Canada for a waiver of the interest on the loan instalments due on Dec 31, 1956, and (*d*) an increase of 1s. a gallon in the petrol duty.

Mr. Macmillan spoke as follows:

"The customary monthly announcement of the gold and dollar reserves shows a fall of $279,000,000 in the reserves to $1,965.000,000, and a deficit of £24,000,000 in the E P U I think it is right that the House should have an immediate explanation both of the significance of these figures and of Government policy

"First, the figures During the first half of this year our gold and dollar reserves rose by $265,000,000 For a number of reasons of which the House is well aware the pressure on the reserves is always greater in the second half of the year, but at the end of July I had no reason to suppose that this would be more than normal In fact, in the third quarter the fall was $57,000,000 and would have been about $230,000,000 had it not been for the special receipt from the sale of the Trinidad Oil Company In October the fall was $84,000,000 and in November, as I have said, the figure was $279,000,000

"These falls in the reserves and the deficit in the E.P U started after Colonel Nasser's seizure of the Suez Canal, and have not been caused by any weakness in our trading position The U K. trading position has been and continues to be essentially sound But the closure of the Suez Canal and of the Iraq Petroleum Company pipelines must adversely affect our balance of payments, especially if these interruptions are prolonged The most realistic forecast which I can at present give the House is that over the year July 1, 1956 to June 30, 1957, our external current trading account will be roughly in balance. The events of the past four months and the international tension they have caused have increased the pressure on sterling. It is this factor which has been almost entirely responsible for the recent losses As the House knows, sterling is particularly affected by movements in world confidence because it is so widely held and used. It finances half the world's trade and payments

"It would be wrong to minimize the seriousness of the losses which the reserves have suffered It would be equally wrong not to view them against their proper background On this I wish to make three points

"(1) Since the losses have arisen primarily from the international situation, they should not be permanent, the trend will reverse itself as the position improves

"(2) For some time now there has been a consistent reduction in the total sterling balances, especially those held by non-sterling-area countries Normally when the reserves rise the liabilities rise as well. But in fact in the first half of this year the reserves rose by £95,000,000, and the liabilities fell by £22,000,000. Thus our capital position had been strengthened when the Suez Canal crisis broke

"(3) If we take the necessary steps—as we intend to do—to keep our trading position strong, the surplus that we may earn as traders must in due course reflect itself in our improved capital position as financiers I have no doubt that the rest of the sterling area will face the difficulties in the same spirit.

"In brief, therefore, the immediate problem which faces us is short-term pressure on the pound rather than long-term defects in our trading position. The immediate task is to repel the attack on the pound sterling This requires action both externally and internally.

"In these circumstances the broad lines of our economic policy are clear. They are as follows:

"(1) We will maintain the rate for the pound sterling at its present parity; to this end we will take all necessary action to fortify the reserves and to strengthen the internal economy.

"(2) We must do all in our power to maintain industrial production. The country depends for its livelihood on exports, and these depend in turn on the volume and efficiency of our production.

"(3) We must do everything possible to maintain and increase the volume of world trade on which we, perhaps more than any other country, depend For this reason, apart from any others, I would regard it as wrong to resort to import controls in present circumstances.

'I now deal more specifically with the actions which I propose to take We must fortify our gold and dollar reserves. We shall mobilize, to supplement these reserves, some of the other resources which are available to us

"First, there is access to the International Monetary Fund. Each country has a quota in the I M F. Ours amounts to $1,300,000,000. Of course, the whole of this quota is not available on demand. It consists of a number of *tranches* to which different rules and terms apply. We are making an immediate approach to the I.M.F. with a view to drawing on part of these resources.

"Secondly, H.M. Government own U.S dollar securities to the value of between $750,000,000 and $1,000,000,000. These could be a substantial reinforcement of the reserves, and I am prepared to use them for this purpose Our general policy has been, and remains, to retain the industrial and commercial securities which form almost all the portfolio, and not to sell them. If the need arises. I should be perfectly prepared to use them as collateral for borrowing to fortify the reserves; and I am assured that, if requested, support in the form of a loan against these securities will be promptly available for dollar requirements from the appropriate U.S agency. The same objections to sale do not apply to the short-term U S Government securities which form the small balance of the portfolio These amounted to $60,000,000, of which just over half have now been sold and credited to the reserves.

"These are substantial reinforcements. We shall use to the maximum every means at our disposal to maintain sterling as a sound and stable currency and means of payments and exchange. I repeat that this is vital, not only in our own interests and those of the sterling area generally, but in the interest of the trade of the free world as a whole

"I now turn to the payments due on Dec. 31 to the U.S Government of some $143,000,000, and to the Canadian Government of some $38,000,000 Under our respective Agreements with them dated December 1945 and March 1956, there are provisions under which the annual instalments of the interest included in some of these payments may be waived I wish to inform the House that H.M. Government have submitted a claim for this waiver of interest to the American Government, as they consider that under all the terms of the agreements they are entitled to it This subject has been under discussion between the U.K. and the U.S. Treasuries during the past two years. We have received a reply from the U.S Treasury informing us that, since there have been no changes in the conditions envisaged at the time the agreement was signed, they will present the matter to Congress with the definite recommendation that appropriate modification of the present language be made to carry out the spirit of the original intention. The conditions of the Canadian Agreement do not call for a waiver unless the interest payment under the U.S. Agreement is waived. We have informed the Canadian Government that, on the assumption that a waiver of interest is granted by the United States, we are also formally claiming a waiver of interest on the Canadian loan

"We shall, therefore, be paying only the principal on these loans on Dec. 31 next, amounting to U.S $56,200,000 and Canadian $15,500,000, as compared with the full payments under the loans subject to waiver which, including interest, would amount to U S. $137,800,000 and Canadian $37,700,000 As the question of the waiver cannot be settled before the payment date, we propose, in order to show clearly that we shall not in any circumstances default on our obligations, to pay the interest instalments out of the reserves into a special account

"But it is not enough to mobilize our external resources. We must fortify our own economy, on which recent events have put new strains. The measures to control inflationary tendencies, which the Government have been pursuing since 1954, have met with considerable success Nevertheless the interruption of oil supplies from the Middle East and the dislocation caused by the Suez Canal crisis will add a fresh burden to our balance of payments We must therefore increase our external income, and at the same time keep internal demand under restraint

"First of all, the control over bank and other forms of credit, which has played so important a part already, must be firmly maintained and, if need be, strengthened. The Hire Purchase restrictions will continue. There will be no relaxation in the critical scrutiny of applications by the Capital Issues Committee. And I ask the banks and all those who provide finance or control its sources to restrict effectively the supply of credit.

"I next come to fiscal measures. It is notoriously hard to form a complete judgment of the Budget out-turn at this time of the year. But all the information available to me indicates that the national accounts will still show a very large surplus 'above the line'; and the deficit 'below the line' will fall short of the original estimate by more than £150,000,000. Taking the figures 'above the line' and 'below the line' together, the overall out-turn of the Budget will be better, not worse, than I forecast last April.

"I do not intend to introduce an interim Budget. At the same time it would be wrong of me not to convey to the House some considerations relevant to the preparation of the 1957 Budget.

"The traditional tax upon which the country relies in times of difficulty and crisis has been for many years the Income-tax. Fortunately, during the last four years it has been possible to reduce it by one shilling on the standard rate. Owing to the complicated form in which Income-tax is now levied, largely through pay-as-you-earn, it would not in any case be possible at this time of the year to make an increase in the tax without serious difficulties and hardships: for any substantial rise in this year's rate of tax, when it came to be levied in what remains of the financial year, would fall too heavily upon the weekly wage-packet. It would also mean a readjustment of several million direct assessments of tax which have already been made, and that might well lead to serious delays in the regular collection of revenue I do not, therefore, propose to take any immediate steps on the Income-tax, but I must warn the House that the Government will not hesitate to use this weapon if needed when the time comes. What will be required can far more easily be judged in three or four months' time, when it should be possible more precisely to judge the impact of the last four months on the economy.

"But in the field of indirect taxation there is one commodity which is of particular importance at the present time—oil. I believe that the House and the country will accept that it is right that in present circumstances a commodity as precious as oil now is, should effectively be guarded by taxation as well as by rationing. Moreover, it is estimated that when petrol rationing takes effect the revenue will drop at a rate of £6,000,000 a month. It is essential to the Exchequer that this should be made good. I therefore propose, as an emergency measure, to raise the Customs duty on petrol and other light hydrocarbon oils and on Derv—that is, heavy oil used as fuel in road vehicles—by 1s. 0d. a gallon: an increase in the duty from 2s. 6d to 3s. 6d This will be in addition to the increases in the wholesale and retail prices of these products, which I understand the oil companies are announcing today, on account of higher costs—that is, a wholesale price increase of 3½d. a gallon on motor spirit and 3d on Derv, with an additional 1½d a gallon in each case on retail sales.

"I shall to-morrow move a Ways and Means Resolution preliminary to a short Bill giving effect to the increased tax. The Resolution will provide that the tax increase is to come into effect from 6 p.m. to-day. Following the precedent of earlier changes in this duty, I expect that the new retail prices will be charged at the garages from tonight. There will be corresponding adjustments in the rates of duty on indigenous oils and on one or two minor products which traditionally move in step with the main rate of petrol duty The increase in duty will bring in extra revenue of about £30,000,000 in the remaining four months of this financial year.

"To sum up, I have described to the House the immediate measures which we are taking to fortify sterling, and the reinforcements which we have at our command. How far we shall have to draw upon them in fact, or for how long, depends upon the future course of events. To strengthen your reserves does not mean that you must necessarily call upon them With regard to the internal measures, the same considerations apply. In particular, I regard the new petrol tax as a temporary measure during the present oil shortage. As for the future, it is too early yet to judge of the length or character of all that we may have to do, but it is clearly right to act now on both external and internal policy. In addition recent events have re-emphasized the need for a wide review of our Government expenditure, our defence policy, and our future energy policy in this country. This will be done."

Replying to **Mr. Harold Wilson** (Lab.), **Mr. Macmillan** said that the effect of the increase in the price of petrol was calculated to be less than one-third of one point in the cost-of-living index, and that the extra duty would be about ½d. or ¼d. on a 3d bus fare Although there would be a charge on industry, he did not believe that it would be in any sense a crushing charge, and it would have very small effect on prices.

In reply to a question by **Mr. Gaitskell** on the nature of the fall in the reserves, **Mr. Macmillan** said that in the first six months of the year the reserves had been rising without any corresponding increase in liabilities, while at the same time the Government had paid off long-standing debts, so that the rise of £95,000,000, coupled with the fall in liabilities of £22,000,000, represented a considerable increase on capital account. Until a more precise analysis was made, however, it was difficult to say what proportion of the gold and dollar losses in recent months represented payments for authorized oil purchases (which had been considerable in the last month), and what proportion reflected "world confidence movements, which make so quick an impact on sterling, of which so enormous a volume exists, and which finances so large a part of world trade."

Replying to **Mr. Shepherd** (C.), who asked whether the Chancellor would give an assurance that as soon as petrol rationing was over, or at some convenient time, the additional petrol tax would be removed, **Mr. Macmillan** said: "I used the word 'temporarily' advisedly.. I regard it as an emergency tax. If the flow of oil returns in full, the revenue will be sustained at the old rate of tax."

In reply to **Mr. Ernest Davies** (Lab), who asked whether the Chancellor would consider exempting public service vehicles from the increased tax, **Mr. Macmillan** replied he could not do so because that part of the oil which the Government most wanted to preserve was the one most used—viz , Derv.

Mr. Harold Wilson pledged the Opposition's support for any appropriate measures which the Chancellor chose to put forward with the aim of strengthening the sterling area's gold and dollar reserves and sterling.

The 1s. rise in the petrol duty and the 5d. increase by the oil companies (of which 3½d. will go to the companies themselves and 1½d. to the dealers) brought petrol prices up to 5s. 7½d. a gallon for "commercial" grades, 6s. 0½d. for premium grades, and 6s. 5d. for the highest grades. The increases caused deep concern in many branches of industry, the Federation of British Industries stating on Dec. 4 that the higher costs arising at many points from the large increase in fuel prices were bound to have "a serious effect." An official of the National Union of Manufacturers, on the other hand, described the rise as a "minor irritation" while petrol rationing continued, although he emphasized that costs would rise steeply if the increase remained after the ending of rationing.

British Road Services announced on Dec 5 that a surcharge of 7½ per cent would be added to all charges for general haulage, parcels, and tank haulage as a result of the increased cost of fuel oil British Railways announced on Dec 6 that for the same reason a surcharge on their cartage services would be made on the basis of 6d. a ton for each service of collection or delivery The National Conference of Road Transport Clearing Houses (whose haulier members operate more than 8,000 long-distance lorries) recommended their members on the same day to make a minimum increase of 7½ per cent in charges forthwith.

On Dec. 7 the Road Haulage Association, representing 17,000 private haulage firms, announced that a 10 per cent emergency surcharge would be added to their members' rates immediately, British European Airways announced that passenger fares for flights within the British Isles would be increased by the addition of a temporary surcharge of 1s. in the £, because of the rise in fuel costs, and the minimum fares of all London Transport services (buses and the Underground) were raised from 2½d. to 3d.—as from Jan. 1, 1957—to offset the extra 1s. tax on fuel oil.

The Financial Secretary to the Treasury (Mr Henry Brooke) stated in the House of Commons on Dec. 5 that the Government would introduce a Bill empowering all road passenger operators, including municipal authorities, to make strictly limited and temporary increases in bus fares to meet the higher operating costs. He explained that bus concerns were generally working on small profit margins, that not all of them could absorb the extra costs, and that normally they could not increase their charges except through a lengthy procedure laid down by statute. He added, however, that it would be reasonable to expect that operators would take into account "any operating factors in the present situation which told in the opposite direction" when deciding how much they could increase their fares

Mr Brooke also announced that the Minister of Health proposed to increase the allowances for disabled persons in respect of the running costs of invalid carriages.

It was announced in Washington on Dec. 4 that the British request for a waiver of the present year's interest payment under the American loan agreements had been formally presented to the U.S. Treasury, and that the Administration had agreed to ask Congress to grant the waiver. In Ottawa, the Federal Minister of Trade (Mr. Howe) indicated on the same day that the Canadian Cabinet had agreed to Britain's request for a waiver of the interest due on the Canadian loan.

The Chancellor's announcement led to a demand for sterling, the spot rate against New York moving up from the level of $2.78½ for the first time for at least a month, though closing at not more than $2.78 1/16 —(Treasury Press Office - Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. Gold and Dollar Reserves, 15136 B; Mr. Macmillan, 15169 A; Sterling, 14979 A.)**

Note. The Automobile Association issued on Dec. 4 the following list of the latest-known prices of petrol in other European countries:

	s.	d.	s.	d.
	Ordinary.		Super.	
Austria	3	11¾	4	7½
Belgium	4	2	4	4½
France (Paris area)	6	3	6	7½
Greece	4	5		—
Holland	3	2	3	5
Italy	4	6	5	0
Luxemburg	4	2	4	4½
Norway	4	3½	4	4½
Portugal	5	1½		—
Spain	4	6½		—
Sweden	3	10	4	0½
Switzerland	3	8¾	4	3
Western Germany	4	9¾	5	2

Some of these prices, however, did not reflect the latest price increases in a number of countries, notably West Germany and Italy. (Manchester Guardian)

A. PAKISTAN.—The Electorate Act. - Joint Electorate for East Pakistan and Separate Electorates for West Pakistan. - Report of Electoral Reforms Commission.

The Pakistan National Assembly reached a compromise settlement on Oct. 12 of the question whether Moslems and non-Moslems should form a single electorate, or whether the minorities should return separate representatives in national and provincial elections. When the Constitution was drafted no agreement could be reached on this issue, and it was therefore laid down that the National Assembly should reach a final decision after taking into consideration the views of the Provincial Assemblies (see 14769 A). The West Pakistan Assembly had recommended separate electorates and the East Pakistan Assembly joint electorates, and, to bridge the gap between these divergent views, the National Assembly passed a Bill providing for a joint electorate in East Pakistan, (where 25 per cent of the population are non-Moslems) and separate electorates in West Pakistan (where non-Moslems form a much smaller minority).

A resolution in favour of separate electorates was moved in the West Pakistan Assembly by the Chief Minister, Dr. Khan Sahib, and was adopted on Aug. 4 by 122 votes to 10 after a four-hour debate. The resolution was supported by the Republican Party and the Moslem League, and opposed by the Awami League, four Hindu members from Sind, and Mr. S. A. Hussain, of the Azad Pakistan party.

In the East Pakistan Assembly a resolution recommending joint electorates, moved by the Chief Minister (Mr. Rahman Khan), was adopted on Oct. 1 by 159 votes to one, with 84 Opposition members abstaining.

An amendment supporting joint electorates in principle, on condition that a number of seats were reserved for the Scheduled Castes, was moved by a group of Scheduled Caste representatives. The Speaker, however, refused to admit amendments on the ground that the Provincial Assemblies had been asked to make recommendations solely on the issue of joint or separate electorates, whereupon the sponsors of the amendment walked out in protest.

After the session, a joint statement was issued by the United Front, the *Nizam-e-Islam*, the Moslem League, and other Opposition groups asserting that the whole procedure was irregular and did not represent the Assembly's considered opinion. Serious disorders occurred in Dacca on Oct 7 at a meeting in favour of separate electorates organized by the Moslem League and other Moslem organizations, 13 people being arrested and several injured.

The deep division of opinion on this issue subjected the Central Government (a coalition between the Awami League and the Republicans) to severe strain. The secretary-general of the Republican Party, Mir Abdul Qaiyum, declared on Sept. 28 that the party was committed to separate electorates in both provincial and national elections, and was prepared to co-operate even with the Moslem League against the Awami League on this issue. As the Awami League—which draws its main support from East Pakistan—had consistently supported joint electorates, a Cabinet crisis was averted only by the decision, adopted at a meeting of Government supporters in the National Assembly on Oct 9, to accept a compromise.

Mr. Suhrawardy accordingly introduced the Government's Electorate Bill on Oct. 10 in the National Assembly, which was meeting in Dacca for the first time. The Bill provided that elections to both the National Assembly and the Provincial Assemblies should be held on the basis of a joint electorate in East Pakistan and separate electorates in West Pakistan.

Mr. Suhrawardy pointed out that no preparations for the return of a directly elected Parliament could be made until this question was settled. He expressed regret that it had not been found possible to have one system of electorate for the whole of Pakistan in both the Provincial Legislatures as well as the National Assembly However, although the Constitution did not require the National Assembly to endorse the views of the Provincial Legislatures, the Assembly, which had not been elected directly by the people, could not ignore or lightly override the views of the bodies which formed its own electorate, and the Bill therefore endorsed the views of the two Legislatures within their own territorial jurisdiction.

To those who had not been able to adopt themselves to the change in political outlook resultant on the creation of Pakistan (Mr Suhrawardy continued) it might seem strange that he, who had advocated the "two-nation theory" and separate electorates in undivided India, should advocate a joint electorate in Pakistan. Although separate electorates had formed "the cardinal creed of the Moslems of undivided India," it had not, however, been based on the "two-nation theory" as such—it had been a device to secure proper representation in the Legislatures for the Moslem minority, and had never been meant to be a device to safeguard the interests of a majority population.

"The two-nation theory," he continued, "was advanced by the Moslems as a justification for the partition of India and the creation of a State made up of geographically contiguous units where the Moslems were numerically in a majority. Once that State was created, the two-nation theory lost its force even for the Moslems. If it is still persisted in, it will logically lead to the partition of Pakistan and the creation of a State made up of contiguous areas where non-Moslems are in a majority—a contingency from which every Pakistani must recoil with horror The Moslems, who were a nationality in undivided India, are now citizens in their own country, Pakistan, in which every citizen, whatever his religion, is a member of the Pakistani nation . .

"Circumstances thus have changed, and so must our political outlook change with the establishment of Pakistan. Today we do not want to develop fissiparous tendencies within the country, but must create a single nation. I therefore advocate joint electorates because this will help in welding all the people together into one great Pakistani nation . . . and in destroying the seeds of suspicion, distrust, and hatred between citizens professing different religions . . I want our citizens to have only one ideal—namely, service to Pakistan, each according to his own religious convictions, but all united in advancing the stability, integrity, and glory of Pakistan."

Rejecting the view that joint electorates were "un-Islamic," Mr. Suhrawardy pointed out that all other Moslem countries had such electorates. Ridiculing the argument that under such a system "the Hindus will dominate the Moslems, capture all the seats, corrupt the Moslems, and so on," he pointed out that in districts of East Pakistan with large Hindu minorities the number of Moslems on local government bodies returned by joint electorates was in fact disproportionately large. "Joint electorates, if they do any harm at all in the matter of representation," he declared, "will harm the Hindus. I deliberately use the words 'in the matter of representation,' for I think they will gain otherwise from the point of view of creating identity of interest and a sense of common endeavour in a common cause for a common country, which is so vital to a minority community for its safety, dignity, and future progress."

"It may therefore well be asked," Mr Suhrawardy went on, "why, if the Hindus stand to lose so much in representation, do they advocate joint electorates? I have already given the answer, but there are other answers as well . . . The Hindus find that in a system of separate electorates they will remain for all time a constitutional minority subject to a minority complex. It is always in the interest of minorities if these complexes are removed, the idea of one nation takes its place, and the term 'minority community' loses significance." Under a system of separate electorates, he pointed out, the Hindus in East Pakistan would be entitled to such a large number of seats that they would always be able to hold the balance of power between rival Moslem groups by playing off one against the other. They realized, however, that this situation would inevitably create hostility against them, and therefore they preferred "to reap the benefits of trust, co-operation, and one nationhood rather than scramble for representation on the basis of numbers."

After an all-night session the Bill was passed on Oct. 12 by 48 votes to 19, the Republicans and the Awami League voting in favour and the Moslem League and the United Front party opposing. It received President Mirza's assent on Oct. 30.

Report of Electoral Reforms Commission.

The report of the Electoral Reforms Commission appointed by the Government in 1955 was published on April 25, 1956.

The Commission recommended that the preparation of electoral registers should be entrusted to a staff under the direct control of the Election Commission, and not of any executive authority; that lists of voters should be posted in conspicuous places, and that the electorate should be afforded sufficient time for presenting claims and objections to the revising authority, which, with the returning officers, should be drawn from the Judicial Service or the Pakistan Civil Service Nomination papers should not be rejected on "flimsy or capricious" grounds such as clerical errors. As far as possible, not more than 1,000 voters should be assigned to one polling station, and electors should not be required to travel more than three miles to vote. Presiding officers should be responsible persons not connected with the candidates, and should not normally be drawn from the Executive or Revenue departments

On the ballot papers each candidate should be assigned a symbol, and the voter should make a mark against the name and symbol of the candidate of his choice, all ballot papers being put into one box. The use of symbols with religious or sentimental associations, e.g. a mosque or the national flag, should be forbidden. To prevent impersonation, the report proposed that elections should be confined to a single day; that all male voters should be required to hold identity cards bearing their photographs; that women should vote separately, and that each elector, before voting, should be marked on his left fore-finger with indelible ink.

To prevent the use of "undue pressure and influence," the Commission suggested that all Ministries should be dissolved on the eve of general elections, and suitable alternative arrangements made for carrying on routine business; that wives and children of Government employees should not be eligible for election; and that the question should be considered whether Government contractors or their near relations should be permitted to stand. Petitions arising from provincial elections should be dealt with by a district judge, and those arising from national elections by a serving or retired High Court judge. Appeals against the former's decision could be made to the High Court, and against the latter's to the Supreme Court

Mr. Mohammad Ali, then Prime Minister, had announced on June 24 that a Delimitation Commission had been appointed to arrange for the holding of general elections as soon as possible, with the Chief Justice of the Supreme Court as chairman.—(Pakistan High Commissioner's Office, London - Dawn, Karachi - Times) **(Prev. rep. Constitution, 14769 A.)**

A. POLAND. — Polish-Soviet Discussions in Moscow. - Agreement on Status of Soviet Troops in Poland. - Soviet Economic Aid to Poland. - Resignation of Marshal Rokossovsky. - Cabinet Changes. - Dismissal of Soviet Officers in Polish Army. - Abolition of Public Security Committee. - Release of Poznan Rioters. - Changes in Trade Union Leadership. - New Five-Year Plan. - Further Reduction in Armed Forces.

A delegation from the Polish Government and the United Workers' Party (U.W.P.) visited Moscow from Nov. 15-18 for talks with the Soviet Government and Communist Party. The delegation was led by Mr. Gomulka, First Secretary of the U.W.P., and included Mr. Zawadzki, president of the Council of State (a position equivalent to Chief of State), Mr. Cyrankiewicz, the Prime Minister, and Mr. Jedrychowski, chairman of the State Commission for Economic Planning. On the Soviet side the talks were conducted by President Voroshilov, Mr. Khrushchev, Marshal Bulganin (Prime Minister), Mr. Mikoyan and Mr. Saburov. Marshal Zhukov, the Soviet Minister of Defence, also attended the meeting.

An agreement was signed on Nov 18, at the conclusion of the talks, whereby Soviet troops would remain in Poland for the time being on the understanding that they would not interfere in Poland's internal affairs and would not be moved from their stations without the Polish Government's consent. The joint statement issued by the Polish and Soviet leaders is summarized below under cross-headings :

International Affairs. The statement said that the talks had taken place in a cordial and friendly atmosphere ; had revealed a mutual desire to base relations between the two countries on " the Leninist principles of equal rights of nations " ; and had shown " the convergence of views of the U.S.S.R. and the Polish People's Republic in the appraisal of fundamental problems of the present international situation." Both parties agreed in condemning the Anglo-French and Israeli attack on Egypt, expressed " full support for Egypt's just claims," and demanded that Britain, France, and Israel should withdraw their forces in accordance with the U.N. resolution The U S.S.R. and Poland would do everything possible to achieve the " restoration of the lawful rights " of the Chinese People's Republic in the United Nations.

The statement called for an international agreement on disarmament, the banning of atomic and hydrogen weapons, the abolition of military bases on foreign territories, and " an essential reduction of the armed forces of the U.S S R , Britain, France, and the U S A. in Germany." Declaring that " a ban on tests of atomic and hydrogen weapons might constitute an important contribution to the lessening of international tension and the creation of an atmosphere of international confidence," the statement alo expressed the view that an understanding on disarmament would " help to create conditions indispensable for the settlement of such international problems as the German question and European collective security."

Hungary. Both sides expressed " confidence that the Hungarian working class and the whole Hungarian nation will discover in themselves sufficient strength to defend the gains of the people's democratic system." Both countries would support the " Revolutionary Workers' and Peasants' Government " in Hungary [i.e. the Kadar Government], and considered that " certain U.N. resolutions on Hungary were designed to divert world opinion from the aggression against Egypt "

Polish-Soviet Relations. Both delegations had " examined in detail and discussed all the aspects which have gone to make up the relations between the Polish and Soviet States." They considered that the Soviet Government's declaration of Oct. 30 on the " principles for further developing and strengthening friendship and cooperation between the Soviet Union and other Socialist countries " [see page 15191, second column] was of " great importance," and that these principles were " in keeping with the recent decisions of the Central Committee of the Polish United Workers' Party and the policy of the Polish Government."

" In the course of the negotiations," the statement continued, " the two sides paid particular attention to the further development and strengthening of friendship between their two countries, and expressed their conviction that the unbreakable alliance and fraternal friendship between the Polish People's Republic and the U S.S.R. will broaden and consolidate, developing on the principles of full equality of rights, respect for territorial integrity, State independence and sovereignty, and non-interference in internal affairs The Polish-Soviet alliance . constitutes a lasting guarantee of their security. This alliance is the most important factor in the strengthening of the independence of the Polish People's Republic and the integrity of the Oder-Neisse frontier . . . "

Economic Relations. Both sides had expressed their determination " to develop and consolidate economic co-operation between the two countries on the basis of equal rights, mutual advantage, and mutual fraternal assistance " It had been agreed that the Polish debt as at Nov. 1, 1956, which had arisen from the use of credits granted to Poland by the Soviet Union in previous years, should be regarded as settled by the Polish coal supplies made available to the U.S.S.R during the years 1946-53. Agreement had also been reached on the settlement of financial accounts in connexion with railway transport, non-commercial, and other payments

The Soviet Union had undertaken to deliver 1,400,000 tons of grain to Poland in 1957 on a credit basis, and to grant long-term credits to Poland to the amount of 700,000,000 roubles for commodities to be delivered by the U S.S R. under mutual arrangements.

Soviet Troops in Poland. Both sides had acknowledged " that so far it had not been possible to reach concerted decisions that would give sufficient guarantees against the rebirth of German militarism," and that the " continued rejection by *revanchist* forces of the existing boundaries in Europe,and in particular of Poland's Western frontier," was " an essential factor impeding the normalization of relations in Europe." The statement added " Both parties reached the conclusion that this state of affairs, and also the present international situation, still make the temporary presence of Soviet Army units on Polish territory desirable—a fact which is also connected with the necessity for the presence of Soviet troops in Germany in conformity with international treaties and agreements "

It had been agreed, however, that both sides would " consult each other on the problems connected with the presence of Soviet Army units on Polish territory, their number and their composition," and that the status of these forces should be determined by certain principles to be embodied in a formal agreement to be concluded ' in the near future."

These principles were that " the temporary presence of Soviet troops must in no way infringe Polish sovereignty or lead to their interference in the internal affairs of the Polish People's Republic " , that " the location and strength of the Soviet troops is determined by special agreements " , that any movements of Soviet Army units would need the consent of the Polish Government or other competent Polish authorities , that Soviet soldiers in Poland and their families would have to " respect and abide by the provisions of Polish law " , that the limits of Polish and Soviet jurisdiction with regard to the personnel of Soviet military units in Poland would be established by a special agreement , and that agreements between both countries would also lay down the time, communication routes, and method of transit of Soviet forces passing through Polish territory.

Repatriation of Poles in Soviet Union. The Soviet Government had agreed to the repatriation of Poles in the U S S R having families in Poland, and also Poles who " for reasons beyond their control " could not make use of their right to repatriation on the basis of the Soviet-Polish agreements of 1945 Poles in prison in the Soviet Union would be released or handed over to the Polish authorities, and a meeting of the competent authorities of both sides would take place in the near future to agree on the times and methods of repatriation

Cultural Relations. The statement referred to an agreement on Polish-Soviet cultural co-operation signed in Warsaw on June 30, 1956, and stressed that such co-operation would " continue effectively to promote the consolidation of the sincere fraternal friendship between the Soviet and Polish peoples."

Both parties would make " every effort to inform their peoples on the political, economic, and other measures undertaken or being realized by the other," and on " their mutual achievements in the construction of Socialism "

The Polish-Soviet agreement was unanimously ratified by the Seym on Nov. 20, following a statement by M. Cyrankiewicz in which he spoke of certain aspects of the agreement.

M. Cyrankiewicz told the Seym that the Polish debts cancelled under the agreement totalled over 2,000,000,000 roubles (over $500,000,000), which Poland would otherwise have had to repay between 1957 and 1965. In connexion with their cancellation, Poland would also be freed from interest payments on that part of the credits not yet repaid, which sum should be added to the capital amount cancelled As regards the Polish coal supplies to the Soviet Union between 1946-53, M Cyrankiewicz explained that by an agreement of Aug 16, 1945, Poland had committed herself to deliver a certain quantity of coal " at a special price," whilst in a protocol signed in March 1947 the quantity originally envisaged at this price had been cut by half , not until November 1953 had another protocol been signed providing for the termination of further coal deliveries at the special price The Polish Government had considered the 1945 agreement as prejudicial to Polish interests, and this view had now been accepted by the Soviet Government.

As regards Soviet assistance to the Polish balance of payments, the grain promised by the U.S S.R for 1957 would be supplied on a long-term credit basis and would not be payable until 1961-62, whilst the 700,000.000 rouble credit for commodity supplies need not be repaid until 1963-65.

Speaking of the " feelings of joy and enthusiasm " with which the results of the Moscow talks had been received in Poland, M Cyrankiewicz declared · " There are peoples who gained sovereignty centuries ago and for whom sovereignty is a matter of course, something accepted as a natural thing There are other peoples, however, which have shed rivers of blood in their fight for freedom . . . Our nation is one of them Hence this particular sensitivity to injuries inflicted on its national pride, a sensitivity which has nothing in common with megalomania or nationalism. Hence this great joy and unity when the people feel that their legitimate aspirations have been fulfilled under the leadership of the working-class and the party. The people have sensed the truth that the entire party has risen to stand guard over their rights . . . This has not always been so . . . There were often no complete bonds between the party and the masses . . ."

Changes in Government and Army Command.

Immediately before the Polish delegation's visit to Moscow, a number of major changes had been made in the Government and the Army Command. M. Cyrankiewicz announced in the Seym on Nov. 13 that Marshal Rokossovsky had resigned his post as Minister of Defence and Deputy Premier; would return to the Soviet Army; and would be succeeded in both posts by General Spychalski, the new Commander-in-Chief and Deputy Defence Minister.

A number of other ministerial changes were accepted by the Seym at the same time. M. Wladyslaw Bienkowski, a supporter of M. Gomulka, who was expelled from the United Workers' party in 1948, succeeded M. Feliks Baranowski as Minister of Education; Professor Rajmund Baranski, a well-known physicist with no political affiliations, succeeded Dr Sztachelski as Minister of Health, Dr. Boleslaw Darski, a former director of the Gdynia-America Shipping Line, and politically an independent, succeeded M. Popiel as Minister for Shipping; General Janusz Zarzycki (a former head of the youth union and chairman of the Warsaw City Council, in which capacity he helped to mobilize students and workers in support of the new leadership) became Deputy Defence Minister; and M. Eugeniusz Szyr resigned as Minister of Buildings Among new Deputy Presidents of the Council of State were M. Wycech, a leading member of the pre-war Peasant party, who had taken no part in Polish politics for many years, and M. Stanislaw Kulczynski, Rector of Wroclaw University and a member of the Democratic party.

The governmental changes were regarded as a compromise between M. Gomulka's supporters and the pro-Soviet group in the leadership of the U.W.P. On the one hand, the representation of the "Gomulka group" was strengthened and the basis of the Government broadened by the inclusion of Independents and members of minority parties; on the other, three members of the pro-Soviet group were retained, including a Deputy Premier, M. Nowak

M. Zawadzki presented decorations on Nov. 13 to 18 Soviet generals and 20 other high-ranking officers who had been relieved of their posts, prior to their return to the Soviet Union; the Soviet generals included General Ivan Turkiel, C.-in-C. of the Polish Air Force since 1951, and General Yevski, commander of the Warsaw garrison. As a result of these dismissals, which coincided with the reinstatement of a number of Polish officers previously dismissed for political reasons, the number of Soviet officers still attached to the Polish Army was believed to be not more than twenty.

Plenary Session of the U.W.P. Central Committee.

Fuller details of the plenary session of the Central Committee of the U.W.P. held on Oct 19-21 (see 15161 A) became available with the publication of the October issue of the party monthly *Nowe Drogi*, which gave the committee-members' speeches.

It was disclosed that **M. Leon Wudzki**, a member of the party's Control Committee, had made a violent attack on M. Berman, a former Deputy Premier and member of the Politburo, for tolerating atrocities by the security police Mr Wudzki alleged that M. Rozanski, the former Director of Investigation at the Ministry of Public Security, had himself torn off prisoners' fingernails, and that other prisoners had been tortured by making them "remain standing in their own excrement for three weeks on end," or by pouring water over them and then putting them outside in the winter frost to freeze M Wudzki said that he had a suitcase full of letters giving details of the use of such methods, as a result of which prisoners had sometimes been driven mad after seven days' interrogation He had tried to protest to M. Zambrowski (a member of the Politburo) and the late M Bierut (the former First Secretary), but both had avoided seeing him, while M. Berman had refused to intervene even when his own secretary Miss Duracz, had been arrested

In reply, **M. Berman** attributed many of these excesses to Beria's influence, and claimed that he had opposed both the arrest of M. Gomulka and General Spychalski and Beria's repeated demands for their trial. He explained that Miss Duracz had been arrested on Stalin's personal orders because she had met Mr Noel Field (a U.S. State Department official who was mentioned during the Slansky trial—see 12685 A) in Paris in 1945 He himself had opposed her arrest, and in consequence had himself been under suspicion for several years, being saved only by M Bierut's protection

Democratic and Peasant Parties' Demands for Reforms.

During a debate on the political situation in the Seym on Oct. 24, M. Leon Chajn (a Democratic party deputy) demanded changes in the Constitution which would bring the Government under parliamentary control by giving the Seym the exclusive right to appoint and recall the Government, as well as individual Ministers. He also criticized the draft electoral law [see below] on the ground that certain Articles maintained the wrong principle of the previous electoral system, providing not for elections but for "a kind of plebiscite."

The Supreme Committee of the United Peasants' Party, meeting on Oct. 18, adopted a resolution emphasizing that the U.P.P. was an independent party, and demanding increased representation for it in the Government. The resolution also demanded the abolition of the Presidium of Government, a reduction in the number of Ministries, changes in price and taxation policy to enable the peasantry to make greater capital investments from their own financial means, increased supplies of fertilizers, building materials, machines, and agricultural implements, and a considerable increase in investment in agriculture under the Five-Year Plan.

Release of Political Prisoners. - Restriction of Powers of Security Police. - Abolition of Public Security Committee. - Rehabilitation Procedures. - Application of Amnesty Law.

M. Gomulka announced on Nov. 2 that the Public Security Committee [which replaced the former Ministry of Public Security in 1954] would be abolished, and responsibility for public security entrusted to the Ministry of Internal Affairs. A Bill implementing these changes was unanimously approved by the Seym on Nov. 13.

It was announced on Nov. 6 that all outstanding indictments in the Poznan courts arising from the riots of June 28 had been annulled, together with all cases under investigation, and that persons awaiting trial would be released. An official statement explained that this decision had been taken because the riots were a consequence of the "errors and distortions of the past era" and of the "incorrect behaviour of certain authorities," and because the atmosphere in Poznan on the day of the riots had considerably influenced the actions of the participants.

A report on the implementation of the amnesty law adopted in April was presented to the Seym on Oct. 13 by Mme. Wasilkowska, the Minister of Justice. She announced that during the period May 1-20 the number of persons in prison had fallen from 69,000 to 34,824, and that those who had benefited from the amnesty included 5,847 persons imprisoned for "crimes against the State," 1,063 found guilty of "Fascist activities before the war," and 52 who had recently returned from exile.

The Prosecutor-General (M Rybicki), reporting on the rehabilitation of persons wrongly convicted, stated that 1,708 applications for rehabilitation had been received between May 1 and Oct. 1, many from persons released from prison, and that 364 had so far been rehabilitated. In many cases the sentences on persons who were believed to be guilty had been reduced or the Council of State had been asked to grant a pardon, whilst in cases where there was strong suspicion that the sentence was unjust, the prisoner had been conditionally released.

The first cases dealt with, M. Rybicki stated, had been those of persons sentenced on political charges by military courts, mostly between 1949 and 1953, as the worst miscarriages of justice had taken place in connexion with cases of this type. In particular, the trials which had taken place on false charges of collaboration with the German occupation forces had created an "atmosphere of terror" among members of the wartime resistance movements, both Communist and non-Communist. The main causes of these miscarriages of justice, he suggested, had been the lack of independence of the courts, the subordination of the Prosecutor-General to the Ministry of Public Security, and the secrecy in which trials had been held.

In a press interview on Nov. 5, M. Rybicki stated that persons recently released included 17 members of the Seym (among them M. Gomulka and General Spychalski) who had been imprisoned during 1949-51, and four former members of the Socialist Party executive, who had been imprisoned in 1948. Investigation had shown that the officials primarily responsible for wrongful detentions were the former Deputy Minister of Public Security, M. Romkowski, and senior high officials of the Ministry, MM. Rozanski, Fejgin, and Swiatlo; all of these were under arrest except Swiatlo, who had fled the country (see 13883 A).

M. Rybicki had previously stated on June 18 that the Supreme Military Court had quashed the sentences on four high Army officers convicted of espionage in 1951, on the ground that the evidence against them had been obtained by "unauthorized methods," and had also rehabilitated M Mazurkiewicz (a former colonel in the Home Army) and a number of persons arrested with him in 1949-50. Accommodation and work were being provided for rehabilitated persons, as well as medical treatment where necessary. The sentence of five years' imprisonment passed in December 1955 on M Rozanski for abuse of his powers had been criticized in the Seym as too lenient, and it had therefore been decided to try him again, especially as new evidence had since come to light To prevent similar abuses in future, the Prosecutor's Office would pay strict attention to the regulations that a suspect must immediately be told the charges against him and must not be detained for more than 48 hours without a warrant.

Preparations for General Elections.

The Council of State announced on Sept. 24 that general elections would be held on Dec. 16, 1956. The Seym, however, adopted on Oct 24 a motion postponing the elections to Jan. 20, 1957, on the ground that the original date gave too short notice.

A parliamentary committee of 48 members, drawn from all parties, had previously been appointed in September to amend the electoral law. At its first meeting on Oct. 6, it was agreed not to amend the existing law, but to draw up a new one. The preliminary draft provided for constituencies of three to seven seats; laid down that the number of candidates must exceed the number of seats, and that representatives of organizations nominating candidates, and of the Press, should have the right to be present during the voting; and made secret voting compulsory, instead of optional as in the past.

M. Gomulka stated on Nov. 2 that the U.W.P. favoured the nomination of candidates by all parties and organizations.

Relations between Church and State.

Large crowds assembled inside and outside the Holy Cross Church in Warsaw on Nov. 4 to hear the first sermon delivered by Cardinal Wyszinski since his release from confinement in a monastery. In his sermon the Cardinal welcomed the change in the Government's attitude towards the Church, announced that four bishops had recently been allowed to return to their dioceses, and declared that the Church "forgives and forgets." He added: "In these difficult days we must speak less about our rights and more about our duties; Poland needs heroic work more than heroic death . . ."

The four bishops mentioned by Cardinal Wyszinski were Bishop Baraniak of Gniezno, Bishop Adamski of Silesia, and Bishops Bednosz and Bieniek.

A joint commission was set up in November to consider relations between the Government and the Roman Catholic episcopate, the Government being represented by M. Morawski, a member of the Politburo of the U.W.P., and Dr. Sztachelski, the former Minister of Health.

Ending of Radio Jamming.

The Ministry of Communications and the State Radio Committee announced on Nov. 24 that, in accordance with a Government decision, all those Polish radio stations jamming Polish-language transmissions from foreign stations had ceased to operate; that the equipment and technical installations used for jamming would be handed over for use in Polish radio communications and broadcasting; and that the liquidation of the "jamming stations" would make work possible on a number of local radio transmitters.

The Warsaw daily *Zycie Warszawy*, commenting on this decision, said that it was "a victory of the correct principle that foreign radio stations should be countered by factual arguments and not by noise" Moreover, the closing-down of the "jamming stations" would save some 60,000,000 zlotys annually and would make sufficient power available to provide electric light for a large town.

Adoption of Five-Year Plan. - Merger of Ministries of Agriculture and State Farms. - Legislation for Workers' Councils in Industry.

A report on the Five-Year Plan for the years 1956-60 was presented to the Seym on Nov. 7 by M. Jedrychowski, chairman of the State Commission for Economic Planning.

M. Jedrychowski accepted a proposal by the Seym's Finance and Budgetary Committee that the present Seym should endorse the draft plan and that the newly elected Seym should endorse the final law on the plan. This was necessary, he stated, because a number of premisses hitherto held inviolable, especially in the field of agricultural policy, were now being re-examined The draft plan provided for a 53.2 per cent increase in the output of socialized industries, as compared with a 118 per cent increase during 1951-55, in view of the higher starting level, however, the annual production increase would be no smaller than under the previous plan. A high rate of advance in industrial production and in industrialization was an absolute necessity, in view of the fact that the rate of population increase in Poland (over 19 per 1,000) was one of the highest in Europe

Under the new plan, capital expenditure on industry and transport would be reduced from 46.8 and 12 9 per cent respectively to 43.4 and 10 per cent. Expenditure on agriculture, on the other hand, would be increased from 7 6 to 11 9 per cent, on housing from 11.6 to 14.4 per cent, on public services from 2.5 to 3.2 per cent, and on the expansion of social and cultural facilities from 4 8 to 6 4 per cent The production of capital goods would increase by 57 3 per cent and that of consumer goods by 48.7 per cent, the difference between the rate of increase in these two sections of industry (8.6 points) being the smallest in any of the "people's democracies." The increase in output of agricultural produce and consumer goods would be sufficient to meet the 30 per cent increase in real wages and in the real incomes of the peasantry provided for in the plan.

Coal output was planned to increase by 15,000,000 tons to 110,000,000 tons, steel output would rise by 63 per cent, reaching 7,200,000 tons in 1960; and output in the engineering industry by 100 per cent

The State Commission for Economic Planning would be replaced by a Planning Commission of the Council of Ministers. Central planning would not be abandoned, but would be combined with greater autonomy for individual enterprises and with workers' self-government in the factories.

The Seym approved the revised Five-Year Plan on Nov. 13, after a debate in which many deputies outspokenly criticized various Government measures. In a resolution accompanying its decision, the Seym stated that all the proposals of the plan should be subordinated to the task of improving living standards. It called on the Government to make a special effort to improve Poland's export trade; emphasized the importance of the merchant navy for the balance of payments; requested the Government to prepare a Bill for financing the merchant navy's expansion; and stressed the need to amend the plan as far as agriculture was concerned, with special emphasis on assistance to individual peasant farmers.

On the same date the Seym passed a Bill merging the Ministries of Agriculture and State Farms. The Bill for the liquidation of the State Commission for Economic Planning and the formation of a Planning Commission of the Council of Ministers was approved on Nov. 15.

Another Government-sponsored Bill providing for the setting up of Workers' Councils in all industrial undertakings was unanimously passed by the Seym on Nov. 19. In adopting this Bill, the Seym called upon the Government to take further steps to extend the principles of economic self-government and to introduce basic changes in central economic planning.

Changes in Trade Union Leadership and Policy.

A plenary session of the Central Council of Trade Unions was held in Warsaw from Nov. 16-18, being attended by over 1,000 delegates who had been spontaneously elected by factories and other enterprises, in place of the 120 union officials normally taking part. The members of the Presidium of the C.C.T.U., who had already tendered their resignation, absented themselves from most of the meeting, as did the majority of "Stalinist" union officials.

A report by an interim committee set up to inquire into trade union practice and policy stated that there had been in the past a system of "bureaucratic centralism" whereby the leadership had become completely isolated from members and had taken decisions without consulting them. The principle that the interests of the unions were identical with those of the Government and the U.W.P. had been accepted as a dogma, with the result that the unions had been more concerned with the Government's economic aims than with the workers' just demands It was necessary that the unions should in future be independent organizations, with the defence of workers' rights and conditions as their main task, and that the U.W.P. should not interfere in union questions except through the individual votes of its members The unions should also be represented in the Seym and should put forward their views on the Budget, employment policy, economic development, and all matters affecting living standards. A report presented by the auditing commission stated that it was impossible to discover how union funds had been spent in the past.

In the ensuing debate M. Klosiewicz, the chairman of the C C.T U., was denounced as "the man most responsible for the bad state of affairs in the trade unions." It was pointed out that he received a salary of 40,000 zlotys a month, in addition to the use of a villa, whereas a lorry-driver earned only 1,400 zlotys a month. A representative of the Zispo metal works (where the demonstrations began which led to the Poznan riots) declared that the Council's repeated failure to listen to the Poznan workers' complaints had been "responsible for the bloodshed that followed."

A comprehensive resolution demanding far-reaching changes in the status and organization of the trade unions, and also putting forward important economic demands, was adopted by the Council of Polish Trade Unions on Nov. 18.

The resolution demanded *inter alia* that the trade unions should have their own representatives in the Seym in order to establish "correct relations with State organs", that "decisions of fundamental importance"—e.g. the distribution of the national income, economic plans, wages, and employment—should not be made without taking their opinion into account, that the living standards of all working people should be raised as a matter of urgency; that all wrongs arising from violations of the law, of collective agreements, or of "just privileges" of workers should be completely righted; and that old-age pensions and family allowances should be defined. The resolution also called upon the Government to solve the problem of manpower surpluses, to liquidate "administrative over-growths," and to provide unemployment allowances. Other demands concerned the decentralization of trade union leadership, the autonomy of trade unions in the various industries; trade union assistance to works personnel in the establishment of Workers' Councils in factories.

The meeting accepted the Presidium's resignation and elected an entirely new one headed by M. Loga-Sowinski, a member of the Politburo of the U.W.P. and a supporter of M. Gomulka, who had only been released in October after several years' imprisonment. During the session M. Jaroszewicz, Deputy Chairman of the Council of Ministers, announced that the Government and the U.W.P. would shortly put forward proposals for wage increases, especially for workers who had not already received increases earlier in the year. It was also

announced that councils of shop stewards in every large enterprise would receive increased power to decide wages and conditions, and that 70 prominent trade unionists who had been expelled from their unions would be rehabilitated.

M. Klosiewicz was expelled from the Council of State on Nov 13, after he had demanded in the Seym that the Prime Minister should deny foreign radio reports that he (M. Klosiewicz) had been associated with a conspiracy to arrest M Gomulka and some 700 other persons and to carry out a *coup d'état* The Politburo of the U W P. described his conduct as "irresponsible," and stated that it would recommend his expulsion from the party's Central Committee.

Changes in Polish Merchant Navy.

The secretariat of the United Workers' Party decided in November to dissolve the political organization in the merchant navy, the fishing industry, and inland navigational enterprises.

As a result of these measures it was reported on Nov 24 that the Polish m s. *Batory* had sailed from Gdansk with some changes in her crew, in accordance with proposals made by the Sailors' Union. These were for the withdrawal from the ship of over a dozen members of the crew who did not possess the necessary qualifications and had only been employed "on the instructions of superior authorities," or who had "discredited themselves in the past by their attitude"

The director of the Central Board of the Polish Merchant Navy (M. Gronowicz) stated in November that the Board had no objection to the ma \ demands put forward by Polish sailors at recent meetings for permis ion to seek employment on foreign ships, in keeping with the provisions of international conventions to which Poland was a party.

Soviet Repatriation of Polish Citizens.

It was reported from Warsaw in November that over 28,000 persons had returned to Poland from abroad since 1955, of whom more than half had arrived during the past four months. The total included some 24,000 who had returned from [i.e been released by] the Soviet Union, among them a number of former members of the Polish Home Party, as well as former aristocrats. All repatriates were being helped to obtain work corresponding to their qualifications.

Further Reduction in Armed Forces.

The Government announced on Aug 18 that it had decided to reduce the armed forces by 50,000 men as "a new contribution to the cause of disarmament." This was the second such reduction within a year, 47,000 men having been demobilized from the Polish Army in September 1955 (see 14441 A).

Fate of Home Army Leaders.

Details of the fate of the 16 leaders of the Home Army (the anti-Communist resistance movement during the German occupation), who were tried in Moscow in June 1945 on charges of "diversionary activities in the rear of the Soviet Army," were given in September by *Radio Kraj*, the Polish radio service for Poles living overseas.

It was stated that 12 of the defendants had been sentenced to terms of imprisonment, three acquitted, and the case against one dropped. As regards the fate of the 16 leaders concerned, General Oculicki (C.-in-C. of the Home Army) had died in 1946 while serving his sentence, as was already known (see 14478 C); M Jankowski, the former Vice-Premier of the Polish Government in London and head of the "underground Cabinet" in Poland, had died in the U.S S.R in 1953; M. Jasiukiewicz, a Minister in the underground Government, had been sentenced to five years, subsequently returned to Poland, and died "a few years ago,"; M. Puzak, chairman of the underground Parliament and secretary of the underground Socialist Party, had been sentenced to 18 months, returned to Poland in 1945, been sentenced again to 10 years' imprisonment for "illegal activities against the People's Poland," and had died in 1950; MM Urbanski, Czarnowski, and Chacinski, sentenced to four months, had returned to Poland in 1945 and had died in 1951, 1952, and 1954 respectively; M. Zwierzynski (sentenced to eight months), M. Mierzwa (four months) and MM. Stemmler and Michalowski (acquitted) had returned in 1945, M. Kobylanski (acquitted) had returned in 1946; M. Bien, a Minister in the underground Government (five years), had returned in 1948; and M. Pajdak (the Socialist member of the underground Government, the case against whom was dropped) had returned in 1955. All the seven last-named were still living and working in Poland, while MM. Stypulkowski and Baginski (sentenced to four and 12 months respectively) were living abroad.

The Polish Council in London issued a statement alleging that M. Jasiukiewicz and several others had died in the U.S.S.R. or after their release as a result of ill-treatment; that M. Pajdak had been sentenced to five years' imprisonment at a secret trial, and had been held in Soviet labour camps even after his term had expired; and that M. Mierzwa (who had been sentenced to 10 years' imprisonment at the same time as M. Puzak) and most of the others who had returned to Poland had been persecuted and imprisoned after their repatriation. (Polish Embassy Press Office, London - Soviet Weekly - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris) **(Prev. rep. Poland, 15161 A.)**

Corrigendum. The name of the Polish Home Army is, in Polish, *Armja Krajowa* and not *Armja Krakowa* as incorrectly stated on page 15034, first column. (Ed. K.C.A.).

A. UNITED KINGDOM. — Atomic Energy. - Opening of Calder Hall Nuclear Power Station. - "Lido" and "Dido" Reactors started at Harwell.

The world's first nuclear power station—Calder Hall, in Cumberland—was formally opened on Oct. 17 by H.M. the Queen in the presence of members of the Government and representatives of 39 countries, among them many eminent scientists. When her Majesty put the station in operation by turning a switch, part of the initial 28,000 kilowatts of electricity generated was diverted from the nearby Windscale plutonium factory (which had been taking the load since the station began operations some weeks earlier) and about 10,000 kilowatts of electricity were fed directly into the national grid for consumption—equivalent to a saving of about ten tons of coal an hour. In opening the station, the Queen said: "As power from Calder Hall begins to flow into the national grid, all of us here know that we are present at the making of history."

Calder Hall is the only large-scale atomic power station in the world at the present time, and, when completed, will be 15 times bigger than any other in existence. Only one reactor went into operation when the station was inaugurated on Oct. 17, but the second came into service at the beginning of December. When both are running at full power in 1957, they will produce a total amount of electricity of the order of 90 megawatts [a megawatt is 1,000,000 watts], sufficient to supply power to a community of 100,000 people. The northern group of the U.K. Atomic Energy Authority will in due course comprise four stations of the Calder Hall type, in addition to the plutonium factory at Windscale.

Two recent important developments at Harwell were the inauguration on Sept. 21 of Britain's first "swimming-pool" reactor ("Lido"), and on Nov. 7 of Britain's first large heavy-water reactor ("Dido"). The "Lido" reactor is intended primarily for shielding studies, one of its major tasks being to assist in the development of the British submarine propulsion unit. "Dido," when operating at full power, will have a total heat output of about 10 megawatts and a very high neutron intensity, making it the most powerful experimental reactor in Western Europe. It is the first British reactor to be operated by heavy water, others having used a pure form of graphite. (Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Calder Hall, 14928 A.)**

B. LEBANON. — New Government.

The Lebanese Prime Minister, M. Abdullah Yafi, and the Minister of State, M. Saeb Salam, tendered their resignations on Nov. 16 to President Chamoun, who called upon M. Sami Solh to form a new Government. M. Sohl (71), who became Prime Minister for the sixth time, formed a new administration on Nov. 19 in which he took over the portfolios of the Interior, Justice, and Information in addition to the Premiership. The other Ministers were Dr. Charles Malik (Foreign Affairs), General Fuad Chebab (Defence), M. Nasri Maalouf (Finance, Economy, and Social Affairs), M. Mohamed Sabra (Public Works, Planning, and Posts), and Emir Majid Arslan (Health and Agriculture).

Although no official statement was issued, it was understood that M. Yafi's Cabinet had been sharply divided on the policy to be pursued by Lebanon in the Middle East crisis. Whereas M. Yafi and M. Salam—both of whom were known to be supporters of Colonel Nasser's policies—were believed to have urged the breaking-off of diplomatic relations with Britain and France, following the similar action taken by Syria, other Ministers were understood to have opposed such action. It was commented abroad that M. Yafi had resigned almost immediately after the Beirut meeting of Arab Heads of State (see 15236 A), at which President Chamoun was understood to have resisted Syrian pressure to break off relations with the British and French Governments.

M. Solh is regarded as a moderate and, according to *Le Monde*, is an advocate of Franco-Lebanese friendship and of *rapprochement* with Iraq and Turkey. Dr. Malik, the new Foreign Minister, has been Ambassador in Washington and head of the Lebanese delegation at the United Nations. (Le Monde, Paris - Daily Telegraph) **(Prev. rep. 14803 A.)**

C. JAPAN. — Departure of U.K. and Australian Forces. - Evacuation of Kure Base.

The last Commonwealth contingent in Japan—200 British troops—left for the United Kingdom on Nov. 23, thereby ending the 11-year occupation by British Commonwealth troops of the Kure base, which was handed over to the new Japanese naval defence force. The last contingent of Australian troops in Japan—about 215 officers and men—had left three weeks earlier.—(Times - Australian Information Bureau) **(Prev. rep. 14982 A.)**

A. INDONESIA. — President Sukarno's Visits to North America, Western Europe, and Communist Countries. - Soviet Economic Aid for Indonesia.

President Sukarno of Indonesia, accompanied by the Foreign Minister (Mr. Abdulgani), arrived in Washington on May 16, 1956, on the first stage of a tour of North America and Western Europe, having had a brief meeting *en route* at Manila with President Magsaysay of the Philippines.

Addressing a joint session of the U.S. Congress on May 17, President Sukarno stressed the importance which the Asian and African peoples attached to nationalism. "For us of Asia and Africa," he said, "nationalism is a young and progressive creed. We do not equate nationalism with chauvinism, and we do not interpret nationalism as meaning the superiority of our peoples over others . Nationalism may be an out-of-date doctrine for many in this world, for us of Asia and Africa it is the mainspring of our efforts Understand that, and you have the key to much of post-war history. Fail to understand it, and no amount of thinking, no torrent of words, no Niagara of dollars, will produce anything but bitterness and disillusionment . . . "

President Sukarno spoke as follows on the question of U.S aid to Asian nations: "The approach to the question of foreign aid should be based upon different principles in different countries. Without adequate knowledge of those countries, even if your motives in granting aid were solely the stability of this region [i e. Asia], the results could be adverse and the flow of even billions of dollars could lead only to strained relations. Certainly military aid is no substitute for Asian stability. It will serve only to make countries accepting it more dependent upon the U.S A , and their worth as genuine partners in the struggle for liberty, peace, and prosperity will consequently decline. The main aim should be for the people of Asia, like the Western nations, to become not only economically stable but also politically stable, and thus to be able to defend their freedom against all assaults . . We are determined that no material advantage will buy from us any part of our hard-won freedom, for that freedom is more dear to us than the products which any country can give or sell. We welcome assistance on terms of mutual benefit. We reject the idea of exchanging intellectual and spiritual independence or physical liberty for momentary advantage."

After a five-day visit to Canada, where he addressed a joint session of the Canadian Parliament on June 5, President Sukarno flew to Rome, where he had discussions with President Gronchi, Signor Scelba (the Italian Prime Minister) and Signor Martino (the Foreign Minister) on technological, industrial, and cultural co-operation ; he was received on June 13 by the Pope, with whom he discussed the position of Roman Catholic missionaries in Indonesia. On June 18 he proceeded to Bonn, where he met President Heuss and the Federal Chancellor, Dr. Adenauer, the Foreign Minister, Dr. von Brentano, and the Minister of Economic Affairs, Professor Erhard. Preliminary discussions took place on a German-Indonesian economic treaty, as a result of which it was agreed that German technical experts should visit Indonesia. During his stay in Western Germany, which ended on June 26, President Sukarno also visited Berlin and Heidelberg, addressing professors and students of the University of Heidelberg on the principles of Indonesia's foreign policy. After a brief visit to Switzerland, President Sukarno returned to Indonesia on July 3.

President Sukarno's Visits to Communist Countries.

President Sukarno, again accompanied by Mr. Abdulgani, left Jakarta on Aug. 26 on a second tour covering the Communist countries, arriving in Moscow two days later. After visiting Leningrad and a number of other Soviet cities he returned to Moscow for discussions with the Soviet leaders. Before leaving the U.S.S.R. he received the Order of Lenin from President Voroshilov.

A joint communiqué signed in Moscow on Sept. 11 by Mr. Abdulgani and M. Gromyko, Deputy Soviet Foreign Minister, stated that the two Governments held identical views on disarmament, the "struggle against colonialism," and the prohibition of atomic and thermo-nuclear weapons, and were agreed that "military pacts do not lead to a reduction of international tension, which is most needed to achieve world peace." They were also agreed that the Suez question should be solved peacefully "on the basis of complete respect for Egypt's sovereignty and dignity." The statement also called for the admission of the Chinese People's Republic to the United Nations.

From Sept. 12-18 President Sukarno paid a state visit to Yugoslavia, during which he had discussions with President Tito and other Yugoslav leaders

A communiqué signed on Sept. 17 by Mr. Abdulgani and M. Popovich, the Yugoslav Foreign Minister, reaffirmed both countries' support for the principles of peaceful co-existence laid down at the Bandung Conference, and their agreement on the following points : (1) All nations, both large and small, should participate in international life on a basis of complete equality. (2) Technical and economic aid, "without any strings whatsoever," should be extended to "those countries which have been prevented or hampered in their economic development by colonialism or other specific historical conditions." (3) Every effort should be made to solve the problem of the emancipation of still dependent peoples, such as Dutch New Guinea. (4) The Suez problem should be solved "in a peaceful way, without any threat of force, and on the basis of the principle of respecting the sovereignty and dignity of Egypt and of taking into account the freedom of navigation Both parties consider that the solution of this problem cannot be achieved by unilateral action of only one group of users of the Canal, and therefore appeal to all States . . . to render assistance actively and in an organized way to achieve a corresponding negotiated settlement" (5) All non-member States entitled to U N. membership, and Communist China in particular, should be admitted to the U N without delay (6) Incessant efforts should be made, primarily through the U N , to achieve disarmament and the prohibition of atomic and thermo-nuclear weapons

In a press statement on Sept. 18 President Sukarno expressed his conviction that Socialism of the Yugoslav type, "full of revolutionary dynamism," was the best way of achieving the progress of Indonesia Western Socialism, he declared, had become an "outmoded pattern because it lacks revolutionary ideas, and as such cannot provide any feasible platform for the people to work upon. That is the reason why the Western type of Socialism cannot flourish in Asia and Africa, including Indonesia."

On leaving Yugoslavia President Sukarno paid a private visit to Austria, and subsequently visited Czechoslovakia, Mongolia, and China, returning to Jakarta on Oct. 16. During his tour he invited Presidents Voroshilov, Tito, and Mao Tse-tung to visit Indonesia.

Addressing a teachers' conference at Bandung on Oct. 31, President Sukarno said that he had profited more from his tour of the Communist countries than from his earlier visits to the U S A and Western Europe. He appealed to the Indonesian political leaders to "bury" the existing 40 political parties, and suggested that after their dissolution it could be decided whether Indonesia should have a single-party system or a limited number of "rational" parties. He denied that he wanted to abolish democracy, said that he aimed at a "guided democracy," and also advocated the formation of "cadres" on the Soviet model, to help in the country's development

Soviet-Indonesian Economic Agreement.

Under an agreement signed in Jakarta on Sept. 15, the Soviet Government undertook to provide economic and technical aid to Indonesia to the value of $100,000,000 (about £35,000,000) by supplying capital goods, machinery, and heavy industrial equipment on a credit basis. The credit would bear 2½ per cent interest per annum and would be repayable after three years in 12 annual instalments, either in U.S. dollars, pounds sterling, or raw materials. The agreement also provided for the assistance of Soviet technicians in certain Indonesian projects, and for Soviet-Indonesian co-operation in the peaceful uses of atomic energy, including the training of Indonesian technicians in nuclear research The principal projects envisaged were the Umbilin coal mines in central Sumatra, nickel mines at Lake Towuti, the asphalt industry on Butin Island, hydro-electric power stations at Malibi (Celebes), and coal mines at Muara (Borneo).—(Indonesian Embassy Press Department, London - New York Times - Tanjug Agency, Belgrade - Times) **(Prev. rep. Relations with U.S.A., 14840 A ; Soviet Union, 13315 C ; Yugoslavia, 13877 G.)**

B. RHODESIA AND NYASALAND FEDERATION. — Proposed Merger of Federal and United Rhodesia Parties. - Dissolution of Commonwealth Party. - Sir Roy Welensky elected President of Federal Party.

A congress of the Federal Party, held in Bulawayo, agreed in principle on Sept. 15 that the Federal and United Rhodesia parties should become a single party to operate both in the Federal and territorial spheres, in accordance with a recommendation made by a negotiating committee of representatives of both parties. The United Rhodesia Party is the Government party in Southern Rhodesia, its leader being the Southern Rhodesian Prime Minister, Mr. Garfield Todd. The Federal Party had hitherto not contested Southern Rhodesian elections, while the United Rhodesia Party had operated only in Southern Rhodesia.

On Sept. 14 the congress unanimously elected Sir Roy Welensky (now Federal Prime Minister) as president of the party in succession to Lord Malvern, who had expressed the wish not to be re-nominated.

Mr H. E. Davies, who had succeeded the late Rev. Percy Ibbotson in 1955 as Specially Elected Member for African interests in Southern Rhodesia, announced on Sept. 9 that he would join the Federal Party.

Mr. G. F. M. van Eeden, M.P. for Kafue in the Federal Assembly, announced in Lusaka on Oct. 22 that he had dissolved the Commonwealth Party (of which he was leader) and had joined the Dominion Party.—(Federal Information Department, Salisbury) **(Prev. rep. Political Parties, 14832 B ; Federal Assembly, 14492 B.)**

A. FRANCE. — Split in Radical Socialist Party. - Formation of Dissident Radical Socialist Party in National Assembly. - M. Herriot's Resignation from Party Presidency.

The annual congress of the Radical Party, held at Lyons from Oct. 11-14, resulted in the secession of a number of deputies and senators who disagreed with M. Mendès-France's leadership of the party and his policy on the Algerian question. The most important decisions of the congress, whose proceedings were marked by heated exchanges between "Mendèsians" and "anti-Mendèsians," are summarized below:

Expulsion of M. Edgar Faure. By 924 votes to 333 the congress confirmed the expulsion from the party of M Edgar Faure, the former Prime Minister, because of his action in dissolving the National Assembly in November 1955 against the views of the majority of the Radical members of his Cabinet (see 14577 A).

Leadership of Party. The minority group, led by two former Ministers (M. Andre Morice and M. Tony Révillon), presented a motion demanding a return to joint direction of the party instead of the "one-man" direction which had been introduced at the congress of May 1955, when M. Mendès-France was elected First Vice-President of the party with three other Vice-Presidents to assist him A majority motion presented by M. Milani censured the minority for having "systematically tried to impede the activities of its leaders and thereby gravely endangered the unity of the party to the sole benefit of its enemies"

During the debate each side accused the other of responsibility for the threatened party split. MM. Révillon and Morice alleged that M. Mendès-France wished to set up "a monolithic and totalitarian régime" within the party, and that, through his attacks on the Government's Algerian policy, the party had ceased to be "a guarantor of French grandeur." M Mendès-France, however, maintained that by its progressive policy under his leadership the party was "prosperous and vigorous" and had attracted large numbers of young people. The congress eventually adopted M. Milani's motion by 1,006 votes to 426.

Re-election of M. Mendès-France. M. Pierre Mendès-France was re-elected as First Vice-President of the party, obtaining 1,298 votes against 202 cast for other candidates, notably M. Daladier [The three representatives of the parliamentary group in the party bureau had all been elected from the majority supporting M. Mendès-France.]

Algerian Policy. The congress approved a motion demanding a "clear, realistic, and resolute policy" in Algeria; complaining that "nothing efficacious" had so far been done to solve the Algerian problem; and stressing that the links between France and Algeria could "not be those of military domination" and that an "immediate change in the psychological climate" was the essential pre-condition for pacification The wording of the resolution had been amended to meet objections by the Radical Ministers in M. Mollet's Government (M. Bourgès-Maunoury, M. Maurice Faure, and M. Billères), who had expressed concern lest excessive criticisms of M. Mollet in the original text of the motion might lead to an open rupture with the Socialists and the breakdown of the present coalition. A minority motion supporting the actions of M Lacoste (the Socialist Minister-Resident in Algeria) was defeated, M. Lacoste being strongly attacked by M. Mendès-France and other members of the majority group

Following the vote on the Algerian motion, M. Morice announced on Oct. 13 that he and his friends would leave the party. Three days later they announced that they had constituted a new parliamentary group in the National Assembly which would call itself the "Radical Socialist Party." In addition to M. Morice, it comprised the following deputies: MM. Arrighi, Badie, Bruelle (a deputy for Madagascar), Devinat, Faggianelli, Gaborit, Emile Hugues, André Marie (a former Prime Minister), Morève, de Pierrebourg, Henri Queuille (also a former Premier), Ramonet, and Tony Révillon. It was also announced that about 20 members of the Council of the Republic would join the new party, including Senators André Cornu and Delpuech.

A manifesto published by the new party on Oct 17 explained that one of the chief reasons for its formation had been the majority's Algerian policy, as well as the "totalitarian methods" which gave the actual leader of the party [i.e M Mendès-France] so much power that "everyone had to comply with the chief's wishes"

M. André Morice was elected secretary-general of the new party, and M. Tony Révillon chairman of its parliamentary group. Several Radical federations joined the new party after its formation, and on Oct. 26 M. Morice announced that it had already formed 30 federations throughout the country.

The old Radical Socialist Party announced on Oct. 17, after a meeting held under M. Mendès-France's chairmanship, that it would apply to the courts to prevent the new party from calling itself the "Radical Socialist Party"—the name under which the old party had been known for over 50 years.

Following the break between the two groups, M. Edouard Herriot announced on Oct. 13 his resignation from the position of honorary life president of the party. He told the party congress that he had tried unsuccessfully to effect a reconciliation between the two factions, and added: "In these circumstances I must regretfully maintain the decision which I have taken. I have been too long the president of a unified party to become the president of a party which has been torn apart." (Le Monde, Paris - Le Figaro, Paris)

B. LITERATURE. — Book Selections for November. - Prix Goncourt Award for 1956.

Selected books published in Great Britain, the United States, and France are given below:

Great Britain. Churchill, Sir Winston—"History of the English-Speaking Peoples: Volume II—The New World." (Cassell, 30s.)

"Dying We Live. The Final Messages and Records of Some Germans who defied Hitler." (Harvill Press, 16s)

Evans, Charles—"Kangchenjunga: The Untrodden Peak." (Hodder and Stoughton, 25s.)

Keller, Werner—"The Bible as History." Translated from the German (*Und die Bibel hat doch recht*). (Hodder and Stoughton, 25s.)

Low, David—"Low's Autobiography." (Michael Joseph, 30s.)

Pawle, Gerald—"The Secret War, 1939-1945." (Harrap, 18s.)

Reitlinger, Gerald—"The S.S. · Alibi of a Nation, 1922-1945." (Heinemann, 35s)

Rowse, A. L.—"The Early Churchills: An English Family." Volume I. (Macmillan, 36s.)

Shuster, George N.—'In Silence I Speak: Cardinal Mindszenty and Hungary's 'New Order.'" (Victor Gollancz, 21s.)

United States. Lapp, Ralph E.—"Atoms and People." (Harpers, New York, $4 00)

"New York City Folklore." Edited by B. A. Bodkin. (Random House, New York, $5.00.)

Stone, Irving—"Men to Match my Mountains: The Opening of the Far West, 1840-1900." (Doubleday, New York, $5.95.)

France. Gary, Romain—"Les racines du ciel" (Nouvelle Revue Française, Paris)

The *Prix Goncourt*—the leading French literary prize—was awarded by the *Académie Goncourt* on Dec. 3 to M. Romain Gary, French Consul-General at Los Angeles, for his novel *Les racines du ciel* (see above). M. Gary (42) was born in Lithuania in 1914 and came to France at the age of 14 with his French mother. He served with distinction in the Free French Air Force during the war, and later entered the French diplomatic service.—(Ed. K.C.A. - Le Monde, Paris)

(Prev. rep. 15166 A; Prix Goncourt, 14606 B.)

C. TURKEY - UNITED KINGDOM. — London Discussions with Turkish Acting Foreign Minister.

Mr. Ethem Menderes, the Turkish Acting Foreign Minister, visited London from Nov. 30-Dec. 2 for conversations with Mr. Selwyn Lloyd, the Foreign Secretary. No official statement was issued, but the talks were reported to have dealt with the threat to peace in the Middle East through the growing Soviet infiltration of Syria, as well as the Cyprus question. In a brief statement before leaving London, Mr. Menderes said that there had been "complete understanding" on all the questions discussed.—(Times - Daily Telegraph) **(Prev. rep. 15230 A.)**

Corrigendum. The participants in the second meeting of the four Asian members of the Baghdad Pact, held in Baghdad from Nov. 19-23, were the Prime Ministers of Iraq, Pakistan, and Turkey and the Foreign Minister of Persia—not the Prime Minister of Persia as erroneously stated in 15230 A. (Ed. K C.A.)

D. LONDON. — The Smuts Memorial.

A statue of the late Field-Marshal Jan Christiaan Smuts, the former Prime Minister of South Africa, was unveiled in Parliament Square, London, on Nov. 7 by the Speaker of the House of Commons (Mr. W. S. Morrison) in the absence of Sir Winston Churchill, who was unable to be present on the advice of his doctors. British Cabinet Ministers, the South African High Commissioner (Dr. J. E. Holloway), and other Commonwealth representatives were present at the ceremony. The statue, by Sir Jacob Epstein, is a ten-foot bronze figure on a granite plinth.—(Times - Daily Telegraph) **(Prev. rep. 12231 B; 11553 B.)**

E. BRITISH WEST INDIES. — New Governors of the Bahamas and Leeward Islands.

Two appointments to Colonial Governorships were announced during October—Mr. Oswald R. Arthur, Governor of the Falkland Islands, as Governor of the Bahamas in succession to Lord Ranfurly, retiring; and Mr. Alexander T. Williams, Chief Secretary of Northern Rhodesia, as Governor of the Leeward Islands *vice* Sir Kenneth Blackburne, whose term of office was expiring.—(Times) **(Prev. rep. 13909 A; 12296 A.)**

A. AUSTRALIA. — British Atomic Weapon Tests at Maralinga.

Following the tests held in the Monte Bello Islands in May and June, four further tests of British atomic devices were held at the Maralinga proving ground, in the South Australian desert, on Sept. 27, Oct. 4, Oct. 11, and Oct. 21. The tests were directed by Sir William Penney, head of the Atomic Weapons Research Establishment of the U.K. Atomic Energy Authority.

The U.K. Ministry of Supply had announced on Aug. 7 (i) that "the decision to fire in each case will be made only after eminent Australian scientists forming the Australian Government's Safety Committee have . . . agreed that conditions are safe", (ii) that major support to the tests would be given by the Australian armed forces; (iii) that "responsibility for the necessary measurements and for the conduct of the tests . . . will be in the hands of scientific teams drawn from the Atomic Weapons Research Establishment, supported by representatives of the [U.K.] Ministry of Supply, the U.K. Services, the Medical and Agricultural Research Councils, U.K. Civil Defence departments, and from Australia and Canada"; (iv) that Air Commodore C. T. Weir, R.A.F., with the agreement of the Australian Government, had been appointed Services commander to exercise operational control, having under him "an air task force from the R.A.F. for the necessary supporting effort to the tests." The announcement added that the Australian Government had given full co-operation, and that various Australian Government Departments had contributed valuable assistance under the co-ordinating direction of Mr. Howard Beale, Australian Minister for Supply.

In a press statement at Sydney on Aug. 14, Sir William Penney said that two of the explosions would be from the tops of towers, the third would be a ground-burst, and the fourth an operational device dropped from an aircraft. He added that no hydrogen bombs would be tested in Australia.

The new proving ground at Maralinga (an aboriginal word meaning "field of thunder") was completed in time for the latest series of atomic-weapon tests. It replaced the unsuitable Emu Field, on the Woomera range, and was built in 12 months at a cost of about £4,000,000. The Maralinga tests were witnessed not only by British and Australian scientists but by the chairman of the Canadian Defence Reserach Board (Mr. A. H. Zimmerman) and other Canadian scientists. British, Australian, New Zealand, and Canadian ground troops took part in the tests, in addition to the Royal Air Force.

First Test (Sept. 27). An atomic device was detonated from the top of a steel tower in brilliant sunshine, the test being observed by 1,500 scientists, Servicemen, and press correspondents. Although the explosion was heard at distances of 300 miles, and the typical mushroom cloud observed, there was no appreciable shock-wave, the explosion being described by press correspondents as in the range of "only a very few tens of kilotons." [The *Daily Telegraph* correspondent said that the absence of a noticeable shock-wave had "strengthened the impression that Sir William Penney is developing economical weapons with an increasingly smaller critical mass."] Two *Canberra* bombers flew through the mushroom cloud within seven minutes of the explosion, while some 250 British, Australian, New Zealand, and Canadian Servicemen wearing protective clothing subsequently entered the area to examine the remains of military and civil equipment which had been exposed to the blast. Steel frames of sheds 1¼ miles from the point of explosion were standing, but had their sides blown out; others closer to the detonation-point were flattened.

Press correspondents who entered the area stated that no trace of the tower was found, nor any appreciable crater, but only an ash-grey circle about 500 yards in diameter. Outside this area, all desert herbage and scrub had been destroyed over a radius of about a mile, leaving only the red soil.

Second Test (Oct. 4). An atomic weapon was exploded at ground level—also in daylight—with the aim of producing conditions similar to those of an atom-bomb hitting the earth. Eye-witnesses 70-80 miles away saw a bright red flash and clouds of reddish-brown dust surging upwards into the typical mushroom shape. The explosion was on a smaller scale than that of Sept. 27, however, and was not heard more than 80 miles away. The test was watched from a distance by members of the Australian Parliament and the Federal Minister of Supply, Mr. Beale, but no press correspondents were allowed to be present.

Third Test (Oct. 11). A nuclear weapon was dropped from an R.A.F. *Valiant* in daylight and burst some distance above the ground, the height not being disclosed for security reasons The characteristic mushroom cloud rose, expanded, and dispersed in a manner similar to the earlier bursts. Whereas the sound of the explosion frightened schoolchildren 200 miles away, other people living less than 100 miles from Maralinga heard nothing—an anomaly which was attributed by scientists to atmospheric differences causing wide variations in intensity.

Fourth Test (Oct. 21). In the final test—the only one of the four to be carried out at night—a nuclear device was detonated from the top of a tower, as in the first test. Press correspondents were not present, but people at a great distance saw a tremendous white flash which made the desert brighter than day, followed by a brilliant fireball and a mushroom cloud rising to a height of five miles. The explosion, officially described as being "for purely scientific purposes," was believed to have been the most important of the series.

Before leaving Australia for Britain, Sir William Penney said that the Maralinga tests had gone very much as expected and had yielded valuable information both from the military and civil defence points of view.—(Times - Daily Telegraph - Australian News and Information Bureau)

Prev. rep. Monte Bello Tests, 14940 A.)

B. HONDURAS. — Deposition of President Lozano.

The President of Honduras, Dr. Julio Lozano, was deposed on Oct. 21 by a bloodless military coup in Tegucigalpa carried out by the armed forces. The presidential powers were provisionally vested in a three-man military junta consisting of General Roque Rodriguez, Colonel Hector Carracioli (commander of the Honduran Air Force), and Major Roberto Galvez Barnes, Minister of Development in President Lozano's government.

Shortly before the coup, elections to a Constituent Assembly had been held on Oct. 7 at which the National Union party—the Government party supporting President Lozano—claimed to have won all 56 seats. The Opposition parties—the Liberals and Nationalists—alleged that the elections had been fraudently conducted, and protested strongly against the atmosphere of violence and intimidation in which they had been carried out. [Eleven people were killed in clashes during the elections]. In a proclamation issued on Oct. 21 the military junta said that the armed forces had decided to depose President Lozano "when it became apparent that the elections of Oct 7 were opposed by the great majority of the people," and because the armed forces "did not want to be placed in a position whereby they would have had to enforce the laws of a Government that did not represent the will of the people." Assurances were given that the Government would be returned "to a civilian element that has authentic popular support"; that the junta would remain in command "only during the time that democratic criteria and the national interest necessitate"; and that it intended "to govern democratically with the support of all Hondurans of good faith."

The junta issued a decree on Oct. 25 which abrogated the Constituent Assembly elections on the ground that they had been carried out "under circumstances which cannot be considered as a genuine expression of the will of the Honduran people."

Dr. Lozano, formerly Vice-President of Honduras, had taken over the presidency in October 1954, after the presidential elections held in that month had failed to secure an absolute majority for any of the candidates.—(New York Times)

(Prev. rep. Honduras, 13955 B.)

C. FRANCE. — Elections to French Academy.

The *Académie Française* was restored to its full complement of 40 members on Nov. 29, when M. Robert Kemp, dramatic critic of *Le Monde*, and M. Jacques Chastenet, the historian, were elected to fill vacancies caused by the deaths of M. Louis Madelin (the historian) in August 1956 and of Admiral Lacaze in March 1955. M. Kemp is regarded as the *doyen* of French dramatic critics, while M. Chastenet, co-editor from 1931-42 of the newspaper *Le Temps*, is the author of several books on English history.

Three earlier vacancies in the *Académie* had been filled during the past year as follows. (*a*) M. André Chamson, the well-known novelist, in place of the late Baron Sèilleres (May 17, 1956); (*b*) M. Vladimir d'Ormesson, French Ambassador to the Holy See, and formerly a distinguished journalist on the staff of *Le Figaro*, in place of the late M. Paul Claudel, the poet (May 3, 1956); and (*c*) M. Jérôme Carcopino, the historian, internationally known for his works on ancient Greece and Rome, in place of the late M. André Chaumeix (Nov. 24, 1955). (Le Monde - Le Figaro)

(Prev. rep. 14251 B.)

D. SOUTH AFRICA. — Sir de Villiers Graaff succeeds Mr. Strauss as Leader of United Party.

Sir de Villiers Graaff (43), chairman of the Cape branch of the United Party, was elected leader of the party on Nov. 21 in succession to Mr. J. G. N. Strauss, who had been in ill-health for several months and was recuperating in France. The decision was taken at a special party congress held *in camera* at Bloemfontein and attended by U.P. members from all parts of the Union. Mr. Strauss had succeeded the late Field-Marshal Smuts as leader of the United Party in June 1950. (Cape Times)

(Prev. rep. Mr. Strauss, 10871 D.)

E. UNITED KINGDOM. — First Woman Recorder.

Miss Rose Heilbron (42), Q.C., became Britain's first woman Recorder on Nov. 26, when she was appointed by the Lord Chancellor as Recorder of Burnley. The wife of Dr. Nathaniel Burstein, of Liverpool (her birthplace), Miss Heilbron was called to the Bar in 1939, took silk in 1949, and has appeared in many notable trials. (Times - Manchester Guardian)

DECEMBER 8—15, 1956

A. PETROLEUM. — Measures against Oil Shortages in Europe through Middle East Crisis. - British and Continental Restrictions. - Temporary Withholding of Additional U.S. Oil Supplies pending Anglo-French Withdrawal from Egypt. - Subsequent U.S. and O.E.E.C. Emergency Supply Arrangements.

The Anglo-French military intervention in the Israeli-Egyptian conflict had important repercussions on Western Europe's oil supplies owing to the blocking of the Suez Canal by Egypt, the interruption of oil supplies from Iraq through the sabotage of the Iraq Petroleum Company's pipeline through Syria, and Saudi Arabia's refusal to export her oil in British and French tankers and to supply crude oil to the Bahrein refinery. This meant that two supply channels carrying together 90 per cent of Western Europe's oil (7,750,000 tons per month) were cut, necessitating the diversion round the Cape of all tankers carrying Middle East oil. The anticipated oil shortage caused Britain, France, and other European countries to take stringent measures to conserve oil stocks and supplies until the normal flow could be restored, while the U.S. Government later put into effect an emergency plan for increasing Western Hemisphere oil supplies to Europe.

Restrictions in Great Britain.

Powers were taken by the Government under a new Defence Regulation (No. 3 of 1956), issued on Nov. 1, to control petroleum production, distribution, and consumption.

Cut in Oil and Petrol Deliveries. The Minister of Fuel and Power (Mr. Aubrey Jones) announced on Nov. 7 that the oil companies had been ordered to enforce a 10 per cent cut in normal deliveries of motor fuels, fuel oil, gas oil and diesel oil, affecting supplies to garages and factories and for heating purposes, and expected to result in savings of 2,500,000 tons of oil a year.

Exemptions from the motor fuel cuts would apply to police, fire, hospital, ambulance, and public passenger transport services, which, however, were expected to economize wherever possible. Exemptions from the oil cuts would apply to agriculture, fishing and essential coastal shipping, and such buildings as hospitals The gas and electricity industries were being asked to make bigger savings and reduce their oil requirements to the maximum extent without affecting their production.

To prevent hoarding by motorists he (the Minister) had made an Order prohibiting the sale of motor fuel otherwise than into the tank of a vehicle or for immediate use.

Deliveries of other petroleum products such as aviation fuel, vaporizing oil, lubricants and paraffin, which made up only a small proportion of the total oil consumption, would continue normally for the present, but the Government asked all users of these products to exercise restraint.

In a press statement on the same day Mr. Aubrey Jones stated that 70 per cent of Britain's total annual oil consumption of 21,000,000 tons came either *via* the Suez Canal or through the Iraq Petroleum Company's pipeline; after allowances had been made for Middle East supplies diverted round the Cape, the shortfall in oil supplies would be 25 per cent.

Creation of Oil Emergency Advisory Committee. Mr. Aubrey Jones also announced on Nov. 7 that he had set up an Oil Emergency Advisory Committee under the chairmanship of Mr. B. R. Jackson, of the British Petroleum Company. The other companies represented were Royal Dutch Shell and the *Compagnie Française des Pétroles*. The committee's function would be to advise on oil supply problems arising from the Suez emergency and, if required, to assist Governments in fulfilling any plans to achieve the optimum of available supplies and tanker tonnage.

Petrol and Oil Rationing. It was announced on Nov. 20 that petroleum and diesel oil fuel would be rationed from Dec. 17; public transport services cut by 10 per cent; and fuel oil for domestic heating further restricted These measures—details of which are given below—aimed at equating demand and supply with minimum effects on industry:

Basic Ration. Under these arrangements private motorists would be given a basic allowance equivalent to 200 miles' motoring a month —a cut of 30 per cent in the average driver's motoring. The monthly basic allowance for cars and motor-cycles would accordingly be:

Motor-Cars.

Up to 1,100 c.c., including three-wheel vehicles (one to nine h.p.)	6 gallons
1,101 c.c. to 1,600 c.c. (10 to 13 h.p.)	7½ gallons
1,601 c.c. to 2,400 c.c. (14 to 19 h.p.)	9½ gallons
2,401 c.c. and over (20 h.p. and over)	10½ gallons

Motor-Cycles.

Up to 250 c.c.	3 gallons
Over 250 c.c.	4½ gallons

Owners of motor-scooters (e g. the Lambretta and Vespa) and of motor-assisted bicycles would get the basic allowance for motor-cycles of up to 250 c.c.

Supplementary Allowances. These would be made for essential purposes only—doctors, midwives, veterinary surgeons, invalids, disabled drivers, market gardeners, and for a miminum of business journeys.

Public Transport. The cut would vary from 5 to 6 per cent on buses to 50 per cent on goods vehicles, coaches, and private hire vehicles. For goods vehicles the weekly basic petrol ration would be 2 gallons for every half-ton unladen weight, while for diesel goods vehicles it would be enough to cover the same mileage as petrol-driven goods vehicles.

Domestic Heating. Following the 10 per cent cut already announced, oil supplies for domestic heating would be further reduced on Dec. 1 to 33⅓ per cent on gas-diesel oil and 25 per cent on fuel oil. Hospitals and similar institutions would continue to be exempted, and the latest cuts would not apply to schools.

Industry. While no further reductions would be made in industrial fuel oil, industrial gas-diesel oil would be cut by a further 10 per cent—making a total cut of 20 per cent. Diesel oil for agriculture and fishing vessels, hitherto supplied in full, would be cut by 10 per cent. Minimum requirements for railways and coal production would, however, be maintained.

Aviation. Airlines would continue to receive normal supplies of aviation spirit, but those for clubs and private flying would be curtailed.

The Minister added that he anticipated increases in oil and petroleum prices to meet extra freight charges owing to the long haul round the Cape and higher distribution costs under rationing conditions.

Supplementary Petrol Allowances. Further details of supplementary petrol allowances for motorists were announced by Mr. Aubrey Jones on Nov. 29, as follows:

(*a*) For business and professional purposes the maximum allowance would be 300 miles a month, including the basic ration.

(*b*) A priority class with a maximum allowance of 600 miles a month, including the basic rate, would comprise farmers, clergymen, and, *en bloc*, local authorities and public utilities for a restricted number of persons responsible for public health, sewerage, water, and maintenance of overhead lines and pipelines.

(*c*) A top priority class—including doctors, midwives, home nurses, veterinary surgeons, invalid-carriage users, and disabled drivers —would receive allocations according to needs.

All motor fuel dealers were requested to ensure that their stocks of petrol on Dec. 17 would be sufficient for them to collect enough coupons to cover their first ration delivery. The oil companies would deliver to every dealer, over the period Dec. 1-16, 60 per cent of December's allocation due under the existing restrictions.

Supplementary Allowances for Goods Vehicles. The Minister of Transport and Civil Aviation gave instructions to Regional Transport Commissioners on Dec. 4 that supplementary allowances for goods vehicles should be issued only where the use of road transport could not be avoided. Special consideration would be given, *inter alia*, to feeder services to and from railways or ports; traffic requiring specially constructed vehicles which could not be transferred to other forms of transport, the bulk movement of essential foods; seeds and raw materials necessary for food production; milk deliveries and those of essential medical supplies; materials for the steel industry; and newsprint

In so far as petrol supplies allowed, the needs of other traffic would be met by supplementary issues first to "A" and "B" and secondly to "C" licensed vehicles; small "C" licensed vehicles of one ton and under, however, would be granted supplementary allowances only in exceptional circumstances.

Suspension of Driving Tests. Bookings for driving tests were discontinued on Nov. 12, and tests suspended from Nov. 23 except for persons suffering from a physical disability.

Oil to Coal Conversion. All industrial firms which had recently converted their plant from coal- to oil-burning were urged on Nov. 17 to revert temporarily to the use of coal if possible.

Northern Ireland and Isle of Man. In Northern Ireland petrol and oil rationing would come into force on Dec. 17, provisions being the same as those announced in the U.K. In the Isle of Man, petrol rationing would not come into force until January 1957.

Restrictions in Continental Europe and Irish Republic.

Restrictions in Continental countries and in the Irish Republic are summarized below:

France. Petrol and oil deliveries by refineries were reduced by 20 per cent on Nov. 11, and by 25 per cent on Nov. 15. The production of high octane petrol was prohibited on Nov. 10.

The radius of private motoring was restricted to departments bordering those in which individual cars were registered (Nov 7); petrol deliveries to dealers were cut by one-third, and the sale of petrol in cans and other receptacles prohibited (Nov. 11); motorists were asked to cut their consumption voluntarily by 30 per cent (Nov. 17); and petrol pumps were ordered to be closed from midday on Saturday to midday on Monday, except at a few authorized garages for persons engaged on essential services. Petrol rationing was introduced from Nov. 29 throughout the country.

Diesel and fuel oil was rationed from Nov. 10, users being divided into nine categories, with ordinary allowances equivalent to two-thirds of consumption in the last quarter of 1955, and supplementary allowances for the railways, ports, inland shipping, and the Navy. Gas oil was rationed from Nov. 21 at 80 per cent of consumption in the last quarter of 1955.

The French National Railways reduced consumption of fuel oil by 12 per cent, 20 long-distance oil-fuelled train services being cancelled.

Belgium and Luxemburg. Petrol deliveries to dealers were cut by 10 per cent, and Sunday pleasure motoring banned.

Diesel oil for central heating was cut by 20 per cent and fuel oil for industry by 10 per cent.

Denmark. Fuel oil was rationed on Nov. 16, the scheme being administered by the rail companies; deliveries were cut by 20 per cent, (retrospectively from July 1, 1956) to avoid adverse effects of hoarding. Petrol rationing came into force from midnight of Nov. 28, and the prices of petrol and all other oil products were raised on Dec. 11.

Irish Republic. Petrol rationing for all vehicles (excluding public transport) was ordered on Dec. 1, to take effect from Jan. 1, 1957. The monthly basic allowance (smaller in some cases than in the U.K.) varied according to category and horsepower rating of vehicles, e.g. for a 10 h.p. private car, 7½ gallons or 250 miles' motoring a month. Small supplementary allowances were authorized for essential purposes—doctors, clergymen, midwives, veterinary surgeons, and carriers of essential foodstuffs and fertilizers.

Petrol sales by garages were restricted with immediate effect, and the retail price of petrol and fuel oil increased by 3½d. a gallon and of paraffin, gas and diesel oil, and vaporizing oil by 3d. a gallon.

Italy. Fuel oil consumption was cut by 10 per cent, and the retail price of petrol raised by 11 per cent.

Netherlands. The Rationing Act of 1939 was re-enacted; petroleum exports banned; and all firms using oil products were obliged to register (Nov. 13).

Petrol deliveries to dealers were cut by 15 per cent (Nov. 20), Sunday pleasure motoring banned; and motorists were asked to cut consumption voluntarily by 10 per cent.

Diesel oil for central heating was cut 20 per cent and fuel oil for industry by 10 per cent (Nov. 20).

Norway. Deliveries of petrol were reduced by 10 per cent, based on 1955 consumption; priority users included taxis and commercial and public transport vehicles (Nov 16). A similar reduction was enforced for diesel oil for central heating.

Poland. Petrol was rationed from Dec. 3 with the aim of cutting consumption by 20 per cent.

Spain. Limited rationing of fuel oil for lorries came into force in Madrid Province on Nov. 12.

Sweden. A 13-week ban on week-end pleasure motoring came into force from Nov. 16 with the aim of reducing consumption by 13 per cent.

Deliveries of petrol were cut by 13 per cent, and of diesel oil for central heating by 20 per cent.

Switzerland. Pleasure motoring was banned on Sundays and public holidays from Nov. 25, but the ban was lifted on Dec. 10 because of improved stocks and fresh imports.

Turkey. Private Sunday motoring was banned, and petrol rationed from Nov. 20 for all users except public service vehicles.

Western Germany. No petrol rationing was imposed since only one-third of West German supplies come from the Middle East; refinery output, however, was cut by 10 per cent. Petrol prices were increased by 5 pfennigs (1d) a gallon on Dec. 3.

Other measures included the rationing of diesel and fuel oil by oil companies; a 20 per cent cut in deliveries of diesel oil and of 30 per cent in fuel oil; and a 12½ per cent increase in the price of fuel oil.

Saar. Petrol was rationed from Nov. 22.

The proportion of total energy used represented by oil in 1955 was 20 per cent in France, 16 per cent in Belgium and Luxemburg, 37 per cent in Denmark, 33 per cent in Italy, 26 per cent in the Netherlands, 25 per cent in Norway, 44 per cent in Sweden, 29 per cent in Switzerland, 30 per cent in Turkey, and 9 per cent in Western Germany.

Formation of O.E.E.C. Petroleum Emergency Group.

Following a resolution on Nov. 8 whereby the 17 member-countries of the O.E.E.C. agreed that in the event of a European oil shortage the "resulting burden would be shared on an equitable basis," and due consideration given to countries particularly dependent on oil, the O.E.E.C. Oil Committee requested all member-countries on Nov. 13 to draw up reports on their short-term oil supplies, which would form the basis of a common distribution policy. Mr. Maudling, the U.K. Minister of Supply, announced in the House of Commons on Nov. 12 that an interim agreement had already been reached among the O.E.E.C. countries to cut their oil consumption by 10 per cent, but with the proviso (insisted on by Greece and other members) that Rumanian and Soviet oil supplies should be excluded from any allocation system.

On the recommendation of the O.E.E.C. Oil Committee, the Council of the O.E.E.C. decided on Nov. 30 to set up a Petroleum Industry Emergency Group (O.P.E.G.) comprising representatives of the European international supplying companies, including the British Petroleum Company, Royal Dutch Shell, and the *Compagnie Française des Pétroles*. The Group would advise the Oil Committee on the availability of oil for Europe, and assist in the allocation of available supplies between members.

Apart from the O.P.E.G. and the Oil Committee, two other permanent O.E.E.C. committees—the Economic and Maritime Committees—were dealing with the economic and shipping aspects of the oil problem. In addition, a series of national committees (comprising representatives of the oil distributors in each country) were supplying statistics on national oil stocks and anticipated arrivals.

A report by the Oil Committee, approved by the Council of the O.E.E.C. on Nov. 30, said that the overall effect of the restrictions taken by member-countries to date had been to reduce oil consumption by 20 per cent. Member-countries had also agreed not to implement measures affecting the general aim of making the fullest possible use of available oil stocks and tankers.

The statement pointed out that a tanker employed on the Persian Gulf-Europe route *via* the Cape could only carry 60 per cent of the oil normally carried in a given period *via* the Suez Canal. Moreover, the carrying capacity of tankers normally loaded at the Eastern Mediterranean pipeline terminals, if re-routed *via* the Cape, would be only 25 per cent of their normal capacity. After taking account of supplies normally obtained from the Western Hemisphere, and of indigenous production, Europe as a whole could therefore count on receiving little more than 60 per cent of her requirements, unless "the most strenuous measures" were taken to increase Western Hemisphere supplies.

To make up this deficiency it had been estimated that an increase in Western Hemisphere production of about 1,700,000 barrels a day (about 85,000,000 tons a year) would be required, but it was impossible to tell whether an increase of this magnitude would be possible. In any case it would take many months to achieve, and might be impossible on a sustained basis.

Technical advice suggested that, in order to maintain the supply at 75 per cent of normal, Western Hemisphere production would have to be increased by 600,000 to 800,000 barrels of oil a day—the reason being that to secure an extra ton of oil for Europe, production would have to be increased by two extra tons, since it was necessary to offset the loss of Middle East oil which would otherwise have been transported to the U.S.A. by tankers diverted to the shorter North American run. Even if this increase in production could be secured, however, the co-operation of the oil companies and the most efficient use of tanker tonnage would be essential to raise the level of Europe's oil supplies from 60 to 75 per cent of normal

Expert opinion suggested that the required increase in Western Hemisphere production was within the capability of producers in the U.S.A. and Venezuela, but that in present circumstances "more than commercial incentive alone" was needed to bring forth the additional oil. Until such a major increase in Western Hemisphere production was achieved, European stocks would fall rapidly, despite the introduction of severe restrictions on oil consumption in member-countries.

U.S. Government suspends Middle East Emergency Committee. - Restrictions on Oil Supplies for Europe until Anglo-French Withdrawal from Egypt.

The Middle East Emergency Committee, appointed by President Eisenhower on Aug. 9 to deal with any shortage in oil supplies for Europe arising from the Suez Canal crisis (see 15041 A, page 15045), was suspended by the U.S. Administration on Nov. 1 following the Anglo-French intervention in Egypt—a step interpreted by the U.S. press as a move to dissociate the U.S. Government from the British and French action. As a result, European countries were compelled to negotiate individually with U.S. oil companies for additional supplies; but co-ordinated action by these companies, or any large-scale increase in American oil output, was prevented by the U.S. anti-trust laws.

Meanwhile the U.S. State Department insisted that it could not initiate any official aid—both as regards oil supplies and the additional dollar finance required to pay for them—until the Anglo-French forces had been withdrawn from Egyptian territory. However, in response to a joint appeal by Austria, Greece, Italy, Switzerland, and Turkey, who were threatened with rapidly diminishing stocks, the Acting U.S. Secretary of State (Mr. Herbert Hoover jr.) gave an assurance on Nov. 20 to the Italian Ambassador (Signor Brosio), who had made representations on behalf of those countries, that the U.S.A. would help Europe in the emergency. Mr. Hoover added, however, that such help would be extended only through the O.E.E.C. and not by direct negotiations with individual countries. A similar assurance of U.S. assistance was given by Mr. Hoover to Dr. Luns, the Netherlands Foreign Minister, on November 23.

It was reported in the *New York Times* that Mr. Hoover had made four main points in his reply to Signor Brosio: (1) The O.E.E.C. should make the maximum use of oil supplies available to its member-countries, and then submit its further emergency needs to the U.S.A.; (2) increased U.S. oil production could be achieved without "activating" the Middle East Emergency Committee, (3) the U.S. Government would take some tankers out of its reserve fleet to help overcome transportation difficulties, which it regarded as the most serious aspect of the problem; and (4) the O.E.E.C. should study the financial burden created for European countries by taking increased supplies of dollar oil, and should then discuss the financial problem with the U.S. Government "on a European level."

The U.S. refusal to make any positive moves towards closer co-operation with Western European countries on the question of emergency oil supplies, and Mr. Hoover's insistence that negotiations should be conducted through the O.E.E.C. only, were attributed in the British, French, and U.S. press to the Administration's desire not to alienate Arab and Asian opinion by appearing to support the Anglo-French intervention in Egypt or by dealing directly with Britain and France while their troops were still on Egyptian territory. The Administration's attitude, however, met with growing criticism in the U.S.A., especially after the Anglo-French acceptance of the U.N. demand for the withdrawal of their forces from Egypt. Concern was also expressed at the effects of the U.S. policy on West European countries not connected with the Anglo-French action. Moreover, several leading U.S. newspapers, including the *New York Times* and the *New York Herald Tribune*, commented that the U.S. Government, by its attitude, appeared to wish to punish only its allies, although having refrained from applying any economic sanctions to Egypt after the illegal seizure of the Canal. Apprehension was also widely expressed in the U.S.A. at the strong anti-American feeling which had been aroused in Britain and France through the policy of the U.S. Administration, and at the open breach in the Atlantic alliance at a time when the Soviet intervention in Hungary had shown the North Atlantic Treaty Organization to be an indispensable element of American security.

U.S. Emergency Plan to relieve Oil Shortage in Europe. - Reactivation of Middle East Emergency Committee. - "Tanker Pool" for transporting Oil to Europe.

In the light of these developments, and following the announcement of the "phased withdrawal" of British and French troops from Egypt, President Eisenhower issued instructions on Nov. 30 for the immediate implementation of the Government's emergency plans to relieve the oil shortage in Europe. A statement issued by his Press Secretary said that the President, after consultation with Mr. Dulles and Mr. Hoover, had "authorized the Director of the Office of Defence Mobilization [Mr. Flemming] to request the Secretary of the Interior [Mr. Seaton] to permit the U.S. petroleum industry to co-ordinate the efforts they had been making individually to assist in handling the oil supply problem resulting from the closing of the Suez Canal and some pipelines in the Middle East."

Immediately afterwards Mr. Flemming announced that he had requested Mr. Seaton to authorize the 15 U.S. oil companies to proceed with the plans they had drafted as members of the Middle East Emergency Committee. The announcement added: "The U.S.A. desires to co-operate as fully as possible in lessening the effects of the present situation in both producing and consuming countries . . . but there will remain in all probability some shortages in certain consuming areas which cannot be overcome as long as the Suez Canal remains closed and the pipelines are unrepaired."

The President's orders meant that the U.S. oil companies would be exempted from the provisions of the anti-trust laws and thus enabled to co-ordinate their efforts to make the fullest possible use of their oil resources and available tankers. The latter would be achieved through the creation of a tanker "pool," whilst arrangements were also made for the release of 39 tankers from the U.S. Reserve Fleet.

The 15 oil companies concerned were American Independent Oil, Standard Oil of California, Tidewater Oil, Getty Oil, Gulf Oil, Standard Vacuum Oil, Arabian American Oil, Caltex Oil Products, Cities Services, Creole Petroleum, Sinclair Oil, Socony Mobil Oil, Standard Oil of New Jersey, the Texas Company, and Venezuelan Petroleum.

Following a meeting of the Middle East Emergency Committee on Dec. 3, and a joint meeting of its representatives with the O.P.E.G. in Paris on Dec. 6, the U.S. Government announced on Dec. 11 that arrangements had been worked out whereby the "tanker pool" would carry 850,000 barrels of oil a day to Europe with immediate effect.

Under this plan the 15 companies were formally "invited" to join in the effort, and were temporarily exempted from anti-trust action during the voluntary pooling of their resources, the re-routing of their tanker fleets, and the allocation of markets. The 850,000 barrels a day for Western Europe would be made available in the following manner. (*a*) 500,000 barrels a day would be shipped direct to Europe from the Western Hemisphere, (*b*) 350,000 barrels a day from the Middle East oilfields would be carried by the "tanker pool" to Europe instead of being shipped to U.S. and Canadian refineries. To make up for this shortfall, an additional 350,000 barrels a day would be carried to American and Canadian refineries from U.S. Gulf and Caribbean ports.

It was pointed out in the British press that the net effect of this aid would be to bring West European oil supplies back to 75 per cent of normal. A spokesman of the U.K. Ministry of Fuel and Power, however, gave a warning that it would take a considerable time to bring the U.S. scheme into full operation and that it was "much too early" to talk about ending restrictions on oil supplies in Britain, since it would be "well into the New Year before any effects of the American effort would be felt."—(Times - Daily Telegraph - Manchester Guardian - Financial Times - O.E.E.C. Information Division, Paris - New York Times - New York Herald Tribune - Le Monde, Paris - Neue Zurcher Zeitung - Frankfurter Allgemeine Zeitung - Corriere della Sera, Milan - Irish Times, Dublin) **(Prev. rep. Middle East Crisis, 15201 A.)**

A. ICELAND - UNITED KINGDOM. — Settlement of Fisheries Dispute.

The Organization for European Economic Co-operation announced on Nov. 14 (*a*) that representatives of the British and Icelandic fishing industries had signed an agreement providing for the immediate resumption of landings at U.K. ports of fish caught by Icelandic trawlers, thus ending the dispute between Icelandic and British trawler owners which began in 1952; (*b*) that the two Governments had reached agreement on other aspects of the dispute.

Fishing Industries Agreement. This agreement was designed to run for 10 years from Nov. 15, 1956, subject to review after two years at the wish of either party. It (*a*) limited the value of Icelandic trawler landings to £1,800,000 a year, spread equally over four three-monthly periods; (*b*) provided that within each period supplies of the permitted amounts must not exceed 40 per cent of haddock and flat fish and 60 per cent of cod or other varieties.

Imports into the U.K. of frozen and boxed fish from Iceland remained outside the agreement. It was laid down, however, that if such imports appeared at any time likely to affect adversely the British market's capacity for absorbing fresh fish, the fishing industries of the two countries would hold mutual consultatons and would refer the matters in dispute to the O.E.E.C. if they failed to agree.

[The Icelandic Government pointed out that owing to the development of the fish-processing industry in Iceland since the beginning of the boycott of Icelandic fishing landings in Britain, no definite quantity of fresh fish exports could in future be guaranteed.]

Governmental Agreement. The Council of the O.E.E.C. noted statements by the Icelandic and U.K. delegations on other aspects of the settlement—e.g. on the extension of fisheries limits and the safety of vessels entering them.

The Icelandic Government had undertaken (*a*) not to extend the existing fisheries limits while the report of the International Law Commission on the Law at Sea was under consideration by the U.N. General Assembly; (*b*) to take no new steps for the further extension of the fisheries limits in the meantime; and (*c*) to re-examine the matter after the conclusion of the General Assembly's debates. The British Government had stated that its acceptance of this Icelandic declaration did not imply a recognition of the existing fisheries limits [see 12489 B].

On the question of the safety of foreign fishing vessels entering Icelandic fisheries limits, the Icelandic Government had stated that the practice would be continued of not applying either the law governing the stowing of gear within these limits, or the rules forbidding the sale of catch by foreign fishing vessels seeking shelter because of bad weather or other reasons of *force majeure*.

The agreements were based on proposals made by an O.E.E.C. group headed by M. Gérard Bauer (Switzerland), which had been set up in November 1954 to try to settle the dispute.—(O.E.E.C. Information Division, Paris - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 12760 A.)**

B. NEW ZEALAND. — Riccarton By-election.

Labour retained the Riccarton seat in the N.Z. House of Representatives in a by-election held on Oct. 29 and caused by the death of Mr. Angus McLagan, a former Minister of Labour under the Labour Government. The results were: M. Connelly (Labour), 6,310; B. G. Dingwall (National), 2,549; W. B. Owen (Social Credit), 1,355; others, 38. At the general election in 1954 Mr. McLagan polled 8,195 votes against 3,852 for Mr. Dingwall and 2,599 for Mr. Colechin (Social Credit).—(N.Z. Directorate of Information, Wellington) **(Prev. rep. 13328 D.)**

A. SUEZ CANAL DISPUTE. — Anglo-French-Egyptian Agreement on "Six Principles" for Suez Canal Regime. - Security Council Approval. - Soviet Veto of Anglo-French Resolution on 18-Power Proposals. - Indian Compromise Plan. - Israeli Memorandum on Egyptian Blockade. - London Meeting of Canal Users' Association. - Appointment of S.C.U.A. Administrator. - Anglo-U.S. Differences on Payment of Canal Dues.

Prior to the Israeli military operations against Egypt and the Anglo-French intervention in the Suez Canal zone, the U.N. Security Council had discussed the dispute over the Egyptian nationalization of the Canal from Oct. 5-13.

At the beginning of the discussions (Oct. 5) Britain and France had submitted a joint resolution requesting the Council to recommend (*a*) that the Egyptian Government should join in negotiations to work out a system of operation for the Canal, based on the 18-nation proposals adopted at the London Conference, and (*b*) that, pending the outcome of the negotiations, Egypt should co-operate with the newly-established Suez Canal Users' Association (S.C.U.A.).

Mr. Selwyn Lloyd (U.K. Foreign Secretary), introducing the Anglo-French resolution, declared that though the Canal was geographically part of Egypt and under Egyptian sovereignty, that did not give Egypt the right to destroy the international rights which existed, and which had been assured both by the setting-up of the Universal Suez Canal Company "on an obvious international basis" and by the 1888 Convention. The Company had operated under statutes and concessions designed to secure the impartial and non-political operation of the Canal on a non-discriminatory basis and in the interests of vessels of all nations without distinction of flag, and this concession, together with the 1888 Convention, constituted "a balanced scheme" The Egyptian Government had now "destroyed the balance of the scheme" by taking out of it the operation of the Canal by the Company, and thus removing one of the guarantees afforded under the Convention to user-interests. This action was contrary to the basis of the Convention, and the Egyptian Government could not require the user-countries to recognize the consequences of its action, to accept a purely Egyptian authority for the operation of the Canal, or to pay transit dues to that authority.

It followed that the user-countries, as they were not obliged to accept an Egyptian authority as the operating entity in lieu of the Company, were entitled, within the limits of the relevant international instruments, to set up their own association to safeguard their passage rights, and to call upon Egypt to restore the guarantees which she had impaired by nationalizing the Company. If the Company itself could not be restored, it should be replaced by an operating authority of an international character which would serve the same purpose. This was the legal foundation of the Anglo-French proposals to the Security Council.

"We have no quarrel with the right to nationalize as such," Mr. Lloyd declared. "That is not an issue . . . The real issue is the sanctity of treaties and respect for international obligations. But it was not merely disregard for a treaty, not merely the repudiation of an agreement made six weeks earlier, that worried us. The reasons given by the President of Egypt were most disturbing to any future confidence or reliance upon the undertakings of his Government. In an angry speech he said that the action taken was because the U.S. Government had refused aid to Egypt to build the Aswan Dam. He made it clear that this action against the Canal Company was a form of retaliation He described it as a 'triumph,' announced his intention to 'score triumph after triumph,' and indicated that the revenues of the Canal would be used to build the Aswan Dam. In other words, he was indicating that action with regard to the Canal was being taken for political reasons, and that in future its finances would be conducted for the benefit of one country—Egypt That was not all. The decision was taken without notice, without any discussion with other Governments or with the Canal Company. It was staged in the manner of a *coup d'état*, with armed personnel occupying the Company's premises In the nationalization decree the employees of the Company were told that they would be liable to imprisonment if they did not remain at their posts . .

"All this is extremely relevant when considering what international guarantees should be sought for the conduct of a Government and for its respect for its legal obligations. I say quite frankly that we do not feel, after what has happened, that any chances can be taken in the future Guarantees for the users must be clear, the methods for ascertaining breaches must be defined, and the consequences if guarantees have been broken must be clearly specified

"The second matter at stake is the economic future of many countries east and west of Suez This is not an issue between Great Britain, France, and Egypt, between East and West, between so-called 'colonial' Powers and others The patterns of trade and economic development have been set in their present forms in many countries because of the existence of the Suez Canal, and reliance upon its free and open use. If one Government is to have the power to control the Canal, the confidence of those countries that the present patterns of their trade and economies can be maintained will be shaken. If, according to the transient impulses of the President of Egypt, ships with cargoes from or to particular countries are to be stopped, if some complicated process of international ligitation has to be undertaken to get a ship through with a particular cargo, then there will be no confidence in the Canal.

"Of course, to some extent alternative means of transportation can be devised. Other pipelines, very large tankers to go by alternative routes, changed patterns of trade—all these are possible, and may indeed be necessary. But they are extremely costly and may cause great hardship to many people . . . The oil-producing countries in the Middle East must regard with grave disquiet the possibility that the direct route for their oil supplies to Western Europe may be interrupted. If this oil is to go round the Cape, less of it can be moved; and there is a virtual certainty that Western Europe will look increasingly to the Western Hemisphere, and that production in the Middle East will fall.

"But much more is at stake even than economic dislocation. The whole future of the rule of law and respect for international obligations is in jeopardy . . . Let us not forget that Egypt had already put herself in the wrong over the Canal by flagrantly disregarding the Security Council's resolution of 1951 about the passage of Israeli ships"

Mr Lloyd then enumerated the steps which Britain had taken in an effort to establish basic principles and practical methods that would ensure that the international aspects of the Suez Canal system were preserved in future. He recapitulated the convening of the London Conference; the 18-nation proposals—which, he remarked, "were not presented as an ultimatum" but put forward "as a basis for discussion," and which still stood, the "summary rejection" of these proposals by President Nasser, and the second London Conference which had decided that the matter should be brought before the Security Council In conclusion, Mr. Lloyd called upon the Council to preserve the rule of law, to uphold justice, to redress a situation which endangered the economic life of many nations, and to lay down a just and fair basis for negotiations

M. Pineau (the French Foreign Minister) similarly stressed that the question was not one of sovereignty but of respect for international treaties. He recalled the circumstances under which President Nasser had carried out the nationalization of the Suez Canal, declared that President Nasser's "acts, speeches and methods" justified the precautionary military measures taken by the British and French Governments, and said "If aggressive intentions had occupied our moves, we would not since July 26 have displayed such patience as we did, we would not have made repeated attempts at negotiation and would not have appealed to the Security Council"

After recalling the Egyptian Government's rejection "in very violent terms" of the various proposals placed before it by the user-nations, M. Pineau declared that "the acts and methods of Colonel Nasser have done irreparable harm to international confidence without thereby protecting the real interests of the Egyptian people" He continued "Twenty years ago we were unwilling to understand the warnings clearly given to us Upwards of 20,000,000 men and women paid with their lives for our heedlessness . . In the face of a problem whose features are so clear and unequivocal, no half-measures will do. No admissible settlement can be arrived at on the mere pretext that it will keep the peace for the time being . . . We are eager for a peaceful settlement, but we can accept no solution which will enshrine a *fait accompli* and recognize a Chief of State's right to release his country from international undertakings to which it has freely subscribed."

Dr. Fawzi (the Egyptian Foreign Minister), speaking on Oct 8, accused Britain and France of desiring to "amputate the Suez Canal and sever it from Egypt" He also denounced the manner in which the proposed U.S aid for the Aswan Dam had been withdrawn, saying that it had been "accompanied by a vicious campaign against the reputation of the Egyptian economy, aimed at shaking world confidence in it." He defended the Egyptian Government's nationalization of the Suez Canal Company, claimed that navigation through the Canal had been proceeding regularly and efficiently since nationalization, "in spite of French and British acts of sabotage" such as the refusal to pay tolls to the Egyptian Authority and the "instigation of French and British pilots to abandon their duties", and denied that the Egyptian action had caused any danger to international peace and security.

Dr. Fawzi proposed that the Security Council should establish "a negotiating body of reasonable size" and lay down for the guidance of that body "a set of principles to work on and of objectives to attain" In this connexion he declared: "The principle of guaranteeing the freedom of navigation on the Suez Canal to all and for all time is the most basic among the principles which should guide the work of the negotiating body. Foremost in importance among the objectives to be attained are:

"(1) A system of co-operation between the Egyptian Authority and the users of the Canal, taking into full consideration the sovereignty and rights of Egypt and the interests of the users of the Canal.

"(2) A system of tolls and charges which guarantees for users of the Canal fair treatment free from exploitation.

"(3) A reasonable percentage of the revenues of the Canal to be allotted for improvements"

The Egyptian Foreign Minister also made a new offer regarding the payment of compensation to shareholders of the Suez Canal Company. Recalling his Government's earlier offers of compensation at the value of the shares as quoted on the Paris Bourse on July 25 [the day before President Nasser issued his nationalization order], he said that Egypt would now be ready "to pay compensation according to the average value of the shares during the five years preceding nationalization," or, if no agreement were reached on this basis, to agree to arbitration. When Dr. Fawzi referred to the Five-

Power mission to Cairo led by Mr. Menzies, and described it as a "take it or leave it affair," **Dr. Walker** (Australia) intervened to stress that the Menzies Committee had presented no ultimatum to the Egyptian Government but had sought to explore the possibilities of bringing Egypt and the user-countries together on the basis of the 18-Power proposals.

Mr. Shepilov (Soviet Union) devoted the major part of his speech to violent attacks on Britain, France, and the U.S.A., speaking as follows: "What we are witnessing now is the collapse of the corrupt imperialist colonial system, a system which has outlived itself . . . Reactionary elements, under the slogan of the so-called internationalization of the Suez Canal, want to revive the old colonialist ways in Egypt, to force Egypt to her knees, and to impose their will on her . . . This is the true reason for the artificial complication and aggravation of the Suez problem."

In another reference to the same subject, Mr. Shepilov said later: "Colonialist acts are nowadays often cloaked in the snow-white robes of disinterested financial and technical aid to economically backward countries. Such acts are often called 'non-political,' and the motives behind them are passed off as altruism. Experience shows, however, that no matter in what form foreign domination is brought about, either in the form of a political and military *diktat* or in the camouflaged form of financial control, the essence of colonialism does not change."

After denouncing the Anglo-French "policy of sabre-rattling and economic sanctions against Egypt," and declaring that large forces had been concentrated by Britain, France, and the U.S.A. in the eastern Mediterranean, Mr. Shepilov asserted that it was Egypt rather than Britain and France which had reason to complain to the Council of actions constituting a danger to international peace. Referring to reports of a plan by U.S. oil and shipping companies to set up a consortium to finance technical improvements on the Canal, he said: "In reality it is not technical problems that the sponsors of this project are concerned with. The U.S. monopolists are bent on taking over the Suez Canal and establishing *de facto* control over its administration, with the intention of nullifying the nationalization of the Suez Canal Company in this roundabout way." These plans, Mr. Shepilov added were aimed not only against Egypt but also against the interests of Britain and France, as the "American oil monopolies" had "far-reaching projects of their own which were designed to dislodge their British and French rivals from the positions they now held."

Mr Shepilov alleged that the Canal Users' Association in its original form had been "designed to interfere directly in Egyptian internal affairs," that the third London Conference to set up the Association [see below] had ended in 'dismal failure," and that "the facts show that there is no unity on this question among the three Western Powers supporting the Association."

Mr Shepilov went on to propose the creation of "an authoritative committee of the Security Council" entrusted with the tasks of "finding an acceptable basis for agreement on the settlement of the Suez problem," of drafting a new Convention to replace that of 1888, and of arranging an international conference to consider and approve the new instrument The committee should tentatively be composed of Egypt, Great Britain, India, France, the Soviet Union, and the U.S.A., although the Soviet Union did not intend "to insist categorically on this precise membership," which might be increased to eight by the addition of Yugoslavia and Persia, or of Indonesia and Sweden The most important requisite was that the committee should be "balanced in such a way as to forestall the prevalence of some one point of view"

The Soviet Foreign Minister said that the "possible functions" of such a body could be

(*a*) To provide for consultations with the Egyptian Canal Authority on the implementation of freedom of navigation, and the question of tolls;

(*b*) to render, whenever necessary, adequate assistance to Egypt in maintaining the Canal in proper navigable condition;

(*c*) to maintain appropriate contacts with the United Nations and the international organizations concerned with world shipping;

(*d*) to settle disputes or, if necessary, refer them to the United Nations.

The Soviet Government believed that the following principles could form a basis for an agreement

"(1) Freedom of passage through the Suez Canal for merchant vessels and warships of all countries on the basis of equality in regard to navigational and commercial tolls

"(2) Egypt, who exercises her rights of sovereignty, ownership, and operation in regard to the Canal, shall undertake to ensure full freedom of passage through the Canal, security of the Canal and its installations, maintenance of the Canal in a proper navigable condition, improvement of conditions of navigation in order to improve the capacity of the Canal, and regular information to the U.N. on the functioning of the Canal

"(3) All parties to the agreement shall undertake not to commit acts which might infringe on the inviolability of the Canal or inflict material damage to its installations The Suez Canal shall never become a theatre of hostilities, nor subjected to a blockade.

"(4) Establishment of appropriate forms of co-operation between Egypt and the users of the Canal."

In this connexion Mr. Shepilov recalled the Indian proposal at the first London conference for the setting-up of a consultative body to represent the interests of the Canal users and to exercise advisory, consultative and liaison functions.

Mr. Dulles (U.S.A.), speaking on Oct. 9, declared that the possibilities of a settlement by peaceful means—"the first aspect of the problem"—were "good." Nearly 2½ months had elapsed since Egypt had seized the Suez Canal Company and "physically prevented it from discharging the responsibilities which had been conferred upon it in 1868 to run until 1968." "Yet," he added, "the nations which are deeply aggrieved and endangered by this action have made no forcible response. They have scrupulously lived up to their obligation under the Charter to seek first of all a solution by negotiation or other peaceful means."

Mr. Dulles recalled that six peace moves had been made so far They were (1) the tripartite meeting in London four days after the seizure, and its decision to call the first London conference; (2) agreement on the 18-Power proposals at the first London conference, (3) the five-Power Menzies mission; (4) the mission's talks in Cairo; (5) the second London conference and the decision to set up the Canal Users' Association; and (6) the French and British decision to bring the matter to the Security Council.

"In the light of this history," Mr. Dulles declared, "no-one can fairly question the peaceful desires of those who are aggrieved by Egypt's action Rarely, if ever, have comparable efforts been made to settle peacefully an issue of such dangerous proportions . . ."

Turning to the "second aspect of our problem—to find a solution which will conform to the principles of justice and international law," the Secretary of State recalled the provisions of the 1888 Convention. He declared in this connexion that although the Canal was "Egyptian in the sense that it goes through what is now Egypt," it "is not and never has been a purely internal affair of Egypt with which Egypt could do what she wanted" The Canal had always been an international waterway from the day of its opening, and this had been "guaranteed for all time by the 1888 Convention." Egypt could not rightfully stop any vessel or cargo from going through the Canal. For the Canal-users to combine to secure the observance of their rights was therefore no violation of Egyptian sovereignty "but a clear exercise of their rights accorded by international law, namely, by the Convention of 1888." This legal view, Mr. Dulles added, had been accepted by Egypt and, in fact, been expounded by her before the Security Council on several previous occasions, specifically in 1947 and in 1954.

After reviewing the 18-Power proposals in detail, Mr. Dulles said only one of the four basic principles—the insulation of the operation of the Canal from the politics of any nation—had been disputed, and that by the Soviet Union This principle, however was "the essence of the matter." "If such a waterway may be used as an instrument of national policy by any Government which physically controls it," Mr. Dulles declared, "then the Canal is bound to be an international bone of contention No nation depending on the Canal could feel secure, for all but the controlling nation would be condemned to live under an economic sword of Damocles That would be to negate the 1888 Convention and to violate both justice and law."

Referring to the proposals made by Dr. Fawzi and Mr. Shepilov, Mr. Dulles denounced the Soviet proposal that the proposed Security Council committee should be "balanced in such a way as to forestall the prevalence of some one point of view." He said in this connexion: "Mr. Shepilov obviously believes it unfortunate that 18 nations, representing more than 90 per cent of the traffic and a diversified user interest, could agree on a solution, so he wants to make a fresh start by establishing a committee so constituted that it will never agree. It is not without precedent that a Government feels that it can gain by perpetuating controversy. We have a proverb about 'fishing in troubled waters,' but it is considered respectable to veil such a purpose. Rarely has a scheme to perpetuate differences been so candidly revealed." Dr. Fawzi's proposal, however, was "in a more constructive vein," and a similar procedure had been followed at the London Conference, where "a set of principles was formulated and certain objectives outlined."

"The heart of the problem," said Mr Dulles, "is whether acceptance can be obtained of the principle that there should be a system to ensure that the Canal cannot be used by any country as an instrument of its national policy If Egypt accepts that simple and rudimentary principle of justice, I believe that the subsidiary problems can be resolved But if the principle be repudiated, than it is difficult to foresee a useful role for a negotiating body. Indeed, under those conditions it is difficult to foresee any settlement in accordance with the principles of justice and international law. And if this case cannot be so settled, then the whole system of peace with justice sought to be established by the U.N. Charter will have been undermined. Surely we can do better than that"

In conclusion, Mr. Dulles expressed support for the Anglo-French resolution, which in his opinion embodied the basic principles he had mentioned.

Mr. Popovich (Yugoslav Foreign Secretary) maintained that the Anglo-French resolution could not provide a basis for an agreement, partly because it had already proved unacceptable to Egypt, and partly because it tended to "pre-judge" a settlement which could only be reached through negotiations conducted on a basis of equality and through a *rapprochement* of views. He considered Mr. Shepilov's proposal as "worthy of consideration as a line of advance that might usefully be followed"; said that the terms of the committee proposed by Mr. Shepilov should also include a study of the ideas set forth by Dr. Fawzi, and suggested that the committee should be "so composed as to ensure the greatest possible measure of objectivity and efficacy."

In accordance with a suggestion by Mr. Selwyn Lloyd, and supported by M. Pineau, Mr. Dulles, and other members, the Council then went into secret session. These private meetings took the form of closed sessions of the Council and of meetings between Mr. Selwyn Lloyd, M. Pineau, and Dr. Fawzi, at which Dr. Hammarskjold (the U.N. Secretary-General) was also present. The first such meeting between the principal parties to the dispute took place on Oct. 9, further meetings being held on Oct. 10, 11, 12, and 13. On Oct. 10 there was also a special meeting between Mr. Lloyd and M. Pineau, followed by discussions between the British and French Foreign Secretaries and Mr. Dulles; between Mr. Selwyn Lloyd and Mr. Krishna Menon (India), who had arrived in New York on the previous day; and between Mr. Lloyd and M. Spaak, the Belgian Foreign Minister. A communiqué issued after the Lloyd-Pineau meeting said that they were "in complete agreement both in their analysis of the situation and on the need for further clarification of certain aspects of the Egyptian position," and would "continue to work together for a solution on the basis of the principles set out in the 18-Power proposals."

Anglo-French-Egyptian Agreement on "Six Principles." - Incorporation in Anglo-French Resolution.

As a result of these discussions, Britain, France, and Egypt agreed on six principles which were incorporated as the first part of a revised Anglo-French resolution, when the Security Council resumed its public session in the afternoon of Oct. 13. The second part of the Anglo-French resolution incorporated the original proposal by those two countries asking the Council to endorse the 18-Power proposals and to recommend that Egypt should co-operate in working out a system of operation for the Canal based on those proposals.

Mr. Dulles opened the meeting by suggesting that Israel and the Arab countries, which had asked to be allowed to present their views to the Council, should be invited to do so in writing. This was unanimously approved.

Mr. Selwyn Lloyd then presented the revised Anglo-French resolution. He pointed out, however, that the private discussions between the three Foreign Ministers had been "exploratory only," and that "it would be wrong to think of them as negotiations in the proper sense of the term." He believed, nevertheless, that "a beginning has been made in the process of finding a basis for negotiation." Although the exploratory conversations had not established such a basis, there was now agreement on the basic requirements which any settlement should meet, and there had "thus been established, so to speak, the framework within which such a basis for negotiation can perhaps be constructed."

Mr. Lloyd expressed satisfaction that Egypt had now accepted the six basic requirements, especially the principle of "insulating the operation of the Canal from the politics of any country," but stressed that it was no good having principles, however valid, unless means for implementing them were specified. The means of implementation suggested in the 18-Power proposals represented so far the only system which had been precisely formulated and laid before the Security Council. It was now for Egypt, if she still rejected these peoposals, to show more clearly how the basic requirements—which they all now recognized—could be met by means as effective as the 18-Power proposals.

In conclusion, Mr. Lloyd declared that another positive achievement of the private discussions had been a general acceptance of the principle that the Canal users were entitled to associate together to maintain and protect their rights under the 1888 Convention.

M. Pineau similarly emphasized that although they had agreed on principles, there was not yet agreement on the way to implement them. "The time for such agreement, apparently, is not yet at hand," he added, "and more exploratory talks are called for." Like Mr Lloyd, he emphasized that the revised resolution should not be considered as superseding the original Anglo-French resolution.

Dr. Fawzi supported the first part of the Anglo-French resolution outlining the "six principles." Referring to the provision to insulate the operation of the Canal from politics, he expressed the view that this could best be guaranteed by a solemn and international binding commitment in the form of a reaffirmation or renewal of the 1888 Convention. He added that on the previous day he had handed to Mr Selwyn Lloyd and M. Pineau proposals on two important matters (1) the questions of tolls and charges, and (2) the recourse to be taken in case of a violation of the convention on the code of navigation of the Canal. This proved the readiness of Egypt to negotiate a peaceful, satisfactory, and adequate settlement.

Dr. Abdoh (Persia) spoke in support of the Anglo-French resolution, but suggested an amendment—accepted by Mr Selwyn Lloyd and M. Pineau—saying that the Council, while considering that the 18-Power proposals were suitably designed to bring about a settlement, also recognized "that other proposals, corresponding to the same requirements, might be submitted by the Egyptian Government."

Mr. Shepilov said that the second part of the Anglo-French resolution had been a "complete surprise" to members of the Security Council. He contended that it "in no way stems from the conversations which have taken place, or from the work done by the Security Council in various ways," and asserted that its adoption would mean that the 18-Power proposals would "be imposed on Egypt in the name of the Security Council." These proposals, "based on the principle that Egypt should be deprived of her right to operate the Suez Canal," would "destroy the sovereignty of the Egyptian State," and their approval "would mean making future negotiations purposeless and determining their outcome in advance . . "

The Soviet Union did not reject the idea of an organized expression of the views of Canal users, and of certain forms of liaison between them and the Egyptian Authority However, the Association referred to in the resolution was far from being representative of all users of the Canal, and (Mr Shepilov asserted) represented only "a narrow group of States without grounds to express the views of all users."

Mr. Popovich also thought that the second part of the Anglo-French resolution contained "points which do not stem from what we thought had been accepted" He presented another resolution which, he said, was "limited to noting what has actually occurred." [This resolution, however, was not pressed to a vote.]

Mr. Dulles expressed gratification at the "large measure of progress" already made, welcomed Dr. Fawzi's statement, and in particular the fact that Egypt had made certain concrete proposals in the course of the confidential talks; and supported the Anglo-French resolution, which, he said, contained "nothing which should be in the slightest degree offensive to Egypt, or which is derogatory to Egypt or Egyptian sovereignty" "As we read it," he added, "it represents an honest attempt to advance our pursuit of peace and justice through the next stage." In particular, the statement that the 18-Power proposals were "suitably designed to bring about a settlement in conformity with justice" was "accurate and indeed conservative."

Unanimous Acceptance of "Six Principles." - Soviet Veto of Second Part of Anglo-French Resolution.

After the other Council members had expressed support of the Anglo-French resolution (incorporating the Persian amendment) it was put to the vote in two parts. The first part, incorporating the "six principles" agreed upon between Mr. Selwyn Lloyd, M. Pineau, and Dr. Fawzi, was approved unanimously. The second part of the resolution, though approved by nine votes to two (U.S.S.R. and Yugoslavia), was nullified by the Soviet veto—the 78th to that date.

The first part of the resolution, unanimously adopted, was worded as follows:

"The Security Council . . . agrees that any settlement of the Suez question should meet the following requirements:

(1) There should be free and open transit through the Canal without discrimination, overt or covert—this covers both political and technical aspects,

(2) The sovereignty of Egypt should be respected,

(3) The operation of the Canal should be insulated from the politics of any country,

(4) The manner of fixing tolls and charges should be decided by agreement between Egypt and the users;

(5) A fair proportion of the dues should be allotted to development,

(6) In case of dispute, unresolved affairs between the Suez Canal Company and the Egyptian Government should be settled by arbitration, with suitable terms of reference and suitable provisions for the payment of sums found to be due"

The second part of the resolution, vetoed by the Soviet Union, read as follows:

"The Security Council considers that the proposals of the 18-Powers correspond to the requirements set out above and are suitably designed to bring about a settlement of the Suez Canal question by peaceful means in conformity with justice;

"Recognizes that other proposals, corresponding to the same requirements, might be submitted by the Egyptian Government,

"Notes that the Egyptian Government, while declaring its readiness in the exploratory conversations to accept the principle of organized collaboration between an Egyptian Authority and the users, has not yet formulated sufficiently precise proposals to meet the requirements set out above,

"Invites the Governments of Egypt, France, and the United Kingdom to continue their interchanges and, in this connexion, invites the Egyptian Government to make known promptly its proposals for a system meeting the requirements set out above and providing guarantees to the users not less effective than those sought by the proposals of the 18 Powers,

"Considers that, pending the conclusion of an agreement for the definite settlement of the regime of the Suez Canal on the basis of the requirements set out above, the Suez Canal Users' Association, which has been qualified to receive the dues payable by ships belonging to its members, and the competent Egyptian authorities, should co-operate to ensure the satisfactory operation of the Canal and free and open transit through the Canal in accordance with the 1888 Convention"

After the vote was taken Mr. Dulles pointed out that it was "understood" that the Council "remained seized of the Suez problem" and that Dr. Hammarskjold might "continue to encourage" direct interchanges between Egypt, France, and the United Kingdom.

Indian Proposals for Revision of 1888 Convention.

On Oct. 24 the Government of India released the text of proposals which had been circulated to the Governments principally concerned by Mr. Krishna Menon after his arrival in New York during the discussions in the Security Council (see above). It was suggested in these proposals that the day-to-day running of the Canal should be vested in the Egyptian Suez Canal Authority, but that there should be joint meetings of the Authority with representatives of the Users' Association to discuss tolls, the condition of the Canal, and other matters, and recourse to the International Court or to arbitration in the event of disagreement.

The Indian draft envisaged the following five principles as a basis for discussion:

"(1) Recognition of the Suez Canal as an integral part of Egypt and as a waterway of international importance. (2) Free and uninterrupted navigation for all nations in accordance with the 1888 Convention (3) Just tolls and charges, and equitable facilities on the Canal to all nations without discrimination. (4) Maintenance of the Canal at all times in proper condition, and in accordance with modern navigational requirements. (5) Co-operation between the Egyptian Authority and the Canal users"

It was also recalled that the Convention of 1888 had defined its purpose as the establishment of "a definite regime with a view to guaranteeing for all time and for all Powers free use of the Suez Canal."

On this basis the Indian Government had put forward the following proposals for a peaceful settlement:

Revision of 1888 Convention.

(1) The 1888 Convention should be reaffirmed, and also reviewed and revised to bring it up-to-date.

(2) Review and revision of the Convention should provide for (*a*) the maximum of tolls leviable by Egypt as under the former agreement between the Egyptian Government and the Suez Canal Company, (*b*) Egyptian responsibility for maintaining and developing the Canal in accordance with modern requirements—more particularly in carrying out as a minimum the eighth and ninth programmes [of the Suez Canal Company] for Canal improvements during the period set out in those programmes, (*c*) Egypt should transmit to the U.N., for information, the annual report of the Suez Canal Authority (*a*) and (*b*) above should be incorporated in schedules or annexes to the Convention.

(3) The signatories to the Convention should affirm their respect for the purposes and principles of the U.N Charter "in the observance and execution of the Convention by each and all of them."

(4) (*a*) Disputes or disagreements arising between parties to the Convention should be settled in accordance with the U N. Charter; (*b*) differences arising in respect of interpretation of the Convention should, if not otherwise resolved, be referred to the International Court of Justice or, by agreement, to the appropriate organ of the United Nations.

(5) The Convention as thus reviewed and revised should be registered with the United Nations.

Payment of Compensation.

The question of compensation to be paid by Egypt, and claims by Egypt against parties arising out of nationalization, would be referred to and settled by arbitration, unless otherwise agreed between the parties concerned.

Co-operation between Canal Users and Egyptian Authority.

(1) The administration, operation, and management of the Canal would be vested by the Egyptian Government in the Egyptian Suez Canal Authority

(2) (*a*) The Canal Authority, with the approval of the Egyptian Government, should recognize the Users' Association for the purpose of promoting co-operation between the Canal Authority and Users; (*b*) the functions of the Association would be consultation and liaison.

(3) (*a*) Joint sittings would be held between representatives of the Canal Authority and the Users' Association, either periodically or at the request of either side.

(*b*) Representatives of the Users' Association would include all principal users, and provide also for geographical representation, on the following basis: the United Kingdom, France, the U S.A., the U S.S R, Egypt, India, Japan, one representative from Australia, one from South-East Asia, one from the Middle East, one from Africa, one from Eastern Europe, one from Southern Europe, one from Northern Europe, one from Western Europe, and one from Latin America

(*c*) The purpose of holding joint sittings would be to promote co-operation between the Canal Authority and the users.

(*d*) Users' representatives at joint sittings could discuss and make recommendations on all matters affecting user interests, more particularly (i) tolls, (ii) the condition of the Canal, (iii) observance of the Canal Code and breaches thereof by either side.

(*e*) The Canal Authority could refer to Users' representatives, at joint sittings, any matter for discussion or advice.

(*f*) The Users' Association, or its representatives at joint sittings, would not interfere in any way with the administration of the Canal.

(*g*) The constitution of the Canal Authority, to be regulated under Egyptian law, would not be within the competence of the Users' Association or its representatives.

Canal Tolls.

The Canal Authority, in effecting any increase in tolls beyond the agreed limit (e g within any 12 months), would do so only by agreement at joint sittings. In the event of disagreement, the matter would be referred to arbitration.

Prevention of Discrimination.

Allegations or complaints of discrimination would be referred to the Canal Authority by the aggrieved party; if not resolved, the aggrieved party might take such allegations or complaints either (*a*) to the appropriate court in Egypt, or (*b*) to the Users' representatives at joint sittings. If the matter was not resolved at joint sittings, either side (the Egyptian Canal Authority or representatives of the users) might refer it to arbitration.

Canal Code.

Regulations governing the Canal, including details of its operation and obligations of the Authority and Users, as well as penalties for breaches thereof by either side, would be contained in a Canal Code which would be "the law of the Canal"

U.N. Participation.

The Egyptian Government in the exercise of its authority would appoint high-level experts through the United Nations to three main departments of the Canal Authority, for three years in the first instance.

Following his informal discussions in New York, Mr. Menon visited London from Oct. 16-18 for talks with Sir Anthony Eden, Mr. Selwyn Lloyd, and Sir Walter Monckton, Minister of Defence. He flew to Cairo on Oct. 19 for further discussions with President Nasser, returning to Delhi on Oct. 22.

Mr. Nehru told a press conference on Oct. 25 that the Suez Canal dispute was now "definitely in the negotiation stage," and that the Indian plan represented "an earnest effort on our part, after prolonged talks with the people most concerned and taking into consideration the realities of the situation, to meet the various demands made" He added that it was "now up to the countries directly concerned to deal with each other."

When a press correspondent suggested that the Indian plan lacked the guarantees desired by the Western Powers, Mr. Nehru replied. "In the ultimate analysis there can be no guarantee except the normal kind of international guarantees when two nations agree to come to terms; when the U N. also comes into the picture the guarantee is a very powerful one"

Israeli Memorandum to Security Council.

On Oct. 13 the Israeli Government submitted to the Security Council a memorandum on the Suez Canal question in which it demanded equal rights with all other countries in any plan for revising or reinforcing the 1888 Convention.

The memorandum reviewed events since May 1948, when Egypt established a general blockade of Israel and began to obstruct the passage of vessels of other countries in transit to or from Israel. It quoted the relevant passages of the Egyptian decree of Feb. 6, 1950, and its subsequent amendments, under which ships of various countries had been subjected to search, seizure, and even confiscation, mentioning in this connexion that confiscations from ships exercising lawful passage through the Canal had amounted to $5,600,000.

After accusing Egypt of having "consistently violated the 1888 Convention and the Security Council's resolution of 1951" by her blockade of Israeli shipping, the statement continued. "Egypt's reliance on Articles IX and X [of the 1888 Convention] to justify her blockade restrictions is decisively closed by Article XI, which reads: 'The measures which shall be taken in the cases provided for in Articles IX and X of the treaty shall not interfere with the free use of the Canal. .

"In observations outside this Council, Egyptian representatives have fallen back on a new argument. They admit that the 1888 Convention provides for free passage through the Suez Canal even in time of war, and even to 'belligerents.' They assert, however, that this freedom applies only to 'belligerents' who are at war with countries other than Egypt. There is no foundation for this theory. It is specifically ruled out by Article IV of the 1888 Convention, which reads: 'The Maritime Canal remaining open in time of war as a free passage, even to ships of war of belligerents . . the High Contracting Parties agree that no right of war, no act of hostility, nor any act having for its object to obstruct the free navigation of the Canal, shall be committed in the Canal and its ports of access . . . even though the Ottoman Empire should be one of the belligerent powers' It is, of course, a truism that in terms of the 1888 Convention, Egypt is the equivalent of the Ottoman Empire.

"The conclusion is clear: even if Egypt possessed rights of 'belligerency,' she would not be legally permitted to perform 'any act having for its object to obstruct the free navigation of the Canal.'

"If Egypt is entitled to interfere with ships, cargoes, or crews bound for Israel, she is equally entitled to interfere with the ships, cargoes, or crews of every other State This is clear from the fact that any distinction between Israel's rights and those of other States has been specifically repudiated by the Security Council itself.

"The Egyptian violations inflict a great injury on Israel, which she is not bound passively to endure. Since the Security Council's resolution of 1951 it is estimated that Israel has paid $44,000,000 more for her fuel supplies than she would have paid if a situation of law had prevailed in the Suez Canal.

"In any new projects designed to ensure and guarantee respect for the 1888 Convention, the Government of Israel claims specific guarantees for its own rights. It has been gratifying in recent weeks to observe a strong surge of world opinion in favour of guaranteeing freedom of navigation in the Suez Canal for the ships of all nations without distinction of flag. But in view of the special experience of the past eight years, the general statement of this doctrine is not adequate unless it is specified that the principle applies to Israel as to every other State."

In an earlier statement on Oct. 8 Israel had published a "black list" of 103 ships from at least 14 countries which had been prevented by Egypt from using the Suez Canal because they had carried immigrants or cargoes for Israel; they included 45 British, eight U.S., and eight Panamanian vessels. This statement was published in reply to Dr. Fawzi's contention in the Security Council that Egypt had always kept the Canal open to all international shipping.

In a letter to the Security Council on Sept. 19 Israel had also drawn attention to the fact that the Israeli vessel *Bat Galim* [see page 14159], which had been seized by the Egyptian authorities at the southern entrance to the Suez Canal on Sept. 28, 1954, had since been confiscated by the Egyptian Government. The letter described the Egyptian action as "piracy," "arbitrary and illegal," and "a flagrant violation" of the Security Council's resolution of 1951.

Decisions of Canal Users' Association. - Hr. Bartels appointed Administrator of S.C.U.A.

The Council of the Suez Canal Users' Association held its first meeting in London on Oct. 18-19 under the chairmanship of Mr. Selwyn Lloyd. It elected Dr. Stikker (Netherlands Ambassador in London) as its vice-chairman, and decided to appoint Hr. Eyvind Bartels, the Danish Consul-General in New York, as Administrator of the Canal Users' Association.

Hr Bartels, an economist, had been Danish permanent delegate to the O.E.E.C., a member of the O.E.E.C.'s Steering Board for Trade, and Danish representative at the European Coal and Steel Community before becoming Consul-General in New York in 1954.

At its second meeting on Oct. 25-26 the Council agreed, subject in certain cases to parliamentary approval, (*a*) to the creation of an initial fund of £50,000 for the administrative expenses of the Association, to be shared equally among its members; (*b*) to the opening of two banking accounts in the name of the Association, the first to cover administrative expenses and the second to receive, hold, and disburse the dues and other sums paid to the Association; (*c*) to a formula for sharing future expenses under which the U.K. and the U.S.A. would each pay 20 per cent and France 15 per cent, the other 12 members dividing the remaining 45 per cent between them in a manner to be worked out later.

No agreement was reached between Britain and France on the one hand, and the U.S.A. on the other, about the amount which the Association should pay over to Egypt from the dues received, nor was any decision taken as to when members should start to pay Canal dues to the Association.

Differences in the approach to the Suez problem (especially the U.S. attitude on the question of payment of Canal dues), as well as certain statements by Mr. Dulles on "colonialism," caused increasing resentment both in Britain and France during October, although President Eisenhower officially denied that he had received any complaints from either Government.

Mr Dulles, in a press statement on Oct 2, had admitted that there were differences of a fundamental nature between the U.S.A. and her European allies over the Suez Canal question, and had indicated that these differences stemmed from the "independent" position of the United States on the "colonial" issue.

In his original remarks (which were widely distributed by the news agencies) Mr. Dulles had said that a difference of approach towards Suez existed, that it was connected with fundamental matters, and that "in questions of colonialism" the U.S.A. must "play an independent role." Subsequently, the official transcript of his remarks was amended to read that there had been "some difference in our approach to this problem of the Suez Canal" and that there were "also other problems where our approach is not identical." As an example Mr. Dulles was said to have quoted the "so-called problem" of colonialism in Africa and Asia, where "the United States plays a somewhat independent role"

On the question of the Canal Users' Association, Mr. Dulles denied that there was any split with Britain and France, and stressed that the final version of the scheme was the same as had been planned originally. In the original version of his statement he had denied that he had "pulled the teeth" from the plan at the second London Conference, but the amended version issued subsequently quoted him as saying that "there were never 'teeth' in it, if that means the use of force."

In a further press statement on Oct. 16 Mr. Dulles said that the U.S.A. was "awaiting moves by Britain and France to make the Suez Canal Users' Association a going concern" He also emphasized that the U.S position on the Canal Users' Association had always been clear—viz, that it should be the agents for the ships, collect dues, and pay "an appropriate share" to Egypt. These views, he observed, were also those of Sir Anthony Eden. He (Mr. Dulles) had pledged that when the Association was a "going concern" the U.S.A. would bar the payment of dues to Egypt for ships sailing under the U.S. flag, and would assume that shipowners would pay the Association instead.

The general tolls question, however, presented "very considerable complications" [Mr. Dulles continued], as the status of the Suez Canal Company and its right to collect Canal dues was not entirely clear, which might create a problem of "double liability" There were also problems in the different policies on Canal dues of the Association's member-countries, and, moreover, the question of what would be "an appropriate share" for Egypt. In connexion with the American practice, he explained that U.S. ships had always paid "on the barrel-head" as they went through the Canal, and were continuing this method of payment—the effect being that about one-half of all the Canal dues were going to the Egyptian authorities directly, and the other half were being collected elsewhere under the practice of paying dues into the account of the Suez Canal Company, as Britain and France were doing

As regards the general prospects of a settlement with Egypt, Mr Dulles expressed satisfaction with the progress made, and his hope that exchanges of views between Britain, France, and Egypt would continue and that relations with Egypt would develop along the lines outlined in the second part of the Anglo-French resolution—which, having obtained the votes of nine of the 11 members of the Security Council, had received "substantial moral support"

It had been reported from Washington on Oct. 7 that Mr. Selwyn Lloyd, at a meeting with Mr. Dulles, had urged the U.S. Government to take immediate action to stop American ships from paying Canal dues to the Egyptian Canal Authority, even if the Canal Users' Association was not yet functioning. On Oct. 19, however, it was reported that Mr. Dulles had told the British Government that the U.S. Administration would not order American ships to pay the dues to the Users' Association until, firstly, the Association was complete and had made arrangements with the Egyptian Canal Authority on payments, and, secondly, a common procedure for payment of tolls had been agreed upon by the users themselves.

In the face of increasing bitterness in Britain and France about what was regarded as a vacillating policy on the part of Mr. Dulles, President Eisenhower said at a press conference on Oct. 11 that it was an "error" to contend that U.S. policy in the Suez crisis "has not been clear and firm." American policy, he stressed, had been based throughout on the principles outlined in the 18-Power agreement at the first London Conference, especially the principle that any final solution must guarantee that "the Canal could not be operated for the political purposes of any one single country." The President denied that either he or Mr. Dulles had ever heard "any intimation from anyone in British officialdom" that Britain was "dissatisfied with our stand in this thing," and if there was criticism of the U.S. position he thought it must have arisen out of "misunderstanding." He added that American friendship with Britain was "very, very important," not only for sentimental reasons but also for diplomatic and economic reasons. The same was true of France.

Attitude of Suez Canal Company.

A general meeting of shareholders of the Suez Canal Company, held in Paris on Oct. 15, approved by 520 votes to 27 the action taken by the Company's board since the Egyptian nationalization decree. It also expressed confidence in the steps which the board proposed to take.

The board's report, which was read at the meeting, recalled that only two months before President Nasser's nationalization decree the Egyptian Government had signed a new financial agreement with the Company covering the next 12 years The report described the seizure of the Canal as "arbitrary and unjustified," and said that it had been effected by "a brutal police operation." It outlined the various steps taken by the Company to obtain reinstatement of its rights for the remainder of the concession period, and declared that in default of such reinstatement the Company must obtain adequate compensation French holdings of the Company's shares, it was stated, amounted to 100,000,000,000 francs (£100,000,000), even if calculated on the unjustly low prices of today. These holdings, some 350,000 shares in all, were very widely spread among different categories of the French people, and one-half of the more than 100,000 holders did not possess more than two shares each.

The report rejected the Egyptian offer of paying compensation based on the Stock Exchange value of the shares on the eve of the nationalization decree, saying that this was totally unequitable. The basic indemnity, it said, must include (*a*) a special compensation to make up for the losses incurred by the termination of the concession, which should have run until 1968; and (*b*) payments for the Company's stocks, buildings, and other items which Egypt would have had to buy had the concession expired normally. In addition, the Company's cash holdings, which were seized or frozen following the nationalization, should be handed back to it.

M. Georges-Picot, the Company's director-general, stated that the Company's assets outside Egypt amounted to between 60,000,000,000 and 65,000,000,000 French francs (£60,000,000 to £65,000,000), comprising 25,000,000,000 to 30,000,000,000 French francs, £20,000,000 in sterling, 1,000,000 Belgian francs, and $30,000,000 Liabilities outside Egypt were estimated at about 27,000,000,000 French francs During the past quarter the Company's receipts had been between £3,500,000 and £4,000,000, while its expenditure had been £2,000,000

Replying to shareholders, M. Georges-Picot said that press reports that the Company had paid its pilots £10,000 each to induce them to leave the Canal were completely untrue. The pilots had been given temporary leave with pay while looking for other work, but what the Company had done for their employees had been much less, for example, than what the British Government had done for members of the Indian Civil Service after 1947.

M Charles-Roux (president of the Company), stressed that the Company would continue to maintain its rights and would refuse to regard its concession as having been terminated by the Egyptian act of nationalization.

The Company had announced on Sept. 5 that it was unable to pay interest on some of its bonds or to redeem others because its funds had been blocked in Egypt.

Mr. Mikoyan upholds Israeli Transit Rights on Canal.

Mr. Mikoyan, Soviet First Deputy Prime Minister, said in Moscow on Oct. 15 that all States, including Israel, should have equal freedom to send their ships through the Suez Canal. He conceded that Israeli ships had been barred by Egypt for "a long time," but was optimistic that these obstacles would now be removed following the nationalization of the Suez Canal Company.

Anglo-French Ministerial Discussions.

Mr. Selwyn Lloyd returned from New York to London in the morning of Oct. 16, and the same evening he and Sir Anthony Eden flew to Paris for consultations with M. Mollet and M. Pineau; they returned to London early on Oct. 17.

A joint communiqué issued on Oct 17 said that the British and French Ministers had examined the situation resulting from the recent votes in the Security Council on the Anglo-French resolution, and continued: "They resolved to adhere to the requirements set out in the first part of the resolution and unanimously approved, and noted with regret that these were already being questioned in certain Egyptian quarters As regards the implementation of these requirements, they also resolved to stand by the second part of the resolution, which received nine votes but was vetoed by the Soviet Union.

"According to the resolution, the 18-Power proposals, including the international operation of the Canal, should constitute the basis for settlement unless the Egyptian Government produce other proposals for a system meeting the requirements of and affording equivalent guarantees to the users The two Governments are ready to consider together any proposals of this nature.

"They also had a general exchange of views on the other problems of the Middle East and decided to maintain constant contact on these questions in the spirit of the closest Anglo-French friendship."

M. Pineau flew to London on Oct. 23 for further urgent talks. On the same date Mr. Selwyn Lloyd stated in the House of Commons that although the Egyptian Government had been called upon to put forward their proposals promptly after the Security Council's meeting, they had not done so.

He said that there seemed to be "a gap between Egypt's acceptance of the six principles and the definition on her part of the means to apply them," and added: "What has to be done is to construct a system to provide the users of the Canal with adequate guarantees of efficiency and non-discrimination to replace the system which has been destroyed by the Egyptian Government. For this we need proposals, not the mere acceptance of principles We still await these proposals." Replying to a question by Mr. Gaitskell, Mr Lloyd said that he had received a copy of the Indian proposals, but there were "certain matters" on which they needed "clarification and precision," and "the first question to consider about them is whether they constitute the proposals of the Egyptian Government."

No further progress had been made by the time of the launching of Israeli military operations against Egypt and the Anglo-French intervention in the Israeli-Egyptian conflict. (United Nations Information Centre, London - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times - New York Herald Tribune) **(Prev. rep. 15125 A.)**

A. CANADA. — Bank Rate to be fixed Weekly.

The Bank of Canada announced on Nov. 2 that as from that date the Bank rate would be fixed on a weekly basis, at a margin of ¼ per cent above the latest weekly average tender rate for 91-day Treasury bills—a step which would make the Bank rate more flexible and responsive to changing conditions in the short-term money market, and help to control inflationary tendencies. The Bank rate for the week Nov. 2-8 was 3.59 per cent, a fraction higher than the record rate of 3½ per cent announced on October 18.—(Financial Times)

B. HONG KONG. — The Kowloon Riots. - Protests by Chinese Communist Government.

Serious rioting broke out in Kowloon (the mainland area of Hong Kong) on Oct. 10, the anniversary of the foundation of the Chinese Republic, which is celebrated as the Chinese National Day. The disturbances began when an official removed Nationalist flags which, contrary to regulations, had been pasted on the walls of Government buildings, whereupon mobs carrying Nationalist flags attacked Europeans, looted shops, and set fire to cars, schools and other buildings. Looting, arson, and attacks on individuals continued on the following day, and fighting between Nationalist and Communist supporters broke out when the mob raided the offices of Communist-led trade unions and burned documents and furniture. The police, who had hitherto used only batons and tear-gas to disperse the rioters, were compelled to open fire on several occasions, while troops equipped with tanks and armoured cars were sent to Kowloon, which was placed under a curfew. Only minor incidents occurred on Oct. 12, the curfew being lifted three days later.

The number of casualties was officially given as 51 killed and 358 injured, including 21 soldiers and police. Among those killed was Mrs. Ernst, wife of a Swiss consular official, who received fatal burns when rioters set fire to the taxi in which she and her husband were travelling. About 4,500 people were arrested, many for breaches of the curfew regulations. An official statement, issued on Oct. 12, attributed the riots to the Triads (criminal secret societies which extort money by means of "protection rackets"), and said that there was no evidence that they had been planned by any political organization.

At an interview on Oct. 13 with Mr. O'Neill, the British Chargé d'Affaires in Peking, the Chinese Premier (Mr. Chou En-lai) expressed indignation and concern at the riots—which he attributed to "Kuomintang agents"—and demanded that the British authorities should take immediate steps to punish those responsible and to protect the Chinese population.

At a press conference on the following day Mr. Chou En-lai said that his Government could "not permit such disorders on the doorstep of China," and rejected the British explanation that gangsters were responsible He alleged that the Hong Kong authorities had intended to use the Nationalist agents responsible for the disorders to weaken the influence of the Chinese People's Republic in Hong Kong and Kowloon.

In his reply, delivered to Mr. Chou En-lai on Oct. 16, Mr. O'Neill stated that the Hong Kong authorities had done their utmost to protect both domestic and foreign interests in very difficult circumstances, and that severe action would be taken against those found responsible when investigations into the causes of the riots were completed.—(Times - Daily Telegraph)

C. UNITED STATES. — President Eisenhower's Assurance of U.S. Friendship for Britain and France. - Reaffirmation of Atlantic Alliance.

The following statement was issued from the White House on Nov. 27 with the authority of President Eisenhower, then on holiday in Georgia:

"The President considers that the North Atlantic Treaty Organization, as always, is a basic and indispensable element of America's defence alliances against the continuing Soviet Communist threat to the peace and security of the world. As the President has previously pointed out, differences that have arisen between the United States and her traditional friends and allies are those arising from a particular international incident. These differences should in no way be construed as a weakening or disruption of the great bonds that have so long joined our nation with the United Kingdom and the Republic of France and our other allies in assuring that peace, justice, and freedom shall prevail."

The President's statement was warmly welcomed in the British and French press, and also in the United States itself. (New York Times - New York Herald Tribune)

(Prev. rep. 15201 A, page 15210.)

D. FINE ARTS. — First International Prize for Painting. - Award to Mr. Ben Nicholson.

The first international prize for the best painting selected by an international jury was announced in Paris by the Guggenheim Foundation on Nov. 28, the recipient being a British painter, Ben Nicholson, who was one of 99 candidates from 17 countries. The prize of $10,000 (£3,750) was awarded to Mr. Nicholson for his painting *August 1956—Val d'Orcia*, chosen by an international jury of museum curators and authorities on modern art. The national prizes established by the Guggenheim Foundation were awarded at the same time. (New York Times - Le Monde, Paris) **(Prev. rep. 14792 B.)**

A. YUGOSLAVIA. — President Tito's Pula Speech. - Statement on Hungarian Crisis. - Criticisms of Soviet Policy. - References to "Stalinist" and "Anti-Stalinist" Elements in Soviet Leadership. - Controversy between Soviet and Yugoslav Press. - Arrest of M. Djilas.

President Tito defined the Yugoslav Government's attitude towards the Hungarian crisis in a speech to a Communist party meeting at Pula on Nov. 11, in which he suggested that a division of opinion existed within the Soviet leadership between "Stalinists" and advocates of democratization. He went on to condemn the first Soviet intervention in Hungary (that of Oct. 24), but justified the second intervention of Nov. 4 as a "lesser evil" on the ground that it had averted counter-revolution and a third world war. The speech nevertheless revealed important differences in outlook between the Yugoslav and Soviet Communist parties.

When the leaders of the Soviet Communist party condemned Stalin's policy, President Tito said, they had laid the blame on the "cult of the individual" The Yugoslav party, however, had maintained from the beginning that "it was not merely a question of the cult of the individual but of a system which made the cult of the individual possible"—a system which had its roots in "the bureaucratic apparatus, the method of leadership and so-called 'uniformity,' and in ignoring the role and aspirations of the working masses"

The Belgrade and Moscow declarations on Soviet-Yugoslav relations [see 14265 A, 14937 A], he continued, "should have had a significance not only for our mutual relations but for the relations between all Socialist countries" The Soviet leaders, however, had not appreciated this and had tended to treat Yugoslavia as a "special case." During the recent discussions in the Crimea [see 15188 A] it had become clear that certain Soviet leaders had a "mistaken outlook" on relations with Poland, Hungary, and other Eastern European countries "We saw that this attitude had been imposed by those men who had generally stood, and still stand, on Stalinist positions," President Tito declared, "but that nevertheless there were possibilities of the victory of those elements in the Soviet leadership who favoured a more forceful and rapid development in the direction of democratization, the abandonment of Stalinist methods, and the creation of new relations between Socialist States." This development however, was being hindered by Western propaganda in favour of the "liberation" of Eastern European countries, which had aroused fears in the U S S.R lest "reactionary forces" should triumph if those countries were granted a status similar to that of Yugoslavia. "This means," he added, "that they [the Soviet leaders] have not enough confidence in the internal revolutionary forces of those countries. In my opinion this is wrong, and the root of all later mistakes lies in their lack of confidence in the Socialist forces of those peoples."

Speaking of the situation in Poland, President Tito said · "Thanks to the fact that there still remained in Poland, despite all persecutions and Stalinist methods, a nucleus of leaders headed by Gomulka who managed to take things into their own hands, to strike out boldly on a new course toward democratization, full independence, and good relations with the Soviet Union, and to offer resolute resistance to interference in their internal affairs—thanks to all this, the reactionary forces in Poland which certainly exist, and which had hoped to come to the surface in the event of a conflict among Communists, were unable to do so. Thanks to the mature reasoning and attitude of the Soviet leaders, who ceased to interfere at the right moment, Polish affairs have stabilized themselves and are developing fairly well"

"I cannot say that this positive development in Poland, which is very similar to ours, has met with a warm reception in the other countries of the Socialist camp," President Tito continued. "No—it is being criticized, stealthily and in private, but to some extent openly as well. Among these countries Poland did not meet even with as much support as she found among the Soviet leaders. Among various leading personalities in some countries of the Socialist camp, and even among some Communist parties in the West, Poland did not meet with understanding because Stalinist elements are still sitting there" In this connexion President Tito particularly criticized the French Communist leadership, and also referred contemptuously to Enver Hoxha, the Albanian Communist leader, as "a would-be Marxist who only knows the word 'Marxism-Leninism' and nothing else."

During his visit to Moscow in June, President Tito said, he had warned the Soviet leaders that M. Rakosi [then First Secretary of the Hungarian Workers' party] "had no qualifications whatever to lead the Hungarian State . . . Unfortunately the Soviet comrades did not believe us. They said that Rakosi was an old revolutionary, and honest. I grant he is old, but from my knowledge of him I could not admit that he is honest, especially after the Rajk trial . . Because we are opposed to interference in other people's internal affairs, and because we did not want to come again into conflict with the Soviet comrades, we did not press the point sufficiently with the Soviet leaders to have the Rakosi-Gero team removed . . . When there appeared increasing discontent in Hungary, even among the ranks of the Communists, and demands that Rakosi should go, the Soviet comrades realized that things could not go on like that and agreed to his removal. However, they made the mistake of not permitting the removal of Gero and other followers of Rakosi who had compromised themselves in the eyes of the people. They made it a condition that Rakosi should go only if Gerő remained. This was a mistake, because Gerő differed in no way from Rakosi."

President Tito recalled that he had met M. Gero during the Crimean talks, where Gero had "heaped ashes on his head" and had promised to correct his previous mistakes After saying that he [President Tito] had agreed at the time to hold talks between the Yugoslav and Hungarian Communist parties in the hope of influencing the developments in Hungary, Marshal Tito continued :

"Immediately after my return to Yugoslavia, however, Gero, finding himself in a difficult situation, again showed his old face. He called hundreds of thousands of demonstrators—who at that stage were still only demonstrators—a 'mob', and insulted almost the entire nation . . . When all was in turmoil and when the whole nation was dissatisfied, he dared to fling the word 'mob' at a vast number of people, many of whom—perhaps even the majority—were Communists. This was enough to set fire to the powder and cause the explosion. Thus the conflict ensued.

"There is no point now in investigating who fired the first shot. The Soviet Army was called in by Gero—a fatal mistake at a time when the demonstrations were still in progress . . The result was still further to enrage the people, and a spontaneous uprising followed in which Communists found themselves, even against their will, alongside various reactionary elements. . . These reactionary forces very quickly revealed their true face . . The justified revolt and uprising against a clique turned into an uprising of the entire nation against Socialism and against the Soviet Union, and the Communists who were in the ranks of the rebels finally found themselves in a struggle, not for Socialism, but for a return to the past . . .

"Had Nagy's Government been more energetic, had it not wavered this way and that, had it stood firmly against anarchy and the murder of Communists by reactionary elements, had it offered decisive resistance to the reactionaries, perhaps matters would have taken the right turn, and perhaps there would not have been any intervention by the Soviet Army But what did Nagy do? He called the people to arms against the Soviet Army and appealed to the Western countries to intervene . . Thus renewed fighting took place. Soviet troops were reinforced. Nagy fled and a new Government was set up. I know these people in the new Government, and in my opinion they represent all that is most honest in Hungary They were persecuted under Rakosi, they were in prison, and they stand sincerely for a new development .

"The question may be asked—was the Soviet intervention necessary? The first intervention was not necessary; coming at Gero's invitation, it was absolutely wrong The mistake [of the Hungarian leaders] consisted in the fact that men in responsible positions, instead of waiting for the second intervention, did not do at once what they did later on, when the second Soviet intervention took place—that is, set up a new Government and issue a declaration. Had they set up a new Government and issued such a declaration, the working-class and Communist elements would probably have separated from the reactionary elements, and it would have been easier to find a way out of the critical situation . . .

"Many people are asking why the second Soviet intervention occurred We have said, and will continue to say, that we are opposed to interference and the use of foreign armed forces. What was the lesser evil—chaos, civil war, counter-revolution, and a new world war, or the intervention of Soviet troops which were on the spot? The former would be a catastrophe, the latter was a mistake. But if it saves Socialism in Hungary, then, although we are against interference, we can say that the Soviet intervention was necessary. But had they [the Soviet leaders] done everything they should have done earlier, there would have been no need for military intervention. This error arose, unfortunately, as a result of their idea that military force settles everything. But it does not Look how a bare-handed and poorly-armed people offers fierce resistance when it has one goal—to free itself and to be independent It is no longer interested in what kind of independence it will gain, in whether a reactionary bourgeois system will be restored, but only in its national independence.

"I can only say now that the first thing was the worst that could have happened The second, the intervention of Soviet troops, was also bad, but if it leads to the preservation of Socialism in Hungary, to the further building-up of Socialism in that country, and to peace in the world, then one day this will become a positive thing, on condition that the Soviet troops withdraw the moment the situation in Hungary is settled and quiet . .

"It should be borne in mind that the Soviet Union is now in a difficult situation. Their eyes have been opened, and they realize that not only Horthyites are fighting, but also workers from the factories and the mines—that the whole nation is fighting . . . I am deeply convinced that the blood which has flowed in Hungary and the terrible sacrifices made by the Hungarian people will have a positive effect, and that the Soviet Union, even the Stalinist elements, will realize that it is no longer possible to act in this way The tragedy is that Socialism has received a terrible blow and has become compromised . . ."

Reverting to the general situation in Eastern Europe, President Tito said that it was necessary to help the Kadar Government in Hungary and also to co-operate closely with the Polish Government. "Together with the Polish comrades," he went on, "we shall have to fight such [Stalinist] tendencies which crop up in various other parties, whether in the Eastern countries or in the West This struggle will be difficult and long, for what is actually involved is whether the new trend will triumph in the Communist parties, the trend which really began in Yugoslavia . . . or whether the Stalinist course will prevail again . . ."

The Pravda-Borba Controversy.

The publication of President Tito's speech on Nov. 15 gave rise to a sharp controversy between *Pravda* and *Borba*, the official organs of the Soviet and Yugoslav Communist parties.

A *Pravda* article of Nov. 19 rebuked President Tito for suggesting that the Yugoslav road to Socialism was the only possible one, described his Pula speech as exhibiting "tendencies to interfere in the affairs of other Communist parties," and compared his "attempt to divide Communist parties into Stalinists and non-Stalinists" with the "fabrications of reactionary propaganda." President Tito was also accused of trying to extend his influence beyond Yugoslavia and of adopting a position "which radically contradicts the Marxist-Leninist tenet that each country can have its own methods, forms, and tempo of transition to Socialism." An attack in similar terms appeared on the same day in *Rude Pravo*, the Czechoslovak Communist organ *Borba* repudiated these allegations on Nov 21, accusing *Pravda* of taking phrases from President Tito's speech out of their contexts.

In a 5,000-word *Pravda* editorial on Nov. 23, President Tito was again attacked for "obvious interference" in the internal affairs of other countries, for his remarks on the "cult of personality," and for his references to differences between Stalinist and anti-Stalinist elements in the Soviet leadership. With regard to the Hungarian situation, *Pravda* said that the former Hungarian leaders had mechanically copied the Soviet industrialization policy, despite Soviet advice to the contrary, admitted "petty-bourgeois nationalist elements and careerists" to the Communist party, ignored the national traditions of the Hungarian people; and failed to recognize the people's justified dissatisfaction. It went on to accuse M. Nagy of pursuing a "double-faced policy," alleging that "on the one hand he announced that the entry of Soviet troops into Budapest was necessary in order to suppress the counter-revolutionary forces, and on the other he encouraged the active resistance of the counter-revolutionaries and remained in touch with them." In conclusion, it appealed for unity and collaboration between Socialist countries, and said that "questions in dispute must be discussed and cleared up in a calm and friendly atmosphere."

Borba's reply, published on Nov. 27, accused *Pravda* of inconsistency in calling for free discussion while criticizing President Tito's speech on the ground that it could be exploited by "international reaction" There were only two courses open to the Soviet Union in her relations with the Eastern European countries: either a reversion to Stalinism, or democratic relations of full equality between Socialist countries.

Arrest of M. Djilas.

M. Djilas, the former Vice-President of Yugoslavia, who had been living in retirement since his dismissal because of his "pro-Western bourgeois liberalism," and in recent months had written several articles on international affairs published in the foreign press, was arrested in Belgrade on Nov. 19 on a charge of spreading hostile propaganda against the State. M. Dedijer, who had been tried with M. Djilas on a similar charge in 1955, protested against the latter's arrest on Nov. 22 in an open letter to President Tito sent to the Yugoslav and foreign press.

The basic principles of Yugoslavia's struggle for independence M. Dedijer suggested, had been a belief in justice and law against brute force, and in the free exchange of opinion and mutual persuasion between States, movements, and individuals These principles had inspired both "the defenders of Port Said" and "the Hungarian working class and the entire Hungarian nation in its magnificent resistance to naked Soviet force" The arrest of M Djilas, however, was inconsistent with these principles and had weakened Yugoslavia in face of "the new Stalinist danger."

M. Dedijer stated that he had addressed President Tito through the Press because he had learned that previous letters which he had sent him had not been delivered.

(Tanjug Agency, Belgrade - Times - Manchester Guardian)

(Prev. rep. Yugoslavia, 15188 A; Hungary, 15189 A; MM. Djilas and Dedijer, 14092 A.)

A. RELIGIOUS LIFE. — Roman Catholic Church. - Dr. Godfrey appointed Archbishop of Westminster.

It was announced from the Vatican on Dec. 6 that Dr. William Godfrey (67), Roman Catholic Archbishop of Liverpool, had been appointed by Pope Pius XII as Roman Catholic Archbishop of Westminster in succession to the late Cardinal Griffin.

Dr. Godfrey (67) was born in Liverpool, studied at Ushaw College (Co. Durham) and the English College in Rome, and took doctorates in philosophy and theology at the Gregorian University. He was ordained in 1916, held a curacy in Liverpool, and returned to Ushaw as Professor of Classics, Philosophy, and Dogmatic Theology from 1919 to 1930. In the latter year he succeeded the late Cardinal Hinsley as Rector of the English College in Rome, holding that post until his appointment in 1939 as Apostolic Delegate to Great Britain with the titular title of Archbishop of Cius. In 1953 he succeeded the late Dr. Downey in the See of Liverpool

During the Second World War Dr. Godfrey was Papal Chargé d'Affaires to the Polish Government in exile.—(Times)

(Prev. rep. Cardinal Griffin, 15056 C.)

B. WESTERN GERMANY. — Atomic Energy Programme. - Atomic Agreement with Britain.

Two Bills forming the legislative basis of the German Federal Government's atomic energy programme were approved by the Federal Cabinet on July 25, 1956. The first Bill introduced changes in the Basic Law laying down the division of responsibility between the Federal and *Länder* Governments, while the second dealt with the main principles of atomic development and the necessary safety and security regulations, etc. The legislation had been unanimously approved by the Atomic Energy Commission presided over by Herr Strauss, the Minister for Atomic Energy.

In a press statement on the same date (July 25) Herr Strauss explained that the State would not have a monopoly of atomic energy development, and that the widest scope would be given to private initiative The import and export of fissionable material, its transport within the Federal Republic, and the handling of fissionable material in private hands, would, however, have to conform to strict safety regulations. The proposed legislation did not deal with military matters, and if the German forces eventually received nuclear weapons that matter would be the responsibility of the Ministry of Defence.

The Government's atomic energy programme for the financial year ending March 31, 1957 (Herr Strauss explained) comprised three stages. (1) the fostering of atomic research and development at universities, technical high schools. and special institutions; (2) the setting-up of reactors at the Universities of Munich, Frankfurt, Cologne, Hamburg, and Berlin, as well as the construction of a multi-purpose research reactor at Karlsruhe; (3) the economic exploitation of atomic energy, including the development of uranium deposits within the Federal Republic and the chemical treatment of uranium ores.

Herr Strauss said that 44,000,000 DM. would be spent on atomic development in the present financial year, including 17,000,000 DM. for research reactors, over 7,200,000 DM. as the German contribution to the European Organization for Atomic Research in Geneva, 3,700,000 DM. for the training of atomic physicists, engineers, and technicians, 2,500,000 DM. for uranium mining operations, and 1,220,000 DM for research grants.

Of the reactors proposed to be built, the one at Karlsruhe would cost a minimum of 40,000,000 DM. and would be financed partly by the *Land* Government of Württemberg-Baden and partly by private industry. The Cologne reactor would be mainly devoted to industrial research, and the Munich reactor to technical and scientific research, in which connexion it would be linked with the Max Planck Institute in that city The reactors for Munich, Frankfurt, and Berlin had already been ordered The programme also made provision for a large breeder reactor which would be available to scientists throughout the Federal Republic, it was estimated to cost 20,000,000-40,000,000 DM., and might be built in Hamburg.

The first West German uranium mine in the Fichtelgebirge, N E. Bavaria [where the main German deposits so far known are located] would be expanded during the current year to enable the production of at least 10 tons of pure uranium for nuclear purposes. Uranium deposits had also been found in the Black Forest, and the whole territory of the Federal Republic was being prospected for such deposits, especially in Hesse and Lower Saxony.

It was also announced on July 25 that the West German Atomic Energy Commission had decided to set up a sub-committee of experts to work out proposals for the protection of the population against radiation.

Anglo-German Atomic Energy Agreement.

A 10-year Anglo-German atomic energy agreement was signed on July 31 by Mr. Selwyn Lloyd, the U.K. Foreign Secretary, and Herr von Herwarth, the Federal German Ambassador in London. Its principal provisions were:

(1) The German Federal Republic would obtain from Britain, on terms to be agreed, "research reactors and the necessary fuel elements, and unclassified information . . concerning the design, construction, and operation of these reactors",

(2) The U.K Atomic Energy Authority would provide facilities for training German scientists,

(3) Britain and Western Germany would "help each other to obtain the research quantities of materials needed for their atomic energy programmes";

(4) The German Federal Republic would "probably purchase from British industry a research reactor of the swimming-pool type and a high-flux research reactor for testing materials similar to the 'Pluto' reactor under construction at Harwell",

(5) Reactors, materials, and information supplied under the agreement would be used for peaceful purposes only;

(6) The British and German Federal Governments expressed their intention to support the proposed International Atomic Energy Agency when it came into operation.

It had been announced on June 5 that an order for a research reactor of the swimming-pool type, similar to that at the Aldermaston atomic energy establishment, had been placed with Associated Electrical Industries Ltd., by the German Ministry of Economics and Transport. (Die Welt, Hamburg - Frankfurter Allgemeine Zeitung) **(Prev. rep. 14628 A.)**

A. INTERNATIONAL MONETARY FUND.—Arrangements for Large-scale Dollar Drawings by Britain.

It was announced in London and Washington on Dec. 10 that the British Government had made arrangements with the International Monetary Fund under which it might purchase, with sterling, dollars and other foreign currencies up to the full amount of the U.K. quota of $1,300,000,000. It was stated that the arrangements fell into two parts: (1) an immediate drawing of $561,470,000; (2) a stand-by arrangement under which the equivalent of $738,530,000 in foreign currencies might be purchased from the Fund with sterling at any time during the next 12 months.

The British Treasury announcement added: "As regards the first part of the arrangements, the sum of $561,470,000 to be drawn will become part of the gold and dollar reserves. Under the second part of the arrangements, the Government has the automatic right to draw on a further sum equivalent to $738,530,000. Thus the effect of the two halves of the arrangements is to strengthen the reserves by $1,300,000,000, and to bring their *de facto* level to over $3,000,000,000."

The rules of the I.M.F. permit borrowing under several credit *tranches*, as described below:

(*a*) All members are allowed to draw semi-automatically to the extent of their gold subscription, provided that this does not bring the Fund's holding of their currency to more than 100 per cent of their respective quota.

(*b*) It has been the Fund's policy in recent years to permit additional drawings of up to 25 per cent of quota "when necessary." The U.K., therefore, has been able to draw at once the sum of $561,000,000, made up of the $236,000,000 gold *tranche* and the $325,000,000 which represents 25 per cent of her $1,300,000,000 quota.

(*c*) The further sum of $739,000,000, sufficient to bring total drawings up to 100 per cent of quota, is being made available under the "stand-by" arrangements introduced in 1954 (see 13479 D). It will be available for drawing for a period of 12 months, and not for six months as specified in the original clause.

Interest on these advances is payable as follows: On the $236,000,000, a once-for-all service charge of ¼ per cent; on the $325,000,000 which represents 25 per cent of quota, a charge varying with the period for which it is outstanding and rising from 2 per cent after three months to 5 per cent after three years; on the $738,000,000 "stand-by" credit, a charge of ¼ per cent until drawn, when the charge rises as already described.

Britain has had recourse to the Fund on four previous occasions. In September, 1947, she purchased $60,000,000; in October, 1947, $120,000,000; in November, 1947, $60,000,000; and in March, 1948, a further $60,000,000—making a total during these six months of $300,000,000. This drawing was repaid partly by other members of the Fund—Brazil, Japan, Turkey, and the Netherlands—drawing sterling from it and reducing the U.K. repayment obligation, and partly by the U.K. itself repaying $112,000,000 in August, 1954.

The British request to the I.M.F. for the sale of dollars against sterling up to the U.K. quota had been made on Dec. 4, immediately after Mr. Macmillan's announcement of the measures which the Government were going to take to counter the heavy drain on the gold and dollar reserves. The request was approved by the Executive Board of the Fund on Dec. 10.

As a result of the arrangements with the I.M.F., sterling immediately improved in the world's exchange markets on Dec. 11, the spot rate for the pound rising at one time to $2.78¼ and closing at $2.78 11/16, against $2.78½-2.78¾ previously. The dollar premium on forward buying of sterling also narrowed, and transferable sterling closed in New York at $2.7480-2.7495, compared with $2.7410-2.7425 previously.

The Economic Secretary to the Treasury (Mr. Walker-Smith) stated on Dec. 10 that Britain had undertaken to repay the dollars to the Fund within three years.—(Financial Times - Times - International Monetary Fund, Washington)

(Prev. rep. 15239 A.)

B. FRANCE. — Revival of Order of Military Merit.

A Bill for the revival of the Order of Military Merit (*Ordre du Mérite Militaire*), which had existed under the French monarchy but had been suppressed in 1830, was presented in the National Assembly on Nov. 16 by M. André Monteil (M.R.P.) and adopted unanimously. It will be awarded in time of peace for voluntary services rendered by reservists. (Le Monde, Paris)

C. SOVIET UNION.—Marshal Rokossovsky appointed Deputy Minister of Defence.

It was announced in Moscow on Nov. 19 that Marshal Konstantin Rokossovsky, lately Minister of Defence in Poland, had been appointed Deputy Minister of Defence in the Soviet Government.—(Times) **(Prev. rep. 15242 A; 15161 A.)**

D. UNITED STATES. — Administration. - Mr. Christian Herter succeeds Mr. Herbert Hoover as Under-Secretary of State.

It was announced on Dec. 8 that President Eisenhower had accepted the resignation of Mr. Herbert Hoover jr. as Under-Secretary of State and had appointed Mr. Christian A. Herter (61), lately Governor of Massachusetts, as his successor.

After serving in the U.S. Diplomatic Service during and after the First World War (his posts including that of Attaché at the Berlin Embassy in 1916-17), Mr. Herter spent some time in journalism before entering politics in 1931 as a member of the Massachusetts State Legislature, of which he was a member for 12 years and Speaker for four years. In 1943 he was elected to the U.S. House of Representatives, and as a member of the House Foreign Affairs Committee headed an important study of the post-war Marshall Plan programme, of which he was one of the strongest Congressional advocates. He left Congress in 1952 to become Governor of Massachusetts, holding that office for two terms until the recent gubernatorial elections (see page 15238, column two), at which he did not seek re-election. A leading liberal and "internationalist" Republican, he was one of General Eisenhower's earliest supporters for the Presidential nomination in 1952. Before the recent Presidential elections Mr Herter had declined Mr. Stassen's efforts to nominate him as Vice-Presidential candidate in preference to Mr Nixon (see 15089 A).

Mr. Herbert Hoover jr., who had held the post of Under-Secretary of State since 1954, resigned to return to his profession of mining engineer. A son of Mr. Herbert C. Hoover, Republican President from 1929-32, he played an important role in helping to solve the Abadan crisis when the Persian Government nationalized the Anglo-Iranian Oil Company in 1953. In contrast to Mr. Herter, he was regarded as belonging to the ultra-conservative side of the Republican Party.

Mr. Herter's appointment to the important post of Under-Secretary of State (in which capacity he will be second-in-command to Mr. Dulles at the State Department) was regarded in the U.S., British, and French press as an indication of a more "internationalist" trend in American foreign policy. Taken in conjunction with President Eisenhower's declaration of Nov. 27 (see 15257 C), it was also regarded as foreshadowing greater future co-operation between America and her Western allies following the severe strain resulting from the Suez crisis.

Mr. Herter will take up his post at the State Department on Feb. 1, 1957.—(New York Times - New York Herald Tribune) **(Prev. rep. Mr. Herter, 15089 A; Mr. Hoover, 13766 F.)**

E. JAPAN. — Ending of State of War with Soviet Union. - Admission to United Nations.

The agreements signed in Moscow on Oct. 19 by Mr. Hatoyama and Marshal Bulganin—the joint declaration ending the formal state of war between Japan and the U.S.S.R., and the related conventions on trade and fisheries—were unanimously approved by the Lower House of the Japanese Diet on Nov. 27, and by the Upper House on Dec. 5 by 224 votes to three. They came into force on Dec. 12, when instruments of ratification were exchanged in Tokio by Mr. Shigemitsu, the Japanese Foreign Minister, and Mr. Fedorenko, Soviet Deputy Foreign Minister.

Fifty-eight Liberal Democrats absented themselves from the debate in the Lower House, in protest against the omission from the agreements of any provision for continued Japanese-Soviet negotiations on the return of Etorofu and Kunashiri islands to Japan. There were no Liberal Democratic abstentions in the Upper House. The Socialists supported the Government in both Houses.

Consequent upon the formal ending of the state of war between Japan and the U.S.S.R., and the restoration of full diplomatic relations between the two countries, a Japanese application for membership of the United Nations was unanimously approved by the Security Council on Dec. 12. Japan will become the 80th member of the U.N. Organization when her membership is formally approved by the General Assembly, at present holding its 11th session in New York.

An application from the Mongolian People's Republic (Outer Mongolia) for U.N. membership was considered by the Security Council at the same time, but failed to receive the seven affirmative votes needed for acceptance. The Mongolian application was supported by the Soviet Union, Yugoslavia, Persia, and Peru and opposed by Cuba and Nationalist China, with the U.S.A., Great Britain, France, Belgium, and Australia abstaining.—(Japanese Embassy Press Office, London - Times - United Nations Information Centre, London)

(Prev. rep. 15195 A.)

F. UNITED KINGDOM. — October Trade Figures.

Imports into the United Kingdom in October totalled £354,300,000, exports £294,900,000, and re-exports £12,700,000, the adverse visible balance thus amounting to £46,700,000. (Board of Trade Journal) **(Prev. rep. 15152 A.)**

DECEMBER 15—22, 1956

A. UNITED NATIONS. — Final Approval of Draft Statute for International Atomic Energy Agency.

The draft statute of the International Atomic Energy Agency, which had been adopted unanimously by a 12-power conference in Washington in April (see 14921 A), was submitted for final approval to a general conference of member-countries of the U.N. and its specialized agencies held at U.N. headquarters from Sept. 20 to Oct. 26 under the chairmanship of Senhor João Carlos Muñiz (Brazil).

The conference was attended by representatives of 72 member-countries of the U.N. and of 10 States which belonged to one or more of the specialized agencies, but not to the U.N. itself (Western Germany, Japan, South Korea, Monaco, Morocco, San Marino, Switzerland, Tunisia, the Vatican, and Vietnam). Invitations had been sent to 87 Governments and had been declined by five only—Finland, the Irish Republic, Laos, Luxemburg, and the Sudan. No reply was received from Nepal.

Following the conclusion on Oct. 2 of a general debate on the draft Statute, the conference began consideration of the 68 amendments which had been submitted by representatives of various countries. The principal decisions taken during the general debate and arising from the consideration of the proposed amendments are summarized below under cross-headings.

Membership. The conference decided to make no change in the provisions of the draft Statute dealing with the initial membership of the Agency, and rejected by 45 votes to 19, with 16 abstentions, a Soviet amendment proposing that no limitation should be placed on membership The effect of this amendment would have been to extend membership of the Agency to such countries as Communist China and Eastern Germany, which were neither members of the U.N. nor of its affiliated agencies. The Conference also refused (by 53 votes to 18, with 9 abstentions) to vote on a Soviet amendment questioning the existing inclusion of Nationalist China among the conference members.

Atomic University. Considerable discussion was devoted to a proposal by Bolivia and Ecuador—subsequently dropped—that the Agency should set up a "World University of the Atom" to conduct research and train nuclear scientists. The U.S. delegate (Mr. James Wadsworth) expressed the view that although the objective was very praiseworthy, it might "involve very large financial outlays"; the project would also raise difficult problems of location, structure, and staffing, and it would be premature to include it in the basic constitution of the Agency.

Safeguard Clauses. The clauses concerning the imposition of control and inspection regulations over materials supplied by the Agency (Article 12) led to controversy over the possible dangers of interference with the national economic life and sovereignty of recipient nations. The opposition to these provisions came from those countries which were not large producers of fissionable materials and would be future borrowers from the Agency's "bank." Criticisms were based on (*a*) the nature of the powers which the draft Statute conferred on nations that would provide atomic materials and "know-how" to under-developed countries, and (*b*) the lack of authority assigned to the "general conference" of the member-countries.

The Indian delegate (Dr. Bhabha) stated that his country would prefer to treat source material and special fissionable material as two distinct categories to be dealt with separately. The present safeguards were devised to ensure that no country should, as a result of aid from the Agency, come into possession of fissionable material at any stage in the future, except with the Agency's permission and approval; such a provision, however, would make a country whose economy depended on atomic power subject to international pressure. Dr. Bhabha therefore urged that, instead, a provision should be incorporated in the Statute laying down that the Agency would give no aid whatsoever to any country developing atomic energy for military purposes.

Agreement was finally reached on a compromise amendment, proposed by France and Switzerland, which stated that controls on the "chemical processing of irradiated materials" should be applied "solely to ensure that this chemical processing would not lend itself to diversion of materials for military purposes." The International Atomic Energy Agency should also be empowered to demand that the by-products of such chemical processing should be applied by the recipient countries to peaceful programmes, or be re-deposited with the Agency.

This compromise proposal was adopted by the conference, after the U.S.A. and India had withdrawn conflicting proposals for inspection—the former seeking to ensure that all by-products of fissionable materials supplied by the Agency should be open to complete inspection, and the latter objecting that such controls would be too sweeping and would interfere with the internal economy of recipient countries. In its amended form, Article 12 was intended as a "means to prevent stockpiling" of by-products for non-approved purposes

Headquarters. The Conference approved a resolution that the headquarters of the International Atomic Energy Agency should be established in Vienna, and requested the Preparatory Commission to be guided by this preference when making recommendations to the general conference.

The text of the draft Statute of the International Atomic Energy Agency, as finally approved, is summarized below:

Objectives. The Agency would seek to accelerate and enlarge the contribution of atomic energy to peace, health, and prosperity throughout the world It would ensure, so far as it was able, that assistance provided by it, or at its request, or under its supervision or control, was not used in such a way as to further any military purpose (Article 2).

Functions. The Agency was authorized:

(*a*) to encourage and assist research on and the development of atomic energy for peaceful uses throughout the world, and to act as an intermediary between members for the performance of services or the supply of materials, equipment, or facilities;

(*b*) to make provision for the materials and services needed for the development of atomic energy for peaceful purposes, with due consideration for the needs of under-developed areas of the world;

(*c*) to foster the exchange of scientific and technical information on the peaceful uses of atomic energy;

(*d*) to encourage the exchange and training of scientists and experts;

(*e*) to establish and administer safeguards designed to ensure that special fissionable and other materials made available by the Agency should not be used in such a way as to further any military purpose;

(*f*) to acquire or establish any facilities, plant, and equipment necessary for the execution of its authorized functions.

In carrying out these functions the Agency would:

(1) Conduct its activities in accordance with the purposes and principles of the U.N. to promote peace and international co-operation;

(2) establish control over the use of special fissionable materials received by the Agency to ensure that they would be used only for peaceful purposes;

(3) allocate its resources in such a manner as to secure efficient utilization and the greatest possible general benefit in all areas;

(4) submit reports on its activities annually to the U.N. General Assembly and, when appropriate, to the Security Council;

(5) submit reports to the Economic and Social Council and other U.N. organs on matters within their competence;

(6) assist members without any political, economic, military, or other conditions incompatible with the provisions of the Statute;

(7) show due respect for the sovereign rights of States. (Article 3).

Membership. At the outset this would be limited to any member of the U.N. or its specialized agencies which signed the Statute within 90 days after it was opened for signature. Thereafter the admission of further members would be subject to the approval of the General Conference upon the recommendation of the Board of Governors. In making this recommendation, and in approving membership, the Board of Governors and the General Conference "shall determine that the State is able and willing to carry out the obligations of membership in the Agency, giving due consideration to its ability and willingness to act in accordance with the purposes and principles of the U.N. Charter." (Article 4).

Organization. The principal organs of the Agency would be a General Conference and a Board of Governors.

General Conference. This would consist of all member-countries, each represented by one delegate. Its sessions would ordinarily take place annually, but provision was made for the convening of extraordinary sessions. The Conference's functions would comprise chiefly (*a*) the admission of new members, (*b*) the election of certain members of the Board of Governors [see below]; and (*c*) the approval of the Agency's budget, and such reports as it might make to the United Nations. The Conference would also have authority to take decisions on any matters specifically referred to it for this purpose by the Board. (Article 5).

Board of Governors. This would be composed of representatives of 23 member-countries, each with one vote, and distributed in five categories as follows:

(1) The five members most advanced in the technology of atomic energy, including the production of source materials (Canada, France, the Soviet Union, the United Kingdom, and the U.S.A.),

(2) The member most advanced in the technology of atomic energy in each of the following areas not represented by the aforesaid five: North America, Latin America, Western Europe, Eastern Europe, Africa and the Middle East, South Asia, South-East Asia and the Pacific, and the Far East [with North America, Western Europe, and Eastern Europe represented in the first category, there will thus be five members representing the other areas in this category];

(3) Two members nominated by the Board from among the following producers of source materials—Belgium, Czechoslovakia, Poland, Portugal.

(4) One member nominated by the Board as a supplier of technical assistance;

(5) Ten members elected by the General Conference, with the aim of ensuring equitable regional representation on the Board.

The ten elected members would serve for a two-year period and the remainder would serve for one year. Initially, all the designated members would be named by an 18-nation Preparatory Commission, which would commence work as soon as the Statute was opened for signature [see below]. (Article 6).

Secretariat. The staff of the Agency would be headed by a Director-General, appointed by the Board of Governors with the approval of the General Conference for a four-year term. In the performance of their duties the Director-General and his staff should not seek or receive instructions from any source external to the Agency; should

KANSAS CITY MO

refrain from any action which might reflect on their positions as officials of the Agency, and, subject to their responsibilities to the Agency, should not disclose any secret or other confidential information coming to their knowledge by reason of their official duties (Article 7).

Exchange of Information. Member-countries would be obliged to submit to the Agency all scientific information acquired as a result of assistance received from it. They would also be requested to submit any other information which, in the judgment of the member, would be of use to the Agency. The Agency would then make available the information received in an accessible form for the benefit of all members. (Article 8).

Supply of Materials. Members would make available to the Agency such quantities of fissionable materials "as they deem advisable, and on such terms as shall be agreed with the Agency." They might also make available source materials in such quantities as the Agency might be willing to accept. The provision of materials for the Agency by a member would always be for the calendar year following notification of its willingness to supply them. Members might, however, change the quantities, form, and composition of materials made available by them with the approval of the Agency's Board of Governors

At the discretion of the supplying member, materials would be stored either by the member itself or in the Agency's depots. The Agency would ensure the geographical distribution of materials entrusted to it "in such a way as not to allow concentrations of large amounts in any one country or region of the world," and would be free to distribute materials as it should think fit. As regards materials in its possession, the Agency would be responsible for safeguarding them against weather hazards, unauthorized removal or diversion, damage or destruction, including sabotage, and forcible seizure

Countries receiving assistance in the form of materials or equipment would be supplied either directly by the Agency from its own stocks, or, at the Agency's request, by another member holding stocks at its disposal. (Article 9).

Provision of Services and Equipment. Members would also make available to the Agency services, equipment, and facilities which might be of assistance in the fulfilment of its objectives and functions. (Article 10).

Agency Projects. Any member or group of members desiring to set up any project for the development of atomic energy for peaceful purposes might request the Agency's assistance in securing the necessary materials, services, equipment, and facilities. Such requests, which should be accompanied by an explanation of the purpose and extent of the project, would be considered by the Board of Governors. If requested, the Agency would also assist any member to secure the necessary finance for such projects from outside sources In extending such assistance, however, the Agency would not provide any guarantees or assume any financial responsibilities for the project concerned.

At the discretion of the member making the request, the Agency would either arrange for the supply of materials, services, equipment, and facilities by other members, or undertake to supply them directly.

Before approving the project, after its examination by the Agency, the Board of Governors would give due consideration to the following factors :

(1) The usefulness of the project, including its scientific and technical feasibility ;
(2) the adequacy of plans, funds, and technical personnel to assure the effective execution of the project ;
(3) the adequacy of proposed health and safety standards for handling and storing materials and for operating facilities ;
(4) the inability of the member making the request to secure the necessary financial or material assistance ;
(5) the equitable distribution of the materials and other resources available to the Agency ;
(6) the special needs of the under-developed areas of the world.

Following the approval of a project, the Agency would enter into an agreement with the member concerned for the allocation of any necessary materials, the transfer and shipment of materials under the applicable health and safety regulations ; the terms and conditions under which the assistance would be granted, undertakings that such assistance would not be used in furtherance of any military purpose ; the rights and interests of the Agency and members concerned in any inventions or discoveries, or any patents therein, arising from the project ; and the settlement of disputes. (Article 11).

Control and Inspection. In any Agency project, or in any other arrangement where the Agency was requested by the parties concerned to apply safeguards, it would have the following rights and responsibilities :

(1) To examine the design of specialized equipment and facilities and to approve it on condition that it would not further any military purpose, that it would comply with applicable health and safety standards, and that it would permit effective application of the safeguards provided for in the Statute ;
(2) To require the observance of any health and safety measures prescribed by the Agency ;
(3) To require the maintenance and production of operating records to assist in ensuring accountability for source and special fissionable materials used or produced in the project,
(4) To call for and receive progress reports ;
(5) To approve the means to be used for the chemical processing of irradiated materials in order to ensure that this processing could not lend itself to diversion of materials for military purposes, and complied with applicable health and safety standards ;
(6) To require that special fissionable materials recovered or produced as a by-product should be used for peaceful purposes under continuing Agency safeguards for research or in reactors specified by the member concerned ;
(7) To require deposit with the Agency of any excess of any special fissionable materials recovered or produced as a by-product over what would be needed for the above-mentioned uses, in order to prevent stockpiling of these materials, provided, however, that at the request of the member concerned, those materials would be promptly returned afterwards for use under the same provisions ;
(8) To send into the territory of the recipient States inspectors, designated by the Agency after consultation with the States concerned, who would have access at all times to all places and data necessary to account for the materials supplied and produced, and to ensure compliance with the undertaking against use in furtherance of any military purpose,
(9) To suspend or terminate assistance and withdraw any materials and equipment made available by the Agency in the event of non-compliance or failure by the recipient State to take requested corrective steps within a reasonable time (Article 12).

Finance. The Agency's administrative expenses would be covered by contributions from member-countries, while its other expenses would be defrayed out of its revenue for services rendered by it. The Board of Governors would be required to "establish periodically a scale of charges, including reasonable uniform storing and handling charges, for materials, services, equipment, and facilities furnished." The proceeds from these charges would be used to pay contributing member-countries for materials or services supplied by them, and to meet certain technical expenses incurred by the Agency.

Subject to rules and limitations approved by the General Conference, the Board of Governors would have authority to exercise borrowing powers on behalf of the Agency without, however, imposing on members any liability in respect of such loans. The Board would also be authorized to accept any voluntary contributions made to the Agency.

Decisions, both of the General Conference and of the Board of Governors, on financial questions would require a two-thirds majority of those present and voting. (Article 14).

Legal Status. The Agency would enjoy in each member's territory such privileges and immunities as would be necessary for the exercise of its functions. (Article 15).

Relationship with United Nations. The Board of Governors, with the approval of the General Conference, would be authorized to enter into an agreement or agreements establishing an appropriate relationship between the Agency and the U.N. and any other organization whose work was related to that of the Agency.

The Agency would submit reports to the U.N General Assembly, the Economic and Social Council, and to other U.N. organs on matters within their competence, and to the Security Council "when appropriate." (Article 16).

Settlement of Disputes. Any question or dispute concerning the interpretation or application of the Statute which could not be settled by negotiation would be referred to the International Court of Justice, unless the parties concerned agreed to another mode of settlement. (Article 17).

Amendments and Withdrawals. The question of a general review of the Statute's provisions would be placed on the agenda of the fifth annual session of the General Conference following the entry into force of the Statute. On approval by a majority of the members present and voting, the review would take place at the following General Conference. Thereafter, proposals for a general review of the Statute would be submitted for decision by the General Conference under the same procedure.

Amendments to the Statute might be proposed by any member, and would come into force after approval by a two-thirds majority of those present and voting in the General Conference, and after acceptance by two-thirds of all the members in accordance with their respective constitutional processes.

A member might withdraw from the Agency by notice in writing at any time after five years from the date when the Statute came into force, or whenever it was unwilling to accept an amendment to the Statute. Withdrawal from the Agency would not effect a member's contractual obligations in any Agency project, or its budgetary obligation for the year in which it withdrew. (Article 18)

Suspension of Privileges. A member whose financial contributions were in arrears for at least two years would automatically lose its vote. but permission to vote could be granted by the General Conference if it was satisfied that the failure to pay was due to circumstances beyond the member's control.

A member which had persistently violated the provisions of the Statute, or any agreement concluded under it, might be excluded from the rights and privileges of membership by the General Conference, acting by a two-thirds majority of members present and voting, upon recommendation by the Board of Governors. (Article 19).

Entry into Force. The Statute would come into force after ratification by 18 member-countries, provided these included at least three of the five major atomic Powers. Instruments of ratification would be deposited with the U.S. Government. (Article 21).

Preparatory Commission. An Annex attached to the Statute provided for the formation of a Preparatory Commission, consisting of representatives of 18 nations, whose major task would be the establishment of the new Agency. This Commission would be

composed of one representative each of Australia, Belgium, Brazil, Canada, Czechoslovakia, France, India, Portugal, South Africa, the Soviet Union, the United Kingdom, and the United States (the 12 "Sponsoring Powers"), and one representative each of six other States to be elected by the international Conference [The Conference subsequently elected Argentina, Japan, Egypt, Peru, Indonesia, and Pakistan to membership of the Commission.]

The Commission was expected to meet in Europe early in 1957, and it was hoped that the International Agency would come into being by the end of that year.

In a message to the final meeting of the conference on Oct. 26, President Eisenhower announced that the U.S.A. would make available to the Agency 5,000 kilogrammes (11,000 lbs.) of Uranium-235 from the 20,000 kgs. of such material allocated by the U.S. Government in February last for peaceful uses by friendly nations. In addition to this initial amount, which was designed to enable the Agency to start atomic research and power programmes without delay, the U.S.A. would continue to make available to the Agency up to July 1, 1960, nuclear materials which would match the total quantities of such materials made similarly available by all other members of the Agency, and which would be supplied on comparable terms.

The Statute of the International Atomic Energy Agency was opened for signature on Oct. 26.—(U.N. Information Centre, London - New York Times) **(Prev. rep. 14921 A.)**

A. JORDAN. — Decision to end Treaty with Britain. - Iraqi Troops withdrawn from Jordan. - Anti-Iraq Demonstrations in Amman.

The Prime Minister of Jordan, Mr. Soliman Nabulsi, informed the Chamber of Deputies in Amman on Nov. 27 that the Government intended to abrogate the Anglo-Jordanian treaty of 1948 and to arrange for the evacuation of British forces. A week earlier (Nov. 20) the Chamber had unanimously approved a resolution by its Foreign Affairs Committee calling for the abrogation of the treaty with Britain and the establishment of diplomatic relations with the Soviet Union and the People's Republic of China.

In his statement on Nov. 27, Mr. Nabulsi accused Britain of having violated the spirit of the 1948 treaty "in many ways," and said that his Government had decided in principle to accept the offer of financial aid from Egypt, Syria and Saudi Arabia in place of the annual British subsidy. After a tribute to "the struggle of President Nasser and the Egyptian Army and people," he announced that Jordan would maintain her military alliance with Egypt and Syria and would seek closer political, economic and cultural ties with those countries with the aim of achieving an Arab federal union.

A British Foreign Office spokesman rejected Mr. Nabulsi's allegation that Britain had violated the spirit of the 1948 treaty, pointed out that the treaty was valid for 20 years and contained no provision for unilateral abrogation, and said that no official communication had been received from the Jordanian Government on this matter.

It was announced in Amman and Baghdad on Dec. 9 that Iraq had decided to withdraw her troops from Jordan at the request of the Jordanian Government. The Syrian and Saudi Arabian forces which entered Jordan at the same time as Iraqi forces (see page 15211, first column), were believed to be still in Jordan.

A two-hour general strike in protest against the policy of the Iraqi Prime Minister, General Nuri es-Said, took place throughout Jordan on Dec. 17, and simultaneously in Egypt. Telegrams were sent to King Faisal of Iraq demanding the resignation of General Nuri, Iraq's withdrawal from the Baghdad Pact, and the release of Iraqi political prisoners. The Iraqi Embassy in Amman was strongly guarded against several thousand persons demonstrating against the Baghdad Pact and denouncing General Nuri as a "traitor" for aligning Iraq with the "imperialists." (Times - Daily Telegraph)
(Prev. rep. Jordan, 15200 A.)

B. UGANDA. — New Rail Link.

A 208-mile railway extension from Kampala westward to Kasese, in the foothills of the Ruwenzori mountains, was opened on Nov. 26 by the Governor of Uganda, Sir Andrew Cohen. The extension, costing over £5,000,000, will help to develop the important resources of the Kilembe copper and cobalt mines and to open up hundreds of square miles of fertile land. The copper-ore deposits in the Kilembe area are estimated at 15,000,000 tons.—(Times - Manchester Guardian)

C. UNITED KINGDOM. — Sir Anthony's Eden's Return from Jamaican Holiday.

The Prime Minister, accompanied by Lady Eden, returned to London on Dec. 14 from the three-weeks' holiday in Jamaica which he had taken on the advice of his doctors (see 15214 A, final paragraph). He said on arrival at London Airport that he was completely reinvigorated and felt "absolutely fit" to resume his duties.—(Times) **(Prev. rep. 15214 A.)**

D. CANADA. — Provincial Elections in British Columbia, Newfoundland, and Nova Scotia.

Provincial elections were held in British Columbia (Sept. 19), Newfoundland (Oct. 2), and Nova Scotia (Oct. 30), the results being as follows:

British Columbia. The Social Credit Government of Mr. W. A. C. Bennett gained the largest majority since it came into power in 1952, capturing 39 seats out of 52 in the Provincial Assembly. Party strengths were as follows, comparison being shown with the 1953 provincial elections:

	1956	1953
Social Credit	39	28
C C F. (Labour)	10	11
Liberals	2	4
Independent Labour	1	1
Progressive Conservatives	0	1
Totals	52*	48*

* Four new seats had been added to the Legislature.

Mr Bennett and all members of his Ministry were re-elected, as was Mr. Robert Strachan (C.C F), Leader of the Opposition. The Liberal and Progressive Conservative leaders (Mr. Arthur Laing and Mr. Deane Finlayson respectively) were defeated, the Progressive Conservatives losing the only seat they held in the previous Assembly. The election was one of the most bitterly contested in the history of the Province

The Social Credit party increased its poll from 38 per cent in 1953 to 46 per cent, while the C C.F. poll fell from 31 to 29 per cent.

Newfoundland. In the third Provincial election since Newfoundland joined the Canadian Federation in 1949, the Liberal Government of Mr. Joseph Smallwood was returned to power with a greatly increased majority, results being as follows:

	1956	1951
Liberals	32	23
Progressive Conservatives	4	5
Totals	36*	28*

* Eight seats added in a redistribution in 1955.

Four of the 36 seats were uncontested—those of three Liberals and of the Progressive Conservative leader, Mr. Malcolm Hallett. All the eight new seats were captured by the Liberals. The C C.F lost the only seat they had held in the previous Assembly—that of Mr. Drover (White Bay), who had left the Liberal Party and joined the C C.F in 1954.

Nova Scotia. The elections resulted in a decisive victory for the Progressive Conservatives, led by Mr. Robert L. Stanfield, and the defeat of the Liberal Administration which had been in office for 23 years Results were as follows:

	1956	1953
Progressive Conservatives	24	12
Liberals	18	23
C C.F.	1	2
Totals	43*	37*

* Six new seats added in a redistribution in 1955.

Mr. H D. Hicks, the Liberal Premier, was re-elected, but four of his Ministers were defeated—Mr. Colin Chisholm, Agriculture, Mr. Malcolm Paterson, Attorney-General; Mr. Wilfred Dauphinee, Trade, and Mr Arthur W. MacKenzie, Highways. The C C.F. leader, Mr. Michael McDonald, was also returned. Progressive Conservative gains from the Liberals included five of the six industrial constituencies.

Of the total poll, the Progressive Conservatives obtained over 49 per cent, against 44 per cent in 1953; the Liberals just under 48 per cent, against 49 per cent; while the C C.F. poll fell from six per cent to three per cent.

Mr. Stanfield (42), a lawyer, and the son of a former Lieutenant-General of Nova Scotia, became leader of the Progressive Conservatives in the Province in 1948, when the party was unrepresented in the Legislature Mr Hicks had assumed the Premiership in 1954 following the death of Mr. Angus Macdonald.

These elections brought the number of Provincial elections held during 1956 to six—a record since 1890. Nova Scotia was the only province where the Government in office was defeated. (Canadian Department of External Affairs, Ottawa)
(Prev. rep. Provincial Elections 15078 A.)

E. BRAZIL. — Purchase of British Aircraft Carrier.

The British Admiralty announced on Dec. 14 that the aircraft carrier H.M.S. *Vengeance* (13,190 tons) had been purchased by Brazil and would be recommissioned in the Brazilian Navy after modernization. The *Vengeance* was one of six carriers of the *Glory* class, two of which had also previously been sold—H.M.S. *Venerable* to the Netherlands in 1948 and H.M.S. *Colossus* to France in 1951. By acquiring H.M.S. *Vengeance*, which will be renamed the *Minas Gerais*, Brazil became the first Latin American nation to have a carrier-borne air arm. The purchase price was not disclosed but was understood to be in the region of £6,000,000 to £7,000,000.
(Daily Telegraph - Manchester Guardian)

A. UNITED KINGDOM. — Road Haulage. - The Transport (Disposal of Road Haulage Property) Act. - Reorganization of British Road Services. - Final Report of Road Haulage Disposal Board.

The Royal Assent was given on Aug. 2 to the Transport (Disposal of Road Haulage Property) Bill, which, *inter alia*, implemented the Government's decision (announced on Aug. 18, 1955) to retain with the British Transport Commission a larger number of road haulage vehicles for its road trunk services. The main provisions of the Bill were as follows :

(1) The number of " general service " lorries and vans which the British Transport Commission might retain for its trunk services was increased from 2,341, as fixed by the Transport Act of 1953, to 7,750.

[Under the 1953 Act the Commission was allowed to retain a maximum of about 3,500 vehicles, viz. 2,341 " trunk service " vehicles and 1,159 vehicles used for special loads Including the latter, the Bill therefore permitted a total of nearly 9,000 vehicles to be retained for these purposes.]

(2) The Transport Levy imposed under the Transport Act to recoup the Commission for any losses incurred in disposing of its road haulage assets (see 12394 A) would be abolished from Dec. 31, 1956.

[It was estimated that the levy would have yielded about £12,500,000 by the latter date.]

(3) To facilitate the sale of the subsidiary companies set up by the Commission to take over its road haulage property pending its resale to private enterprise hauliers or others, the Bill provided that the securities in these companies might take the form of either shares or loan capital, and might be sold in one or more " parcels."

[The Transport Act had required these securities to be in the form of shares, and to be sold in one " parcel " only.]

(4) These subsidiary companies would be exempted from the need to obtain the Minister of Transport's consent to capital reductions made under the terms of the Bill, and were also authorized (subject to his consent) to withhold their securities from offer if it seemed that a better price could be obtained later. The Bill stipulated, however, that, if the Minister subsequently withdrew his consent, the securities must be offered " as soon as reasonably practicable."

(5) The Minister of Transport was authorized (*a*) to direct the Commission, if he thought fit, to end hire contracts in cases where it had power to do so ; (*b*) to require the Commission to alter a subsidiary company's capital structure , (c) to appoint a minority of a subsidiary company's directors. The Bill also stipulated that the Commission must secure the Minister's approval before making over property to a subsidiary company for sale.

(6) The Commission was prohibited from operating road services at " below cost " rates.

The Bill had been given a second reading in the House of Commons on Feb. 9, and a third reading on April 16.

Mr. Molson (Parliamentary Secretary, Ministry of Transport and Civil Aviation), moving the second reading, claimed that the Bill was a compromise between the " whole-hog " advocates of transport nationalization, who underestimated the importance of small units and of flexibility of local and " feeder " services, and those who wanted complete denationalization, who overlooked the value of a co-ordinated system of trunk services. He explained that of the 24,569 vehicles put up for sale by May 31, 1955, 15,008—covering the smaller units—had been sold, but that when the trunk services had been put up, only 528 out of 6,115 vehicles had been disposed of, as it had proved impossible to sell the remainder without breaking up the services. Believing that the trunk services were " a vital form of transport for industry and commerce," the Government had therefore decided after careful consideration that, as private enterprise was unwilling or unable to take the lots as going concerns, there was no alternative to the vehicles remaining with British Road Services. Mr. Molson said that the Government considered that the general policy of the Transport Act had been justified by experience, that competition between public and private enterprise had led to improved services, and that the Bill represented " a sensible settlement which should give the industry certainty, security, and stability."

In the Report stage (April 16) several Labour amendments were defeated, including one intended to increase the number of vehicles actually retained by the B.T.C. in service (moved by **Mr. McLeavy,** and rejected by 207 votes to 156), and one to provide that sales of road haulage property should normally cease one year after the passing of the Bill, and that if sales had to be continued beyond that date an Order would have to be laid before Parliament for approval (moved by **Mr. Sparks,** and defeated by 209 votes to 155.).

The Bill was given a second reading in the House of Lords on May 1, 1956.

In the Committee stage (May 15) an amendment by **Lord Lucas of Chilworth,** to provide that the disposal of securities in the parcels and meat transport companies should cease on Dec 31, 1956, was defeated by 56 votes to 23. A further amendment by **Lord Lucas,** to increase the number of vehicles to be retained by the Commission, was rejected in the Report stage on June 5.

Plans for the reorganization and operation of the British Transport Commission's haulage services as a result of the enactment of the Bill were announced on Aug. 2, 1956.

It was stated that from Sept 9 the 15,000 vehicles still controlled by the Commission (including those still to be disposed of) would be operated through five companies, whose shares would be owned by it. It was intended, however, to retain eventually only three of the companies, and to offer the other two, together controlling about 4,900 vehicles, as going concerns The five operating companies would be British Road Services Ltd. (operating general haulage), with 7,750 vehicles , B.R S (Pickfords) Ltd. (special traffic and some contracts), with 1,350 vehicles ; B.R S. (Contracts) Ltd., with 1,000 vehicles ; B.R S. (Parcels) Ltd , with 4,400 vehicles , and B.R S. (Meat Haulage) Ltd., with 500 vehicles. The last two companies would be operated for sale when their trading position had been established.

The present members of the board of management of British Road Services would be reconstituted as a new board of five members (including one part-time) to manage the undertaking as a whole, Major-General G. N. Russell continuing as chairman. The new Board of Management would control the five operating companies through their boards of directors, on which its members would serve, and the general pattern of management would remain unchanged.

The country would be divided into six areas, with a separate Pickford's division for special traffic The areas, with their headquarters, would be South-Eastern (London) , Scottish (Glasgow) ; North-Western (Manchester) ; North-Eastern (Leeds) ; Midland (Birmingham) ; Western (Cardiff).

The seventh and final report of the Road Haulage Disposal Board, published on Oct. 31, gave the number of vehicles sold as 19,903 and the amount realized from the sale of vehicles (including premises and associated assets) and companies as £24,557,000. The important items not sold were the parcels and meat transport companies, which the Minister of Transport had indicated should not be offered at present. Apart from these companies and contract hire vehicles, the only vehicles remaining to be sold were a number of " non-runners " and service vans, which were being offered as chattels. A large number of premises, some trailers, and small quantities of stores and other miscellaneous assets also remained for sale.

B. SOUTH VIETNAM. — Compulsory Naturalization of Chinese born in Vietnam.

President Ngo Dinh-Diem issued a decree on Aug. 21 declaring that all Chinese born in Vietnam were Vietnamese citizens, with the rights and obligations of such citizenship, and must adopt Vietnamese names. A second decree issued at the same time made it illegal for foreigners to own 11 types of business, and excluded them in particular from the transport industry and many branches of retail trade. Chinese secondary schools were forbidden to continue except under Vietnamese management, and were ordered to follow the normal Vietnamese secondary school curricula and to use the Vietnamese language as the basic medium of instruction.

The 800,000 Chinese living in South Vietnam, some 500,000 of whom were born there, largely control the country's trade, and especially the rice trade. Under the Treaty of Nanking, concluded between France and China in 1930, they were granted far-reaching economic privileges, commercial and administrative autonomy, and the right to run their own schools. The object of the decrees was to abolish the privileged status of the Chinese, which had long been resented by the Vietnamese, while avoiding serious disturbance to the country's economy by enabling the majority of them to remain in business. Strong resentment was nevertheless aroused among the Chinese colony; the withdrawal of their deposits by Chinese merchants caused a serious run on the banks, and some Chinese migrated to Cambodia.

The Chinese Nationalist representative in Saigon, who had been recalled to Taipeh for consultation, was reported on Oct. 1 to have lodged a strong protest against President Ngo Dinh-Diem's failure to consult the Chinese Nationalist Government before issuing the decree of compulsory nationalization.
(Le Monde, Paris - New York Times)

C. SWITZERLAND. — New Federal President.

Dr. Hans Streuli, head of the Department of Finance and Customs, was elected President of the Swiss Confederation for 1957 at a meeting of the Joint Federal Assembly (i.e. the two Houses meeting in joint session) on Dec. 13. Herr Thomas Holenstein, head of the Federal Department of Economy, was elected Vice-President. Dr. Streuli (64), who belongs to the Radical Party, is an architect by profession and was a member of the Zurich Cantonal Government from 1935 until 1954, when he entered the Swiss Federal Government.
(Neue Zürcher Zeitung) **(Prev. rep. 14611 B.)**

A. KASHMIR. — Adoption of State Constitution. - Kashmir proclaimed Integral Part of India. - Protests by Sheikh Abdullah, Opposition Leaders, and Mr. Suhrawardy. - Pakistani Appeal to Security Council.

A draft Constitution for Kashmir, declaring the State to be "an integral part of the Union of India," was presented to the Kashmir Constituent Assembly on Oct. 10 by Mr. G. L. Dogra, the Finance Minister and chairman of the drafting committee. Its main provisions are summarized below.

Relationship with India. The Constitution declared that "the State is and shall be an integral part of the Union of India" and that its territories "shall comprise all territories which on Aug 15, 1947, were under the sovereignty or suzerainty of the Ruler of the State." All sovereignty rested with the State, which had executive and legislative powers in all matters "except those in respect of which Parliament [i e. the Indian Parliament] has power to make laws for the State under the provisions of the Constitution of India."

Head of State. The Head of State (*Sadar-i-Riyasat*) would be elected by the Legislative Assembly for a five-year term, subject to confirmation by the President of India. He would have power to issue ordinances while the Legislature was in recess, and, in the event of a breakdown of the constitutional machinery, he might by proclamation (issued with the President of India's concurrence) assume any or all of the functions of government for a period of six months. The President might remove him from office at the request of two-thirds of the members of the Legislative Assembly.

Council of Ministers. The *Sadar-i-Riyasat* would exercise his functions only on the advice of the Council of Ministers, which would be collectively responsible to the Legislative Assembly.

Legislature. The Legislature would consist of two Houses—the Legislative Assembly and the Legislative Council. The Legislative Assembly would consist of 100 members elected for five years, 25 seats being reserved for the Pakistani-held areas. The *Sadar-i-Riyasat* might nominate two women members if he considered that women were not adequately represented. For a five-year period, seats for the Scheduled Castes would be reserved to them proportionate to their numbers. Only the Assembly would have the right to deal with money Bills.

The Legislative Council would consist of 36 members, one-third of whom would retire every two years. Of the 36 members, 22 would be elected by the Assembly; two by members of municipal committees, two by permanent residents teaching in recognized educational institutions; and four by members of *panchayats* (village councils) and other local bodies Of these 30 members, 15 would represent Kashmir province and 15 Jammu. The remaining six would be nominated by the *Sadar-i-Riyasat*, and would consist of representatives of the socially and economically backward classes and persons having special knowledge of literature, science, art, the co-operative movement, and social service.

Elections. The Legislative Assembly would be directly elected by adult suffrage, the minimum voting age being 21. Preparation of electoral rolls and the conduct of elections would be supervised by a Commissioner appointed by the *Sadar-i-Riyasat*.

Judiciary. The judiciary would be completely independent of the executive branch of government

Language. The official language of the State would be Urdu, but English would continue to be used for all official purposes unless the Legislature provided otherwise.

Citizenship. Every Indian citizen who was a subject of the State on May 14, 1954, or owned immovable property in the State and was normally resident there for at least 10 years before that date, would be deemed a permanent resident. Any State subject who had migrated to Pakistani territory after March 1, 1947, and who returned under a permit for resettlement, would on his return be considered a permanent resident. Permanent residents would have all the rights guaranteed them by the Indian Constitution.

Directive Principles of State Policy. The primary object of the State would be "promotion of the welfare of the mass of the people by establishing and preserving a Socialist order of society wherein all exploitation of man has been abolished, and wherein justice... shall permeate all the institutions of national life."

The State would secure to every citizen the right to free education up to university standard; provide within 10 years compulsory education for all children up to the age of 14; and ensure to all workers and employees adequate facilities for adult education and part-time technical, professional, and vocational training.

The State would also organize and develop agriculture and animal husbandry, take steps to organize village councils, and promote cottage industries. Within the limits of its economic capacity and development, it would make effective provision for securing to all citizens the right to work and to reasonable, just, and humane working conditions.

Women were guaranteed equal rights with men. Special care would be taken to promote the educational, material, and cultural interests of the socially and educationally backward sections of the people, and to protect them against social injustice.

Amendment of the Constitution. The Constitution might be amended by a Bill introduced in either House, and passed by a two-thirds majority in both Houses The provisions dealing with the State's relationship with India, the extent of the State's executive and legislative powers, and the provisions of the Indian Constitution as applicable to the State, would not be subject to amendment.

State Flag. The State would have its own flag.

Discussion of the draft Constitution opened on Oct. 22, the Assembly adopting it finally on Nov. 17 and also passing a resolution which fixed Jan. 26, 1957 [i.e. Indian Independence Day] as the date when the Constitution would come into force and the Assembly would be dissolved. The Constitution was formally signed by 67 of the 75 members of the Assembly on Nov. 19, the Opposition having withdrawn from the debates on Oct. 24 (see below). A resolution accepting the jurisdiction of the Indian Auditor-General over the State's accounts, thus integrating Kashmir financially with India, was adopted on Nov. 14.

The Assembly adopted on Sept. 29 a resolution urging the Government to prepare electoral rolls with a view to holding general elections as early as possible in 1957. The State Premier, Bakshi Ghulam Mohammed, had previously announced (during a visit to Delhi in July) that elections under the new Constitution would probably be held at the same time as the next general elections in India, or soon after. All political parties in Kashmir would be free to take part, provided their actions were not "opposed to the basic concept of the integrity and security of the State."

Reactions in Pakistan. - Mr. Suhrawardy's Protest against Integration of Kashmir with India. - Demand for Indian Compliance with U.N. Resolutions. - Note to Security Council.

The Prime Minister of Pakistan, Mr. Suhrawardy, issued the following statement on Nov. 17:

"The so-called Constituent Assembly of Occupied Kashmir, the hollowness of whose claim to speak for the peoples of the State has been demonstrably proved by the real leaders of the people of Jammu and Kashmir, and whose status has not been accepted by the U N. Security Council, is reported to have finalized a Constitution for the State in which it has been described as an 'integral part of India.' I wish to make it clear that Pakistan has not recognized and will never recognize the right of this or any other such body to represent and legislate on behalf of the people of Jammu and Kashmir State. As a matter of fact, the Government of India itself has also repudiated the validity of any pronouncement by this spurious Assembly on the question of accession.

"When this matter was debated in the Security Council, India's representative, Sir Benegal Rau, categorically assured the Council that this Assembly would not 'come in the way of the Security Council' [see 11457 A]. The question of accession is open, and will remain open until it is decided by a free and impartial plebiscite held in accordance with the U.N. resolutions dated Aug 13, 1948 and Jan. 5, 1949. The Governments of India and Pakistan, and the U.N. Security Council, are all parties to this international agreement, which cannot be repudiated by one party to suit his own ends.

"This latest move of the Government of India to secure from this self-styled Assembly a verdict which has no juridical value, in order to give itself an excuse for not holding a plebiscite to ascertain the wishes of the people, is both pathetic and mischievous. After having failed to get the people of the State on its side, the Government of India have started taking shelter behind such subterfuges.

"What do the Government of India gain by such devices, and whom do they hope to mislead? They must be conscious of the fact that if they break their international agreement they will stand condemned before the bar of world opinion, and will endanger the peace of this part of the world. They are also fully aware of the reactions of the Security Council to their attempts to wriggle out of their international commitments. They are also aware of the hostility of the people of the State, whom they are suppressing under the heel of the Indian Army of occupation. The only result of such action will be the deterioration of Indo-Pakistani relations and further aggravation of the situation in Kashmir.

"I have instructed our representative at the United Nations to protest against this move to the Security Council. I am confident that the Security Council will not permit this challenge to its authority to remain unanswered, and will take concrete steps to meet the situation."

Pakistan's permanent representative at the U.N., Mohammed Mir Khan, sent a letter to the president of the Security Council on Nov. 18 asking that India should be reminded of her obligations under the U.N. resolutions on Kashmir, and reserving the right to raise the matter before the Council. In a second letter (Nov. 28) he pointed out that Kashmir had been integrated with India, and requested the president of the Security Council to "seek clarification from the Government of India in this regard."

Opposition Protests.

The new Constitution was strongly criticized by Sheikh Abdullah, the former Premier of Kashmir, who had been held in preventive detention since Aug. 9, 1953. Although his term of detention was extended for a further six months on Aug. 5, he had been granted permission to correspond with Ministers of the Indian and Kashmir Governments.

In a letter on Aug. 16 to Mr. G. M. Sadiq, president of the Constituent Assembly, **Sheikh Abdullah** denied the Assembly's representative character, and questioned its competence to frame a Constitution on the ground that since his "unconstitutional and illegal" removal from office it had "completely forfeited the confidence of the electorate." He declared that the Government would have collapsed but for the "repressive measures" of the Indian Army and the "Peace Brigade" (the Government's private militia), and asserted that the people would revolt if the Constitution were "foisted" on them. He therefore urged that general elections should be held under neutral auspices, and that the leaders of the State Government should contest these elections to test their popularity.

Mr. Sadiq, in reply, said that the absence of Sheikh Abdullah and "a handful of his followers" did not make the Assembly unrepresentative or incompetent, and that the opportunity to test the Government's popularity would be available to any individual or party during the elections which would follow the adoption of the Constitution. Commenting on the suggestion for neutral supervision of the elections, he asked: "Am I justified in reading into your suggestion the old desire to import by the backdoor foreign intervention in our internal affairs? . . ."

It was reported on Nov. 8 that Sheikh Abdullah had written to Mr. Nehru, the Indian Premier, asking him to intervene in Kashmir to prevent a further deterioration of the situation and to ensure strict application of the basic principles of democracy, one of which was toleration of various viewpoints.

The activities of the Opposition parties in Kashmir—the Plebiscite Front, the Praja Socialist party, the Kashmir Political Conference, the Kashmir Democratic Union, and the *Kisan Mazdoor* conference—were greatly hampered throughout 1956 by the repeated arrest of their leaders, the number of detainees being estimated at about 100.

Four successive presidents of the Plebiscite Front were arrested between Nov. 19, 1955, and Sept 29, 1956. However, following an announcement on Oct. 3 by the newly-elected president of the Front (Mr. Vakil) that he would continue the struggle for a free plebiscite by strictly constitutional means, Mr. Mirza Afzal Beg (the founder and first president of the Front) was released on Oct. 19 after 11 months' imprisonment, together with four other supporters of Sheikh Abdullah.

Four of the five Opposition members of the Assembly still at liberty had boycotted the session on Oct. 10 at which the draft Constitution was presented, but after Mr. Beg's release they decided to take part in the Assembly's proceedings. On Oct. 22 Mr. Beg presented a motion for the adjournment of the Assembly for two weeks, so as to give the Government time to arrange for Sheikh Abdullah to be present. When Mr. Sadiq ruled the motion out of order, Mr. Beg announced that the Opposition would boycott the debates on the Constitution, as the Assembly had lost its representative character after Sheikh Abdullah's arrest and was not competent to ratify Kashmir's accession to India. On Oct. 25 Mr. Beg was again arrested (only six days after his release), together with two other members of the Assembly, Hakim Habibullah and Mr. Mobarak Shah.

New "Azad Kashmir" Government.

Following the resignation of the "Azad Kashmir" Government [i.e. the administration in the Pakistani-held area] led by Colonel Sher Ahmed, Mr. Waiz Mohammed Yusuf Shah took office on May 30 as a one-man "caretaker" Government. Mr. Waiz Shah had previously headed the "Azad Kashmir" Government in 1951-52.

Settlement of Nekowal Incident.

Mr. Nehru announced on July 24 that the Pakistani Government had agreed in principle to pay Rs.100,000 for the relief of the families of the 12 persons killed in the Nekowal incident (see 14303 A). The Pakistani Government, however, denied on Aug. 4 that it had accepted any liability to pay compensation, and Mr. Nehru confirmed on Aug. 10 that Pakistan did not accept responsibility for the incident but had offered to make an *ex gratia* contribution "as a special case."—(Indian and Pakistani High Commissioner's Offices, London - The Hindu, Madras - The Statesman, Calcutta) **(Prev. rep. Constitution, 12603 A; Relationship with India, "Azad Kashmir" Government, 13636 A; Indo-Pakistani Dispute, 14894 A; Kashmir Opposition Parties, 14656 A.)**

A. UNITED KINGDOM. — Fiduciary Issue Changes.

The following changes were made in the fiduciary issue during 1955: Jan. 11, £1,850,000,000; Jan. 18, £1,825,000,000; March 21, £1,875,000,000; May 23, £1,900,000,000; June 27, £1,950,000,000, July 18, £2,000,000,000; Aug. 22, £1,950,000,000; Sept. 5, £1,925,000,000; Dec. 5, £1,975,000,000; Dec. 14, £2,025,000,000. The December level was the highest ever recorded, comparing with £1,900,000,000 at the end of 1955.—(Economist - Financial Times) **(Prev. rep. 14636 C.)**

B. SWEDEN. — Bank Rate increased.

The Swedish Bank Rate was raised on Nov. 22 from 3½ to 4 per cent.—(Svenska Dagbladet, Stockholm) **(14175 D.)**

C. CANADA. — Education and Culture. - Proposed Creation of Canada Council for the Arts, Humanities, and Social Sciences. - Increased University Grants.

The Canadian Prime Minister, Mr. Louis St. Laurent, announced on Nov. 13 a number of important decisions by the Federal Government in the spheres of education and culture. They were:

(1) The Cabinet would recommend to Parliament that annual federal grants to the Canadian universities, at present provided on the basis of 50 cents *per capita* per province, should be doubled to help the universities to meet their present financial difficulties, which prevented their adequate development. Moreover, all federal grants would in future be handed over for distribution to the National Conference of Canadian Universities, instead of being distributed directly to individual universities as hitherto.

Mr St. Laurent explained that the latter decision had been taken in order to dissipate fears, especially prevalent in Quebec, that the Federal Government intended to tamper with the freedom of individual institutions or wished to encroach on the jurisdiction of Provincial Legislatures in the field of education.

(2) The Cabinet would propose to Parliament the creation of a Canada Council for the Arts, Humanities, and Social Sciences, as recommended by the Royal Commission under the chairmanship of Mr. Vincent Massey which reported in 1951 (see 11724 B).

Mr. St. Laurent explained that the Council would be an independent body with the functions of stimulating and helping voluntary organizations in the fields of the arts, the humanities, and the social sciences; of devising and administering a system of scholarships in these fields, so as to foster Canada's cultural relations with other countries; and of performing the functions of a national commission for Unesco. To meet the Council's expenses, the Federal Cabinet would ask Parliament to approve an endowment of $50,000,000, thus enabling the Council to finance its activities from the annual income derived from the investment of that capital.

In addition, the Council would take over another function not envisaged by the Massey Commission—viz., of making capital grants to Canadian universities equal to 50 per cent of the cost of specific building or capital equipment projects, with proper regard to the population of each province. For this purpose the Government would recommend another appropriation of $50,000,000 to be given to the Council and to be distributed by it over a 10-year period.

According to reliable estimates (Mr. St. Laurent added), Canadian universities would have to devote over $350,000,000 to capital expenditures during the next ten years. The Federal Government felt it its duty to assist them to meet this urgent need, and to encourage others who might also be dependent on the services of university graduates to do likewise. The Federal Government was also confident that all provincial Governments would continue to increase their contributions in this field.

(3) In order to broaden the scope and functions of the National Museum, two museums would be created in the near future—the Canadian Museum of Natural History, and the Canadian Museum of Human History. The latter would portray the development, history, and activities of man in the Canadian environment, and would also include the National War Museum.—(Montreal Star) **(Prev. rep. 11724 B.)**

D. UNITED KINGDOM. — Monopolies Commission.

Mr. Richard Francis Levy, Q.C., Recorder of Margate, was appointed chairman of the reconstituted Monopolies Commission on Oct. 19 in succession to Sir David Scott Cairns, Q.C., who had relinquished the post at his own request in order to return to his legal practice.

The President of the Board of Trade (Mr. Thorneycroft) announced on Nov. 23 that the following persons would serve as part-time members of the Commission for the periods stated: Professor G. C. Allen (Nov. 1, 1956, to Nov. 23, 1961); Sir Thomas Barnes (Nov. 1, 1956 to Nov. 22, 1959), Mr J A. Birch (Nov. 1, 1956, to Nov. 22, 1959); Mr. Brian Davidson (Nov. 1, 1956, to Jan. 19, 1960); Dr. L. T M Gray (Nov. 15, 1956, to Nov. 14, 1960); Mr. I. C. Hill (Nov. 1, 1956, to Oct. 16, 1957); Sir Frank Shires (Nov. 13, 1956, to Nov 12, 1959).

Apart from Dr Gray and Sir Frank Shires, the part-time members were all members of the former Monopolies and Restrictive Practices Commission—which, in accordance with the Restrictive Trade Practices Act, 1956, is now known as the Monopolies Commission.

Mr. Thorneycroft also announced on Nov. 23 that he had referred the following new subjects to the Commission: (*a*) the supply of cigarettes and of manufactured cigarette and pipe tobacco; (*b*) the supply of machinery for the manufacture and packaging of these commodities; (*c*) the supply of certain electrical equipment for motor vehicles.
(Board of Trade Journal) **(Prev. rep. 15145 A.)**

A. EASTERN GERMANY. — Political Developments, 1953-1956. - Ministerial and Party Appointments, Dismissals and Purges. - Government Reorganization. - The East Berlin Uprising. - Economic Concessions by East German Government. - Mass Exodus of Refugees. - Soviet Cancellation of Reparations, Return of German Industrial Enterprises, and Reduction of Occupation Costs. - Recognition of East German Sovereignty.

Political and other internal developments in Eastern Germany during the past three years are described below under cross-headings :

Governmental and Party Changes.

A number of leading personalities in the Government were dismissed, imprisoned, or replaced in a series of purges carried out from time to time by Herr Grotewohl, the Prime Minister, and the Socialist Unity (Communist) party, as summarized below.

Arrest and Imprisonment of Georg Dertinger. Herr Georg Dertinger, Foreign Minister in the East German Government since its formation in 1949, and a leading member of the Christian Democratic Union in Eastern Germany, was arrested on Jan. 15, 1953, on charges of " hostile activities against the German Democratic Republic carried out on behalf of imperialist espionage agencies " The State Secretary in the Foreign Ministry, Herr Anton Ackermann (a member of the Socialist Unity party), was appointed Foreign Minister *ad interim*, responsibility for decisions of basic importance being taken over by Herr Grotewohl.

Nothing further was known of the fate of Herr Dertinger until June 8, 1954, when it was officially announced that he had been sentenced to 15 years' hard labour on charges of " espionage for U S. and British intelligence agencies." It was also announced that a number of alleged accomplices of Herr Dertinger had been found guilty on similar charges and sentenced to the following terms of imprisonment : Dr. Eberhard Plewe, a retired judge—13 years ; Fräulein Ilse Bubner, private secretary to Herr Dertinger—11 years ; Dr. Helmuth Brandt, State Secretary in the Ministry of Justice—10 years , Herr Fritz Jentsch, financial manager of the Christian Democratic Union in Eastern Germany—seven years , Herr Zinsser, a former *Wehrmacht* officer and a personal friend of Herr Dertinger—three years. The announcement did not state when the trial of Herr Dertinger and the other accused persons had taken place.

Dismissal and Expulsion of Franz Dahlem. Herr Franz Dahlem, head of the organizational and staff department of the Socialist Unity party, and one of the leading East German Communists, was expelled from the party on May 13, 1953, for " political laxity towards the activities of imperialist agencies " and " an un-partylike attitude towards his own mistakes and shortcomings " He was simultaneously deprived of all his posts in the party, including membership of its Politburo and central committee. Herr Dahlem had been a well-known figure in the international Communist movement, having been leader in Paris of the exiled German Communists before the war

Dismissal and Expulsion of Max Fechner. - Dr. Hilde Benjamin appointed Minister of Justice. Herr Max Fechner, Minister of Justice since 1949, and a member of the central committee of the Socialist Unity party, was dismissed from his post on July 15, 1953, for " activities hostile to the State." He was succeeded as Minister of Justice by Dr Hilde Benjamin (known in Eastern Germany as " Red Hilde "), vice-president of the East German Supreme Court. A lifelong Communist, she was described by the Berlin correspondent of the *Manchester Guardian* as " the owner of an unequalled reputation for judicial savagery "

On July 27, 1953, the central committee of the Socialist Unity party proclaimed Herr Fechner " an enemy of the State and the party," and deprived him of party membership

Dismissal and Expulsion of Wilhelm Zaisser. Herr Wilhelm Zaisser, Minister of State Security since 1950, and Herr Rudolf Herrnstadt, Editor-in-Chief of *Neues Deutschland* (organ of the Socialist Unity party), were relieved of their posts on July 24, 1953 At its meeting on July 27 at which Herr Fechner was deprived of party membership (see above), the central committee of the Socialist Unity party issued a statement describing Herr Zaisser and Herr Herrnstadt as persons " hostile to the party and pursuing a defeatist line contrary to party unity." Both were formally expelled from the party—of whose Politburo they had been members—on Jan. 23, 1954

Wilhelm Zaisser (60), a veteran Communist, played a leading role during the Spanish Civil War under the name of " General Gomez." A close friend and associate of Lavrenti Beria (the former Soviet Minister of the Interior and secret police chief), he built up a secret police in Eastern Germany on lines laid down by Beria, whom he frequently visited in Moscow. Zaisser's disgrace followed the arrest and subsequent execution of Beria in the Soviet Union.

Simultaneously with Zaisser's dismissal, it was announced that the Ministry of State Security would become a State Secretariat in the Ministry of the Interior, headed by Herr Ernst Wollweber, a prominent Communist

Dr. Bolz appointed Foreign Minister. Dr. Lothar Bolz (a member of the National Democratic party), hitherto Minister of Construction, was appointed Foreign Minister on Oct. 1, 1953, in succession to Herr Dertinger, who had been arrested nine months earlier [As explained above, Herr Ackermann had been acting Foreign Minister during this period, though actual responsibility for foreign relations had rested with Herr Grotewohl.]

Herr Georg Handke, Minister of Foreign Trade and formerly East German Ambassador to Rumania, was appointed State Secretary and Deputy Foreign Minister on Oct. 29, 1953, in succession to Herr Ackermann. At its meeting on Jan. 23, 1954, at which Zaisser and Herrnstadt were expelled from the Socialist Unity party (see above), the central committee administered a strong reprimand to Herr Ackermann, accused him of assisting Zaisser and Herrnstadt, and expelled him from the central committee, though allowing him to retain his party membership.

Imprisonment of Dr. Hamann. An official announcement on July 14. 1954, said that Dr. Karl Hamann, formerly Minister of Supply, had been sentenced to ten years' hard labour for having " sabotaged the nation's food supply " by deliberately issuing false instructions, misdirecting large quantities of foodstuffs and consumer goods, and disorganizing the administrative work of his department. He was also accused of having had " criminal contacts with imperialist agents " The announcement added that Herr Paul Bender, formerly State Secretary in the Ministry of Agriculture, had been sentenced to six years' imprisonment, and three other officials to lesser terms. No indication was given of where or when the trial of Dr. Hamann and his staff had taken place.

Dr Hamann had been arrested and deprived of his ministerial post in December, 1952, after being blamed for food shortages Nothing further was known of his fate until the above-mentioned announcement of his trial and sentence. Prior to his arrest in 1952 he had been co-chairman with Dr Hans Loch of the Liberal Democratic party in Eastern Germany, but was relieved of that post after Dr. Loch had accused him of responsibility for the deteriorating food situation.

The Free Democratic Party in Western Germany announced on Oct. 16, 1956, that Dr. Hamann had been pardoned and released from prison. It was stated in Bonn that this information had been conveyed by the East German public prosecutor in a letter to Dr. Dehler, the leader of the Free Democrats in the Federal Republic [The Free Democrats—who maintain contacts with the Liberal Democrats in the Eastern zone—had for some considerable time been pressing for Dr Hamann's release.]

Government Reorganization. A reorganization of the East German Government was announced on Nov. 24, 1955, involving the following changes . (1) the Ministry for Heavy Industries was divided into three separate Ministries—for Mines and Foundries, the Chemical Industry, and the Coal Industry ; (2) Herr Walter Ulbricht, secretary-general of the Socialist Unity party, was appointed First Deputy Prime Minister (Herr Ulbricht had hitherto been one of seven Deputy Premiers, all theoretically possessing equal status) ; (3) Herr Fritz Selbmann, formerly Minister for Heavy Industry, was appointed chairman of a new co-ordinating Commission for Industry and Transport ; (4) Professor Fred Oelssner, a leading Marxist theoretician, became chairman of a new Consumer Goods Commission ; (5) Herr Willi Rumpf (a Communist), State Secretary in the Finance Ministry, succeeded Dr Hans Loch (Liberal Democrat) as Minister of Finance , (6) Dr Loch (who remained a Deputy Premier) was placed in charge of questions relating to All-German Affairs—a new post corresponding to the Ministry of All-German Affairs in Western Germany headed by Herr Jakob Kaiser ; (7) the State Secretariat for Internal Security reverted to its former status as a Ministry (i.e. to the status it held prior to Herr Zaisser's dismissal), headed by Herr Wollweber as Minister for State Security. The number of Deputy Premiers was raised from seven to nine by the appointment of Herr Selbmann and Professor Oelssner to that post.

The above-mentioned changes were followed on Jan. 20, 1956, by the appointment of Herr Willi Stoph as Minister of National Defence (see 14701 A), after the *Volkskammer* had approved legislation for the creation of a " people's army." Herr Stoph had relinquished his former post of Minister of the Interior on June 30, 1955, when he was succeeded by Herr Karl Maron (Inspector-General of the People's Police), but had remained a member of the Government as one of the Deputy Premiers.

Present Composition of East German Government. Consequent upon all the above-mentioned changes, including the appointment of Herr Stoph as Minister of National Defence, the composition of the East German Government was as follows in February 1956 : (abbreviations—SED , Socialist Unity Party (*Sozialistische Einheitspartei*) , CDU , Christian Democratic Union ; N.D.P., National Democratic Party ; L.D P., Liberal Democratic Party ; D.B.P , Democratic Peasant Party) ,

Herr Otto Grotewohl (SED) ..	Prime Minister.
Herr Walter Ulbricht (SED) .	First Deputy Premier.
Herr Willi Stoph (SED) .	Deputy Premier and Minister of National Defence.
Herr Otto Nuschke (CDU) .	Deputy Premier (no portfolio).
Dr Hans Loch (LDP) ..	Deputy Premier (All-German Questions).
Herr Heinrich Rau (SED)	Deputy Premier and Minister for Internal and External Trade.
Dr. Lothar Bolz (LDP) .	Deputy Premier and Foreign Minister.
Professor Fred Oelssner (SED)	Deputy Premier and Chairman of Consumer Goods Commission.
Herr Bruno Leuschner (SED) .	Deputy Premier and Chairman of State Planning Commission.
Herr Fritz Selbmann (SED)	Deputy Premier and Chairman of Industry and Transport Commission.
Herr Paul Scholz (DBP) ..	Deputy Premier and Chairman of Agricultural Commission.

Herr Karl Maron (SED) ..	Interior.
Herr Ernst Wollweber (SED) ..	State Security.
Herr Willi Rumpf (SED) ..	Finance
Herr Erich Apel (SED) ..	Heavy Engineering.
Herr Helmut Wunderlich (SED)	General Engineering.
Herr Richard Goschuetz (SED)	Coal and Power.
Herr Rudolf Steinwand (SED)	Mines and Foundries.
Dr. Hilde Benjamin (SED) .	Justice.
Herr Kurt Wach (SED) ..	Trade and Supply.
Herr Hans Reichelt (SED) ..	Agriculture and Forestry.
Herr Erwin Kramer (SED) .	Transport.
Herr Kurt Westphal (SED) ..	Food Industry.
Herr Friedrich Macher (SED)	Labour.
Herr Wilhelm Feldmann (NDP)	Light Industry.
Herr Luitpold Steidle (CDU) ..	Health.
Herr Heinz Winkler (CDU)	Construction.
Herr Friedrich Burmeister (CDU)	Posts.
Herr Fritz Lange (SED) ..	Education.
Herr Johannes Becher (SED) .	Culture.

The list of Cabinet Ministers given above, issued in February 1956 by the East German News Agency (A.D.N.), excluded the Minister for the Chemical Industry, who had not been appointed at the time.

"Rehabilitation" of Party Members. As stated on page 15088 (first column), the central committee of the Socialist Unity party decided in July 1956 to rehabilitate a number of former party members against whom disciplinary action had been taken in recent years. They included—of those mentioned above—Herr Franz Dahlem and Herr Anton Ackermann. Among others "rehabilitated" were Frau Elli Schmidt (formerly head of the German Democratic Women's Federation, a Communist organization), who had been appointed on Feb. 2, 1953, as chairman of a new State Commission for Trade and Supply, with ministerial rank, but who was subsequently reprimanded and removed from that post.

The East Berlin Rising of June 1953.

Demonstrations on June 16, 1953, by East Berlin workers protesting against an increase in their working "norms" developed on the following day into mass demonstrations against the Soviet occupation authorities and the Communist regime, in which tens of thousands of workers took part. Strong forces of Soviet tanks and infantry were called out, a curfew and martial law restrictions imposed by the Soviet Commandant in East Berlin, and many arrests made. Similar anti-Soviet and anti-Communist demonstrations occurred at the same time in many East German cities, a number of demonstrators being killed and injured in clashes with Soviet troops and the Communist "People's Police."

Some 3,000 building workers in East Berlin downed tools on June 16 in protest against the introduction of new "norms" which required 10 per cent more work from them without any corresponding wage increase. After marching in unorganized columns from the Stalinallee to the centre of the city, and being joined *en route* by large numbers of people, they demonstrated outside the East German Government's headquarters in the Leipzigerstrasse, calling for Herr Grotewohl and Herr Ulbricht and demanding free elections, the abolition of the "people's police," the abolition of the new working "norms," and increased food rations. Herr Selbmann, then Minister for Construction, was shouted down when trying to address the demonstrators, but no incidents occurred and the crowds dispersed peacefully.

In the morning of June 17, however, thousands of factory workers, railway workers, and employees of public utilities—joined during the day by large numbers of the population, including many office- and shop-workers—again demonstrated in East Berlin for greater political and economic freedom, union with Western Germany, the withdrawal of Russian forces, the abolition of the Communist regime, free elections, and increased food supplies. The demonstrators—estimated at tens of thousands—again marched on the Government offices in the Leipzigerstrasse, shouting such slogans as "Down with Communism," "Down with Grotewohl and Ulbricht," "We want freedom," and "Russians go home." Strong forces of "People's Police" repeatedly charged the demonstrators and many clashes occurred, in which a number of people were injured.

When it was becoming apparent that the People's Police were losing control of the situation, the Soviet Commandant in Berlin (Major-General Dibrova) sealed off the Eastern sector from the rest of the city and called out strong forces of Soviet tanks, armoured cars, and lorry-borne infantry to restore order Later in the day he imposed a curfew from 9 p.m. to 5 a.m., banned all demonstrations, and announced that groups of more than three persons would be liable to arrest and immediate punishment under martial law regulations The curfew and other restrictions were maintained by the Soviet authorities for nearly a month, being lifted on July 12, 1953.

Stringent Soviet control of the borders of East Berlin and Eastern Germany made it difficult at the time to obtain precise information about the situation in the eastern sector of the city and in the Soviet zone generally. Although no large-scale clashes occurred in East Berlin between Soviet forces and the demonstrators, reports from West Berlin said that Soviet tanks had been stoned and that there had been a number of casualties, some fatal, when People's Police and Soviet troops opened fire on the crowds.

Reports of disturbances in a number of other East German cities, notably in Magdeburg, were confirmed on June 21 by the East German Minister of Railways (then Herr Kramer), who said that "provocateurs and bandits" had attacked "loyal" railway workers at Magdeburg, Halle, Gera, Stralsund, and Saalfeld. The East German News Agency announced on the same day that a large factory for converting brown coal (lignite) into briquettes, situated near Magdeburg, had been burned down in a fire caused by "hostile elements" Although the whole of Eastern Germany was sealed off by the Russian forces, reports continued to reach Western Germany of pitched battles in Magdeburg between anti-Communist demonstrators and People's Police, and of strikes and protest marches at Magdeburg, Leipzig, Dresden, Chemnitz, Halle, Jena, Brandenburg, Erfurt, Rostock, and other cities. *Neues Deutschland* said on June 19 that "Western agents" had "succeeded in persuading part of the population of the German Democratic Republic—in some cities a large number of the inhabitants—to cease work and demonstrate." The paper added that "groups of provocateurs" had tried without success to "assume control" of these demonstrations.

The East German Government issued a statement on June 18, 1953, saying that the disturbances in East Berlin "and in some parts of the Democratic Republic" had been "organized by fascist agents of foreign Powers, supported by the American radio station in West Berlin."

The statement said that the building workers, "with considerable justification," had protested against "the bureaucratic imposition of new working norms"; that these "norms" had been immediately withdrawn, thereby "removing the causes of the complaints"; and that in the meantime "fascist rowdies and agents, flooding into East Berlin by road, took advantage of the situation to try to provoke incidents, leading to a number of clashes." After the People's Police had been "repeatedly attacked by fascist rowdies," the Soviet Commandant had been obliged to intervene and declare a state of emergency. The statement accused "mercenary elements, agents of foreign States, and their German big business allies" of fomenting the disturbances, which, it was alleged, had been carried out "in accordance with a central plan drawn up in West Berlin." The threat was made that "provocateurs cannot expect lenience" and that the East German Government would "punish severely those guilty of causing the disturbances."

The East German News Agency announced on June 25 that 25 people had been killed and 378 injured in the disturbances. It was stated that the fatal casualties comprised 19 demonstrators, two civilian bystanders, and four members of the People's Police, while the number wounded consisted of 191 policemen, 126 demonstrators, and 61 bystanders.

Reports of mass arrests of anti-Communists, and of the execution of many demonstrators by the Soviet military authorities, continued to reach Western Germany from the Eastern zone during the last fortnight of June. No statements on these reprisals were issued either by the Soviet zonal authorities or the East German regime, except for an official announcement by the East German News Agency (June 18) that the Russians had executed a West Berliner, Willi Goettling. It was stated that General Dibrova had ordered Goettling's execution on the ground that he had acted "on the orders of a foreign Power as an active organizer of provocations and disturbances in the Soviet sector of Berlin."

The U.S., British, and French Commandants in Berlin sent a strong protest to General Dibrova on June 18, 1953, condemning "the irresponsible recourse to military force which resulted in the killing or serious wounding of a considerable number of citizens of Berlin, including some from our own sectors" The joint letter added: "We protest against the arbitrary measures taken by the Soviet authorities, which have resulted in the interruption of traffic between the sectors. We formally deny that Willi Goettling, executed after a travesty of justice, was an *agent provocateur* of a foreign Power. His condemnation to death and execution on an empty pretext appear to us as acts of brutality which will shock the conscience of the world . . . "

In his reply (June 21), General Dibrova rejected the Western Commandants' protest and alleged that the disturbances in East Berlin had been caused by "fascist agents in West Berlin." He said that the Soviet authorities would be ready to restore the normal life of the city if the Western Powers, on their side, took action to stop "criminal elements" from entering East Berlin.

Four West Berliners alleged to have been "the main organizers of the fascist *putsch* of June 17" were sentenced to long terms of imprisonment by the East German Supreme Court on June 14, 1954, after a four-day trial. All the accused persons had been missing from their homes in West Berlin for several months, and were believed to have been kidnapped and abducted to the Eastern sector.

The two principal accused, each of whom was given 15 years' hard labour, were Dr. Wolfgang Silgrad and Herr Werner Mangelsdorf. Dr. Silgrad, a refugee from Eastern Germany, was a member of the anti-Communist League of Human Rights in West Berlin, and had disappeared in February. Herr Mangelsdorf, formerly a police officer in Eastern Germany, released a number of prisoners from gaol during the Magdeburg uprising, subsequently fled to West Berlin, and had been sentenced to death *in absentia* by the Soviet military authorities. He had been missing from his home in West

Berlin since January, after going out to post a letter. Of the other two accused, Herr Fuldner (a merchant) was given ten years' hard labour, and Herr Gassa (an employee) was sentenced to five years. The Chief Public Prosecutor (Dr. Melsheimer) alleged that Silgrad, Mangelsdorf, Fuldner, and Gassa had acted on the orders of "espionage organizations" in West Berlin.

West German Reactions to Uprising in Eastern Zone.

The Soviet suppression of the East Berlin uprising aroused intense indignation in the German Federal Republic, where flags on all Government buildings were flown at half-mast for three days (June 18-20) in memory of those who had lost their lives. A memorial service for the victims, at which President Heuss delivered a commemorative oration, was held in the *Bundestag* on June 21 in the presence of Dr. Adenauer and all Cabinet Ministers, members of all West German parties except the Communists, Western diplomatic representatives, and the Papal Nuncio. In his memorial oration President Heuss described the East Berlin uprising as "an incalculable plebiscite" against the present rulers in the Soviet zone.

The West German *Bundestag* decided on July 1, 1953, to commemorate the East Berlin uprising by making its anniversary (June 17) a memorial day each year. During the debate, Dr. Adenauer said that although definite figures were not available, there was reason to believe that 62 people in Eastern Germany had been sentenced to death and 25,000 imprisoned after the uprising.

Dr. Adenauer, Herr Kaiser (Federal Minister for All-German Affairs), and members of both Houses of the Federal Parliament visited West Berlin on June 23, 1953, to attend the funeral service of seven victims of the uprising of July 17. The five-mile processional route to the cemetery was lined by 500,000 Berliners, many from the Eastern sector of the city, and a five-minute silence was observed throughout West Berlin and the Federal Republic at the moment of interment. Dr. Adenauer, in a funeral oration at the graves of the victims, gave a solemn pledge "in the name of the whole German people" that the Federal Government "will not rest or desist until Germans behind the Iron Curtain are free and united with us in freedom and peace."

Telegrams were sent by Dr. Adenauer on June 22, 1953, to President Eisenhower and the British and French Prime Ministers (then Sir Winston Churchill and M René Mayer) appealing to them to do all in their power to realize the unity of the German nation. The Federal Chancellor said that the uprisings in East Berlin and the Soviet zone represented "a passionate outcry against the ruling regime of terrorism and force Not even tanks and machine-guns prevented the tormented people from openly demanding freedom and justice. Many paid with their lives for their courage and bravery . . ."

In their replies, President Eisenhower, Sir Winston Churchill and M Mayer paid homage to the heroism of the people of East Berlin and Eastern Germany in their uprising against Communist oppression. They assured the Federal Chancellor that they would do all in their power to bring about the unification of Germany in peace and freedom, on the basis of free all-German elections.

U.S. Food Aid for Eastern Germany.

In a message to Dr. Adenauer on July 10, 1953, President Eisenhower offered $15,000,000 of American foodstuffs (grain, sugar, lard, and other commodities) to relieve the serious food shortage in Eastern Germany, and simultaneously appealed to the Soviet Government to co-operate in its distribution. The offer was rejected by the Soviet Government, and also by the East German Government.

In response to President Eisenhower's message, M. Molotov presented a Note to the U S. Embassy in Moscow on July 12 saying that the President was "incorrectly informed about the situation in Eastern Germany" and had obtained his information from "sources such as the U S. High Commissioner in Germany and Adenauer, the Bonn Chancellor, who are among those chiefly responsible for the violation of public order in East Berlin." The offer of U S foodstuffs for the East German people was described as "behaviour which would offend even the population of a colony, let alone the people of a lawful democratic government," and as "a propaganda manoeuvre which has nothing in common with the true interests of the German people."

Herr Grotewohl issued a statement on the same day describing President Eisenhower's offer as "an insult," "a provocation," and an attempt "to use U.S. aid in order to organize espionage rings" in Eastern Germany.

Despite the Soviet rejection of his offer, President Eisenhower nevertheless ordered large quantities of foodstuffs to be despatched by sea and air to Germany, for distribution by the authorities in West Berlin. Depots and stockpiles were accordingly established by the West Berlin City Government, which invited people in East Berlin and in the Eastern zone to collect food parcels from the Schöneberg Town Hall and other distributing centres.

The food distribution programme was launched on July 27 and ended on Oct. 10, 1953, during which period over 3,000,000 people from East Berlin and other parts of Eastern Germany crossed to the Western sectors and collected food parcels for themselves and their families. At the end of the 11-weeks' programme a total of 5,000,000 food parcels had been distributed, and it was estimated that 80 per cent of the people of East Berlin had obtained two rations per person. Of the total number of East Germans crossing into the Western sectors to collect parcels, 34 per cent were from East Berlin and 68 per cent from other parts of Eastern Germany. Many of the latter had come long distances—in some cases over 100 miles from Saxony, Thuringia, and other areas—bringing with them four or five identity cards enabling them to collect foodstuffs for relatives and friends as well as for themselves.

In the early stages of the food distribution programme the East German authorities made intensive but unsuccessful efforts to prevent the people of East Berlin and the Soviet zone from entering West Berlin to collect food parcels. Preventive measures included the tightening of border controls, the cancellation of rail tickets to West Berlin stations, and warnings to the population not to cross into the Western sectors In a number of cases members of the Socialist Unity party and the Communist "Free Youth" movement attempted to confiscate food parcels from persons re-entering East Berlin from the Western sectors, leading to clashes from time to time. In view of the popular anger at these methods, the East German authorities lifted the rail and border restrictions in the middle of August, and thereafter made little or no attempt to prevent people from crossing into West Berlin to collect food parcels.

Economic Concessions by East German Government.

In a speech to miners at Bohlen on June 24, 1953, Herr Grotewohl said that "fascist bandits and Western provocative elements" could not have met with success in East Berlin "if the dissatisfaction of the working masses had not provided the inflammable material." After declaring that "the guilt for the events of the past days rests with us," and not solely with "Western agents," he admitted that serious food shortages had been caused by the flight of "hundreds of thousands" of farmers to Western Germany; that the Government had pursued a mistaken policy in concentrating on industrial production at the expense of consumer goods; and that there was widespread and justified dissatisfaction with the existing economic conditions. Herr Grotewohl added that the Government had "drawn the necessary conclusions" from its mistakes and would take immediate measures to ameliorate the condition of the people.

In a statement on June 11, 1953, the East German Government had announced a series of measures "designed to correct the mistakes made by the Government and the administrative services in various fields, and to improve the standard of living of the workers and intellectuals, together with the farmers, craftsmen, and other sections of the middle class" It was admitted that "mistakes" in the distribution of ration cards, the collection of agricultural produce, and the collection of taxes had resulted in a "difficult situation" which, however, would be "immediately corrected." The specific measures announced were as follows :

(1) Existing restrictions on the issue of food ration cards would be lifted, and ration cards would be "distributed to all citizens of the German Democratic Republic and the Democratic sector of Berlin, as was done earlier."

[On May 1, 1953, ration cards had been withdrawn from large sections of the middle classes—including independent farmers, craftsmen, shopkeepers, employers of more than five persons, independent professional people, and house- and property-owners—on the ground that they were "non-productive." About 2,000,000 people were thereby threatened with starvation, and large numbers fled to Western Germany with their families An important contributory factor in the serious food shortage was the flight of large numbers of independent farmers to the West, as admitted by Herr Grotewohl in his Bohlen speech]

(2) "Forcible measures for the collection of overdue taxes and social security contributions" would be suspended "throughout the entire economy." This would apply "to farmers, craftsmen, shopkeepers, wholesalers, and private firms."

(3) Craftsmen, retail and wholesale traders, and owners of private building, industrial, and transport enterprises would have their concerns returned to them on application, and would be given short-term credits.

(4) "Harshnesses" in the social security system would be abolished, and benefits restored to their previous levels.

(5) Farms which had been expropriated on the basis of a decree issued on Feb 19, 1953, would be returned to their original owners.

(6) Persons who had fled to Western Germany and West Berlin would receive their property back if they returned, and would be reinstated in economic and social life "with full civil rights."

(7) Farmers who had "encountered difficulties in carrying on their activities and had thus left their holdings and fled the Republic" would have their farms restored to them if they returned. If, this was not possible, they would receive full compensation.

(8) The Ministry of Justice would "immediately review all arrests, prosecutions, and sentences in order to eliminate possible harshnesses."

[In conformity with this pledge, some 4,000 political prisoners were released during the following week.]

Further concessions were announced on June 22, 1953 (i.e. a week after the East Berlin riots), as follows :

(1) Rates of pay for workers would be restored to the levels prevailing on April 1, 1953, and the new working " norms " imposed on that date would be abolished.

[The " norms " introduced on April 1 had called for an additional 10 per cent increase in the output of every worker, with no corresponding increase in wages ; moreover, workers whose " norm " was not raised by the required 10 per cent became liable to forfeit 10 per cent of their wages]

(2) Old age, disability, and widows' pensions were increased by 15 to 20 per cent, and cheap travel fares restored for workers.

(3) A sum of 600,000,000 marks (about £50,000,000) would be diverted from investment in heavy industry to a new social housing programme.

(4) Another 70,000,000 marks (about £6,000,000) would be diverted to the improvement of sanitary conditions in State socialized industries, and to the construction of " hygienic and cultural institutions."

(5) The supply of electrical current to heavy industry would be cut in order to eliminate power-cuts for private households.

(6) Time spent away from work because of ill-health would not be deducted from paid holidays.

Exodus of Refugees to Western Germany.

Whereas 122,000 refugees from East Berlin and the Soviet Zone fled to the West in 1952, the figure totalled over 300,000 in 1953, over 184,000 in 1954, and over 252,000 in 1955. Up to the autumn of 1954 the great majority of the refugees fled in the first instance to West Berlin, whence large numbers were flown by air to Western Germany. The Federal Minister for Refugees, Professor Oberländer, announced in February 1956 that over 1,500,000 refugees from Eastern Germany had entered the Federal Republic since 1950.

The refugees from the Eastern zone included great numbers of young persons who fled to avoid conscription in the East German armed force or the People's Police, or forced labour in the Soviet-run uranium mines in Saxony. They also included tens of thousands of farmers, professional people, shopkeepers, and businessmen who had been dispossessed by the Communists, or were threatened with starvation by the withdrawal of their ration cards in May 1953 ; senior officials of Ministries and other Government departments, among them many Communists ; great numbers of workers ; and many engineers, technicians, and other scientific personnel.

A significant feature of the refugee exodus was the flight to the West of many thousands of members of the People's Police, both officers and men—over 2,300 in 1952, over 5,000 in 1953, and thousands more in 1954 and 1955, bringing the total to more than 10,000 by the end of the latter year. Particularly large numbers of People's Police fled to the West during and after the uprising of 1953 ; many of them expressed disgust at the brutal repression of the uprising by the Soviet forces and the Communist authorities, and at the complete subservience of the Communist regime to the Soviet occupation forces.

Among prominent individual refugees entering Western Germany were Colonel Siegfried Gerber, Chief of Shore Establishments in the East German naval forces (May 1953) ; Herr Hans Wermund, formerly chairman of the Liberal Democratic party, who had been removed from his post as State Secretary in the Ministry of Construction after the arrest of Dr. Hamann (July 1953) ; and Professor Johannes Herdegen, a Liberal Democratic member of the *Volkskammer* and professor of physics at Halle University (November 1955).

Colonel Gerber (37), the most senior East German official to seek refuge in the West, and a Communist of long standing, had been imprisoned in a concentration camp during the Nazi regime. Escaping to Russia, he joined the Red Army, became an officer in a Soviet tank unit, and after the war became Chief of People's Police in Rostock and later in Ludwigslust. In 1950 he was transferred to the embryonic East German naval administration, and at the time of his escape had been placed in charge of all East German coastal defences. He said that he had escaped because he was disgusted at the anti-semitic tendencies in the Soviet Union and Eastern Germany following the so-called " doctors' plot " in the U.S.S.R. (see 12728 A), and at the methods used to extract " confessions " from the defendants. These developments, the existence of concentration camps in Eastern Germany, and the enforced collectivization of agriculture, had made him finally realize that there was no difference whatever between Nazism and Communism.

Following the Slansky trial in Czechoslovakia (see 12685 A) and the " doctors' plot " trial in the U.S S.R., the Socialist Unity party launched a vicious campaign against " Zionists," " Titoists " and " Trotskyists," declaring that the " lessons " of those trials would be applied in Eastern Germany. The leaders of the small Jewish community in Eastern Germany, as well as many non-Jewish Communists, were denounced as " imperialist and Zionist agents " and accused of maintaining relations with the American-Jewish Joint Distribution Agency—the charitable organization known as " Joint," which had been bitterly attacked during the Slansky and " Jewish doctors' " trials in Czechoslovakia and the Soviet Union.

As a result of these threats, some 1,300 Jews from Eastern Germany —about one-half of all the Jews in the Soviet zone—fled to West Berlin during January 1953. They included Dr. Leo Zuckermann, head of President Pieck's Chancellery from 1949-51 ; Herr Julius Meyer, head of all Jewish communities in Eastern Germany, and a Socialist Unity deputy in the *Volkskammer* ; and the heads of the Jewish congregations in East Berlin, Leipzig, Dresden, Halle, Magdeburg, Erfurt, and Eisenach, accompanied in nearly all cases by their families. On arrival in West Berlin Dr. Zuckermann, Herr Meyer, and the other Jewish communal leaders said that they had fled to avoid arrest after being subjected to prolonged interrogation as to whether they maintained any contacts with Western organizations, received parcels from " Joint," etc

The Socialist Unity party's campaign against " Zionism " was subsequently dropped after M. Khrushchev's disclosure that the so-called " doctors' plot " had been " fabricated from beginning to end " by Stalin (see page 14995, second column).

In December, 1955, the new " political crime " of " incitement to flee the Republic " (*Republikflucht*) was added to the East German penal code on the initiative of Dr. Hilde Benjamin, the Minister of Justice. Aimed at checking the mass flight of East Germans to the West, it provided that anyone aiding or encouraging East German citizens to flee the country would become liable to severe penalties, including long terms of imprisonment with hard labour, without the right of appeal.

The first trial under this new law took place on Jan. 27, 1956, when the East German Supreme Court imposed the death sentence on three persons accused of espionage for the Western Powers and of aiding seven technicians and scientific workers to flee from Eastern Germany. The condemned persons were Max Held, a chemical engineering specialist, Werner Rudert, a shop steward, and Eva Halm, a typist. A fourth defendant (Joachim Sachse, a computer operator), tried for violation of the *Republikflucht* law but not for espionage, was given eight years' hard labour. In passing sentence, the presiding judge said that all four defendants had "incited" the technical and scientific workers concerned to flee to the West, an act which constituted " a crime against the State " and was tantamount to " economic sabotage." On Feb. 10 President Pieck commuted the death sentences against Held, Rudert, and Eva Halm to life imprisonment.

The addition of the new crime of *Republikflucht* to the East German penal code was regarded in Western Germany, and by Western press correspondents in Germany, as indicating the growing alarm of the East German Government at the mass exodus of refugees, and particularly of workers vital to the East German economy. Commenting on the sentences passed by the East German Supreme Court, the Bonn Correspondent of the *Manchester Guardian* wrote on Jan. 27, 1956 : " There can be little doubt that the trial, which lasted only a few hours and amounted to the travesty of justice usual in East Germany, has been inspired by the Government's desire to stop the flow of refugees to the West. The monthly average last year [i e. in 1955] of East Germans fleeing to the West was 20,000, and in the last four years some 250,000 young people of under 24 have come over to the Federal Republic. During recent months 45 per cent of the refugees have been under 24. East Germany simply cannot afford this exodus of young people. Nearly one-third of them have left jobs in industry, and another 15 per cent were agricultural workers The loss of increasing numbers of technicians may have been the most cruel cut of all for the economically shaky East German State . . . "

Criticisms of Administration of Justice. - Reprimanding of Dr. Benjamin, Herr Wollweber, and Dr. Melsheimer.

Following the new " anti-Stalinist " line adopted in Eastern Germany after M. Khrushchev's disclosures at the 20th Soviet party congress, Herr Grotewohl strongly criticized Dr. Hilde Benjamin and Dr. Melsheimer (the Chief Public Prosecutor) for failing to ensure strict regard for the law [see pages 14818-19], and announced that the Socialist Unity Party was setting up a special committee to investigate the administration of justice—which, he admitted, had frequently been "arbitrary" in the past. In its report, published in *Neues Deutschland* on June 21, 1956, this committee sharply rebuked Dr. Benjamin, Herr Wollweber (Minister for State Security) and Dr. Melsheimer for alleged malpractices in their departments, and, in particular, for allowing unfounded and unsubstantiated charges to be brought against innocent people, for classifying minor offences as serious crimes, and for introducing into trivial offences an " ideological element " which was completely inapplicable.

The report mentioned that ordinary factory accidents, or mistakes made by scientific and technical workers in all good faith, had occasioned many haphazard and unsubstantiated charges of " sabotage " by the Ministry of State Security, without any investigation of the circumstances. Moreover, such minor matters as driving offences and infringements of the traffic regulations had been dealt with by the Ministry of Justice as " an expression of the class struggle," and persons accused of such offences had been treated as if they had indulged in " class warfare." After severely censuring these two Ministries, and demanding that Dr. Benjamin and Herr Wollweber should rectify their mistakes, the report emphasized that all future accusations of " sabotage " must be carefully examined to

ensure that "no allegations are made against innocent and good-willed intellectual workers" merely on such external evidence as, for instance, a factory accident.

Herr Ulbricht announced on the same day (June 21,1956), that nearly 20,000 persons had been released since the amnesties announced in April 1956 (see page 14881). *Neues Deutschland* stated that they comprised 11,896 persons who had been convicted of ordinary civil or criminal offences, 3,308 war criminals, 3,169 persons serving sentences for minor political offences, and 691 Social Democrats imprisoned for "political crimes"—a total of 19,064.

Soviet Economic Concessions to Eastern Germany.

As a result of discussions between Soviet and East German leaders held in Moscow on Aug. 20-22, 1953, shortly after the rising in East Berlin, an agreement was signed whereby the U.S.S.R. undertook to cancel all reparations payments from Eastern Germany, to return industries taken over after the war, and to reduce Soviet occupation costs.

The talks were conducted on the East German side by Herr Grotewohl, Herr Ulbricht, Herr Otto Nuschke, Dr. Lothar Bolz, and a number of other Ministers, and on the Soviet side by M. Malenkov (then Prime Minister), M. Khrushchev, M. Molotov, Marshal Bulganin, M. Mikoyan, M. Kaganovich, and other members of the Soviet Government.

A joint communiqué, signed by Herr Grotewohl and M. Malenkov, said that "complete agreement" had been reached on "a number of political and economic measures aimed at assisting the further development of the economy of the German Democratic Republic and at raising the material well-being of its population." After stating that "the German Democratic Republic has conscientiously fulfilled its obligations towards the Soviet Union and . . is a major factor in the struggle for peace in Europe," the communiqué announced the following concessions by the Soviet Union to the German Democratic Republic

(1) The cessation of reparations payments from Eastern Germany as from Jan. 1, 1954.

(2) The transfer to the German Democratic Republic, without indemnification, of Soviet enterprises in Germany.

(3) A reduction in the costs of the Soviet occupation forces to "an amount not exceeding five per cent" of the East German State Budget

(4) The release of the German Democratic Republic from the payment of arrears for occupation costs incurred since 1945.

(5) The release of the German Democratic Republic from the payment of post-war State debts to the Soviet Union.

In addition, Herr Grotewohl and M. Molotov signed (1) agreements on economic and political questions, and (2) an economic protocol arising out of the above-mentioned concessions (the cancellation of reparations, etc.).

Political and Economic Agreements.

(1) The U.S.S.R. undertook to supply Eastern Germany during 1953 with goods to the value of 590,000,000 roubles ($147,500,000), including foodstuffs, coal, ferrous metals, copper, lead, aluminium, cotton, and other commodities.

(2) The Soviet Government would grant credits to Eastern Germany totalling 485,000,000 roubles, bearing 2 per cent interest per annum and repayable in two years, beginning in 1955.

(3) At the request of the East German Government, the U.S.S.R. would release German prisoners of war sentenced for war crimes, "with the exception of those who committed particularly wicked crimes against peace and humanity."

(4) Both Governments agreed to raise the status of their diplomatic missions in Berlin and Moscow to the status of embassies, and to exchange ambassadors.

Economic Protocol.

The Soviet Government, in agreement with the Polish Government, would cease as from Jan. 1, 1954, to exact reparations from the German Democratic Republic, whether "in the form of deliveries of goods or in any other form." The amount of reparations outstanding was given as $2,537,000,000 at 1938 world prices

(2) The Soviet Government would hand over to the G D.R. on Jan. 1, 1954, without compensation, 33 machine-building, chemical, metallurgical and other enterprises situated in Germany which had become the property of the U S.S.R. in payment of reparations, of a total value of 2,700,000,000 marks.

[The East German News Agency stated that the 33 enterprises to be handed over by the U.S.S.R. were amongst the largest in Eastern Germany and would include the former I.G. Farben synthetic petrol plant, the Leuna Chemical Works near Halle (also formerly belonging to I.G. Farben), and the former Krupp engineering works in Magdeburg.]

(3) The Soviet Government would "reduce the amount of expenditure of the German Democratic Republic connected with the presence of Soviet troops in Germany so that the sum of these expenses is not more than 5 per cent per annum of the revenue of the German Democratic Republic State Budget, and in any case not more than the total of occupation costs in 1949." In this connexion, the expenses of the German Democratic Republic for the maintenance of Soviet troops in Germany would total 1,600,000,000 marks in 1954, as compared with 1,950,000,000 marks in 1953 and with 2,820,000,000 marks in 1949.

(4) The Soviet Government would "completely free the German Democratic Republic from payment for debts for external occupation expenses which accumulated after 1945" The U.S S.R would also relieve the German Democratic Republic of the payment of State post-war debts to the Soviet Government

The Polish Government issued a separate statement announcing its agreement to the cancellation of reparations from Eastern Germany.

Soviet Recognition of East German Sovereignty. - Ending of Occupation Regime. - Retention of Soviet Occupation Forces in Eastern Germany.

It was announced in Moscow on March 25, 1954, that the Soviet Government recognized the German Democratic Republic as a sovereign and independent State conducting its own internal and external affairs; that the functions of the Soviet High Commissioner in Eastern Germany would be limited to security questions and to liaison with the Western Allied authorities on all-German questions; and that Soviet occupation forces would remain in Eastern Germany under four-Power agreements. The announcement said:

". . . Despite the efforts of the Soviet Union, no steps were taken at the Berlin Conference of Foreign Ministers [see 13433 A] to restore the national unity of Germany and to conclude a peace treaty In view of this state of affairs, and as a result of negotiations between the Soviet Government and the German Democratic Republic, the U.S S.R. believes it necessary to take . . . the following steps in the interest of the German people:

"(1) The Soviet Union assumes the same relations with the German Democratic Republic as with other sovereign States.

"(2) The German Democratic Republic will be at liberty to make its own decisions in internal and external affairs, including the question of relations with Western Germany. The Soviet Union will retain in the German Democratic Republic the functions connected with the guaranteeing of security arising from obligations resting upon the U S S.R. under Four-Power agreements.

"(3) The supervision of the activity of the State organs of the German Democratic Republic, hitherto exercised by the Soviet High Commissioner in Germany, will cease. In accordance with this decision, the functions of the Soviet High Commissioner will be limited to questions connected with security, and to liaison with the occupation authorities of the U.S A., the United Kingdom, and France on questions of an all-German character arising from Four-Power agreements on Germany."

M. Georgi Maximovich Pushkin, a former Ambassador in Budapest, was appointed Soviet Ambassador to the German Democratic Republic and High Commissioner in Germany on July 19, 1954, in succession to M. Semeonov, who had assumed ambassadorial status in September 1953 (see 13181 C). M. Pushkin informed Herr Grotewohl on Aug. 5, 1954, that the Office of the Soviet High Commission (at Karlshorst, the Soviet H.Q.) would be transferred to the Soviet Embassy in Berlin, all the buildings at Karlshorst being returned to the East German authorities. On the following day the Soviet Government annulled all decrees and ordinances issued by the Soviet military authorities in Eastern Germany between 1945 and 1953.

The West German *Bundestag* unanimously adopted a resolution on April 7, 1954, refusing to recognize the right of the Soviet Union "to create an East German State," and emphasizing that the Federal Government was the only freely-elected body of its kind in Germany and therefore had the sole right to represent the German people.

On April 8, 1954, the three Western High Commissioners in Bonn, on behalf of the British, French, and U.S. Governments, issued a declaration in connexion with "the statement issued on March 25 by the Soviet Government purporting to describe a change in its relations with the Government of the so-called German Democratic Republic." This stated (1) that the Soviet statement "does not alter the actual situation in the Soviet zone," where the Soviet Government "still retains effective control"; (2) that Britain, France, and the U.S.A. would continue to regard the U.S.S R. as the Power responsible for the Soviet zone of Germany, but would not recognize the sovereignty of the East German regime nor deal with it as a Government; (3) that they would continue to regard the German Federal Government as "the only freely elected and legally constituted Government of Germany."
(Der Telegraf, Berlin - Frankfurter Allgemeine Zeitung - East German News Agency, A.D.N. - Soviet Weekly - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times - New York Herald Tribune) **(Prev. rep. Eastern Germany, 15087 A; 14880 A; 14817 A; East German Government, 11090 A.)**

A. INDONESIA. — Corruption Charges against Mr. Abdulgani. - Rejection by Inquiry Commission. - Alleged Army Plot against Government. - Arrest of Conspirators. - Flight of Deputy Chief of Staff. - Surrender of Dar-ul-Islam Insurgents in Celebes.

Indonesian Army officers acting on the orders of the commander of the West Java Military District, Colonel Kawilarang, attempted to arrest the Foreign Minister, Mr. Abdulgani, at his house in Jakarta in the early hours of Aug. 13 on charges of alleged corruption. On being informed of this by Mrs. Abdulgani, the Prime Minister (Dr. Sastroamidjojo) immediately telephoned the Chief of Staff, Major-General Nasution, who ordered Mr. Abdulgani's release. Later the same day Mr. Abdulgani left for London to represent Indonesia at the first Suez Canal conference. The Deputy Chief of Staff (Colonel Lubis), however, publicly expressed his support for Colonel Kawilarang's action and condemned General Nasution's intervention.

Colonel Kawilarang, who was empowered to order arrests under martial law regulations in force in West Java, had ordered Mr. Abdulgani's interrogation in connexion with the case of Lie Hok-tay, the deputy director of the State Printing Office, who had been arrested on corruption charges. Mr. Makmur, Minister of Information in the Harahap Government of 1955-56, and Mr. Piet de Queljoe, director of the State Printing Office, were arrested in connexion with the same case on Aug. 14. Both Mr. Makamur and Mr. de Queljoe, as well as Mr. Lie Hok-tay, had alleged that Mr. Abdulgani was implicated in the matter.

[This was not the first occasion on which the Army had taken action against alleged corruption in Government circles; Mr. Gondokusumo, Minister of Justice in Dr. Sastroamidjojo's previous Cabinet, was arrested by military police in August 1955 (see 14448 A) and sentenced to 12 months' imprisonment in January 1956 for accepting a bribe. He was released on Aug. 27, his sentence having been reduced by President Sukarno.]

Dr. Sastroamidjojo warned Parliament on Aug 15 that certain groups were using the difficulties faced by the Government for political purposes, in order to overthrow it "in a non-parliamentary way." The allegation of corruption against Mr. Abdulgani, he said, was purely "sensational"—as was shown by the fact that the police investigating the Lie Hok-tay case had not even considered questioning him—and was obviously intended to weaken the Government. Every effort was being made to combat corruption, and the Minister of Justice was drafting an anti-corruption Bill which would shortly be placed before Parliament.

On his return from London Mr. Abdulgani made a statement before an inquiry commission of five Cabinet Ministers, none of whom was a member of the Nationalist Party, to which Mr. Abdulgani belongs. Dr. Mohamed Rum (First Deputy Premier, and a member of the *Masjumi*), who acted as chairman, announced on Aug. 31 that the commission had completely exonerated Mr. Abdulgani, who left two days later to join President Sukarno in his tour of the Soviet Union (see 15246 A). The Attorney-General, who was present at the inquiry, expressed complete agreement with the commission's findings.

In a broadcast on Oct. 5 General Nasution gave warning that there was a danger of a military *coup d'état* against the present Government.

The Chief of Staff said that many people were complaining because the welfare of the troops had been neglected, ex-servicemen were not being rehabilitated, and there was much talk of Government corruption. Some wanted a change of President, Government, or Chief of Staff, whilst others believed that "improvements can be brought about by arresting persons suspected of corruption, or by seizing power through a military junta." Colonel Nasution went on to attack unnamed persons who believed in "military rule as a means of bargaining power," and declared that Press reports of public dissatisfaction were one-sided, giving the impression that "all politicians, parties, and law enforcement officials were corrupt, and that corruption had pervaded the whole body of the Government." In reality, a special committee had already taken action to wipe out corruption in the Army, and the Government was discussing the draft of its anti-corruption Bill.

On Oct. 9 the Army's official spokesman, Lieut.-Colonel Pirngadie, announced the arrest of a number of officers who were alleged to have planned the overthrow of the Government and the setting-up of a military junta. The officers concerned, he stated, were drawn from all the seven military districts into which Indonesia was divided, and included senior officers at Jakarta and Bandung. According to unofficial reports, those under arrest included Major Djuhro, military commander of Jakarta, who had carried out the attempt to arrest Mr. Abdulgani. Lieut.-Colonel Pirngadie and Lieut.-Colonel Hassan, head of the Army intelligence department were subsequently relieved of their posts on Oct. 15, no reason being given for their dismissal.

Colonel Lubis, who had been charged with disobeying military orders, was ordered to appear before General Nasution for questioning on Nov. 9, but instead went into hiding. Two other officers accused of plotting to overthrow the Government were relieved of their posts at the same time. Army headquarters officially announced on Nov. 21 that documentary and other evidence showed that Colonel Lubis had organized a plot to overthrow the Government by armed force and to "change the ideology of the State," and that he would be charged with desertion. [Colonel Lubis was the leader of the officers' movement which forced the resignation of Dr. Sastroamidjojo's previous Government in 1955—see 14448 A].

The pro-Government newspaper *Merdeka* reported on Nov. 15 that the plot had been formed by a group of officers at Army headquarters and of units in West Java, with the support of politicians who had been defeated in the general elections. Its aims were stated to be the overthrow of Dr. Sastroamidjojo's Government, the removal of President Sukarno, and the arrest of a number of political leaders. The attempt to arrest Mr. Abdulgani, it stated, had been the conspirators' first move, and after its failure they had postponed the date for their intended *coup* first to Oct. 5 and then to Nov. 20.

During 1955-56 Government troops gained a number of successes against the various insurgent forces still active, notably in Celebes, where the majority of the *Dar-ul-Islam* rebels surrendered.

The *Dar-ul-Islam* revolt in South Celebes had begun in 1951 under the leadership of Kahar Muzakhar, a former lieutenant-colonel in the Army, who proclaimed the island part of an "Indonesian Islamic State" and established contact with similar Moslem rebel groups in Java and Sumatra. The rebel forces, which were believed to number 40,000 to 50,000, pursued a policy of systematically destroying villages and forcing their inhabitants to join them. On March 30, 1955, it was reported in Jakarta that 20,000 people had been rendered homeless by rebel raids, bringing the total number of refugees in South Celebes to about 1,200,000. The insurgents were said to be in control of large coastal areas at that time.

Combined operations by naval, land, and air forces in November 1955 expelled the rebels from these areas and forced them to take refuge in the hills. On May 15, 1956, Army headquarters reported that a rebel attempt to seize Macassar with the aid of sympathizers inside the city had been defeated with heavy casualties. Following these setbacks, some 35,000 insurgents forming the bulk of the rebel army agreed on June 1956, to lay down their arms in return for an amnesty. (Indonesian Embassy Press Office, London - Times - New York Times) **(Prev. rep. Army, 14533 A; Dar-ul-Islam Insurgents, 13364 B.)**

B. INDIA - PERSIA. — Cultural Agreement.

A cultural agreement between India and Persia was signed in New Delhi on Dec. 1 by Dr. Azad, the Indian Minister of Education, and Dr. Hekmat, the Persian Ambassador.

The agreement provided for exchanges of university teachers and members of scientific and cultural institutions; facilities for students of each country to study in the other; training facilities in either country's scientific, technical, and industrial institutions for Government employees of the other; the setting-up of cultural institutes; the award of scholarships; collaboration between Indian and Persian scientific, artistic, and literary societies; translations from Persian literature into the Indian languages, and *vice versa*, the establishment of University Chairs in subjects pertaining to the other country; distribution of books and periodicals, exhibition of films, exchange of radio programmes, etc.; encouragement of sports exchanges; and the non-application of Customs restrictions for the free movement of books (except undesirable literature of an obscene, subversive, or otherwise objectionable nature).

Article 7 of the agreement provided that both Governments would, "so far as it lies within their power," ensure that text-books prescribed for educational institutions, and history books in particular, did not contain any "errors or misrepresentations" about the other country, and that "due deference would be shown to the respective Heads of either country" Under Article 8 the two Governments agreed to facilitate the mutual recognition of university degrees, diplomas, and certificates.

The agreement will come into force 30 days after ratification. It will remain in force for 10 years, and will be continued thereafter until either party gives six months' notice of abrogation.—(The Statesman, Calcutta - The Hindu, Madras)

C. UNITED KINGDOM. — Remembrance Sunday.

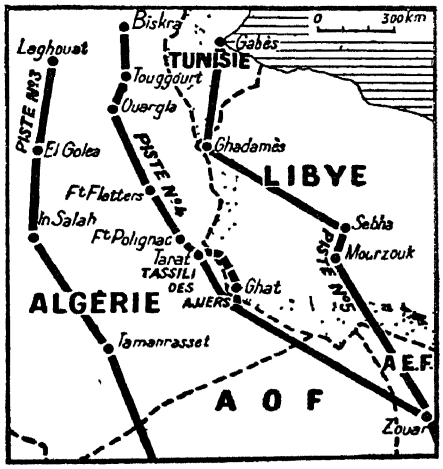
In accordance with an announcement made by the Prime Minister on June 21, 1956, with the approval of H.M. the Queen, Remembrance Sunday was observed on the second Sunday in November, and will always be commemorated on that day in future. Sir Anthony Eden had explained that the change was being made to avoid inconvenience resulting from the previous arrangement, under which Remembrance Sunday was sometimes observed on the first Sunday in November and sometimes on the second Sunday.—(Times) **(Prev. rep. 7959 D.)**

DECEMBER 22—31, 1956

A. FRANCE - LIBYA. — French Ratification of Franco-Libyan Treaty.

The French National Assembly voted on Nov. 22 in favour of ratification of the Franco-Libyan treaty of "friendship and good-neighbourliness" which had been signed on Aug. 10, 1955. A motion by M. Dronne (Social Republican *apparenté*) calling for the reopening of negotiations was rejected by 463 votes to 103, but the Assembly accepted by 433 votes to 150 an amendment by M. Isorni (Independent) providing that instruments of ratification of the treaty should not be deposited until agreement had been reached on the delimitation of the Algerian-Libyan frontier. The final voting on the ratification Bill was 411 to 120.

M. Daniel Mayer (Socialist), chairman of the Assembly's Foreign Affairs Commission, and **M. Pierre André**, on behalf of the National Defence Commission, both pointed out that ratification was "the lesser evil" because any French refusal to evacuate the Fezzan, as provided in the treaty, might lead to a Libyan complaint to the United Nations and might endanger the oil concessions granted by Libya to French petroleum interests. M. Mayer stressed, moreover, that in the Middle East crisis the Libyan Government had shown "considerable moderation compared with the extremist attitude of the majority of the Arab countries", had tried to stop the arms traffic to Algeria, and had even expelled the Egyptian Military Attaché. M. Pierre André, on the other hand, emphasized, that ratification without certain assurances on the delimitation of the Libyan-Algerian frontier would endanger French defence strategy.



The map shows the roads (*Piste No 4* and *Piste No 5*) which the French forces will be allowed to use under the Franco-Libyan treaty so as to maintain communications with French West and Equatorial Africa. The frontier in the Tarat-Ghat area will be rectified in favour of France to enable *Piste No. 4* to pass entirely through French-controlled territory. (*Le Monde*, Paris)

While Socialist and M.R P. spokesmen expressed support for the ratification of the treaty—though, in the words of M Briffod (Socialist), "without any particular enthusiasm"—ratification was strongly opposed by the Social Republicans and the Poujadists. For the Social Republicans, M Jacques Soustelle (the former Governor-General of Algeria), gave a warning that evacuation of the Fezzan would play into the hands of the Algerian rebels. Both he and M Pierre André expressed widely-felt resentment in the Assembly when he complained that although France was being asked to evacuate 450 men from a remote desert area in Southern Libya, Britain and the U.S.A were allowed to retain forces numbering 20,000 in Northern Libya, as well as airfields [see map] which would complete the direct link between Algeria and French West and Equatorial Africa. The Libyan Government had been asked to agree to a rectification of the frontier in that area which would leave the new road in Algerian territory

M. Maurice Faure (Secretary of State for Foreign Affairs), replying to the debate, emphasized that under the treaty no foreign troops would be allowed to replace the French garrisons in the three Fezzan oases, that France would still be allowed to use the important airfield linking Tunisia with the Chad territory in French Equatorial Africa; that the number of convoys and men that could use the route through Libya corresponded to what the French defence services had themselves proposed, and that France retained the right for a number of years to use three aerodromes. Moreover, Libya had agreed to renounce the rights inherited by her under the Laval-Mussolini agreement of 1935, and to recognize French rights in the Tibesti area [on the frontier with French Equatorial Africa], and negotiations were in progress on the delimitation of the frontier with Algeria, which was important both from the strategic and the economic points of view, especially because of the oilfields at Edjelé Ratification of the present treaty would, he thought, favourably influence these negotiations.

M. Faure also referred to the danger of a condemnation of France at the U N. if the treaty was not ratified, pointing out that France had no argument in her favour to justify the continued presence of her troops in the Fezzan. He stressed that Libya had shown herself friendly and had maintained a moderate position during the recent crisis in the Middle East.

M. Lejeune (State Secretary for the Armed Forces) stated that the Government had already taken a number of defence measures to make up for the loss of the Fezzan and to protect the Eastern Sahara. In particular, certain posts in S E. Algeria had been considerably reinforced; roads and aviation facilities greatly improved; and preparations made to build a new road between Tarat and Ghat

Article 4 of the Franco-Libyan treaty provides that both countries will take all necessary measures to maintain peace and security in the frontier areas, while Article 5 lays down that in the event of one of them being engaged in armed conflict or threatened by aggression, both countries would enter into consultations for the defence of their respective territories. Article 6 provides for the reinforcement of economic and cultural relations between the two countries.

Among the conventions annexed to the treaty, the most important referred to certain military questions Article 1 of this convention laid down that all French military forces would be evacuated from the Fezzan by Nov 30, 1956, at the latest. Under Article 2, the French forces would be replaced exclusively by Libyan forces. Article 3 stated that the Libyan Government would favourably consider French requests for transit facilities for military convoys coming from or going to the Chad territory. Under Article 4 the Libyan Government permitted France to use roads passing through Libya for the replacement, maintenance, and supply of the French posts at Fort Saint and Djanet. Article 5 laid down that the French Government would return to Libya the aerodromes at Seba, Ghat, and Ghadames, with all technical installations; that French technicians would, however, remain at these aerodromes; that Libya would grant transit and landing rights at the Seba aerodrome for five years, and at Ghat and Ghadames for two years; and that after the five-year period Libya would favourably consider any French request for the continuation of such rights at Seba

Another annexe to the treaty provided for rectifications of the Libyan-Algerian frontier in favour of France, while the other conventions referred to economic co-operation, good-neighbourly relations, and cultural questions.

The Council of the Republic approved ratification of the treaty on Nov. 29 by 196 votes to 92—the day before the time-limit for the evacuation of French forces from the Fezzan. (Le Monde, Paris) **(Prev. rep. 14570 B; 14376 C.)**

B. YUGOSLAVIA. — Three-Year Sentence of Imprisonment on M. Djilas.

M. Milovan Djilas, the former Vice-President of Yugoslavia, was sentenced to three years' imprisonment by a Belgrade court on Dec. 12 after being found guilty of conducting hostile propaganda and misrepresenting Yugoslav foreign and domestic policies in articles contributed to the foreign Press. Most of the two-day trial was held *in camera* at the request of the Public Prosecutor, on the ground that the case concerned Yugoslavia's foreign policy and her relations with foreign Powers.

The charges related to (*a*) a statement made by M Djilas to the *Agence France-Presse* on Oct 29, and (*b*) an article contributed to an American Socialist periodical—the *New Leader*, of New York—on Nov. 19. The Prosecutor alleged that in both cases M. Djilas had "discredited Yugoslavia at a time of serious international tension in Egypt and Hungary" by accusing the Yugoslav Government of "abandoning" Hungary and of betraying its own principles and national interests In his statement to the *Agence France-Presse* M. Djilas had criticized Yugoslavia's abstention at the U.N on the question of military intervention in Hungary, and had said that Yugoslavia was "threatened by the same imperialism which menaced the independence of Hungary," while in his *New Leader* article he had said that the events in Hungary marked "the beginning of the end of world Communism" Moreover, the Prosecutor alleged that M. Djilas had declared that power in Yugoslavia was in the hands of a bureaucratic class—an allegation described by the Prosecutor as "slander."

In calling for a "severe sentence" on M. Djilas, the Prosecutor read a statement, alleged to have been made by M Djilas during the preliminary investigation, in which he had said that his interview to the *Agence France-Presse* and his *New Leader* article were designed to influence world public opinion and, if possible, to cause the Government to change its attitude over Hungary. By his actions, the Prosecutor declared, M Djilas had "slandered the efforts made at developing democracy and Socialism in Yugoslavia," supplied "enemies of Socialist Yugoslavia with material to encourage them to exercise pressure on Yugoslavia from outside," and "damaged the basic interests of the Yugoslav people." In passing sentence, the court said that "the material sent abroad by Djilas for publication was mostly incorrect and helped certain foreign quarters to intensify their efforts to intervene in the internal affairs of Yugoslavia."

M. Djilas was defended by three Belgrade lawyers and, it was understood, received full facilities for his defence.

M. Djilas was sentenced to two years' hard labour on the above-mentioned charges. In addition he will also have to serve a third year in connexion with a sentence imposed on him in January, 1955, for criticizing the Government in an interview with a foreign newspaper, but suspended at the time.
(Tanjug Agency, Belgrade - Times - Manchester Guardian)
(Prev. rep. M. Djilas, 15258 A.)

A. UNITED KINGDOM. — National Health Service. - Guillebaud Committee Report on Cost of Service. - New System of Charges for Prescriptions.

The committee appointed in 1953 to inquire into the cost of the National Health Service published its report (Cmd. 9663) on Jan. 25, 1956. The report rejected any suggestion that there was widespread extravagance in the running of the N.H.S., and recommended a reduction in the charges for dental treatment and spectacles when financial conditions permitted, as well as an increase in capital expenditure on hospitals.

The committee consisted of Mr. C. W. Guillebaud, the Cambridge economist (chairman); Professor J. W. Cook, Principal of the University College of the South-West, Exeter (now the University of Exeter); Miss B. A. Godwin, a member of the T.U.C. General Council; Sir John Maude, Permanent Secretary to the Ministry of Health, 1940-45; and Sir Geoffrey Vickers, a former member of the National Coal Board. Its terms of reference were "to suggest means, whether by modifications in organization or otherwise, of ensuring the most effective control and efficient use of such Exchequer funds as may be made available, and to advise how, in view of the burdens on the Exchequer, a rising charge upon it can be avoided while providing for the maintenance of an adequate service."

The committee's findings and recommendations are summarized below:

The report pointed out that in practice there was no objective and attainable standard of "adequacy" in the health field. If the test were that the N.H.S. should be able to meet every demand justifiable on medical grounds, it was already inadequate, and considerable additional expenditure would be required to make it adequate. The Government must decide each year what amount of national resources might be allocated to the Service, having regard to the competing claims of other social services and national commitments, and once this had been done the aim must be "to provide the best service possible within the limits of the allocation."

"We have found no opportunity for making recommendations which would either produce new sources of income or reduce in a substantial degree the annual cost of the Service," the report stated. "In some instances, and particularly with regard to the level of hospital capital expenditure, we have found it necessary, in the interests of future efficiency, to make recommendations which will tend to increase the cost" While recognizing defects in the Service's organization and administration, the committee found that any charge of widespread extravagance, either in expenditure of money or use of manpower, was not borne out by the evidence

Charges. Reviewing the various charges imposed, the committee's conclusions were · (*a*) The 1s. prescription charge did not hinder the proper use of the Service by the great majority of the population, and its removal would not improve the Service to an extent commensurate with its cost. (*b*) The present charges for dentures should be retained so long as the number of dentists remained insufficient to meet the potential demands on their services. (*c*) The charge for dental treatment (£1 or the authorized fee, whichever was less) was impeding some people from using the Service, and a reduction of this charge should have the highest priority when additional resources became available. At present the committee did not recommend the abolition of the charge, but they strongly favoured the proposal that, if financial conditions permitted, it should be refunded to patients who had received comprehensive treatment, been made dentally fit, and sought treatment again within 12 months. This would overcome many objections to the existing charge, and also make an effective contribution to preventive health (*d*) The charge for spectacles constituted a barrier to some people who needed them, and it was therefore recommended that when resources became available a substantial reduction should have priority after an adjustment of the dental charge.

Organization. The committee were strongly of the opinion that it would be altogether premature at the present time to propose any fundamental change in the structure of the Service, as it was only beginning to grapple with the problems confronting it. What was most needed was a period of stability. The report rejected proposals for the appointment of statutory *ad hoc* authorities to administer hospital, practitioner, and local authority services; for transferring the hospitals to local health authorities, and for the appointment of a national board or corporation to administer the N H.S. "A service which costs the Exchequer more than £400,000,000 a year," the committee declared, "must be accountable, through a responsible Minister, to Parliament."

Hospitals. *Control.* The committee rejected the proposal that teaching hospitals should be transferred to regional hospital boards, on the ground that their separate status was a safeguard against the dangers of over-standardization and uniformity.

Finance. The main weakness of the present system of allocating funds to hospital authorities was the apparent lack of a consistent long-term objective. The committee were, however, opposed to block grants to hospitals for three- to five-year periods, as rises in wages, salaries, and prices of supplies, which could not be foreseen over such a period, could completely upset budgeting.

Capital Expenditure. The report emphasized that the present rate of capital expenditure, which averaged only one-third of the pre-war rate, was "totally inadequate" and "cannot be allowed to continue much longer without serious harm." In view of the advanced obsolescence of many hospitals and the large arrears of building work, £30,000,000 annually would be a desirable rate of capital expenditure in the seven years following 1957-58. At present boards had to seek Ministry approval of capital works costing more than £10,000, and the Ministry had to obtain Treasury approval of works costing more than £30,000; these limits, the committee recommended, should be raised to £50,000 and £100,000 respectively.

Hospital Charges. The committee felt that the case for a hospital boarding charge had not been made out, in view of the relatively low yield likely to be obtained, the cost of collecting the charge, and the strenuous opposition which would be aroused on humanitarian grounds. They accepted the provision of private accommodation in National Health Service hospitals for patients who needed it on medical grounds or were prepared to pay for it, and also the principle that the user of a pay bed, having contracted out of the free hospital service, should pay the full cost of the accommodation and services provided, while making his own arrangements for paying the consultant of his choice

Administration. The report recommended that there should be national provision for recruitment and training of administrative staff.

Family Doctors. The committee rejected a proposal that there should be a limited list of prescribable drugs. Every effort, however, should be made to stimulate doctors to review carefully their prescribing of expensive drugs and the quantities prescribed.

Duplication of names on doctors' lists was causing inflation at the rate of 300,000 to 350,000 cases annually, and in some areas the number of people on doctors' lists exceeded the estimated population. The existing central register was inadequate, and a central alphabetical index would appear desirable.

Dental Services. The report rejected the proposal that responsibility for the clinic dental services should be transferred from the local authorities to the health departments, but regarded it as essential that some balance should be kept in the levels of remuneration of the local authority services and the general dental service. In view of the increasingly acute shortage of dentists, the committee believed there was a *prima facie* case for the employment of dental ancillaries. Because of limitations imposed by finance, however, it would be impossible to contemplate an expansion of the service sufficient to meet all desirable needs, whether by training more dentists or by dental ancillaries.

Local Authority Services. *Old People's Homes.* The committee noted that the welfare authority had the responsibility of providing residential accommodation (including nursing care in certain circumstances) for aged persons who were unable to live in their own homes but were not in need of hospital treatment. There was a marked shortage of such accommodation, and further progress might be hindered by some local authorities' unwillingness to increase their rate burden. The committee therefore recommended that as soon as financial circumstances permitted, there should be a 50 per cent Exchequer grant towards capital and current expenditure on this type of accommodation.

Chiropody. When more resources became available, chiropody should be developed under the National Health Service.

Maternity and Child Welfare. The report expressed the view that maternity and child welfare services appeared to be "in a state of some confusion," and that the time had come for an appropriate body to review the whole of this field to find out precisely what services, medical and educational, were needed for mothers and young children, and how they could best be provided through the framework of the National Health Service

Cost of the Service. A detailed survey prepared for the committee by the National Institute of Economic and Social Research showed that the total public cost of the Service in England and Wales had increased from £339,600,000 in 1948-49 (including capital expenditure of £11,800,000) to £439,100,000 in 1953-54 (including capital expenditure of £8,800,000) When allowance was made for the falling value of money, this was equivalent to an increase in the net current cost (i e. excluding capital expenditure) from £327,800,000 in 1948-49 to £380,800,000 (at 1948-49 prices) in 1953-54, and the share of the gross national income required for the current cost had fallen from 3.51 per cent in 1948-49 to 3.24 per cent in 1953-54. Such figures, the report observed, disproved the widespread belief that there had been a vast increase in the cost of the Service, especially when it was taken into consideration that the population had increased by nearly two per cent between 1949 and 1953.

Forecasting future trends in Health Service costs, the report stated, was an impossible task. But if medical techniques, social conditions, and the character of the service were all to remain as at present, population changes between 1951 and 1971 might raise the cost of the Service by 8 per cent Of this increase, 4¼ per cent would be due to increased population and 3¼ per cent to changes in the balance of age groups within the population.

Minority Views. Reservations by two members of the committee were appended Miss Godwin recommended the abolition of all charges except that for dentures, and the integration of teaching hospitals into the general regional system, at least outside London. Sir John Maude advocated a single financial system covering the hospital and local authority services.

The Guillebaud report was debated on May 7 in the House of Commons, which adopted a motion taking note of it after hearing a statement by Mr. Turton, the Minister of Health.

Mr. Turton observed that the report had made it clear that economy and efficiency had increased since the Service began in 1948. Perhaps its greatest problem was the tripartite division of the administrative structure, as the problem of co-operation between the different branches, and even within them, was not yet fully solved. The Government agreed that there should not at the present time be (*a*) any transfer to other authorities of responsibility for hospital or general practitioner services, or any creation of new central or local authorities as recipients of particular functions; (*b*) any changes in regional hospital board areas, or any transfer to the boards of responsibility for teaching hospitals, or (*c*) any transfer of dental clinic services from local to dental health departments.

The committee had made a number of recommendations which, if adopted, would increase the charge falling on the Exchequer. It had long been felt, however, that expenditure was falling behind the need, and the Chancellor of the Exchequer had announced in February that the programme of hospital capital expenditure would not be affected by the cuts in capital expenditure. The Government was studying the question of what capital resources could be made available for further developments of the Hospital Service, as well as the committee's recommendations for modifications in the arrangements for charges, and for an Exchequer grant towards the cost of old people's homes.

Of an estimated total expenditure of £560,000,000 on the Health Service in England and Wales in 1956-57, about £320,000,000 was for the Hospital Service. A departmental costing system for hospitals of the acute or mainly acute types with an annual expenditure of £150,000 or more would be introduced from April 1, 1957.

One of the main causes of anxiety was the growing drug bill, the Minister continued. Expenditure on the pharmaceutical service had risen from £31,500,000 in 1949-50 to an estimated £52,750,000 in 1956-57, and the average cost of a prescription had risen during the same period from 3s 1d. to 4s 6d. The latter increase was due mainly to an increase in the proportion of proprietary prescriptions prescribed, which had risen from 16 per cent in 1949 to 36 per cent in 1956, and to the introduction of new drugs and preparations. A substantial saving would be possible if doctors did their best to see that, while no patient was deprived of necessary medicine, the medicines prescribed were no more expensive than was really required.

The quality of administration in the Service must depend on the quality of the hospital administrators, and schemes had been launched to ensure that the pool of administrative talent available was nation-wide and that every administrative officer had an opportunity to train and improve himself to the limit of his capacity.

As long as unlimited financial resources were not available, Mr. Turton concluded, the question of priorities would arise. There were in his opinion three main priorities: (1) the improvement of inadequate hospitals and the provision of new hospital accommodation, (2) the improvement of the mental and mental deficiency health services, and (3) the care of old people.

A new system of charging for National Health Service prescriptions—1s. for each item on a prescription, instead of 1s. for each prescription as hitherto—was announced by the Chancellor of the Exchequer on Oct. 25 (see 15216 A) as one of the Government's economy measures. Regulations for the increased charges for N.H.S. prescriptions were subsequently approved by the House of Commons, by 303 votes to 231, after Dr. Edith Summerskill (Lab.) had moved their rejection on the ground that they constituted "a discriminatory tax... imposed on the infirm and sick... in an arbitrary manner completely divorced from social and medical considerations."

A. CHINA - PAKISTAN. — Mr. Suhrawardy's Visit to Peking. - Discussions with Mr. Chou En-lai.

The Prime Minister of Pakistan, Mr. Suhrawardy, visited Peking at the Chinese Government's invitation from Oct. 18-29, during which he had discussions with President Mao Tse-tung and the Chinese Prime Minister, Mr. Chou En-lai.

A joint statement issued by the two Prime Ministers on Oct. 23 said that the talks, held in an "atmosphere of cordiality," had covered "a wide range of subjects" and had "contributed greatly to the strengthening of the existing friendly relations between the two countries." The statement affirmed their determination to assist in the maintenance of peace and the relaxation of international tension, and expressed the conviction that, given goodwill and sincerity, there were no international disputes that could not be settled peacefully. They reaffirmed their faith in the resolutions adopted at the Bandung Conference, and their readiness to promote friendly co-operation among the Asian and African countries. As a result of the talks, they had "reached a further appreciation of their respective problems," and were "prepared to do their best to facilitate their settlement on a basis of peace and justice." With a view to strengthening friendship between their two countries, they recognized "the need for the development of commercial and cultural relations, as well as friendly contacts."

The statement also announced that Mr. Chou En-lai had accepted an invitation to visit Pakistan.
(Pakistan High Commissioner's Office, London)

B. POLAND - SOVIET UNION. — Agreement on Status of Soviet Forces in Poland.

In conformity with the principles agreed upon during the Soviet-Polish talks in Moscow in November, an agreement regulating the status of Soviet troops in Poland was signed in Warsaw on Dec. 17 by M. Rapacki (Foreign Minister) and General Spychalski (Defence Minister), on behalf of Poland, and by M. Shepilov (Foreign Minister) and Marshal Zhukov (Defence Minister) on behalf of the U.S.S.R. The Polish Prime Minister, M. Cyrankiewicz, and the First Secretary of the Polish United Workers' Party, M. Gomulka, were present at the signing ceremony.

The agreement specified (1) that the numbers and locations of Soviet troops in Poland would be defined by special agreements between the two countries, (2) that no troop movements outside these locations would be permitted without Polish authorization; (3) that Soviet troops in Poland, and their families, would have to respect Polish law and would be subject to the Polish courts; (4) that persons committing crimes against Soviet military personnel would bear the same responsibility as for crimes committed against the Polish forces; (5) the Soviet Government would pay for any material damage which might be caused by the actions or negligence of Soviet military personnel in Poland, (6) the Polish Government, in return, would compensate the U.S.S.R. for damage to Soviet property caused by Polish nationals; (7) any disputes would be examined by a Mixed Commission, (8) the two Governments would appoint representatives to deal with any current problems arising out of the presence of Soviet troops in Poland.

The agreement stressed that "the temporary stay of Soviet troops in Poland can in no way affect the sovereignty of the Polish State and cannot lead to any interference in the domestic affairs of Poland."

The pact will remain in force as long as Soviet troops stay in Poland, but can be amended by agreement between the two countries at any time.—(Soviet Weekly - Polish Embassy Press Office, London) **(Prev. rep. 15242 A.)**

C. UNITED KINGDOM. — Melton By-election.

Polling took place on Dec. 19 in the Melton division of Leicestershire, the by-election being caused by the resignation of Mr. Anthony Nutting (Conservative), formerly Minister of State for Foreign Affairs, owing to his disagreement with the Government's Suez policy (see 15198 A). The result was as follows:

Pike, Miss Mervyn (Conservative) .. .	19,133
Masters, E. J. (Labour)	16,771

No change. Conservative majority 2,362.

Figures at the general election were: H. A. Nutting (C.) 30,074, K. F. Urwin (Lab.) 19,294—Conservative majority, 10,780.

The Conservative candidate received 53.29 per cent of the votes in the by-election and the Labour candidate 46.71 per cent, compared with general election percentages of 60.92 and 39.08 respectively—a Conservative decline of 7.63 per cent.

56.52 per cent of the electorate voted in the by-election, compared with 80.94 per cent at the general election. The electorate numbered 63,516, an increase of 2,530 since the general election.

Miss Mervyn Pike (38) is managing director of a firm of pottery manufacturers. She will be the 25th woman member of the House of Commons.—(Times - Daily Telegraph)
(Prev. rep. By-elections, 15194 A.)

D. SOUTH KOREA. — Treaty of Friendship, Commerce and Navigation with the United States.

A treaty of friendship, commerce and navigation between the Republic of Korea and the U.S.A. was signed in Seoul on Nov. 28 by the U.S. Ambassador, Mr. Walter C. Dowling, and the acting Foreign Minister of South Korea, Mr. Cho Chung Hwan. The treaty is based on the principle of "most-favoured-nation" treatment, with the following reservations: (*a*) each party reserved the right to place a limit on business activities in transport, communications, public utilities, banking (involving depository or fiduciary functions), or the exploitation of land or natural resources within its territories; (*b*) exchange restrictions could be imposed if either party to the treaty had difficulties in its balance of payments; (*c*) either party could impose restrictions on the entry of foreign capital.
(New York Times)

E. INDIA. — Akali Dal Constitution amended.

A general meeting of the *Akali Dal*, held at Amritsar on Nov. 24 under the chairmanship of Master Tara Singh (president of the *Dal*), decided that the *Dal* would in future "concentrate on and confine itself to the religious, educational, cultural, social, and economic betterment of the Sikhs." The meeting also decided to delete from the *Dal's* constitution a clause providing that no member of the *Dal* could join other political organizations without permission from the *Dal's* working committee.—(The Hindu, Madras) **(Prev. rep. 15132 B.)**

A. INDIA. — The Naga Rebellion.

Serious disorders, beginning in the spring of 1955, culminating in the summer of 1956, and continuing intermittently during the last months of the year, occurred among the Naga tribes in remote areas of Assam, leading to the despatch of Indian Army units to the area to restore order. The disturbances first broke out in the Tuengsang division (on the frontier of India and Burma), which is administered by the North-East Frontier Agency (N.E.F.A.), and subsequently spread to the Naga Hills district of Assam from January 1956 onwards. The affected area, most of which is mountainous and thickly forested, covers over 4,000 square miles and has a population of about 215,000. The disturbances were organized by a section of the Naga National Council—a body which, under the leadership of Mr. Zapu Phizo, has for some years been demanding the establishment of an independent Naga State.

The Nagas of India number about 400,000, divided into over 20 tribes differing widely in language and customs. The 150,000 Nagas of the Tuengsang division are the most primitive, and have not entirely abandoned the practice of head-hunting. Those of the Naga Hills district are more advanced, having been strongly influenced by Christian missionaries, and are the strongest supporters of the demand for independence. There is also a Naga minority in northern Manipur, and about 100,000 in the adjoining areas of Burma; neither of these latter groups gave active support to the separatist movement.

During the period of British rule, proposals for forming the hill tribes of the Indo-Burmese frontier into a separate British colony (the "Copeland plan") were put forward in 1946, in which year the Naga National Council was founded with official encouragement After the achievement of Indian independence the Council agreed to accept Indian suzerainty for a trial period of 10 years, but when the Indian Constitution (which provides for autonomous districts in the tribal areas of Assam) was adopted in 1949 the Naga leaders denounced it as a breach of faith. The Council thereupon adopted a policy of non-co-operation with the Government; no candidates for the three seats allotted to the Naga Hills in the Assam Legislative Assembly were put forward at the 1952 general elections, and it proved impossible to establish a district council in the Naga Hills, such as were formed in the five other autonomous districts The separatists' attitude was attributed to fears that the extension of Government control and improvement of communications might result in interference with their tribal way of life, and to the traditional hostility between the hill tribes and the Assamese. The Council's policy, however, was not universally supported among the Nagas, a large proportion of whom co-operated with Government projects for community development.

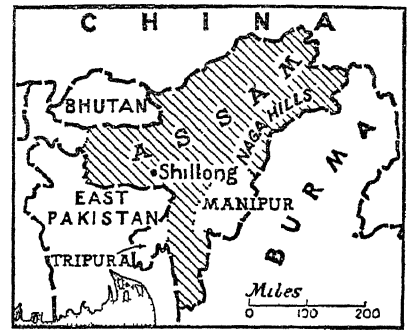
After visiting the North-East Frontier Areas in 1952, Mr Nehru had drawn up a report for the guidance of N E F.A. officials on relations with the tribal peoples, including the Nagas [The N.E F A is a direct responsibility of the Ministry of External Affairs, the strategic areas under its control being administered by the Governor of Assam on behalf of the President of India] In his report, which was placed before the House of the People on Sept. 30, 1955, Mr Nehru pointed out that the tribes differed greatly from each other, some being "rather primitive" and others "remarkably developed and advanced" He also emphasized that under British rule the tribal areas had been "almost completely cut off from the rest of India," and in consequence had "never experienced a sensation of being in a country called India." In these remote areas "New Delhi, with all its paraphernalia of government, seemed to be very far away"; on the other hand, in New Delhi itself there was "no intimate appreciation" of the existence, difficulties, and problems of the Naga tribal areas.

Criticizing the "legalistic and bureaucratic approach" of certain officials, which had led to "a certain lack of confidence among the tribal folk," Mr Nehru suggested that "the situation in the Naga Hills would have been much better if it had been handled a little more competently by local officers, and if some officers who were notoriously unpopular had not been kept there." While describing the demand for an independent Naga State as "absurd," Mr Nehru said that if the right type of officers were appointed the Nagas would respond fairly easily to a friendly approach; he added, however, that they were "proud and sensitive, and do not like being treated as subject people or being looked down upon in any way"

The disorders in the Tuengsang division began in March 1955 under the leadership of a certain "Hongking" (who was suspected to be Mr. Phizo himself), taking the form of attacks on members of the Assam Rifles—a semi-military border police force—and on loyal village headmen. Troops were sent to the district in April, and on July 20, 1955, following an increase in terrorist activities by armed gangs, it was officially declared a "disturbed area." After military operations extending over many months, in which nearly 300 people were killed, Mr. Nehru stated in March 1956 that conditions in the affected areas had returned to normal.

Mr. Phizo, who disclaimed all connexion with the disturbances, had met the Chief Minister of Assam (Mr. Medhi) at Shillong on Aug. 13, 1955, and, together with other Naga leaders, had signed a declaration condemning terrorism and promising that the Naga National Council would use peaceful methods only. In January 1956, however, shortly before the date fixed for a general meeting of the Council, Mr. Sakhrie, leader of the faction opposed to Mr. Phizo's methods and separatist aims, was kidnapped and murdered, and terrorist activities broke out in the Naga Hills district The Assam Government declared the district a "disturbed area" on Jan. 31, and subsequently issued a warrant for Mr. Phizo's arrest on charges of murder, rioting, abduction, and complicity in the murder of Mr. Sakhrie. New military operations were begun on Jan. 31 by the Assam Rifles and Indian police, and in March 1956 Army units were sent to the area at the Assam Government's request.

The rebels' activities took the form of the kidnapping or murder of headmen and teachers, the burning of schools and loyal villages, and attempts to disrupt communications by damaging roads, bridges, and telegraph lines Opposition to these methods led to a split among the Naga leaders, the dissolution of the Naga National Council by Mr. Phizo in May 1956, and the formation of a "Federated Naga Government" with its own "Parliament," under the nominal leadership of "Hongking" Mr Vilhoume, leader of the Naga "Home Guard Army," surrendered on May 27, and subsequently issued a statement, together with 14 other prominent Naga leaders, appealing for the reorganization of the Council on its original basis of non-violence



The Indo-Burmese border, showing areas affected by the Naga rebellion (*Economist*)

Mr Medhi told the Assam State Assembly on March 12 that Mr Phizo had issued leaflets promising his followers that he would obtain arms and ammunition "from outside," capture Shillong, and establish a Naga State completely independent of India In the Indian House of the People, Mr. Nehru said on April 3 that the rebels numbered about 1,500 and were estimated to possess some 500 serviceable guns and six light machine-guns, these had been taken from dumps left behind in the area after the war, and there was no reason to believe that arms had been obtained from any foreign source The local armed forces, he announced, would be placed under Army command, but the civilian authorities would remain responsible for the administration.

During April and May, 1956, Army and police forces under the command of Major-General Kochner carried out a number of successful operations, destroying three of the rebels' strongholds before operations were slowed down by the onset of the monsoon Mr. Nehru stated on May 30 that the general strategy for the present would be to post the armed forces in centres where they would be easily available to assist the population against intimidation, to organize loyal villagers for self-defence, and to enlist the active co-operation of the Nagas During June, however, the rebels intensified their activities around Kohima, General Kochner's headquarters, a civilian motor convoy was attacked near the town on June 11, and Kohima itself was raided during the night of June 13, six people being killed

The rebels, who were believed to be suffering from a shortage of supplies, made no offensive move between August and October, 1956, and on Aug 13 fighting broke out near Kohima between rebel factions who favoured and those who opposed the continuation of violence The number of persons surrendering to the authorities showed a marked increase during this period, and in the last week of September, for the first time, two villages submitted collectively, handing over the rebels in their midst together with their weapons. Other villages had consistently remained loyal despite intense rebel pressure, notably Khonoma (Mr Phizo's birthplace), the inhabitants of which held out successfully for several weeks although their water supply had been cut off by the rebels Nevertheless, several serious incidents were reported in November and December.

The Indian Home Minister, Pandit G. B. Pant, visited Assam from June 29 - July 1, 1956 for discussions on the situation with Mr. Medhi and high-ranking civil and military officials. New measures announced during July included the enrolment of a special constabulary, drawn from Naga volunteers; the creation of a new armed police force, the Naga Hills Battalion, to be permanently stationed in the area; the appointment of Mr. Kapoor (Educational Secretary in Assam) as Civil Commissioner to maintain liaison between the Army and the civil authorities; and the publication of a newspaper in several Naga dialects.

Pandit Pant stated in the House of the People on July 31 that 371 rebels had been killed, whilst the Army and police had lost 68 killed and 234 wounded. Strict instructions had been issued to ensure that the innocent should not suffer; villages which had been destroyed by the rebels or as a result of military operations were being rebuilt

with Government assistance. medical aid, food, clothing, and rehabilitation grants were being issued where needed; and relief camps had been opened. He emphasized, however, that there could be no political negotiations, either on the basis of Naga independence or before the Nagas abandoned violent methods Nevertheless, the Government's offer of an amnesty for those who surrendered their weapons remained in force, and any legitimate proposals would receive favourable consideration, as it was the Government's policy to encourage distinctive cultures and not to interfere with traditional ways of life

During a debate on Aug 23, **Mr. Reishang Keishang** (Socialist), the only Naga member of the *Lok Sabha*, appealed for a general amnesty, for talks with Naga leaders on the creation of an autonomous administration for the Naga areas, and for the despatch of a parliamentary delegation to the Naga districts The Naga National Council, he said, had repeatedly attempted to meet Mr. Nehru, but the Prime Minister had always insisted on conditions before a meeting Mr. Keishang also alleged that the Army had indulged in an "orgy" of rape, pillage, and murder, that 2,000 people whose villages had been burned down were starving in the jungle, and that over 500 were in prison.

In reply **Mr. Nehru** stated that most of the villages destroyed had been burned down by the rebels or had accidentally caught fire during military operations, and that the only villages burned by the Army had been those occupied by rebels The Army, he declared, had shown "remarkable patience in the face of considerable provocation," and all incidents had been investigated and the guilty punished He himself had met Mr. Phizo and other Naga leaders half-a-dozen times in the past, and each time Mr Phizo had subsequently represented the meeting as a concession to his claim for independence In consequence, he (Mr Nehru) had insisted that violence and the demand for independence must be abandoned before there could be any further meetings. An amnesty had already been proclaimed, the only persons excluded from it being those who had committed murder Mr. Nehru described the suggestion of a parliamentary delegation to the Naga areas as impracticable, since "a battalion would have to be sent to protect it."

Six Naga leaders who had repudiated Mr. Phizo's violent methods, and the demand for independence, met Mr. Nehru in Delhi on Sept. 15 and put forward proposals for the unification of all Naga areas in the Tuengsang division, Assam, and Manipur under a single administration. They claimed that nearly half the Naga people shared their views, and that, given the necessary facilities, it would be possible to win over the majority of the remaining half, with the exception of about 500 who formed the "core" of the rebel movement Mr. Nehru gave an assurance that as soon as peace was restored the Government would be willing to consider any change in the present set-up in full consultation with the Naga people, subject to the unity, integrity, and security of the Indian Union

Complaints against Mr. Phizo, for whose capture a reward of Rs. 5,000 had been offered, and 37 other rebels, four of whom were under arrest, were filed in a magistrate's court at Kohima on Oct. 1, 1956 A number of the offences charged against them were liable to the death penalty.—(The Statesman, Calcutta - The Hindu, Madras - Indian High Commissioner's Office, London - Times - Daily Telegraph - Manchester Guardian)

A. UNITED KINGDOM. — "Chambers's Journal" ceases Publication.

Chambers's Journal, the monthly magazine founded in 1832 and published in Edinburgh, appeared for the last time on Dec. 7, the decision to discontinue publication having been taken because of increased costs of production.

For 124 years *Chambers's Journal* had been distinguished by the high quality of its stories, verse, and essays, its many famous contributors having included George Meredith, Thomas Hardy, Maria Edgeworth, Miss Mitford, Harriet Martineau, Mrs Gaskell, Sir Walter Besant, Andrew Lang, W H Hudson, Stanley Weyman, and W W Jacobs. Its circulation, about 80,000 at the turn of the century, had dropped to 10,000

Chambers's Journal was the second oldest surviving magazine in Britain, the oldest being *Blackwood's Magazine* (founded in 1817), which, like *Chambers's*, made its first appearance in Edinburgh.—(Times - Daily Telegraph) **(Prev. rep. 10463 B.)**

B. GREECE. — Nationalization of Installations of Cable and Wireless Ltd.

It was announced in Athens on Dec. 17 that the installations in Greece of Cable and Wireless Ltd., the British-owned company which has operated Greek external telegraphic communications since 1866, would be taken over by the Greek Government on Jan. 1, 1957, in accordance with an agreement in 1952 which provided for the ending of the company's privileges by that date. Submarine cables to Malta and Alexandria would, however, remain the property of the company.—(Times)

C. FRANCE - EGYPT. — The "Athos" Incident. - French Allegations of Egyptian Aid to Algerian Insurgents. - Recall of French Ambassador in Cairo. - French Complaint to Seecurity Council.

A 400-ton motor yacht, the *Athos*, was intercepted by the French Navy off the Algerian coast on Oct. 16 while on its way to the Moroccan port of Nador, and was found to have on board 70 tons of arms intended for the Algerian insurgents. The French Foreign Ministry announced on Oct. 19 that, according to the evidence of the crew, the arms had been loaded in Alexandria during the night of Oct 4-5 by Egyptian soldiers in uniform, under the supervision of Egyptian Army officers. In addition to the crew, six young Algerians were discovered on board, who were reported to have admitted that they had received military training in Cairo and were on their way to take up commands in the Oran area with the rebel forces, for whom the arms were intended. This was the first occasion on which the French Navy had intercepted a large-scale attempt at gun-running in Algerian waters, only a few guns concealed in fishing-boats having been discovered previously

The *Athos*, a British-built vessel, had been used during the war as a minesweeper in the Royal Canadian Navy. Her nominal owner, a Sudanese, told the French authorities that the Egyptian Government had bought the yacht from him in 1954, and that he had previously taken part in an unsuccessful gun-running expedition in another yacht, the *Dina*, which was wrecked off the Algerian coast in February 1955. The cargo of the *Athos* included over 2,250 rifles, mostly of Canadian origin, 242 Italian machine-pistols, 74 Bren guns of British make, 40 machine-guns, mostly of German origin, 75 mortars, over 500,000 rounds of rifle ammunition, 1,860 grenades, over 2,000 rounds of mortar ammunition, anti-tank shells, mines, and other military equipment The material, worth 600,000,000 French francs (£600,000) at ordinary prices, and 2,000,000,000 francs at prices ruling in the international arms contraband market, would have been sufficient to equip over 3,000 men.

The French Government demanded an explanation from the Egyptian Embassy in Paris, which denied all knowledge of the matter. A communiqué issued by the Embassy on Oct. 20 pointed out that the mortars and almost all the rifles found on the *Athos* were Canadian, and that Egypt, unlike Israel, had never received any arms from Canada. The French Prime Minister, M. Mollet, announced in the National Assembly on Oct. 23 that as no satisfactory explanation had been received from the Egyptian Government, the French Ambassador in Cairo would be recalled He added that the French Navy had been ordered to patrol the Mediterranean systematically in order to intercept any further attempts at gun-running.

A formal complaint against Egypt was lodged with the Security Council on Oct. 25 by M. Cornut-Gentille, the French representative, who gave details of the seizure of the *Athos* in a letter addressed to the U.N. Secretary-General, Dr. Hammarskjold. "The facts," his letter concluded, "provide irrefutable evidence of the Egyptian State's direct responsibility in the rebellion in Algeria The Egyptian Government's intervention constitutes an attack on French sovereignty in flagrant violation of the fundamental rules of international law, which stipulates non-interference in the internal affairs of other States."—(Le Monde, Paris - Le Figaro, Paris)

D. UNITED STATES. — Suspension of Cultural Exchanges with Soviet Union.

The U.S State Department announced on Dec. 3 that, with the personal approval of President Eisenhower, the U.S. Government had suspended its programme of cultural exchanges with the U.S.S.R. in protest against the Soviet suppression of the Hungarian uprising. Under this programme (which had been started in the summer under a Presidential directive of June 29), over 100 Soviet nationals had been permitted to visit the U.S.A. in 1956, while 2,500 U.S. tourists had been granted visas to visit the Soviet Union. A State Department spokesman added that the cultural exchange programmes arranged with other East European countries (chiefly Poland) would continue to be carried out.—(New York Times) **(Prev. rep. Geneva "Summit" Conference, 14325 A, page 14330.)**

E. FRANCE. — Abolition of Homework.

A decree abolishing homework for school-children between the ages of six and 11 was issued by the French Government on Nov. 29, with effect from Jan. 1, 1957. Teachers were required to set aside one hour a day so that children could do the same work in class, and to furnish weekly progress reports to parents. (Le Monde, Paris)

A. SPORT. — Review of Sporting Events in 1956.

A review of the principal sporting events during 1956 is given below, covering cricket, association and rugby football, lawn tennis, rowing, athletics, and horse-racing.

Cricket.

County Championship. Surrey became county champions for the fifth successive year, the final Championship table being .

	P.	W.	L.	D.	First innings lead in match No. dec.	L.	D.	Pts.
Points awarded	—	12	—	—	—	4	4	—
Surrey	28	15	5	6	2	1	4	200
Lancashire	28	12	2	12	2	0	9	180
Gloucestershire	28	14	7	5	2	1	1	176
Northamptonshire	28	8	5	15	0	2	11	148
Middlesex	28	11	9	7	1	1	2	144
Hampshire	28	9	6	10	3	1	7	140
Yorkshire	28	8	7	10	3	4	6	136
Nottinghamshire	28	7	4	15	2	1	9	128
Sussex	28	7	10	9	2	2	5	112
Worcestershire	28	8	4	14	2	0	4	112
Essex	28	6	10	9	3	5	4	110
Derbyshire	28	7	6	11	4	0	4	102
Glamorganshire	28	6	9	9	4	2	5	100
Warwickshire	28	5	11	9	3	3	2	80
Somerset	28	4	15	8	1	3	4	76
Kent	28	4	12	10	2	1	2	60
Leicestershire	28	3	12	9	4	1	4	56

Surrey's feat in winning the County Championship five years in succession was unequalled since the inception of the Championship. Although Nottinghamshire shared the title with Lancashire in 1882 and won it outright in the four following years, no county had previously been champions for five years in succession. Surrey also achieved the distinction of being the first county since 1912 to defeat a touring side from Australia (see below).

England v. Australia Test Matches. The Australian touring team visited Britain during the summer and played five Test matches, of which England won two, Australia one, and two were drawn—England thus retaining the "ashes."

First Test. Match drawn. Scores · England 217 for 8 dec. (P. E. Richardson 81, P. B. H. May 73) and 188 for 3 dec.; Australia 148 (R. N. Harvey 64, J. C. Laker 4-58) and 120 for 3 (J. W. Burke 58 not out). Played at Trent Bridge, Nottingham.

Second Test. Australia won by 185 runs. Scores: Australia 285 (C. C. McDonald 78, J. Burke 65) and 257 (R. Benaud 97, F. S. Trueman 5-90, T. E. Bailey 4-64); England 171 (P. B. H. May 63, K. R. Miller 5-72) and 186 (P. B. H. May 53, K. R. Miller 5-80, R. G. Archer 4-71). Played at Lord's.

Third Test. England won by an innings and 42 runs Scores · England 325 (P. B. H. May 101, C. Washbrook 98); Australia 143 (J. C. Laker 5-58, G. A. Lock 4-41) and 140 (R. N. Harvey 69, J. C. Laker 6-55). Played at Headingley, Leeds.

Fourth Test. England won by an innings and 170 runs Scores . England 459 (Rev. David Sheppard 113, P. E. Richardson 104, M. C. Cowdrey 80); Australia 84 (J. C. Laker 9-37) and 205 (C. C. McDonald 89, J. C. Laker 10-53). Played at Old Trafford, Manchester.

J. C. Laker, of Surrey, performed the unprecedented feat for a Test match of taking 19 Australian wickets for 90 runs, including all ten wickets in Australia's second innings. [In the match in which Surrey beat the Australians, referred to above, J C. Laker took all 10 Australian wickets in one innings for 88 runs.]

Fifth Test. Match drawn. Scores . England 247 (D Compton 94, P B. H. May 83 not out, R. G. Archer, 5-53) and 182 for 3 dec. (Rev. David Sheppard 62); Australia 202 (K. R. Miller 61, J C. Laker 4-80) and 27 for 5 wickets (J. C. Laker 3-8). Played at The Oval.

The Australian touring team consisted of I. W. Johnson (Victoria), capt., K. R. Miller (New South Wales), vice-capt, R. G. Archer (Queensland), R. Benaud (N.S.W.), P. Burge (Queensland), J. Burke (N.S.W.), I. D. Craig (N.S.W.), P. Crawford (N.S.W.), A. K. Davidson (N.S.W.), R. N. Harvey (Victoria), G. Langley (South Australia), R. R. Lindwall (Queensland), K. Mackay (Queensland), L. Maddocks (Victoria), C. C. McDonald (Victoria), J. Rutherford (Western Australia), and J. Wilson (South Australia).

University Match. The 112th University cricket match was drawn. Scores: Cambridge 303 for 7 dec. (R. O'Brien 146) and 134 for 5 dec; Oxford 247 for 9 dec. (M. J. K. Smith 117, G. Goonesena 5-77) and 58 for 5 wickets.

M. J. K. Smith, the Oxford captain set up two new records in this match: (i) by becoming the first player to score a century in three consecutive University matches, and (ii) by scoring 477 runs in University matches, thereby exceeding the previous highest aggregate of 457 runs set up by the Nawab of Pataudi.

Retirement of Sir Leonard Hutton. Mr. Leonard Hutton (39), the Yorkshire and England captain, announced his retirement from first-class cricket on Jan. 17, 1956, on the advice of an orthopaedic specialist. In the course of his career he captained England in 23 Test matches against Australia, South Africa, New Zealand, India, Pakistan, and the West Indies; scored 39,950 runs for an average of 55.56; and hit 129 centuries. His biggest innings was his 364 against Australia in the fifth Test at The Oval in 1938. He was succeeded in the England captaincy by Mr. Peter May, of Surrey, who led England in the five Test matches against Australia in 1956. A knighthood was conferred on Mr Hutton in the last Birthday Honours List (see 14905 A)

Association Football.

Football League. League champions—Manchester United, runners-up—Blackpool; promoted to Division I—Sheffield Wednesday and Leeds United, promoted to Div. II—Grimsby Town and Leyton Orient (from Divisions III North and South respectively); relegated to Division II—Huddersfield Town and Sheffield United; relegated to Division III—Hull City and Plymouth Argyle.

Scottish League. League Champions—Glasgow Rangers; runners-up—Aberdeen, promoted to Division A—Queen's Park and Ayr United; relegated to Division B—Clyde and Stirling Albion.

International Championship. The international championship was shared for the first time by all four home countries, the final table being as follows .

	P.	W.	D.	L	Goals F.	A	Pts.
England	3	1	1	1	5	3	3
Scotland	3	1	1	1	4	3	3
Wales	3	1	1	1	3	4	3
Ireland	3	1	1	1	3	5	3

Results of championship matches were as given below:
Ireland 2, Scotland 1 (Belfast).
Wales 2, England 1 (Cardiff).
England 3, Ireland 0 (Wembley).
Scotland 2, Wales 0 (Hampden Park, Glasgow).
Wales 1, Ireland 1 (Cardiff).
Scotland 1, England 1 (Hampden Park, Glasgow).

International Matches against Foreign Countries. International matches were played by England against Brazil, Denmark, Finland, Germany, Spain, and Sweden, and by Scotland and Wales against Austria, with the following results:

England 4, Brazil 2 (Wembley).
England 5, Denmark 1 (Copenhagen).
England 5, Finland 1 (Helsinki).
England 3, Germany 1 (Berlin).
England 4, Spain 1 (Wembley).
England 0, Sweden 0 (Stockholm).
Scotland 1, Austria 1 (Hampden Park, Glasgow).
Wales 1, Austria 2 (Wrexham).

F.A. Cup. Won by Manchester City, who beat Birmingham City 3-1 at Wembley on May 5, 1956.

Scottish Cup. Won by Heart of Midlothian, who beat Glasgow Celtic 3-1 at Hampden Park on April 21, 1956.

F.A. Amateur Cup. Won by Bishop Auckland, who beat Corinthian-Casuals 4-1 at Middlesbrough (April 14, 1956) after a 1-1 draw at Wembley. Bishop Auckland won the Amateur Cup for the second year in succession and for the ninth time in the club's history.

Rugby Union Football.

International Championship. Won by Wales, the final table being as follows:

	P.	W.	L.	D.	Points F.	A.	Pts.
Wales	4	3	1	0	25	20	6
England	4	2	2	0	43	28	4
France	4	2	2	0	31	34	4
Ireland	4	2	2	0	33	47	4
Scotland	4	1	3	0	31	34	2

Results of the championship matches were as given below ·
Scotland 12 points, France nil (Edinburgh)
England 3 points, Wales 8 points (Twickenham)
France 14 points, Ireland 8 points (Paris).
Wales 9 points, Scotland 3 points (Cardiff).
England 20 points, Ireland nil (Twickenham).
Ireland 14 points, Scotland 10 points (Dublin).
Ireland 11 points, Wales 3 points (Dublin)
Scotland 6 points, England 11 points (Edinburgh).
Wales 5 points, France 3 points (Cardiff).
France 14 points, England 9 points (Paris).

County Championship. Won by Middlesex, who beat Devon by 13 points to 9 points at Twickenham on March 10, 1956.

University Match. Won by Oxford, who beat Cambridge by 9 points to 5 points at Twickenham on Dec. 6, 1955.

Lawn Tennis.

Wimbledon Championships. The Wimbledon Championships for 1956 ended as follows

Men's Singles—L. A. Hoad (Australia) beat K. R. Rosewall (Australia) 6-2, 4-6, 7-5, 6-4.

Women's Singles—Miss Shirley Fry (U.S A.) beat Miss Angela Buxton (Great Britain) 6-3, 6-1.

Men's Doubles—L A. Hoad and K. R. Rosewall (Australia) beat N Pietrangeli and O. Sirola (Italy) 7-5, 6-2, 6-1.

Women's Doubles—Miss Angela Buxton (Great Britain) and Miss Althea Gibson (U S.A.) beat Miss F. Muller and Miss D. G. Seeney (Australia) 6-1, 8-6.

Mixed Doubles—V. Seixas and Miss Shirley Fry (U.S.A.) beat G. Mulloy and Miss Althea Gibson (U.S A.) 2-6, 6-2, 7-5.

Rowing.

Henley Royal Regatta. The winners of the various trophies in the 1956 Royal Regatta were as follows :

Grand Challenge Cup—French Army beat Three Towns (Sweden) by one length in 7 min. 6 seconds.

Ladies' Plate—Peterhouse (Cambridge) beat Magdalene College (Cambridge) by a quarter of a length in 7 min. 41 seconds.

Princess Elizabeth Cup—Eton College beat St Paul's School by two-thirds of a length in 7 min. 25 seconds

Thames Cup—Princeton University (U S.A) beat the Royal Air Force by one length in 7 min. 10 seconds.

Stewards' Cup—Thames R C. beat London R C. by 3½ lengths in 8 min. 6 seconds

Visitors' Cup—Merton College (Oxford) beat Magdalene College (Cambridge) by two lengths in 7 min. 47 seconds.

Wyfold Cup—Royal Engineers beat Brockville R C. (Canada) by four feet in 7 min 56 seconds.

Silver Goblets—R. J. Thompson and G. M. Wolfson (Pembroke College, Cambridge) beat A. M Clay and W. H. Findlay (Marlow R.C.) by three lengths in 8 min. 45 seconds.

Double Sculls—S. C. Rand and W. H Rand (Royal Air Force) beat J. Marsden and D. V. Melvin (London R.C.) by 1½ lengths in 7 min. 47 seconds.

Diamond Sculls—T. Kocerka (Poland) beat T. A. Fox (London R.C.) by four lengths in 8 min 37 seconds

University Boat Race. The 102nd University Boat Race (March 24, 1956) was won by Cambridge, who beat Oxford by a length and a quarter in 18 minutes 36 seconds—the fourth fastest time in the history of the race

Athletics.

The Four-Minute Mile. Derek Ibbotson (Britain), competing at the White City on Aug. 6, 1956, in an athletics match against Czechoslovakia, equalled Dr Roger Bannister's record of 1954 by running the mile in 3 minutes 59 4 seconds Nine athletes have now run the mile in under four minutes :

J M. Landy (Australia) .	3 min. 58 sec.
W. Baillie (Australia) .	3 min. 58.6 sec.
Dr. Roger Bannister (Britain)	3 min. 58.8 sec.
L. Tabori (Hungary)	3 min. 59 sec.
R. Delaney (Eire) .	3 min. 59 sec.
G. Nielson (Denmark)	3 min. 59.1 sec.
G. D Ibbotson (Britain) .	3 min. 59 4 sec.
C. H. Chataway (Britain) . .	3 min. 59.8 sec.
B. S. Hewson (Britain) .	3 min. 59.8 sec.

Horse Racing.

The results of the five "classic" races and the Grand National were as follows :

The Derby. M Pierre Wertheimer's *Lavandin* (W. R. Johnstone) beat *Montaval* by a neck, with *Irish Ronstar* third. Run at Epsom on June 6, 1956

The Oaks. Madame L. Volterra's *Sicarelle* (F Palmer) beat *Januari* by three lengths, with *Yasmin* third. Run at Epsom on June 8, 1956.

St. Leger. Mr. R B. Strassburger's *Cambremer* (F. Palmer) beat *Hornbeam* by three-quarters of a length, with *French Beige* third. Run at Doncaster on Sept. 12, 1956.

2,000 Guineas. Mr. Anthony Samuel's *Gilles de Retz* (F. Barlow) beat *Chantelsey* by a length, with *Buisson Ardent* third. Run at Newmarket on May 2, 1956.

1,000 Guineas. Sir Victor Sassoon's *Honeylight* (E. Britt) beat *Midget II* by two lengths, with *Arietta* third. Run at Newmarket on May 4, 1956.

Grand National. Mrs. L Carver's *E S.B* (D. Dick) beat *Gentle Moya* by ten lengths, with *Royal Tan* third. Run at Aintree on March 24, 1956.

(Times - Daily Telegraph - Manchester Guardian) **(14610 A.)**

A. PAKISTAN. — Visit of Afghan Prime Minister.

The Afghan Prime Minister, Prince Mohammad Sardar Daud Khan, visited Karachi from Nov. 24 - Dec. 1 as the guest of the Pakistani Government, thereby returning the visit to Kabul by President Mirza in August last. During his stay Prince Daud Khan had important discussions with President Mirza and Mr. Suhrawardy, the Pakistani Prime Minister.

A joint communiqué issued on Dec 1 stated that the conversations had taken place "in an atmosphere of warmth and cordiality" and had "proved the value of personal contacts" The statement went on "These conversations have substantially contributed to a better appreciation of the respective views held in regard to the question of 'Pushtoonistan,' which has been a subject of discussion between the Afghan Prime Minister and the leaders of Pakistan. It is the intention of the two Governments to continue their efforts to remove all differences between the two countries through friendly discussions." It was also stated that Mr. Suhrawardy had accepted an invitation from Prince Daud Khan to visit Afghanistan.

A Foreign Office spokesman in Karachi said that the reference to "Pushtoonistan" merely took note of the fact that the Afghan Government regarded this "concept," which was "purely their own," as "the only political difference between Afghanistan and Pakistan." It had, however, been made clear to the Afghan Prime Minister that this concept was entirely unacceptable to Pakistan, since no such problem in fact existed.—(Pakistan High Commissioner's Office, London) **(Prev. rep. 15071 C.)**

B. RHODESIA AND NYASALAND FEDERATION. — Denationalization and Development of Rhodesian Iron and Steel Industry.

The Southern Rhodesian Government announced on Oct. 17 that it had reached agreement in principle with leading British steel manufacturers, the Messina (Transvaal) Development Company, and other British and Rhodesian financial interests to denationalize the Rhodesian iron and steel industry, which had been nationalized in 1942 (see 5632 C) when the Rhodesian Iron and Steel Commission (RISCOM) was set up.

The statement said that the Government, after a "most detailed investigation" which had included three independent technical reports, was satisfied that the denationalization of the Southern Rhodesian iron and steel industry, accompanied by an expansion programme in keeping with the country's development, was "in the best interests of the Federation," as it would not only give the greatest impetus to industrial expansion but would also enable the Federation to produce steel at a price comparing favourably with other world steel producers.

The technical reports had indicated that not only could this be achieved once a balanced unit had been created, but that when this stage of development had been reached profits could be made that would give a fair cash return to shareholders and at the same time would be sufficient to make an extensive contribution to the financing of further development as the Federation expanded. This policy, which conformed to that of all large steel concerns in the world, including those in South Africa, would be adopted by the new organization with the full support of the Southern Rhodesian Government The "vast improvement in production and management at RISCOM" had been "a major factor in bringing the present negotiations to a successful conclusion."

The main points covered in the agreement were as follows :

(*a*) Subject to the approval of the interested parties, a new public limited liability company, the Rhodesian Iron and Steel Corporation, would be formed as from Jan. 1, 1957, to control and develop the Rhodesian iron and steel industry. The participating interests would probably include the Lancashire Steel Corporation Ltd., Stewarts and Lloyds Ltd , the Colonial Development Corporation, the Anglo-American Corporation, Messina (Transvaal) Development Company, the Rhodesian Selection Trust, the British South Africa Company, and the Southern Rhodesian Government.

(*b*) The new corporation would be headed by a board of directors on which the Southern Rhodesian Government would be represented.

(*c*) No single participating company would have a controlling interest in the corporation.

(*d*) An initial development programme costing £8,000,000, the finance for which had already been secured, would be put in hand immediately. It contemplated the completion within four to five years of a well-balanced unit producing 150,000 tons of ingots a year and 500-600 tons of pig-iron for sale a week, rising later to 250,000 tons of finished steel. The programme, which had been timed to coincide with the production of power from the Kariba project, would include the erection of coke ovens, sintering plant, a large blast furnace, two additional open-hearth furnaces, and extensive alterations to existing rolling mills, as well as the acquisition of the Bukwe ore reserves

(*e*) The Lancashire Steel Corporation, together with Stewarts and Lloyds, would be directly responsible to the board of directors of the new Corporation for the development of the iron and steel works at Redcliff (Que Que) and Bulawayo.

(*f*) The Redcliff township, with the exception of the club and sports fields, would be retained by the Government, but the new corporation would hold a five-year option to purchase it at its book value of £800,000.

(*g*) The Rhodesian Steel Sales Co. Ltd , would continue to operate so as to ensure that iron and steel products were fairly distributed to consumers. A Government representative would join its board.

(*h*) A detailed independent investigation into the assets and stock of RISCOM had shown that, "subject to very minor adjustments," the Southern Rhodesian Government's present investment was fairly represented by physical assets. This investment would be re-invested in the new corporation, partly in equity shares and the balance in 4 per cent second debenture Stock maturing in 30 years. To assist the corporation in financing the new development programme, the Government had agreed to re-invest all the interest accruing to it during the first five years.

(*i*) The Government's iron-ore reserves would not be sold but, in lieu, a royalty would be paid by the Corporation on all iron-ore and lime extracted.

It was reported in the British press that the main objective of the scheme was to develop Southern Rhodesia's large iron-ore deposits, owned by the Government through RISCOM and by the Messina (Transvaal) Development Company. During the past two years production of finished steel had risen from 25,000 tons a year to 50,000 tons, while during October RISCOM had exported over 2,000 tons of pig-iron to South Africa for the first time.—(Federal Information Department, Salisbury - Times - Financial Times) **(Prev. rep. Steel Nationalization, 5632 C; Kariba Power Project, 14125 A; RISCOM, 14751 A.)**

A. UNITED KINGDOM. — The 1956 Trades Union Congress. - Abandonment of Wage Restraint Policy.

The 88th Trades Union Congress was held at Brighton on Sept. 3-7 under the presidency of Mr. W. B. Beard. The most important decision taken by the Congress was the outright rejection of the Chancellor of the Exchequer s appeal for wage restraint (see 15070 A) and the assertion of the trade unions' right to use their full bargaining strength, thus ending the period of co-operation between the T.U.C. and the Government which began in 1939. Other subjects discussed included automation, the 40-hour week, the Suez Canal dispute, the Cyprus situation, and the period of National Service

In his presidential address Mr. Beard emphasized the need for increased output and greater industrial efficiency, urged the Government to be more resolute in tackling the question of industrial investment, and outlined "the elementary principles of industrial decency" which should be put into practice in dealing with problems of labour redundancy.

Mr. Beard asserted that the "Tory policy of injecting money into the private purse," together with the elimination of physical controls, had increased luxury spending and inflationary difficulties, whilst the Government's encouragement of manufacturers to "rake the easy line of supplying the home market" had brought about a reduction in exports and made the balance-of-payments position more precarious. One way to greater industrial efficiency was a high level of industrial investment, but many firms and industries appeared unwilling to provide an adequate amount for this purpose. "There is no direction of investment by the Government," he declared, "or any evidence of compelling pressure on private industry to be up and doing in the markets of the world . The Government must be more resolute in tackling this question of investment, or must make way for those who will. Investment policy should involve full consultations with the trade unions, not only on the question of productivity, but also on its effects on employment, prices, profits, working conditions, and labour mobility. If a worker has to change his job or learn a fresh one, he should know as long a time ahead as possible If he has to leave his firm he should in some cases have fair compensation in line with previous service. These are elementary principles of industrial decency and must be put into common practice."

The more important subjects discussed and resolutions adopted by the Congress are summarized below under cross-headings

Abandonment of Wage Restraint Policy. The announcement that the General Council had rejected the Government's appeal for the continued exercise by unions of restraint in wage demands was made by Mr. Wilfrid Heywood, chairman of the T U.C Economic Committee, who introduced the section of the General Council's report dealing with economic policy and organization

After asserting that the Government's reliance on monetary instruments to reduce the pace of economic activity had already "yielded a crop of unemployment" in many industries, Mr Heywood recalled that the T.U.C had given repeated warnings that this policy involved "unnecessary hardships, discrimination against social investment of the best kind, and the rendering idle of some of the country's economic resources at a time when there is overwhelming need for higher production." He added : "It is plain that if our economic fortunes are to be determined by the pressure of market and financial forces, the efficient use of our resources and the continuation of full employment are bound to be in jeopardy. It is necessary to maintain a framework of controls as a protection against the fluctuations in world trade to which we are always exposed"

As regards the Government's "*sotto voce* suggestions that there should be wage restraint even in the past year, when prices have been rising," the General Council had replied that it was beyond their power "to devise measures which would prevent applications from being submitted if prices continue to rise." After attributing about one-third of the increase in the cost-of-living index since 1951 to changes in taxation policy and the reduction of subsidies, Mr Heywood referred to the Government's appeals to industry to stabilize prices, declaring that promises given by nationalized industries and other employers to hold prices constant could not be regarded as a reason for the withholding of wage demands. He added "We welcome action by the Government which effectively keeps down the general level of prices and relieves the pressure of the cost-of-living on the poorer section of the community But if this policy is to be the excuse for rejecting applications for better conditions without regard to the merits of those applications, then we are opposed to it. Congress will not at present accept a Government-induced wage restraint policy brought up the backstairs"

At the same time Mr. Heywood stressed, however, that union executive committees must act with responsibility, since trade unionists would admit, if they were honest, that much of their efforts in the past 10 years had been self-defeating "Generally, wages which leave us all where we were are an advantage to no-one except our competitors," he declared. "But equally a wages 'standstill' when prices are rising is out of the question So the General Council say that wage applications must be considered prudently and sensibly in the light of all the facts . We have the confidence to believe that our unions will conduct their affairs prudently and sensibly. That is the safeguard for full employment—reliance on the good sense of our members and executive committees."

Mr Frank Cousins, general secretary of the Transport and General Workers' Union, thereupon moved a composite resolution on wages policy, sponsored by the T G W U and supported by 11 other unions

The resolution (*a*) placed "a large measure of responsibility for recent inflationary trends" on the Government's "failure to maintain and improve the export trade", (*b*) declared that by abandoning economic controls the Government had "deprived itself of the most effective means of recovering control in a crisis", (*c*) asserted labour's right to bargain with capital on equal terms in order 'to protect the workers from the dislocations of an unplanned economy"; (*d*) rejected proposals "to recover control by wage-restraint and by using the nationalized industries as a drag-anchor for the drifting national economy", (*e*) warned the Government that reliance on monetary controls could not increase production but would "inevitably lead to erratic markets and to damage over wide fields of industry", and (*f*) instructed the General Council to make renewed representations to the Government for a return to a planned economy, based on effective economic controls

Mr Cousins maintained that the resolution did not represent "a sudden upheaval of thought within the trade union movement," but was "the result of a cumulative development." He complained that the Government had ignored representations about its economic policy made by the trade unions through the T U.C and the Joint Advisory Council, and stressed that the T G W U did not intend to rest content with passing resolutions Speaking of labour's claim to bargain with capital on equal terms, Mr Cousins declared "We say that in a period of freedom for all we are part of that all We are not prepared to stand down and see our conditions worsening . We are determined to reject proposals for controls by wage restraint, but we are not 'going on the rampage' "

In the ensuing debate Mr J Campbell (National Union of Railwaymen) said the Government's "*laissez faire* philosophy" was "incompatible with wage restraint," and declared that any union agreeing to the Chancellor's proposals would "cease to be a trade union and become a mere Government appendage" After Mr Arthur Horner (National Union of Mineworkers) had warned the Government that the N U M would not hold back claims because of price stabilization undertakings given by the National Coal Board, support for the motion was expressed on behalf of many other unions, including the Furniture Trade Operatives, the Chemical Workers, Tailors and Garment Workers, Constructional Engineers, Boilermakers, and Foundry Workers Mr Beard thereupon intimated that the General Council also supported the resolution, which was carried unanimously.

Automation. Opening the debate on this subject, Mr James Crawford (chairman of the T U.C. Production Committee) stressed that in the coming "period of quickening industrial advance" it would be fatal for Britain to lag behind, and that responsibility for keeping the economy healthy and buoyant rested with the Government, the employers, and the trade unions The unions favoured technical change, provided that in the transfer the conditions of their members were safeguarded Their greatest difficulty would probably be with the employers, and the field in which human relations problems could arise should be narrowed by bringing these problems as far as possible within the scope of formalized agreements between unions and management Meanwhile, the Government should encourage wise capital investment and more technical training "The unions want to co-operate if they can be brought in on the ground floor," Mr Crawford declared. "If the Government and the employers act in the right spirit, organized labour will face the change with courage, knowing that its members are being protected."

Congress then debated two composite resolutions, moved respectively by Mr. H L Haxell (Electrical Trades Union) and Mr A H. Knight (Association of Supervisory Staffs and Technicians). Mr Haxell's resolution (*a*) recognized that automation could bring about better living standards and greater leisure, (*b*) stressed, however, that trade union interests must be safeguarded against any "ruthless application of automation" by employers, and (*c*) called for full discussions between employers and workers before automation was introduced, so as to ensure proper consideration of recruitment and training policies, avoidance of redundancy, and maintenance of earnings.

Mr Haxell argued that the aspect of automation which would induce employers to invest their capital in it was the possibility of reducing labour costs by producing the same goods with fewer workers, and that it was "futile to imagine" that they would be motivated by "a desire to increase the size of the national cake or to improve the country's financial position." "It is sheer humbug to suggest that automation in a capitalist society will improve the lot of the people or the country's economy," he went on "On the contrary, in spite of the possibility of an apparent temporary improvement, ultimately it may well lead to higher profits, a reduction in the labour force required and in the purchasing power of the people, unemployment, and the economic crises which inevitably flow from these conditions Only under a planned economy can one expect the benefits of improved methods of production to be enjoyed by the whole community" The Labour movement must therefore force the Government and the employers to adopt measures that would simultaneously bring increased wages, improved purchasing power, lower prices, and a reduction of profit-margins.

Mr Knight's resolution (*a*) deplored the Government's "negative and muddled attitude" on automation; and (*b*) asked the General Council to call on the Prime Minister to set up a permanent Commission or National Planning Board for automation, under the control of a responsible Minister and including representatives of the T.U.C., employers, and scientists. The Commission should be charged

with (i) deciding when and where automation could be most efficiently introduced in the national interest, (ii) bringing about standardization of electronic equipment and control mechanisms, (iii) agreeing on procedures for joint consultation before new plant and equipment was introduced, (iv) proposing measures for compensation and protection against hardship

After debate, Mr Crawford stated that the General Council were investigating the probable impact of automation on industrial conditions, and advised the Congress to support the first resolution but to reject the second The E T U resolution was thereupon adopted with only two dissenting votes, the resolution of the Association of Supervisory Staffs and Technicians being rejected by 6,418,000 votes to 1,766,000

The 40-hour Working Week. The debate on this subject was initiated by Mr J Jarvie (Blacksmith, Forge and Smithy Workers' Society), who moved a resolution declaring the time opportune to achieve a 40-hour week Mr Jarvie argued that the present conditions of full employment placed the unions in a better bargaining position than they would occupy if unemployment returned and trade union organization became weakened Supporters of the motion included three Communist delegates—Mr Scott (Amalgamated Engineering Union), Mr Foulkes (Electrical Trades Union), and Mr Abe Moffat (National Union of Mineworkers)—whilst the main opposition came from the Transport and General Workers, General and Municipal Workers, and the Shop, Distributive, and Allied Workers.

Mr Frank Cousins, for the General Council, asked that the resolution should be withdrawn and redrafted He explained that although the General Council were in favour of the 40-hour week, it did not consider the time ripe for it and was not prepared to give immediate and automatic support to any union which sought to reduce working hours, regardless of circumstances

The resolution was nevertheless carried by 4,209,000 votes to 3,683,000

The Suez Canal Dispute. An emergency resolution, submitted by Mr C J Geddes (vice-chairman of the General Council) (*a*) affirmed that guaranteed freedom of navigation of the Canal to ships of all nations was essential to the maintenance and improvement of workers' living standards at home and overseas, (*b*) expressed the hope that the 18-Power plan to solve the Suez problem would lead to a speedy and satisfactory settlement, (*c*) demanded that if the talks failed, however, force should not be used until the question had been referred to the U.N Organization and its consent obtained The resolution was carried unanimously

The Cyprus Situation. The debate on Cyprus centred on a motion (sponsored by the National Union of Shale Miners and Oil Workers) calling for a peaceful solution of the problem based on (*a*) an end to repressive measures; (*b*) the release of all political and trade union detainees, (*c*) the return of Archbishop Makarios, (*d*) the withdrawal of British troops from Cyprus The motion was defeated by a large majority after Sir Vincent Tewson, for the General Council, had pointed out that the problem was not only a colonial one, and that the interests of Turkey had also to be considered

National Service. Mr. John Wood (National Union of Mineworkers) charged the General Council with failure to carry out the terms of the 1955 resolution calling for an immediate reduction in the National Service period. He called on Congress to instruct the General Council to "waste no more time waiting upon the Tory Government" and to make it clear that the T U C was "prepared to use the full powers of Congress to implement the resolution" A motion was thereupon moved by Mr. A G Tomkins (National Union of Furniture Trade Operatives) calling for a "speedy and progressive reduction in the period of compulsory service," and urging the Government to press actively for disarmament through the United Nations After debate, Sir Thomas Williamson accepted the motion on behalf of the General Council, and it was carried accordingly.

Relations with Trade Unions in Communist Countries. Sir Vincent Tewson reaffirmed that the T U C's "present limited contacts with unions in Communist countries must preclude association with the Communist-dominated World Federation of Trade Unions and trade union centres behind the Iron Curtain" He stressed that Communist unions were not free to determine their policies independently of the State, and that the T.U C must remain loyal to the non-Communist I C F.T U and avoid giving unions in the Colonies and underdeveloped countries the impression that it had "departed from its historic role of supporting democracy."

Congress then debated a resolution, sponsored by the United Society of Boilermakers and supported by the Association of Engineering and Shipbuilding Draughtsmen and the Constructional Engineering Union, which claimed that the disbanding of the Cominform and recent developments in the U.S.S.R made the time opportune for re-considering the relationship between the I C F T U. and the W F.T.U., "as many matters of common purpose could be resolved by discussions between these two organizations." After Sir Vincent Tewson had declared that the T U C.'s efforts to build up democratic unions in underdeveloped countries were being "deliberately sabotaged by the W.F.T.U," the resolution was defeated by 6,052,000 votes to 1,922,000.

Two further motions proposing closer relations with Soviet unions were discussed together. The first, sponsored by the Amalgamated Society of Woodworkers and supported by the Fire Brigades Union, proposed an approach to the Soviet unions "with a view to establishing closer relations" The second (sponsored by the National Union of Public Employees) suggested that a T.U C team should visit the U.S.S.R to examine Russian industrial techniques, and that Russian trade union leaders should pay a reciprocal visit to Britain. Sir Vincent Tewson pointed out, however, that both motions were contrary to the General Council's report, which distinguished between exchange visits to Russia for technical and cultural purposes and contacts in the organizational field; the motions were thereupon defeated, the first on a show of hands and the second by 4,638,000 votes to 3 412,000

All the members of the General Council were re-elected for 1956-57. The General Council elected Sir Thomas Williamson, general secretary of the National Union of General and Municipal Workers, as its chairman for the ensuing year in succession to Mr. Beard.—(Times - Manchester Guardian - Daily Herald)

A. AVIATION. — I.C.A.O. Conference. - New North Atlantic Joint Support Agreements on Greenland, the Faeroe Islands, and Iceland.

Two new agreements on the joint financing of certain air navigation services in Greenland, the Faeroe Islands, and Iceland were approved on Sept. 25 by a 14-nation conference convened in Geneva by the Council of the International Civil Aviation Organization (ICAO). The conference had opened on Sept. 6 under the chairmanship of M. Daniel Haguenau (France), being attended by representatives of Belgium, Canada, Denmark, France, Western Germany, Iceland, Israel, Italy, the Netherlands, Norway, Sweden, Switzerland, the U.K., and the U S.A.

The main features of the new agreements were as follows:

(1) The total cost of services for one calendar year would not exceed $1,076,562 for the Icelandic services and $1,234,525 for the Danish services The contracting Governments agreed to share 95 per cent of the approved actual costs of services in proportion to the "aeronautical benefits" derived by each Government, with Denmark and Iceland together paying 5 per cent of the charges in return for certain indirect benefits received. Proportions for each participating Government would be determined each calendar year by the number of complete crossings performed by its civil aircraft on routes between North America and Europe, north of the 40th parallel In this connexion, flights (*a*) between Greenland and Canada, the U S A. and Iceland, and between Iceland and Europe, would represent one-third of a crossing, and (*b*) between Greenland and Europe, Iceland and Canada, and Iceland and the U.S A., would represent two-thirds of a crossing.

(2) Provision was made for the joint financing, manning, and operation of air traffic, meteorological, aeronautical and telecommunication services, for radio navigation aids in Iceland, Greenland, and the Faeroe Islands, and for maintenance expenses of various services and stations

(3) The Council of the International Civil Aviation Organization would act in a purely administrative capacity, whereas previously it had itself concluded the financing agreements with Denmark and Iceland

The new agreements, which will come into effect on Jan. 1, 1957, supersede the agreement of Sept. 9, 1949, between the ICAO Council and Denmark (see 10068 D), and the agreement of Sept. 16, 1948, between the ICAO Council and Iceland (see 9514 B). It was announced by the Paris office of ICAO on Dec. 10 that both agreements had been signed by all the interested States.—(International Civil Aviation Organization, Montreal) **(Prev. rep. ICAO, 15122 A; North Atlantic Joint Support Agreements, 10068 D; 9514 B; 9007 A.)**

B. UNITED KINGDOM. — Press. - Merger of Birmingham Post and Birmingham Gazette. - Yorkshire Observer ceases Publication.

It was announced on Nov. 2 that the Birmingham Gazette and Despatch group of newspapers had been amalgamated with the Birmingham Post and Mail Ltd., that the *Birmingham Gazette* would cease publication as an independent newspaper on Nov 3; and that the combined paper would appear under the name of the *Birmingham Post and Birmingham Gazette.*

The *Birmingham Gazette*, founded in 1741 and Birmingham's oldest newspaper, was owned by Westminster Press Ltd. The other papers belonging to the Birmingham Gazette and Despatch group were the *Evening Despatch, Sunday Mercury, Sports Argus*, and *Sporting Buff.* The *Birmingham Post* was founded in 1857, the chairman of Birmingham Post and Mail Ltd is Lord Iliffe

The *Yorkshire Observer* in Bradford, which also belonged to the Westminster Press group, ceased publication on Nov. 3.

A statement by its proprietors, the Bradford and District Newspaper Company Ltd, said that for some years, "notwithstanding a steadily increasing circulation," the paper had been published at a substantial loss, and that the recent heavy increase in costs, mainly wages, had created a situation in which it was "no longer possible for the other newspapers published by the company to give the support necessary to enable the *Yorkshire Observer* to continue." As from Nov. 5 its title would be incorporated in that of the firm's evening paper, the *Telegraph and Argus*, which would include some of the main features of the morning paper, whilst the *Yorkshire Observer Budget*—a weekly—would also cease publication

The *Yorkshire Observer* had been founded in 1834 as a weekly and became a morning paper in 1868.—(Times - Daily Telegraph)
(Prev. rep. 14550 A.)

A. INDIA. — Governors of Reorganized States and Administrators of Union Territories. - New Ministries in Andhra Pradesh, Bombay, Madhya Pradesh, Mysore, Punjab, Rajasthan, and Orissa. - Economic Effects of Reorganization of Indian States.

The appointment of new Governors for several Indian States, including those reconstituted under the States Reorganization Act, was announced on Oct. 18, together with the Administrators of the Union Territories.

Gubernatorial Appointments.

Mr. Sri Prakasa (Governor of Madras) became Governor of Bombay in place of Dr. Mahatab, the new Chief Minister of Orissa; Dr. B. Ramakrishna Rao (Chief Minister of Hyderabad) became Governor of Kerala; Mr. Gurmukh Nihal Singh (Chief Minister of Delhi) became Governor of Rajasthan; and Miss Padmaja Naidu (a daughter of the late Mrs. Sarojini Naidu) became Governor of West Bengal in succession to the late Dr. H. C. Mukherjee.

Mr. C. M. Trivedi, Dr. Pattabhi Sitaramayya, and Dr. C. P. N. Singh (Governors of Andhra, Madhya Pradesh, and the Punjab respectively) continued in office as Governors of those States in their enlarged form, while the *Rajpramukh* of Mysore (Maharaja J. C. Wadiyar Bahadur, the former Maharaja of Mysore) became its first Governor. Mr. A. J. John, the former Chief Minister of Travancore-Cochin, was appointed Governor of Madras on Nov. 19.

Appointments in Union Territories.

The Government decided on Oct. 30 that its representatives in the Union Territories should bear the titles of Lieutenant-Governor in Himachal Pradesh, Chief Commissioner in Delhi, Manipur, Tripura, and the Andaman and Nicobar Islands, and Administrator in the Laccadive, Amindive, and Minicoy Islands.

Mr. Bajrang Bahadur Singh was appointed Lieutenant-Governor of Himachal Pradesh; Mr. K. P. Bhargava (Chief Commissioner of Bhopal) became Chief Commissioner of Tripura; Mr. T. G. N. Aiyar (Chief Commissioner of Coorg) became Chief Commissioner of the Andaman and Nicobar Islands, and Mr. T. Mone (Assistant Commissioner of the Andaman and Nicobar Islands) became Administrator of the Laccadive, Amindive, and Minicoy Islands. Mr. A. D. Pandit and Mr. P. C. Mathur retained the posts of Chief Commissioners of Delhi and Manipur respectively.

An advisory committee was subsequently appointed by the President to assist the Home Minister in the administration of Delhi. The committee, which will meet at least every three months under the chairmanship of the Home Minister, consists of the Chief Commissioner, all members of Parliament representing Delhi, the Vice-Chancellor of Delhi University, the president of the Delhi Municipal Council, and the senior vice-president of the Municipal Council. Similar advisory committees will be set up for Himachal Pradesh, Manipur, and Tripura.

New State Governments.

New Ministries were formed on Nov. 1 in the reconstituted States of Andhra Pradesh, Bombay, Madhya Pradesh, Mysore, the Punjab, and Rajasthan. In Kerala (formerly Travancore-Cochin), however, Presidential rule remained in operation. The Congress Central Parliamentary Board had advised the leaders of Congress Legislature parties in these States not to include more than 12 members in their Cabinets, and to give greater representation to minorities (including Moslems and Christians), women, the scheduled castes, and regional interests. The new Ministries are given below, together with a new Ministry in Orissa (which was not affected by the States reorganization):

Andhra Pradesh. Mr. N. Sanjeeva Reddi (Deputy Chief Minister of Andhra) was elected leader of the Legislature Congress Party on Oct. 21, defeating the Chief Minister of Andhra (Mr. Gopala Reddi), and formed his Ministry on Nov. 1. Mr. Gopala Reddi joined Mr. Sanjeeva Reddi's Ministry on Nov. 30, the final membership and allocation of portfolios being as follows: Mr. Sanjeeva Reddi (Chief Minister, General Administration, Information, Publicity, Elections Accommodation Control, All-India Services, Planning, and Transport); Mr. B. Gopala Reddi (Home Affairs, Courts and Prisons); Mr. K. V. Ranga Reddi (Revenue); Mr. K. V. Rao (Finance and Land Reforms); Mr. J. V. Narsinga Rao (Electricity and Irrigation); Mr. D. Sanjeeviah (Co-operation and Social Welfare); Mr. V. B. Raju (Industries, Commerce, and Labour), Mr. P. Thimma Reddi (Agriculture, Forests, Animal Husbandry, Fisheries, and "Grow More Food" Campaign); Mr. S. B. P. Pattabhirama Rao (Education); Nawab Mehdi Nawaz Jung Bahadur (Health); Mr. G. V. R. Naidu (Law and Religious Endowments); Mr. K. Brahmananda Reddi (Local Administration); and Mr. M. Narsinga Rao (Buildings, Highways, Excise, and Prohibition).

Bombay. Mr. Yeshwantrao Balwantrao Chavan was elected leader of the Legislature Congress Party on Oct. 16, defeating Mr. B. S. Hiray (Revenue Minister) after the Chief Minister, Mr. Morarji Desai, had refused to seek re-election. Mr. Chavan formed his Cabinet on Nov. 1 as follows: Mr. Chavan (Chief Minister); Mr. J. N. Mehta (Finance); Mr. Rasiklal Parikh (Revenue); Mr. M. M. Naik-Nimbalkar (Public Works); Mr. G. D. Tapase (Local Government), Mr. S. H. Shah (Education and Law); Mr. M. S. Kannamwar (Health); Mr. Dindayal Gupta (Labour); Mr. R. M. Adani (Prohibition, Village Councils, and Cottage Industries), Miss Indumati Chimanlal Seth (Social Welfare); Mr. B. J. Patel (Development, Electricity, and Housing), Mr. Mustafa Faki (Agriculture); Mr. V. P. Naik (Co-operation), Mr. B. G. Gadhe (Forests); and Mr. V. K. Sathe (Civil Supplies, Industry, and Printing Press).

Madhya Pradesh. A new 12-man Cabinet was formed by the 80-year-old Chief Minister, Pandit Ravi Sankar Shukla. Distribution of portfolios was announced on Nov. 3 as follows: Pandit R. S. Shukla (General Administration, Home, Publicity, Complaints, Planning, Development and Co-ordination); Mr. Takhtmal Jain (Commerce and Industries, including Road Transport, State Industries, and Agriculture), Mr. S. N. Shukla (Forests and Natural Resources); Dr. S. D. Sharma (Education, Law, Physical Education, and Tourism), Mr. Mishrilal Gangwal (Finance, Revenue, Economics, Statistics and Registration); Mr. B. R. Mandloi (Revenue, Survey and Settlement, Land Records, Land Reforms and Local Self-Government); Mr. S. L. Tewari (Roads and Buildings, Irrigation, and Electricity), Mr. V. V. Dravid (Labour, Rehabilitation, Housing, and Chambal Project), Mr. N. C. Singh (Tribal Welfare); Maulana Tarzi Mashriqui (Food, Civil Supplies, and Jails); Mr. Ganesh Ram Anant (Social Welfare, excluding Physical Education, and Co-operation), and Rani Padmavati Devi (Public Health). There will be 14 Deputy Ministers.

Mysore. Mr. S. Nijalingappa, who had been unanimously elected leader of the Mysore Legislature Congress Party, formed a Cabinet with the following members. Mr. Kadidal Manjappa, Mr. A. B. Naik, Mr. C. M. Poonacha, Mr. M. P. Patel, Mr. Jagannathrao Chandarki, Mr. R. Channigramaiah, Mr. A. B. Shetty, Mr. M. V. Rama Rao, Mr. H. K. V. Gowda, Mr. T. Mariappa, and Mr. H. S. Rudrappa. Two more Ministers were to be appointed later.

Punjab. A new Cabinet was formed by Sardar Pratap Singh Kairon, the former Chief Minister of the Punjab, who had been unanimously elected leader of the Legislature Congress Party of the enlarged State. Distribution of portfolios was announced on Nov. 12 as follows: Sardar Pratap Singh Kairon (Chief Minister, General Administration, Law and Order, Transport, Publicity, Anti-Corruption, Social Welfare, and Local Government); Mr. Brish Bhan (Planning, Community Projects, Justice, and Chandigarh Project); Mr. Sher Singh (Irrigation and Power); Mr. Mohan Lal (Finance, Industry, Food and Civil Supplies); Mr. M. C. Jain (Public Works, Excise, and Taxation), Mr. Gurbanta Singh (Agriculture, Animal Husbandry, Forests, Scheduled Castes); Mr. A. N. Vidyalankar (Labour, Labour Co-operatives, and Health); Mr. G. S. Bajwa (Education), Mr. Darbara Singh (Consolidation, Co-operatives [excluding Labour Co-operatives] and Political Sufferers); Mr. Harcharan Singh (Revenue and Panchayats), Mr. Prabodh Chandra (Relief and Rehabilitation, and Jails), and Mr. P. Singh Prem (Housing, Printing and Stationery, Language, and Sports). There will be eight Deputy Ministers.

Rajasthan. A new 10-man Cabinet was formed by the former Chief Minister of the State, Mr. Mohanlal Sukhadia. The other Ministers were: Mr. Ram Kishore Vyas, Mr. Bhogilal Pandya, Mr. B. S. Sharma, Mr. Amritlal Yadav, Mr. R. M. Mirdha, Mr. D. L. Vyas, Mr. B. P. Gupta, Mr. Ramchandra Chaudhry, and Mr. B. M. Sharma. There were four Deputy Ministers.

The new Cabinet included all the Ministers of the former Rajasthan State. Mr. Sharma was a Minister in the former Ajmer State.

Orissa. Following serious dissensions in the State Congress Party, the Chief Minister of Orissa (Mr. Nabakrushna Chaudhuri) resigned on Oct. 15 and was succeeded by Dr. Harekrishna Mahatab, who had resigned the State Premiership in 1950 to become Minister of Industry and Supply in the Central Government, and had been Governor of Bombay since 1955.

Dr. Mahatab formed a Ministry on Oct. 19 with the following members: Mr. Radhanath Rath, Mr. Satyapriya Mahanti, Raja Bahadur Kishore Chandra Deobhanj of Daspalla, and five Deputy Ministers. The membership of the new Ministry was the same as that of its predecessor, except that, in addition to the change of Chief Minister, one Minister and two Deputy Ministers were dropped.

Economic Effects of States Reorganization.

The effects of the States Reorganization Act on the linguistic position in certain States, and on their economic life, are summarized below.

Andhra Pradesh contains the vast majority of the 33,000,000 people speaking Telugu, which is the mother-tongue of more people in India than any other language except Hindi. The State's economy is largely dependent on two river systems, the Krishna and the Godavari, and the union of Andhra and Telengana will enable the two systems to be brought under unified control. Projects in progress or contemplated provide for the irrigation of about 5,700,000 acres, and for the development of Telengana's hydro-electric resources to reinforce Andhra's hitherto inadequate power supply.

Bombay in its reconstructed form contains about 26,000,000 people speaking Marathi and about 16,000,000 speaking Gujerati. Its position as a leading textile-producing State will be strengthened by the inclusion of Vidarbha, a fertile cotton-growing area with a flourishing textile industry centred on Nagpur. The new State also contains India's only atomic reactor plant, as well as important oil refineries.

Kerala, the smallest State in the Indian Union, has the highest population density per square mile and the highest literacy rate of any State It produces plantation crops such as rubber, tea, coffee, and pepper, and has large water resources which will permit the development of hydro-electric power. The Malayalam-speaking area transferred from Madras contains valuable forest lands

Madhya Pradesh possesses rich resources of iron, manganese, and other minerals, as well as large areas of forest land. An important part in the economic development of the State will be played by the Narmada Valley and the Bhilai Steel Projects (see 14103 A).

Madras, which was reduced in area by about one-sixth, became a compact linguistic unit, with less than 5,000,000 of its population of 30,000,000 speaking languages other than Tamil The areas transferred from Travancore-Cochin produce rice and salt and contain valuable thorium deposits.

Mysore gained an outlet to the sea for the first time by the transfer of certain coastal areas formerly included in Bombay and Madras. The State produces a wide variety of food and commercial crops, and is rich in hydro-electric power. It is the only State where gold is mined, and contains 80 per cent of India's silk industry.

The Punjab is expected to become an important grain-producing area with the completion of the Bhakra canal system (see 13789 A).

West Bengal was enlarged by the transfer from Bihar of 2,398 square miles of the Manbhum district and 709 square miles of the Purnea district. This transfer of territory, which did not materially affect the economy of either State, was not primarily based on linguistic considerations, but was dictated by the need to provide a connecting link between the northern and southern sectors into which West Bengal was divided by the partition of the former province of Bengal in 1947 The readjusted boundaries of West Bengal will facilitate direct communications between Darjeeling and Calcutta

The final decision of Mr. Viswanathan, the special commissioner appointed by the Government to demarcate the boundary in the Purnea district, was published on Oct. 30. (Hindustan Times, Delhi - The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London).

(Prev. rep. 15172 A.)

A. UNITED KINGDOM - UNITED STATES. — $500,000,000 Export-Import Bank Credit to Britain.

The U.S. Export-Import Bank announced on Dec. 21 that it had authorized a loan of up to $500,000,000 to the British Government. It was stated (*a*) that the loan, which would be in the form of a "line of credit," would be available "for the U.K.'s dollar requirements for U.S. goods and services, including dollar requirements for petroleum"; (*b*) that it would be made against the British Government's holdings of U.S dollar securities; and (*c*) that it would be available for 12 months. Repayments would begin three years after each disbursement, and would be made in semi-annual instalments over a period of 4½ years thereafter. The interest on each disbursement from the credit would be at 4½ per cent, payable semi-annually.

A spokesman of the Export-Import Bank (which is a U.S. Government agency for financing U.S. exports) stated that the loan could also be used for the purchase of oil from Venezuela; this was an exception to the Bank's normal procedure, but the bulk of Venezuelan oil was marketed by U.S. firms.

Negotiations for the loan had opened on Dec. 12, following the announcement by Mr. Macmillan (the U.K. Chancellor of the Exchequer) on Dec. 4 that he was prepared to use the British Government's holdings of U.S. dollar securities as collateral for a loan in the United States. The U.S. decision to grant the loan was preceded by the arrangements made between the British Government and the International Monetary Fund for large-scale dollar drawings by Britain against her quota in the Fund.—(Times - Financial Times - New York Herald Tribune)

(Prev. rep. 15260 A; 15239 A.)

B. EUROPEAN TRANSPORT. — Establishment of "Eurofima" Company.

The European Company for the Financing of Railway Stock (Eurofima) was formally constituted in Basle on Nov. 20, in the presence of representatives of the 14 participating European railway administrations. M. de Vos, Director-General of the Belgian Railways, was elected president of the Council of Administration, while M. Louis Armand (president of the French Railways) and Dr. Werner Hilpert (of the German Federal Railways) were elected vice-presidents Herr Fritz Schneider, a former departmental head of the Swiss Federal Railways, was appointed Director-General of Eurofima.

At its first meeting, held on the same day, the Council of Administration approved a purchase programme totalling 22,700,000 Swiss francs and covering the construction of 2,000 goods trucks.—(Neue Zurcher Zeitung - Le Monde, Paris)

(Prev. rep. 14521 C.)

C. RUMANIA - SOVIET UNION. — Moscow Discussions. - Retention of Soviet Troops in Rumania. - Soviet Economic Aid.

Following a week's discussions in Moscow between a Rumanian Government delegation led by M. Chivu Stoica (Prime Minister) and M. Gheorghiu-Dej (First Secretary of the Rumanian Workers' Party), on the one side, and Marshal Bulganin, M. Khrushchev, and other Soviet leaders on the other, a joint statement was issued on Dec. 3 announcing that full agreement existed on "the further development of economic relations and co-operation between the two fraternal Socialist States." The statement said, *inter alia*, that "in view of the international situation in Europe, the two Governments consider it expedient to maintain Soviet military units on Rumanian territory for the time being, in accordance with the provisions of the Warsaw Treaty."

After saying that the Soviet-Rumanian talks had been held "in a spirit of hearty friendship and complete mutual understanding," the statement mentioned the following matters on which full agreement had been reached:

(1) Both countries would "develop their mutually advantageous political, economic and cultural ties on the basis of full equality, independence and sovereignty, and non-interference in each other's internal affairs."

(2) After expressing support for the Soviet Government's declaration of Oct. 30 on the relations between the U.S.S.R. and other Socialist States (see page 1519, column 2), the statement added that "these principles are fully in line with the aims which the Rumanian People's Republic also sets for itself."

(3) The delegations recorded "full unanimity" of views on the present international situation, and were agreed that "disputed international issues must be resolved only on the basis of the principle of peaceful co-existence of States and by patient negotiations."

(4) After condemning the "aggression" of Britain, France, and Israel against Egypt, "which has only recently cast off the yoke of colonialism and is striving to consolidate her freedom and national independence," and demanding the immediate withdrawal of the British, French and Israeli forces in accordance with U.N. resolutions, the statement said that the U.S.S.R. and Rumania "support Egypt's just demand that the parties guilty of aggression should be punished and that she should be compensated for the damage caused by the hostilities"

(5) The two Governments called for the admission of the People's Republic of China to the United Nations, and described her continued barring from the U.N. as "intolerable."

(6) The U S S R. and Rumania were agreed that "reactionary forces in Hungary, taking advantage of the desire of the Hungarian people to correct the mistakes and shortcomings revealed in internal policy," had "attempted to destroy the Socialist system and to set up in Hungary a breeding-ground for Fascism, thus endangering peace in Europe." They expressed satisfaction that "the healthy forces of Hungary" had "rallied round the Revolutionary Workers' and Peasants' Government and, relying on the assistance of the other Socialist countries, have succeeded in upholding the gains of the people's democratic system." The Rumanian delegation agreed that the Soviet Government's "assistance to the Hungarian Government" had been in discharge of its "international duty to the working people of Hungary and of the other socialist countries."

(7) On European security, both Governments stressed the danger of a division of Europe into opposing blocs, and their readiness "to make fresh efforts with the object of creating a system of general European security which would unite the European States without distinction as to their political and social systems." In the existing situation, however, the "peace-loving countries" were threatened by "an aggressive military bloc in Western Europe, the remilitarization of Western Germany, the growth of revenge-thirsty forces, and the numerous U S. and NATO bases close to the Socialist countries." Under these circumstances the Rumanian and Soviet Governments agreed that it was "appropriate" that Soviet armed forces should be temporarily stationed in Rumania under the Warsaw Treaty.

(8) Economic relations between the U.S.S.R. and Rumania would be strengthened "on the basis of equality, respect for national sovereignty, fraternal mutual assistance, and mutual benefit."

(9) Cultural relations between the two countries would similarly be expanded and intensified.

It was also announced that the Soviet Government had agreed to make 450,000 tons of wheat available to Rumania during the first half of 1957, in addition to 60,000 tons of fodder grain to be paid for under the existing Soviet-Rumanian trade agreement, in connexion with the failure of the Rumanian grain crop. In addition, the U.S.S.R. had agreed to render technical assistance in the construction of chemical and oil installations, and to postpone the payments due by Rumania during 1957-59 for certain long-term credits granted by the Soviet Government to Rumania.—(Soviet Weekly) **(15275 B.)**

D. **Corrigendum.—U.K. Fiduciary Issue.** The figures in report 15266 A refer to the year 1956, not 1955 as incorrectly stated. (Ed. K.C.A.).

A. UNITED KINGDOM. — The Queen's Christmas Broadcast to the Commonwealth.

H.M. the Queen broadcast the following Christmas message to the Commonwealth from Sandringham on Dec. 25:

"Once again messages of Christmas greeting have been exchanged around the world From all parts of the Commonwealth and from the remote and lonely spaces of Antarctica, words and thoughts taking their inspirations from the birth of the Child in Bethlehem long ago have been carried between us upon invisible wings of twentieth-century science.

"Neither the long and troubled centuries that have passed since that Child was born nor the complex scientific developments of our age have done anything to dim the simple joy and bright hope we all feel when we celebrate His birthday That joy and hope find their most complete fulfilment within the loving circle of a united family.

"You will understand me, therefore, when I tell you that of all the voices we have heard this afternoon, none has given my children and myself greater joy than that of my husband. To him I say: 'From all the members of the family gathered here today our very best good wishes go out to you on board *Britannia*, as you voyage together in the far southern seas. Happy Christmas from us all.'

"Of course, it is sad for us to be separated on this day and, of course, we look forward to the moment when we shall again be together. Yet my husband's absence at this time has made me even more aware than I was before of my own good fortune in being one of a united family. With that consciousness in mind, I would like to send a special message of hope and encouragement to all who are not so blessed, or for any reason cannot be with those they love today: to the sick who cannot be at home; to all who serve their country in foreign lands, or whose duty keeps them upon the oceans; and to every man or woman whose destiny it is to walk through life alone. Particularly on this day of the family festival, let us remember those who, like the Holy Family before them, have been driven from their homes by war or violence. We call them refugees: let us give them a true refuge; let us see that for them and their children there is room at the inn

"If my husband cannot be home on Christmas Day, I could not wish for a better reason than that he should be travelling in other parts of the Commonwealth. On his journey he has returned to many places that we have already visited together, and he has been to others that I have never seen. On the voyage back to England he will call at some of the least accessible parts of the world, those islands of the South Atlantic separated from us by immense stretches of the ocean, yet linked to us with bonds of brotherhood and trust.

"One idea above all others has been the mainspring of this journey. It is the wish to foster and advance concord and understanding within the Commonwealth. No purpose comes nearer to my own desires, for I believe that the way in which our Commonwealth is developing represents one of the most hopeful and imaginative experiments in international affairs that the world has ever seen. If, as its Head, I can make any real personal contribution towards its progress, it must surely be to promote its unity

"We talk of ourselves as a family of nations, and perhaps our relations with one another are not so very different from those which exist between members of any family. We all know that these are not always easy, for there is no law within a family which binds its members to think or act alike. And surely it is this very freedom of choice and decision which gives exceptional value to friendship in times of stress and disagreement. Such friendship is a gift for which we are truly and rightly grateful.

"None the less, deep and acute differences involving both intellect and emotion are bound to arise between members of a family, and also between friend and friend, and there is neither virtue nor value in pretending that they do not. In all such differences, however, there comes a moment when, for the sake of ultimate harmony, the healing power of tolerance, comradeship, and love must be allowed to play its part.

"I speak of a tolerance that is not indifference, but is rather a willingness to recognize the possibility of right in others; of a comradeship that is not just a sentimental memory of good days past, but the certainty that the tried and staunch friends of yesterday are still in truth the same people today; of a love that can rise above anger and is ready to forgive.

"That each one of us should give this power a chance to do its work is my heartful message to you all upon this Christmas Day. I can think of no better resolve to make nor any better day on which to make it. Let us remember this during our festivities, for it is part of the Christmas message, 'Goodwill toward men.'"

The Queen's broadcast had been preceded by a broadcast by the Duke of Edinburgh from the Royal yacht *Britannia*, then in the South Pacific. The Duke had left Britain some weeks earlier for an extended tour of the Commonwealth. (The Listener - Times) **(Prev. rep. 14612 B.)**

B. NEW ZEALAND. — Decimal Coinage Report.

The New Zealand House of Representatives adopted on Aug. 29 a "most favourable" report submitted by a parliamentary committee which had considered a petition for an inquiry into the adoption of a decimal coinage system. The committee's chairman, Mr. J. Barnes, M.P., stated that a decimal coinage system had the strong support of the N.Z. Treasury.—(Directorate of Information Services, Wellington)

C. JAPAN. — Resignation of Mr. Hatoyama. - Mr. Ishibashi becomes Prime Minister.

Mr. Tanzan Ishibashi (72), Minister of International Trade and Industry, was elected president of the Liberal Democratic party, and thus became Prime Minister-designate, on Dec. 14 in succession to Mr. Ichiro Hatoyama (73), who had announced his intention of resigning the Premiership owing to ill-health and also because he had achieved his two principal objectives—the normalization of Japanese-Soviet relations and the admission of Japan to the United Nations (see 15260 E, 15195 A).

Mr. Ishibashi was elected to the party leadership on the second ballot, in which he received 258 votes against 251 for Mr. Nobosuki Kishii, secretary-general of the Liberal Democratic party. As the first ballot (in which there were three candidates) was inconclusive, none of the nominees obtaining an overall majority of the 511 delegates, the second ballot was confined by agreement to the two leading candidates, Mr. Ishibashi and Mr. Kishii.

Mr. Ishibashi, the son of a Buddhist priest, was born in 1884, studied economics at Waseda University, and entered journalism after graduation. He joined the staff of the *Oriental Economist* (Tokio), became managing editor of the paper, and made a reputation as one of Japan's leading economists, publishing several books on economic and financial problems. He did not enter political life until 1946, when he became Finance Minister in the first Yoshida Cabinet.

Mr. Hatoyama formally submitted his resignation and that of his Cabinet to the Emperor on Dec. 20. On the same day the Lower House of the Diet elected Mr. Ishibashi as Prime Minister by 291 votes against 151 for Mr. Suzuki, the Socialist leader.—(Japanese Embassy, London - New York Times) **(Prev. rep. Mr. Hatoyama, 14133 A; 14055 A.)**

D. CHINA - SOVIET UNION. — Plan for Joint Development of Amur-Argun River Basin.

Peking Radio announced on Aug. 19 that the Chinese and Soviet Governments had reached agreement on plans for the joint development of the Amur-Argun river basin, which forms the boundary between Manchuria and the Soviet Union. According to details subsequently published in the Soviet Press, the plan provided for the building of a series of hydro-electric power stations, with an annual output of 70,000,000,000 kilowatt-hours, on the Amur, the Argun, and their tributaries. These stations would supply power for the Chinese cities of Harbin, Mukden, Anshan, and Peking, and, in the Soviet Union, for the Chita, Amur, and Birobidjan regions and part of the Khabarovsk territory, as well as for the electrification of the Trans-Siberian Railway from Irkutsk to Vladivostok.

The Soviet Government proposed to develop this area industrially, and it was estimated that coking coals from South Yakutia and iron-ore from the Aldan plateau and the western part of the Amur region could be exploited to produce 3,000,000 tons of pig-iron annually. Geologists surveying the area were reported to have found rich mineral deposits, notably of tin, in the Little Khingan mountains of north-western Manchuria.

The plan also proposed a new outlet for the Amur River, which is not deep enough for large ships and is frozen at its mouth for much of the year. Three possible channels were being studied, of which one would reach the sea south of the present estuary, another would enter the Pacific near Vladivostok, and the third would pass through Manchuria and enter the sea at Liaotung Bay.—(Soviet Weekly - New York Times)

E. UNITED STATES. — Population Figures.

The U.S. Census Bureau reported on Nov. 17 that the population of the United States was 167,191,000 as at July 1, 1956—an increase of 16,493,000 (10.9 per cent) since 1950, when the last census was taken.

The most populous States were New York (16,195,000), California (13,433,000), and Pennsylvania (10,964,000), followed by Illinois (9,432,000), Ohio (9,096,000), Texas (8,925,000), and Michigan (7,526,000) New York, Ohio, Texas, and Michigan all increased their population by over 1,000,000 during the five-year period, while the Californian increase was 2,846,000 (26.9 per cent)—the highest in the United States

The least populated State was Nevada (247,000), which, however, showed the largest percentage gain of any State—an increase of 54.6 per cent since 1950, when its population was 160,083. Other States with populations under half a million were Delaware (402,000), Vermont (370,000), and Wyoming (321,000).

The population of Hawaii was 526,000, of Alaska 161,000, and of Puerto Rico 256,000—increases of 48.6 per cent, 10.2 per cent, and 2.3 per cent respectively since 1950.
